(2) The brush consists of two rows of stiff nylon bristles mounted with the tufts in a staggered position. The bristles are 0.016 inch in diameter and 0.75 inch in length. There are 20 bristles per tuft and 4 tufts per inch. A clamp is attached to the forward edge of the movable carriage to permit holding the specimen on the carriage during the brushing operation.

(3) After the specimen has been put in place on the carriage and fastened by means of the clamp, the brush is raised, the carriage pushed to the dear, and the brush lowered to the face of the specimen. The carriage is then drawn forward by hand at a uniform rate.

(d) *Dry cleaning.*—A swatch from each sample, as mentioned in paragraph (a)(4) of this section, shall be subjected to the following dry-cleaning procedure.

(1) *Apparatus.*—The apparatus is a cylinder, preferably of metal, approximately 13 inches high and about 8¾ inches in diameter (capacity 3 gallons). The cylinder is mounted in a vertical position on an axis which is inclined 50° to the axis of the cyinder, and is rotated about this axis at a speed of 45 to 50 revolutions per minute.

(2) *Cleaning procedure.*—The apparatus is filled approximately one-third with perchlorethylene to which is added 270 ml of dry-cleaning soap.[3] The swatches and sufficient suitable worsted cloth,[4] in pieces of approximately 12 by 12 inches, to make a total dry load of 1 pound are placed in the apparatus. It is operated for 25 minutes. The solution is poured out, the apparatus refilled to approximately one-third with fresh perchlorethylene without soap, and the apparatus is operated for an additional 5 minutes. This last operation is repeated three times. The swatches are then removed and the excess solvent removed from the swatches by any convenient means, such as rolling them between two layers of turkish toweling or between two layers of absorbent paper. They are then permitted to dry at room temperature.

(e) *Washing procedure.* — The swatches, after being subjected to the

[1] This device is manufactured by the United States Testing Co., 1415 Park Avenue, Hoboken, N.J.

[2] See § 1610.61(c)(2) for a clarification of the brushing technique for fabric with raised-fiber surfaces.

[1] See footnote h; This picture is a reproduction of the figure published in the original standard, and does not truly represent the Commission's interpretation of the proper position of the specimen during the brushing procedure (§ 1610.61(c)(2)). Specifically, the specimen in the picture appears to be below the level of the upper half of the specimen holder while the clarification requires the specimen to be placed above this level. Also, § 1610.61(c)(1) allows for the use of L-shaped guides.

[3] The soap shall be made by dissolving 56 grams of caustic potash (KOH) in 100 ml of water. The potassium hydroxide solution shall be poured slowly, with constant stirring, into a mixture of 340 grams of oleic acid, 400 ml of Stoddard solvent (Commercial Standard CS3-40 grade), and 100 ml of tertiary butyl alcohol or an equal quantity of butyl cellosolve.

[4] A suitable worsted test fabric known as Moth Test cloth may be obtained from Testfabrics, Inc., 55 Van Dam St., New York 13, N.Y.

V 40 250 DEC 30 75 XUM

dry-cleaning procedure (paragraph (d) of this section), shall then be immersed and worked gently for 5 minutes in a bath of soft water in which 0.5-percent neutral chip soap has been dissolved. The volume of the bath shall be 30 times the weight of the swatches and the temperature shall be between 95° and 100° F. The swatches shall then be rinsed twice in water at 80° F., extracted, and dried. The individual specimens, each 2 by 6 inches, are then cut out as described in paragraph (a)(5) of this section and tested as described in paragraphs (f) and (g) of this section.

(f) *Brushing and drying specimens.*—Each specimen having a raised-fiber surface, in its original condition or after dry cleaning and washing, is placed on the brushing device carriage (paragraph (c) of this section) and drawn under the brush once against the lay of the raised-fiber surface (see fig. 4). Other specimens do not require brushing. All specimens are clamped individually in the specimen holders of the flammability tester (paragraph (b)(3) of this section), with the staple on top and the stapled end at the closed end of the holder. They are then dried in a horizontal position in an oven for 30 minutes at 221° F (105° C), removed from the oven, and placed over anhydrous calcium chloride in a desiccator until cool, but for not less than 15 minutes.

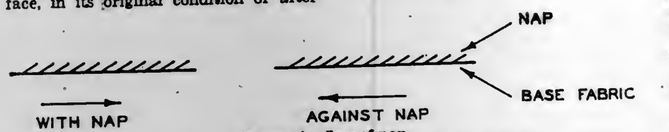

FIGURE 4.—Lay of nap.

(g) *Procedure for testing flammability.* (1) Adjust the position of the rack of the flammability tester (paragraph (b)(2) of this section) with a holder and trial specimen (not a prepared specimen) in position, so that the tip of the indicator finger touches the face of the specimen.

(2) Open the control valve in the fuel supply. Allow approximately 5 minutes for the air to be drawn from the fuel line, ignite the gas and adjust the flame to a length of ⅝ inch, measured from its tip to the opening in the gas nozzle.

(3) Remove the mounted specimen from the desiccator and place it in position on the rack in the chamber of the apparatus.

(4) See that the stop cord (No. 50 cotton sewing thread) is strung through the guides in the upper plate of the specimen holder across the top of the specimen, and through the guides at the rear of the chamber over the guide ring, and that the weight is hooked in place close to and just below the guide ring. Set the stop watch at zero. Close the door of the apparatus. Conduct the test in a draft-free room with the apparatus at room temperature.

(5) Bring the starting lever over to the extreme right and release it. This starts the timing mechanism and applies the flame to the specimen for a period of 1 second. This should be done within 45 seconds of the time the specimen was removed from the desiccator. Timing is automatic, starting upon application of the flame and ending when the weight is released by the burning of the stop cord.

(6) Record the time of flame spread (reading of stop watch) of each specimen and note whether the base of each specimen having a raised-fiber surface is ignited or fused to a point where the damage is apparent from the bottom of the specimen.

(7) *Results.* (i) *Time of flame spread.*—The time of flame spread of the textile is taken as an average time for 5 specimens. Results of tests of specimens before and after dry cleaning and washing shall be recorded and reported separately. If the time of flame spread is less than 4 seconds[4] or if the specimens do not burn, test 5 additional specimens. The time of flame spread is then taken to be the average time for the 10 specimens or for as many of them as burn.

(ii) *Base fabric ignition or fusing.*—Base fabric ignition or fusing of textiles having raised-fiber surfaces shall be reported when the base fabric of more than 1 of the 5 (or 2 of the 10) specimens tested ignites or fuses.[5]

(8) *Reporting results.*—The reported result shall be the flammability before or after dry cleaning and washing, whichever is the lower; and, based on this result, the textile shall be placed in the proper classification as given in § 1610.3.

§ 1610.5 Notes.

The methods of test and classifications outlined herein agree with all essential requirements of the Standard Test Method for Flammability of Clothing Textiles, of the American Association of Textile Chemists and Colorists.

Subpart B—Rules and Regulations

AUTHORITY: Sec. 5, 15 U.S.C. 1194, unless otherwise noted.

NOTE: An interpretation, with respect to Ornamental Veils or Veilings, issued by the Federal Trade Commission at 32 F.R. 11850, Aug. 17, 1967, provides as follows:

Ornamental millinery veils or veilings when used as a part of, in conjunction with, or as a hat, are not to be considered such a "covering for the neck, face, or shoulders" as would, under the first proviso of section 2(d) of the Flammable Fabrics Act, cause the hat to be included within the definition of the term "article of wearing apparel" where such ornamental millinery veils or veilings do not extend more than nine (9) inches from the tip of the crown of the hat to which they are attached and do not extend more than two (2) inches beyond the edge of the brim of the hat.

Where hats are composed entirely of ornamental millinery veils or veilings such hats will not be considered as subject to the Flammable Fabrics Act if the veils or veilings from which they are manufactured were not more than nine (9) inches in width and do not extend more than nine (9) inches from the tip of the crown of the completed hat.

§ 1610.31 Terms defined.

As used in this part, unless the context otherwise specifically requires:

(a) The term "act" means the "Flammable Fabrics Act" (approved June 30, 1953, Pub. Law 88, 83d Congress, 1st sess., 15 U.S.C. 1191; 67 Stat. 111) as amended, 68 Stat. 770, August 23, 1954.

(b) The terms "rule", "rules", "regulations", and "rules and regulations", mean the rules and regulations prescribed by the Commission pursuant to section 5(c) of the act.

(c) The term "United States" means, the several States, the District of Columbia, the Commonwealth of Puerto Rico and the Territories, and Possessions of the United States.

(d) The terms "marketing or handling" means the transactions referred to in section 3 of the Flammable Fabrics Act, as amended in 1967.

(e) The terms "uncovered or exposed part" of an article of wearing apparel as used in section 4(a) of the act, mean that part of such article of apparel which might during normal wear be open to flame or other means of ignition.

NOTE: The outer surface of an undergarment is considered to be an uncovered or exposed part of an article of wearing apparel, and thus subject to the act.

(f) The term "textile fabric" means any coated or uncoated material subject to the act, except film and fabrics having a nitro-cellulose fiber, finish, or coating, which is woven, knitted, felted or otherwise produced from any natural or man-made fiber, or substitute therefor, or combination thereof, of two inches or more in width, and which is in a form or condition ready for use in wearing apparel.

(g) The term "plain surface textile fabric" means any textile fabric which does not have an intentionally raised fiber or yarn surface such as a pile, nap, or tuft, but shall include those fabrics having fancy woven, knitted or flock printed surfaces.

(h) The term "raised surface textile fabric" means any textile fabric which has an intentionally raised fiber or yarn surface such as a pile, nap, or tufting.

(i) The term "film" means any non-rigid, unsupported plastic, rubber or

[4] In the Flammable Fabrics Act, Congress adopted CS 191–53 as the Commercial Standard to be applied under the law.

On August 23, 1954, the Flammable Fabrics Act was amended, changing the test for the time of flame spread for plain-surfaced fabrics, provided in paragraphs 3.1.1.1 and 3.1.3.1 [codified as §§ 1610.3(a)(1)(i) and 1610.3(a)(3)(i)], by reducing the burning time from 4 to 3½ seconds.

For the purposes of the administration of that act, therefore, the 3½-second burning time for plain-surfaced fabrics is applicable.

[5] See § 1610.61(c)(3) for a clarification of the criterion for a classification of Class 3.

other synthetic or natural film or sheeting, subject to the act, or any combination thereof, including transparent, translucent, and opaque material, whether plain, embossed, molded, or otherwise surface treated, which is in a form or condition ready for use in wearing apparel, and shall include film or sheeting exceeding 10 mils in thickness.

(j) The term "test" means the application of the relevant test method prescribed in the procedures provided under section 4(a) of the act.

(k) The term "initial test" means tests made under the procedures prescribed in section 4(a) of the act of specimens taken from two separate pieces of a textile fabric, or textile fabric with a nitrocellulose fiber, finish or coating, having the same weight, construction and finish type, or from two separate runs of film having the same formula, finish, color, and thickness.

(l) The term "finish type" means a particular finish, but does not include such variables as changes in color, pattern, print, or design, or minor variations in the amount or type of ingredients in the finish formulation. Examples of finish types would be starch finishes, resin finishes or parchmentized finishes.

(m) The definition of terms contained in section 2 of the act shall be applicable also to such terms when used in rules promulgated under the act.

§ 1610.32 General requirements.

No article of wearing apparel or fabric subject to the act and regulations shall be marketed or handled if such article or fabric, when tested according to the procedures prescribed in section 4(a) of the act, is so highly flammable as to be dangerous when worn by individuals.

§ 1610.33 Test procedures for textile fabrics and film.

(a)(1) All textile fabrics (except those with a nitro-cellulose fiber, finish or coating) intended or sold for use in wearing apparel, and all such fabrics contained in articles of wearing apparel, shall be subject to the requirements of the act, and shall be deemed to be so highly flammable as to be dangerous when worn by individuals if such fabrics or any uncovered or exposed part of such articles of wearing apparel exhibits rapid and intense burning when tested under the conditions and in the manner prescribed in Subpart A of this Part, and identified as "Flammability of Clothing Textiles, Commercial Standard 191–53".

(2) Notwithstanding the provisions of subparagraph (1) of this paragraph, coated fabrics, except those with a nitrocellulose coating, may be tested under the procedures outlined in Part 1611, the flammability standard incorporated in the Commercial Standard promulgated by the Secretary of Commerce effective May 22, 1953, and identified as "General Purpose Vinyl Plastic Film, Commercial Standard 192–53", and if such coated fabrics do not exhibit a rate of burning in excess of that specified in § 1611.3 they shall not be deemed to be so highly flammable as to be dangerous when worn by individuals.

(b) All film, and textile fabrics with a nitro-cellulose fiber, finish or coating intended or sold for use in wearing apparel, and all film and such textile fabrics referred to in this rule which are contained in articles of wearing apparel, shall be subject to the requirements of the act, and shall be deemed to be so highly flammable as to be dangerous when worn by individuals if such film or such textile fabrics or any uncovered or exposed part of such articles of wearing apparel exhibit a rate of burning in excess of that specified in Part 1611, the flammability standard incorporated in the Commercial Standard promulgated by the Secretary of Commerce effective May 22, 1953, and identified as "General Purpose Vinyl Plastic Film, Commercial Standard 192–53."

§ 1610.34 Only uncovered or exposed parts of wearing apparel to be tested.

In determining whether an article of wearing apparel is so highly flammable as to be dangerous when worn by individuals, only the uncovered or exposed part of such article of wearing apparel shall be tested according to the applicable procedures set forth in section 4(a) of the act.

§ 1610.35 Testing certain classes of fabrics.

(a) Any textile fabric intended for use in, or used, or contained in an article of wearing apparel, which in its normal and customary use as wearing apparel would not be dry cleaned or washed, need not, upon test made under the procedures outlined in Subpart A of Part 1610 be dry cleaned or washed as prescribed by §§ 1610.4(d) and 1610.4(e) if such fabric and article of wearing apparel when marketed or handled are marked or labeled in a clear and legible manner stating "Fabric will be dangerously flammable if dry cleaned or washed." An example of the type of fabric referred to is bridal illusion.

(b) A coated fabric need not, upon test under the procedures outlined in Subpart A of Part 1610, be dry cleaned as set forth in § 1610.4(d).

(c) In determining whether a textile fabric having a raised-fiber surface, which surface is to be used in the covered or unexposed parts of articles of wearing apparel, is so highly flammable as to be dangerous when worn by individuals, only the opposite surface or surface intended to be exposed need be tested under the applicable procedures set forth in section 4(a) of the act, providing an invoice or other paper covering the marketing or handling of such fabric is given which clearly designates that the raised-fiber surface is to be used only in the covered or unexposed parts of articles of wearing apparel.

(d) A textile fabric which is less than six inches in width need only, upon test under the procedures outlined in Subpart A of Part 1610, be tested in a lengthwise direction.

§ 1610.36 Applications of act to particular types of products.

(a) Fabrics intended or sold for processing into interlinings or other covered or unexposed parts of articles of wearing apparel shall not be subject to the provisions of section 3 of the act: *Provided*, That an invoice or other paper covering the marketing or handling of such fabrics is given which specifically designates their intended end use: *And provided further*, That with respect to fabrics which under the provisions of section 4 of the act, as amended, are so highly flammable as to be dangerous when worn by individuals, any person marketing or handling such fabrics maintains records which show the acquisition, disposition and intended end use of such fabrics, and any person manufacturing articles of wearing apparel containing such fabrics maintains records which show the acquisition, and use and disposition of such fabrics. Any person who fails to maintain such records or to furnish such invoice or other paper shall be deemed to have engaged in the marketing or handling of such products for purposes subject to the requirements of the act and such person and the products shall be subject to the provisions of sections 3, 6, 7, and 9 of the act.

(b) Fabrics intended or sold for use in those hats, gloves, and footwear which are excluded under the definition of articles of wearing apparel in section 2(d) of the act shall not be subject to the provisions of section 3 of the act: *Provided*, That an invoice or other paper covering the marketing or handling of such fabrics is given which specifically designates their intended use in such products: *And provided further*, That with respect to fabrics which under the provisions of section 4 of the act, as amended, are so highly flammable as to be dangerous when worn by individuals, any person marketing or handling such fabrics maintains records which show the acquisition, disposition, and intended end use of such fabrics, and any person manufacturing hats, gloves, or footwear containing such fabrics maintains records which show the acquisition, end use and disposition of such fabrics. Any person who fails to maintain such records or to furnish such invoice or other paper shall be deemed to have engaged in the marketing or handling of such products for purposes subject to the requirements of the Act and such person and the products shall be subject to the provisions of sections 3, 6, 7, and 9 of the act.

(c) Except as provided in paragraph (d) of this section, handkerchiefs not exceeding a finished size of twenty-four (24) inches on any side or not exceeding five hundred seventy-six (576) square inches in area are not deemed "articles of wearing apparel" as that term is used in the act.

(d) Handkerchiefs or other articles affixed to, incorporated in, or sold as a part of articles of wearing apparel as decoration, trimming, or for any other purpose, are considered an integral part

(a) The following shall constitute rea-

tained in such articles of wearing apparel

(2) Fiber composition, construction

be dangerous when worn by individuals,

V40250 DEC 30 75 XUM

of such articles of wearing apparel, and the articles of wearing apparel and all parts thereof are subject to the provisions of the act. Handkerchiefs or other articles intended or sold to be affixed to, incorporated in or sold as a part of articles of wearing apparel as aforesaid constitute "fabric" as that term is defined in section 2(e) of the act and are subject to the provisions of the act which such handkerchiefs or other articles constitute textile fabrics as the term "textile fabric" is defined in § 1610.31(f).

(e) Where an article of wearing apparel has a raised-fiber surface which is intended for use as a covered or unexposed part of the article of wearing apparel but the article of wearing apparel is, because of its design and construction, capable of being worn with the raised-fiber surface exposed, such raised-fiber surface shall be considered to be an uncovered or exposed part of the article of wearing apparel. Examples of the type of products referred to in this paragraph are athletic shirts or so-called "sweat shirts" with a raised-fiber inner side.

NOTE.—An interpretation to § 302.0(c) issued by the Federal Trade Commission, 30 F.R. 16106, Dec. 28, 1965, provides as follows: "§ 1610.36(c) does not exclude products from the act on the sole basis of the size, description or designation of such product.

"If, because of construction, design, color, type of fabric, or any other factor, a piece of cloth of a finished type or any other product of a finished type appears to be likely to be used as a covering for the head, neck, face, shoulders, or any part thereof, or otherwise appears likely to be used as an article of clothing, garment, or costume, such product is not a handkerchief and constitutes an article of wearing apparel as defined in and subject to the provisions of the Flammable Fabrics Act, irrespective of its size, or its description or designation as a handkerchief or any other term."

§ 1610.37 Reasonable and representative tests under section 8 of the act.

EXPLANATION: Section 8 of the act, among other things, provides that no person shall be subject to prosecution under section 7 of the act for a violation of section 3 of the act if such person establishes a guaranty received in good faith signed by and containing the name and address of the person by whom the wearing apparel or fabric guaranteed was manufactured or from whom it was received, to the effect that reasonable and representative tests made under the procedures provided in section 4(a) of the act show that the fabric covered by the guaranty, or used, or contained in the wearing apparel, is not, under the provisions of section 4(a) of the act, so highly flammable as to be dangerous when worn by individuals.

While one establishing a guaranty received in good faith would not be subject to criminal prosecution under section 7 of the act, he, or the merchandise involved, would nevertheless, remain subject to the administrative processes of the Consumer Product Safety Commission under section 5 of the act, as well as the injunction and condemnation procedures under section 6 of the act.

The furnishing of guaranties is not mandatory under the act. The purpose of this rule is to establish minimum requirements for the reasonable and representative tests on which guaranties may be based.

(a) The following shall constitute reasonable and representative tests, as that term is used in section 8 of the act, for those textile fabrics which by reason of their composition, construction, finish type or weight may be tested upon a class basis. The word "class" as used in this section means a category of textile fabrics having certain general constructional or finished characteristics, sometimes in association with a particular fiber, and covered by a class or type description generally recognized by the trade. In certain instances the use of class tests is restricted by this section to a particular textile fabric of the same fiber composition, construction and finish type. The results of such class tests may be used by any person as a basis for furnishing guaranties under section 8 of the act on all textile fabrics of the same class.

(1) *Plain surface textile fabrics weighing two ounces or more per square yard.* (i) One test of any plain surface textile fabric weighing two ounces or more per square yard, exclusive of metallic ornamentation, or one test of any fabric in a particular class of such fabrics, shall suffice for any such fabric or class of fabrics.

(2) *Plain surface textile fabrics weighing less than two ounces per square yard.* (i) When, on the initial test of any plain surface textile fabric weighing less than two ounces per square yard, such fabric exhibits a burning time of 3.5 seconds or more, such test may suffice for any fabric of the same fiber composition, construction and finish type. This class of fabric shall be tested at least once at intervals of not more than three months thereafter while in production. If, after four consecutive interval production tests have been made, none of such test results show the flame spread to have been less than 4.5 seconds, no further tests of such class of fabric need be made.

(ii) When, on the initial test of any plain surface textile fabric weighing less than two ounces per square yard, none of the specimens ignite, such initial test may suffice for any fabric of the same fiber composition, construction and finish type.

(iii) When, on the initial test of any plain surface textile fabric weighing less than two ounces per square yard, such fabric ignites but the flame is extinguished before the stop cord is burned, such test may suffice for any fabric of the same fiber composition, construction and finish type. This class of fabric shall be tested at least once at intervals of not more than one year thereafter while in production.

(3) *Certain raised fiber surface textile fabrics.* (i) When a test of any raised fiber surface textile fabric which has a dense cut pile of uniform short length or looped yarns, does not exhibit a surface flash and does not ignite, such test shall suffice for any such fabric having a dense cut pile of the same length or the same looped yarns and of the same fiber composition, construction and finish type. Examples of the types of fabrics referred to are velvets, velveteens, velours, and corduroys.

(ii) One test of any raised fiber surface textile fabric, the raised fiber surface of which consists of not less than ninety percentum (90%) protein fiber, or one test of any fabric in a particular class of such fabrics, shall suffice for any such fabric or class of fabrics.

(iii) When, on the initial test of any raised surface textile fabric which has a surface composed of looped yarns, such fabric exhibits a burning time in excess of 12 seconds, such test may suffice for any such fabric having the same looped yarns and of the same fiber composition, construction and finish type. An example of the type of fabric referred to is "terry cloth".

(b) Raised fiber surface textile fabrics: When, on the initial test of a raised fiber surface textile fabric, such fabric:

(1) (i) Falls within Class 2 as provided in § 1610.3(a)(2)(i), the fabric shall be tested at least once at intervals of not more than one month while in production, or if the production exceeds 50,000 yards per month, the fabric shall be tested thereafter every 50,000 yards or fraction thereof.

(ii) If, after two such intervals, production tests have been made, the test results do not show the flame spread to have been less than 4 seconds, with the base fabric ignited or fused, the fabric shall be tested at least once at intervals of not more than three months while in production, or if the production exceeds 100,000 yards per three months, the fabric shall be tested thereafter every 100,000 yards or fraction thereof.

(2) Has a flame spread in excess of 7 seconds with the base fabric ignited or fused, the fabric shall be tested at least once at intervals of not more than six months thereafter while in production.

(3) Has a surface flash, but the base fabric does not ignite nor fuse, the fabric shall be tested at least once at intervals of not more than six months thereafter while in production.

(4) Does not have a surface flash and does not ignite, the initial test shall suffice.

(c) When, on initial test a film or a textile fabric with a nitro-cellulose fiber, finish or coating, does not exhibit a burning rate in excess of 1.2 inches per second, one test each year thereafter while in production shall be deemed reasonable and representative tests for such film or textile fabric.

(d) Reasonable and representative tests of fabrics and fabrics contained in articles of wearing apparel, subject to the act, produced prior to the effective date of the act, and which have not been tested under the applicable requirements of paragraphs (a), (b), or (c) of this section, shall be an initial test for each class of such fabrics, and such tests shall be applicable to all fabrics having the same fiber composition, construction and finish type.

(e) In the case of articles of wearing apparel which are not made from fabrics but directly from yarns, the fabrics contained in such articles of wearing apparel shall be tested by the testing requirements provided in paragraphs (a) and (b) of this section.

(f) Where fabrics or fabrics contained in articles of wearing apparel have not been tested when in production by the applicable testing requirements provided in paragraphs (a), (b) or (c) of this section, one test of each such fabrics shall be made every 10,000 yards or fraction thereof, or of the fabric contained in one of every 5,000 of such articles of wearing apparel or fraction thereof, and these shall be deemed reasonable and representative tests of such fabrics.

(g) In the case of textile fabrics or textile fabrics contained in articles of wearing apparel having an appliqued, overstitched, or embroidered type of design, of a loop, pile, nap, or tufted construction, tests shall be conducted according to paragraph (b) of this section on each type of applique, overstitch, or embroidery.

(h) If tests of any textile fabric made subsequent to the initial test show a burning time of another category, then such fabric shall be tested thereafter under the testing requirements of such changed time.

(i) The application of this section, insofar as it relates to the testing of plain surface textile fabrics or such fabrics contained in articles of wearing apparel weighing two ounces or more per square yard, shall be limited to fabrics made of fibers in use or capable of being used as of May 31, 1954. Such fabrics weighing two ounces or more per square yard made in whole or in part of fibers developed and used subsequent to May 31, 1954, shall be tested in accordance with the testing requirements set out in paragraph (a)(2) of this section.

§ 1610.38 Maintenance of records by those furnishing guaranties.

(a) In order to properly administer and enforce section 8 of the act relating to guaranties, it is required that any person furnishing either a separate or continuing guaranty who has made the tests prescribed by the act and regulations shall keep and maintain records of such tests. The records to be maintained shall show:

(1) The style or range number, fiber composition, construction and finish type of each textile fabric and each textile fabric (including those with a nitrocellulose fiber, finish or coating) used or contained in an article of wearing apparel covered by the guaranty, including a swatch of the fabric tested.

(2) The stock or formula number, color, thickness and general description of each film or film used in an article of wearing apparel covered by the guaranty, including a sample of the film tested.

(3) The results of the actual tests made on the textile fabric and film or the fabric and film used or contained in an article of wearing apparel.

(b) Persons furnishing guaranties based upon class tests shall maintain records showing:

(1) Identification of the class test.

(2) Fiber composition, construction and finish type of the fabrics, or the fabrics used or contained in articles of wearing apparel so guaranteed.

(3) A swatch of each class of fabrics guaranteed.

(c) Persons furnishing guaranties based upon guaranties received by them shall maintain records showing:

(1) The guaranty received and identification of the fabrics or fabrics contained in articles of wearing apparel guaranteed in turn by them.

(d) The records referred to in this section shall be preserved for a period of three years from the date the tests were performed, or in the case of paragraph (c) of this section the guaranties were furnished.

(e) Any person furnishing a guaranty under section 8(a) of the act who neglects or refuses to maintain and preserve the records prescribed in this section shall be deemed to have furnished a false guaranty under the provisions of section 8(b) of the act.

§ 1610.39 Shipments under section 11(c) of the act.

(a) The invoice or other paper relating to the shipment or delivery for shipment in commerce of articles of wearing apparel or textile fabrics for the purpose of finishing or processing to render them not so highly flammable as to be dangerous when worn by individuals, shall contain a statement disclosing such purpose.

(b) An article of wearing apparel or textile fabric shall not be deemed to fall within the provisions of section 11(c) of the act as being shipped or delivered for shipment in commerce for the purpose of finishing or processing to render such article of wearing apparel or textile fabric not so highly flammable under section 4 of the act, as to be dangerous when worn by individuals, unless the shipment or delivery for shipment in commerce of such article of wearing apparel or textile fabric is made direct to person engaged in the business of processing or finishing textile products for the prearranged purpose of having such article of apparel or textile fabric processed or finished to render it not so highly flammable under section 4 of the act, as to be dangerous when worn by individuals, and any person shipping or delivering for shipment the article of wearing apparel or fabric in commerce for such purpose maintains records which establish (1) that the textile fabric or article of wearing apparel has been shipped for appropriate flammability treatment, and (2) that such treatment has been completed, as well as records to show the disposition of such textile fabric or article of wearing apparel subsequent to the completion of such treatment.

(c) The importation of textile fabrics or articles of wearing apparel may be considered as incidental to a transaction involving shipment or delivery for shipment for the purpose of rendering such textile fabrics or articles of wearing apparel not so highly flammable under the provisions of section 4 of the act, as to be dangerous when worn by individuals, if:

(1) The importer maintains records which establish (i) that the imported textile fabrics or articles of wearing apparel have been shipped for appropriate flammability treatment, and (ii) that such treatment has been completed, as well as records to show the disposition of such textile fabrics or articles of wearing apparel subsequent to the completion of such treatment.

(2) The importer, at the time of importation, executes and furnishes to the Bureau of Customs an affidavit stating:

These fabrics (or articles of wearing apparel) are dangerously flammable under the provisions of section 4 of the Flammable Fabrics Act, and will not be sold or used in their present condition but will be processed or finished by the undersigned or by a duly authorized agent so as to render them not so highly flammable under the provisions of section 4 of the Flammable Fabrics Act, as to be dangerously flammable when worn by individuals. The importer agrees to maintain the records required by 16 CFR 1610.39(c)(1).

(3) The importer, if requested to do so by the Bureau of Customs, furnishes an adequate specific-performance bond conditioned upon the complete discharge of the obligations assumed in subparagraph (1) and (2) of this paragraph.

NOTE: The purpose of section 11(c) is only to permit articles of wearing apparel or textile fabrics which are dangerously flammable to be shipped or delivered for shipment in commerce for the purpose of treatment or processing to render them not dangerously flammable. Section 11(c) does not in any other respect limit the force and effect of sections 3, 6, 7, and 9 of the act. In particular, section 11(c) does not authorize the sale or offering for sale of any article of wearing apparel or textile fabric which is in fact dangerously flammable at the time of sale or offering for sale, even though the seller intends to ship the article for treatment prior to delivery to the purchaser or has already done so. Moreover, under section 3 of the act a person is liable for a subsequent sale or offering for sale if, despite the purported completion of treatment to render it not dangerously flammable, the article in fact remains dangerously flammable.

Subpart C—Interpretations and Policies

§ 1610.61 Clarification of flammability standard for clothing textiles (CS 191–53).

(a) *Background.* (1) The Flammable Fabrics Act, which became effective July 1, 1954 (Public Law 83–88, 67 Stat. 111–15), adopted Commercial Standard 191–53 as a mandatory flammability standard to be applied under that act (CS 191–53 had been a voluntary commercial standard, entitled "Commercial Standard 191–53, Flammability of Clothing Textiles," which became effective January 20, 1953).

(2) On August 23, 1954, the Flammable Fabrics Act was amended (68 Stat. 770) to reduce the burning time for flame spread as provided in CS 191–53.

V 40 250 DEC 30 75 XUM

(3) As amended and revised December 14, 1967 by Public Law 90–189 (81 Stat. 568–74), the Flammable Fabrics Act no longer specifically referred to CS 191–53; however, Public Law 90–189 contained a "savings clause" (section 11), which continued the applicability of any standard effective under the act theretofore until superseded or modified. No such change occurred thereafter to CS 191–53 which, accordingly, continues to be a mandatory flammability standard under the act.

(b) *Need for clarification.* It has been brought to the attention of the Consumer Product Safety Commission that lack of clarity in CS 191–53 regarding (1) the positioning of the stop cord, (2) the technique for brushing fabrics with raised-fiber surface, and (3) the criterion for failure of a fabric with a raised-fiber surface results in variations in the way tests are conducted or results are interpreted under the standard, thereby making both compliance with and enforcement of the standard under the Flammable Fabrics Act needlessly contentious.

(c) *Clarifying interpretations.* To alleviate this situation, the Consumer Product Safety Commission adopts the following interpretations on these subjects for CS 191–53:

(1) *Stop cord.* The stop cord shall be three-eighths of an inch above and parallel to the lower surface of the top plate of the specimen holder. This condition can be achieved easily and reproducibly with the use of L-shaped guides and an additional thread guide popularly referred to as a "sky hook." The essential condition, however, is the uniform height of three-eighths of an inch for the stop cord and not the number, placement, or design of the thread guides.

(2) *Brushing.* Brushing of a specimen shall be performed with the specimen mounted in a specimen holder. The purpose of the metal plate or "template" on the carriage of the brushing device is to support the specimen during the brushing operation. Accordingly, such template should be one-eighth of an inch thick.

(3) *Criterion for failure.* In the case of those fabrics having a raised-fiber surface for which a flame spread time of less than 4 seconds occurs and is the result of surface burning (sometimes referred to as "surface flash"), the additional finding of base fabric ignition or fusion that is required to establish a failure shall have to be associated with the propagating surface flame and not the igniting flame.

(Sec. 1 et seq., 67 Stat. 111–15, as amended 68 Stat. 770, 81 Stat. 568–74 (15 U.S.C. 1191–1204, note under 1191).)

PART 1611—STANDARD FOR THE FLAMMABILITY OF VINYL PLASTIC FILM

Subpart A—The Standard

Sec.
1611.1 Purpose and scope.
1611.2 General description of products covered.
1611.3 Flammability—general requirements.
1611.4 Flammability test.

Subpart B—Rules and Regulations

1611.31 Terms defined.
1611.32 General requirements.
1611.33 Test procedures for textile fabrics and film.
1611.34 Only uncovered or exposed parts of wearing apparel to be tested.
1611.35 Testing certain classes of fabrics.
1611.36 Application of act to particular types of products.
1611.37 Reasonable and representative test under section 8 of the act.
1611.38 Maintenance of records by those furnishing guaranties.
1611.39 Shipments under section 11(c) of the act.

CODIFICATION NOTE: Part 1611 is a codification of the previously unpublished flammability standard for vinyl plastic film which was derived from part of the requirements of Commercial Standard 192–53, issued by the Department of Commerce, effective on May 22, 1953. This flammability standard became mandatory through section 4(a) of the Flammable Fabrics Act, as amended in 1954, and remains in effect due to the savings clause (section 11) of Pub. L. 90–189. Paragraph 3.11 of the Commercial Standard, referred to in the 1954 act, has been codified as § 1611.3 16 CFR Part 1609 contains the text of the Flammable Fabrics Act of 1953, as amended in 1954.

Subpart A—The Standard

AUTHORITY: Sec. 4, Pub. L. 88–88, 67 Stat. 112, as amended, 68 Stat. 770 (15 U.S.C. 1193); sec. 11, Pub. L. 90–189, 81 Stat. 568.

§ 1611.1 Purpose and scope.

The purpose of this standard is to promulgate a minimum standard for flammability of vinyl plastic film which are subject to the requirements of the Flammable Fabrics Act.

§ 1611.2 General description of products covered.

The material covered is nonrigid, unsupported, vinyl plastic film, including transparent, translucent, and opaque material, whether plain, embossed, molded or otherwise surface treated.*

* Refer to sections 2 and 4 of the Flammable Fabrics Act of 1953, as amended in 1954, set out at 16 CFR Part 1609 for the scope of this standard. The vinyl plastic film covered by Commercial Standard 192–53, as promulgated by the Secretary of Commerce was vinyl plastic film 10 mils and less in thickness (see ¶ 1.3 of the voluntary standard). After CS 191–53 and CS 192–53 were made mandatory by section 4 of the act, the Federal Trade Commission clarified the scope of the standards in rules and regulations now found at §§ 1611.31(1) and 1611.32(b) (formerly 16 CFR 302.1(a)(9) and 302.3(b)).

§ 1611.3 Flammability—general requirement.

The rate of burning shall not exceed 1.2 in./sec as judged by the average of five determinations lengthwise and five determinations transverse to the direction of processing, when the material is tested with the SPI flammability tester in accordance with the method described in § 1611.4.

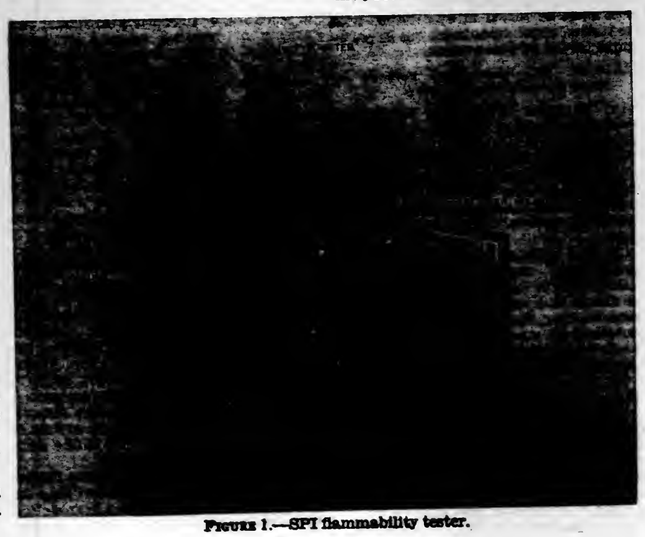

FIGURE 1.—SPI flammability tester.

§ 1611.4 Flammability test.

(a) *Apparatus and materials.*—The apparatus shall be constructed essentially as shown in figure 1 and shall consist of the following:

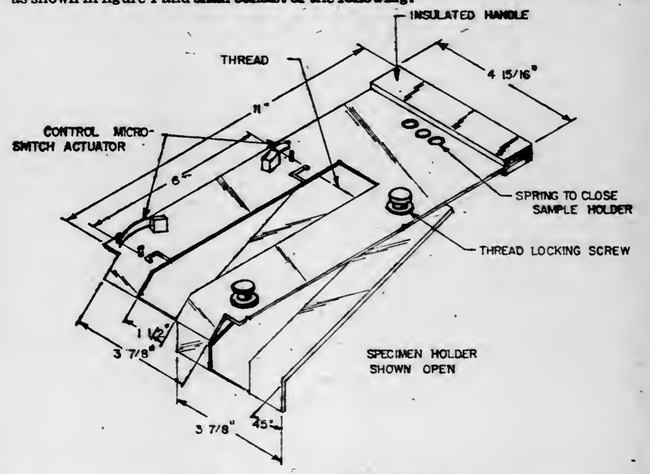

FIGURE 2.—Specimen holder.

(1) *Specimen holder.*—(i) A removable, flat, specimen-holding rack, the upper and lower sections of which are separate, shall have the shape and dimensions shown in figure 2 (sketch of sample-holding rack). The specimen is supported by tight closure of the upper and lower sections around the sides of the specimen. The center section of the rack contains an open U-shaped area in which burning of the specimen takes place. At the open end of the rack the forked sides are at an angle of 45° for the last inch. Thus, when the rack is slid into the cabinet on runners mounted at a 45° angle, the bent portion of the specimen adjacent to the igniter flame is vertical and the remainder is at 45°.

(ii) The switch actuators consist of suitable springs mounted on the side of the rack, one just beyond the curved portion at the open end, and the other at the closed end of the U-shaped holder. The springs are depressed and held in position prior to ignition by means of cotton thread suitably wound across the specimen and securely attached to the rack. As flame reaches these threads, the springs are released, thus activating the microswitches of the stop clocks.

(2) *Igniter flame.*—The igniter flame shall be produced at the tip of a No. 22 hypodermic needle jet. The igniter shall be so located in the cabinet that the tip of the needle is 9/16 in. from the surface of the specimen when the specimen rack is in place.

(3) *Cabinet.*—The cabinet shall protect the igniter flame and specimen from air currents during tests, yet contain a suitable door or window for visual operation, provision for inserting the specimen holder, and adjustable vents to supply sufficient air for combustion of the specimen. It should also be capable of rapid ventilation following a test so that all combustion products can be removed between tests. A hood may be used if its exhaust fan is turned off during the test.

(4) *Timing mechanism.*—The burning rate shall be determined by a stop clock through microswitches mounted on the specimenholder rack. The clock is started when the specimen flame burns the first thread, and is stopped when the thread at the upper end of the holder, 6 in. from the first thread, burns apart. The timing mechanism shall be capable of indicating time interval to 0.1 second.

(5) *Butane.*—Unless otherwise specified, butane gas shall be used for the igniter flame.

(6) *Thread.*—J. & P. Coats heavy-duty white cotton thread.

(7) *Microburner.*

(b) *Test specimens.* (1) Test specimens shall be 3 in. in width and 9 in. in length. They shall be free from folds or wrinkles. Five specimens from each direction (machine and transverse) of a given material shall be tested.

(2) *Conditioning.*—The conditioning procedure shall conform to the requirements of procedure B of ASTM D618, Tentative Methods of Conditioning Plastics and Electrical Insulating Materials for Testing.

(c) *Procedure.* (1) After preparing the specimens, the holder shall be threaded so as to depress the switch actuators (springs) at least ¼ in. from the edge of the holder. Each actuator shall be separately threaded, the thread passing down through the J-slots and under the upper jaws so that the thread is adjacent to the specimen when the holder is closed.

(2) The specimen shall be inserted into the holder so that it extends down into the lock springs and is held firmly between the two wires at the open end of the burning channel. These wires insure that the end of the specimen is always the correct distance from the igniter flame. The sample shall be free from wrinkles or distortion when the holder is closed. The specimen should not extend beyond the outer edge of the lower plate, otherwise the rack may not slide freely on the slide channel on introducing it into the cabinet.

(3) Prior to introducing the specimen and holder into the cabinet, both electical switches shall be set for automatic timing. The needle valve regulating the butane flow shall be adjusted to provide a ½-in. flame. (When the specimen is in place its surface is 7/8 in. from the tip of the needle and the flame is just barely flattened against the specimen. This can be checked by using a specimen made of asbestos in place of a plastic specimen.)

(4) With the hood fan off, clocks zeroed, and the flame adjusted as mentioned, the door is closed and the specimen holder is then inserted at a constant rate. The holder should be allowed to slide down the rails by gravity, taking about one-half second to travel the length of the slide. Any hesitation in bringing the specimen holder fully into burning position may cause erroneous ignition results.

(5) The burning time shall be read from the stop clock and the rate of burning calculated. Results that deviate from the mean value of all tests should be rejected if the deviation of the doubtful value is more than five times the average deviation from the mean obtained by excluding the doubtful value. Such doubtful values shall be discarded and retests made.

Subpart B—Rules and Regulations

AUTHORITY: Sec. 5, 15 U.S.C. 1194, unless otherwise noted.

NOTE: An interpretation, with respect to Ornamental Veils or Veilings, issued by the Federal Trade Commission at 32 F.R. 11650, Aug. 17, 1967, provides as follows:

Ornamental millinery veils or veilings when used as a part of, in conjunction with, or as a hat, are not to be considered such a "covering for the neck, face, or shoulders" as would, under the first proviso of section 2(d) of the Flammable Fabrics Act, cause the hat to be included within the definition of the term "article of wearing apparel" where such ornamental millinery veils or veilings do not extend more than nine (9) inches from the tip of the crown of the hat to which they are attached and do not extend more than two (2) inches beyond the edge of the brim of the hat.

Where hats are composed entirely of ornamental millinery veils or veilings such hats will not be considered as subject to the Flammable Fabrics Act if the veils or veilings from which they are manufactured were not more than nine (9) inches in width and do not extend more than nine (9) inches from the tip of the crown of the completed hat.

§ 1611.31 Terms defined.

As used in this part, unless the context otherwise specifically requires:

(a) The term "act" means the "Flammable Fabrics Act" (approved June 30,

V 40 250 DEC 30 75 XUM

1953, Pub. Law 88, 83d Congress, 1st sess., 15 U.S.C. 1191; 67 Stat. 111), as amended, 68 Stat. 770, August 23, 1954.

(b) The terms "rule", "rules", "regulations", and "rules and regulations", mean the rules and regulations prescribed by the Commission pursuant to section 5(c) of the act.

(c) The term "United States" means, the several States, the District of Columbia, the Commonwealth of Puerto Rico and the Territories and Possessions of the United States.

(d) The terms "marketing or handling" means the transactions referred to in section 3 of the Flammable Fabrics Act, as amended in 1967.

(e) The terms "uncovered or exposed part" of an article of wearing apparel as used in section 4(a) of the act, mean that part of such article of apparel which might during normal wear be open to flame or other means of ignition.

NOTE: The outer surface of an undergarment is considered to be an uncovered or exposed part of an article of wearing apparel, and thus subject to the act.

(f) The term "textile fabric" means any coated or uncoated material subject to the act, except film and fabrics having a nitro-cellulose fiber, finish, or coating, which is woven, knitted, felted or otherwise produced from any natural or man-made fiber, or substitute therefore, or combination thereof, of two inches or more in width, and which is in a form or condition ready for use in wearing apparel.

(g) The term "plain surface textile fabric" means any textile fabric which does not have an intentionally raised fiber or yarn surface such as a pile, nap, or tuft, but shall include those fabrics having fancy woven, knitted or flock printed surfaces.

(h) The term "raised surface textile fabric" means any textile fabric which has an intentionally raised fiber or yarn surface such as a pile, nap, or tufting.

(i) The term "film" means any nonrigid, unsupported plastic, rubber or other synthetic or natural film or sheeting, subject to the act, or any combination thereof, including transparent, translucent, and opaque material, whether plain, embossed, molded, or otherwise surface treated, which is in a form or condition ready for use in wearing apparel, and shall include film or sheeting exceeding 10 mils in thickness.

(j) The term "test" means the application of the relevant test method prescribed in the procedures provided under section 4(a) of the act.

(k) The term "initial test" means tests made under the procedures prescribed in section 4(a) of the act of specimens taken from two separate pieces of a textile fabric, or textile fabric with a nitro-cellulose fiber, finish or coating, having the same weight, construction and finish type, or from two separate runs of film having the same formula, finish, color, and thickness.

(l) The term "finish type" means a particular finish, but does not include such variables as changes in color, pattern, print, or design, or minor variations in the amount or type of ingredients in the finish formulation. Examples of finish types would be starch finishes, resin finishes or parchmentized finishes.

(m) The definition of terms contained in section 2 of the act shall be applicable also to such terms when used in rules promulgated under the act.

§ 1611.32 General requirements.

No article of wearing apparel or fabric subject to the act and regulations shall be marketed or handled if such article or fabric, when tested according to the procedures prescribed in section 4(a) of the act, is so highly flammable as to be dangerous when worn by individuals.

§ 1611.33 Test procedures for textile fabrics and film.

(a) (1) All textile fabrics (except those with a nitro-cellulose fiber, finish or coating) intended or sold for use in wearing apparel, and all such fabrics contained in articles of wearing apparel, shall be subject to the requirements of the act, and shall be deemed to be so highly flammable as to be dangerous when worn by individuals if such fabrics or any uncovered or exposed part of such articles of wearing apparel exhibits rapid and intense burning when tested under the conditions and in the manner prescribed in Subpart A of this Part, and identified as "Flammability of Clothing Textiles, Commercial Standard 191–53".

(2) Notwithstanding the provisions of subparagraph (1) of this paragraph, coated fabrics, except those with a nitro-cellulose coating, may be tested under the procedures outlined in Part 1611, the flammability standard incorporated in the Commercial Standard promulgated by the Secretary of Commerce effective May 22, 1953, and identified as "General Purpose Vinyl Plastic Film, Commercial Standard 192–53", and if such coated fabrics do not exhibit a rate of burning in excess of that specified in § 1611.3 they shall not be deemed to be so highly flammable as to be dangerous when worn by individuals.

(b) All film, and textile fabrics with a nitro-cellulose fiber, finish or coating intended or sold for use in wearing apparel, and all film and such textile fabrics referred to in this rule which are contained in articles of wearing apparel, shall be subject to the requirements of the act, and shall be deemed to be so highly flammable as to be dangerous when worn by individuals if such film or such textile fabrics or any uncovered or exposed part of such articles of wearing apparel exhibit a rate of burning in excess of that specified in Part 1611, the flammability standard incorporated in the Commercial Standard promulgated by the Secretary of Commerce effective May 22, 1953, and identified as "General Purpose Vinyl Plastic Film, Commercial Standard 192–53."

§ 1611.34 Only uncovered or exposed parts of wearing apparel to be tested.

In determining whether an article of wearing apparel is so highly flammable as to be dangerous when worn by individuals, only the uncovered or exposed part of such article of wearing apparel shall be tested according to the applicable procedures set forth in section 4(a) of the act.

§ 1611.35 Testing certain classes of fabrics.

(a) Any textile fabric intended for use in, or used, or contained in an article of wearing apparel, which in its normal and customary use as wearing apparel would not be dry cleaned or washed, need not, upon test made under the procedures outlined in Subpart A of Part 1610, be dry cleaned or washed as prescribed by §§ 1610.4(d) and 1610.4(e) if such fabric and article of wearing apparel when marketed or handled are marked or labeled in a clear and legible manner stating "Fabric will be dangerously flammable if dry cleaned or washed." An example of the type of fabric referred to is bridal illusion.

(b) A coated fabric need not, upon test under the procedures outlined in Subpart A of Part 1610, be dry cleaned as set forth in § 1610.4(d).

(c) In determining whether a textile fabric having a raised-fiber surface, which surface is to be used in the covered or unexposed parts of articles of wearing apparel, is so highly flammable as to be dangerous when worn by individuals, only the opposite surface or surface intended to be exposed need be tested under the applicable procedures set forth in section 4(a) of the act, providing an invoice or other paper covering the marketing or handling of such fabric is given which clearly designates that the raised-fiber surface is to be used only in the covered or unexposed parts of articles of wearing apparel.

(d) A textile fabric which is less than six inches in width need only, upon test under the procedures outlined in Subpart A of Part 1610, be tested in a lengthwise direction.

§ 1611.36 Application of act to particular types of products.

(a) Fabrics intended or sold for processing into interlinings or other covered or unexposed parts of articles of wearing apparel shall not be subject to the provisions of section 3 of the act: *Provided*, That an invoice or other paper covering the marketing or handling of such fabrics is given which specifically designates their intended end use: *And provided further*, That with respect to fabrics which under the provisions of section 4 of the act, as amended, are so highly flammable as to be dangerous when worn by individuals, any person marketing or handling such fabrics maintains records which show the acquisition, disposition and intended end use of such fabrics, and any person manufacturing articles of wearing apparel containing such fabrics maintains records which show the acquisition, and use and disposition of such fabrics. Any person who fails to maintain such records or to furnish such invoice or other paper shall be deemed to have engaged in the marketing or handling of such products for purposes subject to the requirements of the act and such person

and the products shall be subject to the provisions of sections 3, 6, 7, and 9 of the act.

(b) Fabrics intended or sold for use in those hats, gloves, and footwear which are excluded under the definition of articles of wearing apparel in section 2(d) of the act shall not be subject to the provisions of section 3 of the act: *Provided*, That an invoice or other paper covering the marketing or handling of such fabrics is given which specifically designates their intended use in such products: *And provided further*, That with respect to fabrics which under the provisions of section 4 of the act, as amended, are so highly flammable as to be dangerous when worn by individuals, any person marketing or handling such fabrics maintains records which show the acquisition, disposition, and intended end use of such fabrics, and any person manufacturing hats, gloves, or footwear containing such fabrics maintains records which show the acquisition, end use and disposition of such fabrics. Any person who fails to maintain such records or to furnish such invoice or other paper shall be deemed to have engaged in the marketing or handling of such products for purposes subject to the requirements of the act and such person and the products shall be subject to the provisions of sections 3, 6, 7, and 9 of the act.

(c) Except as provided in paragraph (d) of this section, handkerchiefs not exceeding a finished size of twenty-four (24) inches on any side or not exceeding five hundred seventy-six (576) square inches in area are not deemed "articles of wearing apparel" as that term is used in the act.

(d) Handkerchiefs or other articles affixed to, incorporated in, or sold as a part of articles of wearing apparel as decoration, trimming, or for any other purpose, are considered an integral part of such articles of wearing apparel, and the articles of wearing apparel and all parts thereof are subject to the provisions of the act. Handkerchiefs or other articles intended or sold to be affixed to, incorporated in or sold as a part of articles of wearing apparel as aforesaid constitute "fabric" as that term is defined in section 2(e) of the act and are subject to the provisions of the act which such handkerchiefs or other articles constitute textile fabrics as the term "textile fabric" is defined in § 1611.31(f).

(e) Where an article of wearing apparel has a raised-fiber surface which is intended for use as a covered or unexposed part of the article of wearing apparel but the article of wearing apparel is, because of its design and construction, capable of being worn with the raised-fiber surface exposed, such raised-fiber surface shall be considered to be an uncovered or exposed part of the article of wearing apparel. Examples of the type of products referred to in this paragraph are athletic shirts or so-called "sweat shirts" with a raised fiber inner side.

NOTE: An interpretation to § 302.6(c) issued by the Federal Trade Commission, 30 FR 16106, Dec. 28, 1965, provides as follows: "§ 1611.36(c) does not exclude products from the act on the sole basis of the size, description or designation of such product. "If, because of construction, design, color, type of fabric, or any other factor, a piece of cloth of a finished type or any other product of a finished type appears to be likely to be used as a covering for the head, neck, face, shoulders, or any part thereof, or otherwise appears likely to be used as an article of clothing, garment, or costume, such product is not a handkerchief and constitutes an article of wearing apparel as defined in and subject to the provisions of the Flammable Fabrics Act, irrespective of its size, or its description or designation as a handkerchief or any other term."

§ 1611.37 Reasonable and representative tests under section 8 of the act.

EXPLANATION: Section 8 of the act, among other things, provides that no person shall be subject to prosecution under section 7 of the act for a violation of section 3 of the act if such person establishes a guaranty received in good faith signed by and containing the name and address of the person by whom the wearing apparel or fabric guaranteed was manufactured or from whom it was received, to the effect that reasonable and representative tests made under the procedures provided in section 4(a) of the act show that the fabric covered by the guaranty, or used, or contained in the wearing apparel, is not, under the provisions of section 4 (a) of the act, so highly flammable as to be dangerous when worn by individuals.

While one establishing a guaranty received in good faith would not be subject to criminal prosecution under section 7 of the act, he, or the merchandise involved, would nevertheless, remain subject to the administrative processes of the Consumer Product Safety Commission under section 5 of the act, as well as the injunction and condemnation procedures under section 6 of the act.

The furnishing of guaranties is not mandatory under the act. The purpose of this rule is to establish minimum requirements for the reasonable and representative tests on which guaranties may be based.

(a) The following shall constitute reasonable and representative tests, as that term is used in section 8 of the act, for those textile fabrics which by reason of their composition, construction, finish type or weight may be tested upon a class basis. The word "class" as used in this section means a category of textile fabrics having certain general constructional or finished characteristics, sometimes in association with a particular fiber, and covered by a class or type description generally recognized by the trade. In certain instances the use of class tests is restricted by this section to a particular textile fabric of the same fiber composition, construction and finish type. The results of such class tests may be used by any person as a basis for furnishing guaranties under section 8 of the act on all textile fabrics of the same class.

(1) *Plain surface textile fabrics weighing two ounces or more per square yard.* (i) One test of any plain surface textile fabric weighing two ounces or more per square yard, exclusive of metallic ornamentation, or one test of any fabric in a particular class of such fabrics, shall suffice for any such fabric or class of fabrics.

(2) *Plain surface textile fabrics weighing less than two ounces per square yard.* (i) When, on the initial test of any plain surface textile fabric weighing less than two ounces per square yard, such fabric exhibits a burning time of 3.5 seconds or more, such test may suffice for any fabric of the same fiber composition, construction and finish type. This class of fabric shall be tested at least once at intervals of not more than three months thereafter while in production. If, after four consecutive interval production tests have been made, none of such test results show the flame spread to have been less than 4.5 seconds, no further tests of such class of fabric need be made.

(ii) When, on the initial test of any plain surface textile fabric weighing less than two ounces per square yard, none of the specimens ignite, such initial test may suffice for any fabric of the same fiber composition, construction and finish type.

(iii) When, on the initial test of any plain surface textile fabric weighing less than two ounces per square yard, such fabric ignites but the flame is extinguished before the stop cord is burned, such test may suffice for any fabric of the same fiber composition, construction and finish type. This class of fabric shall be tested at least once at intervals of not more than one year thereafter while in production.

(3) *Certain raised fiber surface textile fabrics.* (i) When a test of any raised fiber surface textile fabric which has a dense cut pile of uniform short length or looped yarns, does not exhibit a surface flash and does not ignite, such test shall suffice for any such fabric having a dense cut pile of the same length or the same looped yarns and of the same fiber composition, construction and finish type. Examples of the types of fabrics referred to are velvet, velveteens, velours, and corduroys.

(ii) One test of any raised fiber surface textile fabric, the raised fiber surface of which consists of not less than ninety percentum (90%) protein fiber, or one test of any fabric in a particular class of such fabrics, shall suffice for any such fabric or class of fabrics.

(iii) When, on the initial test of any raised surface textile fabric which has a surface composed of looped yarns, such fabric exhibits a burning time in excess of 12 seconds, such test may suffice for any such fabric having the same looped yarns and of the same fiber composition, construction and finish type. An example of the type of fabric referred to is "terry cloth".

(b) Raised fiber surface textile fabrics: When, on the initial test of a raised fiber surface textile fabric, such fabric:

(1) (i) Falls within Class 2 as provided in § 1610.3(a) (2) (i), the fabric shall be tested at least once at intervals of not more than one month while in production, or if the production exceeds 50,000 yards per month, the fabric shall be tested thereafter every 50,000 yards or fraction thereof.

(ii) If, after two such intervals, production tests have been made, the test results do not show the flame spread to have been less than 4 seconds, with the base fabric ignited or fused, the fabric shall be tested at least once at intervals of not more than three months while in production, or if the production exceeds 100,000 yards per three months, the fab-

V 40 N 250 DEC 30 75 XUM

ric shall be tested thereafter every 100,000 yards or fraction thereof.

(2) Has a flame spread in excess of 7 seconds with the base fabric ignited or fused, the fabric shall be tested at least once at intervals of not more than six months thereafter while in production.

(3) Has a surface flash, but the base fabric does not ignite nor fuse, the fabric shall be tested at least once at intervals of not more than six months thereafter while in production.

(4) Does not have a surface flash and does not ignite, the initial test shall suffice.

(c) When, on initial test a film or a textile fabric with a nitro-cellulose fiber, finish or coating, does not exhibit a burning rate in excess of 1.2 inches per second, one test each year thereafter while in production shall be deemed reasonable and representative tests for such film or textile fabric.

(d) Reasonable and representative tests of fabrics and fabrics contained in articles of wearing apparel, subject to the act, produced prior to the effective date of the act, and which have not been tested under the applicable requirements of paragraphs (a), (b), or (c) of this section, shall be an initial test for each class of such fabrics, and such tests shall be applicable to all fabrics having the same fiber composition, construction and finish type.

(e) In the case of articles of wearing apparel which are not made from fabrics but directly from yarns, the fabrics contained in such articles of wearing apparel shall be tested by the testing requirements provided in paragraphs (a) and (b) of this section.

(f) Where fabrics or fabrics contained in articles of wearing apparel have not been tested when in production by the applicable testing requirements provided in paragraphs (a), (b) or (c) of this section, one test of each such fabrics shall be made every 10,000 yards or fraction thereof, or of the fabric contained in one of every 5,000 of such articles of wearing apparel or fraction thereof, and these shall be deemed reasonable and representative tests of such fabrics.

(g) In the case of textile fabrics or textile fabrics contained in articles of wearing apparel having an appliqued, overstitched, or embroidered type of design of a loop, pile, nap, or tufted construction, tests shall be conducted according to paragraph (b) of this section on each type of applique, overstitch, or embroidery.

(h) If tests of any textile fabric made subsequent to the initial test show a burning time of another category, then such fabric shall be tested thereafter under the testing requirements of such changed time.

(i) The application of this section, insofar as it relates to the testing of plain surface textile fabrics or such fabrics contained in articles of wearing apparel weighing two ounces or more per square yard, shall be limited to fabrics made of fibers in use or capable of being used as of May 31, 1954. Such fabrics weighing two ounces or more per square yard made in whole or in part of fibers developed and used subsequent to May 31, 1954, shall be tested in accordance with the testing requirements set out in paragraph (a) (2) of this section.

§ 1611.38 Maintenance of records by those furnishing guaranties.

(a) In order to properly administer and enforce section 8 of the act relating to guaranties, it is required that any person furnishing either a separate or continuing guaranty who has made the tests prescribed by the act and regulations shall keep and maintain records of such tests. The records to be maintained shall show:

(1) The style or range number, fiber composition, construction and finish type of each textile fabric and each textile fabric (including those with a nitro-cellulose fiber, finish or coating) used or contained in an article of wearing apparel covered by the guaranty, including a swatch of the fabric tested.

(2) The stock or formula number, color, thickness and general description of each film or film used in an article of wearing apparel covered by the guaranty, including a sample of the film tested.

(3) The results of the actual tests made on the textile fabric and film or the fabric and film used or contained in an article of wearing apparel.

(b) Persons furnishing guaranties based upon class tests shall maintain records showing:

(1) Identification of the class test.

(2) Fiber composition, construction and finish type of the fabrics, or the fabrics used or contained in articles of wearing apparel so guaranteed.

(3) A swatch of each class of fabrics guaranteed.

(c) Persons furnishing guaranties based upon guaranties received by them shall maintain records showing:

(1) The guaranty received and identification of the fabrics or fabrics contained in articles of wearing apparel guaranteed in turn by them.

(d) The records referred to in this section shall be preserved for a period of three years from the date the tests were performed, or in the case of paragraph (c) of this section the guaranties were furnished.

(e) Any person furnishing a guaranty under section 8(a) of the act who neglects or refuses to maintain and preserve the records prescribed in this section shall be deemed to have furnished a false guaranty under the provisions of section 8(b) of the act.

§ 1611.39 Shipments under section 11 (c) of the act.

(a) The invoice or other paper relating to the shipment or delivery for shipment in commerce of articles of wearing apparel or textile fabrics for the purpose of finishing or processing to render them not so highly flammable as to be dangerous when worn by individuals, shall contain a statement disclosing such purpose.

(b) An article of wearing apparel or textile fabric shall not be deemed to fall within the provisions of section 11(c) of the act as being shipped or delivered for shipment in commerce for the purpose of finishing or processing to render such article of wearing apparel or textile fabric not so highly flammable under section 4 of the act, as to be dangerous when worn by individuals, unless the shipment or delivery for shipment in commerce of such article of wearing apparel or textile fabric is made direct to person engaged in the business of processing or finishing textile products for the prearranged purpose of having such article of apparel or textile fabric processed or finished to render it not so highly flammable under section 4 of the act, as to be dangerous when worn by individuals, and any person shipping or delivering for shipment the article of wearing apparel or fabric in commerce for such purpose maintains records which establish (1) that the textile fabric or article of wearing apparel has been shipped for appropriate flammability treatment, and (2) that such treatment has been completed, as well as records to show the disposition of such textile fabric or article of wearing apparel subsequent to the completion of such treatment.

(c) The importation of textile fabrics or articles of wearing apparel may be considered as incidental to a transaction involving shipment or delivery for shipment for the purpose of rendering such textile fabrics or articles of wearing apparel not so highly flammable under the provisions of section 4 of the act, as to be dangerous when worn by individuals, if:

(1) The importer maintains records which establish (i) that the imported textile fabrics or articles of wearing apparel have been shipped for appropriate flammability treatment, and (ii) that such treatment has been completed, as well as records to show the disposition of such textile fabrics or articles of wearing apparel subsequent to the completion of such treatment.

(2) The importer, at the time of importation, execute and furnishes to the Bureau of Customs an affidavit stating:

These fabrics (or articles of wearing apparel) are dangerously flammable under the provisions of section 4 of the Flammable Fabrics Act, and will not be sold or used in their present condition but will be processed or finished by the undersigned or by a duly authorized agent so as to render them not so highly flammable under the provisions of section 4 of the Flammable Fabrics Act, as to be dangerously flammable when worn by individuals. The importer agrees to maintain the records required by 16 CFR 1610.39 (c) (1).

(3) The importer, if requested to do so by the Bureau of Customs, furnishes an adequate specific-performance bond conditioned upon the complete discharge of the obligations assumed in subparagraph (1) and (2) of this paragraph.

NOTE: The purpose of section 11(c) is only to permit articles of wearing apparel or textile fabrics which are dangerously flammable to be shipped or delivered for shipment in commerce for the purpose of treatment or processing to render them not dangerously flammable. Section 11(c) does not in any other respect limit the force and effect of sections 3, 6, 7, and 9 of the act. In particular, section 11(c) does not authorize the sale or offering for sale of any article of wearing apparel or textile fabric which is in fact dangerously flammable at the time of sale or offering for sale, even though the seller intends to ship the article for treatment prior to delivery to the purchaser or has already done so. Moreover, under section 3 of the act a person is liable for a subsequent sale or offering for sale if, despite the purported completion of treatment to render it not dangerously flammable, the article in fact remains dangerously flammable.

PART 1615—STANDARD FOR THE FLAMMABILITY OF CHILDREN'S SLEEPWEAR: SIZES 0 THROUGH 6X (FF 3–71)

Subpart A—The Standard

Sec.
1615.1 Definitions.
1615.2 Scope and application.
1615.3 General requirements.
1615.4 Test procedure.
1615.5 Labeling requirements.

Subpart B—Rules and Regulations

1615.31 Labeling, recordkeeping, advertising, retail display and guaranties.

Subpart C—Interpretations and Policies

1615.61 [Reserved]
1615.62 Policy and interpretation relative to items in inventory are as to recordkeeping requirements.
1615.63 Policy regarding garment production unit identification.

Subpart A—The Standard

AUTHORITY: Sec. 4, Sec. 67 stat. 112, as amended, 81 stat. 569–70; 15 U.S.C. 1193.

EFFECTIVE DATE: This standard became effective July 28, 1972. It was originally published as a notice on July 21, 1972 (37 FR 14624), and corrected on September 21, 1972 (31 FR 19662).

§ 1615.1 Definitions.

In addition to the definitions given in section 2 of the Flammable Fabrics Act, as amended (sec. 1, 81 Stat. 568; 15 U.S.C. 1191), and the procedures under the act for setting standards (Part 1607 of this chapter) the following definitions apply for the purposes of this Standard:

(a) "Children's Sleepwear" means any product of wearing apparel up to and including size 6X, such as nightgowns, pajamas, or similar or related items, such as robes, intended to be worn primarily for sleeping or activities related to sleeping. Diapers and underwear are excluded from this definition.

(b) "Size 6X" means the size defined as 6X in Department of Commerce Voluntary Product Standard, previously identified as Commercial Standard, CS 151–50 "Body Measurements for the Sizing of Apparel for Infants, Babies, Toddlers, and Children."[1]

(c) "Item" means any product of children's sleepwear, or any fabric or related material intended or promoted for use in children's sleepwear.

(d) "Trim" means decorative materials, such as ribbons, laces, embroidery, or ornaments. This definition does not include (1) individual pieces less than 2 inches in their longest dimension, provided that such pieces do not constitute or cover in aggregate a total of more than 20 square inches of the item, or (2) functional materials (findings), such as zippers, buttons, or elastic bands, used in the construction of garments.

(e) "Test Criteria" means the maximum char length and residual flame time which a sample or specimen may exhibit in order to pass an individual test.

(f) "Char Length" means the distance from the original lower edge of the specimen exposed to the flame in accordance with the procedure specified in § 1615.4 *Test procedure* to the end of the tear or void in the charred, burned, or damaged area, the tear being made in accordance with the procedure specified in § 1615.4(g) (2).

(g) "Residual Flame Time" is defined as the time from removal of the burner from the specimen to the final extinction of molten material or other fragments flaming on the base of the cabinet.

(h) "Afterglow" means the continuation of glowing of parts of a specimen after flaming has ceased.

(i) "Fabric Piece" (Piece) means a continuous, unseamed length of fabric, one or more of which make up a unit.

(j) "Fabric Production Unit" (Unit) means any quantity of finished fabric up to 5,000 linear yards for normal sampling or 10,000 linear yards for reduced sampling which has a specific identity that remains unchanged throughout the Unit except for color or print pattern as specified in § 1615.4(b). For purposes of this definition, finished fabric means fabric in its final form after completing its last processing steps as a fabric except for slitting.

(k) "Garment Production Unit" (Unit) means any quantity of finished garments up to 500 dozen which have a specific identity that remains unchanged throughout the Unit except for size, trim, findings, color, and print patterns as specified in § 1615.4(b).

(l) "Sample" means five test specimens.

(m) "Specimen" means an 8.9 x 25.4 cm. (3.5 x 10 in.) section of fabric. For garment testing the specimen will include a seam or trim.

§ 1615.2 Scope and application.

(a) This Standard provides a test method to determine the flammability of items as defined in § 1615.1(c).

(b) All items as defined in § 1615.1(c) are subject to requirements of this standard.

(c) The flammability standards for clothing textiles and vinyl plastic film, Parts 1610 and 1611 of this Chapter, are superseded by this Part 1615 insofar as they apply to items defined in § 1615.1 (c).

§ 1615.3 General requirements.

(a) *Summary of Test Method.* Five conditioned specimens, 8.9 x 25.4 cm. (3.5 x 10 in.), are suspended one at a time vertically in holders in a prescribed cabinet and subjected to a standard flame along their bottom edge for a specified time under controlled conditions. The char length and residual flame time are measured.

(b) *Test Criteria.* The test criteria when the testing is done in accordance with § 1615.4 *Test procedure* are:

(1) *Average Char Length.* The average char length of five specimens shall not exceed 17.8 cm. (7.0 in.).

(2) *Full Specimen Burn.* No individual specimen shall have a char length of 25.4 cm. (10 in.).

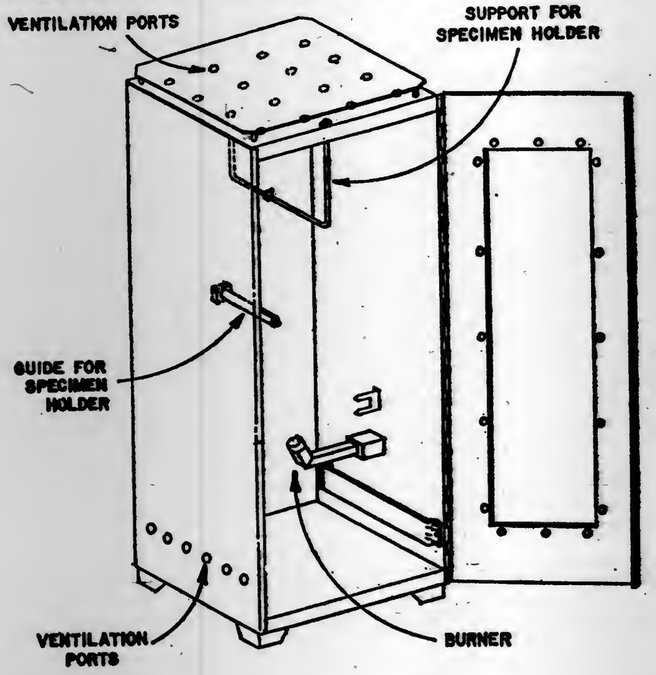
(3) *Residual Flame Time.* No individual specimen shall have a residual flame time greater than 10 seconds.

§ 1615.4 Test procedure.

(a) *Apparatus*—(1) *Test Chamber.* The test chamber shall be a steel cabinet with inside dimensions of 32.9 cm. (12 15/16 in.) wide, 32.9 cm. (12 15/16 in.) deep, and 76.2 cm. (30 in.) high. It shall have a frame which permits the suspension of the specimen holder over the center of the base of the cabinet at such a height that the bottom of the specimen holder is 1.7 cm. (¾ in.) above the highest point of the barrel of the gas burner specified in paragraph (c) of this section and perpendicular to the front of the cabinet. The front of the cabinet shall be a close fitting door with a glass insert to permit observation of the entire test. The cabinet floor shall be covered with a piece of asbestos paper, whose length and width are approximately 2.5 cm. (1 in.) less than the cabinet floor dimensions and whose thickness is a nominal 0.3 cm. (⅛ in.). A piece of asbestos paper at least 15.2 x 15.2 cm. (6 x 6 in.) and of nominal thickness of 0.15 cm. (1/16 in.) or less shall be used to catch the drips or other fragments and this latter paper shall be changed after each specimen which drips has been tested. The cabinet to be used in this test method is illustrated in Figure 1 and detailed in Engineering Drawings, Nos. 1 to 7.

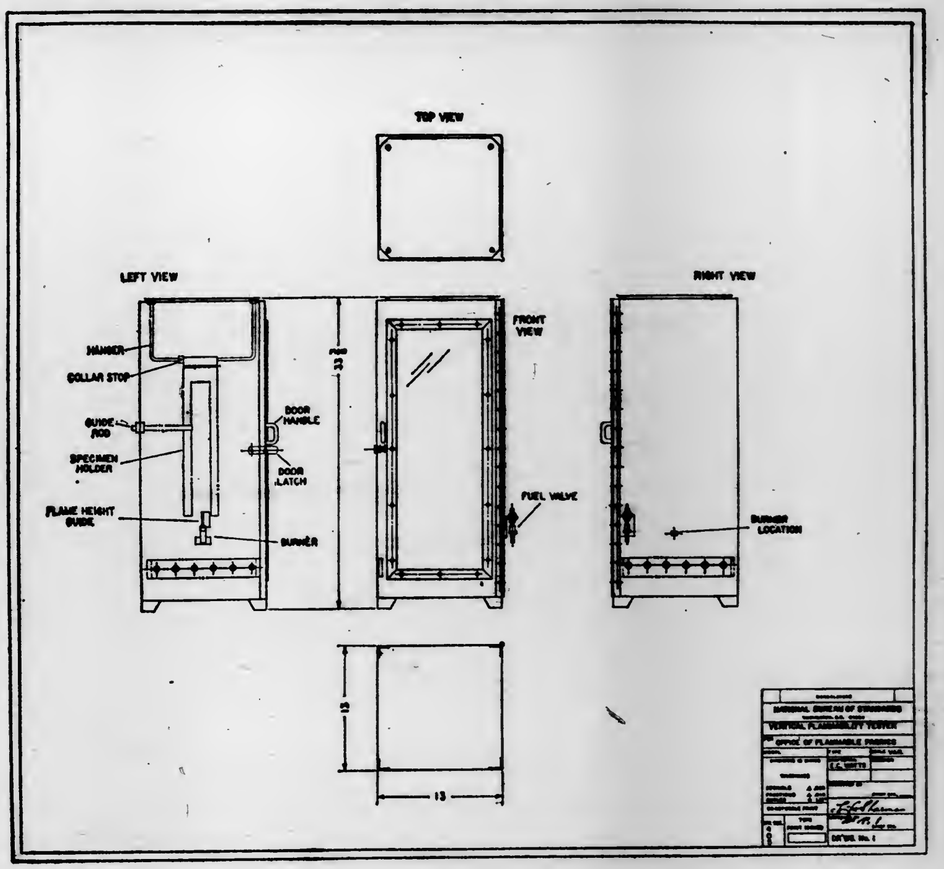
(2) *Specimen Holder.* The specimen holder is designed to permit suspension of the specimen in a fixed vertical position and to prevent curling of the specimen when the flame is applied. It shall consist of two U-shaped 0.20 cm. (14 ga. USS) thick steel plates, 42.2 cm. (16⅝ in.) long, and 8.9 cm. (3.5 in.) wide, with aligning pins. The openings in the plates shall be 35.6 cm. (14 in.) long and 5.1 cm. (2 in.) wide. The specimen shall be fixed between the plates, which shall be held together with side clamps. The holder to be used in this test method is illustrated in Figure 2 and detailed in Engineering Drawing No. 7.

(3) *Burner.* The burner shall be substantially the same as that illustrated in Figure 1 and detailed in Engineering Drawing No. 6. It shall have a tube of 1.1 cm. (0.43 in.) inside diameter. The input line to the burner shall be equipped with a needle valve. It shall have a variable orifice to adjust the height of the flame. The barrel of the burner shall be at an angle of 25° from the vertical. The burner shall be equipped with an adjustable stop collar so that it may be positioned quickly under the test specimen. The burner shall be connected to the gas source by rubber or other flexible tubing.



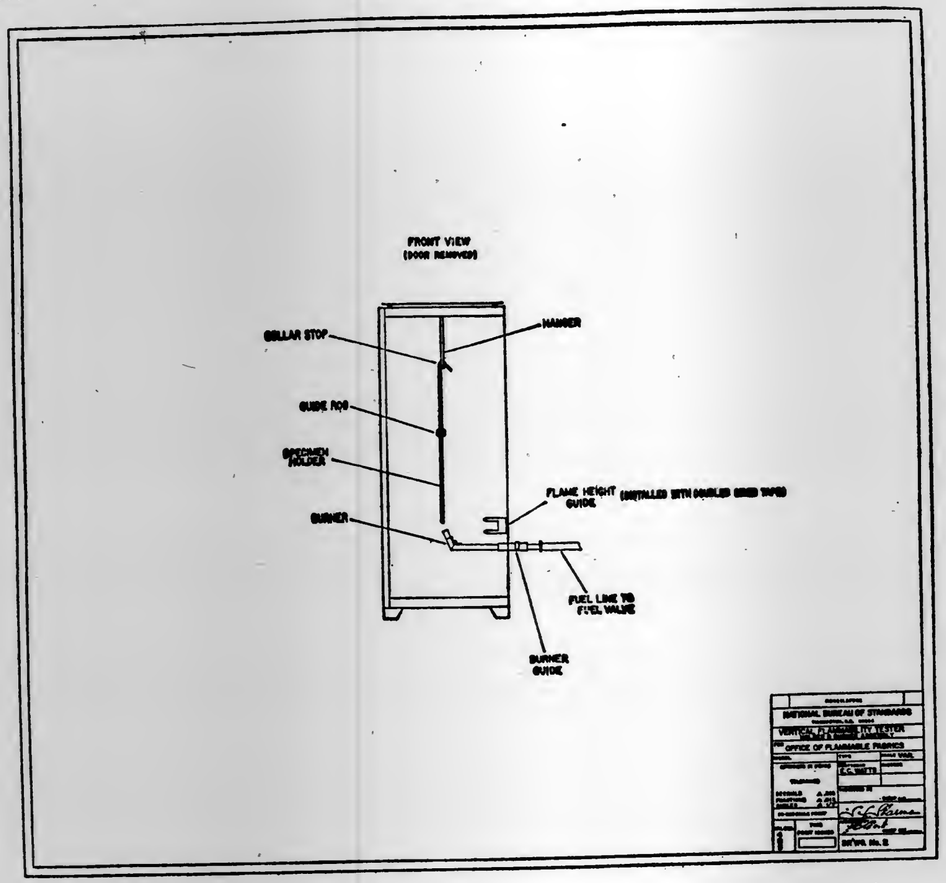
[1] Copies available from the National Technical Information Service, 5285 Port Royal Street, Springfield, VA 22151.

V 40 N 250 DEC 30 75 XUM

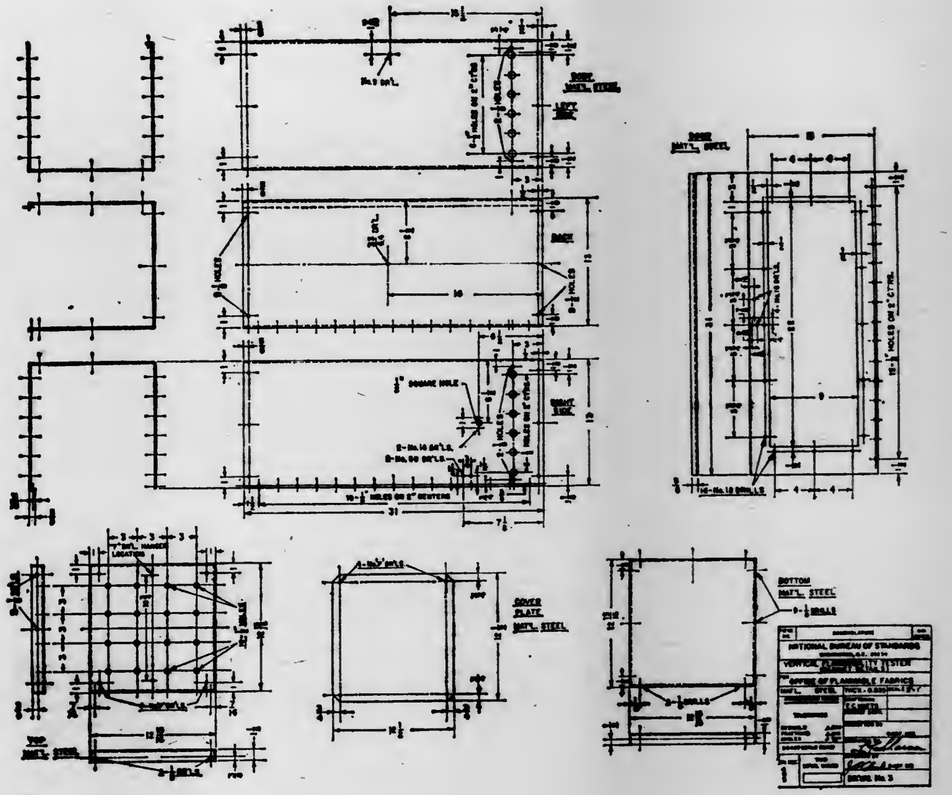


(4) *Gas Supply System.* There shall be a pressure regulator to furnish gas to the burner under a pressure of 129±13 mm. Hg (2½±¼ lbs. per sq. in.) at the burner inlet.

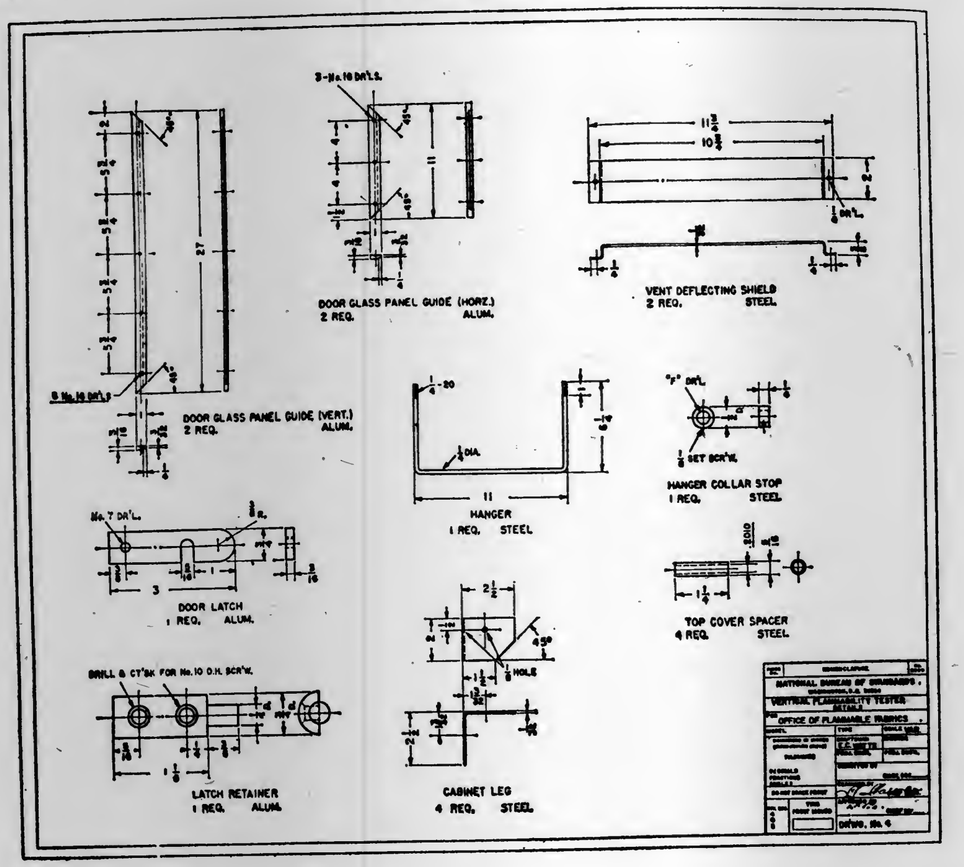
(5) *Gas.* The gas shall be at least 97 percent pure methane.

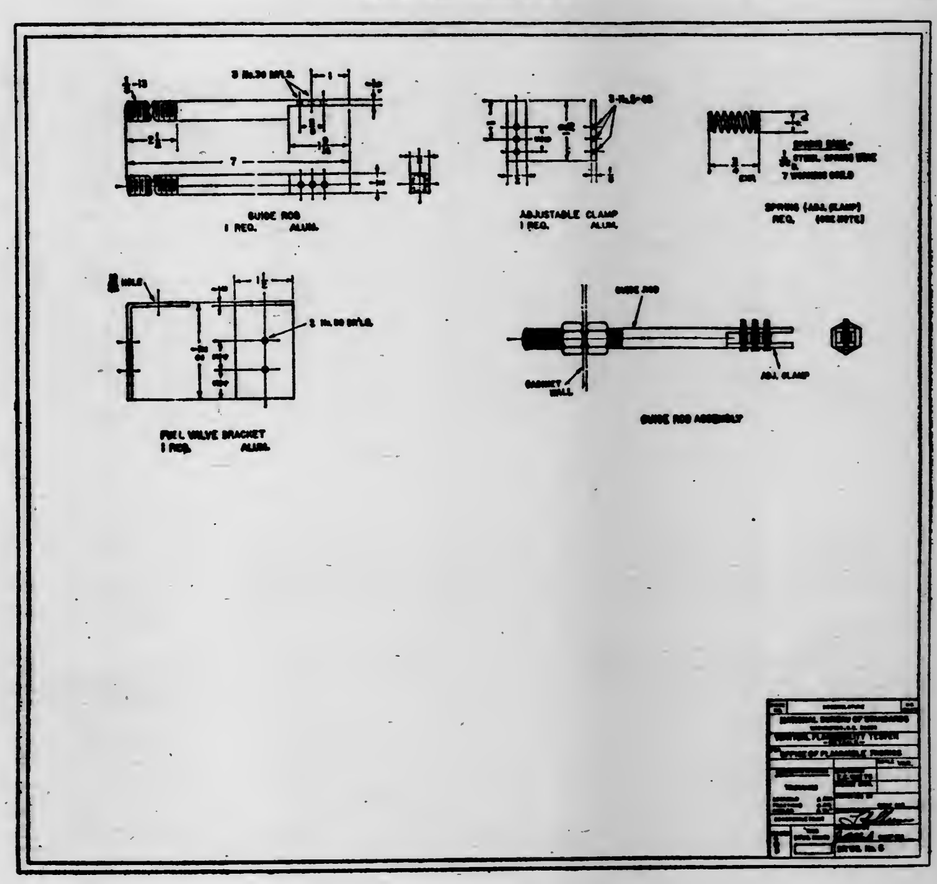


(6) *Hooks and Weights.* Metal hooks and weights shall be used to produce a series of loads for char length determinations. Suitable metal hooks consist of No. 19 gauge steel wire, or equivalent, made from 7.6 cm. (3 in.) lengths of the wire, bent 1.3 cm. (0.5 in.) from one end to a 45° angle hook. The longer end of the wire is fastened around the neck of the weight to be used and the other in the lower end of each burned specimen to one side of the burned area. The requisite loads are given in Table 1.

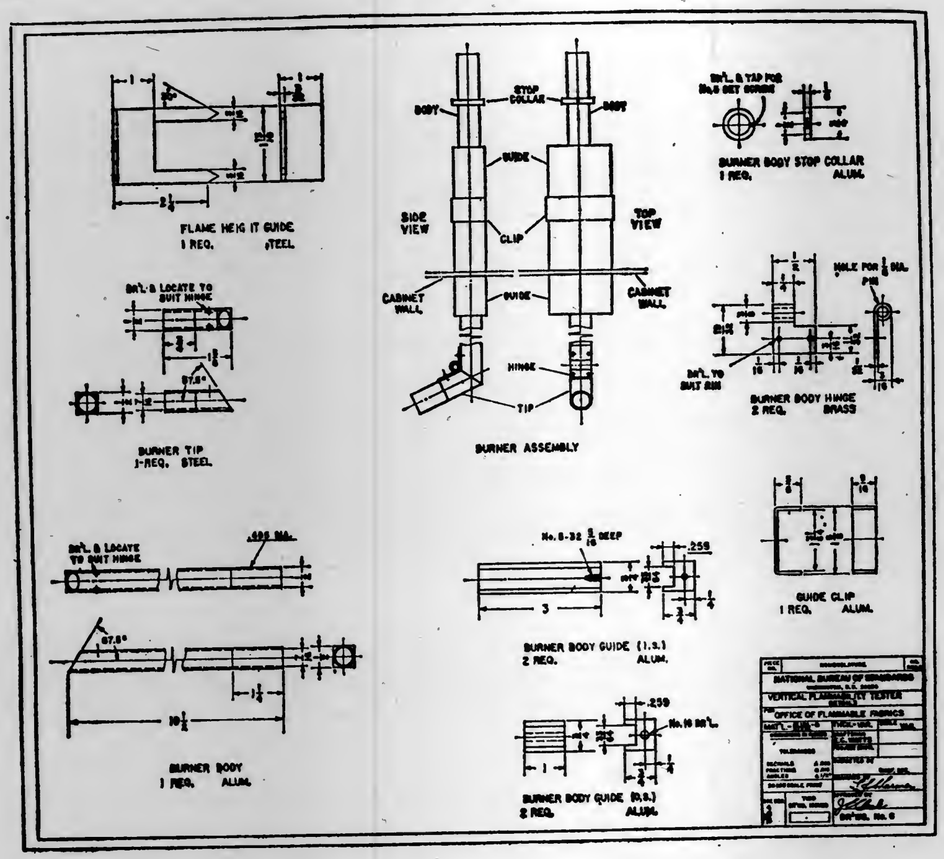


VERTICAL TEST CABINET
FIGURE 1





V40I250 DEC 30 75 XUM



V 40 250 DEC 30 75 XUM

V40250 DEC 30 75 XUM

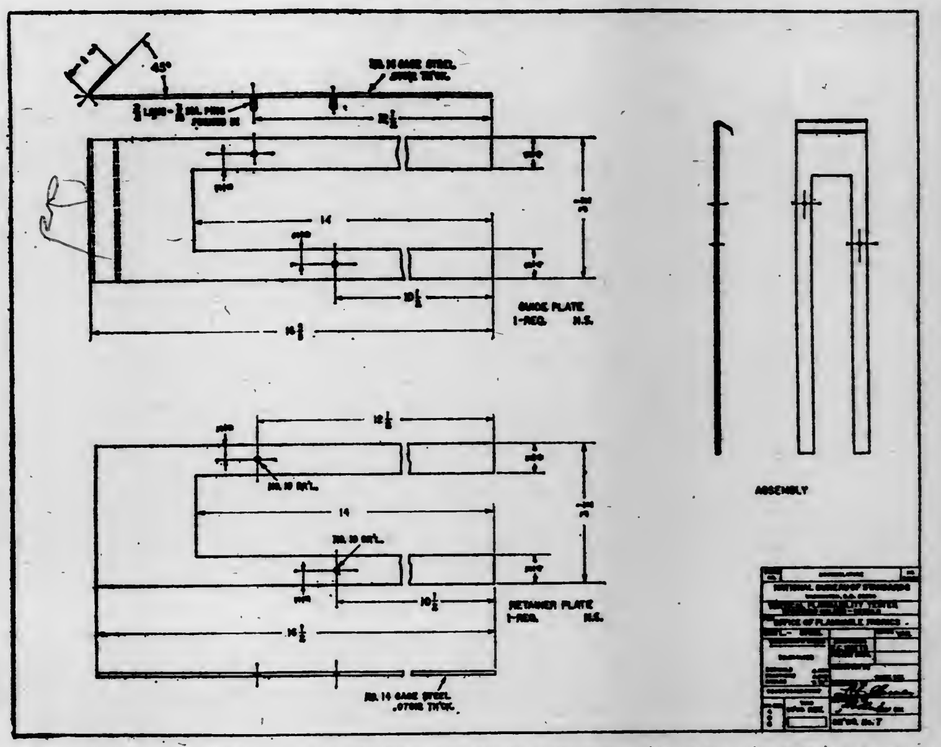


TABLE 1.—*Original fabric weight* [1]

Grams per square meter	Ounces per square yard	Loads	
		Grams	Pounds
Less than 101	Less than 3	54.4	0.12
101 to 207	3 to 6	113.4	.25
207 to 338	6 to 10	226.8	.50
Greater than 338	Greater than 10	340.2	.75

[1] Weight of the original fabric, containing no seams or trim, is calculated from the weight of a specimen which has been conditioned for at least 8 h at 21±1.1° C (70±2° F) and 65±2 pct relative humidity. Shorter conditioning times may be used if the change in weight of a specimen in successive weighings made at intervals of not less than 2 h does not exceed 0.2 pct of the weight of the specimen.

(7) *Stopwatch.* A stopwatch or similar timing device shall be used to measure time to 0.1 second.

(8) *Scale.* A linear-scale graduated in millimeters or 0.1 inch divisions shall be used to measure char length.

(9) *Circulating Air Oven.* A forced circulation drying oven capable of maintaining the specimens at 105±2.8° C. (221±5° F.), shall be used to dry the specimen while mounted in the specimen holders.[2]

(10) *Desiccator.* An air-tight and moisture-tight desiccating chamber shall be used for cooling mounted specimens after drying. Anhydrous silica gel shall be used as the desiccant in the desiccating chamber.

(11) *Hood.* A hood or other suitable enclosure shall be used to provide a draft-free environment surrounding the test chamber. This enclosure shall have a fan or other suitable means for exhausting smoke and/or toxic gases produced by testing.

(b) *Specimens and sampling—General.* (1) The test criteria of § 1615.3(b) shall be used in conjunction with the following fabric and garment sampling plan, or any other approved by the Consumer Product Safety Commission that provides at least the equivalent level of fire safety to the consumer. Alternate sampling plans submitted for approval shall have operating characteristics such that the probability of Unit acceptance at any percentage defective does not exceed the corresponding probability of Unit acceptance of the following sampling plan in the region of the latter's operating characteristic curves that lies between 5 and 95 percent acceptance probability.

(2) Different colors or different print patterns of the same fabric may be included in a single Fabric or Garment Production Unit, provided such colors or print patterns demonstrate char lengths and residual flame times that are not significantly different from each other as determined by previous testing of at least three Samples from each color or print pattern to be included in the Unit.

(3) Garments with different trim and findings may be included in a single Garment Production Unit providing the

[2] Option 1 of ASTM, D2654–67T, "Method of Test for Amount of Moisture in Textile Materials," describes a satisfactory oven (1970 Book of ASTM Standards, Part 24, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103).

V40250 DEC 30 75 XUM

other garment characteristics are identical except for size, color, and print pattern.

(4) For fabrics whose flammability characteristics are not dependent on chemical additives or chemical reactants to fiber, yarns, or fabrics, the laundering requirement of paragraph (g)(4) of this section is met on subsequent Fabric Production Units if results of testing an initial Fabric Production Unit demonstrate acceptability according to the requirements of paragraph (c) of this section, Normal Sampling, both before and after the appropriate laundering.

(5) If the fabric has been shown to meet the laundering requirement, paragraph (g)(4) of this section, the garments produced from that fabric are not required to be laundered.

(6) Each Sample (five specimens) for all Fabric Sampling shall be selected so that two specimens are in one fabric direction (machine or cross-machine) and three spcimens are in the other fabric direction except for the additional Sample selected after a failure, in which case, all five specimens shall be selected in the same fabric direction in which the specimen failure occurred.

(7) Fabric Samples may be selected from fabric as outlined in paragraph (c) of this section entitled Fabric Sampling, or, for verification purposes, from randomly selected garments.

(8) Multilayer fabrics shall be tested with a hem of approximately 2.5 cm. (1 in.) sewn at the bottom edge of the specimen with a suitable thread and stitch. The specimen shall include each of the components over its entire length. Garments manufactured from multilayer fabrics shall be tested with the edge finish at the bottom edge of the specimen which is used in the garment.

(c) *Specimens and Sampling—Fabric Sampling.* A Fabric Production Unit (Unit) is either accepted or rejected in accordance with the following plan:

(1) *Normal Sampling.* Select one Sample from the beginning of the first Fabric Piece (Piece) in the Unit and one Sample from the end of the last Piece in the Unit, or select a sample from each end of the Piece if the Unit is made up of only one Piece. Test the two selected Samples. If both Samples meet all the Test Criteria of § 1615.3(b), accept the unit. If either or both of the Samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1615.3(b)(1), reject the Unit. If two or more of the individual specimens, from the 10 selected specimens fail the 25.4 cm. (10 in.) char length, .3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), reject the Unit. If only one individual specimen, from the 10 selected specimens, fails the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), select five additional specimens from the same end of the Piece in which the failure occurred, all five to be taken in the fabric direction in which the specimen failure occurred. If this additional Sample passes all the test criteria, accept the Unit. If this additional Sample fails any part of the test criteria, reject the Unit.

(2) *Reduced Sampling.* (i) The level of sampling required for fabric acceptance may be reduced provided the preceding 15 Units of the fabric have all been accepted using the Normal Sampling plan.

(ii) The Reduced Sampling plan shall be the same as for Normal Sampling except that the quantity of fabric in the Unit may be increased to 10,000 linear yards.

(iii) Select and test two Samples in the same manner as in Normal Sampling. Accept or reject the Unit on the same basis as with Normal Sampling.

(iv) Reduced Sampling shall be discontinued and Normal Sampling resumed if a Unit is rejected.

(3) *Tightened Sampling.* The level of sampling required for acceptance shall be increased when a Unit is rejected under the Normal Sampling plan. The Tightened Sampling shall be the same as Normal Sampling except that one additional Sample shall be selected and cut from a middle Piece in the Unit. If the Unit is made up of less than two Pieces, the Unit shall be divided into at least two Pieces. The division shall be such that the Pieces produced by the division shall not be smaller than 100 linear yards or greater than 2,500 linear yards. If the Unit is made up of two Pieces, the additional Sample shall be selected from the interior end of one of the Pieces. Test the three selected Samples. If all three selected Samples meet all the test criteria of § 1615.3(b), accept the Unit. If one or more of the three selected Samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1615.3(b)(1), reject the Unit. If two or more of the individual specimens from the 15 selected specimens, fail the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), reject the unit. If only one individual specimen, of the 15 selected Specimens fails the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), select five additional specimens from the same end of the same Piece in which the failure occurred, all five to be taken in the fabric direction in which the Specimen failure occurred. If this additional Sample passes all the test criteria, accept the Unit. If this additional Sample fails any part of the test criteria, reject the Unit. Tightened Sampling may be discontinued and Normal Sampling resumed after five consecutive Units have all been accepted using Tightened Sampling. If Tightened Sampling remains in effect for 15 consecutive Units, production of the specific fabric in Tightened Sampling must be discontinued until that part of the process or component which is causing failure has been identified and the quality of the end product has been improved.

(4) *Disposition of Rejected Units.* (i) The Piece or Pieces which have failed and resulted in the initial rejection of the Unit may not be retested, used, or promoted for use in children's sleepwear as defined in § 1615.1(a) except after reworking to improve the flammability characteristics and subsequent retesting in accordance with the procedures in Tightened Sampling.

(ii) The remainder of a rejected Unit, after removing the Piece or Pieces the failure of which resulted in Unit rejection, may be accepted if the following test plan is successfully concluded at all required locations. The required locations are those adjacent to each such failed Piece. (Required locations exist on both sides of the "Middle Piece" tested in Tightened Sampling if failure of that Piece resulted in Unit rejection.) Failure of a Piece shall be deemed to have resulted in Unit rejection if Unit rejection occurred and a Sample or specimen from the Piece failed any test criterion of § 1615.3(b).

(iii) The Unit should contain at least 15 Pieces for disposition testing after removing the failing Pieces. If necessary for this purpose, the Unit shall be demarcated into at least 15 approximately equal length Pieces unless such division results in Pieces shorter than 100 linear yards. In this latter case, the Unit shall be demarcated into roughly equal length Pieces of approximately 100 linear yards each. If such a division results in five Pieces or less in the Unit for each failing Piece after removing the failing Pieces, only the individual Piece retest procedure (described subsequently) may be used.

(iv) Select and cut a Sample from each end of each adjoining Piece beginning adjacent to the Piece which failed. Test the two Samples from the Piece. If both Samples meet all the test criteria of § 1615.3(b), the Piece is acceptable. If one or both of the two selected Samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1615.3(b)(1), the Piece is unacceptable. If two or more of the individual Specimens, from the 10 selected specimens, fail the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), the Piece is unacceptable. If only one individual specimen, from the 10 selected specimens, fails the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), select five additional specimens from the same end of the Piece in which the failure occurred, all five to be taken in the fabric direction in which the specimen failure occurred. If this additional Sample passes all the test criteria, accept the Piece. If this additional Sample fails any part of the test criteria, the Piece is unacceptable.

(v) Continue testing adjoining Pieces until a Piece has been found acceptable. Then continue testing adjoining Pieces until three successive adjoining Pieces, not including the first acceptable Piece, have been found acceptable or until five such Pieces not including the first acceptable Piece, have been tested, whichever occurs sooner. Unless three successive adjoining Pieces have been found acceptable among five such Pieces, testing shall be stopped and the entire Unit rejected without further testing. If three successive Pieces have been found acceptable among five such Pieces, accept the three successive acceptable Pieces and the remaining Pieces in the Unit.

(vi) Alternatively, individual Pieces from a rejected Unit containing three or more Pieces may be tested and accepted or rejected on a Piece-by-Piece basis according to the following plan, after removing the Piece or Pieces, the failure of which resulted in Unit rejection. Select four Samples (two from each end) from the Piece. Test the four selected Samples. If all four Samples meet all the Test Criteria of § 1615.3(b), accept the Piece. If one or more of the Samples fail the 17.8 cm. (7 in.) average char length criterion, § 1615.3(b)(1), reject the Piece. If two or more of the individual Specimens, from the 20 selected specimens, fail the 25.4 cm. (10 in.) char length, § 1615.3(b)(1), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), reject the Piece. If only one individual specimen, from the 20 selected specimens, fails the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), select two additional Samples from the same end of the Piece in which the failure occurred. If these additional two Samples meet all the Test Criteria of § 1615.3(b), accept the Piece. If one or both of the two additional Samples fail any part of the Test Criteria, reject the Piece.

(vii) The Pieces of a Unit rejected after retesting may not be retested, used, or promoted for use in children's sleepwear as defined in § 1615.1(a) except after reworking to improve the flammability characteristics, and subsequent retesting in accordance with the procedures set forth in Tightened Sampling.

(5) *Records.* Records of all Unit sizes, test results, and the disposition of rejected Pieces and Units must be maintained by the manufacturer upon the effective date of this Standard. Rules and regulations may be established by the Consumer Product Safety Commission.

(d) *Specimens and Sampling—Garment Sampling.* (1)(i). The garment sampling plan is made up of two parts: (1) Prototype Testing and (2) Production Testing. Prior to production, prototypes must be tested to assure that the design characteristics of the garments are acceptable. Garment Production Units (Units) are then accepted or rejected on an individual Unit basis.

(ii) Edge finishes such as hems and binding are excluded from testing except that when trim is used on an edge the trim must be subjected to prototype testing. Seams attaching findings are excluded from testing.

(2) *Prototype Testing.* Preproduction prototypes of a garment style or type shall be tested to assure that satisfactory garment specifications in terms of flammability are set up prior to production.

(i) *Seams.* Make three Samples (15 specimens) using the longest seam type and three Samples using each other seam type 10 inches or longer that is to be included in the garment. Prior to testing, assign each specimen to one of the three Samples. Test each set of three Samples and accept or reject each seam design in accordance with the following plan:

(A) If all three Samples meet all the test criteria of § 1615.3(b), accept the seam design. If one or more of the three Samples fail the 17.8 cm (7 in.) average char length criterion, § 1615.3(b)(1), reject the seam design. If three or more of the individual Specimens from the 15 selected specimens fail the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), reject the seam design. If only one of the individual specimens from the 15 selected specimens fails the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), accept the seam design.

(B) If two of the individual specimens from the 15 selected specimens, fail the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criteria, §1615.3(b)(3), select three more Samples (15 specimens) and retest. If all three additional Samples meet all the test criteria of § 1615.3(b) accept the seam design. If one or more of the three additional Samples fail the 17.8 cm. (7 in.) average char length criterion, § 1615.3(b)(1), reject the seam design. If two or more of the individual specimens, from the 15 selected specimens, fail the (2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), reject the seam design. If only one of the individual specimens from the 15 selected specimens, fails the 25.4 cm. (10 in.) char length § 1615.3(b)(2), and/or the 10 second residual flame time criteria, § 1615.3(b)(3), accept the seam design.

(ii) *Trim.* (A) Make three Samples (15 specimens) from each type of trim to be included in the garment. Specimens shall be prepared by sewing or attaching the trim to the center of the vertical axis of an appropriate section of untrimmed fabric, beginning the sewing or attachment at the lower edge of each specimen. The sewing or attachment shall be made in the manner in which the trim is to be attached in the garment.

(B) Sewing or otherwise attaching the trim shall be done with thread or fastening material of the same composition and size to be used for this purpose in the garment and using the same stitching or seam type. The trim shall be sewn or fastened the entire length of the specimen. Prior to testing, assign each specimen to one of the three Samples. Test the sets of three Samples and accept or reject the type of trim and design on the same basis as seam design.

(3) *Production Testing.* A Unit is either accepted or rejected according to the following plan:

(i) (A) From each Unit select at random sufficient garments and cut three Samples (15 specimens) from the longest seam type. No more than five specimens may be cut from a single garment. Prior to testing, assign each specimen to one of the three Samples. All specimens cut from a single garment must be included in the same Sample. Test the three selected Samples. If all three Samples meet all the test criteria of § 1615.3(b), accept the Unit. If one or more of the three Samples fail the 17.8 cm. (7 in.) average char length criterion, § 1615.3(b)(1), reject the Unit. If four or more of the individual specimens, from the 15 selected specimens, fail the 25.4 cm. (10 in.) char length, § 1615.3(b)(2), and/or the 10 second residual flame time criterion, §1615.3(b)(3), reject the Unit. If three or less of the individual specimens, from the 15 selected specimens, fail the 25.4 cm. (10 in.) char length, § 1615.3(b)(2) and/or the 10 second residual flame time criteria, § 1615.3(b)(3), accept the Unit.

(B) (*1*) If the garment under test does not have a 10-inch seam in the largest size in which it is produced, the following selection and testing procedure shall be followed.

(2) Select and cut specimens 6.9 cm. (3.5 in.) wide by the maximum available seam length, with the seam in the center of the specimen and extending the entire specimen length. Cut three Samples (15 specimens). These specimens shall be placed in specimen holders so that the bottom edge is even with the bottom of the specimen holder and the seam begins in the center of the bottom edge. Prior to testing, assign each specimen to one of the three Samples. All specimens cut from a single garment must be included in the same Sample.

(3) Test the three Samples. If all three Samples pass the 17.8 cm. (7 in.) average char length criterion, § 1615.3(b)(1), and if three or less individual specimens fail by charring the entire specimen length and/or exceeding the 10 second residual flame time criterion, § 1615.3(b)(3), accept the Unit. If the Unit is not accepted in the above test, three Samples (15 specimens) of the longest seam type shall be made using fabric and thread from production inventory and sewn on production machines by production operators. The individual fabric sections prior to sewing must be no larger than 20.3 x 63.3 cm. (8 in. x 25 in.) and must be selected from more than one area of the base fabric. Test the three prepared Samples. Accept or reject the Unit as described previously in this subsection.

(*d*) *Disposition of Rejected Units.* Rejected Units shall not be retested, used, or promoted for use in children's sleepwear as defined in § 1615.1(a), except after reworking to improve the flammability characteristics and subsequent retesting in accordance with the procedures set forth in garment production testing.

(5) *Records.* Records of all Unit sizes, test results, and the disposition of rejected Units must be maintained by the manufacturer upon the effective date of this standard. Rules and regulations may be established by the Consumer Product Safety Commission.

(e) *Specimens and Sampling—Compliance Market Sampling Plan.* Sampling plans for use in market testing of items covered by this Standard may be issued by the Consumer Product Safety Commission. Such plans shall define noncompliance of a production Unit to exist only when it is shown, with a high level

V40250 DEC 30 75 XUM

of statistical confidence, those production Units represented by tested items which fail such plans will, in fact, fail this standard. Production units found to be non-complying under the provisions of paragraph (e) of this section shall be deemed not to conform to this Standard. The Consumer Product Safety Commission may publish such plans in the FEDERAL REGISTER.

(f) *Mounting and conditioning of specimens.* (1) The specimens shall be placed in specimen holders so that the bottom edge of each specimen is even with the bottom of the specimen holder. Mount the specimen in as close to a flat configuration as possible. The sides of the specimen holder shall cover 1.9 cm. (¾ in.) of the specimen width along each long edge of the specimen, and thus shall expose 5.1 cm. (2 in.) of the specimen width. The sides of the specimen holder shall be clamped with a sufficient number of clamps or shall be taped to prevent the specimen from being displaced during handling and testing. The specimens may be taped in the holders if the clamps fail to hold them. Place the mounted specimens in the drying oven in a manner that will permit free circulation of air at 105° C. (221° F.) around them for 30 minutes.[3]

(2) Remove the mounted specimens from the oven and place them in the desiccator for 30 minutes to cool. No more than five specimens shall be placed in a desiccator at one time. Specimens shall remain in the desiccator no more than 60 minutes.

(g) *Testing*—(1) *Burner adjustment.* With the hood fan turned off, use the needle valve to adjust the flame height of the burner to 3.8 cm. (1½ in.) above the highest point of the barrel of the burner. A suitable height indicator is shown in Engineering Drawing No. 6 and Figure 1.

(2) Specimen Burning and Evaluation. (i) One at a time, the mounted specimens shall be removed from the desiccator and suspended in the cabinet for testing. The cabinet door shall be closed and the burner flame impinged on the bottom edge of the specimen for 3.0±0.2 seconds.[4] Flame impingement is accomplished by moving the burner under the specimen for this length of time, and then removing it. If flaming drips or fragments are evident, measure the residual flame time to the nearest 0.1 second.

(ii) When afterglow has ceased, remove the specimen from the cabinet and holder, and place it on a clean flat surface. Fold the specimen lengthwise along a line through the highest peak of the charred or melted area; crease the specimen firmly by hand. Unfold the specimen and insert the hook with the correct weight as shown in Table 1 in the specimen on one side of the charred area 6.4 mm. (¼ in.) from the lower edge.

(iii) Tear the specimen by grasping the other lower corner of the fabric and gently raising the specimen and weight clear of the supporting surface.[5] Measure the char length as the distance from the end of the tear to the edge of the specimen exposed to the flame. After testing each specimen, vent the hood and cabinet to remove the smoke and/or toxic gases.

(3) *Report.* Report the value of char length, in centimeters (inches), and the residual flame time, in seconds, for each specimen, as well as the average char length for each set of five specimens.

(4) *Laundering.* (i) The procedures described under paragraphs (b) through (g) of this section shall be carried out on finished items (as produced or after one washing and drying) and after they have been washed and dried 50 times according to AATCC Test Method 124–1969.[6] Items which do not withstand 50 launderings shall be tested at the end of their useful service life.

(ii) Washing procedure 6.2(III), with a water temparture of 60°±2.8° C. (140 ±5° F.), and drying procedure 6.3.2(B), shall be used. Maximum load shall be 3.64 Kg. (8 pounds) and may consist of any combination of test samples and dummy pieces. Alternatively, a different number of times under another washing and drying procedure may be specified and used, if that procedure has previously been found to be equivalent by the Consumer Product Safety Commission. Such laundering is not required of items which are not intended to be laundered, as determined by the Consumer Product Safety Commission.

(iii) Items which are not susceptible to being laundered and are labeled "dry-clean only" shall be drycleaned by a procedure which has previously been found to be acceptable by the Consumer Product Safety Commission.

(iv) For the purpose of the issuance of a guarantee under section 8 of the act, finished sleepwear garments to be tested according to paragraphs (b) through (e) of this section need not be laundered or drycleaned provided all fabrics used in making the garments (except trim) have been guaranteed by the fabric producer to be acceptable when tested according to paragraphs (b) through (e) of this section.

[3] If the specimens are moist when received, permit them to air dry at laboratory conditions prior to placement in the oven. A satisfactory preconditioning procedure may be found in ASTM D 1776–67, "Conditioning Textiles and Textile Products for Testing." ("1970 Book of ASTM Standards," Part 24, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.)

[4] If more than 15 seconds elapse between removal of a specimen from the desiccator and the initial flame impingement, that specimen shall be reconditioned prior to testing.

[5] A figure showing how this is done is given in AATCC 34–1969, Technical Manual of the American Association of Textile Chemists and Colorists, vol. 46, 1970, published by AATCC, Post Office Box 12215, Research Triangle Park, N.C. 27709.

[6] Technical Manual of the American Association of Textile Chemists and Colorists, vol. 46, 1970, published by AATCC, Post Office Box 12215, Research Triangle Park, N.C. 27709.

§ 1615.5 Labeling requirements.

(a) *Care labels.* All items of children's sleepwear shall be labeled with precautionary instructions to protect the items from agents or treatments which are known to cause deterioration of their flame resistance. If the item has been initially tested under § 1615.4(g)(4) after one washing and drying, it shall be labeled with instructions to wash before wearing. Such labels shall be permanent and otherwise in accordance with rules and regulations established by the Consumer Product Safety Commission.

(b) *Temporary Requirement for Noncomplying Items.* Items of noncomplying children's sleepwear which are manufactured during the 12 months following the effective date of the standard shall, prior to introduction into commerce, be prominently, permanently, and conspicuously labeled with the following statement: "Flammable (Does Not Meet U.S. Department of Commerce Standard DOC FF 3–71.) Should not be worn near sources of fire." Such labels should be in accordance with the rules and regulations established by the Consumer Product Safety Commission.

Subpart B—Rules and Regulations

AUTHORITY: Sec. 5; 67 Stat. 112–113, as amended, 81 Stat. 570, 15 U.S.C. 1194, unless otherwise noted.

§ 1615.31 Labeling, recordkeeping, advertising, retail display and guaranties.

(a) *Definitions.* For the purposes of this section, the following definitions apply:

(1) "Standard" means the Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (FF 3–71) (Subpart A of this Part) promulgated by the Secretary of Commerce in the FEDERAL REGISTER of July 29, 1971 (36 FR 14062), and amended by him in the FEDERAL REGISTER of July 21, 1972 (37 FR 14624).

(2) "Children's sleepwear" means "children's sleepwear" as defined in § 1615.1(a) of the Standard; that is, "any product of wearing apparel up to and including size 6X, such as nightgowns, pajamas, or similar or related items, such as robes, intended to be worn primarily for sleeping or activities related to sleeping. Diapers and underwear are excluded from this definition."

(3) "Item" means "item" as defined in § 1615.1(c) of the Standard; that is, "any product of children's sleepwear, or any fabric or related material intended or promoted for use in children's sleepwear."

(4) "Marketing or handling" or "marketed or handled" means any one or more of the transactions set forth in section 3 of the Flammable Fabrics Act (15 U.S.C. 1192).

(5) The definitions of terms set forth in § 1615.1 of the Standard shall also apply to this section.

(b) *Labeling.* (1) where any agent or treatment is known to cause deterioration of flame resistance or otherwise enhances the flammability characteristics of an item, such item shall be prominently, permanently, conspicuously, and legibly labeled with precautionary care and treatment instructions to protect the item from such agent or treatment.

(2) If the item has been initially tested under § 1615.4(g)(4) of the Standard after one washing and drying, it shall be prominently, permanently, conspicuously, and legibly labeled with instructions to wash before wearing.

(3) Any item manufactured, imported, or otherwise marketed or handled that is not in compliance with the Standard and that was manufactured between July 29, 1972, and July 29, 1973, shall, prior to introduction into commerce, be prominently, permanently, conspicuously, and legibly labeled with the statement "Flammable (Does Not Meet U.S. Department of Commerce Standard DOC FF 3–71). Should not be worn near sources of fire."

(4) Where any fabric or related material intended or promoted for use in children's sleepwear is sold or intended for sale to the ultimate consumer for the purpose of conversion into children's sleepwear, each bolt, roll, or other unit shall be labeled with the information required by this section. Each item of fabric or related material sold to an ultimate consumer must be accompanied by a label, as prescribed by this section, that can by normal household methods be permanently affixed by the ultimate consumer to any item of children's sleepwear made from such fabric or related material.

(5) Where items required to be labeled in accordance with paragraphs (b)(2), (3), and (4) of this section are marketed at retail in packages, and the required label is not readily visible to prospective purchasers, the packages must also be prominently, conspicuously, and legibly labeled with the required information.

(6) Samples, swatches, or specimens used to promote or effect the sale of items subject to the Standard shall be labeled in accordance with this section with the information required by this section, except that such information may appear on accompanying promotional materials attached to fabric samples, swatches, or specimens used to promote the sale of fabrics to garment manufacturers. This paragraph (b)(6) of this section shall not apply, however, to samples, swatches, or specimens prominently, permanently, conspicuously, truthfully, and legibly labeled with the statement "Flammable. Sample only. Not for use or resale. Does not meet Standard for the Flammability of Children's Sleepwear, DOC FF 3–71."

(7) The information required on labels by this section shall be set forth separately from any other information appearing on the same label. Other information, representations, or disclosures not required by this action but placed on the same label with information required by this section, or placed on other labels elsewhere on the item, shall not interfere with the information required by this section. No person, other than the ultimate consumer, shall remove or mutilate, or cause or participate in the removal or mutilation of, any label required by this section to be affixed to any item.

(8) Every manufacturer, importer, or other person (such as a converter) initially introducing items subject to the Standard into commerce shall assign to each item a unit identification (number, letter or date, or combination, thereof) sufficient to identify and relate to the fabric production unit or garment production unit of which the item is a part. Such unit identification shall be designated in such a way as to indicate that it is a production unit identification under the Standard. The letters "GPU" and "FPU" may be used to designate a garment production unit identification and fabric production unit identification respectively, at the option of the labeler.

(i) Where fabrics required to be labeled or stamped in accordance with this section are marketed at retail in packages and the required label or stamp is not readily visible to the prospective purchaser, the packages must also be prominently, conspicuously, and legibly labeled with the information required by this section.

(ii) Where garments required to be labeled or stamped in accordance with paragraph (b)(8) of this section are marketed at retail in packages and the required label or stamp is not readily visible to the prospective purchasers:

(A) The packages must also be prominently, conspicuously, and legibly labeled with the information required by this section; or

(B) There must be a garment style identification that is prominent, conspicuous, and legible and readily visible to the prospective purchaser, either on a label or hang tag attached to the garments or on the garment packages. A style is a garment design or grouping, preselected by the manufacturer. A style may be composed of garments that form all or put of one or more GPU's and the style may include any number of garments the manufacturer chooses. Style identification means any numbers, letters, or combination thereof that are sufficient to identify the garments of the style and may include information such as color, season or size. If this option B is selected, in any recall of noncomplying items from a particular GPU:

(*1*) the garment manufacturer must recall the entire style(s) from all customers who purchased garments of the style(s) of which the GPU is part. However, retailers may elect to return only garments from the particular GPU necessitating the recall rather than the entire style(s) being recalled; and

(*2*) within 48 hours of a written request, the garment manufacturer must supply to the Commission any samples in its possession of garments from the GPU, as requested. As required of all persons subject to this section, the garment manufacturer must also, within the time requested, supply to the Commission the names of any customers who purchased during a specified period of time, garments from the GPU (or the style(s) of which the GPU is a part) and supply access to all records required under the Standard and this section.

(iii) Each garment subject to the Standard shall bear a label with minimum dimensions of 1.3 centimeters (0.5 inch) by 1.9 centimeters (0.75 inch) containing the appropriate garment production unit identification for that garment in letters which are clear, conspicuous, and legible and in a color which contrasts with the background of the label, or shall have such information stamped on the garment itself in letters which are clear, conspicuous, and legible and in a color which contrasts with the background, and at least 2.54 centimeters (1 inch) in every direction from any other information. The stamp or label containing the garment production unit identification must be of such construction, and affixed to the garment in such a manner as to remain on or attached to the garment and legible and visible throughout its intended period of use.

(iv) The fabric production unit identification shall appear in letters at least 0.4 centimeters (one-sixth of an inch) in height against a contrasting background on each label that relates to such fabric and is required by the Textile Fiber Products Identification Act (15 U.S.C. 70–70k) and the regulations thereunder (16 CFR 303.1 through 303.45), or by the Wool Products Labeling Act of 1939 (15 U.S.C. 68–68j) and the regulations thereunder (16 CFR 300.1 through 300.35). When the information required by the Textile Fiber Product Identification Act or by the Wool Products Labeling Act of 1939 appears on an invoice used in lieu of labeling, the fabric production unit identification required by this section may be placed clearly, conspicuously, and legibly on the same invoice in lieu of labeling.

(c) *Advertisements.* (1) All advertisements for noncomplying items of children's sleepwear manufactured between July 29, 1972 (the effective date of the Standard), and July 29, 1973, that are subject to the Standard and that are being offered for sale to consumers through direct mail, catalogs, telephone solicitation, or under any other circumstances where the consumer in the ordinary course of dealing is not afforded an opportunity to inspect the label before receiving the item, shall contain a clear and conspicuous disclosure of the statement "Flammable (Does Not Meet Standard for the Flammability of Children's Sleepwear, DOC FF 3–71). Should not be worn near sources of fire."

(2) All other advertisements for noncomplying items subject to the Standard shall contain a clear and conspicuous disclosure of the statement "Flammable—Read the Label."

(d) *Segregation of complying and noncomplying items by retailer.* Every person who sells noncomplying items (as defined in § 1615.1(c) of the Standard and paragraph (b)(2) of this section at retail stores or other establishments open to the general public where goods are offered for sale shall:

V 40 250 DEC 30 75 XUM

(1) Display the items which comply with the Standard, and for which the seller has documentary evidence of such compliance, so that no other merchandise is intermingled with those items; and identify such complying items with at least one sign, with black letters at least 2.5 centimeters (one inch) in height against a solid white background, bearing the statement: "Flame Resistant. Complies With Standard for the Flammability of Children's Sleepwear (DOC FF 3–71)."

(2) Display all other items of children's sleepwear, sizes 0 through 6X, at a separate location within the store and identify these items with at least one sign, with black letters at least 2.5 centimeters (1 inch) in height against a solid white background, bearing the statement "Flammable. Does Not Meet Standard for the Flammability of Children's Sleepwear (DOC FF 3–71)."

(3) Segregate those items of children's sleepwear, sizes 0 through 6X, which comply with the Standard, and for which the seller has documentary evidence of such compliance, so that they shall not be located within 91 centimeters (36 inches) of any other items of children's sleepwear, size 0 through 6X, when displayed for sale to consumers.

(e) *Records—manufacturers, importers, or other persons initially introducing items into commerce*—(1) *General.* Every manufacturer, importer, or other person (such as a converter) initially introducing into commerce items subject to the Standard, irrespective of whether guaranties are issued under paragraph (f) of this section, shall maintain written and physical records as hereinafter specified. The records required must establish a line of continuity through the process of manufacture of each production unit of articles of children's sleepwear, or fabrics or related materials intended or promoted for use in children's sleepwear, to the sale and delivery of the finished items and from the specific finished item to the manufacturing records. Such records shall show with respect to such items:

(i) Details, description, and identification of any and all sampling plans engaged in pursuant to the requirements of the Standard. Such records must be sufficient to demonstrate compliance with such sampling plan(s) and must relate the sampling plan(s) to the actual items produced, marketed, or handled. This requirement is not limited by other provisions of paragraph (e) of this section.

(ii) Garment production units or fabric production units of all garments or fabrics marketed or handled. The records must relate to an appropriate production unit identification on or affixed to the item itself in accordance with paragraph (b)(8) of this section, and the production unit identification must relate to the garment production unit or fabric production unit.

(iii) Test results and details of all tests performed, both prototype and production, including char lengths and residual flame time of each specimen tested, average char length of the samples required to be tested, details of the sampling procedure employed, name and signature of person conducting tests, date of tests, and all other records necessary to demonstate compliance with the test procedures and sampling plan specified by the Standard or authorized alternate sampling plan.

(iv) Disposition of all failing or rejected items. Such records must demonstrate that the items were retested or reworked and retested in accordance with the Standard prior to sale or distribution and that such retested or reworked and retested items comply with the Standard, or otherwise show the disposition of such items.

(v) Fiber content and manufacturing specifications relating the same to prototype and production testing and to the production units to which applicable.

(vi) Data and test results relied on as a basis for inclusion of different colors or different print patterns of the same fabric as a single fabric or garment production unit under § 1615.4(b) of the Standard.

(vii) Data and test results relied on as a basis for reduced laundering of fabric or garments during test procedures under § 1615.4(g)(4) of the Standard and any guaranties issued or received relating to laundering as well as details of the laundering procedure utilized.

(viii) Identification, composition, and details of application of any flame retardant treatments employed. All prototype and production records shall relate to such information.

(ix) Date and quantity of each sale or delivery of items subject to the Standard (except the date of sale to an ultimate consumer) and the name and address of the purchaser or recipient (except an ultimate consumer). The items involved in each such sale or delivery shall be identified by production unit or by style. A style is a garment design or grouping, preselected by the manufacturer. A style may be composed of garments that form all or part of one or more garment production units and the style may include any number of garments that form all or part of one or more garment production units and the style may include any number of garments the manufacturer chooses. If a person subject to the requirements of § 1615.31(e) maintains sales records which identify the items sold or delivered by style, and if recall of one or more production units subject to the Standard is required, that person in recalling such production units shall notify all purchasers of items of the style in which such production unit or units were manufactured. Retailers may elect to return all items of the style involved, or all items of the production unit or units subject to recall.

(2) *Fabrics.* In addition to the information specified in paragraph (e)(1) of this section the written and physical records maintained with respect to each fabric production unit shall include (i) finished fabric samples sufficient to repeat the fabric sampling procedure required by § 1615.4 (b) through (e) of the Standard for each production unit marketed or handled; and (ii) records to relate the samples to the actual fabric production unit. Upon written request of any duly authorized employee or agent of the Commission, samples sufficient for the sampling and testing of any production unit in accordance with § 1615.4 (b) through (e) of the Standard shall be furnished from these records within the time specified in that written request.

(3) *Garments—prototype testing.* In addition to the records specified in paragraph (e)(1) of this section, the following written and physical records shall be maintained with respect to the garment prototype testing required by the Standard:

(i) Specification, fiber content, and details of construction on all seams, fabrics, threads, stitches, and trims used in each garment style or type upon which prototype testing was performed, relating the same to such garment style or type and to all production units to which such prototype testing is applicable.

(ii) Samples sufficient to repeat the prototype tests required by § 1615.4 (b) through (e) of the Standard for all fabrics, seams, threads, stitches, and trims used in such prototype testing, relating such samples to the records required by paragraph (e) of this section including the information required by paragraph (e)(3)(i) of this section. Upon written request of any duly authorized employee or agent of the Commission, samples sufficient for the testing of any prototype specimens identical to those specimens that were actually tested pursuant to the Standard shall be furnished from these records within the time specified in that written request.

(iii) A complete untested garment from each style or type of garment marketed or handled.

(iv) Remains of all physical specimens tested in accordance with the prototype testing required by § 1615.4 (b) through (e) of the Standard, relating such samples to the records required by paragraph (c) of this section including information required by paragraph (e)(3)(i) of this section.

(4) *Garments—production testing.* In addition to the records required by paragraph (e)(1) of this section, written and physical records shall be maintained and shall show with respect to each garment production unit:

(i) Source and fabric production unit identification of all fabrics subject to testing used in each garment production unit.

(ii) Identification and appropriate reference to all prototype records and prototype tests applicable to each production unit.

(iii) Any guaranty relied upon to demonstrate that the fabric utilized in such garments meets the laundering requirements of the Standard.

(iv) Data sufficient to show that tested samples were selected from the production unit at random from regular production.

(v) Written data that will enable the Commission to obtain and test garments under any applicable compliance market sampling plan.

(5) *Record retention requirements.* The records required by paragraph (e) of this section shall be maintained for 3 years, except that records relating to prototype testing shall be maintained for as long as they are relied upon as demonstrating compliance with the prototype testing requirements of the Standard and shall be retained for 3 years thereafter.

(f) *Tests for guaranty purposes.* Reasonable and representative tests for the purpose of issuing a guaranty under section 8 of the Flammable Fabrics Act (15 U.S.C. 1197) for items subject to the Standard shall be those tests performed pursuant to any sampling plan or authorized alternative sampling plan engaged in pursuant to the requirements of the Standard.

(g) *Compliance with this section.* No person subject to the Flammable Fabrics Act shall manufacture, import, distribute, or otherwise market or handle any item subject to the Standard, including samples, swatches, or specimens used to promote or effect the sale thereof, which is not in compliance with this section.

Subpart C—Interpretations and Policies

AUTHORITY: Secs. 1–17, 67 Stat. H1–15, as amended, 81 Stat. 568–74; 15 U.S.C. 1191–1204.

§ 1615.62 Policy and interpretation relative to items in inventory or as to recordkeeping requirements.

(a) The Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (FF 3–71) (Subpart A of this Part) was published in the FEDERAL REGISTER on July 29, 1971, at 36 FR 14062 et seq., and amended in the FEDERAL REGISTER of July 21, 1972 (37 FR 14624). The Notice of Standard provided at 36 FR 14063 that "Items in inventory or with the trade on the effective date of the Standard are exempt. All concerned parties shall be required to maintain records that these items offered for sale after the effective date of the Standard are eligible for the exemption."

(b) The Children's Sleepwear Standard was amended on July 21, 1972, at 37 FR 14624 et seq. to incorporate a sleepwear sampling plan therein and to make certain nonsubstantive technical corrections as to the test equipment. The effective date remained the same. In issuance of such amendment the Notice of Amendment specified at 37 FR 14625 that "It is emphasized that the only substantive change made to the standard involves the amendment necessary to include the sampling plan."

(c) The Notice of Amendment did not repeat the language in the original 1971 Notice of Standard relative to items in inventory or as to recordkeeping requirements.

(d) Questions have arisen under this standard as to the application of the standard to goods manufactured outside the United States prior to the effective date of the standard on July 29, 1972, as to whether a person claiming the exemption specified in the standard must maintain records showing eligibility for exemption from the standard.

(e) In the Commission's view, the provisions of the July 29, 1971, Notice of Standard as to exemption of items of children's sleepwear in inventory or with the trade on the effective date of the standard and as to the necessity of maintenance of records to show eligibility for such exemption are in full force and effect.

NOTE: This policy was published by the Federal Trade Commission on January 31, 1973 (38 FR 3014). It continues in effect.

§ 1615.63 Policy regarding garment production unit identification.

No provision of § 1615.31(b)(8) prohibits placement of a garment production unit identification on a label containing other information. Provided, however, that when the garment production unit identification appears on a label containing other information, provisions of § 1615.31(b)(7) require that the garment production unit identification must be set forth separately from any other information appearing on the same label, and that information not required by the applicable enforcement regulation § 1615.31, but placed on the same label with the garment production unit identification, shall not interfere with the garment production unit identification.

EFFECTIVE DATE: This policy was originally published as a notice on October 22, 1975 at 40 FR 49537.

PART 1616—STANDARD FOR THE FLAMMABILITY OF CHILDREN'S SLEEPWEAR: SIZES 7 THROUGH 14 (FF 5–74)

Subpart A—The Standard

Sec.
1616.1 Scope and application.
1616.2 Definitions.
1616.3 General requirements.
1614.4 Sampling and acceptance procedures.
1616.5 Test procedure.
1616.6 Labeling requirements.

Subpart B—Rules and Regulations

1616.31 Labeling, recordkeeping, retail display and guaranties.

Subpart C—Interpretations and Policies

1616.61 Enforcement policy.
1616.62 Policy regarding retail display requirement for items.
1616.63 Policy regarding garment production unit identification.
1616.64 Policy regarding recordkeeping requirements.

Subpart A—The Standard

AUTHORITY: Sec. 4, 67 Stat. 112, as amended, 81 Stat. 569–70; 15 U.S.C. 1193.

EFFECTIVE DATE: This standard became effective May 1, 1975. It was originally published as a notice on May 1, 1974 (39 FR 15210), amended March 21, 1975 (40 FR 12688), and corrected March 27, 1975 (40 FR 13547).

§ 1616.1 Scope and application.

(a) This Standard provides a test method to determine the flammability of children's sleepwear, sizes 7 through 14 and fabric or related material intended or promoted for use in such children's sleepwear.

(b) All sleepwear items as defined in § 1616.2(c), are subject to the requirements of this Standard.

(c) Children's sleepwear items which meet all the requirements of the Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (FF 3–71) (Subpart A of Part 1615 of this Chapter) are in compliance with this Standard. FF 3–71 was issued July 29, 1971 (36 FR 14062), and amended July 21, 1972 (37 FR 14624).

(d) As used in this Standard, "pass" and "fail" refer to the test criteria for specimens while "accept" and "reject" refer to the acceptance or rejection of a production unit under the sampling plan.

(e) The flammability standards for clothing textiles and vinyl plastic film, Parts 1610 and 1611 of this Chapter, are superseded by this Part 1616 insofar as they apply to items defined in § 1616.2(c).

§ 1616.2 Definitions.

In addition to the definitions given in section 2 of the Flammable Fabrics Act, as amended (sec. 2, 81 Stat. 568; 15 U.S.C. 1191) and the procedures under that Act for setting standards (Part 1607 of this Chapter), the following definitions apply for the purposes of this Standard:

(a) "Children's sleepwear" means any product of wearing apparel size 7 through size 14, such as nightgowns, pajamas, or similar or related items, such as robes, intended to be worn primarily for sleeping or activities related to sleeping. Underwear and diapers are excluded from this definition.

(b) "Sizes 7 through 14" means the sizes defined as 7 through 14 in Department of Commerce Voluntary Product Standards PS 54–72 and PS 36–70, previously identified as Commercial Standards, CS 153–48, "Body Measurements for the Sizing of Girls' Apparel" and CS 155–50, "Body Measurements for the Sizing of Boys' Apparel", respectively.[1]

(c) "Item" means any product of children's sleepwear or any fabric of related material intended or promoted for use in children's sleepwear.

(d) "Trim" means decorative materials, such as ribbons, laces, embroidery, or ornaments. This definition does not include (1) individual pieces less than 2 inches in their longest dimension, provided that such pieces do not constitute or cover in aggregate a total of more than 20 square inches of the item or (2) functional materials (findings), such as zippers, buttons or elastic bands, used in the construction of garments.

(e) "Test criteria" means the average char length and the maximum char length which a sample of specimen may exhibit in order to pass an individual test.

(f) "Char length" means the distance from the original lower edge of the specimen exposed to the flame in accordance with the procedure specified in § 1616.5 *Test procedure* to the end of the tear or void in the charred, burned, or damaged area, the tear being made in accordance with the procedure specified in § 1615.5

[1] Copies available from the National Technical Information Service, 5285 Port Royal Street, Springfield VA 22151.

V 401250 DEC 30 75 XUM

(c) (2) *Specimen burning and evaluation.*

(g) "Afterglow" means the continuation of glowing of parts of a specimen after flaming has ceased.

(h) "Fabric piece" (piece) means a continuous, unseamed length of fabric, one or more of which make up a unit.

(i) "Fabric production unit" (unit) means any quantity of finished fabric up to 4,600 linear m. (5,000 linear yds.) for Normal Sampling or 9,200 linear m. (10,000 linear yds.) for Reduced Sampling which has a specific identity that remains unchanged throughout the unit except for color or print pattern as specified in § 1616.4(a). For purposes of this definition, finished fabric means fabric in its final form after completing its last processing step as a fabric except for slitting.

(j) "Garment production unit" (unit) means any quantity of finished garments up to 500 dozen which have a specific identity that remains unchanged throughout the unit except for size, trim, findings, color, and print patterns as specified in § 1616.4(a).

(k) "Sample" means five test specimens.

(l) "Specimen" means an 8.9±0.5 x 25.4±0.5 cm. (3.5±0.2 x 10±0.2 in.) section of fabric. For garment testing, the specimen will include a seam or trim.

§ 1616.3 General requirements.

(a) *Summary of test method.* Conditioned specimens are suspended one at a time vertically in holders in a prescribed cabinet and subjected to a standard flame along their bottom edges for a specified time under controlled conditions. The char lengths are recorded.

(b) *Test criteria.* The test criteria when the testing is done in accordance with § 1616.4 *Sampling and acceptance procedures* and § 1616.5 *Test procedures* are:

(1) *Average char length.* The average char length of five specimens shall not exceed 17.8 cm. (7.0 in.).

(2) *Full-specimen burn.* No individual specimen shall have a char length of 25.4±0.5 cm. (10±0.2 in.).

(c) Details of the number of specimens which must meet the above test criteria for unit acceptance is specified in § 1616.4.

§ 1616.4 Sampling and acceptance procedures.

(a) *General.* (1) The test criteria of § 1616.3(b) shall be used in conjunction with the following fabric and garment sampling plan. The Consumer Product Safety Commission may consider and approve other sampling plans that provide at least the equivalent level of fire safety to the consumer, provided such alternate sampling plans have operating characteristics such that the probability of unit acceptance at any percentage defective does not exceed the corresponding probability of unit acceptance of the following sampling plan in the region of the latter's operating characteristic curves that lies between 5 and 95 percent acceptance probability. Alternate sampling plans approved for one manufacturer may be used by other manufacturers without prior Consumer Product Safety Commission approval.

(2) Different colors or different print patterns of the same fabric may be included in a single fabric or garment production unit, provided such colors or print patterns demonstrate char lengths that are not significantly different from each other as determined by previous testing of at least three samples from each color or print pattern to be included in the unit.

(3) Garments with different trim and findings may be included in a single garment production unit provided the other garment characteristics are identical except for size, color, and print pattern.

(4) For fabrics whose flammability characteristics are not dependent on chemical additives or chemical reactants to polymer, fiber, yarns, or fabrics, the laundering requirement of § 1616.5(c)(4) is met on subsequent fabric production units if results of testing an initial fabric production unit demonstrate acceptability according to the requirements of paragraph (b) of this section, *Normal sampling*, both before and after the appropriate laundering.

(5) If the fabric has been shown to meet the laundering requirement, § 1616.5(c)(4), the garments produced from that fabric are not required to be laundered prior to testing.

(6) Each sample, (five specimens), for Fabric Sampling shall be selected so that two specimens are in one fabric direction (machine or cross-machine) and three specimens are in the other fabric direction, except for the additional sample selected after a failure, in which case all five specimens shall be selected in the fabric direction in which the specimen failure occurred.

(7) Fabric samples may be selected from fabric as outlined in paragraph (b) of this section, *Fabric sampling* or, for verification purposes, from randomly selected garments.

(8) Multi-layer fabrics shall be tested with a hem of approximately 2.5 cm. (1 in.) sewn at the bottom edge of the specimen with a suitable thread and stitch. The specimen shall include each of the components over its entire length. Garments manufactured from multi-layer fabrics shall be tested with the edge finish which is used in the garment at the bottom edge of the specimen.

(b) *Fabric sampling.* A fabric production unit (unit) is either accepted or rejected in accordance with the following plan:

(1) *Normal sampling.* Select one sample from the beginning of the first fabric piece (piece) in the unit and one sample from the end of the last piece in the unit, or select a sample from each end of the piece if the unit is made up of only one piece. Test the two selected samples. If both samples meet all the test criteria of § 1616.3(b), accept the unit. If either or both of the samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1616.3(b)(1), reject the unit. If two or more of the individual specimens, from the 10 selected specimens, fail the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), reject the unit. If only one individual specimen, from the 10 selected specimens, fails the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), select five additional specimens from the same end of the piece in which the failure occurred, all five to be taken in the fabric direction in which the specimen failure occurred. If this additional sample passes all the test criteria, accept the unit. If this additional sample fails any part of the test criteria, reject the unit.

(2) *Reduced sampling.* (i) The level of sampling required for fabric acceptance may be reduced provided the preceding 15 units of the fabric have all been accepted using the Normal Sampling Plan.

(ii) The reduced Sampling Plan shall be the same as for Normal Sampling except that the quantity of fabric in the unit may be increased to 9,200 linear m. (10,000 linear yds.)

(iii) Select and test two samples in the same manner as in Normal Sampling. Accept or reject the unit on the same basis as with Normal Sampling.

(iv) Reduced Sampling shall be discontinued and Normal Sampling resumed if a unit is rejected.

(3) *Tightened sampling.* Tightened sampling shall be used when a unit is rejected under the Normal Sampling Plan. The Tightened Sampling shall be the same as Normal Sampling except that one additional sample shall be selected and cut from a middle piece in the unit. If the unit is made up of less than two pieces, the unit shall be divided into at least two pieces. The division shall be such that the pieces produced by the division shall not be smaller than 92 linear m. (100 linear yds.) or greater than 2,300 linear m. (2,500 linear yds.). If the unit is made up of two pieces, the additional sample shall be selected from the interior end of one of the pieces. Test the three selected samples. If all three selected samples meet all the test criteria of § 1616.3(b), accept the unit. If one or more of the three selected samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1616.3(b)(1), reject the unit. If two or more of the individual specimens, from the 15 selected specimens, fail the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), reject the unit. If only one individual specimen, from the 15 selected specimens, fails the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), select five additional specimens from the same end of the same piece in which the failure occurred, all five to be taken in the fabric direction in which the specimen failure occurred. If this additional sample passes all the test criteria, accept the unit. If this additional sample fails any part of the test criteria, reject the unit. Tightened Sampling may be discontinued and Normal Sampling resumed after five consecutive units have all been accepted using Tightened Sampling. If Tightened Sampling remains in effect for 15 consecutive units, production of the specific fabric in Tightened Sampling must be discontinued until that part of the process or component which is causing failure has been identified and the quality of the end product has been improved.

(4) *Disposition of rejected units.* (i) The piece or pieces which have failed and resulted in the initial rejection of the unit may not be retested, used, or promoted for use in children's sleepwear as defined in §§ 1616.2(a) and 1615.1(a) of the (Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X) (FF 3–71) (Subpart A of Part 1615 of this Chapter) except after reworking to improve the flammability characteristics and subsequent retesting and acceptance in accordance with the procedures in *Tightened Sampling.*

(ii) The remainder of a rejected unit, after removing the piece or pieces, the failure of which resulted in unit rejection, may be accepted if the following test plan is successfully concluded at all required locations. The required locations are those adjacent to each such failed piece. (Required locations exist on both sides of the "Middle Piece" tested in Tightened Sampling if failure of that piece resulted in unit rejection). Failure of a piece shall be deemed to have resulted in unit rejection if unit rejection occurred and a sample or specimen from the piece failed any test criterion of § 1616.3(b).

(iii) The unit should contain at least 15 pieces for disposition testing after removing the failing pieces. If necessary for this purpose, the unit shall be demarcated into at least 15 approximately equal length pieces unless such division results in pieces shorter than 92 linear m. (100 linear yds.). In this latter case, the unit shall be demarcated into roughly equal length pieces of approximately 92 linear m. (100 linear yds.) each. If such a division results in five pieces or less in the unit for each failing piece after removing the failing pieces, only the individual pieces retest procedure [described in paragraph (b)(4)(vi) of this section] may be used.

(iv) Select and cut a sample from each end of each adjoining piece beginning adjacent to the piece which failed. Test the two samples from the piece. If both samples meet all the test criteria of § 1616.3(b), the piece is acceptable. If one or both of the two selected samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1616.3(b)(1), the piece is unacceptable. If two or more of the individual specimens, from the 10 selected specimens, fail the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), the piece is unacceptable. If only one individual specimen, from the 10 selected specimens, fails the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), select five additional specimens from the same end of the piece in which the failure occurred, all five to be taken in the fabric direction in which the specimen failure occurred. If this additional sample passes all the test criteria, the piece is acceptable. If this additional sample fails any part of the test criteria, the piece is unacceptable.

(v) Continue testing adjoining pieces until a piece has been found acceptable. Then continue testing adjoining pieces until three successive adjoining pieces, not including the first acceptable piece, have been found acceptable or until five such pieces, not including the first acceptable piece, have been tested, whichever occurs sooner. Unless three successive adjoining pieces have been found acceptable among five such pieces, testing shall be stopped and the entire unit rejected without further testing. If three successive pieces have been found acceptable among five such pieces, accept the three successive acceptable pieces and the remaining pieces in the unit.

(vi) (A) Alternately, individual pieces from a rejected unit containing three or more pieces may be tested and accepted or rejected on a piece by piece basis according to the following plan, after removing the piece or pieces, the failure of which resulted in unit rejection.

(B) Select four samples (two from each end) from the piece. Test the four selected samples. If all four samples meet all the test criteria of § 1616.3(b), accept the piece. If one or more of the samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1616.3(b)(1), reject the piece. If two or more of the individual specimens, from the 20 selected specimens, fail the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), reject the piece. If only one individual specimen, from the 20 selected specimens, fails the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), select two additional samples from the same end of the piece in which the failure occurred. If these additional two samples meet all the test criteria of § 1616.3(b), accept the piece. If one or both of the two additional samples fail any part of the test criteria, reject the piece.

(vii) The pieces of a unit rejected after retesting may not be retested, used, or promoted for use in children's sleepwear as defined in §§ 1616.2(a) and 1615.1(a) of the Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (FF 3–71) (Subpart A of Part 1615 of this chapter) except after reworking to improve the flammability characteristics, and subsequent retesting in accordance with the procedures set forth in *Tightened Sampling.*

(5) *Records.* Written and physical records related to all tests performed under this Standard must be maintained by the manufacturer, importer, or other persons initially introducing items into commerce which are subject to this Standard, beginning on the effective date of the Standard. Such records shall include results of all tests, sizes of all units, and the disposition of all rejected pieces and units. Rules and regulations regarding recordkeeping may be established by the Consumer Product Safety Commission.

(c) *Garment sampling.* (1)(i). The Garment Sampling Plan is made up of two parts: (1) Prototype Testing and (2) Production Testing. Prior to production, prototypes must be tested to assure that the design characteristics of the garment are acceptable. Garment production units (units) are then accepted or rejected on an individual unit basis.

(ii) Edge finishes such as hems, except in multi-layer fabrics, and binding are excluded from testing except that when trim is used on an edge the trim must be subjected to prototype testing. Seams attaching findings are excluded from testing.

(2) *Prototype testing.* Pre-production prototype testing of each seam and trim specification to be included in each garment in a garment production unit shall be conducted to assure that garment specifications meet the flammability requirements of the Standard prior to production.

(i) *Seams.* Make three samples (15 specimens) using the longest seam type and three samples using each other seam type 10 inches or longer that is to be included in the garment. For purposes of recordkeeping, prior to testing, assign each specimen to one of the three samples. Test each set of three samples and accept or reject each seam design in accordance with the following plan:

(A) If all three samples meet all the test criteria of § 1616.3(b), accept the seam design. If one or more of the three samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1616.3(b)(1), reject the seam design. If three or more of the individual specimens from the 15 selected specimens fail the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), reject the seam design. If only one of the individual specimens from the 15 selected specimens fails the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), accept the seam design.

(B) If two of the individual specimens; from the 15 selected specimens, fail the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), select three more samples (15 specimens) and retest. If all three additional samples meet all the test criteria of § 1616.3(b), accept the seam design. If one or more of the three additional samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1616.3(b)(1), reject the seam design. If two or more of the individual specimens, from the 15 selected additional specimens, fail the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), reject the seam design. If only one of the individual specimens, from the 15 selected additional specimens, fails the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), accept the seam design.

(ii) *Trim.*—(A) Make three samples (15 specimens) from each type of trim to be included in the garment. Specimens shall be prepared by sewing or attaching the trim to the center of the vertical axis of an appropriate section of untrimmed fabric, beginning the sewing or attachment at the lower edge of each specimen. The sewing or attachment shall be made in the manner in which the trim is to be attached to the garment.

(B) Sewing or otherwise attaching the trim shall be done with thread or fastening material of the same composition and size to be used for this purpose in the garment and using the same stitching or seam type or other attaching procedure. The trim shall be sewn or fastened the entire length of the specimen. Prior to testing, assign each specimen to one of the three samples. Test the sets of three

V 40250 DEC 30 75 XUM

samples and accept or reject the type of trim and design on the same basis as seam design.

(3) *Production testing.* A unit is either accepted or rejected according to the following plan:

(i) *Normal sampling.* (A) From each unit, select at random sufficient garments and cut three samples (15 specimens) from the longest seam type. No more than five specimens may be cut from a single garment. Prior to testing, assign each specimen to one of the three samples. All specimens cut from a single garment must be included in the same sample. Test the three selected samples. If all three samples meet all the test criteria of § 1616.3(b), accept the unit. If one or more of the three samples fail the 17.8 cm. (7.0 in.) average char length criterion, § 1616.3(b)(1), reject the unit. If four or more of the individual specimens, from the 15 selected specimens, fail the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), reject the unit. If three or less of the individual specimens, from the 15 selected specimens, fail the 25.4 cm. (10 in.) char length criterion, § 1616.3(b)(2), accept the unit.

(B) If the garment under test does not have a seam at least 10 inches long in the largest size in which it is produced, the following selection and testing procedure shall be followed:

(*1*) Select and cut specimens 8.9 cm. (3.5 in.) wide by the maximum available seam length, with the seam in the center of the specimen and extending the entire specimen length. Cut three samples (15 specimens). These specimens shall be placed in specimen holders so that the bottom edge is even with the bottom edge of the specimen holder and the seam begins in the center of the bottom edge. Prior to testing, assign each specimen to one of the three samples. All specimens cut from a single garment must be included in the same sample.

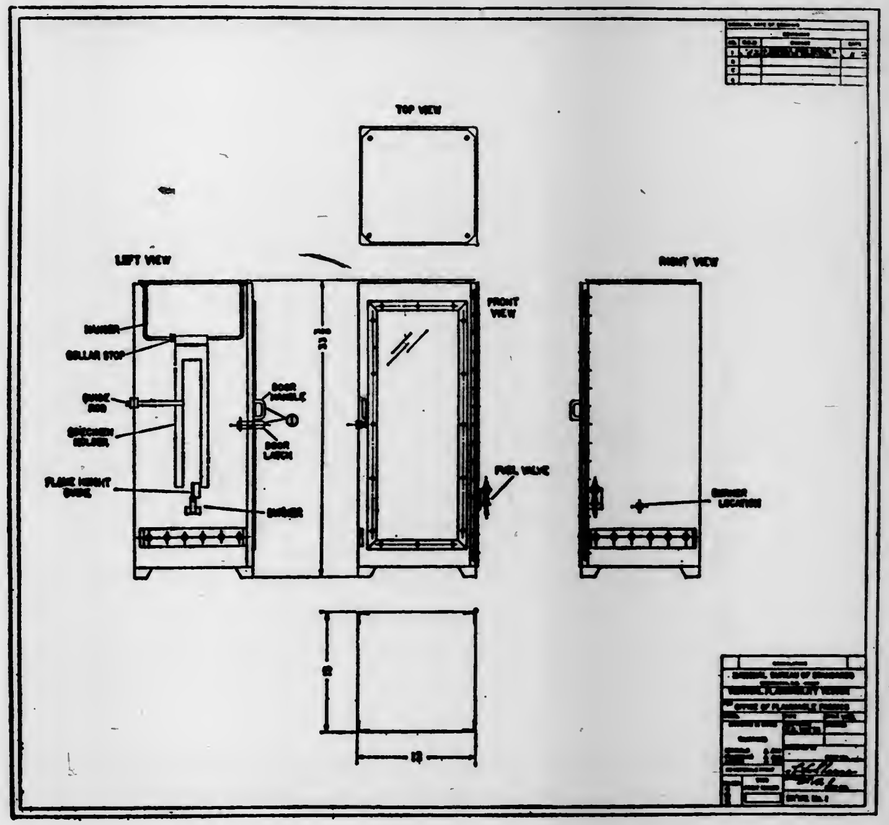
(2) Test the three samples. If all three samples pass the 17.8 cm. (7.0 in.) average char length criterion, § 1616.3(b)(1), and if three or fewer individual specimens fail by charring the entire specimen length, accept the unit. If the unit is not accepted in the above test, three samples (15 specimens) of the longest seam type shall be made using fabric and thread from production inventory and sewn on production machines by production operators. The individual fabric sections prior to sewing must be no larger than 20.3 x 63.3 cm. (8 x 25 in.) and must be selected from more than one area of the base fabric. Test the three prepared samples. Accept or reject the unit as described previously in this subsection.

(ii) *Reduced sampling.* (A) The level of sampling required for garment acceptance may be reduced provided the previous 15 units of the garments have all been accepted using the Normal Sampling Plan. The Reduced Sampling Plan shall be the same as for Normal Sampling except that the quantity of garments under test may be increased to up to two production units containing garments which have the same specific identity except for size, trim, findings, color, and print patterns as specified in paragraph (a) of this section.

(*B*) Select and test three samples in the same manner as in Normal Sampling. Accept or reject both units on the same basis as with Normal Sampling. Reduced Sampling shall be discontinued and Normal Sampling resumed if a unit is rejected.

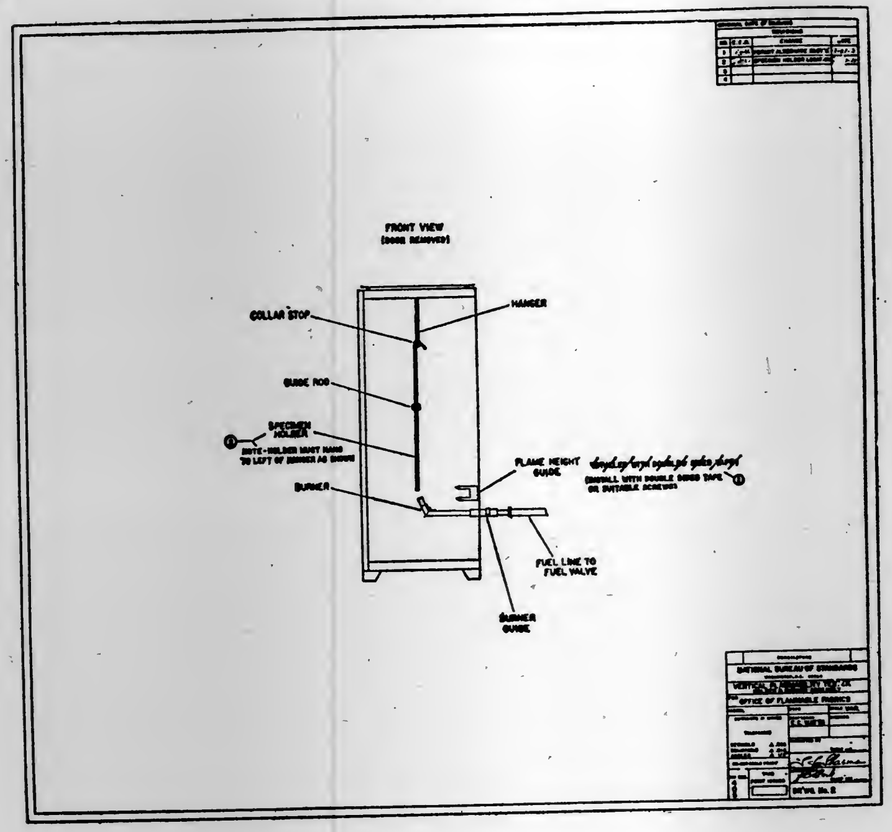
(4) *Disposition of rejected units.* Rejected units shall not be retested, used, or promoted for use in children's sleepwear as defined in §§ 1616.2(a) and 1615.1(a) of the Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (FF 3–71) (Subpart A of Part 1615 of this chapter) except after reworking to improve the flammability characteristics and subsequent retesting in accordance with the procedures set forth in *Garment production testing* [Paragraph (c)(3) of this section].

(5) *Records.* Written and physical records related to all tests performed under this Standard must be maintained by the manufacturer, importer, or other persons initially introducing items into commerce which are subject to this Standard, beginning on the effective date of this Standard. Such records shall include results of all tests, sizes of all units, and the disposition of all rejected pieces and units. Rules and regulations regarding recordkeeping may be established by the Consumer Product Safety Commission.

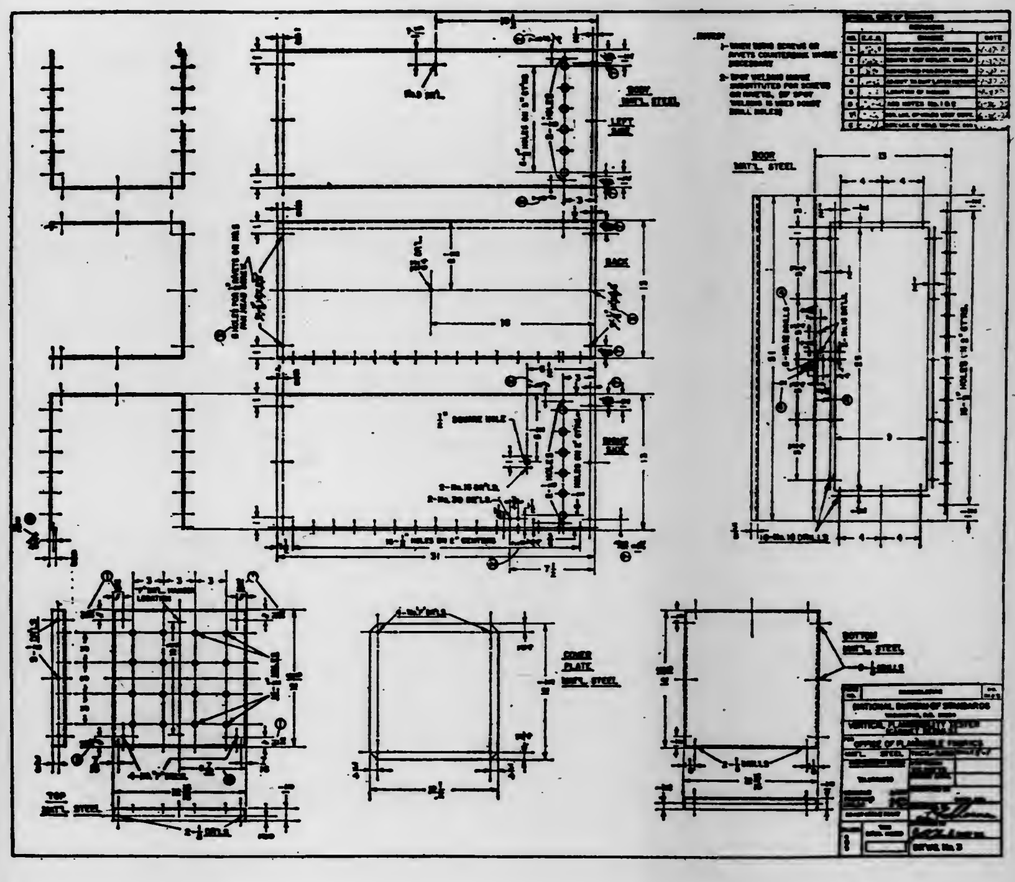


(d) *Compliance market sampling plan.* Sampling plans for use in market testing of items covered by this Standard may be issued by the Consumer Product Safety Commission. Such plans shall define noncompliance of a production unit to exist only when it is shown, with a high level of statistical confidence, those production units represented by tested items which fail such plans will, in fact, fail this Standards. Production units found to be noncomplying under the provisions of paragraph (d) of this section, shall be deemed not to conform to this Standard. The Consumer Product Safety Commission may publish such plans in the FEDERAL REGISTER.

§ 1616.5 Test procedure.



(a) *Apparatus.* The following test apparatus shall be used for the test. Alternate test apparatus may be used only with prior approval of the Consumer Product Safety Commission.



(1) *Test chamber.* The test chamber shall be a steel cabinet with inside dimensions of 32.9 cm. (12 15/16 in.) wide, 32.9 cm. (12 15/16 in.) deep and 76.2 cm. (30 in.) high. It shall have a frame which permits the suspension of the specimen holder over the center of the base of the cabinet at such a height that the bottom of the specimen is 1.7 cm. (¾ in.) above the highest point of the barrel of the gas burner specified in paragraph (a)(3) of this section, *Burner* and perpendicular to the front of the cabinet. The front of the cabinet shall be a close-fitting door with a transparent insert to permit observation of the entire test. The cabinet floor may be covered with a piece of asbestos paper, whose length and width are approximately 2.5 cm. (1 in.) less than the cabinet floor dimensions. The cabinet to be used in this test method is illustrated in Figure 1 and detailed in Engineering Drawings, Numbers 1 through 7.

(2) *Specimen holder.* The specimen holder to be used in this test method is detailed in Engineering Drawing Number 7. It is designed to permit suspension of the specimen in a fixed vertical position and to prevent curling of the specimen when the flame is applied. The specimen shall be fixed between the plates, which shall be held together with side clamps.

(3) *Burner.* The burner shall be the same as that illustrated in Figure 1 and detailed in Engineering Drawing Number 6. It shall have a tube of 1.1 cm. (0.43 in.) inside diameter. The input line to the burner shall be equipped with a needle valve. It shall have a variable orifice to adjust the height of the flame. The barrel of the burner shall be at an angle of 25 degrees from the vertical. The burner may be equipped with an adjustable stop collar so that it may be positioned quickly under the test specimen. The burner shall be connected to the gas source by rubber or other flexible tubing.

(4) *Gas supply system.* There shall be a pressure regulator to furnish gas to the burner under a pressure of 103–259 mm. Hg. (2–5 lbs. per sq. in.) at the burner inlet. (*Caution.* Precautionary laboratory practices must be followed to prevent the leakage of methane. Methane is a flammable gas which can be explosive when mixed with air and exposed to a source of ignition, and can cause asphyxiation because of the lack of air.)

(5) *Gas.* The gas shall be at least 97 percent pure methane.

(6) *Hooks and weights.* Metal hooks and weights shall be used to produce a series of loads for char length determinations. Suitable metal hooks consist of No. 19 gauge steel wire, or equivalent, made from 7.6 cm. (3 in.) lengths of the wire, bent 1.3 cm. (0.5 in.) from one end to a 45-degree angle hook. The longer end of the wire is fastened around the neck of the weight to be used and the other in the lower end of each burned specimen to one side of the burned area. The requisite loads are given in Table 1.

TABLE 1.—*Original fabric weight*[1]

Grams per square meter	Ounces per square yard	Loads	
		Grams	Pounds
Less than 101	Less than 3	54.4	0.12
101 to 207	3 to 6	113.4	.25
207 to 338	6 to 10	226.8	.50
Greater than 338	Greater than 10	340.2	.75

[1] Weight of the original fabric, containing no seams or trim, is calculated from the weight of a specimen which has been conditioned for at least 8 hr at 21±1.1° C (70±2° F) and 65±2 pct relative humidity. Shorter conditioning times may be used if the change in weight of a specimen in successive weighings made at intervals of not less than 2 hr does not exceed 0.2 pct of the weight of the specimen.

(7) *Stopwatch.* A stopwatch or similar timing device shall be used to measure time to 0.1 second.

(8) *Scale.* A linear scale graduated in mm. or 0.1-inch divisions shall be used to measure char length.

(9) *Circulating air oven.* A forced circulation drying oven capable of main-

V40250 DEC 30 75 XUM

taining the specimens at 105±2.8° C. (221±5° F.), shall be used to dry the specimen while mounted in the specimen holders.[3]

(10) *Desiccator.* An air-tight and moisture-tight desiccating chamber shall be used for cooling mounted specimens after drying. Anhydrous silica gel with an indicator shall be used as the desiccant in the desiccating chamber. Replace or reactivate the desiccant when it becomes inactive.

(11) *Hood.* A hood or other suitable enclosure shall be used to provide a draft-protected environment surrounding the test chamber without restricting the availability of air. This enclosure shall have a fan or other suitable means for exhausting smoke and/or toxic gases produced by testing.

(12) *Extinguishing plates.* Extinguishing plates shall be used to extinguish afterglow. The plates shall be metal, approximately 35.6 cm. x 5.1 cm. (14 x 2 in.) which fit within the opening of the specimen holder. The bottom plate shall be the thickness of the specimen holder and the top plate shall be at least 0.32 cm. (⅛ in.) thick. A suitable metal specimen mounting block may be used for the bottom plate.

(b) *Mounting and conditioning of specimens*—(1) The specimens shall be placed in specimen holders so that the bottom edge of each specimen is even with the bottom of the specimen holder. Mount the specimen in as close to a flat configuration as possible. The sides of the specimen holder shall cover 1.9 cm. (¾ in.) of the specimen width along each long edge of the specimen, and thus shall expose 5.1 cm. (2 in.) of the specimen width. The sides of the specimen holder shall be clamped with a sufficient number of clamps or shall be taped to prevent the specimen from being displaced during handling and testing. The specimens may be taped in the holders if the clamps fail to hold them. Place the mounted specimens in the drying oven in a manner that will permit free circulation of air at 105° C. (221° F.) around them for 30 minutes.[4]

(2) Remove the mounted specimens from the oven and place them in the desiccator for 30 minutes to cool. No more than five specimens shall be placed in a desiccator at one time. Specimens shall remain in the desiccator no more than 60 minutes.

(c) *Testing*—(1) *Burner adjustment.* With the hood fan turned off, use the needle valve to adjust the flame height of the burner to 3.8 cm. (1½ in.) above the highest point of the barrel of the burner. A suitable height indicator is shown in Engineering Drawing Number 6 and Figure 1.

(2) *Specimen burning and evaluation.* (i) One at a time, the mounted specimens shall be removed from the desiccator and suspended in the cabinet for testing. The cabinet door shall be closed and the burner flame impinged on the bottom edge of the specimen for 3.0 ±0.2 seconds.[5] Flame impingement is accomplished by moving the burner under the specimen for this length of time, and then removing it.

(ii) When flaming has ceased, remove the specimen from the cabinet, except for specimens which exhibit afterglow. If afterglow is evident, the specimen shall be removed from the cabinet 1 minute after the burner flame is impinged on the specimen if no flaming exists at that time. Upon removal from the cabinet, the afterglow shall be promptly extinguished. The afterglow shall be extinguished by placing the specimen while still in the specimen holder on the bottom extinguishing plate and immediately covering it with the top plate until all evidence of afterglow has ceased. After removing the specimen from the cabinet and, if appropriate, extinguishing afterglow, remove it from the holder and place it on a flat clean surface. Fold the specimen lengthwise along a line through the highest peak of the charred or melted area; crease the specimen firmly by hand. Unfold the specimen and insert the hook with the correct weight as shown in Table 1 in the specimen on one side of the charred area 6.4 mm. (¼ in.) from the lower edge. Tear the specimen by grasping the other lower corner of the fabric and gently raising the specimen and weight clear of the supporting surface.[6] Measure the char length as the distance from the end of the tear to the original lower edge of the specimen exposed to the flame. After testing each specimen, vent the hood and cabinet to remove the smoke and/or toxic gases.

(3) *Report.* Report the value of char length, in centimeters (or inches), for each specimen, as well as the average char length for each set of five specimens.

(4) *Laundering.* (i) The procedures described under § 1616.4 *Sampling and acceptance procedures.* § 1616.5(b) *Conditioning and mounting of specimens,* and (c) *Testing,* shall be carried out on finished items (as produced or after one washing and drying) and after they have been washed and dried 50 times according to the laundering procedure in AATCC Test Method 124–1969.[7] Items which do not withstand 50 launderings may be tested at the end of their useful service life with prior approval of the Consumer Product Safety Commission.

(ii) Washing procedure 6.2(III) of AATCC Test Method 124–1969, with a water temperature of 60±2.8° C. (140±5° F.) and drying procedure 6.3.2(B) of that Test method, shall be used. Maximum load shall be 3.64 kg. (8 lbs.) and may consist of any combination of test samples and dummy pieces. Alternately, a different number of times under another washing and drying procedure may be specified and used. If that procedure has previously been found to be equivalent by the Consumer Product Safety Commission. Such laundering is not required of items which are not intended to be laundered, as determined by the Consumer Product Safety Commission.

(iii) Items which are not susceptible to being laundered and are labeled "dry-clean only" shall be dry-cleaned by a procedure which has previously been found to be acceptable by the Consumer Product Safety Commission.

(iv) For the purpose of the issuance of a guarantee under Section 8 of the Act, finished sleepwear garments to be tested according to § 1616.4(c) *Garment sampling,* need not be laundered or dry-cleaned provided all fabrics used in making the garments (except trim) have been guaranteed by the fabric producer to be acceptable when tested according to § 1616.4(b) *Fabric sampling.*

§ 1616.6 Labeling requirements.

(a) All items of children's sleepwear shall be labeled with precautionary instructions to protect the items from agents or treatments which are known to cause significant deterioration of their flame resistance. If the item has been initially tested under § 1616.5(c)(4) *Laundering,* after one washing and drying, it shall be labeled with instructions to wash before wearing. Such labels shall be permanent and otherwise in accordance with rules and regulations established by the Consumer Product Safety Commission.

(b) All items of children's sleepwear in sizes 7 through 14 complying with this Standard (including those items that comply with FF 3–71) and manufactured on or after May 1, 1975 through May 1, 1978, shall bear a label which states: "Flame-resistant, U.S. Standard FF 5–74." The label must be prominent, conspicuous, legible and readily visible at the point of sale to ultimate consumers. The label statement may be attached to the item itself, on a hang tag attached to the item, or on a package enclosing the item. The label need not be affixed permanently.

[3] Procedure 1(1.1.1) of ASTM D 2654–71 "Standard Methods of Test for moisture content and moisture regain of textile material," describes a satisfactory oven (1972 Book of ASTM Standards, Part 24, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103).

[4] If the specimens are moist when received, permit them to air dry in laboratory conditions prior to placement in the oven. A satisfactory preconditioning procedure may be found in ASTM D 1776–67, "Conditioning Textiles and Textile Products for Testing". (1972 Book of ASTM Standards, Part 24, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103.)

[5] If more than 30 seconds elapse between removal of a specimen from the desiccator and the initial flame impingement, that specimen shall be reconditioned prior to testing.

[6] A figure showing how this is done is given in AATCC Test method 34–1969, "Fire Resistance of Textile Fabrics," Technical Manual of the American Association of Textile Chemists and Colorists, Vol. 46, 1970, published by AATCC, P.O. Box 12215, Research Triangle Park, North Carolina 27709.

[7] Technical Manual of the American Association of Textile Chemists and Colorists, Vol. 46, 1970, published by AATCC, P.O. Box 12215, Research Triangle Park, North Carolina 27709.

Subpart B—Rules and Regulations

AUTHORITY: Sec. 5, 67 Stat. 113–18, as amended 81 Stat. 571; 16 U.S.C. 1194.

§ 1616.31 Labeling, recordkeeping, retail display and guarantee.

(a) *Definitions.* For the purpose of this section, the following definitions apply:

(1) "Standard" means the Standard for the Flammability of Children's Sleepwear: Sizes 7 through 14 (FF 5–74) (Subpart A of Part 1616 of this Chapter) promulgated by the Consumer Product Safety Commission in the FEDERAL REGISTER of May 1, 1974 (39 FR 15214), and amended in the FEDERAL REGISTER of March 21, 1975 (40 FR 12811) (correction notice published for technical reasons on March 27, 1975, 40 FR 13547).

(2) "Children's sleepwear" means "children's sleepwear" as defined in § 1616.2(a) of the Standard, that is, "any product of wearing apparel size 7 through 14, such as nightgowns, pajamas, or similar or related items, such as robes, intended to be worn primarily for sleeping or activities related to sleeping. Diapers and underwear are excluded from this definition."

(3) "Item" means "item" as defined in § 1616.2(c) of the Standard, that is, "any product of children's sleepwear or any fabric or related material intended or promoted for use in children's sleepwear."

(4) "Market or handle" means any one or more of the transactions set forth in section 3 of the Flammable Fabrics Act (15 U.S.C. 1192).

(5) The definition of terms set forth in § 1616.2 of the Standard shall also apply to this section.

(b) *Labeling.* (1) Where any agent or treatment is known to cause deterioration of flame resistance or otherwise causes an item to be less flame resistant, such item shall be prominently, permanently, conspicuously, and legibly labeled with precautionary care and treatment instructions to protect the item from such agent or treatment.

(2) If the item has been initially tested under § 1616.5(c)(4) of the Standard after one washing and drying, it shall be prominently, permanently, conspicuously and legibly labeled with instructions to wash before wearing.

(3) Where any fabric or related material intended or promoted for use in children's sleepwear subject to the Standard is sold or intended for sale to the ultimate consumer for the purpose of conversion into children's sleepwear, each bolt, roll, or other unit shall be labeled with the information required by this section. Each item or fabric or related material sold to an ultimate consumer must be accompanied by a label, as prescribed by this section, which can by normal household methods be permanently affixed by the ultimate consumer to any item of children's sleepwear made from such fabric or related material.

(4) (i) Where items required to be labeled or stamped in accordance with paragraphs (b)(1), (b)(2), and/or (b)(3) of this section and fabrics required to be labeled or stamped in accordance with paragraph (b)(7) of this section are marketed at retail in packages, and the required label or stamp is not readily visible to the prospective purchaser, the packages must also be prominently, conspicuously, and legibly labeled with the required information.

(ii) Where garments required to be labeled or stamped in accordance with paragraph (b)(7) of this section are marketed at retail in packages, and the required label or stamp is not readily visible to the prospective purchaser:

(A) The packages must also be prominently, conspicuously, and legibly labeled with the information required by paragraph (b)(7) of this section; or

(B) There must be a garment style identification that is prominent, conspicuous, and legible and readily visible to the prospective purchaser, either on a label or hang tag attached to the garment design or on the garment packages. A style is a garment design or grouping, preselected by the manufacturer. A style may be composed of garments that form all or part of one or more GPU's and the style may include any number of garments the manufacturer chooses. Style identification means any numbers, letters, or combination thereof that are sufficient to identify the garments of the style and may include information such as color, season or size. If this option B is selected, in any recall of noncomplying items from a particular GPU.

(*1*) The garment manufacturer must recall the entire style(s) from all customers who purchased garments of the style(s) of which the GPU is part. However, retailers may elect to return only garments from the particular GPU necessitating the recall rather than the entire style(s) or portions of style(s) being recalled; and

(*2*) Within 48 hours of a written request, the garment manufacturer must supply to the Commission any samples in its possession of garments from the GPU, as requested. As required of all persons subject to this section, the garment manufacturer must also, within the time requested, supply to the Commission the names of any customers who purchased during a specified period of time, garments from the GPU (or the style(s) of which the GPU is a part) and supply access to all records required under the Standard and this section.

(5) Samples, swatches, or specimens used to promote or effect the sale of items subject to the Standard shall be labeled in accordance with this section with the information required by this section: Except that such information may appear on accompanying promotional materials attached to fabric samples, swatches or specimens used to promote the sale of fabrics to garment manufacturers. This requirement shall not apply, however, to samples, swatches, or specimens prominently, permanently, conspicuously, truthfully and legibly labeled: "Flammable, Sample only. Not for use or resale. Does not meet Standard for the Flammability of Children's Sleepwear; Sizes 7 through 14 (FF 5–74)."

(6) The information required on labels by this section shall be set forth separately from any other information appearing on the same label. Other information, representations, or disclosures not required by this section but placed on the same label with information required by this section, or placed on other labels elsewhere on the item, shall not interfere with the information required by this section. No person, other than the ultimate consumer, shall remove, mutilate, or cause or participate in the removal or mutilation of any label required by this section to be affixed to any item.

(7) Every manufacturer, importer, or other person (such as a converter) initially introducing items subject to the Standard into commerce shall assign to each item a unit identification (number, letter or date, or combination thereof) sufficient to identify and relate to the fabric production unit or garment production unit of which the item is a part. Such unit identification shall be designated in such a way as to indicate that it is a production unit under the Standard. The letters "GPU" and "FPU" may be used to designate a garment production unit identification and fabric production unit identification, respectively, at the option of the labeler. In addition to the requirements prescribed by this paragraph (b)(7), the requirements prescribed by paragraph (b)(4) of this section must be met for items marketed at retail in packages.

(i) Each garment subject to the Standard shall bear a label with minimum dimension of 1.3 centimeters (0.5 inch) by 1.9 centimeters (0.75 inch) containing the appropriate garment production unit identification for that garment in letters which are clear, conspicuous, and legible, and in a color which contrasts with the background of the label, or shall have such information stamped on the garment itself in letters which are clear, conspicuous, and legible, and in a color which contrasts with the background, and at least 2.54 centimeters (1 inch) in every direction from any other information. The stamp or label containing the garment production unit identification must be of such construction, and affixed to the garment in such a manner, as to remain on or attached to the garment, and legible and visible throughout its intended period of use.

(ii) The fabric production unit identification shall appear in letters at least 0.4 centimeter (one-sixth of an inch) in height against a contrasting background on each label that relates to such fabric and is required by the Textile Fiber Products Identification Act (15 U.S.C. 70–70k) and the regulations thereunder (16 CFR 303.1 through 303.45) or by the Wool Product Labeling Act of 1939 (15 U.S.C. 68–68j) and the regulations thereunder (16 CFR 300.1 through 300.35). When the information required by the Textile Fiber Products Identification Act or by the Wool Products Labeling Act of 1939 appears on an invoice used in lieu of labeling, the fabric production

V 40 250 DEC 30 75 XUM

unit identification required by this section may be placed clearly, conspicuously, and legibly on the same invoice in lieu of labeling.

(8) All items complying with the Standard and manufactured on or after May 1, 1975, through May 1, 1978, shall bear a label which states "Flame-resistant. U.S. Standard FF 5–74." The label must be prominent, conspicuous, and legible and readily visible at the point of sale to ultimate consumers. The label statement may be attached to the item itself, on a hang tag attached to the item, or on a package enclosing the item. The label need not be affixed permanently. The letters of the label must be at least 0.4 centimeter (one-sixth of an inch) in height and in a color which contrasts with the background of the label.

(c) *Segregation of complying and non-complying items by retailer.* Every person who sells non-complying items (as defined in § 1616.2(c) of the Standard and paragraph (a) (3) of this section) at retail stores or other establishments open to the general public where goods are offered for sale shall:

(1) Display the items which comply with the Standard, and for which the seller has documentary evidence of such compliance, so that no other merchandise is intermingled with those items; and identify such complying items with at least one sign, with black letters at least 2.5 centimeters (one inch) in height against a solid white background, bearing the statement "Flame resistant. Complies with the Standard for the Flammability of Children's Sleepwear (FF 5–74)."

(2) Display all other items of children's sleepwear, sizes 7 through 14, at a separate location within the store and identify these items with at least one sign, with black letters at least 2.5 centimeters (1 inch) in height against a solid white background, bearing the statement "Flammable. Does Not Meet Standard for the Flammability of Children's Sleepwear (FF 5–74)."

(3) Segregate those items of children's sleepwear, sizes 7 through 14, which comply with the Standard, and for which the seller has documentary evidence of such compliance, so that they shall not be located within 91 centimeters (36 inches) of any other items of children's sleepwear, sizes 7 through 14, when displayed for sale to consumers.

(d) *Records—manufacturers, importers, or other persons initially introducing items into commerce*—(1) *General.* Every manufacturer, importer, or other person (such as a converter) initially introducing into commerce items subject to the Standard, irrespective of whether guaranties are issued under paragraph (e) of this section, shall maintain written and physical records as hereinafter specified. The records required must establish a line of continuity through the process of manufacture of each production unit of articles of children's sleepwear, or fabrics or related materials intended or promoted for use in children's sleepwear, to the sale and delivery of the finished items and from the specific finished item to the manufacturing records. Such records shall show with respect to such items:

(i) Details, description and identification of any and all sampling plans engaged in purstuant to the requirements of the Standard. Such records must be sufficient to demonstrate compliance with such sampling plan(s) and must relate the sampling plan(s) to the actual items produced, marketed, or handled. This requirement is not limited by other provisions of this paragraph (d).

(ii) Garment production units or fabric production units of all garments or fabrics marketed or handled. The records must relate to an appropriate production unit identification on or affixed to the item itself in accordance with paragraph (b) (7) of this section, and the production unit identification must relate to the garment production unit or fabric production unit.

(iii) Test results and details of all tests performed, both prototype and production, including char lengths of each specimen tested, average char lengths of the samples required to be tested, details of the sampling procedure employed, name and signature of person conducting tests, date of tests, and all other records necessary to demonstrate compliance with the test procedures and sampling plan specified by the Standard or authorized alternate sampling plan.

(iv) Disposition of all failing or rejected items. Such records must demonstrate that the items were retested or reworked and retested in accordance with the Standard prior to sale or distribution and that such retested or reworked and retested items comply with the Standard, or otherwise show the disposition of such items.

(v) Fiber content and manufacturing specifications relating the same to prototype and production testing and to the production units to which applicable.

(vi) Data and test results relied on as a basis for inclusion of different colors or different print patterns of the same fabric as a single fabric or garment production unit under § 1616.4(a) (2) of the Standard.

(vii) Data and test results relied on as a basis for reduced laundering of fabric or garments during test procedures under § 1616.5(c) (4) of the Standard and any quantities issued or received relating to laundering as well as details of the laundering procedure utilized.

(viii) Identification, composition, and details of application of any flame retardant treatments employed. All prototype and production records shall relate to such information.

(ix) Date and quantity of each sale or delivery of items subject to the Standard (except the date of sale to an ultimate consumer) and the name and address of the purchaser or recipient (except an ultimate consumer). The items involved in each sale or delivery shall be identified by production unit or by style. A style is a garment design or grouping. A style may be composed of garments that form all or part of one or more garment production units and the style may include any number of garments the manufacturer chooses. If a person subject to the requirements of paragraph (d) of this section maintains sales records which identify the items sold or delivered by style, and if recall of one or more production units subject to the Standard is required, that person in recalling such production units shall notify all purchasers of items of the style in which such production unit or units were manufactured. Retailers may elect to return all items of the style involved, or all items of the production units subject to recall.

(2) *Fabrics.* In addition to the information specified in paragraph (d) (1) of this section, the written and physical records maintained with respect to each fabric production unit shall include (i) finished fabric samples sufficent to repeat the fabric sampling procedure required by § 1616.4 of the Standard for each production unit marketed or handled; and (ii) records to relate the samples to the actual fabric production unit. Upon written request of any duly authorized employee or agent of the Commission, samples sufficient for the sampling and testing of any production unit in accordance with the Standard shall be furnished from these records within the time specified in the written request.

(3) *Garments—prototype testing.* In addition to the records specified in paragraph (d) (1) of this section, the following written and physical records shall be maintained with respect to the garment prototype testing required by the Standard:

(i) Specification, fiber content, and details of construction on all seams, fabrics, threads, stitches, and trims used in each garment style or type upon which prototype testing was performed, relating the same to such garment style or type and to all production units to which such prototype testing is applicable.

(ii) Samples sufficient to repeat the prototype tests required by § 1616.4 of the Standard for all fabrics, seams, threads, stitches, and trims used in such prototype testing, relating such samples to the records required by this paragraph (d), including the information required by paragraph (d) (3) (i) of this section. Upon written request of any duly authorized employee or agent of the Commission, samples sufficient for the testing of any prototype specimens identical to those specimens that were actually tested pursuant to the Standard shall be furnished from these records within the time specified in that written request.

(iii) A complete untested garment from each style or type of garment marketed or handled.

(iv) Remains of all physical specimens tested in accordance with the prototype testing required by § 1616.4 of the Standard, relating such samples to the records required by this paragraph (d), including information required by paragraph (d) (3) (i) of this section.

(4) *Garments—production testing.* In addition to the records required by paragraph (d) (1) of this section, written and physical records shall be maintained and shall show with respect to each garment production unit:

(i) Source and fabric production unit identification of all fabrics subject to testing used in each garment production unit.

(ii) Identification and appropriate reference to all prototype records and prototype tests applicable to each production unit.

(iii) Any guaranty relied upon to demonstrate that the fabric utilized in such garments meets the laundering requirements of the Standard.

(iv) Data sufficient to show that tested samples were selected from the production unit at random from regular production.

(v) Written data that will enable the Commission to obtain and test garments under any applicable compliance market sampling plan.

(5) *Record retention requirements.* The records required by this paragraph (d) shall be maintained for 3 years, except that records relating to prototype testing shall be maintained for as long as they are relied upon as demonstrating compliance with the prototype testing requirements of the Standard and shall be retained for 3 years thereafter.

(e) *Tests for guaranty purposes.* Reasonable and representative tests for the purpose of issuing a guaranty under section 8 of the Flammable Fabrics Act (15 U.S.C. 1197) for items subject to the Standard shall be those tests performed pursuant to any sampling plan or authorized alternative sampling plan engaged in pursuant to the requirements of the Standard.

(f) *Compliance with this section.* No person subject to the Flammable Fabrics Act shall manufacture, import, distribute, or otherwise market or handle any item subject to the Standard, including samples, swatches, or specimens used to promote or effect the sale thereof, which is not in compliance with this section.

EFFECTIVE DATE. This section became effective May 1, 1975.

Subpart C—Interpretations and Policies

AUTHORITY: Secs. 1–17, 67 Stat. 111–15, as amended, 81 Stat. 568–74; 15 U.S.C. 1191–1204.

§ 1616.61 Enforcement policy.

(a) It is the policy of the Consumer Product Safety Commission that all items of children's sleepwear in sizes 7 through 14 (including garments and fabric or related material intended or promoted for use in such children's sleepwear) are subject to the Standard FF 5–74 (Subpart A of this Part) unless the manufacturing process has ended before May 1, 1975. The manufacturing process is deemed to end, for the purposes of the Standard, at the time the item is completely assembled, all functional materials have been affixed, and labeling of a permanent nature has been stamped, sewn, or otherwise permanently affixed to the item. Affixing of temporary price or promotional information or the packaging of items of sleepwear (including garments and fabrics or related material intended or promoted for use in such sleepwear) does not affect the date on which the manufacturing process is deemed to end.

(b) All items of children's sleepwear in sizes 7 through 14 (including garments and fabric or related material intended or promoted for use in such children's sleepwear) which are in inventory or with the trade on the effective date of Standard FF 5–74 are exempt from the requirements of the Standard. For domestically-made items of children's sleepwear in sizes 7 through 14 to be considered "in inventory or with the trade" on the effective date of the Standard, the manufacturing process must have ended prior to May 1, 1975. For foreign-made items of children's sleepwear in sizes 7 through 14 to be considered "in inventory or with the trade" on the effective date of the Standard, the manufacturing process must have ended and the goods must have been entered into the United States before May 1, 1975.

EFFECTIVE DATE: This policy became effective March 21, 1975. It was originally published as a notice on that date at 40 FR 12639.

§ 1616.62 Policy regarding retail display requirements for items.

For purposes of the retail display and identification requirements of § 1616.31 (c), and for those purposes only, any item which was manufactured before May 1, 1975, and for which a retailer has documentary evidence of compliance with all sampling and testing requirements of the Standard (FF 5–74) (Subpart A of this Part), will be deemed to be a complying item notwithstanding the absence of an affirmative label to indicate compliance with the Standard as required by § 1616.6(b) of the Standard and § 1616.31(b) (8), or the absence of a garment production unit identification or style identification which meets all requirements of §§ 1616.31(b) (4) and (7), provided that such an item complies with all other labeling requirements of § 1616.31(b).

EFFECTIVE DATE: This policy was originally published as a notice on October 22, 1975 at 40 FR 49537.

§ 1616.63 Policy regarding garment production unit identification.

No provision of 16 CFR 1616.31(b) (7) prohibits placement of a garment production unit identification on a label containing other information. Provided, however, that when the garment production unit identification appears on a label containing other information, provisions of § 1616.31(b) (6) require that the garment production unit identification must be set forth separately from any other information appearing on the same label, and that information not required by the applicable enforcement regulation (§ 1616.31), but placed on the same label with the garment production unit identification, shall not interfere with the garment production unit identification.

EFFECTIVE DATE: This policy was originally published as a notice on October 22, 1975 at 40 FR 49537.

§ 1616.64 Policy regarding recordkeeping requirements.

No provision of the Standard for the Flammability of Children's Sleepwear: Sizes 7 through 14 (FF 5–74) (Subpart A of this Part) or of the enforcement regulations at § 1616.31 prohibits the utilization of fabric which was manufactured before May 1, 1975, and which was not manufactured in production units, in the manufacture of children's sleepwear garments which are subject to the Standard. When such fabric is utilized in the manufacture of such garments, the inability of the garment manufacturer to record the fabric production unit identification of such fabric does not constitute a violation of § 1616.31(d) (4) (i).

EFFECTIVE DATE: This policy was originally published as a notice on October 22, 1975 at 40 FR 49538.

PART 1630—STANDARD FOR THE SURFACE FLAMMABILITY OF CARPETS AND RUGS (FF 1–70)

Subpart A—The Standard

Sec.
1630.1 Definitions.
1630.2 Scope and application.
1630.3 General requirements.
1630.4 Test procedure.
1630.5 Labeling.

Subpart B—Rules and Regulations

1630.31 Reasonable and representative tests and recordkeeping requirements.
1630.32 Carpets and rugs with fire-retardent treatment.

Subpart C—Washing Procedures

1630.61 Hide carpets and rugs—alternative washing procedure.
1630.62 Wool flokati carpets and rugs—alternative washing procedure.
1630.63 Suspension of washing requirements for carpets and rugs with alumina trihydrate in the backing.

Subpart A—The Standard

AUTHORITY: Sec. 4, 67 Stat. 112, as amended, 81 Stat. 569–70; 15 U.S.C. 1193.

EFFECTIVE DATE: This standard became effective April 16, 1971. It was orginally published as a notice on April 16, 1970 (35 FR 6211).

§ 1630.1 Definitions.

In addition to the definitions given in section 2 of the Flammable Fabrics Act, as amended (sec. 1, 81 Stat. 568; 15 U.S.C. 1191), and the procedures under that act for setting standards (Part 1607 of this Chapter), the following definitions apply for the purposes of this Standard:

(a) "Acceptance Criterion" means that at least seven out of eight individual specimens of a given carpet or rug shall meet the test criterion as defined in this Standard.

(b) "Test Criterion" means the basis for judging whether or not a single specimen of carpet or rug has passed the test, i.e., the charred portion of a tested specimen shall not extend to within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame at any point.

(c) "Carpet" means any type of finished product made in whole or in part of fabric or related material and intended for use or which may reasonably be expected to be used as a floor covering which is exposed to traffic in homes, offices, or other places of assembly or accommodation, and which may or may not be fastened to the floor by mechanical means such as nails, tacks, barbs, staples,

cooled to room temperature, but in no

of the act if such person establishes a

regard to any carpets or rugs or qualities

DEC 30 75
VOL 40 NO 250
XUM

adhesives, and which has one dimension greater than 1.83 m. (6 ft.) and a surface area greater than 2.23 m.² (24 sq. ft.). Products such as "carpet squares", with one dimension less than 1.83 m. (6 ft.) and a surface area less than 2.23 m.² (24 sq. ft.), but intended to be assembled upon installation into assemblies which may have one dimension greater than 1.83 m. (6 ft.) and a surface area greater than 2.23 m.² (24 sq. ft.), are included in this definition. Mats, hides with natural or synthetic fibers, and other similar products in the above defined dimensions are included in this definition, but resilient floor coverings such as linoleum, asphalt tile and vinyl tile are not.

(d) "Rug" means the same as carpet and shall be accepted as interchangeable with carpet.

(e) "Traffic Surface" means a surface of a carpet or rug which is intended to be walked upon.

(f) "Timed Burning Tablet" (pill) means the methenamine tablet, weighing approximately 0.149 gram (2.30 grains), sold as Product No. 1588 in Catalog No. 79, December 1, 1969, by the Eli Lilly Company of Indianapolis, Ind. 46206, or an equal tablet.

(g) "Fire-Retardant Treatment" means any process to which a carpet or rug has been exposed which significantly decreases the flammability of that carpet or rug and enables it to meet the acceptance criterion of this Standard.

§ 1630.2 Scope and application.

(a) This Standard provides a test method to determine the surface flammability of carpets and rugs when exposed to a standard small source of ignition under carefully prescribed draft-protected conditions. It is applicable to all types of carpets and rugs used as floor covering materials regardless of their method of fabrication or whether they are made of natural or synthetic fibers or films, or combinations of or substitutes for these.

(b) One of a kind, carpet or rug, such as an antique, an Oriental, or a hide, may be excluded from testing under this Standard pursuant to conditions established by the Consumer Product Safety Commission.

§ 1630.3 General requirements.

(a) *Summary of test method.* This method involves the exposure of each of eight conditioned, replicate specimens of a given carpet or rug to a standard igniting source in a draft-protected environment, and measurement of the proximity of the charred portion to the edge of the hole in the prescribed flattening frame.

(b) *Test criterion.* A specimen passes the test if the charred portion does not extend to within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame at any point.

(c) *Acceptance criterion.* At least seven of the eight specimens shall meet the test criterion in order to conform with this Standard.

§ 1630.4 Test procedure.

(a) *Apparatus*—(1) *Test chamber.* The test chamber shall consist of an open top hollow cube made of noncombustible material[1] with inside dimensions 30.48 x 40.48 x 30.48 cm. (12 x 12 x 12 in.) and a minimum of 6.35 (¼ in.) wall thickness. The flat bottom of the box shall be made of the same material as the sides and shall be easily removable. The sides shall be fastened together with screws or brackets and taped to prevent air leakage into the box during use.

NOTE: A minimum of two chambers and two extra bottoms is suggested for efficient operation.

(2) *Flattening frame.* A steel plate, 22.86 x 22.86 cm. (9 x 9 in.), 6.35 mm. (¼ in.) thick with a 20.32 cm. (8 in.) diameter hole in its center is required to hold the carpet or rug flat during the course of the test. It is recommended that one be provided for each test chamber.

(3) *Standard igniting source.* No. 1588 methenamine timed burning tablet or an equal tablet. These tablets shall be stored in a desiccator over a desiccant for 24 hours prior to use. (Small quantities of absorbed water may cause the tablets to fracture when first ignited. If a major fracture occurs, any results from that test shall be ignored, and it shall be repeated.)

(4) *Test specimens.* Each test specimen shall be a 22.86 x 22.86 cm. (9 x 9 in.) section of the carpet or rug to be tested. Eight specimens are required.

(5) *Circulating air oven.* A forced circulation drying oven capable of removing the moisture from the specimens when maintained at 105° C. (221° F.) for 2 hours.[2]

(6) *Desiccating cabinet.* An airtight and moisture tight cabinet capable of holding the floor covering specimens horizontally without contacting each other during the cooling period following drying, and containing silica gel desiccant.

(7) *Gloves.* Nonhygroscopic gloves (such as rubber polyethylene) for handling the sample after drying, and raising the pile on specimens prior to testing.

(8) *Hood.* A hood capable of being closed and having its draft turned off during each test and capable of rapidly removing the products of combustion following each test. The front or sides of the hood should be transparent to permit observation of the tests in progress.

(9) *Mirror.* A small mirror mounted above each test chamber at an angle to permit observation of the specimen from outside of the hood.

(10) *Vacuum cleaner.* A vacuum cleaner to remove all loose material from each specimen prior to conditioning. All surfaces of the vacuum cleaner contacting the specimen shall be flat and smooth.

(b) *Sampling*—(1) (i) *Selection of samples.* Select a sample of the material representative of the lot and large enough to permit cutting eight test specimens 22.86 x 22.86 cm. (9 x 9 in.), free from creases, fold marks, delaminations, or other distortions. The test specimens should contain the most flammable parts of the traffic surface at their centers. The most flammable area may be determined on the basis of experience or through pretesting.

(ii) If the carpet or rug has had a fire-retardant treatment, or is made of fibers which have had a fire-retardant treatment, the selected sample or oversized specimens thereof shall be washed, prior to cutting of test specimens either 10 times under the washing and drying procedure prescribed in Method 124–1967 of the American Association of Textile Chemists and Colorists [washing procedure 6.2 (III) with a water temperature of 60°±2.8° C. (140°±5° F.), drying procedure 6.3.2(B), maximum load 3.64 kg. (8 pounds)],[3] or such number of times under such other washing and drying procedure as shall previously have been found to be equivalent by the Consumer Product Safety Commission. Alternatively, the selected sample or oversized specimens thereof may be washed, dry-cleaned, or shampooed 10 times, prior to cutting of test specimens, in such manner as the manufacturer or other interested party shall previously have established to the satisfaction of the Consumer Product Safety Commission is normally used for that type of carpet or rug in service.

(2) *Cutting.* Cut eight 22.86±0.64 cm. (9±¼ in.) square specimens of each carpet or rug to be tested to comply with paragraph (b)(1) of this section.

(c) *Conditioning.* (1) Clean each specimen with the vacuum cleaner until it is free of all loose ends left during the manufacturing process and from any material that may have been worked into the pile during handling.[4] Care must be exercised to avoid "fuzzing" of the pile yarn.

(2) Place the specimens in the drying oven in a manner that will permit free circulation of the air at 105° C. (221° F.) around them for 2 hours.[5] Remove the specimens from the oven with gloved hands and place them horizontally in the desiccator with traffic surface up and free from contact with each other until cooled to room temperature, but in no instance less than 1 hour.

(d) *Testing.* (1) Place the test chamber in the draft-protected environment (hood with draft off) with its bottom in place. Wearing gloves, remove a test specimen from the desiccator and brush its surface with a gloved hand in such a manner as to raise its pile. Place the specimen on the center of the floor of the test chamber, traffic surface up, exercising care that the specimen is horizontal and flat. Place the flattening frame on the specimen and position a methenamine tablet on one of its flat sides in the center of the 20.32 cm. (8 in.) hole.

(2) Ignite the tablet by touching a lighted match or an equivalent igniting source carefully to its top. If more than 2 minutes elapse between the removal of the specimen from the desiccator and the ignition of the tablet, the conditioning must be repeated.

(3) Continue each test until one of the following conditions occurs:

(i) The last vestige of flame or glow disappears. (This is frequently accompanied by a final puff of smoke.)

(ii) The flaming or smoldering has approached within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame at any point.

(4) When all combustion has ceased, ventilate the hood and measure the shortest distance between the edge of the hole in the flattening frame and the charred area. Record the distance measured for each specimen.

(5) Remove the specimen from the chamber and remove any burn residue from the floor of the chamber. Before proceeding to the next test, the floor must be cooled to normal room temperature or replaced with one that is at normal room temperature.

(e) *Report.* The number of specimens of the eight tested in which the charred area does not extend to within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame shall be reported.

(f) *Interpretation of results.* If the charred area does not extend to within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame at any point for at least seven of the eight specimens, the carpet or rug meets the acceptance criterion.

§ 1630.5 Labeling.

If the carpet or rug has had a fire-retardant treatment or is made of fibers which have had a fire-retardant treatment, it shall be labeled with the letter "T" pursuant to conditions established by the Consumer Product Safety Commission.

Subpart B—Rules and Regulations

AUTHORITY: Sec. 5, 67 Stat. 112, as amended by 81 Stat. 570; 15 U.S.C. 1194.

§ 1630.31 Reasonable and representative tests and recordkeeping requirements.

[EXPLANATION: Section 8 of the act, among other things, provides that no person shall be subject to criminal prosecution under section 7 of the act for a violation of section 3 of the act if such person establishes a guaranty received in good faith signed by and containing the name and address of the person by whom the product, fabric, or related material guaranteed was manufactured, or from whom it was received; to the effect that reasonable and representative tests made in accordance with applicable flammability standards show that the product, fabric, or related material covered by the guaranty conforms with such standards.

[While a person establishing a guaranty received in good faith would not be subject to criminal prosecution under section 7 of the act, he and/or the merchandise involved, would nevertheless remain subject to the administrative processes of the Consumer Product Safety Commission under section 5 of the act as well as injunction and condemnation procedures under section 6 thereof. A guarantor derives no immunity of any kind, civil or criminal, from the issuance of his own guafanty or performance of the reasonable and representative tests prescribed by this section.

[The furnishing of guaranties is not mandatory under the act. The purpose of this section is to establish minimum requirements for reasonable and representative tests upon which guaranties may be based. The section does not have any legal effect beyond that specified in section 8 of the act.]

(a) For the purposes of this section the following definitions apply:

(1) "Standard" means the standards in Subpart A of this Part.

(2) "Test" means a test as prescribed by the Standard.

(3) "Acceptance criterion" means "acceptance criterion" as defined in the Standard.

(4) "Test criterion" means "test criterion" as defined in the Standard.

(5) "Carpet" and "rug" mean "carpet" and "rug" as defined in the Standard.

(6) "Quality of machine-made carpets or rugs" means any line of carpets or rugs, essentially machine-made, which are substantially alike in all respects, including, as applicable, constructional units (needles, pitch, rows, shot, stitches, and weight), dye class, dyestuff, dyeing application method, gage, pile levels, pile height, average pile thickness, pile weight, pile yarn, total thickness, total weight, tufts, tuft length, tuft bind, warp yarn, filler yarn, yarn ends per needle, loop length, backing, back coating, primary backing, secondary backing, backing thickness, backing fabric count, backing warp and filler yarns, including stuffer and dead frame yarns, backing weight, fiber and/or other materials content, and fire retardant treatment received including the specifications and quantity of chemicals used.

(7) "Quality of handmade or hide carpets or rugs" means any line of carpets or rugs which are essentially handmade and/or are essentially hides and which are alike in all respects, including those specified in paragraph (a)(6) of this section, where applicable, except that such carpets or rugs may vary where unavoidable and/or may vary because of natural variations in hides of the same type, so long as such variations do not affect flammability.

(b) The tests set forth in paragraphs (c), (d), (e), and (f) of this section are reasonable and representative tests with regard to any carpets or rugs or qualities thereof to which they apply, except, however, that any test of any quality, whenever performed, which does not show a meeting of the acceptance criterion of the Standard shall be considered the reasonable and representative test for that quality and no guaranty with respect thereto shall be issued after the performance of such test. Immediately before conditioning and testing, each carpet or rug specimen tested pursuant to this section shall be in the form in which the carpet or rug or quality thereof which it represents is sold or offered for sale to the ultimate consumer.

(c) Reasonable and representative tests with respect to any quality of machine-made carpets or rugs are (1) at least one test performed upon commencement of production, importation, or other receipt thereof, (2) at least one test performed after production, importation, or other receipt of the first 25,000 linear yards of the quality, and (3) at least one test after production, importation, or other receipt of every 50,000 linear yards of the quality thereafter. Except, however, that tests need be performed only after production, importation, or receipt of each additional 100,000 linear yards of the quality, so long as all 24 specimens required to be tested in a complete series of three required tests immediately preceding any given test (eight out of eight specimens in each of the three preceding tests) meet the test criterion, rather than seven out of eight specimens, as permitted under the acceptance criterion of the Standard.

(d) Reasonable and representative tests with respect to any quality of handmade or hide carpets or rugs are at least one test performed upon the commencement of production, importation, or other receipt thereof and at least one test after production, importation, or other receipt of every 10,000 square yards of the quality thereafter.

(e) Reasonable and representative tests of a one-of-a-kind carpet or rug, machine made, handmade, or hide, is one test thereof or one test of an identical representative sample.

(f) Guaranties for carpets or rugs in inventory upon the effective date of the Standard may be issued in the same manner as other guaranties are issued. Reasonable and representative tests with respective to qualities of such carpets or rugs are at least one test performed upon approximately the first linear yard and one test thereafter for each 25,000 linear yards of a quality of machine-made carpets or rugs and at least one test performed upon approximately the first square yard and thereafter for each 10,000 square yards of a category of hand-made or hide carpets or rugs, in the order of the production, importation, or receipt by the guarantor of that quality.

(g) Any person issuing a guaranty for one or more carpets or rugs or qualities thereof based on reasonable and representative tests, shall maintain the following records for a period of 3 years from the date the tests were performed, or in the case of paragraph (h) of this section, the date the guaranties were

[1] 6.35 mm (¼ in.) cement asbestos board is a suitable material.

[2] Option 1 of ASTM D 2654–67T, "Methods of Test for Amount of Moisture in Textile Materials," describes a satisfactory oven. ("1969 Book of ASTM Standards," Part 24, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103.)

[3] Technical Manual of the American Association of Textile Chemists and Colorists, Vol. 45, 1969, published by AATCC, Post Office Box 12215, Research Triangle Park, N.C. 27709.

[4] The vacuum cleaning described is not intended to simulate the effects of repeated vacuum cleaning in service.

[5] If the specimens are moist when received, permit them to air-dry at laboratory conditions prior to placement in the oven. A satisfactory preconditioning procedure may be found in ASTM D 1776–67, "Conditioning Textiles and Textile Products for Testing." ("1969 Book of ASTM Standards", Part 24, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103.)

V 40 250 DEC 30 75 XUM

furnished. These records must be maintained in the United States by a person subject to section 3 of the act:

(1) All identifying numbers, symbols, etc., manufacturing specifications including all other information described in paragraph (a)(6) of this section, as applicable, and source of products or raw materials used therein.

(2) A physical sample of each carpet or rug or quality thereof covered by the guaranty at least 6 inches by 6 inches in size (36 square inches).

(3) The original or a copy of the report of each test performed for purposes of the guaranty (whether or not such report shows a meeting of the acceptance criterion) which shall disclose the date of the test, the results, and sufficient information to clearly identify the carpet or rug tested.

(4) A record applicable to each test in paragraph (g)(3) of this section showing the approximate yardage at which it was performed. Records otherwise required to be maintained in linear yards may be maintained in square yards on the basis of 4 square yards equals 1 linear yard.

(h) Persons furnishing guaranties based on guaranties received by them shall maintain records showing the guaranty received and identification of the carpet or rug or quality thereof guaranteed in turn by them.

(i) Any person furnishing a carpet or rug guaranty under section 8(a) of the act who neglects or refuses to maintain and preserve the records prescribed in this section shall be deemed to have furnished a false guaranty under the provisions of section 8(b) of the act.

(Sec. 5, 67 Stat. 112, as amended, 81 Stat. 570, 15 U.S.C. 1194; sec. 8, 67 Stat. 114, as amended, 81 Stat. 572, 15 U.S.C. 1197)

EFFECTIVE DATE: This section became effective July 20, 1971.

§ 1630.32 Carpets and rugs with fire-retardant treatment.

(a) For the purposes of this section the following definitions apply:

(1) "Carpet" and "rug" mean "carpet" and "rug" as defined in § 1630.31(c).

(2) "Fire-retardant treatment" means "fire-retardant treatment" as defined in the standard in Subpart A of this Part.

(b) If a carpet or rug or small carpet or rug is manufactured, imported, or otherwise marketed or handled which has had a fire-retardant treatment or is made of fibers which have had a fire-retardant treatment, the letter "T" shall be set forth legibly and conspicuously, and shall appear at all times, on each label and/or invoice relating thereto pursuant to the requirements of the Textile Fiber Products Indentification Act, 15 U.S.C. section 70, et seq., and the rules and regulations thereunder, whether or not such letter "T" appears elsewhere on said product. Samples, pieces, rolls, or squares used to promote or effect the sale of such carpet or rug are subject to the aforementioned requirements. As provided in the applicable portions of the aforesaid Act and the rules and regulations thereunder, where a carpet or rug or a small carpet or rug; which has had a fire-retardant treatment or is made of fibers which have had a fire-retardant treatment, is sold to an ultimate consumer and was either custom made or commercially installed for such consumer, the labeling required by this section shall not apply with respect to the carpet or rug if an invoice or other paper relating thereto, containing the letter "T", legibly and conspicuously written, is delivered to the consumer in due course of business.

(c) No person subject to the Flammable Fabrics Act shall manufacture, import, distribute, or otherwise market or handle any carpet or rug or small carpet or rug, including samples, swatches, or specimens used to promote or effect the sale thereof, which is not in compliance with this section.

(Sec. 5 of the Act, 67 Stat. 112, as amended by 81 Stat. 570, 15 U.S.C. sec. 1194)

EFFECTIVE DATE: This section became effective January 22, 1973.

Subpart C—Washing Procedures

AUTHORITY: Secs. 4, 5, 67 Stat. 112, as amended, 81 Stat. 561–570; 15 U.S.C. 1193, 1194.

§ 1630.61 Hide carpets and rugs—alternative washing procedure.

(a) The Standard for the Surface Flammability of Carpets and Rugs (FF 1–70) at § 1630.4(b)(1)(ii) provides that if a carpet or rug has had a fire-retardant treatment, or is made of fibers which have had a fire-retardant treatment, the sample or oversized specimens thereof selected for testing under the standard shall be washed prior to the cutting of test specimens either 10 times under the washing and drying procedure prescribed in Method 124–1967 of the American Association of Textile Chemists and Colorists or such number of times under such other washing and drying procedure as shall previously have been found to be equivalent by the Consumer Product Safety Commission. Alternatively the selected sample or oversized specimens thereof may be washed, dry-cleaned, or shampooed 10 times, prior to the cutting of test specimens, in such manner as the manufacturer or other interested party has previously established to the satisfaction of the Consumer Product Safety Commission is normally used for that type of carpet or rug in service.

(b) On February 10, 1972 (37 FR 3010) the Federal Trade Commission published in the FEDERAL REGISTER a notice of approval of an alternative washing procedure under FF 1–70 for testing the flammability of shearling and hide rugs that (1) consist of natural wool or hair attached to the hide with no synthetic fibers and (2) have been treated with a fire-retardant finish. The notice of approval was corrected on March 17, 1972 (37 FR 5676). This approval is continued in effect by the Consumer Product Safety Commission pursuant to section 30(e) of the Consumer Product Safety Act (15 U.S.C. 2079(e)).

(c) Any hide carpet or rug for which such alternative procedure is utilized must be labeled with a conspicuous, legible and permanent label containing the following statement:

DO NOT WASH OR DRY CLEAN

This rug has been treated with a flame retardant. To keep rug attractive and clean use the following methods:

To eliminate loose dirt or dust, vacuum or shake pelt outdoors.

For spot cleaning, use water dampened cloth and rub lightly in one direction.

DO NOT USE DETERGENTS OR OTHER STAIN REMOVERS

(d) The alternative procedure is as follows: The test specimens shall be cut to size 9" x 9" before the procedure is initiated.

(1) Shake specimen vigorously to remove any loose fibers, dust and possible accumulated debris.

(2) Place specimen on a solid flat surface and anchor or hold firmly while conducting the test.

(3) Select an operating applicator consisting of a rod at least 2" in diameter and 9" long composed of nonabsorbant material such as glass or plastic.

(4) Select sufficient cloth to form at least five layers when wrapped around the operating applicator. The cloth shall be of the type known as "Crockmeter Test Cloth" as specified in Note 8.3 of AATCC Test Method 8–1969.

(5) Immerse cloth in water (100°F.) until thoroughly wetted.

(6) Manually wring out the cloth to remove all excess water and wrap around the operating applicator.

(7) Immediately with light pressure, stroke entire surface of specimen with the wrapped operating applicator in one direction only along the natural "lay" of the hair structure for ten complete strokes.

(8) Place test specimen in a circulating drying oven maintained at 212°F. until dry.

(9) Repeat the above procedure 10 times using a fresh or clean cloth each time.

(10) After 10 successive cycles of washing and drying the dried specimens shall be subjected to the testing procedures (pill test) as outlined in FF 1–70.

(e) This washing procedure and labeling provision are subject to revision or revocation should it be determined that such procedure is inadequate to fully protect the public.

§ 1630.62 Wool flokati carpets and rugs—alternative washing procedure.

(a) The Standard for the Surface Flammability of Carpets and Rugs (FF 1–70) at § 1630.4(b)(1)(ii) provides that if a carpet or rug has had a fire-retardant treatment, or is made of fibers which have had a fire-retardant treatment, the sample or oversized specimens thereof selected for testing under the standard shall be washed prior to the cutting of test specimens either 10 times under the washing and drying procedure prescribed in Method 124–1967 of the American Association of Textile Chemists and Colorists or such number of times under such other washing and drying procedure as shall previously have been found to be equivalent by the Consumer Product Safety Commission. Alternatively the selected sample or oversized specimens thereof may be washed, dry-cleaned, or shampooed 10 times, prior to the cutting of test specimens, in such manner as the manufacturer or other interested party has previously established to the satisfaction of the Consumer Product Safety Commission is normally used for that type of carpet or rug in service.

(b) On September 7, 1972 (37 FR 18122) the Federal Trade Commission published in the FEDERAL REGISTER a notice of approval of an alternative washing procedure under FF 1–70 for testing the flammability of wool flokati carpets and rugs. This approval is continued in effect by the Consumer Product Safety Commission pursuant to section 30(e) of the Consumer Product Safety Act (15 U.S.C. 2079(e)).

(c) Any wool flokati carpet or rug for which such alternative procedure is utilized must be labeled with a conspicuous, legible and permanent label containing the following statement:

DO NOT WASH IN HOME MACHINE OR DRY CLEAN—AVOID RUBBING OR BRUSHING WHILE DAMP.

This Flokati carpet or rug has been treated with a flame retardant. To maintain this flame retardant and to keep the carpet attractive and clean, use the following methods.

1. Vacuum (using suction head without rotating brush) or shake the rug (depending upon size) to remove loose dirt.

2. Home laundering: Place in bath tub or other suitable receptacle in solution of home detergent and lukewarm water (approximately 105° F.). Immerse face down and gently knead back of rug to remove soil. Rinse in lukewarm water (approximately 105° F.) until detergent is removed. Rug may then be rinsed again in cool water to improve appearance of face if desired. Line dry. Shake while damp to restore surface and fluff up fibers.

3. Spot cleaning: Remove greasy stains with a household grease remover. Remove soluble stains with lukewarm water (approximately 105° F.) and detergent by immersing spot in a pan and kneading the back of rug. Rinse thoroughly in lukewarm water. Line or floor dry. Shake while damp to restore surface and fluff up fibers.

4. Commercial cleaning: Use Roll-A-Jet equipment (or equivalent) with water not exceeding 105° F. Avoid use of excessive pressure or reciprocating brushes. Drying temperatures should not exceed 200° F.

(d) The alternative procedure is as follows:

(1) Cut test specimens to an oversize of 12" x 12" before the procedure is initiated.

(2) Vacuum specimens or shake vigorously to remove any loose fibers, dust or possible accumulated debris.

(3) Place individual specimen face down in a shallow pan which has been filled to a depth of 2" with a wash solution of 1½ grams of AATCC (American Association of Textile Chemists and Colorists) Standard Detergent as specified in AATCC Method 124–1967 (or equivalent) per liter of water preheated to 105° F. Knead the back of the specimen with hand for 1 minute. Water level and temperature should be maintained for each specimen.

(4) Thoroughly rinse specimen face down with warm water at 105° F. for 1 minute under a faucet with strong pressure.

(5) Remove excess liquor by use of a wringer, hydroextractor or gentle hand squeezing and dry in circulating air oven at 200° F. until dry.

(6) Repeat the above procedure 10 times using fresh detergent and fresh water for each set of eight specimens.

(7) Subject the dry specimens to the test procedures in FF 1–70.

(e) This washing procedure and labeling provisions are subject to revocation should it be determined that such procedure is inadequate to fully protect the public.

§ 1630.63 Suspension of washing requirements for carpets and rugs with alumina trihydrate in the backing.

(a)(1) The Standard for the Surface Flammability of Carpets and Rugs (FF 1–70) at § 1630.4(b)(1)(ii) provides that if a carpet or rug has had a fire-retardant treatment, or is made of fibers which have had a fire-retardant treatment, the sample or oversized specimens thereof selected for testing under the standard shall be washed prior to the cutting of test specimens either 10 times under the washing and drying procedure prescribed in Method 124–1967 of the American Association of Textile Chemists and Colorists or such number of times under such other washing and drying procedure as shall previously have been found to be equivalent by the Consumer Product Safety Commission. Alternatively the selected sample or oversized specimens thereof may be washed, dry-cleaned, or shampooed 10 times, prior to the cutting of test specimens, in such manner as the manufacturer or other interested party has previously established to the satisfaction of the Consumer Product Safety Commission is normally used for that type of carpet or rug in service.

(2) Section 1630.5 of the Standard provides that if a carpet or rug has had a fire-retardant treatment or is made of fibers which have had a fire-retardant treatment, it shall be labeled with the letter "T."

(b) On April 10, 1972, the Federal Trade Commission, which then had responsibility for enforcement of the Flammable Fabrics Act, announced that the use of alumina trihydrate in adhesives, foams, or latexes in carpet backings or elsewhere in the backings will be considered as a fire-retardant treatment. Therefore, the provisions of §§ 1630.4(b)(1)(ii) and 1630.5 of the Standard apply to carpets with alumina trihydrate in the backings. This interpretation continues in effect.

(c) On May 19, 1972, the Federal Trade Commission published a notice in the FEDERAL REGISTER (37 FR 10104) temporarily suspending the washing requirements under FF 1–70 for carpets and rugs containing alumina trihydrate in the backing. This temporary suspension was extended a number of times. On March 28, 1973 the Federal Trade Commission proposed in the FEDERAL REGISTER (38 FR 8101) an alternative laundering procedure for such carpets and rugs and gave notice that the suspension of the laundering requirement was extended until the completion of the proceeding to establish an alternative laundering procedure. The suspension continues in effect.

PART 1631—STANDARD FOR THE SURFACE FLAMMABILITY OF SMALL CARPETS AND RUGS; (FF 2–70)

Subpart A—The Standard

Sec.
1631.1 Definitions.
1631.2 Scope and application.
1631.3 General requirements.
1631.4 Test procedure.
1631.5 Labeling requirements.

Subpart B—Rules and Regulations

1631.31 Reasonable and representative test and recordkeeping requirements.
1631.32 Reasonable and representative test and recordkeeping requirements—additional requirements.
1631.33 Carpets and rugs with fire-retardant treatment.
1631.34 Small carpets and rugs not meeting acceptance criterion.

Subpart C—Washing Procedures

1631.61 Hide carpets and rugs—alternative washing procedure.
1631.62 Wool flokati carpets and rugs—alternative washing procedure.

Subpart A—The Standard

AUTHORITY: Sec. 4, 67 Stat. 112, as amended, 81 Stat. 569–70; 15 U.S.C. 1193.

EFFECTIVE DATE: This standard became effective December 29, 1971. It was originally published as a notice on December 29, 1970 (35 FR 19702).

§ 1631.1 Definitions.

In addition to the definitions given in section 2 of the Flammable Fabrics Act, as amended (sec. 1, 81 Stat. 568; 15 U.S.C. 1191), and the procedures under that act for setting standards (Part 1607 of this chapter), the following definitions apply for the purposes of this Standard:

(a) "Acceptance Criterion" means that at least seven out of eight individual specimens of a small carpet or rug shall meet the test criterion as defined in this Standard.

(b) "Test Criterion" means the basis for judging whether or not a single specimen of small carpet or rug has passed the test, i.e., the charred portion of a tested specimen shall not extend to within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame at any point.

(c) "Small Carpet" means any type of finished product made in whole or in part of fabric or related material and intended for use or which may reasonably be expected to be used as a floor covering which is exposed to traffic in homes, offices, or other places of assembly or accommodation, and which may or may not be fastened to the floor by mechanical means such as nails, tacks, barbs, staples, adhesives, and which has no dimension greater than 1.83 m. (6 ft.) and an area not greater than 2.23 m.² (24 sq. ft.). Products such as "Carpet Squares" with dimensions smaller than these but intended to be assembled upon installa-

V 40 250 DEC 30 75 XUM

tion, into assemblies which may have dimensions greater than these, are excluded from this definition. They are, however, included in the Standard for the surface flammability of carpets and rugs (FF 1–70) (Subpart A of Part 1630 of this Chapter). Mats, hides with natural or synthetic fibers, and other similar products are included in this definition if they are within the defined dimensions, but resilient floor coverings such as linoleum, asphalt tile and vinyl tile are not.

(d) "Small Rug" means, for the purposes of this Standard, the same as small carpet and shall be accepted as interchangeable with small carpet.

(e) "Traffic Surface" means a surface of a small carpet or rug which is intended to be walked upon.

(f) "Timed Burning Tablet" (pill) means the methenamine tablet, weighing approximately 0.149 grams (2.30 grains), sold as Product No. 1588 in Catalog No. 79, December 1, 1969, by the Eli Lilly Company of Indianapolis, Ind. 46206, or an equal tablet.

(g) "Fire - Retardant Treatment" means any process to which a small carpet or rug has been exposed which significantly decreases the flammability of that small carpet or rug and enables it to meet the acceptance criterion of this Standard.

§ 1631.2 Scope and application.

This Standard provides a test method to determine the surface flammability of small carpets and rugs when exposed to a standard small source of ignition under carefully prescribed draft-protected conditions. It is applicable to all types of small carpets and rugs used as floor covering materials regardless of their method of fabrication or whether they are made of natural or synthetic fibers or films, or combinations of, or substitutes for these.

One of a kind small carpet or rug, such as an antique, an Oriental or a hide, may be excluded from testing under this Standard pursuant to conditions established by the Consumer Product Safety Commission.

§ 1631.3 General requirements.

(a) *Summary of test method.* This method involves the exposure of each of eight conditioned, replicate specimens of a small carpet or rug to a standard igniting source in a draft-protected environment and measurement of the proximity of the charred portion to the edge of the hole in the prescribed flattening frame.

(b) *Test criterion.* A specimen passes the test if the charred portion does not extend to within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame at any point.

(c) *Acceptance criterion.* At least seven of the eight specimens shall meet the test criterion in order to conform with this Standard.

§ 1631.4 Test procedure.

(a) *Apparatus.*—(1) *Test chamber.* The test chamber shall consist of an open top hollow cube made of noncombustible material[1] with inside dimensions 30.48 x 30.48 x 30.48 cm. (12 x 12 x 12 in.) and a minimum of 6.35 mm. (¼ in.) wall thickness. The flat bottom of the box shall be made of the same material as the sides and shall be easily removable. The sides shall be fastened together with screws or brackets and taped to prevent air leakage into the box during use.

NOTE: A minimum of two chambers and two extra bottoms is suggested for efficient operation.

(2) *Flattening frame.* A steel plate, 22.86 x 22.86 cm. (9 x 9 in.) 6.35 mm. (¼ in.) thick with a 20.32 cm. (8 in.) diameter hole in its center is required to hold the specimen flat during the course of the test. It is recommended that one be provided for each test chamber.

(3) *Standard igniting source.* No. 1588 methenamine timed burning tablet or an equal tablet. These tablets shall be stored in a desiccator over a desiccant for 24 hours prior to use. (Small quantities of absorbed water may cause the tablets to fracture when first ignited. If a major fracture occurs, any results from that test shall be ignored, and it shall be repeated.)

(4) *Test specimens.* Each test specimen shall be a 22.86 x 22.86 cm. (9 x 9 in.) section of the small carpet or rug to be tested. Eight specimens are required.

(5) *Circulating air oven.* A forced circulation drying oven capable of removing the moisture from the specimens when maintained at 105° C. (221° F.) for 2 hours.[2]

(6) *Desiccating cabinet.* An airtight and moisture tight cabinet capable of holding the floor covering specimens horizontally without contacting each other during the cooling period following drying, and containing silica gel desiccant.

(7) *Gloves.* Nonhygroscopic gloves (such as rubber or polyethylene) for handling the sample after drying and raising the pile on specimens prior to testing.

(8) *Hood.* A hood capable of being closed and having its draft turned off during each test and capable of rapidly removing the products of combustion following each test. The front or sides of the hood should be transparent to permit observation of the tests in progress.

(9) *Mirror.* A small mirror mounted above each test chamber at an angle to permit observation of the specimen from outside the hood.

(10) *Vacuum cleaner.* A vacuum cleaner to remove all loose material from each specimen prior to conditioning. All surfaces of the vacuum cleaner contacting the specimen shall be flat and smooth.

[1] 6.35 mm. (¼ in.) cement asbestos board is a suitable material.

[2] Option 1 of ASTM D 2654–67T, "Methods of Test for Amount of Moisture in Textile Materials," describes a satisfactory oven. ("1969 Book of ASTM Standards," Part 24, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.)

(b) *Sampling.*—(1) *Selection of samples.* (i) Select a sample of the material representative of the lot and large enough to permit cutting eight test specimens 22.86 x 22.86 cm. (9 x 9 in.) free from creases, fold marks, delaminations or other distortions. The representative sample of material may require the use of more than one small carpet or rug. The test specimens should contain the most flammable parts of the traffic surface at their centers. The most flammable area may be determined on the basis of experience or through pretesting.

(ii) If the small carpet or rug has had a fire-retardant treatment, or is made of fibers which have had a fire-retardant treatment, the selected sample or oversized specimens thereof shall be washed, prior to cutting of test specimens, either 10 times under the washing and drying procedure prescribed in Method 124–1967 of the American Association of Textile Chemists and Colorists [washing procedure 6.2 (III) with a water temperature of 60±2.8° C (140±5° F.), drying procedure 6.3.2(B), maximum load 3.64 kg (8 pounds)],[3] or such number of times under such other washing and drying procedures as shall previously have been found to be equivalent by the Consumer Product Safety Commission. Alternatively, the selected sample or oversized specimens thereof may be washed, drycleaned, or shampooed 10 times, prior to cutting of test specimens, in such manner as the manufacturer or other interested party shall previously have established to the satisfaction of the Consumer Product Safety Commission is normally used for that type of small carpet or rug in service.

(2) *Cutting.* Cut eight 22.86±0.64 cm. (9±¼ in.) square specimens of each small carpet or rug to be tested to comply with paragraph (b)(1) of this section.

(c) *Conditioning.* (1) Clean each specimen with the vacuum cleaner until it is free of all loose ends left during the manufacturing process and from any material that may have been worked into the pile during handling.[4] Care must be exercised to avoid "fuzzing" of the pile yarn.

(2) Place the specimens in a drying oven in a manner that will permit free circulation of the air at 105° C. (221° F.) around them for 2 hours.[5] Remove the specimens from the oven with gloved hands and place them horizontally in the desiccator with traffic surface up and free from contact with each other until cooled to room temperature, but in no instance less than 1 hour.

[3] Technical Manual of the American Association of Textile Chemists and Colorists, vol. 45, 1969, published by AATCC, Post Office Box 12215, Research Triangle Park, NC 27709.

[4] The vacuum cleaning described is not intended to simulate the effects of repeated vacuum cleaning in service.

[5] If the specimens are moist when received, permit them to air-dry at laboratory conditions prior to placement in the oven. A satisfactory preconditioning procedure may be found in ASTM D 1776–67, "Conditioning Textiles and Textile Products for Testing." ("1969 Book of ASTM Standards," Part 24, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103.)

(d) *Testing.* (1) Place the test chamber in the draft-protected environment (hood with draft off) with its bottom in place. Wearing gloves, remove a test specimen from the desiccator and brush its traffic surface with a gloved hand in such a manner as to raise its pile. Place the specimen on the center of the floor of the test chamber, traffic surface up, exercising care that the specimen is horizontal and flat. Place the flattening frame on the specimen and position a methenamine tablet on one of its flat sides in the center of the 20.32 cm. (8 in.) hole.

(2) Ignite the tablet by touching a lighted match or an equivalent igniting source carefully to its top. If more than 2 minutes elapse between the removal of the specimen from the desiccator and the ignition of the tablet, the conditioning must be repeated.

(3) Continue each test until one of the following conditions occurs:

(i) The last vestige of flame or glow disappears. (This is frequently accompanied by a final puff of smoke.)

(ii) The flaming or smoldering has approached within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame at any point.

(4) When all combustion has ceased, ventilate the hood and measure the shortest distance between the edge of the hole in the flattening frame and the charred area. Record the distance measured for each specimen.

(5) Remove the specimen from the chamber and remove any burn residue from the floor of the chamber. Before proceeding to the next test, the floor must be cooled to normal room temperature or replaced with one that is at normal room temperature.

(e) *Report.* The number of specimens of the eight tested in which the charred area does not extend to within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame shall be reported.

(f) *Interpretation of results.* If the charred area does not extend to within 2.54 cm. (1.0 in.) of the edge of the hole in the flattening frame at any point for at least seven of the eight specimens, the small carpet or rug meets the acceptance criterion.

§ 1631.5 Labeling requirements.

(a) If a small carpet or rug does not meet the acceptance criterion, it shall, prior to its introduction into commerce, be permanently labeled, pursuant to rules and regulations established by the Consumer Product Safety Commission with the following statement: FLAMMABLE (FAILS U.S. DEPARTMENT OF COMMERCE STANDARD FF 2–70): SHOULD NOT BE USED NEAR SOURCES OF IGNITION.

(b) If a small carpet or rug has had a fire-retardant treatment or is made of fibers which have had a fire-retardant treatment, it shall be labeled with the letter "T" pursuant to rules and regulations established by the Consumer Product Safety Commission.

Subpart B—Rules and Regulations

AUTHORITY: Sec. 5, 67 Stat. 112, as amended, 81 Stat. 570; 15 U.S.C. 1194, unless otherwise noted.

§ 1631.31 Reasonable and representative tests and recordkeeping requirements.

EXPLANATION: Section 8 of the Act, among other things, provides that no person shall be subject to criminal prosecution under section 7 of the act for a violation of section 3 of the act if such person establishes a guaranty received in good faith signed by and containing the name and address of the person by whom the product, fabric, or related material guaranteed was manufactured, or from whom it was received, to the effect that reasonable and representative tests made in accordance with applicable flammability standards show that the product, fabric, or related material covered by the guaranty conforms with such standards.

[While a person establishing a guaranty received in good faith would not be subject to criminal prosecution under section 7 of the act, he, and/or the merchandise involved, would nevertheless remain subject to the administrative processes of the Consumer Product Safety Commission under section 5 of the act as well as injunction and condemnation procedures under section 8 thereof. A guarantor derives no immunity of any kind, civil or criminal, from the issuance of his own guaranty or performance of the reasonable and representative tests prescribed by this section.

[The furnishing of guaranties is not mandatory under the act. The purpose of this section is to establish minimum requirements for reasonable and representative tests upon which guaranties may be based. The section does not have any legal effect beyond that specified in section 8 of the act.]

(a) For the purposes of this section the following definitions apply:

(1) "Standard" means the Standard in Subpart A of this Part.

(2) "Test" means a test as prescribed by the Standard.

(3) "Acceptance criterion" means "acceptance criterion" as defined in the Standard.

(4) "Test criterion" means "test criterion" as defined in the Standard.

(5) "Carpet" and "rug" mean "carpet" and "rug" as defined in the Standard.

(6) "Quality of machine-made carpets or rugs" means any line of carpets or rugs, essentially machine-made, which are substantially alike in all respects, including, as applicable, constructional units (needles, pitch, rows, shot, stitches, and weight), dye class, dyestuff, dyeing application method, gage, pile levels, pile height, average pile thickness, pile weight, pile yarn, total thickness, total weight, tufts, tuft length, tuft bind, warp yarn, filler yarn, yarn ends per needle, loop length, backing, back coating, primary backing, secondary backing, backing thickness, backing fabric count, backing warp and filler yarns, including stuffer and dead frame yarns, backing weight, fiber and/or other materials content, and fire retardant treatment received including the specifications and quantity of chemicals used.

(7) "Quality of handmade or hide carpets or rugs" means any line of carpets or rugs which are essentially handmade and/or are essentially hides and which are alike in all respects, including those specified in paragraph (a)(6) of this section, where applicable, except that such carpets or rugs may vary where unavoidable and/or may vary because of natural variations in hides of the same type, so long as such variations do not affect flammability.

(b) The tests set forth in paragraphs (c), (d), (e), and (f) of this section are reasonable and representative tests with regard to any carpets or rugs or qualities thereof to which they apply, except, however, that any test of any quality, whenever performed, which does not show a meeting of the acceptance criterion of the Standard shall be considered the reasonable and representative test for that quality and no guaranty with respect thereto shall be issued after the performance of such test. Immediately before conditioning and testing, each carpet or rug specimen tested pursuant to this section shall be in the form in which the carpet or rug or quality thereof which it represents is sold or offered for sale to the ultimate consumer.

(c) Reasonable and representative tests with respect to any quality of machine-made carpets or rugs are (1) at least one test performed upon commencement of production, importation, or other receipt thereof, (2) at least one test performed after production, importation, or other receipt of the first 25,000 linear yards of the quality, and (3) at least one test after production, importation, or other receipt of every 50,000 linear yards of the quality thereafter. Except, however, that tests need be performed only after production, importation, or receipt of each additional 100,000 linear yards of the quality, so long as all 24 specimens required to be tested in a complete series of three required tests immediately preceding any given test (eight out of eight specimens in each of the three preceding tests) meet the test criterion, rather than seven out of eight specimens, as permitted under the acceptance criterion of the Standard.

(d) Reasonable and representative tests with respect to any quality of handmade or hide carpets or rugs are at least one test performed upon the commencement of production, importation, or other receipt thereof and at least one test after production, importation, or other receipt of every 10,000 square yards of the quality thereafter.

(e) Reasonable and representative tests of a one-of-a-kind carpet or rug, machine made, handmade, or hide, is one test thereof or one test of an identical representative sample.

(f) Guaranties for carpets or rugs in inventory upon the effective date of the Standard may be issued in the same manner as other guaranties are issued. Reasonable and representative tests with respect to qualities or such carpets or rugs are at least one test performed upon approximately the first linear yard and one test thereafter for each 25,000 linear

V 40 250 DEC 30 75 XUM

yards of a quality of machine-made carpets or rugs and at least one test performed upon approximately the first square yard and thereafter for each 10,000 square yards of a category of hand-made or hide carpets or rugs, in the order of the production, importation, or receipt by the guarantor of that quality.

(g) Any person issuing a guaranty for one or more carpets or rugs or qualities thereof based on reasonable and representative tests, shall maintain the following records for a period of 3 years from the date the tests were performed, or in the case of paragraph (h) of this section, the date the guaranties were furnished. These records must be maintained in the United States by a person subject to section 3 of the act:

(1) All identifying numbers, symbols, etc., manufacturing specifications including all other information described in paragraph (a)(6) of this section, as applicable, and source of products or raw materials used therein.

(2) A physical sample of each carpet or rug or quality thereof covered by the guaranty at least 6 inches by 6 inches in size (36 square inches).

(3) The original or a copy of the report of each test performed for purposes of the guaranty (whether or not such report shows a meeting of the acceptance criterion) which shall disclose the date of the test, the results, and sufficient information to clearly identify the carpet or rug tested.

(4) A record applicable to each test in paragraph (g)(3) of this section showing the approximate yardage at which it was performed. Records otherwise required to be maintained in linear yards may be maintained in square yards on the basis of 4 square yards equals 1 linear yard.

(h) Persons furnishing guaranties based on guaranties received by them shall maintain records showing the guaranty received and identification of the carpet or rug or quality thereof guaranteed in turn by them.

(i) Any person furnishing a carpet or rug guaranty under section 8(a) of the act who neglects or refuses to maintain and preserve the records prescribed in this section shall be deemed to have furnished a false guaranty under the provisions of section 8(b) of the act.

(Sec. 5 of the Act, 67 Stat. 112, as amended by 81 Stat. 570, 15 U.S.C. section 1194; sec. 8 of the Act, 67 Stat. 114, as amended by 81 Stat. 572, 15 U.S.C. sec. 1197)

EFFECTIVE DATE: This section became effective July 20, 1971.

§ 1631.32 Reasonable and representative tests and recordkeeping requirements—additional requirements.

(a) Persons issuing guaranties under section 8(a) of the act for small carpets and rugs subject to FF 2–70 shall be subject to all of the requirements of § 1631.31 except as provided in paragraph (b) of this section.

(b) In lieu of performing tests and maintaining records on the basis of linear yards or square yards as provided in § 1631.31 persons furnishing warranties for small carpets and rugs subject to FF 2–70 shall perform tests and maintain records on the basis of units of carpets or rugs, with "unit" being defined as a single carpet or rug, or on the basis of square yards. At least one test shall be performed upon commencement of production, importation, or other receipt of such small carpet or rug and every 25,000 units or square yards thereafter.

(Sec. 5 of the Act, 67 Stat. 112, as amended by 81 Stat. 570, 15 U.S.C. section 1194; sec. 8 of the Act, 67 Stat. 114, as amended by 81 Stat. 572, 15 U.S.C. sec. 1197)

EFFECTIVE DATE: This section became effective January 22, 1973.

§ 1631.33 Carpets and rugs with fire-retardant treatment.

(a) For the purposes of this section the following definitions apply:

(1) "Small carpet" and "small rug" means "small carpet" and "small rug" as defined in § 1631.1(c).

(2) "Fire-retardant treatment" means "fire-retardant treatment" as defined in the Standard in Subpart A of this Part.

(b) If a carpet or rug or small carpet or rug is manufactured, imported, or otherwise marketed or handled which has had a fire-retardant treatment or is made of fibers which have had a fire-retardant treatment, the letter "T" shall be set forth legibly and conspicuously, and shall appear at all times, on each label and/or invoice relating thereto pursuant to the requirements of the Textile Fiber Products Indentification Act, 15 U.S.C. section 70, et seq., and the rules and regulations thereunder, whether or not such letter "T" appears elsewhere on said product. Samples, pieces, rolls, or squares used to promote or effect the sale of such carpet or rug are subject to the aforementioned requirements. As provided in the applicable portions of the aforesaid Act and the rules and regulations thereunder, where a carpet or rug or a small carpet or rug which has had a fire-retardant treatment or is made of fibers which have had a fire-retardant treatment, is sold to an ultimate consumer and was either custom made or commercially installed for such consumer, the labeling required by this section shall not apply with respect to the carpet or rug if an invoice or other paper relating thereto, containing the letter "T", legibly and conspicuously written, is delivered to the consumer in due course of business.

(c) No person subject to the Flammable Fabrics Act shall manufacture, import, distribute, or otherwise market or handle any carpet or rug or small carpet or rug, including samples, swatches, or specimens used to promote or effect the sale thereof, which is not in compliance with this section.

EFFECTIVE DATE: This section became effective January 22, 1973.

§ 1631.34 Small carpets and rugs not meeting acceptance criterion.

(a) If any small carpet or rug as defined in the Standard for the Surface Flammability of Small Carpets and Rugs (pill test) FF 2–70, is manufactured, imported, or otherwise marketed or handled and does not meet the acceptance criterion of such standard, it shall, prior to its introduction into commerce, be legibly and conspicuously labeled with a permanent label which sets forth the following statement:

"FLAMMABLE (FAILS U.S. DEPARTMENT OF COMMERCE STANDARD FF 2–70): SHOULD NOT BE USED NEAR SOURCES OF IGNITION."

The required cautionary statement may be set out on or affixed to the small carpet or rug on the same label as the fiber content label required to be affixed under the Textile Fiber Products Identification Act, if said label is permanent, or said statement shall be set forth on a separate permanent label on or affixed to the small carpet or rug in immediate proximity to the said required label under the Textile Fiber Products Identification Act. A label on the front of a small carpet or rug shall be considered to be in immediate proximity to a label on the back, provided they are directly opposite each other and are in immediate proximity to the edge of the small carpet or rug.

(b) Such cautionary statements shall also appear in a conspicuous manner in all advertisements in which said small carpets or rugs are being offered for sale through direct mail, telephone solicitation, or under any other circumstances where the consumer, in the ordinary course of dealing, will not have an opportunity to inspect the label before receiving the merchandise. The phrase "Flammable—Read The Label" shall conspicuously appear in all other advertisements of small carpets or rugs which do not meet the acceptance criterion of the standard.

(c) The information required by this section shall be set forth separately from any other information, representations, or disclosures appearing on the same label or elsewhere on the small carpet or rug, and any such other information, representations, or disclosures shall in no way interfere with, minimize, detract from, or conflict with the information required by this section.

(d) Samples, swatches, or specimens used to promote or effect the sale of small carpets or rugs shall be labeled with the information required by this section, in addition to the label required to be affixed to the small carpets or rugs.

(e) Where small carpets or rugs are marketed at retail in packages, and the labeling information required by this section is not readily visible to prospective purchasers, the packages must also be prominently, conspicuously, and legibly labeled with the information required by this section.

(f) No person, other than the ultimate consumer, shall remove, mutilate, or cause or participate in the removal or mutilation of any affixed labeling information required by this section.

(g) No person subject to the Flammable Fabrics Act shall manufacture, import, distribute, or otherwise market or handle any small carpet or rug, including samples, swatches, or specimens used to promote or effect the sale thereof, which is not in compliance with this section.

Subpart C—Washing Procedures

AUTHORITY: Secs. 4, 5, 67 Stat. 112, as amended, 81 Stat. 569–70; 15 U.S.C. 1193, 1194.

§ 1631.61 Hide carpets and rugs—alternative washing procedure.

(a) The Standard for the Surface Flammability of Small Carpets and Rugs (FF 2–70) at § 1631.4(b)(1)(ii) provides that if a carpet or rug has had a fire-retardant treatment, or is made of fibers which have had a fire-retardant treatment, the sample or oversized specimens thereof selected for testing under the standard shall be washed prior to the cutting of test specimens either 10 times under the washing and drying procedure prescribed in Method 124–1967 of the American Association of Textile Chemists and Colorists or such number of times under such other washing and drying procedure as shall previously have been found to be equivalent by the Consumer Product Safety Commission. Alternatively the selected sample or oversized specimens thereof may be washed, dry-cleaned, or shampooed 10 times, prior to the cutting of test specimens, in such manner as the manufacturer or other interested party has previously established to the satisfaction of the Consumer Product Safety Commission is normally used for that type of carpet or rug in service.

(b) On February 10, 1972 (37 FR 3010) the Federal Trade Commission published in the FEDERAL REGISTER a notice of approval of an alternative washing procedure under FF 2–70 for testing the flammability of shearling and hide rugs that (1) consist of natural wool or hair attached to the hide with no synthetic fibers and (2) have been treated with a fire-retardant finish. The notice of approval was corrected on March 17, 1972 (37 FR 5676). This approval is continued in effect by the Consumer Product Safety Commission pursuant to section 30(e) of the Consumer Product Safety Act (15 U.S.C. 2079(e)).

(c) Any hide carpet or rug for which such alternative procedure is utilized must be labeled with a conspicuous, legible and permanent label containing the following statement:

DO NOT WASH OR DRY CLEAN

This rug has been treated with a flame retardant. To keep rug attractive and clean use the following methods:

To eliminate loose dirt or dust, vacuum or shake pelt outdoors.

For spot cleaning, use water dampened cloth and rub lightly in one direction.

DO NOT USE DETERGENTS OR OTHER STAIN REMOVERS

(d) The alternative procedure is as follows: The test specimens shall be cut to size 9" x 9" before the procedure is initiated.

(1) Shake specimen vigorously to remove any loose fibers, dust and possible accumulated debris.

(2) Place specimen on a solid flat surface and anchor or hold firmly while conducting the test.

(3) Select an operating applicator consisting of a rod at least 2" in diameter and 9" long composed of nonabsorbent material such as glass or plastic.

(4) Select sufficient cloth to form at least five layers when wrapped around the operating applicator. The cloth shall be of the type known as "Crockmeter Test Cloth" as specified in Note 8.3 of AATCC Test Method 8–1969.

(5) Immerse cloth in water (100° F.) until thoroughly wetted.

(6) Manually wring out the cloth to remove all excess water and wrap around the operating applicator.

(7) Immediately, with light pressure, stroke entire surface of specimen with the wrapped operating applicator in one direction only along the natural "lay" of the hair structure for ten complete strokes.

(8) Place test specimen in a circulating drying oven maintained at 212° F. until dry.

(9) Repeat the above procedure 10 times using a fresh or clean cloth each time.

(10) After 10 successive cycles of washing and drying the dried specimens shall be subjected to the testing procedures (pill test) as outlined in FF 2–70.

(e) This washing procedure and labeling provision are subject to revision or revocation should it be determined that such procedure is inadequate to fully protect the public

§ 1631.62 Wool flokati carpets and rugs—alternative washing procedure.

(a) The Standard for the Surface Flammability of Small Carpets and Rugs (FF 2–70 at § 1631.4(b)(1)(ii) provides that if a carpet or rug has had a fire-retardant treatment, or is made of fibers which have had a fire-retardant treatment, the sample or oversized specimens thereof selected for testing under the standard shall be washed prior to the cutting of test specimens either 10 times under the washing and drying procedure prescribed in Method 124–1967 of the American Association of Textile Chemists and Colorists or such number of times under such other washing and drying procedure as shall previously have been found to be equivalent by the Consumer Product Safety Commission. Alternatively the selected sample or oversized specimens thereof may be washed, dry-cleaned, or shampooed 10 times, prior to the cutting of test specimens, in such manner as the manufacturer or other interested party has previously established to the satisfaction of the Consumer Product Safety Commission is normally used for that type of carpet or rug in service.

(b) On September 7, 1972 (37 FR 18122) the Federal Trade Commission published in the FEDERAL REGISTER a notice of approval of an alternative washing procedure under FF 2–70 for testing the flammability of wool flokati carpets and rugs. This approval is continued in effect by the Consumer Product Safety Commission pursuant to section 30(e) of the Consumer Product Safety Act (15 U.S.C. 2079(e)).

(c) Any wool flokati carpet or rug for which such alternative procedure is utilized must be labeled with a conspicuous, legible and permanent label containing the following statement:

DO NOT WASH IN HOME MACHINE OR DRY CLEAN—AVOID RUBBING OR BRUSHING WHILE DAMP

This flokati carpet or rug has been treated with a flame retardant. To maintain this flame retardant and to keep the carpet attractive and clean, use the following methods.

1. Vacuum (using suction head without rotating brush) or shake the rug (depending upon size) to remove loose dirt.

2. Home laundering: Place in bath tub or other suitable receptacle in solution of home detergent and lukewarm water (approximately 105° F.). Immerse face down and gently knead back of rug to remove soil. Rinse in lukewarm water (approximately 105° F.) until detergent is removed. Rug may then be rinsed again in cool water to improve appearance of face if desired. Line dry. Shake while damp to restore surface and fluff up fibers.

3. Spot cleaning: Remove greasy stains with a household grease remover. Remove soluble stains with lukewarm water (approximately 105° F.) and detergent by immersing spot in a pan and kneading the back of rug. Rinse thoroughly in lukewarm water. Line or floor dry. Shake while damp to restore surface and fluff up fibers.

4. Commercial cleaning: Use Roll-A-Jet equipment (or equivalent) with water not exceeding 105° F. Avoid use of excessive pressure or reciprocating brushes. Drying temperatures should not exceed 200° F.

(d) The alternative procedure is as follows:

(1) Cut test specimens to an oversize 12" x 12" before the procedure is initiated.

(2) Vacuum specimens or shake vigorously to remove any loose fibers, dust or possible accumulated debris.

(3) Place individual specimen face down in a shallow pan which has been filled to a depth of 2" with a wash solution of 1½ grams of AATCC (American Association of Textile Chemists and Colorists) Standard Detergent as specified in AATCC Method 12—1967 (or equivalent) per liter of water preheated to 105° F. Knead the back of the specimen with hand for 1 minute. Water level and temperature should be maintained for each specimen.

(4) Thoroughly rinse specimen face down with warm water at 105° F. for 1 minute under a faucet with strong pressure.

(5) Remove excess liquor by use of a wringer, hydroextractor or gentle hand squeezing and dry in circulating air oven at 200° F. until dry.

(6) Repeat the above procedure 10 times using fresh detergent and fresh water for each set of eight specimens.

(7) Subject the dry specimens to the test procedures in FF 2–70.

V 401250 DEC 30 75 XUM

(e) This washing procedure and labeling provisions are subject to revocation should it be determined that such procedure is inadequate to fully protect the public.

PART 1632—STANDARD FOR THE FLAMMABILITY OF MATTRESSES (AND MATTRESS PADS) (FF4–72)

Subpart A—The Standard

Sec.
1632.1 Definitions.
1632.2 Scope and application.
1632.3 General requirements.
1632.4 Test procedure.
1632.5 Mattress pads.
1632.6 Glossary of terms.

Subpart B—Alternate Sampling Plans

1632.11 Alternate sampling plan No. 1 for mattresses and mattress pads.
1632.12 Alternate sampling plan No. 2 for mattress pads.
1632.13 Alternate sampling plan No. 4 for mattress ticking.
1632.14 Alternate sampling plan No. 5 for mattresses and mattress pads.
1632.15 Alternate sampling plan No. 6 for mattresses and mattress pads.

Subpart C—Rules and Regulations

1632.31 Mattresses—labeling, recordkeeping, requirements and guarantees.

Subpart D—Interpretations and Policies

1632.61 Procedure for identification of material, substitution for mattress tape edge.
1632.62 Use of muslin sheets.
1632.63 Policy clarification on renovation of mattresses.

AUTHORITY: Sec. 4, 67 Stat. 112, as amended, 81 Stat. 569–70; 15 U.S.C. 1193, unless otherwise noted.

Subpart A—The Standard

EFFECTIVE DATE: This standard became effective June 22, 1973. It was originally published as a notice on June 8, 1973 (38 FR 15095).

§ 1632.1 Definitions.

In addition to the definitions given in section 2 of the Flammable Fabrics Act as amended (sec. 1, 81 Stat. 568; 15 U.S.C. 1191) and the procedures under that act for setting standards (16 CFR Part 1607), the following definitions apply for the purpose of this standard.

(a) "Mattress" means a ticking filled with a resilient material used alone or in combination with other products and intended or promoted for sleeping upon. This definition includes, but is not limited to, mattress pads, adult mattresses, youth mattresses, crib mattresses including portable crib mattresses, bunk bed mattresses, convertible sofa bed mattresses, corner group mattresses, daybed mattresses, roll-a-way bed mattresses, high risers, and trundle bed mattresses. This definition excludes sleeping bags, pillows, mattress foundations such as box springs, liquid and gaseous filled tickings such as water beds and air mattresses, upholstered furniture such as chaise lounges, drop-arm love seats, press-back lounges, push-back sofas, sleep lounges, sofa beds (including jackknife sofa beds), sofa lounges (including glide-outs), studio couches, and studio divans (including twin studio divans and studio beds), and juvenile product pads such as car bed pads, carriage pads, basket pads, infant carrier and lounge pads, dressing table pads, stroller pads, crib bumpers, and playpen pads. See § 1632.6, Glossary of terms, for definition of the above.

(b) "Ticking" means the outermost layer of fabric or related material that encloses the mattress core and upholstery materials.

(c) "Core" means the main support system that may be present in a mattress, such as springs, foam, or hair block.

(d) "Upholstery material" means all material, either loose or attached, between the ticking or between the ticking and the core of the mattress, if a core is present.

(e) "Tape edge" (edge) means the seam or border edge of a mattress.

(f) "Quilted" means stitched through the ticking and one or more layers of upholstery material.

(g) "Tufted" means buttoned or laced through the ticking and upholstery material and/or core.

(h) "Mattress prototype" means mattresses of a particular design, sharing all materials and methods of assembly, but excluding differences in mattress size. If it has been shown as a result of prototype qualification testing that a material has not influenced the ignition resistance of the mattress prototype, substitution of another material for such material shall not be deemed a difference in materials for purposes of prototype definition. If it is determined or suspected that a material has influenced the ignition resistance of the mattress prototype, a dimensional or other change in that material shall be deemed a difference in materials for purposes of prototype definition unless it is previously shown to the satisfaction of the Consumer Product Safety Commission that such dimensional or other change will not reduce the ignition resistance of the mattress prototype.

(i) "Mattress type" means mattresses sharing a method of assembly, such as tufted, multineedle continuous quilt, deep panel quilt, and smooth top, and all materials affecting cigarette ignition, but excluding differences in mattress size. More than one mattress prototype may be included in a single mattress type, provided each prototype has the same method of assembly.

(j) "Production unit" (unit) means a quantity of mattresses of one mattress type. This quantity is predetermined by the mattress manufacturer subject to the maximum number specified in the applicable parts of § 1632.4(b) *Specimen and Sampling*. No mattress completed while other mattresses of the same type are in production shall be excluded from the production unit to which such other mattresses are assigned.

(k) "Surface" means one side of a mattress which is intended for sleeping upon and which can be tested.

§ 1632.2 Scope and application.

(a) This standard provides a test method to determine the ignition resistance of a mattress when exposed to a lighted cigarette.

(b) All mattresses, as defined in § 1632.1(a), are subject to the requirements of this standard.

(c) Mattresses which are subject to the coverage of the Motor Vehicle Safety Standard, No. 302, subject: "Flammability of Interior Materials—Passenger Cars, Multipurpose Passenger Vehicles, Trucks, and Buses" (36 FR 290), issued by the National Highway Traffic Safety Administration, are excluded from coverage under this standard, unless also intended or promoted for uses included in § 1632.1(a).

(d) One of a kind mattresses, such as nonstandard sizes or shapes, may be excluded from testing under this standard pursuant to rules and regulations established by the Consumer Product Safety Commission.

§ 1632.3 General requirements.

(a) *Summary of test method.* The method involves the exposure of the mattress surface to lighted cigarettes as the standard igniting source in a draft-protected environment and the measurement of the ignition resistance of the mattress. These exposures include smooth, tape edge, and quilted or tufted locations, if they exist on the mattress surface. Two-sheet tests are also conducted on similar surface locations. In the latter test, the burning cigarettes are placed between the sheets.

(b) *Test criterion.* Testing the mattress surface in accordance with the testing procedure set forth in § 1632.4 *test procedure*, individual cigarette test locations pass the test if the char length on the mattress surface is not more than 5.1 cm (2 in) in any direction from the nearest point of the cigarette. In the interest of safety, the test operator should discontinue the test and record a failure before reaching the 2 in. char length if, in his opinion, an obvious ignition has occurred.

§ 1632.4 Test procedure.

(a) *Apparatus.*—(1) *Testroom.* The testroom shall be large enough to accommodate a full-scale mattress in a horizontal position and to allow for free movement of personnel and air around the test mattress. The room shall be equipped with a support system (platform, bench, etc.) upon which a mattress may be placed flat in a horizontal position at a reasonable height for making observations. For thin, flexible mattresses and mattress pads, the top surface of the support system shall be nonmetallic. The test area shall be draft-protected and equipped with a suitable system for exhausting smoke and/or noxious gases produced by testing. The testroom atmospheric conditions shall be greater than 18° C (65° F) and at less than 55 percent relative humidity, except for production testing.

(2) *Ignition source.* The ignition source shall be cigarettes without filter tips made from natural tobacco, 85±2 mm long with a tobacco packing density of 0.270±0.020 g/cm³ and a total weight of 1.1±0.1 gm.

(3) *Fire extinguisher.* A pressurized water fire extinguisher, or other suitable fire extinguishing equipment, shall be immediately available.

(4) *Water bottle.* A water bottle fitted with a spray nozzle shall be used to extinguish the ignited portions of the mattress.

(5) *Scale.* A linear scale graduated in millimeters, 0.1 inch, or 1/16-inch divisions shall be used to measure char length.

(6) *Other apparatus.* In addition to the above, a thermometer, a relative humidity measuring instrument, a knife or scissors, and tongs are required to carry out the testing.

(b) *Specimen and sampling.*—(1) *General.* The test criterion of section 1632.3(b) shall be used in conjunction with the following mattress sampling plan, or any other approved by the Consumer Product Safety Commission that provides at least the equivalent level of fire safety to the consumer (see Subpart B of this Part). Alternate sampling plans submitted for approval shall have operating characteristics such that the probability of unit acceptance at any percentage defective does not exceed the corresponding probability of unit acceptance of the following sampling plan in the region of the latter's operating characteristic curves that lies between 5 and 95 percent acceptance probability. If such alternate sampling plan involves testing of components of mattresses or materials used in mattresses, its submittal shall be supported by clear evidence of the necessary correlation of the results of such testing with those results from testing as prescribed hereunder.

(2) *Mattress sampling.* The basic mattress sampling plan is made up of two parts: (i) Prototype qualification and (ii) production testing. In addition, a batch sampling plan is given which may be used for small production quantities, when shipping requirements prohibit the use of the basic plan, or for other reasons at the discretion of the manufacturer.

(i) *Basic sampling plan.* A production unit in the basic sampling plan shall consist of not more than 500 mattresses of a mattress type or the quantity produced in 3 consecutive calendar months, whichever is smaller. This unit size may be increased to the quantity produced in 3 consecutive calendar months or less: *Provided*, That it is either documented that each of the materials contributing to the cigarette ignition characteristics of all the mattresses in the unit came from a single manufacturing lot of such material or 50 consecutive production units, at least 20,000 mattresses, have all been accepted in production testing as set forth in § 1632.4(b)(2)(i)(B).

(A) *Prototype qualification.* (*1*) For prototype qualification, the term "manufacturer" shall mean (*a*) with respect to a company having one manufacturing facility, that company, (*b*) with respect to a company having two or more manufacturing facilities, either that company or one or more of its manufacturing facilities as it elects, or (*c*) with respect to a company that is part of a group of companies that have elected to share in a prototype design, either that group of companies or a portion of that group or (*a*) or (*b*) above, as that company elects.

(*2*) Each "manufacturer" shall select enough of each mattress prototype from preproduction or current production to provide six surfaces for test (three mattresses if both sides can be tested or six mattresses if only one side can be tested). Test each of the six surfaces according to § 1632.4(d) *Testing*. If all the cigarette test locations on all six surfaces satisfy the test criterion of § 1632.3(b), accept the mattress prototype. If one or more of the cigarette test locations on the six surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype.

(*3*) If it has been elected to include more than one company and/or more than one manufacturing facility in the term "manufacturer" for purposes of prototype qualification, each such company and each such manufacturing facility shall select enough additional prototype mattresses from its own preproduction or current production to provide two surfaces for test. Test each of the two surfaces according to § 1632.4(d) *Testing*. If all the cigarette test locations on both surfaces satisfy the test criterion of § 1632.3(b), accept the mattress prototype for that company or manufacturing facility. If one or more of the cigarette test locations on the two surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype for that company or manufacturing facility.

(*4*) Mattress prototype qualification may be repeated after the manufacturer has taken action to improve the resistance of the mattress prototype to ignition by cigarettes through mattress design, production, or materials selection. When mattress prototype qualification is repeated as a result of prototype rejection by the "manufacturer", such qualification shall be conducted as if it were an original qualification. When the mattress prototype qualification is repeated as a result of prototype rejection under the provisions of the preceding paragraph or as a result of production unit rejection, such qualification shall be performed as if the producer of the failing mattress were a company having one manufacturing facility.

(*5*) Each mattress protoype must be accepted in prototype qualification prior to shipping any mattresses to customers and prior to producing significant quantities of mattresses. If the "manufacturer" is one manufacturing facility, the first production unit manufactured immediately after successful prototype qualification or the production unit from which the mattresses were selected for the successful prototype qualification not to exceed 500 mattresses, may be accepted and shipped to customers without further testing if all mattresses in the production unit are the same as the prototype except for size.

(B) *Production testing.* For production testing, the term "manufacturer" shall mean each manufacturing facility. Random selection for production testing shall be accomplished by use of random number tables or equivalent means as determined by the Consumer Product Safety Commission. If it is desired to use only mattresses of a specified size (e.g., "twin") for testing, the drawing may be repeated until sufficient mattresses of that size have been selected. A production unit, except for the first production unit following successful prototype qualification as specified in § 1632.4(b)(2)(i)(A), is either accepted or rejected according to the following plan:

(*1*) *Normal sampling.* From each unit, randomly select enough mattresses to provide two surfaces for test (one mattress if both sides can be tested or two mattresses if only one side can be tested). Test each of the two surfaces according to § 1632.4(d) *Testing*. If all the cigarette test locations on both surfaces meet the test criterion of § 1632.3(b), accept the unit. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject the unit. If only one individual cigarette test location fails the test criterion of § 1632.3(b), select enough additional mattresses to provide four additional surfaces for test. Test each of the four additional surfaces according to § 1632.4(d) *Testing*. If all the cigarette test locations on the four additional surfaces meet the test criterion of § 1632.3(b), accept the unit. If one or more of the individual cigarette test locations on the four additional surfaces fail the test criterion of § 1632.3(b), reject the unit. Unit rejection shall include all mattresses in the particular unit under test. Unit rejection also results in the loss of prototype qualification for all prototypes included in the unit under test. The loss of prototype qualification applies only to the company or manufacturing facility that produced the rejected unit.

(*2*) *Reduced sampling.* (*i*) The level of sampling required for mattress production acceptance may be reduced provided the preceding 15 consecutive units of mattresses, at least 500 mattresses, have all been accepted using the normal sampling plan. In this case, the production quantity for reduced sampling may be increased to up to two units, still not to exceed the production of 3 consecutive calendar months.

(*ii*) From this production quantity, randomly select enough mattresses to provide two surfaces for test. Test each of the two surfaces according to § 1632.4(d) *Testing*. If all the cigarette test locations on both surfaces meet the test criterion of § 1632.3(b), accept this production quantity. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject this production quantity. If only one individual cigarette test location fails the test criterion of § 1632.3(b), accept this production quantity.

(*iii*) Rejection shall include all mattresses in the production quantity under test. Rejection also results in the loss of prototype qualification for all prototypes included in the production quantity under test. The loss of prototype qualification applies only to the company or manufacturing facility that produced the rejected unit.

(ii) *Batch sampling plan.* (A) *General* (*1*) For the batch sampling plan, the

V 40 250 DEC 30 75 V XUM

term "manufacturer" shall mean each manufacturing facility.

(2) A production unit in the batch sampling plan shall consist of not more than 250 mattresses or the quantity produced in one period of 30 consecutive calendar days, whichever is smaller.

(B) *Batch unit qualification and acceptance* (*1*) Select enough mattresses from the initial production of the unit to provide four surfaces for test (two mattresses if both sides can be tested or four mattresses if only one side can be tested). Test each of the four surfaces according to § 1632.4(d) *Testing*. If all the cigarette test locations on the four surfaces meet the test criterion of § 1632.3(b), accept the unit. If one or more of the cigarette test locations on the four surfaces fail the test criterion of § 1632.3(b), reject the unit.

(2) After rejection, unit qualification and acceptance under this batch sampling plan may be repeated after the resistance of the mattress to ignition by cigarettes is improved by the manufacturer taking corrective action in mattress design, production, or materials selection.

(3) Acceptance of any production unit under this batch sampling plan shall not have any effect on prototype qualification or unit acceptance of any other production unit.

(3) *Disposition of rejected units.* Rejected units shall not be retested, offered for sale, sold, or promoted for use as a mattress as defined in § 1632.1(a) except after reworking to improve the resistance to ignition by cigarettes and subsequent retesting in accordance with the procedures set forth in § 1632.4(b)(2)(i) *Basic Sampling Plan.*

(4) *Records.* Records of all unit sizes, test results, and the disposition of rejected units shall be maintained by the manufacturer, in accordance with rules and regulations established by the Consumer Product Safety Commission.

(5) *Preparation of mattress samples.* The mattress surface shall be divided laterally into two sections (see fig. 1), one section for the bare mattress tests and the other for the two-sheet tests.

(6) *Sheet selection.* The sheets shall be white, 100 percent combed cotton percale, not treated with a chemical finish which imparts a characteristic such as permanent press or flame resistance, with 170–200 threads per square inch and fabric weight of 115±14 gm/m² (3.4±0.4 oz/yd²), or of another type approved by the Consumer Product Safety Commission. Size of sheet shall be appropriate for the mattress being tested.

(7) *Sheet preparation.* The sheets shall be laundered once before use in an automatic home washer using the hot water setting and longest normal cycle with the manufacturer's recommended quantity of a commercial detergent, and dried in an automatic home tumble dryer. The sheet shall be cut across the width into two equal parts after washing.

(8) *Cigarettes.* Unopened packages of cigarettes shall be selected for each series of tests.

(9) *Compliance marketing sampling plans.* Sampling plans for use in market testing of items covered by this standard may be issued by the Consumer Product Safety Commission. Such plans shall define noncompliance of a production unit to exist only when it is shown, with a high level of statistical confidence, those production units represented by tested items which fail such plans will, in fact, fail this standard. Production units found to be noncomplying under these provisions shall be deemed not to conform to this standard. The Consumer Product Safety Commission will publish such plans in the FEDERAL REGISTER for public comment prior to their enactment.

(10) *Postponement of production testing.* Temporary suspension of production testing may be granted on a case-by-case basis by the Consumer Product Safety Commission in those instances where an individual manufacturer proves, under rules prescribed by CPSC, that he cannot acquire access to either in-house or independent testing facilities for production testing. In the event of such a suspension, the manufacturer would still be obligated to produce a mattress which meets all other requirements of the standard.

(c) *Conditioning.*—(1) *Prototype and batch.* The mattresses, washed sheets, and cigarettes shall be conditioned in air at a temperature greater than 18° C (65° F) and a relative humidity less than 55 percent for at least 48 hours prior to test. The mattresses, washed sheets, and cigarettes shall be removed from any packaging and supported in a suitable manner to permit free movement of air around them during conditioning. The mattress meets this conditioning requirement if the mattress and/or all its component materials, except the metallic core, have been exposed only to the above temperature and humidity conditions for at least 48 hours prior to testing the mattress.

(2) *Production.* Mattresses to be tested according to § 1632.4(b)(2)(i)(B) *Production testing* shall be exempt from conditioning as specified in § 1632.4(c)(1). However, the mattresses shall not be exposed to any environmental conditions which promote resistance to cigarette ignition. Sheets and cigarettes in their normally used condition (dry) shall be used.

(d) *Testing.*—(1) *General.* Mattress specimens selected for testing in prototype and batch sampling shall be tested in a testroom with atmospheric conditions of a temperature greater than 18° C (65° F) and a relative humidity less than 55 percent. If the test is not performed in the conditioning room, the mattress shall be tested within 1 hour after removal from the conditioning room.

(i) Light and place one cigarette at a time on the mattress surface. (If previous experience with the same type of mattress has indicated that ignition is not likely, the number of cigarettes which may be lighted and placed on the mattress at one time is left to the test operator's judgment. The number of cigarettes must be carefully considered because a smoldering or burning mattress is extremely hazardous and difficult to extinguish.) If more than one cigarette is burning at one time, the cigarettes must be positioned no less than 6 inches apart on the mattress surface. Each cigarette used as an ignition source shall be well lighted but not burned more than 4 mm (0.16 in) when placed on the mattress. (Fire extinguishing equipment must be readily available at all times.)

(ii) If a cigarette extinguishes before burning its full length, the test must be repeated with a freshly lit cigarette on a different portion of the same type of location on the mattress surface until either (a) the number of cigarettes specified in § 1632.4(d)(1)(iii) have burned their full lengths, (b) the number of cigarettes specified has extinguished before burning their full lengths, or (c) the number of cigarettes specified have resulted in failures according to § 1632.3(b) *Test criterion.*

(iii) At least 18 cigarettes shall be burned on each mattress test surface, 9 in the bare mattress tests and 9 in the 2-sheet tests. If three or more mattress surface locations (smooth surface, tape edge, quilted, or tufted areas) exists in the particular mattress surface under test, three cigarettes shall be burned on each different surface location. If only two mattress surface locations exist in the particular mattress surface under test (tape edge and smooth surface), four cigarettes shall be burned on the smooth surface and five cigarettes shall be burned on the tape edge.

(2) *Bare mattress tests.*—(i) *Smooth surfaces.* Each burning cigarette shall be placed directly on a smooth surface location on the test surface on the half reserved for bare mattress tests. The cigarettes should burn their full lengths on a smooth surface without burning across a tuft or stitching of a quilted area. However, if this is not possible because of mattress design, then the cigarettes shall be positioned on the mattress in a manner which will allow as much of the butt ends as possible to burn on smooth surfaces. Report results for each cigarette as pass or fail as defined in the test criterion.

CAUTION: Even under the most carefully observed conditions, smoldering combustion can progress to the point where it cannot be readily extinguished. It is imperative that a test be discontinued as soon as ignition has definitely occurred. Immediately wet the exposed area with a water spray (from water bottle), cut around the burning material with a knife or scissors and pull the material out of the mattress with tongs. Make sure that all charred or burned material is removed. Ventilate the room.

(ii) *Tape edge.* Each burning cigarette shall be placed in the depression between the mattress top surface and the tape edge, parallel to the tape edge on the half of the test surface reserved for bare mattress tests. If there is no depression at the edge, support the cigarettes in place along the edge and parallel to the edge with straight pins. Three straight pins may be inserted through

the edge at a 45° angle such that one pin supports the cigarette at the burning end, one at the center, and one at the butt. The heads of the pins must be below the upper surface of the cigarette (see fig. 2). Report results for each cigarette as pass or fail as defined in the test criterion.

(iii) *Quilted location.* If quilting exists on the test surface, each burning cigarette shall be placed on quilted locations of the test surface. The cigarettes shall be positioned directly over the thread in the depression created by the quilting process on the half of the test surface reserved for bare mattress tests. If the quilt design is such that the cigarettes cannot burn their full lengths over the thread, then the cigarettes shall be positioned in a manner which will allow as much of the butt ends as possible to burn on the thread. Report results for each cigarette as pass or fail as defined in the test criterion.

(iv) *Tufted location.* If tufting exists on the test surface, each burning cigarette shall be placed on tufted locations of the test surface. The cigarettes shall be positioned so that they burn down into the depression caused by the tufts and so that the butt ends of the cigarettes burn out over the buttons or laces used in the tufts on the half of the test surface reserved for bare mattress tests. Report results for each cigarette as pass or fail as defined in the test criterion.

(3) *Two-sheet tests.* Spread a section of sheet smoothly over the mattress surface and tuck under the mattress on the second half of the test surface, which has been reserved for the two-sheet test. Care must be taken that hems or any other portion of the sheet which is more than one fabric thickness, is neither directly under nor directly over the test cigarette in the two-sheet test.

(i) *Smooth surfaces.* Each burning cigarette shall be placed directly on the sheet covered mattress in a smooth surface location as defined in the bare mattress test. Immediately cover the first sheet and the burning cigarettes loosely with a second, or top sheet (see fig. 2). Do not raise or lift the top sheet during testing unless obvious ignition has occurred or until the cigarette has burned out. (The extinguishment of the cigarette may be determined by holding the hand near the surface of the top sheet over the test location. If neither heat is felt nor smoke observed, the cigarette has burned out.) If ignition occurs, immediately remove the sheets and cigarette and follow the cautionary procedures outlined in the bare mattress test. Report results for each cigarette as pass or fail as defined in the test criterion.

(ii) *Tape edge.* (A) Each burning cigarette shall be placed in the depression between the top surface and the tape edge on top of the sheet, and immediately covered with a second sheet. It is important that the air space be eliminated, as much as possible, between the mattress and the bottom sheet at the test location before testing. Depress the bottom sheet into the depression using a thin rod or other suitable instrument.

(B) In most cases, the cigarettes will remain in place throughout the test; however, if the cigarettes show a marked tendency to roll off the tape edge location, they may be supported with straight pins. Three straight pins may be inserted through the bottom sheet and tape at a 45° angle such that one pin supports the cigarette at the burning end, one at the center, and one at the butt. The heads of the pins must be below the upper surface of the cigarette (see fig. 2). Report results for each cigarette as pass or fail as defined in the test criterion.

(iii) *Quilted locations.* If quilting exists on the test surface, each burning cigarette shall be placed in a depression caused by quilting, directly over the thread and on the bottom sheet, and immediately covered with the top sheet. It is important that the air space be eliminated, as much as possible, between the mattress and the bottom sheet at the test location before testing. Depress the bottom sheet into the depression using a thin rod or other suitable instrument. If the quilt design is such that the cigarettes cannot burn their full lengths over the thread, then the cigarettes shall be positioned in a manner which will allow as much of the butt ends as possible to burn on the thread. Report results for each cigarette as pass or fail as defined in the test criterion.

(iv) *Tufted locations.* If tufting exists on the test surface, each burning cigarette shall be placed in the depression caused by tufting, directly over the tuft and on the bottom sheet, and immediately covered with the top sheet. It is important that the air space be eliminated, as much as possible, between the mattress and the bottom sheet at the test location before testing. Depress the bottom sheet into the depression using a thin rod or other suitable instrument. The cigarettes shall be positioned so that they burn down into the depression caused by the tuft and so that the butt ends of the cigarettes burn out over the buttons or laces used in the tufts. Report results for each cigarette as pass or fail as defined in the test criterion.

§ 1632.5 **Mattress pads.**

(a) *Testing.* Mattress pads shall be tested in the same manner as mattresses according to § 1632.4 *Test procedure* except for laundering.

(b) *Laundering.* (1) Mattress pads which have had a chemical fire retardant treatment or contain any chemically fire retardant treated components, shall be tested in accordance with § 1632.4 *Test procedure* in the condition in which they are intended to be sold, and after they have been washed and dried 10 times according to the procedure prescribed in method 124–1969 of the American Association of Textile Chemists and Colorists washing procedure 6.2 (III), with a water temperature of 60° ±2.8° C (140° ±5° F), and drying procedure 6.3.2(B). Maximum load shall be 3.46 kg (8 lb) and may consist of any combination of test items and dummy pieces. Alternately, a different number of times under another washing and drying procedure may be specified and used, if that procedure has previously been found to be equivalent by the Consumer Product Safety Commission.

(2) Such laundering is not required of mattress pads which are not intended to be laundered, as determined by the Consumer Product Safety Commission.

(3) Mattress pads which are not susceptible to being laundered and are labeled "dryclean only" shall be drycleaned by a procedure which has previously been found acceptable by the Consumer Product Safety Commission.

(c) *Labeling.* (1) *Treatment label.* If a mattress pad has had a chemical fire retardant treatment or contains any fire retardant treated components, it shall be labeled with the letter "T" pursuant to rules and regulations established by the Consumer Product Safety Commission.

(2) *Care label.* All mattress pads which have had a chemical fire retardant treatment or contain any fire retardant treated components shall be labeled with precautionary instructions to protect the pads from agents or treatments which are known to cause deterioration of their flame resistance. Such labels shall be permanent and otherwise in accordance with rules and regulations established by the Consumer Product Safety Commission.

(3) *Temporary requirement for noncomplying mattresses.* (i) Mattresses which do not comply with all the provisions of this standard and are manufactured during the 6 months following the effective date of this standard shall, prior to introduction into commerce, be prominently and conspicuously labeled with the following statement:

WARNING: This mattress does not meet the Consumer Product Safety Commission Flammability Standard for Mattresses (FF 4–72, as amended). It may be subject to ignition and hazardous smoldering from cigarettes.

(ii) Such label must be affixed to the mattress in such a manner so as to remain on or affixed thereto until its sale or delivery to the ultimate consumer. The label must be displayed on the mattress at the place of retail sale and the statement on the label must be prominently and conspicuously displayed on the invoice or other sales papers that accompany the mattress through commerce from the manufacturer to the final point of sale to a consumer.

(iii) This label must be at least 250 cm² (approximately 40 in²) with no linear dimension less than 12.5 cm (approximately 5 in). The wording of such label shall appear on a contrasting background with the letters in the heading WARNING no less than 1.2 cm (approximately ½ in) in height.

§ 1632.6 **Glossary of terms.**

(a) *Basket pad.* Cushion for use in an infant basket.

(b) *Box spring.* A bedspring that consists of springs attached to a foundation and enclosed in a cloth covered, upholstered frame.

limit is imposed under the provisions of

V 40 250 DEC 30 75 XUM V

(c) *Bunk beds.* A tier of beds, usually two or three, in a high frame complete with mattresses (see fig. 3).

(d) *Car bed.* Portable bed used to carry a baby in an automobile.

(e) *Carriage pad.* Cushion to go into a baby carriage.

(f) *Chaise lounge.* An upholstered couch chair or a couch with a chair back. It has a permanent back rest, no arms, and sleeps one (see fig. 3).

(g) *Convertible sofa.* An upholstered sofa that converts into an adult sized bed. Mattress unfolds out and up from under the seat cushioning (see fig. 3).

(h) *Corner groups.* Two twin size bedding sets on frames, usually slipcovered, and abutted to a corner table. They also usually have loose bolsters slipcovered (see fig. 3).

(i) *Crib bumper.* Padded cushion which goes around three or four sides inside a crib to protect the baby. Can also be used in a playpen.

(j) *Daybed.* Daybed has foundation, usually supported by coil or flat springs, mounted between arms on which mattress is placed. It has permanent arms, no backrest, and sleeps one (see fig. 3).

(k) *Dressing table pad.* Pad to cushion a baby on top of a dressing table.

(l) *Drop-arm loveseat.* When side arms are in vertical position, this piece is a loveseat. The adjustable arms can be lowered to one of four positions for a chaise lounge effect or a single sleeper. The vertical back support always remains upright and stationary (see fig. 3).

(m) *High riser.* This is a frame of sofa seating height with two equal size mattresses without a backrest. The frame slides out with the lower bed and rises to form a double or two single beds (see fig. 3).

(n) *Infant carrier and lounge pad.* Pad to cushion a baby in an infant carrier.

(o) *Mattress foundation.* Consists of any surface upon which a mattress is placed to lend it support for use in sleeping upon.

(p) *Mattress pad.* A thin, flat, mat or cushion for use on top of a mattress.

(q) *Pillow.* Cloth bag filled with resilient material such as feathers, down, sponge rubber, urethane, or fiber used as the support for the head of a person.

(r) *Playpen pad.* Cushion used on the bottom of a playpen.

(s) *Portable crib.* Smaller size than a conventional crib. Can usually be converted into a playpen.

(t) *Press-back lounges.* Longer and wider than conventional sofa beds. When the lounge seat is pressed lightly, it levels off to form, with the seat, a flat sleeping surface. The seat slopes, in the sitting position, for added comfort (see fig. 3).

(u) *Push-back sofa.* When you push on the back of the sofa, it becomes a bed. Lift the back and it is a sofa again. Styled in tight or loose cushions (see fig. 3).

(v) *Roll-a-way bed.* Portable bed which has frame which folds in half with the mattress for compact storage.

(w) *Sleep lounge.* Upholstered seating section is mounted on a sturdy frame. May have bolster pillows along the wall as backrests or may have attached headrests (see fig. 3).

(x) *Stroller pad.* Cushion used in a baby stroller.

(y) *Sofa bed.* These are pieces in which the back of the sofa swings down flat with the seat to form the sleeping surface. All upholstered. Some sofa beds have bedding boxes for storage of bedding. There are two types: the one-piece, where the back and seat are upholstered as a unit, supplying an unbroken sleeping surface; and the two-piece, where back and seat are upholstered separately (see fig. 3).

(z) *Sofa lounge—(includes glideouts).* Upholstered seating section is mounted on springs and in a special frame that permits it to be pulled out for sleeping. Has upholstered backrest bedding box that is hinged. Glideouts are single sleepers with sloping seats and backrests. Seat pulls out from beneath back and evens up to supply level sleeping surface (see fig. 3).

(aa) *Studio couch.* Consists of upholstered seating section on upholstered foundation. Many types convert to twin beds (see fig. 3).

(bb) *Studio divan.* Twin size upholstered seating section with foundation is mounted on metal bed frame. Has no arms or backrest, and sleeps one (see fig. 3).

(cc) *Trundle bed.* A low bed which is rolled under a larger bed. In some lines, the lower bed springs up to form a double or two single beds as in a high riser (see fig. 3).

(dd) *Twin studio divan.* Frames which glide out (but not up) and use seat cushions, in addition to upholstered foundation to sleep two. Has neither arms nor back rest (see fig. 3).

Subpart B—Alternate Sampling Plans

§ 1632.11 Alternate sampling plan No. 1, for mattresses and mattress pads, to FF 4–72.

(a) The following alternate sampling plan for mattresses and mattress pads was submitted in accordance with § 1632.4(b)(1), and was approved, effective April 27, 1973, by the Department of Commerce which at that time had authority under the Flammable Fabrics Act to issue flammability standards. The alternate sampling plan may be used by any mattress or mattress pad manufacturer.

(b) All provisions of the standard (§§ 1632.1 through 1632.6) are applicable under this § 1632.11, except as specified herein.

(c) For the purposes of this alternate sampling plan, the following substitutes for § 1632.4(b):

§ 1632.4 *Test procedure.*

* * * * *

(b) *Specimen and sampling.*—(1) *General.* (i) The test criterion of § 1632.3(b) shall be used in conjunction with the following alternate mattress sampling plan.

(ii) The use of this alternate sampling plan is applicable to both mattresses and mattress pads. The plan may be used by any mattress or mattress pad manufacturer. Use of this alternate sampling plan in conjunction with any other sampling plan is permitted only if the latter is (a) an approved alternate sampling plan and (b) contains explicit provisions for such use. It is permissible to employ differing options or sampling plans with respect to differing mattress types and/or production units. However, any sampling plan employed with respect to a specific production unit shall be employed in its entirety.

(iii) For the purposes of this alternate sampling plan, "Initial Production Quantity" means a quantity of mattresses equaling or exceeding a specified fraction, k, of the quantity to be contained in the production unit to be accepted upon successful completion of the sampling requirements. Each prototype to be included in the production unit shall be represented in the initial production quantity. For each production unit, one of the following four options shall be selected:

(A) *Option 1.* The specified fraction, k, shall be one-thirtieth. The quantity limit shall be 450 mattresses for normal sampling and 450 mattresses for reduced sampling unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i).

(B) *Option 2.* The specified fraction, k, shall be one-twentieth. The quantity limit shall be 550 mattresses for normal sampling and 1,050 mattresses for reduced sampling unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i).

(C) *Option 3.* The specified fraction, k, shall be one-tenth. The quantity limit shall be 1,050 mattresses for normal sampling and 1,700 for reduced sampling unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i).

(D) *Option 4.* The specified fraction, k, shall be one-fifth. The quantity limit shall be 7,500 mattresses for normal sampling and 7,500 mattresses for reduced sampling unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i).

(2) *Mattress sampling.* The basic mattress sampling plan is made up of two parts: (1) Prototype qualification, and (2) production testing. In addition, a batch sampling plan is given which may be used for small production quantities, when shipping requirements prohibit the use of the basic plan, or for other reasons at the discretion of the manufacturer.

(i) *Basic sampling plan.* A production unit in the basic sampling plan shall consist of not more than 250 mattresses of a mattress type in normal sampling nor more than 500 mattresses of a mattress type in reduced sampling, or the quantity produced in 1½ consecutive calendar months, whichever is smaller. This unit size may be increased to the quantity produced in 1½ consecutive calendar months or less: *Provided,* That it is either documented that each of the materials contributing to the cigarette ignition characteristics of all the mattresses in the unit and the preceding or the following unit came from a single manufacturing lot of such material or 50 consecutive production units, at least 20,000 mattresses, have all been accepted in production testing as set forth in § 1632.4(b)(2)(i)(B). In no event shall the unit size exceed quantity limits imposed by the option selected.

(A) *Prototype qualification.* (*1*) For prototype qualification, the term "manufacturer" shall mean: (a) With respect to a company having one manufacturing facility, that company; (b) with respect to a company having two or more manufacturing facilities, either that company or one or more of its manufacturing facilities as it elects; and (c) with respect to a company that is part of a group of companies that normally sell mattresses under a group name, either that group of companies or a portion of that group or (a) or (b) above, as that company elects.

(*2*) Select enough mattress prototypes from preproduction or current production to provide six surfaces for test (three mattresses if both sides can be tested or six mattresses if only one side can be tested). Test each of the six surfaces according to § 1632.4(d) *Testing.* If all the cigarette test locations on all six surfaces satisfy the test criterion of § 1632.3(b), accept the mattress prototype. If one or more of the cigarette test locations on the six surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype.

(*3*) In addition, if it has been elected to include more than one company or more than one manufacturing facility in the term "manufacturer" for purposes of prototype qualification, each such company and each such manufacturing facility shall select enough mattress prototypes from its preproduction or current production to provide two surfaces for test. Test each of the two surfaces according to § 1632.4(d) *Testing.* If all the cigarette test locations on both surfaces satisfy the test criterion of § 1632.3(b), accept the mattress prototype for that company or manufacturing facility. If one or more of the cigarette test locations on the two surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype from that company or manufacturing facility.

(*4*) Mattress prototype qualification may be repeated after the manufacturer has taken action to improve the resistance of the mattress prototype to ignition by cigar-

V 40 250 DEC 30 75 XUM

ettes through mattress design, production, or materials selection. When mattress prototype qualification is repeated, whether as a result of prototype rejection or of subsequent unit rejection, such qualification shall be conducted in accordance with the requirements applicable to manufacturers and not those applicable to one company or manufacturing facility of a manufacturer.

(5) Each mattress prototype must be accepted in prototype qualification prior to shipping any mattresses to customers and prior to producing significant quantities of mattresses. If the manufacturer is one manufacturing facility, the first production unit manufactured immediately after successful prototype qualification or the production unit from which the mattresses were selected for the successful prototype qualification, not to exceed 500 mattresses, may be accepted and shipped to customers without further testing if all matresses in the production unit are the same as the prototype except for size. No provision for production unit acceptance based on prototype qualification applies if the manufacturer is more than one manufacturing facility or company.

(B) *Production testing.* For production testing, the term "manufacturer" shall mean each manufacturing facility. Random selection for production testing shall be accomplished by use of random number tables or equivalent means as determined by the Consumer Product Safety Commission. If it is desired to use only mattresses of a specified size (e.g., "twin") for testing, the drawing may be repeated until sufficient mattresses of that size have been selected. A production unit, except for the first production unit following successful prototype qualification as specified in § 1632.4(b)(2)(i)(A), is either accepted or rejected according to the following plan:

(*1*) *Normal sampling.* From the initial production quanity, randomly select enough mattresses to provide two surfaces for test (one mattress if both sides can be tested or two mattresses if only one side can be tested). Test each of the two surfaces according to § 1632.4(d) *testing.* If all the cigarette test locations on both surfaces meet the test criterion of § 1632.3(b), accept the unit. If one or more of the cigarette test locations fail the test criterion of § 1632.3(b), reject the unit. Unit rejection shall include all mattresses in the particular unit under test. Unit rejection also results in the loss of prototype qualification for all prototypes included in the unit under test. The loss of prototype qualification applies to the company or manufacturing facility that produced the rejected unit if it was elected to include more than one company or more than one manufacturing facility in the term "manufacturer" for purposes of prototype qualification, and to the manufacturer otherwise.

(*2*) *Reduced sampling.* (*i*) The level of sampling required for mattress production may be reduced provided that the preceding 15 consecutive units of mattresses, at least 500 mattresses, have all been accepted using the normal sampling plan of this alternate sampling plan or that of the standard. The production quantity for reduced sampling under this alternate sampling plan shall consist of one production unit as defined in § 1632.4(b)(2)(i) above.

(*ii*) From the initial production quantity, randomly select enough mattresses to provide two surfaces for test. Test each of the two surfaces according to § 1632.4(d) *Testing.* If all the cigarette test locations on both surfaces meet the test criterion of § 1632.3(b), accept the unit. If two or more individual cigarette test locations fail the test criterion of the § 1632.3(b), reject the unit. If only one individual cigarette test location fails the test criterion of § 1632.3(b), select enough additional mattresses to provide two additional surfaces for test. Test each of the two additional surfaces according to § 1632.4(d) *Testing.* If all the cigarette test locations on both surfaces meet the test criterion of § 1632.3(b), accept the Unit. If one or more of the individual cigarette test locations on the two additional surfaces fail the test criterion of § 1632.3(b), reject the unit. Unit rejection shall include all mattresses in the particular unit under test. Unit rejection also results in the loss of prototype qualification for all prototypes included in the unit under test. The loss of prototype qualification applies to the company or manufacturing facility that produced the rejected unit if it was elected to include more than one company or more than one manufacturing facility in the term "manufacturer" for purposes of prototype qualification, and to the manufacturer otherwise.

(*iii*) *Batch sampling plan.* (A) *General.* (*1*) For the batch sampling plan, the term "manufacturer" shall mean each manufacturing facility.

(*2*) A production unit in the batch sampling plan shall consist of not more than 250 mattresses or the quantity produced in one period of 30 consecutive calendar days, whichever is smaller.

(B) *Batch unit qualification and acceptance.* Select enough mattresses from the initial production of the unit to provide four surfaces for test (two mattresses if both sides can be tested or four mattresses if only one side can be tested). Test each of the four surfaces according to § 1632.4(d) *Testing.* If all the cigarette test locations on the four surfaces meet the test criterion of § 1632.3(b), accept the unit. If one or more of the cigarette test locations on the four surfaces fail the test criterion of § 1632.3(b), reject the unit. After rejection, unit qualification and acceptance under this batch sampling plan may be repeated after the resistance of the mattress to ignition by cigarettes is improved by the manufacturer taking corrective action in mattress design, production, or materials selection. Acceptance of any production unit under this batch sampling plan shall not have any effect on prototype qualification or unit acceptance of any other production unit.

(*3*) *Disposition of rejected units.* Rejected units shall not be retested, offered for sale, sold, or promoted for use as a mattress as defined in §1632.1(a) except after reworking to improve the resistance to ignition by cigarettes and subsequent retesting in accordance with the procedures set forth in § 1632.4(b)(2)(i) *Basic sampling plan.*

(*4*) *Records.* Records of all unit sizes, test results, and the disposition of rejected units shall be maintained by the manufacturer, in accordance with rules and regulations established by the Consumer Product Safety Commission.

(*5*) *Preparation of mattress samples.* The mattress surface shall be divided laterally into two sections (see fig. 1), one section for the bare mattress tests and the other for the two-sheet tests.

(*6*) *Sheet selection.* The sheets shall be white, 100 percent combed cotton percale, not treated with a chemical finish which imparts a characteristic, such as permanent press or flame resistance with 170 to 200 threads per square inch and a fabric weight of 115±14 gm/^{2} (3.4±0 4 oz/yd ^{2}). Size of sheet shall be appropriate for the mattress being tested.

(*7*) *Sheet preparation.* The sheets shall be laundered once before use in an automatic home washer using the hot water setting and longest normal cycle with the manufacturer's recommended quantity of a commercial detergent, and dried in an automatic home tumble dryer. The sheet shall be cut across the width into two equal parts after washing.

(*8*) *Cigarettes.* Unopened packages of cigarettes shall be selected for each series of tests.

§ 1632.12 Alternate sampling plan No. 2, for mattress pads, to FF 4–72.

(a) The following alternate sampling plan for mattress pads was submitted in accordance with § 1632.4(b)(1), and was approved by the Consumer Product Safety Commission. The alternate sampling plan, which became effective August 1, 1973, may be used by any mattress pad manufacturer.

(b) All provisions of the standard (§§ 1632.1 through 1632.6) are applicable under this § 1632.11, except as specified herein.

(c) For the purposes of this alternate sampling plan, the following substitutes for § 1632.4(b):

§ 1632.4 *Test procedure.*

* * * * *

(b) *Specimen and sampling.*—(1) *General.*—(i) The test criterion of § 1632.3(b) shall be used in conjunction with this Alternate Sampling Plan No. 2 (ASP No. 2). The use of this ASP No. 2 is restricted to mattress pads, but it may be used by any mattress pad manufacturer. ASP No. 2 may be used in conjunction with ASP No. 4 (§ 1632.13) to FF 4–72 if desired. When ASP No. 4 is so used, the provisions of this ASP No. 2 shall apply with respect to production testing of mattress pads. Use of this ASP No. 2 in conjunction with any other sampling plan is permitted only if the latter (A) is an approved sampling plan and (B) contains explicit provisions for such use.

(ii) It is permissible to employ differing sampling plans with respect to differing mattress pad types and/or production units; however, any sampling plan employed with respect to a specific production unit shall be so employed in its entirety.

(iii) For purposes of this ASP No. 2, "initial production quantity" means a quantity of mattress pads equalling or exceeding one-sixtieth of the quantity anticipated to be contained in the production unit to be accepted upon successful completion of the sampling requirements. Not withstanding the provisions of § 1632.1(j) and those of § 1632.4(b)(2)(i) *Basic sampling plan* of this ASP No. 2, mattress pads contained in an initial production quantity shall be deemed to be included in the production unit represented by that initial production quantity if (A) the initial production quantity is manufactured during the 30-day period preceding the nominal date of initiation of the production unit, (B) final assembly of mattress pads in the initial production quantity is accomplished on the machine or machines used in final assembly of mattress pads in the production unit, and (C) no mattress pads of the type contained in the production unit are produced on said machines during the period between manufacture of the initial production quantity and the nominal date of initiation of the production unit. Alternatively, mattress pads contained in an initial production quantity shall be deemed to be included in the production unit represented by that initial production quantity if the initial production quantity is manufactured during the 30-day period preceding the nominal date of initiation of the production unit and the manufacturer stipulates that all mattress pads of prototypes represented in the production unit and manufactured between the initial production quantity and the nominal date of initiation of the production unit shall be deemed to be rejected if the production unit is rejected. Each prototype to be included in the production unit shall be represented in the initial production quantity.

(2) *Mattress pad sampling.* The basic mattress pad sampling plan is made up of two parts: *Prototype qualification* (§ 1632.4(b)(2)(i)(A)) and *Production testing* (§ 1632.4(b)(2)(i)(B)). In addition, a *Batch sampling plan* (§ 1632.4(b)(2)(ii)) is given that may be used for small production quantities, when shipping requirements prohibit the use of the basic plan or for other reasons at the discretion of the manufacturer.

(i) *Basic sampling plan.* A production unit in the basic sampling plan shall consist of not more than 250 mattress pads of a mattress pad type in normal sampling (§ 1632.4(b)(2)(i)(B)(*1*)) nor more than 500 mattress pads of a mattress pad type in reduced sampling (§1632.4(b)(2)(i)(B)(*2*)) or the quantity produced in 1½ consecutive calendar months, whichever is smaller in either case. This production unit size may be increased to the quantity produced in 1½ consecutive calendar months or less: *Provided,* That it is either documented that each of the materials contributing to the cigarette ignition characteristics of all mattress pads in the production unit and the preceding or the following production unit came from a single manufacturing lot of such material, or 50 consecutive production units (at least 20,000 mattress pads) have all been accepted in production testing as set forth in § 1632.4(b)(2)(i)(B).

(A) *Prototype qualification.* (*1*) For prototype qualification, the term "manufacturer" shall mean (*i*) with respect to a company having one manufacturing facility, that company; (*ii*) with respect to a company having two or more manufacturing facilities, either that company or one or more of its manufacturing facilities as it elects; or (*iii*) with respect to a company that is part of a group of companies that have elected to share in a prototype design, either that group of companies or a portion of that group or (*i*) or (*ii*) above, as that company elects.

(*2*) Each "manufacturer" shall select enough of each mattress pad prototype from preproduction or current production to provide six surfaces for test (three mattress pads if both sides can be tested or six mattress pads if only one side can be tested). Test each of the six surfaces according to § 1632.4(d) *Testing* of FF 4–72. If all the cigarette test locations on all six surfaces satisfy the test criterion of § 1632.3(b) of FF 4–72, accept the mattress pad prototype. If one or more of the cigarette test locations on the six surfaces fail the test criterion of § 1632.3(b), reject the mattress pad prototype.

(*3*) If it has been elected to include more than one company and/or more than one manufacturing facility in the term "manufacturer" for purposes of prototype qualification, each such company and each such manufacturing facility shall select enough additional prototype mattress pads from its own preproduction or current production to provide two surfaces for test. Test each of the two surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on both surfaces satisfy the test criterion of § 1632.3(b) of FF 4–72, accept the mattress pad prototype for that company or manufacturing facility. If one or more of the cigarette test locations on the two surfaces fail the test criterion of § 1632.3(b), reject the mattress pad prototype for that company or manufacturing facility.

(*4*) Mattress pad prototype qualification may be repeated after the manufacturer has taken action to improve the resistance of the mattress pad prototype to ignition by cigarettes through mattress pad design, production, or materials selection. When mattress pad prototype qualification is repeated as a result of prototype rejection by the "manufacturer," such qualification shall be conducted as if it were an original qualification. When the mattress pad prototype qualification is repeated as a result of prototype rejection under the provisions of the preceding (*3*) or as a result of production unit rejection, such qualification shall be performed as if the producer of the failing mattress pad were a company having one manufacturing facility.

(*5*) Each mattress pad prototype must be accepted in prototype qualification prior to shipping any mattress pads to customers and prior to producing significant quantities of mattress pads. If the "manufacturer" is one manufacturing facility, the first production unit manufactured immediately after successful prototype qualification or the production unit from which the mattress pads were selected from the successful prototype qualification (not to exceed 500 mattress pads in either case) may be accepted and shipped to customers without further testing if all mattress pads in the production unit are the same as the prototype except for size.

(B) *Production testing.* For production testing, the term "manufacturer" shall mean each manufacturing facility. Random selection for production testing shall be accomplished by use of random number tables or equivalent means as determined by the Consumer Product Safety Commission. If it is desired to use only mattress pads of a specified size (for example, twin) for testing, the drawing may be repeated until sufficient mattress pads of that size have been selected. A production unit, except for the first production unit following successful prototype qualification as specified in § 1632.4(b)(2)(i)(A), is either accepted or rejected according to the following plan:

(*1*) *Normal sampling.* (*i*) From the initial production quantity, randomly select enough mattress pads to provide eight surfaces for test (four mattress pads if both sides can be tested or eight mattress pads if only one side can be tested). Test each of the eight surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on all surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the production unit. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject the production unit. If only one individual cigarette test location fails the test criterion of § 1632.3(b), select enough additional mattress pads from the initial production quantity to provide 16 addditional surfaces for test. Test each of the 16 additional surfaces according to § 1632.4(d). If all the cigarette test locations on the 16 additional surfaces meet the test criterion of § 1632.3(b), accept the production unit. If one or more of the individual cigarette test locations on the 16 additional surfaces fail the test criterion of § 1632.3(b), reject the production unit.

(*ii*) Production unit rejection shall include all mattress pads in the particular production unit under test. Such rejection also results in the loss of prototype qualification (§ 1632.4(b)(2)(i)(A)) for all prototypes included in the production unit under test. Testing after requalification shall be according to the normal sampling plan (§ 1632.4(b)(2)(i)(B)(*1*)).

(*2*) *Reduced sampling.* (*i*) The level of sampling required for mattress pad production acceptance may be reduced provided that the preceding 15 consecutive production units of mattress pads (at least 500 mattress pads) have all been accepted using the normal sampling plan of this ASP No. 2 (§ 1632.4(b)(2)(i)(B)(*1*)) or that of FF 4–72. The production quantity for reduced sampling under this ASP No. 2 shall consist of one production unit as defined in § 1632.4(b)(2)(i).

(*ii*) From the initial production quantity, randomly select enough mattress pads to provide eight surfaces for tests. Test each of the eight surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on all surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the production unit. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject the production unit. If only one individual cigarette test location fails the test criterion of § 1632.3(b), accept the production unit.

(*iii*) Production unit rejection shall include all mattress pads in the particular production unit under test. Such rejection also results in the loss of prototype qualification (§ 1632.4(b)(2)(i)(A)) for all prototypes included in the production unit under test. Testing after requalification shall be according to the normal sampling plan (§ 1632.4(b)(2)(i)(B)(*1*)).

(ii) *Batch sampling plan.* For the batch sampling plan, the term "manufacturer" shall mean each manufacturing facility. A production unit in the batch sampling plan shall consist of not more than 250 mattress pads or the quantity produced in one period of 30 consecutive calendar days, whichever is smaller.

(A) *Batch unit qualification and acceptance.* (*1*) Select enough mattress pads from the initial production of the production unit to provide four surfaces for test (two mattress pads if both sides can be tested or four mattress pads if only one side can be tested). Test each of the four surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on the four surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the production unit. If one or more of the cigarette test locations on the four surfaces fail the test criterion of § 1632.3(b), reject the production unit.

(*2*) After rejection, production unit qualification and acceptance under this batch sampling plan may be repeated after the resistance of the mattress pad to ignition by cigarettes is improved by the manufacturer taking corrective action in mattress pad design, production, or materials selection.

(*3*) Acceptance of any production unit under this batch sampling plan shall not have any effect on prototype qualification (§ 1632.4(b)(2)(i)(A)) or production unit acceptance of any other production unit.

(*3*) *Disposition of rejected units.* Rejected production units shall not be retested, offered for sale, sold, or promoted for use as mattress pads as defined in § 1632.1(a) of FF 4–72 except after reworking to improve the resistance to ignition by cigarettes and subsequent retesting in accordance with procedures set forth in the basic sampling plan (§ 1632.4(b)(2)(i)).

(*4*) *Records.* Records of all production unit sizes, test results, and the disposition of rejected production units shall be maintained by the manufacturer, in accordance with regulations established by the Consumer Product Safety Commission (see § 1632.31).

(*5*) *Preparation of mattress pad samples.* The mattress pad surface shall be divided laterally into two sections (see figure 1 of FF 4–72); one section for the bare mattress pad tests and the other for the two-sheet tests.

(*6*) *Sheet selection.* The sheets shall be white, 100-percent combed cotton percale, not treated with a chemical finish which imparts a characteristic such as permanent press or flame resistance, and shall have 170–200 threads per square inch and a fabric weight of 115±14 grams per square meter (3.4±0.4 ounces per square yard), or shall be of another type approved by the Consumer Product Safety Commission. Size of sheet shall be appropriate for the mattress pad being tested.

(*7*) *Sheet preparation.* The sheet shall be laundered once before use (in an automatic home washer using the hot water setting and longest normal cycle with the manufactur-

V 401250 DEC 30 75 XUM

er's recommended quantity of a commercial detergent) and dried in an automatic home tumble dryer. The sheet shall be cut across the width into two equal parts after washing.

(8) *Cigarettes.* Unopened packages of cigarettes shall be selected for each series of tests.

(9) *Compliance marketing sampling plans.*

(i) Sampling plans for use in market testing of items covered by the standard (FF 4–72) may be issued by the Consumer Product Safety Commission. Such plans shall define noncompliance of a production unit to exist only when it is shown, with a high level of statistical confidence, that those production units represented by tested items which fail such plans will in fact fail the standard (FF 4–72).

(ii) Production units found to be noncomplying under these provisions shall be deemed not to conform to the standard (FF 4–72).

(iii) The Consumer Product Safety Commission will publish such plans in the FEDERAL REGISTER for public comment prior to their promulgation.

(10) *Postponement of production testing.* Temporary suspension of production testing may be granted on a case-by-case basis by the Consumer Product Safety Commission in those instances where an individual manufacturer proves, under rules prescribed by the Commission, that he cannot acquire access to either in-house or independent testing facilities for production testing. In the event of such a suspension, the manufacturer would still be obligated to produce a mattress pad that meets all other requirements of the standard (FF 4–72).

§ 1632.13 Alternate sampling plan No. 4, for mattress ticking, to FF4–72.

(a) The following alternate sampling plan for mattress ticking was submitted in accordance with § 1632.4(b)(1), and was approved by the Consumer Product Safety Commission. The alternate sampling plan, which became effective June 19, 1973 may be used by any ticking, mattress or mattress pad manufacturer or any distributor of mattress ticking.

(b) All provisions of the standard (§§ 1632.1 through 1632.6) are applicable under this § 1632.13 except as specified herein.

(c) For the purposes of this alternate sampling plan, the following substitutes for § 1632.4(b):

§ 1632.4 *Test procedure.*

* * * * *

(b) *Specimen and sampling.*—(1) *General.*—(i)(A) The mattress portion of this alternate sampling plan shall use the test criterion of § 1632.3(b).

(B) This alternate sampling plan may be used in conjunction with alternate sampling plan No. 1 (ASP No. 1) to FF 4–72 (front end) (§ 1632.11) if desired. When ASP No. 1 is used in conjunction with this alternate sampling plan, the provisions of ASP No. 1 shall apply with respect to production testing of mattresses or mattress pads. When this alternate sampling plan is used in conjunction with any other alternate sampling plan, the provisions of this plan shall apply with respect to testing of ticking, mattress prototypes deemed to be qualified by virtue of permitted ticking substitutions, and requirements for requalification by mattress prototype qualification testing procedures.

(C) It is permissible to employ differing sampling plans with respect to differing mattress types and/or production units; however, any sampling plan employed with respect to a specific production unit shall be so employed in its entirety.

(ii) For the purpose of this alternate sampling plan, the following definitions apply in addition to those in § 1632.1 *Definitions*, of FF4–72:

(A) "Ticking prototype" means a ticking of a specific construction, color, or combination of colors and color pattern, weave pattern design, finish application, fiber content, and weight per unit area. With respect to film-coated fabrics, a prototype means a given method of application, chemical formula, and thickness of application of the film coating.

(B) "Ticking type" means a group of ticking prototypes identical except for color or combination of colors and color pattern, and weave pattern designs.

(C) "Ticking category" means a group of ticking types similar in method of manufacture and, if composed in whole or in part of nonfiber layers or coatings, identical in composition and nominal weight per unit of nonfiber components.

(D) "Ticking specimen" means a 38-by-38-centimeter (15-by-15-inch) section of ticking.

(E) "Ticking sample" means a total of three ticking specimens.

(F) "Ticking production unit" means any quantity of finished ticking of one ticking type up to 22,940 linear meters (25,000 linear yards).

(G) "Fabric piece" (piece) means any continuous, unseamed length of ticking, one or more of which make up a ticking production unit.

(2) *Mattress sampling.*—The basic mattress sampling plan is made up of two parts: Prototype qualification (§ 1632.4(b)(2)(i)(A)) and production testing (§ 1632.4(b)(2)(i)(B)). In addition, a batch sampling plan is given that may be used for small production quantities, when shipping requirements prohibit the use of the basic plan or for other reasons at the discretion of the manufacturer.

(i) *Basic sampling plan.*—A production unit in the basic sampling plan shall consist of not more than 500 mattresses of a mattress type or the quantity produced in 3 consecutive calendar months, whichever is smaller. This unit size may be increased to the quantity produced in 3 consecutive calendar months or less: *Provided*, That it is either documented that each of the materials contributing ignition characteristics of all the mattresses in the unit came from a single manufacturing lot of such material or 50 consecutive production units (at least 20,000 mattresses) have all been accepted in production testing as set forth in § 1632.4(b)(2)(i)(B). The documentation requirements for single ticking category shall be deemed to have been met with respect to ticking if such ticking has met the ticking prototype qualification requirements of § 1632.4(b)(9) and the ticking production testing requirements of § 1632.4(b)(10).

(A) *Prototype qualification.*—(*1*) For prototype qualification, the term "manufacturer" shall mean: (*i*) With respect to a company having one manufacturing facility, that company; (*ii*) with respect to a company having two or more manufacturing facilities, either that company or one or more of its manufacturing facilities as it elects; or (*iii*) with respect to a company that is part of a group of companies that have elected to share in a prototype design, either that group of companies or a portion of that group or (*i*) or (*ii*) above, as that company elects.

(*2*) Each manufacturer shall select enough of each mattress prototype from preproduction or current production to provide six surfaces for test (three mattresses if both sides can be tested or six mattresses if only one side can be tested).

(*3*) Test each of the six surfaces according to § 1632.4(d) *Testing* of FF 4–72. If all the cigarette test locations on all six surfaces satisfy the test criterion of § 1632.3(b) of FF 4–72, accept the mattress prototype. If one or more of the cigarette test locations on the six surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype.

(*4*) If it has been elected to include more than one company and/or more than one manufacturing facility in the term "manufacturer" for purposes of prototype qualification, each such company and each such manufacturing facility shall select enough additional prototype mattresses from its own preproduction or current production to provide two surfaces for test. Test each of the two surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on both surfaces satisfy the test criterion of § 1632.3(b) of FF 4–72, accept the mattress prototype for that company or manufacturing facility. If one or more of the cigarette test locations on the two surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype for that company or manufacturing facility.

(*5*) Mattress prototype qualification may be repeated after the manufacturer has taken action to improve the resistance of the mattress prototype to ignition by cigarettes through mattress design, production, or materials selection. When mattress prototype qualification is repeated as a result of prototype rejection by the manufacturer, such qualification shall be conducted as if it were an original qualification. When the mattress prototype qualification is repeated as a result of prototype rejection under the provisions of § 1632.4(b)(2)(i)(A)(*4*) or as a result of production unit rejection, such qualification shall be performed as if the producer of the failing mattress were a company having one manufacturing facility.

(*6*) Each mattress prototype must be accepted in prototype qualification prior to shipping any mattresses to customers and prior to producing significant quantities of mattresses. If the "manufacturer" is one manufacturing facility, the first production unit manufactured immediately after successful prototype qualification, or the production unit from which the mattresses were selected for the successful prototype qualification not to exceed 500 mattresses, may be accepted and shipped to customers without further testing if all mattresses in the production unit are the same as the prototype except for size. A mattress prototype shall be deemed to have been accepted in prototype qualification if another mattress prototype identical except for ticking prototype has been accepted in prototype qualification, both ticking prototypes are of the same ticking category, and both ticking prototypes have met the ticking prototype qualification requirements of § 1632.4(b)(9) or the inventory ticking type qualification requirements of § 1632.4(b)(12), whichever is applicable.

(B) *Production testing.*—For production testing, the term "manufacturer" shall mean each manufacturing facility. Random selection for production testing shall be accomplished by use of random number tables or equivalent means as determined by the Consumer Product Safety Commission. If it is desired to use only mattresses of a specified size (for example, twin) for testing, the drawing may be repeated until sufficient mattresses of that size have been selected. A production unit, except for the first production unit following successful prototype qualification as specified in § 1632.4(b)(2)(i)(A), is either accepted or rejected according to the following plan:

(*1*) *Normal sampling.*—(*i*) From each unit, randomly select enough mattresses to provide two surfaces for test (one mattress if both sides can be tested or two mattresses if only one side can be tested). Test each of the two surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on both surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the unit. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject the unit. If only one individual cigarette test locations fails the test criterion of § 1632.3(b), select enough additional mattresses to provide four additional surfaces for test. Test each of the four additional surfaces according to § 1632.4(d).

(*ii*) If all the cigarette test locations on the four additional surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the unit. If one or more of the individual cigarette test locations on the four additional surfaces fail the test criterion of § 1632.3(b), reject the unit.

(*iii*) Unit rejection shall include all mattresses in the particular unit under test. Unit rejection also results in the loss of prototype qualification (§ 1632.4(b)(2)(i)(A)) for all mattress prototypes included in the unit under test. Requalification of mattress prototypes represented in the sample and contributing one or more cigarette test locations that failed the test criterion shall be accomplished by mattress prototype qualification testing (that is, using six surfaces for each mattress prototype).

(*2*) *Reduced sampling.*—(*i*) The level of sampling required for mattress production acceptance may be reduced provided the preceding 15 consecutive units of mattresses, at least 500 mattresses, have all been accepted using the normal sampling plan (§ 1632.4(b)(2)(i)(B)(*1*)). In this case, the production quantity for reduced sampling may be increased to up to two units, still not to exceed the production of 3 consecutive calendar months.

(*ii*) From this production quantity, randomly select enough mattresses to provide two surfaces for test. Test each of the two surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on both surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept this production quantity. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject this production quantity. If only one individual cigarette location fails the test criterion of § 1632.3(b), accept this production quantity.

(*iii*) Rejection shall include all mattresses in the production quantity under test. Rejection also results in the loss of prototype qualification (§ 1632.4(b)(2)(i)(A)) for all mattress prototypes included in the production quantity under test. Requalification of mattress prototypes represented in the sample and contributing one or more cigarette test locations that failed the test criterion shall be accomplished by mattress prototype qualification testing (that is, using six surfaces for each mattress prototype). Testing after requalification shall be according to the normal sampling plan (§ 1632.4(b)(2)(i)(B)(*1*)).

(ii) *Batch sampling plan.*— For the batch sampling plan, the term "manufacturer" shall mean each manufacturing facility. A production unit in the batch sampling plan shall consist of not more than 250 mattresses or the quantity produced in one period of 30 consecutive calendar days, whichever is smaller.

(A) *Batch unit qualification and acceptance.*—(*1*) Select enough mattresses from the initial production of the unit to provide four surfaces for test (two mattresses if both sides can be tested or four mattresses if only one side can be tested). Test each of the four surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on the four surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the unit. If one or more of the cigarette test locations on the four surfaces fail the test criterion of § 1632.3(b), reject the unit.

(*2*) After rejection, unit qualification and acceptance under this batch sampling plan may be repeated after the resistance of the mattress to ignition by cigarettes is improved by the manufacturer taking corrective action in mattress design, production, or materials selection.

(*3*) Acceptance of any production unit under this batch sampling plan shall not have any effect on prototype qualification (§ 1632.4(b)(2)(i)(A)) or unit acceptance of any other production unit.

(*3*) *Disposition of rejected units.*—Rejected units shall not be retested, offered for sale, sold, or promoted for use as a mattress as defined in § 1632.1(a) of FF 4–72 except after reworking to improve the resistance to ignition by cigarettes and subsequent retesting in accordance with the procedures set forth in the basic sampling plan (§ 1632.4(b)(2)(i)).

(*4*) *Records.*—Records of all unit sizes, test results, and the disposition of rejected units shall be maintained by the manufacturer, in accordance with regulations established by the Consumer Product Safety Commission (see § 1632.31).

(*5*) *Preparation of mattress samples.*—The mattress surface shall be divided laterally into two sections (see figure 1); one section for the bare mattress tests and the other for the two-sheet tests.

(*6*) *Sheet selection.*—The sheets shall be white, 100-percent combed cotton percale, not treated with a chemical finish which imparts a characteristic such as permanent press or flame resistance, and with 170–200 threads per square inch and fabric weight of 155±14 grams per square meter (3.4±0.4 ounces per square yard), or shall be of another type approved by the Consumer Product Safety Commission. Size of sheet shall be appropriate for the mattress being tested.

(*7*) *Sheet preparation.*—The sheet shall be laundered once before use (in an automatic home washer using the hot water setting and longest normal cycle with the manufacturer's recommended quantity of a commercial detergent) and dried in an automatic home tumble dryer. The sheet shall be cut across the width into two equal parts after washing.

(*8*) *Cigarettes.*—Unopened packages of cigarettes shall be selected for each series of tests.

(*9*) *Ticking prototype qualification.*—(*i*) For ticking prototype qualification, the ticking samples shall be selected from finished fabric after its last processing step as a fabric. The ticking samples are restricted to a single prototype.

(*ii*) Select four ticking samples from no fewer than two fabric pieces of a single-ticking production unit. (The ticking production unit may be from pilot production or ongoing production.) Test each ticking specimen according to § 1632.4(b)(14). If the char length at each cigarette test location is less than or equal to 0.5 in, accept the ticking prototype. If the char length at two or more cigarette test locations is greater than 1.0 in, reject the ticking prototype. If (A) the char length at any cigarette test location is greater than 1.0 in and (B) the char length at each cigarette test location is less than or equal to 1.7 in and (C) the char length at not more than one cigarette test location is greater than 1.0 in, select four additional ticking samples from the same ticking production unit, including at least one ticking sample from each piece (§ 1632.4(b)(ii)(G)) that contained a cigarette test location with a char length exceeding 0.5 in.

(*iii*) Test each of the additional ticking specimens according to § 1632.4(b)(14). If the char length at each cigarette test location on all eight ticking samples is less than or equal to 1.0 in, accept the ticking prototype. If the char length at two or more cigarette test locations among all eight ticking samples is greater than 1.0 in reject the ticking prototype. If the char length at any cigarette test location among all eight ticking samples is greater than 1.7 in, reject the ticking prototype. If the char length at only one cigarette test location among all eight ticking samples is greater than 1.0 in and it is less than or equal to 1.7 in, select eight additional ticking samples from the same ticking production unit, including at least one ticking sample from each piece (§ 1632.4(b)(ii)(G)) that contained a cigarette test location with a char length exceeding 0.5 in.

(*iv*) Test each of the additional ticking specimens according to § 1632.4(b)(14). If the char length at each cigarette test location on the eight additional ticking samples is less than or equal to 1.0 in, accept the ticking prototype. If the char length at any cigarette test location on the eight additional ticking samples is greater than 1.0 in, reject the ticking prototype.

(*v*) Ticking prototype qualification (§ 1632.4(b)(9)) may be repeated once without action to improve ignition resistance if rejection of the ticking prototype involved occurred solely as a result of a char length greater than 1.7 in at a single cigarette test location. A determination that this is the case may be made only if ticking prototype qualification testing has been carried forward until all 16 ticking samples have been tested without further cause for ticking prototype rejection. Further repetition of ticking prototype qualification and repetition following ticking prototype rejection under any other circumstances may take place only after the manufacturer has taken action to improve the resistance of the ticking prototype to ignition by cigarettes through ticking design, production, or materials selection.

(10) *Ticking production testing.*—For ticking production testing, the ticking samples shall be selected from finished fabric after its last processing step as a fabric.

(i) Select one ticking sample from a single production unit. Test each ticking specimen according to § 1632.4(b)(14). If the char length at each cigarette test location is less than or equal to 0.5 in, accept the ticking production unit. If the char length at any cigarette test location is greater than 1.7 in, reject the ticking production unit. If the char length at two or more cigarette test locations is greater than 1.0 in, reject the ticking production unit. If (A) the char length at any cigarette test location is greater than 0.5 in and (B) the char length at each cigarette test location is less than or equal to 1.7 in and (C) the char length at not more than one cigarette test location is greater than 1.0 in, select one additional ticking sample from the same ticking production unit, including at least one ticking specimen from each piece (§ 1632.4(b)(ii)(G)) that contained a cigarette test location with a char length exceeding 0.5 in.

(ii) Test each of the additional ticking specimens according to § 1632.4(b)(14). If the char length at each cigarette test location on both ticking samples is less than or equal to 1.0 in, accept the ticking production unit. If the char length at two or more cigarette test locations among both ticking samples is greater than 1.0 in, reject the ticking production unit. If the char length at any cigarette test location among both ticking samples is greater than 1.7 in, reject the ticking production unit. If the char length at only one cigarette test location

V 40 250 DEC 30 75 XUM

among both ticking samples is greater than 1.0 in and it is less than or equal to 1.7 in, select two additional ticking samples from the same ticking production unit, including at least one ticking specimen from each piece (§ 1632.4(b)(11)(G)) that contained a cigarette test location with a char length exceeding 0.5 in, and select the remaining ticking specimens required so as to provide as nearly equal representation of the fabric pieces in the production unit as possible.

(iii) Test each of the additional ticking specimens according to § 1632.4(b)(14). If the char length at each cigarette test location on all four ticking samples is less than or equal to 1.0 in., accept the ticking production unit. If the char length at only one cigarette test location among all four ticking samples is greater than 1.0 in. and it is less than or equal to 1.7 in., accept the ticking production unit. If the char length at any cigarette test location on any of the four ticking samples is greater than 1.7 in., reject the ticking production unit. If the char length at two of more cigarette test locations among all four ticking samples is greater than 1.0 in., reject the ticking production unit.

(iv) Ticking production testing may be repeated once without action to improve ignition resistance if rejection of the ticking production unit involved occurred solely as a result of a char length greater than 1.7 in. at a single cigarette test location. A determination that this is the case may be made only if ticking production testing has been carried forward until all four ticking samples have been tested without further cause for ticking production unit rejection. Further repetition of ticking production testing and repetition following rejection of a ticking production unit under any other circumstances may take place only after the manufacturer has taken action to improve the resistance of the ticking production unit to ignition by cigarettes through further processing, or under the provisions of § 1632.4(b)(11).

(11) *Disposition of rejected ticking production units.*—(i) Any fabric piece that contributed a specimen with a char length exceeding 1.0 in at any cigarette test location shall be removed from the rejected ticking production unit and shall not be eligible for further attempts at acceptance under the standard (FF 4–72) until its resistance to ignition by cigarettes has been improved through further processing.

(ii) The remainder of a rejected ticking production unit may be subdivided into two or more subunits. No fabric piece may be subdivided among such subunits. Such subdivision shall correspond to the time sequence of production of finished fabric pieces or to differences in materials or process steps, such as dye lots, fiber sources, looms, or processing equipment, determined by the manufacturer's tests or analyses to constitute the probable cause of differences in flammability characteristics. If the subdivision corresponds to the time sequence of production of finished fabric pieces, each (removed) fabric piece that contributed a specimen with a char length exceeding 1.0 in at any cigarette test location shall define a boundary of a subunit.

(iii) From each subunit, select sufficient ticking specimens to constitute four ticking samples. These specimens shall be selected so as to provide as nearly equal representation of the fabric pieces in the subunit as possible. Test each of the ticking specimens according to § 1632.4(b)(14). If the char length at each cigarette test location on all four ticking samples is less than or equal to 1.0 in, accept the subunit. If the char length at any cigarette test location on all four ticking samples is greater than 1.0 in, reject the subunit.

(iv) The contents of a rejected subunit may be retested only after the manufacturer has taken action to improve the resistance of the subunit to ignition by cigarettes through further processing. Such retesting shall be according to § 1632.4(b)(10), except that any rejection in retesting shall be final.

(12) *Inventory ticking type qualification.*—The provisions of this subparagraph shall be applicable only to ticking in inventory on or before the effective date of the standard (FF 4–72, effective June 7, 1973).

(i) Select a ticking sample from each ticking prototype within the ticking type to be qualified. If fewer than four ticking prototypes within the ticking type to be qualified are in inventory, select a total of 12 ticking specimens, in equal number from each prototype. Test all ticking specimens according to § 1632.4(b)(14). If the char length at each cigarette test location on all ticking specimens is less than or equal to 0.5 in, accept the ticking type. If the char length at any cigarette test location on all ticking specimens is greater than 0.5 in, reject the ticking type.

(ii) Ticking prototypes within a rejected ticking type may be subjected to individual ticking prototype qualification in accordance with § 1632.4(b)(9). If within a rejected ticking type each ticking prototype exhibiting one or more char lengths greater than 0.5 in is subsequently accepted in individual ticking prototype qualification, that ticking type shall be deemed to have been accepted.

(iii) Invantory ticking type qualification (§ 1632.4(b)(12)) shall not be construed as a substitute for ticking prototype qualification (§ 1632.4(b)(9)) or ticking production testing (§ 1632.4(b)(10)) with respect to ticking manufactured after the effective date of the standard (FF 4–72, effective June 7, 1973).

(13) *Ticking conditioning.*—The ticking test specimens and cigarettes shall be conditioned in air at a temperature of no less than 18° C. (65° F.) and a relative humidity less than 55 percent for at least 8 hours prior to the test. The fabric specimens and cigarettes shall be removed from any packaging and supported in a suitable manner to permit free movement of air around them during conditioning.

(14) *Ticking testing.*—(i) The ticking test shall be conducted in a draft-protected room or area under atmospheric conditions as specified in § 1632.4(a)(1). *Test room.* A mounting box (see figure 1), and a template (see figure 2), or other suitable marking device shall be used for testing each specimen. The ignition source shall be the same as specified in § 1632.4(a)(2).

(ii) Place the template, or other suitable device, over the specimen to mark off the area in which the cigarette is to be placed. Mark the ½-in, 1-in. and 1.7-in boundary lines out from the cigarette's outer extremities. If a template is used, a ballpoint pen shall be used to mark the fabric.

(iii) Securely fasten each specimen on the test box. When secured, the material shall be tautly suspended over the open side of the box throughout the test. Tacks, staples, tape, or other convenient and appropriate means may be used to secure the fabric to the test apparatus. (Caution: If the fabric is not sufficiently taut on the box, the cigarettes may roll away from the spot marked off by the template for char length measurements.)

(iv) Light and place one cigarette at a time on the ticking surface. Each cigarette shall be well lighted, but not burned more than 4 mm (0.16 in) when placed on the test specimen. Three cigarettes will be used on each specimen. The largest portion of each color and weave pattern design will be exposed to at least one lighted cigarette.

(v) If a cigarette extinguishes before burning its full length or falls through the fabric being tested, the test must be repeated with a freshly lit cigarette on a different portion of the same type of location until either (A) three cigarettes have burned their full lengths or (B) three cigarettes have extinguished or fallen through before burning their full lengths.

(15) *Records.*—Records of all unit sizes, test results, and the disposition of rejected units shall be maintained by the manufacturer, in accordance with regulations established by the Consumer Product Safety Commission (see § 1632.31).

(16) *Compliance marketing sampling plans.*—(i) Sampling plans for use in market testing of items covered by the standard (FF 4–72) may be issued by the Consumer Product Safety Commission. Such plans shall define noncompliance of a production unit to exist only when it is shown, with a high level of statistical confidence, that those production units represented by tested items which fail such plans will in fact fail the standard (FF 4–72).

(ii) Production units found to be noncomplying under these provisions shall be deemed not to conform to the standard (FF 4–72).

(iii) The Consumer Product Safety Commission will publish such plans in the FEDERAL REGISTER for public comment prior to their promulgation.

(17) *Postponement of production testing.*—Temporary suspension of production testing may be granted on a case-by-case basis by the Consumer Product Safety Commission in those instances where an individual manufacturer proves, under rules prescribed by the Commission, that he cannot acquire access to either in-house or independent testing facilities for production testing. In the event of such a suspension, the manufacturer would still be obligated to produce a mattress that meets all other requirements of the standard (FF 4–72).

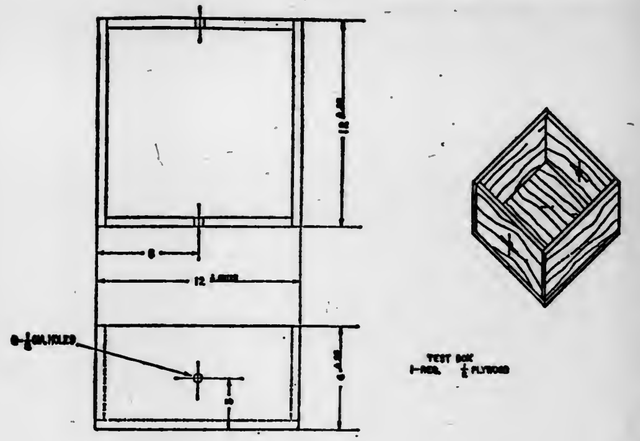

Figure 1

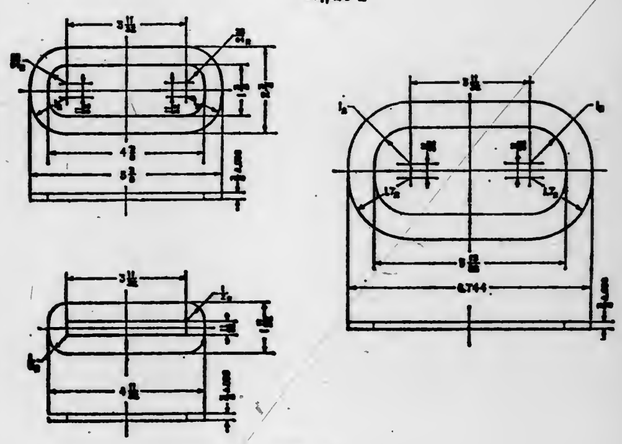

Figure 2

§ 1632.14 Alternate sampling plan No. 5, for mattresses and mattress pads, to FF 4–72.

(a) The following alternate sampling plan for mattresses and matress pads was submitted in accordance with § 1632.4(b)(1), and was approved by the Consumer Product Safety Commission. The alternate sampling plan, which became effective November 30, 1973, may be used by any mattress or mattress pad manufacturer.

(b) All provisions of the standard (§§ 1632.1 through 1632.6) are applicable under this § 1632.14 except as specified herein.

(c) For the purposes of this alternate sampling plan, the following substitutes for § 1632.4(b).

§ 1632.4 *Test procedure.*

. . . . . .

(b) *Specimen and sampling.*—(1) *General.*—(i) The test criterion of § 1632.3(b) of FF 4–72 shall be used in conjunction with this Alternate Sampling Plan No. 5 (ASP No. 5). This ASP No. 5 may be used in conjunction with ASP No. 4 to FF 4–72 (mattress ticking) if desired (§ 1632.13). When ASP No. 4 is so used, the provisions of this ASP No. 5 shall apply with respect to production testing of mattresses or mattress pads.

(ii) Differing options or sampling plans may be employed with respect to differing mattress types and/or production units; however, any sampling plan employed with respect to a specific production unit shall be so employed in its entirety.

(Note: Throughout this ASP No. 5, "mattress(es)" means "mattress(es) or mattress pad(s).")

(iii) For purposes of this ASP No. 5 "initial production quantity" means a quantity of mattresses equalling or exceeding a specified fraction, K, of the quantity to be contained in the production unit to be accepted upon successful completion of the sampling requirements. Each prototype to be included in the production unit shall be represented in the initial production quantity. For each production unit, one of the following four options shall be selected:

(A) *Option 1.* The specified fraction, K, shall be one-thirtieth. The quantity limit shall be 250 mattresses for normal sampling (§ 1632.4(b)(2)(i)(B)(*1*)) and 1,700 mattresses for reduced sampling (§1632.4(b)(2)(i)(B)(2)) unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i).

(B) *Option 2.* The specified fraction, K shall be one-twentieth. The quantity limit shall be 275 mattresses for normal sampling and 2,000 mattresses for reduced sampling unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i).

(C) *Option 3.* The specified fraction, K, shall be one-tenth. The quantity limit shall be 275 mattresses for normal sampling and 4,650 mattresses for reduced sampling unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i).

(D) *Option 4.* The specified fraction, K, shall be one-fifth. The quantity limit shall be 550 mattresses for normal sampling and 7,500 mattresses for reduced sampling unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i).

(2) *Mattress sampling.* The basic mattress sampling plan is made up of two parts: Prototype qualification (§ 1632.4(b)(2)(i)(A)) and production testing (§ 1632.4(b)(2)(i)(B)). In addition, a batch sampling plan (§ 1632.4(b)(2)(ii)) is given that may be used for small production quantities, when shipping requirements prohibit the use of the basic plan or for other reasons at the discretion of the manufacturer.

(i) *Basic sampling plan.* A production unit in the basic sampling plan shall consist of not more than 250 mattresses of a mattress type in normal sampling (§ 1632.4(b)(2)(i)(B)(*1*)) nor more than 500 mattresses of a mattress type in reduced sampling (§ 1632.4(b)(2)(i)(B)(2)) or the quantity produced in 1½ consecutive calendar months, whichever is smaller in either case. This production unit size may be increased to the quantity produced in 1½ consecutive calendar months or less; *Provided*, That it is either documented that each of the materials contributing to the cigarette ignition characteristics of all the mattresses in the production unit and the preceding or the following production unit came from a single manufacturing lot of such material, or 50 consecutive production units (at least 20,000 mattresses) have all been accepted in production testing as set forth in § 1632.4(b)(2)(i)(B). In no event shall the production unit size exceed quantity limits imposed by the option selected.

(A) *Prototype qualification.* (*1*) For prototype qualification, the term "manu-

facturer" shall mean (*i*) with respect to a company having one manufacturing facility, that company; (*ii*) with respect to a company having two or more manufacturing facilities, either that company or one or more of its manufacturing facilities as it elects; or (*iii*) with respect to a company that is part of a group of companies that have elected to share in a prototype design, either that group of companies or a portion of that group or (*i*) or (*ii*) above, as that company elects.

(2) Each "manufacturer" shall select enough of each mattress prototype from preproduction or current production to provide six surfaces for test (three mattresses if both sides can be tested or six mattresses if only one side can be tested). Test each of the six surfaces according to § 1632.4(d) *Testing* of FF 4–72. If all the cigarette test locations on all six surfaces satisfy the test criterion of § 1632.3(b) of FF 4–72, accept the mattress prototype. If one or more of the cigarette test locations on the six surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype.

(3) If it has been elected to include more than one company and/or more than one manufacturing facility in the term "manufacturer" for purposes of prototype qualification, each such company and each such manufacturing facility shall select enough additional prototype mattresses from its own preproduction or current production to provide two surfaces for test. Test each of the two surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on both surfaces satisfy the test criterion of § 1632.3(b) of FF 4–72, accept the mattress prototype for that company or manufacturing facility. If one or more of the cigarette test locations on the two surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype for that company or manufacturing facility.

(4) Mattress prototype qualification may be repeated after the manufacturer has taken action to improve the resistance of the mattress prototype to ignition by cigarettes through mattress design, production, or materials selection. When mattress prototype qualification is repeated as a result of prototype rejection by the "manufacturer," such qualification shall be conducted as if it were an original qualification. When the mattress prototype qualification is repeated as a result of production unit rejection, such qualification shall be performed as if the producer of the failing mattress were a company having one manufacturing facility.

(5) Each mattress prototype must be accepted in prototype qualification prior to shipping any mattresses to customers and prior to producing significant quantities of mattresses. If the "manufacturer" is one manufacturing facility, the first production unit manufactured immediately after successful prototype qualification or the production unit from which the mattresses were selected for the successful prototype qualification (not to exceed 500 mattresses in either case) may be accepted and shipped to customers without further testing if all mattresses in the production unit are the same as the prototype except for size.

(B) *Production testing.* For production testing, the term "manufacturer" shall mean each manufacturing facility. Random selection for production testing shall be accomplished by use of random number tables or equivalent means as determined by the Consumer Product Safety Commission. If it is desired to use only mattresses of a specified size (for example, twin) for testing, the drawing may be repeated until sufficient mattresses of that size have been selected. A production unit, except for the first production unit following successful prototype qualification as specified in § 1632.4(b)(2)(i)(A), is either accepted or rejected according to the following plan:

(*1*) *Normal sampling.* (*i*) From the initial production quantity (§ 1632.4(b)(1)(iii)), select enough mattresses to provide two surfaces for test (one mattress if both sides can be tested or two mattresses if only one side can be tested). Test each of the two surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on both surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the production unit. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject the production unit. If only one individual cigarette test location fails the test criterion of § 1632.3(b), select enough additional mattresses from the initial production quantity to provide six additional surfaces for test. Test each of the six additional surfaces according to § 1632.4(d). If all the cigarette test locations on the six additional surfaces meet the test criterion of § 1632.3(b), accept the production unit. If one or more of the individual cigarette test locations on the six additional surfaces fail the test criterion of § 1632.3(b), reject the production unit.

(*ii*) Production unit rejection shall include all mattresses in the particular production unit under test. Such rejection also results in the loss of prototype qualification § 1632.4(b)(2)(i)(A) for all prototypes included in the production unit under test.

(*2*) *Reduced sampling.* (*i*) The level of sampling required for mattress production acceptance may be reduced provided the preceding 15 consecutive production units of mattresses (at least 500 mattresses) have all been accepted using the normal sampling plan of this ASP No. 5 (§ 1632.4(b)(2)(i)(B)(*1*)) or that of FF 4–72. The production quantity for reduced sampling under this ASP No. 5 shall consist of one production unit as defined in § 1632.4(b)(2)(i).

(*ii*) From the initial production quantity (§ 1632.4(b)(1)(iii)), randomly select enough mattresses to provide four surfaces for test. Test each of the four surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on the four surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the production unit. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject the production unit. If only one individual cigarette test location fails the test criterion of § 1632.3(b), accept the production unit.

(*iii*) Production unit rejection shall include all mattresses in the particular production unit under test. Such rejection also results in the loss of prototype qualification (§ 1632.4(b)(2)(i)(A)) for all prototypes included in the production unit under test.

(*ii*) *Batch sampling plan.* For the batch sampling plan, the term "manufacturer" shall mean each manufacturing facility. A production unit in the batch sampling plan shall consist of not more than 250 mattresses or the quantity produced in one period of 30 consecutive calendar days, whichever is smaller.

(*A*) *Batch unit qualification and acceptance.* (*1*) Select enough mattresses from the initial production of the production unit to provide four surfaces for test (two mattresses if both sides can be tested or four mattresses if only one side can be tested). Test each of the four surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on the four surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the production unit. If one or more of the cigarette test locations on the four surfaces fail the test criterion of § 1632.3(b), reject the production unit.

(*2*) After rejection, production unit qualification and acceptance under this batch sampling plan may be repeated after the resistance of the mattress to ignition by cigarettes is improved by the manufacturer taking corrective action in mattress design, production, or materials selection.

(*3*) Acceptance of any production unit under this batch sampling plan shall not have any effect on prototype qualification (§ 1632.4(b)(2)(i)(A)) or production unit acceptance of any other production unit.

(*3*) *Disposition of rejected units.* Rejected production units shall not be retested, offered for sale, sold, or promoted for use as mattresses as defined in § 1632.1(a) of FF 4–72 except after reworking to improve the resistance to ignition by cigarettes and subsequent retesting in accordance with the procedures set forth in the basic sampling plan (§ 1632.4(b)(2)(i)).

(*4*) *Records.* Records of all production unit sizes, test results, and the disposition of rejected production units shall be maintained by the manufacturer in accordance with regulations established by the Consumer Product Safety Commission (see § 1632.31).

(*5*) *Preparation of mattress samples.* The mattress surface shall be divided laterally into two sections (see figure 1 of FF 4–72); one section for the bare mattress tests and the other for the two-sheet tests.

(*6*) *Sheet selection.* The sheets shall be white, 100-percent combed cotton percale, not treated with a chemical finish which imparts a characteristic such as permanent press or flame resistance, and shall have 170–200 threads per square inch and fabric weight of 115±14 grams per square meter (3.4±0.4 ounces per square yard), or shall be of another type approved by the Consumer Product Safety Commission. Size of sheet shall be appropriate for the mattress being tested.

(*7*) *Sheet preparation.* The sheet shall be laundered once before use (in an automatic home washer using the hot water setting and longest normal cycle with the manufacturer's recommended quantity of a commercial detergent) and dried in an automatic home tumble dryer. The sheet shall be cut across the width into two equal parts after washing.

(*8*) *Cigarettes.* Unopened packages of cigarettes shall be selected for each series of tests.

(*9*) *Compliance marketing sampling plans.* (*i*) Sampling plans for use in market testing of items covered by the standard (FF 4–72) may be issued by the Consumer Product Safety Commission. Such plans shall define noncompliance of a production unit to exist only when it is shown, with a high level of statistical confidence, that those production units represented by tested items which fail such plans will in fact fail the standard.

(*ii*) Production units found to be noncomplying under these provisions shall be deemed not to conform to the standard (FF 4–72).

(*iii*) The Consumer Product Safety Commission will propose such plans in the FEDERAL REGISTER for public comment prior to their promulgation.

(*10*) *Postponement of production testing.* Temporary suspension of production testing may be granted on a case-by-case basis by the Consumer Product Safety Commission in those instances where an individual manufacturer proves, under rules prescribed by the Commission, that he cannot acquire access to either in-house or independent testing facilities for production testing. In the event of such a suspension, the manufacturer would still be obligated to produce a mattress that meets all other requirements of the standard (FF 4–72).

§ 1632.15 Alternate sampling plan No. 6, for mattresses and mattress pads, to FF4–72.

(a) The following alternate sampling plan for mattresses and mattress pads was submitted in accordance with § 1632.4(b)(1), and was approved by the Consumer Product Safety Commission. The alternate sampling plan, which became effective September 25, 1973, may be used by any mattress or mattress pad manufacturer.

(b) All provisions of the standard (§§ 1632.1 through 1632.6) are applicable under this § 1632.15 except as specified herein.

(c) For the purposes of this alternate sampling plan, the following substitutes for § 1632.4(b):

§ 1632.4 *Test procedure.*

. . . . .

(b) *Specimen and sampling.*—(1) *General.*—(i) The test criterion of § 1632.3(b) of FF 4–72 shall be used in conjunction with this Alternate Sampling Plan No. 6 (ASP No. 6). This ASP No. 6 may be used in conjunction with ASP No. 4 to FF 4–72 (mattress ticking) if desired. (§ 1632.13). When ASP No. 4 is so used, the provisions of this ASP No. 6 shall apply with respect to production testing of mattresses or mattress pads.

(ii) Differing options or sampling plans may be employed with respect to differing mattress types and/or production units; however, any sampling plan employed with respect to a specific production unit shall be so employed in its entirety. (Note: Throughout this ASP No. 6 (except for (A), (B), and (C) of § 1632.4(b)(1)(iii)), "mattress(es)" means "mattress(es) or mattress pad(s).")

(iii) For purposes of this ASP No. 6, "initial production quantity" means a quantity of mattresses equalling or exceeding a specified fraction of the quantity to be contained in the production unit to be accepted upon successful completion of the sampling requirements. Each prototype to be included in the production unit shall be represented in the initial production quantity. For each production unit, one of the following four options shall be selected:

(A) *Option 1.*—The specified fraction shall be one-thirtieth. The quantity limit shall be 800 mattresses or 5,500 mattress pads for normal sampling (§ 1632.4(b)(2)(i)(B)(*1*) and 1,700 matresses or 11,000 mattress pads for reduced sampling (§ 1632.4(b)(2)(i)(B)(*2*)) unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i).

(B) *Option 2.*—The specified fraction shall be one-twentieth. The quantity limit shall be 950 mattresses or 6,600 mattress pads for normal sampling and 2,000 mattresses or 13,000 mattress pads for reduced sampling unless a smaller limit is imposed under the provisions § 1632.4(b)(2)(i).

(C) *Option 3.*—The specified fraction shall be one-tenth. The quantity limit shall be 2,000 mattresses for normal sampling and 4,650 mattresses for reduced sampling unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i). The quantity limit shall be 13,450 mattress pads for normal sampling unless a smaller limit is imposed under the provisions of § 1632.4(b)(2)(i). The quantity limit for mattress pads for reduced sampling shall be that imposed under the provisions of § 1632.4(b)(2)(i).

(D) *Option 4.*—The specified fraction shall be one-fifth. The quantity limit shall be that imposed under the provisions of § 1632.4(b)(2)(i).

(2) *Mattress sampling.*—The basic mattress sampling plan is made up of two parts: Prototype qualification (§ 1632.4(b)(2)(i)(A)) and production testing (§ 1632.4(b)(2)(i)(B)). In addition, a batch sampling plan (§ 1632.4(b)(2)(ii)) is given that may be used for small production quantities, when shipping requirements prohibit the use of the basic plan or for other reasons at the discretion of the manufacturer.

(i) *Basic sampling plan.*—A production unit in the basic sampling plan shall consist of not more than 250 mattresses of a mattress type in normal sampling (§ 1632.4(b)(2)(i)(B)(*1*)) nor more than 500 mattresses of a mattress type in reduced sampling (§ 1632.4(b)(2)(i)(B)(*2*)) or the quantity produced in 1½ consecutive calendar months, whichever is smaller in either case. This production unit size may be increased to the quantity produced in 1½ consecutive calendar months or less: *Provided*, That it is either documented that each of the materials contributing to the cigarette ignition characteristics of all the mattresses in the production unit and the preceding or the following production unit came from a single manufacturing lot of such material, or 50 consecutive production units (at least 20,000 mattresses) have all been accepted in production testing as set forth in § 1632.4(b)(2)(i)(B). In no event shall the production unit size exceed quantity limits imposed by the option selected.

(A) *Prototype qualification.*—(*1*) For prototype qualification, the term "manufacturer" shall mean (*i*) with respect to a company having one manufacturing facility, that company; (*ii*) with respect to a company having two or more manufacturing facilities, either that company or one or more of its manufacturing facilities as it elects; or (*iii*) with respect to a company that is part of a group of companies that have elected to share in a prototype design, either that group of companies or a portion of that group or (*i*) or (*ii*) above, as that company elects.

(2) Each "manufacturer" shall select enough of each mattress prototype from preproduction or current production to provide six surfaces for test (three mattresses if both sides can be tested or six mattresses if only one side can be tested). Test each of the six surfaces according to § 1632.4(d). *Testing* of FF 4–72. If all the cigarette test locations on all six surfaces satisfy the test criterion of § 1632.3(b) of FF 4–72, accept the mattress prototype. If one or more of the cigarette test locations on the six surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype.

(3) If it has been elected to include more than one company and/or more than one manufacturing facility in the term "manufacturer" for purposes of prototype qualification, each such company and each such manufacturing facility shall select enough additional prototype mattresses from its own preproduction or current production to provide two surfaces for test. Test each of the two surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on both surfaces satisfy the test criterion of § 1632.3(b) of FF 4–72, accept the mattress prototype for that company or manufacturing facility. If one or more of the cigarette test locations on the two surfaces fail the test criterion of § 1632.3(b), reject the mattress prototype for that company or manufacturing facility.

(4) Mattress prototype qualification may be repeated after the manufacturer has taken action to improve the resistance of the mattress prototype to ignition by cigarettes through mattress design, production, or materials selection. When mattress prototype qualification is repeated as a result of prototype rejection by the "manufacturer," such qualification shall be conducted as if it were an original qualification. When the mattress prototype qualification is repeated as a result of prototype rejection under the provisions of § 1632.4(b)(2)(i)(A)(3) or as a result of production unit rejection, such qualification shall be performed as if the producer of the failing mattress were a company having one manufacturing facility.

(5) Each mattress prototype must be accepted in prototype qualification prior to shipping any mattresses to customers and prior to producing significant quantities of mattresses. If the "manufacturer" is one manufacturing facility, the first production unit manufactured immediately after successful prototype qualification or the production unit from which the mattresses were selected for the successful prototype qualification (not to exceed 500 mattresses in either case) may be accepted and shipped to customers without further testing if all mattresses in the production unit are the same as the prototype except for size.

(B) *Production testing.*—For production testing, the term "manufacturer" shall mean each manufacturing facility. Random selection for production testing shall be accomplished by use of random number tables or equivalent means as determined by the Consumer Product Safety Commission. If it is desired to use only mattresses of a specified size (for example, twin) for testing, the drawing may be repeated until sufficient mattresses of that size have been selected. A production unit, except for the first production unit following successful prototype qualification as specified in § 1632.4(b)(2)(i)(A), is either accepted or rejected according to the following plan:

(*1*) *Normal sampling.*—(*i*) From the initial production quantity (§ 1632.4(b)(1)(iii)), randomly select enough mattresses to provide four surfaces for test (two mattresses if both sides can be tested or four mattresses if only one side can be tested). Test each of the four surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on all four surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the production unit. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject the production unit. If only one individual cigarette test location fails the test criterion of § 1632.3(b), select enough additional mattresses from the initial production quantity to provide eight additional surfaces for test. Test each of the eight additional surfaces according to § 1632.4(d). If all the cigarette test locations on the eight additional surfaces meet the test criterion of § 1632.3(b), accept the production unit. If one or more of the individual cigarette test locations on the eight additional surfaces fail the test criterion of § 1632.3(b), reject the production unit.

(*ii*) Production unit rejection shall include all mattresses in the particular production unit under test. Such rejection also results in the loss of prototype qualification (§ 1632.4(b)(2)(i)(A)) for all prototypes included in the production unit under test.

(*2*) *Reduced sampling.*—(*i*) The level of sampling required for mattress production acceptance may be reduced provided the preceding 15 consecutive production units of mattresses (at least 500 mattresses) have all been accepted using the normal sampling plan of this ASP No. 6 (§ 1632.4(b)(2)(i)(B)(*1*)) or that of FF 4–72. The production quantity for reduced sampling under this ASP No. 6 shall consist of one production unit as defined in § 1632.4(b)(2)(i).

(*ii*) From the initial production quantity (§ 1632.4(b)(1)(iii)), randomly select enough mattresses to provide four surfaces

V 4012 50
DEC 30 75
XUM

for test. Test each of the four surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on the four surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the production unit. If two or more individual cigarette test locations fail the test criterion of § 1632.3(b), reject the production unit. If only one individual cigarette test location fails the test criterion of § 1632.3(b), accept the production unit.

(iii) Production unit rejection shall include all mattresses in the particular production unit under test. Such rejection also results in the loss of prototype qualification (§ 1632.4(b)(2)(i)(A)) for all prototypes included in the production unit under test.

(ii) *Batch sampling plan.*—For the batch sampling plan, the term "manufacturer" shall mean each manufacturing facility. A production unit in the batch sampling plan shall consist of not more than 250 mattresses or the quantity produced in one period of 30 consecutive calendar days, whichever is smaller.

(A) *Batch unit qualification and acceptance.*—(*1*) Select enough mattresses from the initial production of the production unit to provide four surfaces for test (two mattresses if both sides can be tested or four mattresses if only one side can be tested). Test each of the four surfaces according to § 1632.4(d) of FF 4–72. If all the cigarette test locations on the four surfaces meet the test criterion of § 1632.3(b) of FF 4–72, accept the production unit. If one or more of the cigarette test locations on the four surfaces fail the test criterion of § 1632.3(b), reject the production unit.

(*2*) After rejection, production unit qualification and acceptance under this batch sampling plan may be repeated after the resistance of the mattress to ignition by cigarettes is improved by the manufacturer taking corrective action in mattress design, production, or materials selection.

(*3*) Acceptance of any production unit under this batch sampling plan shall not have any effect on prototype qualification (§ 1632.4(b)(2)(i)(A)) or production unit acceptance of any other production unit.

(3) *Disposition of rejected units.*—Rejected production units shall not be retested, offered for sale, sold, or promoted for use as mattresses as defined in § 1632.1(a) of FF 4–72 except after reworking to improve the resistance to ignition by cigarettes and subsequent retesting in accordance with the procedures set forth in the basic sampling plan (§ 1632.4(b)(2)(i)).

(4) *Records.*—Records of all production unit sizes, test results, and the disposition of rejected production units shall be maintained by the manufacturer in accordance with regulations established by the Consumer Product Safety Commission (see § 1632.31).

(5) *Preparation of mattress samples.*—The mattress surface shall be divided laterally into two sections (see figure 1 of FF 4–72); one section for the bare mattress tests and the other for the two-sheet tests.

(6) *Sheet selection.*—The sheets shall be white, 100-percent combed cotton percale, not treated with a chemical finish which imparts a characteristic such as permanent press or flame resistance, and shall have 170–200 threads per square inch and fabric weight of 115±14 grams per square meter (3.4±0.4 ounces per square yard), or shall be of another type approved by the Consumer Product Safety Commission. Size of sheet shall be appropriate for the mattress being tested.

(7) *Sheet preparation.*—The sheet shall be laundered once before use (in an automatic home washer using the hot water setting and longest normal cycle with the manufacturer's recommended quantity of a commercial detergent) and dried in an automatic home tumble dryer. The sheet shall be cut across the width into two equal parts after washing.

(8) *Cigarettes.*—Unopened packages of cigarettes shall be selected for each series of tests.

(9) *Compliance marketing sampling plans.*—(1) Sampling plans for use in market testing of items covered by the standard (FF 4–72) may be issued by the Consumer Product Safety Commission. Such plans shall define noncompliance of a production unit to exist only when it is shown, with a high level of statistical confidence, that those production units represented by tested items which fail such plans will in fact fail the standard.

(ii) Production units found to be noncomplying under these provisions shall be deemed not to conform to the standard (FF 4–72).

(iii) The Consumer Product Safety Commission will propose such plans in the FEDERAL REGISTER for public comment prior to their promulgation.

(10) *Postponement of production testing.*—Temporary suspension of production testing may be granted on a case-by-case basis by the Consumer Product Safety Commission in those instances where an individual manufacturer proves, under rules prescribed by the Commission, that he cannot acquire access to either in-house or independent testing facilities for production testing. In the event of such a suspension, the manufacturer would still be obligated to produce a mattress that meets all other requirements of the standard (FF 4–72).

Subpart C—Rules and Regulations

AUTHORITY: Sec. 5, 67 Stat. 112, as amended, 81 Stat. 570; 15 U.S.C. 1194.

§ 1632.31 Mattresses—labeling, recordkeeping requirements, and guaranties.

(a) *Definitions.* For the purposes of this section, the following definitions apply:

(1) "Standard for the Flammability of Mattresses" or "Standard" means the Standard for the Flammability of Mattresses (FF 4–72) promulgated by the Secretary of Commerce and published in the FEDERAL REGISTER of June 7, 1972 (37 FR 11362), as amended and reissued by the Consumer Product Safety Commission in a notice dated June 1, 1973, and published in the FEDERAL REGISTER of June 8, 1973 (38 FR 15095, Subpart A of this Part), which Standard as amended became effective June 22, 1973.

(2) The definition of terms set forth in the Standard shall also apply to this section. (It should be noted that the definition of "mattress" in the Standard includes, among other things, mattress pads.)

(b) *Labeling.* (1) All mattress pads which have had a chemical fire retardant treatment or contain any fire retardant treated components shall be labeled with precautionary instructions to protect the pads from agents or treatments which are known to cause deterioration of their flame resistance. Such labels shall be permanent, prominent, conspicuous, and legible.

(2) If a mattress pad has had a chemical fire retardant treatment or contains any fire retardant treated components, it shall be prominently, conspicuously, and legibly labeled with the letter "T."

(3) Every manufacturer, importer, or other person initially introducing mattresses subject to the Standard into commerce shall assign to each mattress a unit identification (number, letter, or date, or combination thereof) sufficient to identify and relate to the production unit of which the mattress is a part. Such unit identification shall be designated in such a way as to indicate that it is a production unit identification under the Standard for the Flammability of Mattresses. Each mattress subject to the Standard shall bear a permanent, accessible, and legible label containing the appropriate production unit identification relating to such mattress.

(4) The information required on labels by this section shall be set forth separately from any other information appearing on such label. Other information, representations, or disclosures, appearing on labels required by this section or elsewhere on the item, shall not interfere with, minimize, detract from, or conflict with the required information.

(5) The warning label required by § 1632.5(c)(3) for noncomplying mattresses manufactured during the 6 months following the effective date of the Standard shall be separate and apart from any other label on the mattress and shall not have any other information, representation, or disclosure thereon.

(6) No person, other than the ultimate consumer, shall remove or mutilate, or cause or participate in the removal or mutilation of, any label required by this section to be affixed to any item.

(c) *Records—manufacturers, importers, or persons initially introducing items into commerce.*—(1) *General.* Every manufacturer, importer, or other person initially introducing into commerce mattresses subject to the Standard, irrespective of whether guarantees are issued relative thereto, shall maintain written records as hereinafter specified. The records required must establish a line of continuity through the process of manufacture of each mattress and from the specific finished item to the manufacturing records and shall show with respect to such items:

(i) Details, description, and identification of any sampling plan or plans engaged in pursuant to the requirements of the Standard. Such records must be sufficient to demonstrate compliance with such sampling plan or plans and must relate the sampling plan or plans to the actual mattresses produced, marketed, or handled. This subdivision is not limited by other provisions of this paragraph.

(ii) Production units of all mattresses marketed or handled. The records must relate to an appropriate production unit identification on or affixed to the mattress itself in accordance with paragraph (b)(3) of this section, and the production unit identification must relate to the production unit.

(iii) Test results and details of all tests performed, both prototype and production, including cigarette locations and whether each cigarette location passed or failed, details of the sampling procedure or procedures employed, name and signature of person conducting tests, date of tests, and all other records necessary to demonstrate compliance with the test procedure or procedures and sampling plan or plans specified by the Standard or authorized alternate sampling plan or plans. These records shall include a certification by the person overseeing the testing as to the test results and that the test was carried out in accordance with the Standard. (For illustrative forms, see note at the end of this section.)

(iv) Disposition of all failing or rejected mattresses. Such records must demonstrate that the items were retested and reworked in accordance with the Standard prior to sale or distribution and that such retested or reworked mattresses comply with the Standard, or must otherwise show the disposition of such items.

(v) Manufacturing specifications relating the same to prototype and production testing and to the production units to which applicable.

(vi) Test data or other information relied on as a basis for inclusion of different components as a single production unit where permitted by the Standard.

(vii) Photographic evidence of each test result in the form of a photograph (color or black and white) of the bare mattress surface after testing, with a clear designation thereon as to which part of the mattress was sheeted and which part was tested bare.

(viii) Date and quantity of each sale or delivery of mattresses subject to the Standard and the name and address of the purchaser or recipient relating such sale to the production unit or other identification.

(ix) Details of any approved alternate laundering procedure used in laundering mattress pads required by the Standard to be laundered during testing.

(x) Identification, composition, and details of application of any flame retardant treatments employed relative to mattress pads or mattress pad components. All prototype and production records shall relate to such information.

(2) *Prototype testing.* In addition to the records specified in paragraph (c)(1) of this section, records shall be maintained which shall show with respect to prototype testing required by the Standard:

(i) Mattress specifications and description.

(ii) Prototype identification number.

(iii) Test room conditions.

(3) *Production testing.* In addition to the records required by paragraph (c)(1) of this section, records shall be maintained which shall show with respect to each production unit:

(i) Mattress specifications and description, prototype identification, production unit identification, size of production unit, calendar period of production unit, test date, and test results.

(ii) Random selection number of the tested mattress and information sufficient to show that tested mattresses were selected from the production unit at random from regular production.

(iii) Written data which will enable the Consumer Product Safety Commission to obtain and test mattresses under any applicable compliance market sampling plan.

(4) *Record retention requirements.* The records required by this paragraph shall be retained for 3 years, except that records relating to prototype testing shall be maintained for so long as they are relied upon as demonstrating compliance with the prototype testing requirements of the Standard and shall be retained for 3 years thereafter.

(d) *Records—persons not subject to paragraph (c) of this section.* Any person not subject to paragraph (c) of this section who markets or handles mattresses subject to the Standard shall keep and retain for 3 years records to show the identity of items marketed or handled, the identity of the source of the items, and the date of receipt thereof. Such records shall also show the identity of purchasers and the date of sale, except in the case of individual retail sales to individual ultimate consumers.

(e) *Records—exempted or labeled mattresses.*—(1) Any person marketing or handling mattresses which are entitled to exemption from the Standard as having been manufactured before the effective date of the Standard (June 22, 1973) shall maintain written records sufficient to establish that any such mattresses offered for sale after the effective date of the Standard are eligible for the exemption.

(2) Any person marketing or handling mattresses which are subject to the provisions of § 1632.5(c)(3), and which are labeled in accordance therewith, shall maintain written records to show that such mattresses were manufactured within 6 months after the effective date of the Standard and were labeled in accordance with the provisions of § 1632.5(c)(3).

(f) *Tests for guaranty purposes.* Reasonable and representative tests for the purpose of issuing a guaranty under section 8 of the act for items subject to the Standard shall be those tests performed pursuant to any sampling plan or authorized alternate sampling plan engaged in pursuant to the requirements of the Standard.

(g) *Postponement of production testing.* (1) Any person requesting a temporary suspension of production testing shall file five copies of an application in writing and under oath with the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Such application of prototype mattress or mattresses.

(i) Statement that production testing facilities are unavailable and reason for unavailability.

(ii) Location of closest available testing facility.

(iii) Period of delay requested.

(iv) Detailed plans of applicant to implement production testing procedures.

(v) Certification that prototype mattress or mattresses to be produced comply with the Standard plus test reports, name and address of facility performing the tests, and specification and identification of prototype mattress or mattresses.

(vi) Statement that records and facilities of the applicant are available to the Consumer Product Safety Commission upon request.

(2) Temporary suspension of production testing will not be granted for a period in excess of 6 months upon one application. Upon filing of the application, the requirements for production testing of mattresses may be suspended by the Consumer Product Safety Commission for periods of 30 days while the petition is pending. During such 30-day periods the manufacturer shall submit to the Secretary, weekly reports of mattress shipments as specified by the Commission.

(h) *Compliance with this section.* No person subject to the Flammable Fabrics Act shall manufacture, import, distribute, or otherwise market or handle any mattress which is not in compliance with § 1632.31.

NOTE: The following forms are for use in recording test results pursuant to the Standard and this section. These are illustrative forms only; their use shall not be construed as relieving anyone of other recordkeeping requirements of this section.

EFFECTIVE DATE: This section became effective December 31, 1973.

Subpart D—Interpretations and Policies

AUTHORITY: Secs. 1–17, 67 Stat. 111–15, as amended, 81 Stat. 568–74; 15 U.S.C. 1194–1204.

§ 1632.61 Procedure for verification of materials substitution for mattress tape edges.

(a) Notice is given that the Consumer Product Safety Commission has approved a procedure for verification of materials substitution for mattress tape edges where substitution is desired to be made under § 1632.1(h) of FF 4–72 (the Standard for the Flammability of Mattresses), FF 4–72 was published in the FEDERAL REGISTER of June 8, 1973 (38 FR 15095), and, as a result of a judicially imposed temporary stay, became effective June 22, 1973.

(b) Section 1632.1(h) provides in part: "If it is determined or suspected that a material has influenced the ignition resistance of the mattress prototype, a dimensional or other change in that material shall be deemed a difference in materials for purposes of prototype definition unless it is previously shown to the satisfaction of the Consumer Product Safety Commission that such dimensional or other change will not reduce the ignition resistance of the mattress prototype."

(c) The Commission will regard a showing "to the satisfaction of the Consumer Product Safety Commission" to have been made with respect to materials substitution of items such as flange materials and tapes at the tape edge under the following circumstances:

(1) The mattress prototype has been qualified previously under the provisions of FF 4–72; and

(2) A substitution of materials involving only tape edge construction is contemplated; and

(3) A prototype mattress incorporating the substitute materials has been tested with 36 cigarettes (18 per surface) placed at tape edge locations with no ignitions occurring; and

(4) Records are maintained setting forth the details of the materials substitution and showing the results of the testing referred to in paragraph (c)(3) of this section. The records are to be maintained in accordance with regulations established by the Consumer Product Safety Commission (see § 1632.31).

§ 1632.62 Use of muslin sheets.

(a) In this document, the Consumer Product Safety Commission approves the use of white, 100 percent cotton muslin sheets as an alternate to white, 100 percent cotton percale sheets for certain tests of mattress flammability.

(b) The Standard for the Flammability of Mattresses, FF–4–72 (Subpart A of this Part), promulgated under the Flammable Fabrics Act (15 U.S.C. 1191 et seq.), which is administered and enforced by the Consumer Product Safety Commission, provides that one of the measures of mattress flammability will be determined by placing lighted cigarettes between two layers of cotton percale sheets placed on mattress surfaces (§ 1632.4(d)(3)). Section 1632.4(b)(6), entitled "Sheet selection," specifies the types of sheets to be used in mattress flammability testing as follows:

> The sheets shall be white, 100 percent combed cotton percale, not treated with a chemical finish which imparts a characteristic such as permanent press or flame resistance, with 170–200 threads per square inch and fabric weight of 115± 14 gm/m² (3.4±0.4 oz/yd²), or of another type approved by the Consumer Product Safety Commission. Size of sheet shall be appropriate for the mattress being tested.

(c) A number of requests, both formal and informal, have been received to have the Commission approve alternate types of sheets for mattress flammability testing. The primary reason for requesting alternatives is that sheet manufacturers have drastically reduced their output of all-cotton percale sheets and therefore a permanent testing substitute is needed. The Commission has confirmed the difficulty of obtaining all-cotton percale sheets.

(d) Several different types of sheets have been tested and evaluated to find a type that would provide flammability characteristics closely resembling all-cotton percale sheets. It was found that 100 percent cotton muslin sheets yielded test results comparable to those from 100 percent cotton percale sheets; that is, a lighted cigarette placed between all-cotton muslin sheets caused mattress ignition within a time period comparable to ignition resulting from tests using all-cotton percale. Both all-cotton muslin and all-cotton percale brought mattress ignition 100 percent of the time and within 15 minutes.

(e) Placing lighted cigarettes between any types of cotton-polyester blend sheets caused mattress ignition after considerably longer time periods, or in some instances, no ignition at all. Thus, their use without other modifications of the Standard would result in lowering the level of protection provided by the Standard.

(f) Accordingly, the Commission approves the following sheets for use in testing under the Standard: White, 100 percent cotton sheets, not treated with a chemical finish which imparts a characteristic such as permanent press or flame resistance, with 120–210 threads per square inch and fabric weight of 125±28 gm/m² (3.7±0.8 oz/yd²).

(g) For enforcement purposes, the Commission may test with sheets of 100 percent cotton muslin or 100 percent cotton percale.

(h) All other requirements of the Standard as to sheets remain in effect.

EFFECTIVE DATE: February 6, 1974. This document originally appeared as a notice on February 6, 1974 (39 FR 4684).

§ 1632.63 Policy clarification on renovation of mattresses.

(a) Section 3 of the Flammable Fabrics Act (15 U.S.C. 1192) prohibits, among other matters, the "manufacture for sale" of any product which fails to conform to an applicable standard issued under the act. The Standard for the Flammability of Mattresses, as amended (FF 4–72) (Subpart A of this Part), issued pursuant to the act, provides that, with certain exceptions, mattresses must be tested according to a prescribed method. The standard does not exempt renovation; nor does it specifically refer to renovation.

(b) The purpose of this document is to inform the public that mattresses renovated for sale are considered by the Commission to be mattresses manufactured for sale and, therefore, subject to the requirements of the Mattress Standard. The Commission believes that this policy clarification will better protect the public against the unreasonable risk of fires leading to death, personal injury or significant property damage, and assure that purchasers of renovated mattresses receive the same protection under the Flammable Fabrics Act as purchasers of new mattresses.

(c) For purposes of this document, mattress renovation includes a wide range of operations. Replacing the ticking or batting, stripping a mattress to its springs, rebuilding a mattress, or replacing components with new or recycled materials, are all part of the process of renovation. Any one, or any combination of one or more, of these steps in mattress renovation is considered to be mattress manufacture.

(d) If the person who renovates the mattress intends to retain the renovated mattress for his or her own use, or if a customer of a renovator merely hires the services of the renovator and intends to take back the renovated mattress for his or her own use, "manufacture for sale" has not occurred and such a renovated mattress is not subject to the mattress standard.

(e) However, if a renovated mattress is sold or intended for sale, either by the renovator or the owner of the mattress who hires the services of the renovator, such a transaction is considered to be "manufacture for sale".

(f) Accordingly, mattress renovation is considered by the Commission to be "manufacture for sale" and, therefore, subject to the Mattress Standard, when renovated mattresses are sold or intended for sale by a renovator or the customer of the renovator.

(g) Renovators of mattresses, like manufacturers, work with mattresses of nonstandard size or shape and may, therefore, believe that such mattresses are one-of-a-kind. Section 1632.2(d) of the Mattress Standard provides:

> (d) One-of-a-kind mattresses, such as nonstandard sizes or shapes, may be excluded from testing under this standard pursuant to rules and regulations established by the Consumer Product Safety Commission.

(h) However, there are currently no rules or regulations for excluding one-of-a-kind mattresses from testing under the Mattress Standard, although the matter is under active review. Until Commission policy on one-of-a-kind mattress exemption is issued, a renovator who believes that certain mattresses are entitled to one-of-a-kind exemption, may present relevant facts to the Commission and petition for an exemption. Renovators are expected to comply with all the testing requirements of the Mattress Standard until an exemption is approved.

NOTE: This policy was originally published as a notice on May 6, 1975 (40 FR 19677).

Dated: December 22, 1975.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

ENVIRONMENTAL PROTECTION AGENCY

■

HAZARDOUS SUBSTANCES

Designation, Removability, Harmful Quantities, Penalty Rates

V40250 DEC 30 75 XUM

ENVIRONMENTAL PROTECTION AGENCY
(FRL 471-7)
[40 CFR Part 116]

DESIGNATION OF HAZARDOUS SUBSTANCES

Notice of Proposed Rulemaking

Notice is hereby given in accordance with 5 U.S.C. 553 that the Administrator, Environmental Protection Agency, under authority contained in Section 311(b)(2)(A) of the Federal Water Pollution Control Act Amendments of 1972 [33 U.S.C. 1251 et seq., (the Act)] proposes a new Part 116.

The Federal Water Pollution Control Act Amendments of 1972 (P.L. 92-500) amended the Federal Water Pollution Control Act (33 U.S.C. 1151 et seq.) to add a new Section 311, which provides in Subsection (b)(2)(A) as follows:

> "The Administrator shall develop, promulgate, and revise as may be appropriate, regulations designating as hazardous substances, other than oil as defined in this section, such elements and compounds which, when discharged in any quantity into or upon the navigable waters of the United States or adjoining shorelines or the waters of the contiguous zone, present an imminent and substantial danger to the public health or welfare, including, but not limited to, fish, shellfish, wildlife, shorelines, and beaches."

This notice proposes such a designation of hazardous substances.

Section 311(b)(2)(B)(i) and 311(b)(4) of the Act require a determination of actual removability and harmful quantity respectively for each designated substance. In addition, Section 311(b)(2)(B)(iv) of the Act requires the establishment of penalty rates for all substances judged to be not actually removable from the water. These other regulations are proposed concurrently as 40 CFR Parts 117, 118, and 119 respectively.

The designation of hazardous substances provides the foundation for the regulation of discharges of substances other than oil as provided for in Section 311. Remaining regulations and activities required to fully implement the hazardous substances provisions of Section 311 are as follows:

- Fixing limitations of removal liability for small facilities [Section 311(f)(2)].
- Determination of methods of removability [Section 311(j)(1)(A)].
- Development of discharge prevention procedures [Section 311(j)(1)(C)].
- Determination of quantities which are not harmful [Section 311(b)(3)].
- Revision of the National Oil and Hazardous Material Pollution Contingency Plan [Section 311(c)(2)].

On August 22, 1974, after completion of studies and conferences dating from 1970, the Assistant Administrator for Water and Hazardous Materials published an Advance Notice of Proposed Rulemaking for the designation of hazardous substances and the determination of their removability (Federal Register, Vol. 39, No. 164, Part IV, pp. 30466-30471). Included in that publication were: (1) tentative selection criteria used to quantitatively describe the concept of "... imminent and substantial danger to public health or welfare..."; (2) factors considered in the determination of actual removability; (3) a list of substances under consideration; (4) a tentative determination of removability; and (5) a request for data

and comments on both specific and general aspects of the action. In response to the Advance Notice, 84 written comments were received and considered in the development of the proposed rule set forth herein. Comments primarily concerned selection criteria, substances to be deleted or added, spill potential, toxicity information, potential conflict between discharges regulated under Section 311 and those regulated under other sections of the Act, and the term "research quantities".

A. Toxicological Selection Criteria

Tentative selection criteria set forth in the August 22, 1974, Advance Notice were as follows:

> "1. Any element or compound produced in excess of research quantities possessese sufficient danger potential to be considered as a candidate hazardous substance if it is lethal to: (a) One-half of a test population of aquatic animals in 96 hours or less at a concentration of 500 milligrams per liter (mg/l) or less; or (b) one-half of a test population of animals in 14 days or less when administered as a single oral dose equal to or less than 50 milligrams per kilogram (mg/kg) of body weight; or (c) one-half of a test population of animals in 14 days or less when dermally exposed to an amount equal to or less than 200 mg/kg body weight for 24 hours; or (d) one-half of a test population of animals in 14 days or less when exposed to a vapor concentration equal to or less than 200 cubic centimeters per cubic meter (volume/volume) in air for one hour; or (e) aquatic flora as measured by a 50 percent decrease in cell count, biomass, or photosynthetic ability in 14 days or less at concentrations equal to or less than 100 mg/l.
> 2. To be further considered for designation as a hazardous substance, any element or compound meeting the above criteria must have a reasonable potential for being discharged; i.e., spilled into a water body. Factors being considered in making this evaluation include the production quantities, modes of transportation, handling and storing practices, past spill experience, and physical/chemical properties of each substance."

Selection criteria were employed and are proposed to be used because it was recognized that virtually every substance has the potential for presenting some danger to public health or welfare depending upon the

quantity of substance discharged, and the time, location, and conditions of the discharge. In order to limit the designation to those substances which could reasonably be anticipated to present an imminent and substantial danger to public health or welfare, the above criteria were applied.

Of the toxicological criteria initially proposed in the Advance Notice, there was minimal objection to the use of the "highly toxic" classification as a limitation for selecting substances based on mammalian test data. The highly toxic classification has been adopted by the Environmental Protection Agency as may be found in Federal Register, Vol. 40, No. 139, Part II, pp. 28242-28286, July 3, 1975.

According to the reference cited above, substances which have an oral LD50 of 50 mg/kg of body weight or less, have a dermal LD50 of 200 mg/kg of body weight or less, or have an inhalation LC50 of 20 cubic centimeters per cubic meter of vapor in air or less, are defined as highly toxic to mammals. The term "oral LD50" means that single oral dose which is lethal to one-half of the test population in 14 days. The term "dermal LD50" means that dose dermally absorbed in 24 hours which is lethal to one-half of the test population in 14 days. The term "inhalation LC50" means that concentration of gas or vapor which, upon exposure for one hour, is lethal to one-half of the test population in 14 days.

A change in the "inhalation LC50" value should be noted. The August 22, 1974, Advance Notice of Proposed Rulemaking stated this criterion as lethality to one-half of a test population of animals within

14 days of exposure to a vapor concentration "... equal to or less than 200 cubic centimeters per cubic meter (volume/volume) of air for one hour..." This criterion paralleled the "highly toxic" category adopted by EPA in 40 CFR Part 182.8. The criterion has recently (July 3, 1975) been amended by publication of 40 Federal Register p. 28242, which reduces the cutoff to 20 cubic centimeters per cubic meter of air. For consistency, a corresponding change has been made in this proposed rule. (No change need be made in the current list of materials since none happens to have been designated under the "inhalation LC50" criterion.)

The criterion receiving the greatest number of adverse comments was that pertaining to aquatic animal toxicity which proposed a selection limit of 500 mg/l based on LC50 bioassay data. The term "LC50" means that concentration which is lethal to one-half of a test population of aquatic animals upon continuous exposure for a given period of time, usually 96 hours. The concept of utilizing acute bioassay data was generally supported. However, many commenters expressed the belief that the limitation was either too restrictive or too permissive, with suggested limitation values ranging between 1.0 and 5,000 mg/l.

A common suggestion was that the selection limit be lowered to 100 mg/l. In support of this suggested limit, comments indicated that a hazard ranking system has classified substances with aquatic LC50 values of 100-1,000 mg/l as "practically non-toxic". This system is being considered by governments ratifying the International Convention for the Prevention of Pollution from Ships, 1973, sponsored by the

Intergovernmental Maritime Consultative Organization (IMCO). However, the IMCO system was originally designed for application to tank cleaning and operational discharges from ships at sea beyond the territorial limits, rather than to discharges to the inland waters and the territorial seas. Even though substances with LC50 values of 100 to 1,000 mg/l have been classified as "practically non-toxic", the IMCO system does require some level of control over the discharge of these substances even in waters beyond the territorial seas.

Furthermore, the Agency has evaluated recent fish kill reports in which the causative agent was identified. Twenty-two of the proposed elements and compounds were reported as the causative agent in recent fish kills. Of these, seven have 96 hour LC50 values greater than 100 mg/l. None has an LC50 value consistently greater than 500 mg/l. Thus, a reduction of the aquatic toxicity selection limit to 100 mg/l would result in the deletion of 7 substances which have caused environmental damage. Even though the data used in this analysis are recognized as being less than comprehensive, the significance in lowering this selection criterion would be the elimination of materials such as sulfuric acid, hydrochloric acid, and other materials which have caused fish kills.

In this proposed rulemaking, the aquatic toxicity selection limit of 500 mg/l is maintained. This is done in the belief that it is both appropriate and responsive to the requirement of Section 311 to identify those substances which may present an imminent and substantial danger to the public health or welfare when discharged into navigable waters.

The selection criterion dealing with phytotoxicity was questioned because few data are available which are consistent with the test method specified in the selection criterion. Although no substance is currently listed because of its phytotoxic action, the criterion is maintained to permit future addition of substances which may be detrimental to this important segment of the aquatic environment.

Selection criteria based on effects such as teratogenicity, mutagenicity, carcinogenicity, and bioaccumulation were suggested and have been considered. Typically, these effects have been noted after lengthy or lifetime exposure of test populations to the test material. These data do not, at this time, provide a basis for regulation of acute discharges of such materials. Although the proposed selection criteria do not include consideration of such effects at this time, the Agency intends to keep the relationship of Section 311 to these concerns under continuing review.

Radioactive materials are not included in this proposed rulemaking but may be considered as candidates for designation in the future should sufficient need and information warrant their inclusion.

B. Deletions

In response to the Advance Notice of Proposed Rulemaking, comments requesting the deletion of specific materials were submitted and evaluated. Where accompanied by appropriate supportive data documenting effects not in accordance with the proposed selection criteria, certain materials have been deleted from this proposed list. These materials are:

Ammonium sulfate	Sodium borate
Boric acid	Sodium cacodylate
Cacodylic acid	Sodium silicate

Those comments requesting specific substances be added lacked supporting data of the type and extent necessary to justify expansion of the proposed list at this time. Section 311(b)(2)(A) provides the authority to revise any promulgated designation as may be appropriate. Those substances suggested for addition may be considered along with others at a future date.

C. Potential for Discharge

In regard to the second part of the proposed selection criteria, that dealing with the potential for discharge, several comments requesting clarification were received. The Agency has reexamined the factors listed in the Advance Notice and proposes certain changes.

As set forth in the Advance Notice, the initial screening criterion concerned production of proposed substances in excess of research quantities. It now appears that the question of research quantity is more appropriately viewed as a factor to be utilized in the overall evaluation of spill potential rather than an independent decision point. Difficulty is encountered in identifying a single, specific production quantity indicative of large volume commercial usage versus exclusively research-related use. Consequently, the question of research quantity is now addressed in terms of uses rather than in terms of a specific production volume.

Few data are available concerning the mode of transportation and handling and storage practices of many substances. Therefore, these considerations are no longer included in the assessment of potential for discharge. Factors currently proposed in determining spill potential are:

1. Past history of spillage
2. Production quantity
3. Use and distribution patterns
4. Value of the substance

Candidate substances which meet at least one lethality criterion are further examined for documented evidence of having been discharged in a spill situation. Those substances having a previous history of spillage are maintained as proposed hazardous substances. Because the reporting of spills of substances other than oil is not yet required, it can be concluded that the spillage of many substances has gone unreported. Consequently, those spills presently recorded do not fully represent the magnitude of the problem nor are they an inclusive representation of all substances which have a reasonable potential for discharge.

In evaluating the list of potentially hazardous chemicals, it was realized that a higher probability of a discharge exists for some materials than for others. This is reflected to some extent by reports maintained by the Department of Transportation and the Environmental Protection Agency. These records show that the materials spilled most frequently are, in general, the ones that are most abundant in commerce. That is, a distinction may be made between heavy usage bulk chemicals

and other less widely used and distributed chemicals. An analysis of production quantities, usage, and selling price indicates that chemicals produced in excess of one billion pounds annually are commonly used in highly diversified products and processes. As such, they are handled and transported in large quantities. Such chemicals also have a typically low selling price. Accordingly, candidate substances produced in excess of one billion pounds per year are judged to have a relatively high spill potential and are proposed for designation as hazardous substances.

Materials which are produced in quantities less than one billion pounds annually or for which annual production is not known, are further examined for use and distribution patterns, and unit price. Substances with usages limited to research, medicinals, food additives, or analytical reagents are not further considered for designation at this time. These materials are subject to limited production and bulk storage and transport. It is further noted that such substances are generally of high purity and as such are subject to careful handling and have a high selling price. Such substances are believed to pose only limited potential for spillage.

Substances having a high commercial market value are considered to pose a limited spill risk. Additional safeguards in the manufacture, handling, and processing of such valuable substances apparently minimize the possibility of spillage.

Because of their intentional use and distribution in the environment, chemicals used primarily as pesticides are believed to have a high prob-

ability of discharge to the water and are maintained as proposed hazardous substances regardless of production volume or selling price.

As an example of a material proposed for designation, sulfuric acid is the highest volume product in the chemical industry with 59 billion pounds produced in 1971. As a workhorse of industry, its production and use are steadily increasing. Department of Transportation and Environmental Protection Agency records show a continual increase in accidents involving sulfuric acid through the years 1971, 1972, and 1973. The low cost of the material, the large number of manufacturers and distributors, and high production and transportation volume are apparent contributive factors to the high spill frequency. Since toxicological properties are in accordance with proposed selection criteria, sulfuric acid is proposed for designation as a hazardous substance.

An example of a material not proposed as a hazardous substance because of low spill potential is ammonium gluconate. This compound was tentatively included in the Advance Notice list because of toxic properties of the ammonium ion. Subsequent analysis reveals that production figures are not available, the chemical has only limited distribution and use as an emulsifier in the food industry, and no record of past spillage. The analysis indicates low spill potential and the substance is no longer considered for designation.

Other substances listed in the Advance Notice and below appear to have little probability for discharge and are deleted because of one or more of the following factors:

1. No history of spill discharge
2. Low production quantity
3. Limited commercial use and distribution
4. High value of the substance

D. Materials Deleted Because of Low Potential for Discharge

Ammonium Ferrocyanide	Cobaltous Nitrate
Ammonium Formate	Cobaltous Perchlorate
Ammonium Gluconate	Cobaltous Succinate
Ammonium Molybdate	Cobaltous Sulfate
Antimony Triiodide	Cupric Acetylacetonate
Arsenic Tribromide	Cupric Bromide
Arsenic Trifluoride	Cuprie Gluconate
Arsenic Triiodide	Cuprous Iodide
Beryllium Hydroxide	Ferric Glycerophosphate
Beryllium Phosphate	Ferric Phosphate
Beryllium Sulfate	Ferrous Oxalate
Brucine	Hydroquinone
Cadmium Fluoborate	Lead Bromide
Cadmium Nitrate	Lithium Fluoride
Cadmium Sulfate	Mercuric Ammonium Chloride
Catechol	
Chromous Carbonate	Mercuric Bromide
Chromous Oxalate	Mercuric Chloride
Cobaltous Acetate	Mercuric Iodide
Cobaltous Chloride	Mercuric Oxide
Cobaltous Citrate	Mercurous Chloride
Cobaltous Iodide	Mercurous Iodide

Molybdic Trioxide	Selenic Acid
Nickel Acetate	Selenium Oxychloride
Nickel Bromide	Tannic Acid
Nickel Fluoride	Vanadium Oxytrichloride
Nickel Iodide	Zinc Ammonium Sulfate
Nickel Perchlorate	Zinc Permanganate
Phosphorous Pentafluoride	Zinc Propionate
Pyrogallic Acid	Zirconium Ammonium Fluoride

In summary, the proposed selection criteria for hazardous substances are as follows: any element, compound, or mixture thereof, possesses sufficient danger potential to be designated as a hazardous substance, if it is lethal to:

(a) One-half of a test population of aquatic animals in 96 hours or less at a concentration of 500 milligrams per liter (mg/l) or less; or

(b) One-half of a test population of animals in 14 days or less when administered as a single oral dose equal to or less than 50 milligrams per kilogram (mg/kg) of body weight; or

(c) One-half of a test population of animals in 14 days or less when dermally exposed to an amount equal to or less than 200 mg/kg of body weight for 24 hours; or

(d) One-half of a test population of animals in 14 days or less when exposed to a vapor concentration equal to or less than 20 cubic centimeters per cubic meter (volume/volume) in air for one hour; or

(e) Aquatic flora as measured by a 50% decrease in cell count, biomass, or photosynthetic ability in 14 days or less at concentrations equal to or less than 100 milligrams per liter (mg/l).

In addition to meeting one or more of the above acute lethality criteria, a candidate substance must have a reasonable potential for being discharged. Factors considered in making this evaluation include 1) past spill history, 2) production quantity, 3) use and distribution patterns, and 4) value of the substance.

E. Applicability

In considering the applicability of the proposed rules, the Advance Notice stated:

> "It is important to note that not all discharges of substances designated as hazardous will be subject to the enforcement provisions of Section 311. Because Section 311 applies only to discharges from vessels or facilities, a designation regulation would not apply to discharges from other sources such as agricultural land runoff, or irrigation return flows. The discharges being considered can be placed in two separate categories. The first relates to transportation and storage incidents in which there is normally no release of the substance except in the spill situation. The second relates to industrial production facilities in which a designated hazardous substance is released in quantities exceeding those of a permitted normally operating effluent. Periodic or continuous discharges are regulated under other provisions of the Act. Accordingly, the Agency is considering that the regulation would exclude from designation discharges of hazardous substances which are made: (a) In compliance with effluent limitations or guidelines established under Sections 301, 302, 304, 306, and 307 of the Act; (b) in quantities not exceeding those identified for such substances in an application for an NPDES permit which has been issued pursuant to Section 402 of the Act; (c) in compliance with permits issued under Section 404 of the Act or Sections 102 and 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1401 et seq.); (d) from properly functioning marine sanitation flow-through devices certified by the United States Coast Guard pursuant to Section 312 of the Act; or (e) in the course of a permitted use of a pesticide registered under the Federal Insecticide,

Fungicide, and Rodenticide Act (7 U.S.C. Sections 136 and through 136y)."

Although most comments agreed with the general purpose, the exclusions are now considered more appropriate to the proposed rules concerning harmful quantities (proposed 40 CFR Part 118) and rates of penalty (proposed 40 CFR Part 119) to be published concurrently. The intent is not the exclusion of substances from designation, but rather the exclusion of certain discharges permitted under other sections of the Act or other authorities from notification requirements and penalty provisions of Section 311. This will allow use of revolving funds [Section 311(k)] to be used for discharges of any designated hazardous substance. Consequently, applicability of this proposed rule may be stated as follows:

> The elements and compounds, or mixtures thereof, appearing on the following list are designated as hazardous substances if discharged into navigable waters or adjoining shorelines, or into the waters of the contiguous zone from vessels, onshore facilities or offshore facilities.

Interested persons may participate in this rulemaking by submitting written comments or requests for information in triplicate to: Dr. C. Hugh Thompson, Chief, Hazardous Substances Branch, Criteria and Standards Division, Office of Water Planning and Standards, WH-595, Environmental Protection Agency, Washington, D.C. 20460.

Copies of all public comments will be available for inspection and copying at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M St., S.W., Washington, D.C. 20460. The Environmental Protection Agency information regulation, 40 CFR Part 2 provides that a reasonable fee may be charged for copying.

All comments received on or before 60 calendar days after the date of this publication will be considered.

Executive Order 11821 (November 27, 1974) requires that major proposals for legislation and promulgation of regulations and rules by agencies of the Executive Branch be accompanied by a statement certifying that the inflationary impact of the proposal has been evaluated.

A number of criteria have been defined to determine which actions require an inflationary impact statement. The Agency's analysis of the potential economic impact of these regulations indicate that none of the criteria defining a major proposal have been met. Thus, it is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order 11821 and that no inflationary impact statement is required.

Part 116 - DESIGNATION OF HAZARDOUS SUBSTANCES

116.1 Applicability
116.2 Abbreviations
116.3 Definitions
116.4 Designation of Hazardous Substances

Authority: Sections 311(b)(2)(A) and 501(a) of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1251 et seq.).

116.1 APPLICABILITY

The regulation of this part designates hazardous substances under Section 311(b)(2)(A) of the Act. The proposed regulation applies to discharges of substances designated herein into navigable waters or adjoining shorelines or the waters of the contiguous zone from vessels and onshore and offshore facilities.

116.2 ABBREVIATIONS

ppm = parts per million
mg = milligram(s)
kg = kilogram(s)
mg/l = milligram(s) per liter
mg/kg = milligram(s) per kilogram

116.3 DEFINITIONS

As used in this part, all terms shall have the meaning defined in the Act and as given below.

"The Act" means the Federal Water Pollution Control Act, as amended by the Federal Water Pollution Control Act Amendments of 1972, (P.L. 92-500, 33 U.S.C. 1251 et seq.);

"Vessel" means every description of watercraft or other artificial contrivance used, or capable of being used, as a means of transportation on water other than a public vessel;

"Onshore facility" means any facility (including, but not limited to, motor vehicles and rolling stock) of any kind located in, on, or under, any land within the United States other than submerged land;

"Offshore facility" means any facility of any kind located in, on, or under, any of the navigable waters of the United States other than a vessel or a public vessel;

"Navigable waters" shall have the same meaning as it has in Section 502(7) of the Act, and includes: (1) all navigable waters of the United States; (2) tributaries of navigable waters of the United States; (3) interstate waters; (4) intrastate lakes, rivers and streams which are utilized by interstate travelers for recreational and other purposes; (5) intrastate lakes, rivers and streams from which fish or shellfish are taken and sold in interstate commerce; and (6) intrastate lakes, rivers, and streams which are utilized for industrial purposes by industries in interstate commerce;

"Contiguous zone" means the entire zone established or to be established by the United States under article 24 of the Convention of the Territorial Sea and the Contiguous Zone;

"Territorial seas" means the belt of the seas measured from the line of ordinary low water along that portion of the coast which is in direct contact with the open sea and the line marking the seaward limit of inland waters, and extending seaward a distance of three miles;

"Aquatic animals" means appropriately sensitive wholly aquatic animals which carry out respiration by means of a gill structure permitting gaseous exchange between the water and the circulatory system;

"Animals" means appropriately sensitive animals which carry out respiration by means of a lung structure permitting gaseous exchange between air and the circulatory system;

"Aquatic flora" means plant life associated with the aquatic ecosystem including, but not limited to, algae and higher plants;

"Mixture" means any combination of two or more elements and/or compounds in solid, liquid or gaseous form.

116.4 DESIGNATION OF HAZARDOUS SUBSTANCES

The following criteria were employed in the derivation of the list and may be used in any future revisions thereof.

Any element or compound or structural isomer which is lethal to:

(a) one-half of a test population of aquatic animals in 96 hours or less at a concentration of 500 mg/l (ppm) or less; or

(b) one-half of a test population of animals in 14 days when administered as a single oral dose equal to or less than 50 mg/kg of body weight; or

(c) one-half of a test population of animals in 14 days when dermally exposed to an amount equal to or less than 200 mg/kg of body weight for 24 hours; or

(d) one-half of a test population of animals in 14 days or less when exposed to a vapor concentration equal to or less than 20 cubic centimeters per cubic meter of air for one hour; or

(e) aquatic flora as measured by a 50% decrease in cell count, biomass, or photosynthetic ability in 14 days or less at concentrations equal to or less than 100 mg/l (ppm);

is a candidate for designation as a hazardous substance.

After satisfying the toxicity screen a determination is made that the candidate material has a reasonable potential for discharge as determined by: 1) past record of discharge; 2) production volume; 3) use and distribution patterns; and 4) selling price; and is therefore proposed as a hazardous substance.

The elements, compounds or their structural isomers, or mixtures thereof, appearing on the following Table 116.4, are designated as hazardous substances if discharged into navigable waters or adjoining shorelines or into the waters of the contiguous zone from vessels, onshore facilities or offshore facilities.

TABLE 116.4 LIST OF HAZARDOUS SUBSTANCES

The substances which are indented in the left hand column of the following list are designated as hazardous substances on the basis of toxicological properties of one component ion or group. Toxicological criteria met by each substance are denoted by the number on the left of the common name according to the following key:

1 = aquatic animal toxicity
2 = oral mammalian toxicity
3 = dermal mammalian toxicity
4 = inhalation mammalian toxicity
5 = phytotoxicity

The underlined headings in the list are provided only for ease of referencing and are not designated hazardous substances; e.g., Fluorine compounds does not mean that all fluorine compounds are designated as hazardous substances.

	COMMON NAME	SYNONYMS	ISOMERS
1	Acetaldehyde	ethanal ethyl aldehyde aldehyde acetic aldehyde	
1	Acetic acid	glacial acetic acid vinegar acid	
1	Acetic anhydride	acetic oxide acetyl oxide

ENVIRONMENTAL PROTECTION AGENCY
(FRL 471-8)
[40 CFR Part 117]

DETERMINATION OF REMOVABILITY
OF HAZARDOUS SUBSTANCES

Notice of Proposed Rulemaking

Notice is hereby given in accordance with 5 U.S.C. 553 that the Administrator, Environmental Protection Agency, pursuant to the authority contained in Section 311(b)(2)(B)(i) of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1251 et seq.), proposes a new Part 117.

The Federal Water Pollution Control Act Amendments of 1972 (P.L. 92-500) amended the Federal Water Pollution Control Act of 1970 (33 U.S.C. 1151 et seq.) to add a new Section 311, which provides in Subsection (b)(2)(B)(i) as follows:

> "The Administrator shall include in any designation under subparagraph (A) of this subsection a determination whether any such designated hazardous substance can actually be removed."

In this notice, the Administrator proposes a determination of the actual removability of substances proposed (40 CFR Part 116) under Section 311(b)(2)(A).

On August 22, 1974, the Assistant Administrator for Water and Hazardous Materials published an Advance Notice of Proposed Rulemaking for the designation of hazardous substances and the determination of their removability (Federal Register, Vol. 39, No. 164, Part IV, pp. 30466-30471). In addition to selection criteria and a tentative list of substances under consideration for designation, factors and concepts relative to the determination of removability were set forth at that time. An initial determination was made that all substances under consideration were not "actually removable" from the water once discharged.

In response to the request for data and comments contained in the Advance Notice, 84 written comments were received and considered in the development of the proposed rule set forth herein. Comments and data relative to the selection criteria and listed substances are discussed in the proposed 40 CFR Part 116, published concurrently.

Several legal, technical, and administrative factors must be examined in the determination of the actual removability. The use of these factors to efficiently implement the law has been a cause of concern. These factors were identified throughout the development of the legislation. The situation may be best summarized by recognizing that "remove or removal" as defined in Section 311(a)(8) "... refers to removal of the oil or hazardous substances from the water and

shorelines or the taking of such other actions as may be necessary to minimize or mitigate damage to the public health or welfare, including but not limited to, fish, shellfish, wildlife, and public and private property shorelines and beaches." At the same time, Section 311(b)(2)(B)(i) requires "... a determination whether any such designated hazardous substance can actually be removed."

There are alternative ways of interpreting the question of determining removability. One alternative is to recognize that the definition of "remove" or "removal", which includes mitigating action, could be very broad covering any response activity. Therefore, almost any material discharged under almost any circumstances could be mitigated to some degree and therefore be determined to be removable. Alternatively, a determination which recognized that actual removability does not include damage mitigation would imply that few, if any, materials under all or even typical circumstances could be actually removed from the water. Between these two extremes, there appear to be some materials with properties which could be described as removable under certain conditions of discharge. However, a key restraint is that removability must be determined for the proposed substances in advance, and without consideration of the conditions surrounding the discharge.

In the August 22, 1974 Advance Notice of Proposed Rulemaking, the Agency made the following interpretation of the removability determination:

To satisfy the requirement of section 311(b)(2)(B)(i), the Agency is considering the determination of actual removability from the water of each candidate substance. Factors under study in making this determination include the substance's solubility, density, physical state, dispersion characteristics, aquatic stress potential such as acute lethality, potential for leaving a residue, and detectability in the water body, as well as the current status of removal technology and availability of necessary equipment. Based upon these factors, the Agency is considering the determination that all of the substances listed in this advance notice of proposed rulemaking are not actually removable. In this respect it should be noted that section 311(a)(8) contains a definition of "remove" or "removal". The definition has two elements: (1) "Removal of the oil or hazardous substances from the water and shorelines"; and (2) "the taking of such other actions as may be necessary to minimize or mitigate damage to the public health or welfare." The phrase "actually be removed" as used in section 311(b)(2)(B)(i) is considered to refer only to the first element of this definition. In other words, if the spilled substance cannot normally be removed from a water body by physical, chemical or biological means, then it would not be "actually removable" for purposes of the eventual hazardous substance designation. The fact that some other action may be possible to "minimize or mitigate damage to the public health or welfare" -- does not make the substance "actually removable" for purposes of hazardous substance designation. However, actions taken under the second element of the definition in section 311(a)(8) -- i.e., actions taken to minimize or mitigate damage but which do not result in actual removal -- may qualify for reimbursement from the revolving fund under section 311(c) and may result in liability of the discharger under the conditions specified in section 311(f).

Thus, the Agency adopted the position that the regulatory requirement for determining "actual removability" under Section 311(b)(2)(B)(i) was separable from the provision of Sections 311(f) and 311(g) which hold the discharger liable for actions taken under Section 311(c)(1) and the broader definition of "remove" or "removal" found in Section 311(a)(8).

In response to the August 22, 1974, Advance Notice of Proposed Rulemaking, many commenters expressed the opinion that the tentative determination that all proposed substances are not actually removable was based on an overly restrictive interpretation of the regulatory requirement for determining removability. Recognizing the broad definition of "remove" or "removal", it was suggested by commenters that taking action to mitigate damages would, in fact, be taking action to actually remove discharges of hazardous substances. That argument fails to recognize that the basic thrust of Section 311 is the prevention of discharges of hazardous substances and the clean-up or mitigation of environmental damages when discharges do occur. Civil penalties are viewed as economic incentives to reduce discharges through prevention while clean-up liabilities insure the protection of public health or welfare. Although clean-up liabilities, which exist for substances determined to be actually removable, may provide incentives for prevention in some cases, it is clear that for discharges in many waters, effective damage mitigation or clean-up action is difficult. In these waters, discharges of substances determined to be actually removable could continually occur with no economic disincentive other than that set forth under Section 311(b)(6) being employed. Thus, the determination that any designated substance is actually removable would reduce the incentive to prevent discharge of that substance. The penalty presently employed under 311(b)(6) for oil discharges can be viewed as insufficient for discharges of hazardous substances that can force the closure of water supplies, fisheries, and other beneficial water uses.

After consideration of comments received and further evaluation of the legislative history, the Agency proposes to maintain the determination

of actual removability as set forth in the Advance Notice of Proposed Rulemaking of August 22, 1974, and cited above. In doing so, it is determined that all substances proposed (40 CFR Part 118) under Section 311(b)(2)(A) are not actually removable.

This regulation may be amended as necessary to reflect new information on the removability of hazardous substances.

Interested persons may participate in this rulemaking by submitting written comments or requests for information in triplicate to: Dr. C. Hugh Thompson, Chief, Hazardous Substances Branch, Criteria and Standards Division, Office of Water Planning and Standards, WH-595, Environmental Protection Agency, Washington, D.C. 20460.

A copy of all public comments will be available for inspection and copying at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street, S.W., Washington, D.C. 20460. The Environmental Protection Agency information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

All comments received on or before 60 calendar days after date of this publication will be considered.

Executive Order 11821 (November 27, 1974) requires that major proposals for legislation and promulgation of regulations and rules by agencies of the Executive Branch be accompanied by a statement certifying that the inflationary impact of the proposal has been evaluated.

A number of criteria have been defined to determine which actions require an inflationary impact statement. The Agency's analysis of the potential economic impact of these regulations indicate that none of the criteria defining a major proposal have been met. Thus, it is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order 11821 and that no inflationary impact statement is required.

CERTIFIED TO BE A TRUE COPY OF THE ORIGINAL DOCUMENT.

Part 117 - DETERMINATION OF REMOVABILITY OF HAZARDOUS SUBSTANCES

117.1 Applicability
117.2 Definitions
117.3 Determination of Actual Removability

Authority: Sections 311(b)(2)(B)(i) and 501(a) of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1251 et seq.).

117.1 APPLICABILITY

The regulations of this part make a determination under Section 311 (b)(2)(B)(i) of the Act as to the actual removability of substances designated under Section 311(b)(2)(A). This regulation applies to substances designated as hazardous under 40 CFR Part 116 when discharged into navigable waters or adjoining shorelines or the waters of the contiguous zone from vessels, onshore facilities or offshore facilities.

117.2 DEFINITIONS

Terms used in this part shall have the meanings as stated in 40 CFR Part 116 and as indicated below:

"The Act" means the Federal Water Pollution Control Act, as amended by the Federal Water Pollution Control Act Amendments of 1972, (P.L. 92-500), (33 U.S.C. 1251 et seq.);

"Remove" or "removal" refers to removal of the oil or hazardous substances from the water and shorelines or the taking of such other actions as may be necessary to minimize or mitigate damage to the public health or welfare, including, but not limited to, fish, shellfish, wildlife, and public and private property, shorelines, and beaches;

"Actually be removed" means the separation and isolation of discharged hazardous substances from all of the navigable waters of the U.S. and the contiguous zone by chemical, physical, or biological means.

117.3 DETERMINATION OF ACTUAL REMOVABILITY

The elements, compounds or their structural isomers, or mixtures thereof, designated as hazardous substances under 40 CFR Part 116 cannot actually be removed.

The determination that the designated substances cannot actually be removed by chemical, physical, or biological means does not relieve the discharger from damage mitigation liabilities under Sections 311(f) and 311(g) of the Act.

ENVIRONMENTAL PROTECTION AGENCY
(FRL 472-1)
[40 CFR Part 118]

DETERMINATION OF HARMFUL QUANTITIES FOR HAZARDOUS SUBSTANCES

Notice of Proposed Rulemaking

Notice is hereby given in accordance with 5 U.S.C. 553 that the Administrator, Environmental Protection Agency, under the authority contained in Section 311(b)(4) of the Federal Water Pollution Control Act Amendments of 1972 [33 U.S.C. 1251 et seq. (the Act)], and Executive Order 11735, proposes a new Part 118 of Title 40 of the Code of Federal Regulations which determines harmful quantities of those substances proposed (40 CFR Part 116) as hazardous under Section 311(b)(2)(A).

The Federal Water Pollution Control Act Amendments of 1972 (P.L. 92-500) amended the Federal Water Pollution Control Act of 1970 (33 U.S.C. 1151 et seq.) to add a new Section 311(b)(4) of the Act which states:

> "The President shall by regulation, to be issued as soon as possible after the date of enactment of this paragraph, determine for the purposes of this section, those quantities of oil and any hazardous substance the discharge of which, at such times, locations, circumstances, and conditions, will be harmful to the public health or welfare of the United States, including, but not limited to, fish, shellfish, wildlife, and public and private property, shorelines, and beaches except that in the case of the discharge of oil into or upon the waters of the contiguous zone, only those discharges which threaten the fishery resources of the contiguous zone or threaten to pollute or contribute to the pollution of the territory or the territorial sea of the United States may be determined to be harmful."

Executive Order 11735, dated August 3, 1973, delegated the authority of the President under Section 311(b)(4) to the Administrator of the Environmental Protection Agency.

This notice deals with "... hazardous substances, other than oil ..." as noted in Section 311(b)(2)(A). Regulations implementing the portion of Section 311(b)(4) dealing with oil are contained in 40 CFR Part 110. Part 110.3 of 40 CFR defines the harmful quantity of oil as:

> "...discharges of such quantities of oil into or upon the navigable waters of the United States or adjoining shorelines determined to be harmful to the public health or welfare of the United States, at all times and locations and under all circumstances and conditions, except as provided in Section 110.6 of this part, include discharges which:
>
> (a) Violate applicable water quality standards, or
>
> (b) Cause a film or sheen upon or discoloration of the surface of the water or adjoining shorelines or cause a sludge or emulsion to be deposited beneath the surface of the water or upon adjoining shorelines."

Oils are, in general, mixtures consisting of a number of discrete chemical compounds. There is considerable variation in both the number of these discrete compounds found in a given oil and in the proportion of each constituent, depending on origin and degree of refinement. As a consequence, the physical properties, chemical properties and toxicity of oils are somewhat variable. In contrast, hazardous substances, other than oil, are to be designated as "... elements and compounds ..." according to Section 311(b)(2)(A). By definition, different samples of a given element or a given compound display identical physical, chemical, and therefore toxicological properties, without regard to source.

Most oils have in common the ability to form surface sheens or to form sludges or emulsions in water. Damages attributed to these phenomena include the destruction of wildlife through contact with surface sheens or films, direct toxic effects to aquatic animals and plants by sludges, emulsions or soluble fractions, and the fouling of shorelines.

Although some of the substances considered for designation may share certain properties with oils, such as the ability to form surface sheens, this is not characteristic of the majority, and their environmental effects are not generally attributed to this behavior. Rather, the impact of non-oil spills most commonly observed is direct toxic action from soluble fractions.

In view of these differences between oils and other hazardous substances to be regulated under Section 311, this notice proposes a different method for determination of "harmful quantities" of hazardous substances other than oil.

The final promulgation of proposed 40 CFR Part 118 will activate Section 311(b)(5) which requires that discharges equal to or exceeding the harmful quantity be immediately reported to the appropriate agency of the United States government. The appropriate agency is proposed in 33 CFR Part 153 (Federal Register Vol. 39, No. 234, pp. 4189-4194, December 4, 1974). Section 311(b)(5) also provides for a criminal penalty of up to one year imprisonment, $10,000 fine, or both, for failure to meet the reporting requirements. Final promulgation activates Section 311(f) and 311(g) liabilities as well as Section 311(b)(6) civil penalties for all hazardous substances. In addition, civil penalty provisions of Section 311(b)(2)(B)(iii) of the Act will be activated for those substances determined to be not actually removable under Section 311 (b)(2)(B)(i) (proposed 40 CFR Part 117).

Sections 311(b)(2)(A) and 311(b)(2)(B)(i) of the Act require that the Administrator designate hazardous substances and make a determination whether any such designated substance can actually be removed. On August 22, 1974, the Assistant Administrator for Water and Hazardous Materials published an Advance Notice of Proposed Rulemaking (Federal Register, Vol. 39, No. 164, Part IV, pp. 30466-30471). This Advance Notice set forth tentative criteria by which substances were considered for designation as hazardous, those substances under consideration, factors which influence removability, and an initial determination of the actual removability of substances currently under consideration. Public comment and data were requested on all aspects of the proposed action. The closing date for comments was October 15, 1974.

A number of substances listed in the August 22, 1974 Advance Notice of Proposed Rulemaking are not included in this notice due to public comment and data received. Most details concerning changes such as deletions, are presented in separate proposed rules for Designation of Hazardous Substances (proposed 40 CFR Part 116) and Determination of the Removability of Hazardous Substances (proposed 40 CFR Part 117). However, a number of additional comments were received on limitations to the applicability of the designation of hazardous substances. It is now considered most appropriate to limit the applicability

of this proposed rule and the proposed rule for Determination of the Units of Measurement and Rates of Penalty for Hazardous Substances (proposed 40 CFR Part 119).

The applicability stated in the Advance Notice of Proposed Rulemaking was as follows:

> "It is important to note that not all discharges of substances designated as hazardous will be subject to the enforcement provisions of section 311. Because section 311 applies only to discharges from vessels or facilities, a designation regulation would not apply to discharges from other sources such as agricultural land runoff, or irrigation return flows. The discharges being considered can be placed in two separate categories. The first relates to transportation and storage incidents in which there is normally no release of the substance except in the spill situation. The second relates to industrial production facilities in which a designated hazardous substance is released in quantities exceeding those of a permitted normally operating effluent. Periodic or continuous discharges are regulated under other provisions of the Act. Accordingly, the Agency is considering that the regulation would exclude from designation discharges of hazardous substances which are made: (a) in compliance with effluent limitations or guidelines established under sections 301, 302, 304, 306, and 307 of the Act; (b) in quantities not exceeding those identified for such substances in an application for an NPDES permit which has been issued pursuant to section 402 of the Act; (c) in compliance with permits issued under section 404 of the Act or sections 102 and 103 of the Marine Protection, Research Sanctuaries Act of 1972 (33 U.S.C. 1401 et seq.); (d) from properly functioning marine sanitation flow-through devices certified by the United States Coast Guard pursuant to section 312 of the Act; or (e) in the course of a permitted use of a pesticide registered under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. sections 136 and through 136 y)."

Although most comments agreed with these exclusions, many pointed out that exclusion (b) created a potential conflict with the terms of the NPDES function under Section 402 of the Act. Only a few of the proposed hazardous substances are mentioned specifically in the NPDES

permits. For those constituents which are identified, the discharge permit cites an average mass per day limitation which is, in part, based on the production volume of the specific facility and are not monitored on a continuous basis. Maintaining the proposed language of exclusion (b) would, in effect, require the continuous monitoring of all listed substances. In fact, monitoring of some substances is simply not presently feasible.

Consequently, this proposed rule modifies the wording of exclusion (b) to read as follows:

"...in compliance with an NPDES permit which has been issued pursuant to Section 402 of the Act,...". General parameteres contained in permits together with permit conditions based upon water quality considerations should, to a significant degree, control and limit discharges of hazardous substances.

A. Summary of Method for Determining Harmful Quantities

A procedure has been devised for determining harmful quantities of hazardous substances by modification of a system used by the Intergovernmental Maritime Consultative Organization (IMCO), a specialized agency in the United Nations system. Substances are divided into four categories on the basis of relative hazard to the environment. The smallest common commercial container size (one pound/454 grams) was then defined as the harmful quantity for all members of the most highly toxic category. Other categories were thereafter assigned harmful quantities on a proportional basis. If the upper aquatic toxicity limit of a category was ten times higher than the upper limit of the pre-

ceeding more toxic category, then the harmful quantity was set as ten times larger, and so forth.

B. General Considerations

This methodology is being proposed after detailed consideration of others which were finally rejected due to: excessive complexity; incomplete or conflicting data; difficulty visualized in implementation. The aternative methods are discussed in detail in Document EPA #440/9-75-005 a, b, c, d; Methodologies for Determining Harmful Quantities and Rates of Penalty for Hazardous Substances, (stock number 055-001-01028-1, available from: Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, $10.00).

Section 311 is specific in its instruction to designate elements and compounds as hazardous substances. This has led to the development of methods for defining harmful quantities based on pure compound characteristics. The presence of additional materials in a mixture may affect toxicity through synergism, antagonism, addition or other interactive mechanisms. For these mixtures individual bioassays would be required to specify meaningful toxic levels. Such an approach is obviously not practicable since it is not possible to predict the combinations that might be involved. It is also not feasible to designate harmful quantities for all conceivable mixtures. Consequently, the approach proposed for dealing with mixtures or solutions is to assume that damages caused by individual constituents are additive. For a mixture or solution of substance X, substance Y and substance Z, etc., the weight of substance X is divided by the harmful quantity of pure substance X, the

weight of substance Y is divided by the harmful quantity of pure substance Y, and so forth. Next, the fractions derived in this fashion are added. If the total equals or exceeds unity, then the harmful quantity of the mixture or solution has been equaled or exceeded in the discharge.

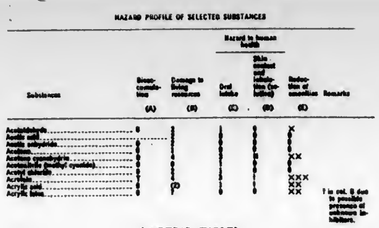
The harm produced by the introduction of any pollutant to water is dependent upon the resulting concentration of that material in the water and upon receiving water characteristics. Determining harmful quantities thus requires some evaluation of probabilistic damage or harm to representative water bodies. Variations in water quality and other factors limit the practicality of regulating discharges in any but relative terms. The method set forth in this document is intended to deal with typical or average conditions in a way encouraging notification of hazardous substance discharges and to provide for equitable enforcement which, in turn, is intended to lead to the overall program goal of prevention.

Due to the present lack of compulsory reporting under Section 311(b)(5), the full magnitude of the problem of hazardous substance discharges is not fully understood. While many chemical users, producers, and transporters have voluntarily reported spills of materials they considered hazardous, no generally accepted list was available for guidance. This portion of the problem will be corrected by promulgation of 40 CFR Part 116, which provides such a list.

Another goal of this proposed rule is that it is intended to prompt reporting of as great a proportion of the total number of discharges as

possible. The establishment of harmful quantities for designated hazardous substances activates a compulsory notification requirement under Section 311(b)(5) for discharges equal to or greater than the harmful quantity. The intent of the Agency is to assess civil penalties under Section 311(b)(2)(B)(iii) only for those discharges which equal or exceed the harmful quantity. Voluntary reporting is thus encouraged in hopes of obtaining more complete knowledge of the extent of the hazardous substance problem.

C. Proposed Determination of Harmful Quantity



A procedure was developed for determining harmful quantities based on a proposed hazardous material classification system found in Annex II of the International Conference on Marine Pollution, 1973[1], which has been submitted by the Intergovernmental Maritime Consultative Organization (IMCO) to member nations for adoption. The basic system was intended, in part, to regulate operational discharges of ships transporting noxious substances in bulk. These materials are categorized on the basis of a profile of relative "hazard potential." The concept of harmful quantity is not present in the basic system. Consequently, modifications are necessary to meet the requirements of Section 311 and will be spelled out following review of the original system.

1. "Hearing Before the Committee on Commerce on 1973 IMCO Conference on Marine Pollution from Ships, November 1973, U.S. Senate, 93rd Congress, First Session Series 93-52."

1. Basic System

The chemicals originally considered under the basic System were "all noxious and hazardous substances other than oil"[1] as defined by the 1954 Oil Pollution Convention. The basic system grouped these noxious materials with respect to the five "hazard potentials": (1) bioaccumulation, (2) damage to living resources, (3) hazards to human health (oral intake), (4) hazards to human health (external exposure), and (5) reduction of amenities, based upon the data and opinions of the Group of Experts on the Scientific Aspects of Marine Pollution (GESAMP)[2]. A partial extract of the profiling system is reproduced from page 90, and the associated legend is also reproduced from page 98 of reference 1.

HAZARD PROFILE OF SELECTED SUBSTANCES

(PARTIAL TABLE)

2. This Group is jointly sponsored by the specialized agencies of the United Nations system including, UN, FAO, UNESCO, WHO, WMO, IMCO, and IAEA.

LEGEND TO THE HAZARD PROFILE

Column A—Bioaccumulation:
+ Bioaccumulated and liable to produce a hazard to aquatic life or human health.
O Not known to be significantly bioaccumulated.
Z Short retention of the order of one week or less.
T Liable to produce tainting of seafood.

Column B—Damage to living resources:

Ratings		TLm (p/m
4	Highly toxic	<1
3	Moderately toxic	1–10
2	Slightly toxic	10–100
1	Practically nontoxic	100–1,000
0	Nonhazardous	≥1,000
BOD	Problem caused primarily by high oxygen demand	
D	Deposits liable to blanket the seafloor	

Column C—Hazard to human health, oral intake:

Ratings		LD₅₀ mg/kg
4	Highly Hazardous	<5
3	Moderately hazardous	5–50
2	Slightly hazardous	50–500
1	Practically nonhazardous	500–5,000
0	Nonhazardous	≥5,000

Column D—Hazard to human health, skin contact and inhalation (solution):
II Hazardous (solution).
I Slightly hazardous (solution).
0 Nonhazardous (solution).

Column E—Reduction of amenities:

Ratings	
xxx	Highly objectionable because of persistency, smell, or poisonous or irritant characteristics; beaches liable to be closed.
xx	Moderately objectionable because of the above characteristics, but short-term effects leading to temporary interference with use of beaches.
x	Slightly objectionable, no interference with use of beaches.
0	No problem.

All Columns: Ratings in brackets, ( ), indicate insufficient data available to the Panel on specific substances, hence extrapolation was required.

2. Modification of the Basic System

The advantages of domestic regulations which are compatible with an international convention are readily apparent. Also, from an operational viewpoint, a method which considers groups of chemicals rather than individual chemicals simplifies reporting. However, a number of modifications to the basic system must be made to satisfy the requirements of Section 311.

The modifications required are as follows:

a). Hazardous materials already categorized must be reexamined in terms of fresh and salt water hazard potential and the latest available data.

b). Materials not previously considered by IMCO must be categorized.

c). Small modifications must be made to facilitate more quantitative and objective categorization and to further clarify the term "additional factors in the hazard profile" used by IMCO. To this end, the guidelines in Table I for categorization have been modified to read as found below.

d). The final modification is necessary due to the concept of harmful quantity [from Section 311(b)(4)] which is not found in the basic system. A mechanism must be devised for deriving a consistent set of harmful quantities based on quantitative differentiation between categories. To this end, aquatic toxicity (96-hr. LC50) was selected since it is the only criterion common to all categories in the basic system and is the only one which permits a quantitative comparison between categories. Otherwise, it becomes necessary to subjectively evaluate between different hazard potentials, such as the relative hazards of bioaccumulation as opposed to reduction of amenities.

V 57 03 3MD 0SN10AV XUM

The hazard profiles described above were then used by a committee of the Intergovernmental Maritime Consultative Organization (IMCO) to assign the materials to one of several categories as shown in the partial list below. (Reproduction from page 157 of reference 1.)

—LIST OF NOXIOUS LIQUID SUBSTANCES CARRIED IN BULK

Substance	U.N. number	Pollution category for operational discharge (regulation 3 of annex II)	Residual concentration (percent by weight) (Regulation 5(1) of annex II) outside special areas	(Regulation 5(2) of annex II) within special areas
	(I)	(II)	(III)	(IV)
Acetaldehyde	1089	C	.....	.....
Acetic acid	1842	C	.....	.....
Acetic anhydride	1715	C	.....	.....
Acetone	1090	D	.....	.....
Acetone cyanohydrin	1541	A	0.1	0.01
Acetyl chloride	1717	C	.....	.....
Acrolein	1092	A	1	0.1
Acrylic acid [1]	1093	B	.....	.....
Acrylonitrile	1093	B	.....	.....
Adiponitrile		D	.....	.....

This categorization was done according to the guidelines and tabulations from page 156 in reference 1 reproduced below.

GUIDELINES FOR THE CATEGORIZATION OF NOXIOUS LIQUID SUBSTANCES

Category A.—Substances which are bioaccumulated and liable to produce a hazard to aquatic life or human health; or which are highly toxic to aquatic life (as expressed by a Hazard Rating 4, defined by a TLm less than 1 ppm); and additionally certain substances which are moderately toxic to aquatic life (as expressed by a Hazard Rating 3, defined by a TLm of 1 or more, but less than 10 ppm) when particular weight is given to additional factors in the hazard profile or to special characteristics of the substance.

Category B.—Substances which are bioaccumulated with a short retention of the order of one week or less; or which are liable to produce tainting of the sea food; or which are moderately toxic to aquatic life (as expressed by a Hazard Rating 3, defined by a TLm of 1 ppm or more, but less than 10 ppm); and additionally certain substances which are slightly toxic to aquatic life (as expressed by a Hazard Rating 2, defined by a TLm of 10 ppm or more, but less than 100 ppm) when particular weight is given to additional factors in the hazard profile or to special characteristics of the substance.

Category C.—Substances which are slightly toxic to aquatic life (as expressed by a Hazard Rating 2, defined by a TLm of 10 or more, but less than 100 ppm); and additionally certain substances which are practically non-toxic to aquatic life (as expressed by a Hazard Rating 1, defined by a TLm of 100 ppm or more, but less than 1,000 ppm) when particular weight is given to additional factors in the hazard profile or to special characteristics of the substance.

Category D.—Substances which are practically non-toxic to aquatic life (as expressed by a hazard rating 1, defined by a TLm of 100 ppm or more, but less than 1,000 ppm); or causing deposits blanketing the seafloor with a high biochemical oxygen demand (BOD); or highly hazardous to human health, with an LD_{50} of less than 5 mg/kg; or produce moderate reduction of amenities because of persistency, smell or poisonous or irritant characteristics, possibly interfering with use of beaches; or moderately hazardous to human health, with an LD_{50} of 5 mg/kg or more, but less than 50 mg/kg and produce slight reduction of amenities.

Other Liquid Substances (for the purposes of Regulation 4 of this Annex).—Substances other than those categorised in Categories A, B, C and D above.

TABLE I
EPA GUIDELINES
FOR CATEGORIZING HAZARDOUS SUBSTANCES

Category A includes substances which are;

(a) bioaccumulated and liable to produce a hazard to aquatic life or human health (Rating +), or

(b) highly toxic to aquatic life (Rating 4), or

(c) moderately toxic to aquatic life (Rating 3) and also liable to produce tainting of sea food (Rating T), or

(d) bioaccumulated with a short retention of the order of one week or less (Rating Z) while also being moderately toxic to aquatic life (Rating 3) and causing severe reduction of amenities (Rating XXX).

Category B includes substances which are;

(a) bioaccumulated with a short retention of the order of one week or less (Rating Z), or

(b) liable to produce tainting of sea food (Rating T), or

(c) moderately toxic to aquatic life (Rating 3).

Category C includes substances which;

(a) are slightly toxic to aquatic life (Rating 2), or

(b) cause serious reduction of amenities described as highly objectionable because of persistency, smell, irritant or poisonous characteristics (Rating XXX), or

(c) are practically non-toxic to aquatic life (Rating 1) while also being at least moderately hazardous to human health (oral intake) (Rating 4 or 3) and causing moderate reduction of amenities (Rating XX).

Category D includes substances which;

(a) are practically non-toxic to aquatic life (Rating 1), or

(b) are highly hazardous to human health (oral intake), (Rating 4), or

(c) cause deposits blanketing the sea floor with a high biochemical oxygen demand (Rating BOD) and produce moderate reduction of amenities (Rating XX), or

(d) are moderately hazardous to human health (oral intake), (Rating 3), and also cause a slight reduction of amenities (Rating X).

The smallest container used in commerce for a typical category A material, for example an inorganic cyanide, is a one-pound (0.454 kilogram) bottle. Consequently, this amount has been chosen as the "harmful quantity" of all category A materials. Other categories are thereafter assigned harmful quantities on a proportional basis as shown in Table II. Basically, if the upper aquatic toxicity limit of a category is ten times higher than the upper limit of the preceding, more toxic category, then the harmful quantity is set as ten times larger, and so forth.

TABLE II
EPA CATEGORIES
FOR HARMFUL QUANTITY DETERMINATION

Category	Representative Range	Harmful Quantity lb. (kg.)
A	LC50* < 1 ppm	1.0 (0.454)
B	1 ppm ≤ LC50 < 10 ppm	10 (4.54)
C	10 ppm ≤ LC50 < 100 ppm	100 (45.4)
D**	100 ppm ≤ LC50 ≤ 500 ppm	500 (227)

The representative range means that substances in Category A have LC50 values of less than 1 ppm, Category B substances have LC50 values of 1 ppm or greater up to 10 ppm, Category C substances have LC50 values of 10 ppm or greater up to 100 ppm, and Category D substances have LC50 values of 100 ppm up to and including 500 ppm.

* LC50 means that concentration of material which is lethal to one-half of the test population of aquatic animals upon continuous exposure for 96 hours or less.

** The basic IMCO criterion for Category D aquatic toxicity is 96-hr. LC50 values of 100-1000 ppm. The selection criteria for materials proposed in 40 CFR Part 116 eliminated any material with a 96-hr. LC50 in excess of 500 ppm. Thus, the representative toxicity range for Category D proposed here has been changed to 100-500 ppm.

D. Special Waters

Special waters are proposed to be defined as those waters which are: (1) drinking water reservoirs; (2) part of a designated National Wildlife Refuge System (50 CFR Part 25); or (3) part of a designated National Forest Wilderness, a designated National Park System, or a designated National Wilderness Preserve System (43 CFR Part 19.2). Because of their unique value, it is proposed that any quantity of a substance designated in 40 CFR Part 116 constitutes a harmful quantity when discharged into these special waters.

The EPA category and harmful quantity determined for each substance proposed as hazardous are listed in the proposed rule. Interested persons may participate in this rulemaking by submitting written comments or requests for information in triplicate to: Dr. C. Hugh Thompson, Chief, Hazardous Substances Branch, (WH-595) Environmental Protection Agency, Waterside Mall, Room 2824, 401 M Street, S.W., Washington, D.C. 20460.

The Agency is particularly interested in comments relative to:

1). the methods employed for arriving at harmful quantites,
2). the potential number of discharges of listed substances in excess of the harmful quantity,
3). the potential impact on producers, transporters, and handlers of hazardous substances,
4). the workability of the proposed regulation and,
5). the definition of "special waters".

All comments received on or before 60 calendar days after date of this publication, will be considered.

A copy of all comments will be available for inspection and copying at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street, S.W., Washington, D.C. 20460. (40 CFR Part 2 provides that a reasonable fee may be charged for copying.)

Executive Order 11821 (November 27, 1974) requires that major proposals for legislation and promulgation of regulations and rules by agencies of the Executive Branch be accompanied by a statement certifying that the inflationary impact of the proposal has been evaluated.

A number of criteria have been defined to determine which actions require an inflationary impact statement. The Agency's analysis of the potential economic impact of these regulations indicate that none of the criteria defining a major proposal have been met. Thus, it is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order 11821 and that no inflationary impact statement is required.

Part 118 - DETERMINATION OF HARMFUL QUANTITIES FOR HAZARDOUS SUBSTANCES

118.1 Applicability
118.2 Abbreviations
118.3 Definitions
118.4 Determination of Harmful Quantities
118.5 Demonstration Projects
118.6 Notice
118.7 Penalties
118.8 Liabilities

Authority: Sections 311(b)(4) and 501(a) of the Federal Water Pollution Control Act of 1972, [33 U.S.C. 1251 et seq., (the Act)] and Executive Order 11735.

118.1 APPLICABILITY

The regulation of this part makes a determination of the harmful quantity of substances designated as hazardous in 40 CFR Part 116. The regulation applies to designated substances in quantities equal to or greater than those set forth below, when discharged into navigable waters or adjoining shorelines or the waters of the contiguous zone from vessels and onshore and offshore facilities, except when the owner or operator can show such discharges are made (1) in compliance with requirements of Sections 301, 302, 304, 306, 307 of the Act, and in compliance with an NPDES permit which has been issued pursuant to Section 402 of the Act, (2) in compliance with permits issued under Section 404 of the Act or Sections 102 and 103 of the Marine Protection, Research and Sanctuaries Act of 1972, (33 U.S.C. 1401 et seq.), (3) in compliance with approved water treatment plant operations as specified

by local, State or Federal health regulations pertaining to safe drinking water, (4) from properly functioning marine sanitation flow-through devices certified by the United States Coast Guard pursuant to Section 312 of the Act, or (5) in the course of a permitted use of a pesticide registered under 40 CFR Part 162 (Federal Register, Vol., 40, No. 129, Part II, pp. 28242-28286, July 3, 1975) by authority of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended by the Federal Environmental Pesticide Control Act of 1972 (86 Stat. 973, P.L. 92-516, 7 U.S.C. 136 et seq.).

118.2 ABBREVIATIONS

lb = pound
kg = kilogram
HQ = harmful quantity

118.3 DEFINITIONS

As used in this part, all terms shall have the same meaning as used in Section 311 of the Act and 40 CFR Parts 116 and 117.

118.4 DETERMINATION OF HARMFUL QUANTITIES

The quantities listed with each substance name in Table 118.4 are determined to be the harmful quantities for those substances, except when discharged into "special waters". Those waters which are (1) drinking water reservions, (2) part of a designated National Wildlife Refuge (50 CFR Part 25), or (3) part of a designated National Forest Wilderness, a designated National Park, or a designated National Wilderness Preserve (43 CFR Part 19.2) are defined as "special waters". Because of their unique value, any quantity of a substance designated in 40 CFR Part 116 constitutes a harmful quantity when discharged into these special waters.

Harmful quantities of mixtures or solutions are considered additive based upon proportions of the individual elements or compounds as follows. For a mixture or solution of substance X, substance Y, and substance Z, etc., the weight of substance X discharged is divided by the harmful quantity of pure substance X, the weight of substance Y discharged is divided by the harmful quantity of pure substance Y, and so forth. Next, the fractions so derived are added. If the total equals or exceeds unity, then the harmful quantity of the mixture or solution has been equaled or exceeded.

118.5 DEMONSTRATION PROJECTS

Notwithstanding any other provisions of this part, the Administrator of the Environmental Protection Agency may permit, on a case-by-case basis, the discharge of harmful quantities of designated hazardous substances, other than oil, into or upon the navigable waters or adjoining shorelines or the waters of the contiguous zone in connection with research, demonstration projects, or studies relating to the prevention, control, or abatement of hazardous substance pollution.

118.6 NOTICE

Any person in charge of a vessel or an onshore or an offshore facility shall, as soon as he has knowledge of any discharge of designated hazardous substances, other than oil, from such vessel or facility in

excess of the harmful quantity determined by this part, immediately notify the appropriate agency of the United States Government of such discharge. Notice shall be given in accordance with such procedures as the Secretary of Transportation may prescribe and as set forth in 33 CFR Part 153 (proposed revision published December 4, 1974 in the Federal Register, Vol. 139, No. 234, pp. 4189-4194).

118.7 PENALTIES

An owner or operator failing to immediately notify the United States Government of discharges equal to or greater than those quantities determined to be harmful as set forth in this part may be subject to criminal penalties of not more than $10,000 or imprisonment for not more than one year or both under Section 311(b)(5).

An owner or operator responsible for the discharge of substances designated in 40 CFR Part 116 in quantities equal to or exceeding the harmful quantities established in this part may be assessed a civil penalty of up to $5,000 under Section 311 (b)(6).

An owner or operator responsible for the discharge of substances designated in 40 CFR Part 116 and determined to be not actually removable in 40 CFR Part 117 in quantities equal to or exceeding the harmful quantities established in this part may be subject to a civil penalty assessed under Section 311(b)(2)(B)(iii) as set forth in 40 CFR Part 119.

118.8 LIABILITIES

Subject to the limits of liability found in Sections 311(f) and (g), the

owner or operator of any vessel or onshore or offshore facility from which a hazardous substance designated in 40 CFR Part 116 is discharged in quantities equal to or exceeding harmful quantities determined by this part, shall be liable to the United States Government for the actual costs incurred under Section 311(c) for the removal of such substance. Removal refers to removal of the hazardous substance from the water and shorelines or the taking of such other actions as may be necessary to minimize or mitigate damage to the public health or welfare, including, but not limited to, fish, shellfish, wildlife, and public and private property, shorelines, and beaches.

TABLE 118.4
HARMFUL QUANTITIES OF HAZARDOUS SUBSTANCES

The first number under the column headed "HQ" is the harmful quantity in pounds. The number in parentheses is the metric equivalent in kilograms. The column headed "Category" lists the EPA Category associated with each substance.

Material	Category	HQ in lb (kg)
Acetaldehyde	C	100 (45.4)
Acetic Acid	C	100 (45.4)
Acetic Anhydride	C	100 (45.4)
Acetone Cyanohydrin	C	100 (45.4)
Acetyl Bromide	D	500 (227)
Acetyl Chloride	D	500 (227)
Acrolein	A	1 (0.454)
Acrylonitrile	C	100 (45.4)
Adiponitrile	D	500 (227)
Aldrin	A	1 (0.454)
Allyl Alcohol	B	10 (4.54)
Allyl Chloride	C	100 (45.4)
Aluminum Fluoride	D	500 (227)
Aluminum Sulfate	D	500 (227)
Ammonia	C	100 (45.4)
Ammonium Acetate	D	500 (227)
Ammonium Benzoate	D	500 (227)
Ammonium Bicarbonate	D	500 (227)
Ammonium Bichromate	D	500 (227)

Material	Category	HQ in lb (kg)
Ammonium Bifluoride	D	500 (227)
Ammonium Bisulfite	D	500 (227)
Ammonium Bromide	D	500 (227)
Ammonium Carbamate	D	500 (227)
Ammonium Carbonate	D	500 (227)
Ammonium Chloride	D	500 (227)
Ammonium Chromate	D	500 (227)
Ammonium Citrate	D	500 (227)
Ammonium Fluoborate	D	500 (227)
Ammonium Fluoride	D	500 (227)
Ammonium Hydroxide	C	100 (45.4)
Ammonium Hypophosphite	D	500 (227)
Ammonium Iodide	D	500 (227)
Ammonium Nitrate	D	500 (227)
Ammonium Oxalate	D	500 (227)
Ammonium Pentaborate	D	500 (227)
Ammonium Persulfate	D	500 (227)
Ammonium Silicofluoride	C	100 (45.4)
Ammonium Sulfamate	D	500 (227)
Ammonium Sulfide	D	500 (227)
Ammonium Sulfite	D	500 (227)
Ammonium Tartrate	D	500 (227)
Ammonium Thiocyanate	D	500 (227)
Ammonium Thiosulfate	D	500 (227)
Amyl Acetate	C	100 (45.4)
Aniline	C	100 (45.4)

Material	Category	HQ in lb (kg)
Antimony Pentachloride	C	100 (45.4)
Antimony Pentafluoride	C	100 (45.4)
Antimony Potassium Tartrate	C	100 (45.4)
Antimony Tribromide	C	100 (45.4)
Antimony Trichloride	C	100 (45.4)
Antimony Trifluoride	C	100 (45.4)
Antimony Trioxide	C	100 (45.4)
Arsenic Acid	C	100 (45.4)
Arsenic Disulfide	C	100 (45.4)
Arsenic Pentoxide	B	10 (4.54)
Arsenic Trichloride	C	100 (45.4)
Arsenic Trioxide	B	10 (4.54)
Arsenic Trisulfide	B	10 (4.54)
Barium Cyanide	A	1 (0.454)
Benzene	C	100 (45.4)

ENVIRONMENTAL PROTECTION AGENCY
(FRL 472-2
[40 CFR Part 119]

DETERMINATION OF UNITS OF MEASUREMENT AND RATES OF PENALTY FOR HAZARDOUS SUBSTANCES

Notice of Proposed Rulemaking

Notice is hereby given in accordance with 5 U.S.C. 553 that the Administrator, Environmental Protection Agency, under authority contained in Section 311(b)(2)(B)(iv) of the Federal Water Pollution Control Act Amendments of 1972, [33 U.S.C. 1251 et seq., (the Act)], proposes to create a new Part 119 of Title 40 of the Code of Federal Regulations, determining units of measurement and rates of penalty to be applied for the assessment of civil penalties under Section 311(b)(2)(B)(iii)(bb) of the Act for discharges of non-removable hazardous substances.

The Federal Water Pollution Control Act Amendments of 1972 (P.L. 92-500) amended the Federal Water Pollution Control Act (33 U.S.C. 1151 et seq.) to add a new Section 311, which provides in subsection 311(b)(2)(B)(iv) as follows:

> "The Administrator shall establish by regulation, for each hazardous substance designated under subparagraph (A) of this paragraph, and within 180 days of the date of such designation, a unit of measurement based upon the usual trade practice and, for the purpose of determining the penalty under clause (iii)(bb) of this subparagraph, shall establish for each such unit a fixed monetary amount which shall be not less than $100 nor more than $1,000 per unit. He shall establish such fixed amount based on the toxicity, degradability, and dispersal characteristics of the substance."

[FR Doc.75-34049 Filed 12-29-75;8:45 am]

This notice deals with "... hazardous substances, other than oil..." as noted in Section 311(b)(2)(A). Sections 311(b)(2)(A) and 311(b)(2)(B)(i) of the Act require that the Administrator designate hazardous substances and determine whether any such designated substance can actually be removed. Section 311(b)(4) mandates a determination of the harmful quantity of each designated substance. The designation of hazardous substances, determination of their removability, and establishment of harmful quantities are published as proposed rules concurrently with this notice as Parts 116, 117, and 118 respectively.

A. General Considerations

1. Mixtures

Section 311 specifically requires that elements and compounds be designated as hazardous substances. This has led to the development of methods for defining harmful quantities and rates of penalty based on pure compound characteristics. The presence of additional materials may affect toxicity through synergism, antagonism, addition or other interactive mechanisms. For these mixtures individual bioassays would be required to specify toxic levels of the specific mixture discharged into the specific receiving water body. Such an approach is obviously not practicable since it is not possible to predict the combinations that might be involved. It is also not feasible to designate harmful quantities and rates of penalty for all conceivable mixtures. Consequently, the approach proposed for dealing with discharges of mixtures or solutions is to assume that damages caused by individual constituents are additive. For a mixture or solution of substance X, substance Y, and substance Z, etc., the rate of penalty will be the sum of

the rates for individual hazardous components if the quantity discharged equals or exceeds the harmful quantity for the mixture (40 CFR Part 118).

2. Harmful Quantities

In brief, the method selected for determination of harmful quantities involves modification of a system used in the International Convention for the Prevention of Pollution from Ships, 1973[1], by the Intergovernmental Maritime Consultative Organization (IMCO). Substances are divided into four categories on the basis of relative hazard to the environment. The smallest common commercial container size was then defined as the harmful quantity for all substances in the most toxic EPA harmful quantity category. Other categories were thereafter assigned harmful quantities on a proportional basis. If the upper aquatic toxicity limit of an EPA category was ten times higher than the upper limit of the preceeding, more toxic category, then the harmful quantity was set as ten times larger, and so forth. Further details of the categorization process may be found in the notice of proposed rulemaking for determining harmful quantities (40 CFR Part 118), published concurrently.

B. Approach for Determination of Rates of Penalty

An integral part of the penalty structure provided in Section 311 of the Act is the designation of a unit of measurement. Specifically, Section 311(b)(2)(B)(iv) requires the Administrator to establish "... a

1. Hearings before the Committee on Commerce, United States Senate, 93rd Congress, First Session, November 14, 1973, Serial No. 93-52.

unit of measurement based on the usual trade practice..." for each designated substance. This section also specifies that the civil penalties assessable under Section 311(b)(2)(B)(iii)(bb) shall fall in the range of $100-$1,000 per unit of measurement.

Agency studies involving industry and trade associations have not revealed such units common to trade practice. A common unit of measurement for the manufacturer is frequently different from that employed by the user of the same material. Furthermore, price quotations show a variety of commercial units for the same chemical. Transporters of chemicals frequently employ units different from those of either manufacturer or user. Still further variations are seen depending on the mode of transport.

In summary, the finding of the Agency is that the only common unit of measure is a weight unit, the pound. Multiples of this basic unit are utilized throughout the chemical and transportation industries, but no single multiple of the basic pound unit can be found to be representative of the usual trade practice for any chemical. The penalties using these common units of measure shall be based on the toxicity, degradability, and dispersal characteristics of the substance [Section 311(b)(2)(B)(iv)] in a manner similar to the determination of those quantities of hazardous substances which are harmful to the public health or welfare at certain times, locations, circumstances and conditions [Section 311(b)(4)]. The feature in common is the potential capacity of the substance to cause environmental damage. Therefore, the minimum quantity of each material causing probable harm can be thought of as a common unit. Thus the

weight corresponding to the smallest common commercial container size, one pound (0.454 kilogram), previously adopted as the "harmful quantity" for materials in the most toxic EPA harmful quantity category, has also been adopted as the "unit of measurement" for materials in that category and assigned a base penalty rate of $1,000 per unit. Other categories are assigned larger units of measurement which are multiples of the basic one pound unit and are found as a direct proportion between the upper aquatic toxicity limit of the less toxic category and the upper aquatic toxicity limit of Category A substances. The aquatic toxicity ranges for various hazard categories and the units of measurement derived from the appropriate ratios are found in Table 1.

TABLE 1
UNITS OF MEASUREMENT

EPA Category	Unit of Measurement lb(kg)	Representative Range
A	1 (0.454)	LC50*<1ppm
B	10 (4.54)	1 ppm ≤ LC50 < 10 ppm
C	100 (45.4)	10 ppm ≤ LC50 < 100 ppm
D**	500 (227)	100 ppm ≤ LC50 ≤ 500 ppm

* LC50 means that concentration of material which is lethal to one-half of the test population of aquatic animals upon continuous exposure for 96 hours or less.

** The selection criteria (40 CFR Part 116) restrict the upper aquatic toxicity limit of the IMCO aquatic toxicity criterion from 1,000 to 500 (40 CFR Part 118), and thus alter the range used here for Category D to 100-500 ppm.

The proposed system recognizes that not all substances within a category exert their damaging effects equally. The law requires that the penalties range between $100 and $1,000 per unit of measurement. For each category in the proposed system the upper penalty limit is modified by physical/chemical adjustment factors which reflect the substance's ability to disperse.

The adjustment factor (0.1 to 1.0) arises from a second profiling operation based on the solubility, density, volatility, and associated propensity for dispersal in water of each hazardous substance. Each substance has been placed in one of eight categories combining these physical/chemical/dispersal properties in various ways. The relative harm these categories pose to the environment was then ranked. The terms involved and final relative ranking of physical/chemical/dispersal categories, in increasing order of relative damage potential, are shown in Table 2 and the the physical/chemical/dispersal factor of each substance is also indicated in Table 119.5.

TABLE 2
PHYSICAL/CHEMICAL/DISPERSAL (P/C/D) ADJUSTMENT FACTORS

Material Classification	P/C/D Category	Rank	P/C/D Factor
Insoluble Volatile Floater	IVF	1	0.10
Insoluble Nonvolatile Floater	INF	2	0.23
Insoluble Sinker	IS	3	0.36
Soluble Mixer	SM	4	0.49
Precipitator	P	5	0.62

Table 2 (Continued)

Material Classification	P/C/D Category	Rank	P/C/D Factor
Soluble Sinker	SS	6	0.75
Soluble Floater	SF	7	0.88
Miscible	M	8	1.0

Legend:

IVF (insoluble volatile floater) - materials lighter than water with a vapor pressure greater than 10 mm Hg and a solubility of less than 1,000 ppm (weight per weight basis) or materials with vapor pressure greater than 100 mm Hg and solubility less than 10,000 ppm.

INF (insoluble nonvolatile floater) - materials lighter than water with a vapor pressure less than 10 mm Hg and solubility less than 1,000 ppm (weight per weight basis).

IS (insoluble sinker) - materials heavier than water and of solubility less than 1,000 ppm (weight per weight basis).

SM (soluble mixer) - solid substances which have a solubility greater than 1000 grams of solute per 1000 grams of water.

P (precipitator) - salts which dissociate or hydrolyze in water with subsequent precipitation of a toxic ion.

SS (soluble sinker) - materials heavier than water and of solubility greater than 1,000 ppm (weight per weight basis).

SF (soluble floater) - materials lighter than water and of a solubility greater than 1,000 ppm (weight per weight basis).

M (miscible) - liquid substances which can freely mix with water in any proportion.

In summary, the adjusted rates of penalty, in dollars per unit of measurement, arising from all possible combinations of toxic category and P/C/D factor are seen in Table 3 below.

TABLE 3
RATES OF PENALTY
IN $/UNIT OF MEASUREMENT*

Category	P/C/D Classes IVF	INF	IS	SM	P	SS	SF	M
A	100	230	360	490	620	750	880	1000
B	100	230	360	490	620	750	880	1000
C	100	230	360	490	620	750	880	1000
D	100	230	360	490	620	750	880	1000

For convenience, Table 4 shows the adjusted rates of penalty, in dollars per pound, for all combinations of toxic category and P/C/D factor.

TABLE 4
RATES OF PENALTY
IN $/LB

Category	P/C/D Classes IVF	INF	IS	SM	P	SS	SF	M
A	100	230	360	490	620	750	880	1000
B	10	23	36	49	62	75	88	100
C	1.0	2.3	3.6	4.9	6.2	7.5	8.8	10
D	0.20	0.46	0.72	0.98	1.2	1.5	1.8	2.0

Prevention and mitigation of the effect of discharges are the goals of this proposed rule. The harmful effects of discharges may be reduced in many cases by such actions as warnings to affected water users, containment, treatment, appropriate final disposal of the discharge or debris from a clean-up operation, environmental restoration and monitoring of hazardous substance levels. Details and further suggestions may be found in the National Oil and Hazardous Substances Pollution Contingency Plan (40 CFR Part 1510). The "General Pattern of Response Actions" has been specified in 40 CFR Part 1510.53. For those waste materials considered to be hazardous, disposal will require special precautions in addition to Guidelines published as 40 CFR Part 24. Complete documentation of response activities and plans for prevention of future discharges, in addition to providing part of the basis for civil penalties, would be most protective of the long-term interests of the public.

* Unit of measurements for categories are A = 1 lb, B = 10 lb, C = 100 lb, D = 500 lb.

C. Discretionary Choice of Civil Penalty System

Section 311 provides two civil penalty systems to discourage the discharge of nonremovable hazardous substances. The decision as to which penalty system [311(b)(2)(B)(iii)] should be applied was left to the discretion of the Administrator.

Concern has been expressed that the potential economic impact of penalties which might be assessed under Section 311(b)(2)(B)(iii)(bb) could be so great that major transportation modal shifts might occur, along with changes in plant siting. The Agency has no evidence at this time which would suggest that these changes are necessary or desirable. Consultation with the Department of Transportation has suggested that available transportation expertise is being utilized but that remedial civil penalties would enhance the protection of the environment.

It is proposed that the Administrator's discretion in regard to penalties for discharges of nonremovable hazardous substances be used to control economic impact while providing strong incentive for mitigation of spill threats to public health or welfare, based upon the following principles:

1. Economic incentive in the form of penalties will motivate additional care for prevention of discharges;
2. Economic incentives in the form of penalties will motivate additional action to mitigate damages resulting from discharges;
3. Penalties should be assessed for nonremovable hazardous substances (40 CFR Part 117) discharged in amounts equal to or greater than harmful quantities (40 CFR Part 118);
4. Penalties should normally be assessed in the range of $500 to $5,000 on an individual discharge incident basis;
5. When assessing civil penalties, the substances' properties as well as the extent of action taken by the discharger to prevent or mitigate damage will be considered;
6. The higher penalty system as provided in 311(b)(2)(B)(iii)(bb) will be used only when the Agency can show gross negligence on the part of the discharger;
7. If the (bb) penalty calculates to be less than $5,000, then the (aa) penalty of $500 to $5,000 per discharge will be used;
8. Case-by-case assessment of the discharger's actions provides the most equitable penalty basis while ensuring the greatest motivation for protection of the environment.

D. Examples of Penalty Determination

1. Assume 2,000 lb. of acetic acid is spilled and that in the judgement of the responsible Federal Officer, the discharger displayed gross negligence by refusing to take mitigating actions. Therefore the civil penalty assessed is determined by the proposed penalty rate multiplied by the number of units discharged. Referring to the accompanying rates of penalty table in Part 119.5, the material is found to be in Category C. In this category, the unit of measurement is 100 pounds. The base rate of penalty is, therefore, $1,000/100 lbs. Since the P/C/D adjustment factor for acetic acid is 1.0, the final penalty rate is $1,000/100 lbs or $10/lb. The final penalty for this spill would be $10/lb x 2,000 lbs = $20,000.

2. Assume 10,000 lb of calcium oxide is spilled, but that in this case the responsible Federal Officer finds the discharger's attempts to mitigate the effects are adequate for the conditions present. Consequently, the penalty recommended to be assessed will fall in the range of $500 to $5,000 per discharge, based on the factors mentioned previously. (Note: By way of contrast, the penalty which might have been assessed in case of inadequate response or mitigation by the discharger is calculated as follows. Referring to the table of Part 119.5 one finds the material belongs to Category D with a P/C/D factor of 0.49. The base rate of penalty is $1,000/UM or $2/lb. The adjusted rate of penalty would have been 0.49 x $2/lb = $0.98/lb and the final penalty would have been $0.98/lb x 10,000 lb = $9,800.)

3. Assume 500 lb. of a solution containing 50% by weight sodium hydroxide and 50% by weight water is spilled. Further, assume that the Administrator determines that gross negligence was the cause of the spill. Only half of the total poundage spilled is a designated hazardous substance. Effectively, 250 lb have been spilled. Sodium hydroxide is a member of Category C (UM = HQ = 100 lb). The P/C/D class of the material is "SS", for which the adjustment factor is 0.75. Therefore, the rate of penalty is 0.75 x $1,000/UM = $750/UM or 0.75 x $10/lb = $7.50/lb and the penalty would equal $7.50/lb x 250 lb = $1,875. However, for those spills in quantities leading to a total penalty of less than $5,000 under the penalty rate scheme of 311(b)(2)(B)(iii)(bb), the Administrator will assess a penalty in the range of $500 to $5,000 per discharge event according to the guidelines given earlier.

Interested persons may participate in this rulemaking by submitting written comments or requests for information, in triplicate, to: Dr. C. Hugh Thompson, WH-595, U.S. Environmental Protection Agency, Washington, D.C. 20460.

The Agency is particularly interested in comments relative to:

1). Effectiveness of the penalty rates in encouraging prevention and damage mitigation measures;
2). The use and magnitude of physical/chemical/dispersal factors;
3). The potential impact of penalty rates on producers, transporters, and handlers of hazardous substances;
4). The general workability of the proposed regulation guidelines for penalty rate discretion by the Administrator. The use of gross negligence as the prime basis for the Administrator's discretion was necessary to implement this section of the Act, due to the inflexibility of both the 311(b)(2)(B)(iii)(bb) upper penalty limits and the 311(b)(2)(B)(iv) penalty rate structure.

All comments received on or before 60 calendar days after the date of this publication will be considered before taking further action on the proposed rule.

A copy of all comments will be available for inspection and copying at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street, S.W., Washington, D.C. 20460. The Environmental Protection Agency information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

Executive Order 11821 (November 27, 1974) requires that major proposals for legislation and promulgation of regulations and rules by agencies of the Executive Branch be accompanied by a statement certifying that the inflationary impact of the proposal has been evaluated.

A number of criteria have been defined to determine which actions require an inflationary impact statement. The Agency's analysis of the potential economic impact of these regulations indicate that none of the criteria defining a major proposal have been met. Thus, it is hereby certified that the economic and inflationary effects of this proposal have

been carefully evaluated in accordance with Executive Order 11821 and that no inflationary impact statement is required.

Part 119 - DETERMINATION OF UNITS OF MEASUREMENT AND RATES OF PENALTY FOR HAZARDOUS SUBSTANCES

119.1 Applicability
119.2 Abbreviations
119.3 Definitions
119.4 Guidelines for Discretionary Choice for Rate of Penalty
119.5 Determination of Units of Measurement and Rates of Penalty

Authority: Sections 311(b)(2)(B)(iv) and 501(a) of the Federal Water Pollution Control Act Amendments of 1972, [33 U.S.C. 1251 et seq., (the Act)].

119.1 APPLICABILITY

The regulation of this part makes a determination of the Units of Measurement and Rates of Penalty appropriate for discharges of non-removable hazardous substances (40 CFR Parts 116 and 117) in quantities equal to or exceeding the Harmful Quantity, (40 CFR Part 118). This regulation applies to designated substances in quantities equal to or in excess of those set forth in 40 CFR Part 118 when discharged into navigable waters or adjoining shorelines or the waters of the contiguous zone from vessels and offshore or onshore facilities except when the owner or operator can show such discharges are made: (1) in compliance with the requirements of Sections 301, 302, 304, 306, 307, and in compliance with an NPDES permit which has been issued pursuant to Section 402 of the Act, (2) in compliance with permits issued under Section 404 of the Act or Sections 102 and 103 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1401 et seq.), (3) in compliance with approved water treatment plant operations as specified by local, State or Federal health regulations pertaining to safe drinking water,

(4) from properly functioning marine sanitation flow-through devices certified by the United States Coast Guard pursuant to Section 312 of the Act, or (5) in the course of a permitted use of a pesticide registered under 40 CFR Part 162 (Federal Register, Vol. 40, No. 129, Part II, pp. 28242-28286, July 3, 1975) by authority of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended by the Federal Environmental Pesticide Control Act of 1972, (86 Stat. 973, P.L. 92-516, 7 U.S.C. 136 et seq.).

119.2 ABBREVIATIONS

lb = pound(s)

kg = kilogram(s)

HQ = harmful quantity as required by Section 311(b)(4) and specified in 40 CFR Part 118

UM = unit of measurement as required by Section 311(b)(2)(B)(iv)

ROP = rate of penalty as required by Section 311(b)(2)(B)(iv)

119.3 DEFINITIONS

As used in this part, all terms shall have the same meaning in Section 311 of the Act and in 40 CFR Parts 116, 117, and 118.

119.4 GUIDELINES FOR DISCRETIONARY CHOICE OF RATE OF PENALTY

Prevention or mitigation and minimization of damage to public health or welfare resulting from discharges of nonremovable hazardous substances are encouraged by use of the following penalty system:

119.4a

Penalties will be assessed based upon the substance's toxicity, degradability, dispersal characteristics and the mitigating steps taken in the event of discharges of nonremovable hazardous substances in excess of the harmful quantity (40 CFR Part 118) at the rate of $500 to $5,000 per discharge, by use of Section 311(b)(2)(B)(iii)(aa), unless the Administrator determines that gross negligence on the part of the owner or operator of the vessel or facility is the cause of the discharge, or that after the discharge has occurred, the owner or operator has displayed gross negligence in minimizing or mitigating effects on the public health or welfare.

119.4b

When gross negligence is determined as in 119.4a, the Administrator will assess penalties for discharge of a nonremovable hazardous substance in excess of the harmful quantity using Section 311(b)(2)(B)(iii)(bb) and a rate of penalty per unit of measurement as set forth in Section 119.5 of this part, unless the total penalty assessed under this part is $5,000 or less; then a penalty on a "per discharge" basis, as noted in 119.4a will be used.

119.5 DETERMINATION OF UNITS OF MEASUREMENT AND RATES OF PENALTY

In accordance with Section 311(b)(2)(B)(iv) of the Act, the base penalty rate is determined for each category to be $1,000 per unit of measurement. The penalty rate for each substance is found by multiplication of the base penalty rate by an adjustment factor (a "P/C/D factor" which ranges from 0.1 to 1.0) reflecting the solubility, density, volatility, and associated propensity for dispersal in water of each hazardous substance, which thus satisfies the requirement that the penalty rate vary between $100 and $1,000 per unit of measurement.

For discharges of mixtures or solutions, the rate of penalty will be the sum of the rates for individual hazardous components if the quantity discharged equals or exceeds the harmful quantity for the mixture (determined by procedures in 40 CFR Part 118).

The following table lists each designated hazardous substance on the same line with the assigned EPA category, the corresponding unit of measurement (and harmful quantity), the assigned physical/chemical/dispersal (P/C/D) adjustment factor and the rate of penalty in dollars per unit of measurement. For convenience and understanding, the units of measurement have been used to calculate the penalty rates in dollars per pound as shown in the right hand column of Table 118.5.

Table 118.5: EPA HARMFUL QUANTITY CATEGORIES, UNITS OF MEASUREMENT AND RATES OF PENALTY

federal register
Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

NSF: Contributions of Technology to Economic Strength Advisory Group, 1–15–76 60123

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 41—Public Contracts and Property Management

CHAPTER 1—FEDERAL PROCUREMENT REGULATIONS

[FPR Amendment 161]

PART 1–1—GENERAL

Preference for U.S. Flag Air Carriers

This amendment of the Federal Procurement Regulations revises § 1–1.323, Preference for U.S. Flag Air Carriers. The changes reflect the requirements of Pub. L. 93–623 of January 3, 1975. This Act requires the Comptroller General of the United States to disallow payments to contractors that use non-U.S. flag air carriers; i.e., noncertificated air carriers when such use is not satisfactorily proven. To comply with the Act, the contract clause prescribed by the FPR now includes a certification which is to be executed by contractors when a non-U.S. flag air carrier is employed. In addition, the criteria prescribed by the General Accounting Office regarding the availability of U.S. flag air carriers have been included in the amendment.

The table of contents for Part 1–1 is revised to add new entries as follows:

Sec.
1–1.323–3 Availability or unavailability of certificated air carrier.
1–1.323–4 Disallowance of expenditures.
1–1.323–5 Air freight forwarders.

Subpart 1–1.3—General Policies

Section 1–1.323 is revised to read as follows:

§ 1–1.323 Preference for U.S. Flag Air Carriers.

§ 1–1.323–1 Policy.

The policy of the United States regarding the use of air carriers is stated in the International Air Transportation Fair Competitive Practices Act of 1974 (Pub. L. 93–623, January 3, 1975). The Act amended Title XI of the Federal Aviation Act of 1958 (49 U.S.C. 1501 et seq.) and requires all Federal agencies, Government contractors and subcontractors to use U.S. flag air carriers for international air transportation of personnel (and their personal effects) or property to the extent service by such carriers is available. As used in this section the term "U.S. Flag Air Carrier" means a carrier holding a certificate under section 401 of the Act. (49 U.S.C. 1371).

§ 1–1.323–2 Clause.

The contract clause prescribed by this section shall be included in (1) invitations for bids, (2) requests for proposals, and (3) contracts (including contracts resulting from unsolicited proposals) whenever it is possible that international air transportation of personnel (and their personal effects) or property will be required in the performance of the contract. The requirements of this section do not apply to small purchases made in accordance with Subpart 1–3.6.

PREFERENCE FOR U.S. FLAG AIR CARRIERS

(a) Pub. L. 93–623 requires that all Federal agencies and Government contractors and subcontractors will use U.S. flag air carriers for international air transportation of personnel (and their personal effects) or property to the extent service by such carriers is available. It further provides that the Comptroller General of the United States shall disallow any expenditure from appropriated funds for international air transportation on other than a U.S. flag air carrier in the absence of satisfactory proof of the necessity therefor.

(b) The contractor agrees to utilize U.S. flag air carriers for international air transportation of personnel (and their personal effects) or property to the extent service by such carriers is available.

(c) In the event that the contractor selects a carrier other than a U.S. flag air carrier for international air transportation, he will include a certification on vouchers involving such transportation which is essentially as follows:

CERTIFICATION OF UNAVAILABILITY OF U.S. FLAG AIR CARRIERS

I hereby certify that transportation service for personnel (and their personal effects) or property by certificated air carrier was unavailable for the following reasons: [1] (state reasons).

(d) The terms used in this clause have the following meanings:

(1) "International air transportation" means transportation of persons (and their personal effects) or property by air between a place in the United States and a place outside thereof or between two places both of which are outside the United States.

(2) "U.S. flag air carrier" means one of a class of air carriers holding a certificate of public convenience and necessity issued by the Civil Aeronautics Board, approved by the President, authorizing operations between the United States and/or its territories and one or more foreign countries.

(3) The term "United States" includes the fifty states, Commonwealth of Puerto Rico, possessions of the United States, and the District of Columbia.

[1] See Federal Procurement Regulations (41 CFR 1–1.323–3) or section 1–336.2 of the Armed Services Procurement Regulation, as applicable.

(e) The contractor shall include the substance of this clause, including this paragarph (e), in each subcontract or purchase hereunder which may involve international air transportation.

§ 1–1.323–3 Availability or unavailability of certificated air carrier.

Expenditures for service furnished by a noncertificated air carrier generally will be allowed only when service by a certificated air carrier or carriers is "unavailable" as indicated by the June 17, 1975, Comptroller General's memorandum (B–138942) entitled "Guidelines for Implementation of Section 5 of the International Air Transportation Fair Competitive Practices Act of 1974." The criteria contained in the memorandum are reproduced in this section.

(a) Passenger or freight service by a certificated air carrier is considered "available" even though:

(1) Comparable or a different kind of service by a noncertificated air carrier costs less, or

(2) Service by a noncertificated air carrier can be paid for in excess foreign currency, or

(3) Service by a noncertificated air carrier is preferred by the agency or traveler needing air transportation, or

(4) Service by a noncertificated air carrier is more convenient for the agency or traveler needing air transportation.

(b) Passenger service by a certificated air carrier will be considered to be "unavailable":

(1) When the traveler, while en route, has to wait 6 hours or more to transfer to a certificated air carrier to proceed to the intended destination, or

(2) when any flight by a certificated air carrier is interrupted by a stop anticipated to be 6 hours or more for refueling, reloading, repairs, etc., and no other flight by a certificated air carrier is available during the 6 hour period, or

(3) when by itself or in combination with other certificated or noncertificated air carriers (if certificated air carriers are "unavailable") it takes 12 or more hours longer from the original airport to the destination airport to accomplish the agency's mission than would service by a noncertificated air carrier or carriers.

§ 1–1.323–4 Disallowance of expenditures.

The Act and the Comptroller General's memorandum provide that he will disallow any expenditures for commercial foreign air transportation on noncertificated air carriers unless there is included in the appropriate voucher a justification explaining why service by certificated air

V 40 N 251 DEC 31 75 XUM

carriers was "unavailable." The justification requirement is satisfied by the contractor's use of the certification contained in the contract clause which is prescribed by § 1–1.323–2.

§ 1–1.323–5 Air freight forwarders.

(a) International air freight forwarders, as defined in 14 CFR 297.1(c) and 297.2 (1974) that are engaged in foreign air transportation (49 U.S.C. 1301(21)(c) (1970)), may be used for Government-financed movements of property. The rule stated in § 1–1.323–3 also applies to the use of underlying air carriers by international air freight forwarders engaged in such foreign air transportation.

(b) In order that bills submitted by international air freight forwarders engaged in international air transportation may be paid upon presentation, such carriers shall submit with their bills a copy of the airway bill or manifest showing the underlying air carriers utilized with such justification certifications as they may have for the use of underlying noncertificated air carriers. Use of the prescribed certification satisfies the justification requirement.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date: The regulation transmitted by this amendment is effective February 28, 1976, but may be observed earlier.

(It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with Executive Order 11821.)

Dated: December 5, 1975.

[FPR Amdt. 159]

PART 1–1—GENERAL

PART 1–4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Public Utility Services

This amendment of the Federal Procurement Regulations changes §§ 1–1.317 and 1–4.410–5. The amendment partially implements Recommendation D–18 of the Commission on Government Procurement. The recommendation encourages procuring activities to purchase supplies or services from public utilities by accepting commercial forms and provisions that are used by utilities in sales to industry and the general public. Both the recommendation and the executive branch position on the recommendation appreciated, however, that the best interests of the Government and the requirements of law must be recognized. Accordingly, the recommendation is being implemented, consistent with those limitations, insofar as possible. In this connection, several contract clause requirements have been modified for utility contracts. The Certificate of Independent Price Determination is no longer required where rates are set by law or regulation, and the Disputes clause is made inapplicable where disputes are subject to the jurisdiction of a Federal, State, or other appropriate regulatory body. Also, the limited applicability of several other clauses has been more clearly indicated. Further procedures are under development which will be issued at a later date that will complete the implementation of the recommendation.

Subpart 1–1.3—General Policies

Section 1–1.317 is amended to change paragraph (a), as follows:

§ 1–1.317 Noncollusive bids and proposals.

(a) In order to promote full and free competition for Government contracts, the certification prescribed by this section shall be included in all (1) invitations for bids and (2) requests for proposals or quotations. Exceptions to this requirement include the following: Small purchases in accordance with Subpart 1–3.6, requests for technical proposals in connection with two-step formal advertising involving firm fixed-price contracts and fixed-price contracts with escalation, and contracts for utility services where rates are set by law or regulation.

* * * * *

Subpart 1–4.4—Public Utilities

Section 1–4.410–5 is revised, as follows:

§ 1–4.410–5 Uniform clauses for utility service contracts.

The commercial forms and provisions used by utility companies shall be used by agencies in procuring utility services required for their programs in accordance with the procedures prescribed in this subpart. However, all utility service contracts shall include the clauses prescribed by this section in the manner indicated. The clauses classified as "mandatory" shall be included in all contracts. Clauses which are classified "when applicable" shall be included in accordance with the individual requirements for the use of those clauses.

(a) *Clauses that are mandatory.*

(1) *Definitions.* (See § 1–7.102–1).

(2) *Examination of records by Comptroller General.* (See § 1–7.103–3).

(3) *Equal opportunity.* (See § 1–12.803–2).

(4) *Certification of nonsegregated facilities.* (See § 1–12.803–10.)

(5) *Officials not to benefit.* (See § 1–7.102–17).

(6) *Covenant against contingent fees.* (See § 1–1.503).

(7) *Convict labor.* (See § 1–12.204).

(8) *Contract work hours and Safety Standards Act—overtime compensation.* (See § 1–12.303).

(9) *Disputes.*

DISPUTES

Insert the clause prescribed in § 1–7.102–12, and in negotiated contracts add a paragraph (c), as follows:

(c) The provisions of (a) above shall not apply to disputes which are subject to the jurisdiction of a Federal, State, or other appropriate regulatory body. The provisions of (a) above shall also be subject to the requirements of the law with respect to the rendering of utility services and the collection of regulated rates.

(10) *Conflicts.*

CONFLICTS

To the extent of any inconsistency between the provisions of this contract and any schedule, rider, or exhibit incorporated in this contract by reference or other ire, or any of the Contractor's rules and regulations, the provisions of this contract shall control.

(11) *Listing of employment openings.* (See § 1–12.1102–2).

(12) *Payment of interest on Contractors' claims.* (See § 1–1.322).

(13) *Utilization of Minority Business Enterprises.* (See § 1–1.1310–2(a)).

(14) *Utilization of Small Business Concerns.* (See § 1–1.710–3(a)).

(15) *Utilization of Labor Surplus Area Concerns.* (See § 1–1.805–3(a)).

(16) *Employment of the handicapped.* (See § 1–12.1304–1).

(17) *Clean air and water.* (See § 1–1.2302–2).

(b) *Clauses to be used when applicable.* The following clauses shall be used when applicable:

(1) *Gratuities.* The following clause should be used when the contract is for utility services to be used wholly or partly by one or more installations of the Armed Services.

GRATUITIES

(a) The Government may, by written notice to the Contractor, terminate the right of the Contractor to proceed under this contract if it is found, after notice and hearing, by the Head of the agency or his duly authorized representative, that gratuities (in the form of entertainment, gifts, or otherwise) were offered or given by the Contractor, or any agent or representative of the Contractor, to any officer or employee of the Government with a view toward securing a contract or securing favorable treatment with respect to the awarding or amending, or the making of any determinations with respect to the performing of such contract; *provided*, That the existence of the facts upon which the Head of the agency or his duly authorized representative makes such findings shall be in issue and may be reviewed in any competent court.

(b) In the event this contract is terminated as provided in paragraph (a) hereof, the Government shall be entitled (i) to pursue the same remedies against the Contractor as it could pursue in the event of a breach of the contract by the Contractor, and (ii) as a penalty in addition to any other damages to which it may be entitled by law, to exemplary damages in an amount (as determined by the Head of the agency or his duly authorized representative) which shall be not less than three nor more than ten times the costs incurred by the Contractor in providing any such gratuities to any such officer or employee.

(c) The rights and remedies of the Government provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this contract.

(2) *Parties of interest.*

PARTIES OF INTEREST

This contract shall be binding upon and inure to the benefit of the successors, legal representatives, and assignees of the respective parties hereto.

(3) *Privacy Act.* (See § 1–1.327–5(c)).

(4) *Minority Business Enterprises Subcontracting Program.* (See § 1–1.1310–2(b)).

(5) *Small Business Subcontracting Program.* (See § 1–1.710–3(b)).

(6) *Labor Surplus Area Subcontracting Program.* (See § 1–1.805–3(b)).

(7) *Cost accounting standards.* Insert the two notices prescribed by § 1–3.1203(a)(3) and (b)(2) in negotiated solicitations under the conditions contained in Subpart 1–3.12. Incorporate the contract clause set forth in § 1–3.1204 in negotiated contracts under the conditions contained in Subpart 1–3.12. Note that as provided in § 1–3.1203, the notice and clause shall not be used when the price is set by law or regulation.

(c) GSA has included the uniform mandatory clauses listed in paragraph (a) of this section in its GSA Form 1685, Supplemental Provisions (Utility Service Contract). Upon request, GSA will furnish a copy of this form to any agency for its guidance, use, or reproduction as an agency form.

(Sec. 205(c) 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This amendment is effective February 28, 1976, but may be observed earlier.

Dated: December 16, 1975.

(It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with Executive Order 11821.)

JACK ECKERD,
Administrator of General Services.

[FPR Amendment 160]

PROCUREMENT

Cost Accounting Standards

This amendment of the Federal Procurement Regulations provides administrative guidance to implement the Cost Accounting Standards contract clause in Subpart 1–3.12. The amendment provides guidelines for the administration of (1) noncompliance issues for cost accounting standards and disclosed accounting practices, (2) equitable adjustments for new cost accounting standards, and (3) voluntary changes in accounting practices. An additional notice for solicitations and an additional contract clause entitled "Administration of Cost Accounting Standards" are added. Portions of Parts 1–4 and 1–7 affected by the changes are also amended. Unless exempted in the FPR, these guidelines apply to both negotiated national defense and negotiated nondefense contract and subcontracts.

PART 1–3—PROCUREMENT BY NEGOTIATION

The table of contents for Part 1–3 is amended to revise the entries for §§ 1–3.1204, 1–3.1208, and 1–3.1212—1–3.1219, and to add new entries, as follows:

Sec.
1–3.1203–1 Materiality.
1–3.1204 Contract clauses.
1–3.1204–1 Cost accounting standards.
1–3.1204–2 Administration of cost accounting standards.
1–3.1208 Contract administration for CASB matters by agencies other than DOD.
1–3.1212 Administration of noncompliance issues.
1–3.1213 Administration of equitable adjustments for new cost accounting standards.
1–3.1214 Administration of voluntary changes.
1–3.1215 [Reserved]
1–3.1216 [Reserved]
1–3.1217 [Reserved]
1–3.1218 [Reserved]
1–3.1219 [Reserved]
1–3.1220–8 Accounting for costs of compensated personal absence.
1–3.1220–9 Depreciation of tangible capital assets.

AUTHORITY: 40 U.S.C. 486(c).

Subpart 1–3.12—Cost Accounting Standards

1. Section 1–3.1201–1 is added, as follows:

§ 1–3.1202–1 Materiality.

Materiality shall be considered in the application of regulations and standards of the Cost Accounting Standards Board. The criteria set forth in this § 1–3.1202–1 shall be used.

(a) In promulgating its rules and regulations, the Board made the following comment:

Materiality. The Board notes that many commentators urged that a concept of materiality be incorporated in the Board's regulations, to the end that minimal or insignificant modifications of or failures to use disclosed cost accounting practices would not be subject to price adjustment.

The Board agrees that the administration of its rules, regulations, and Cost Accounting Standards should be reasonable and not seek to deal with insignificant amounts of cost. Since this rule of common sense is already practiced by the Government, the Board does not believe that there is any need to attempt to formulate and state an acceptable concept of materiality applicable to all Board rules, regulations and standards, although the Board might consider doing so if subsequent events indicate the necessity therefor. The Board does recognize that in particular standards a "materiality" statement may be useful, and in such cases, it will include one. See for example the addition at § 402.50(e). (of 4 CFR.) (37 FR 4141, February 29, 1972.)

In the Cost Accounting Standards Board Statement of Operating Policies, Procedures, and Objectives, the following statement of the Board's objective in regard to materiality was promulgated:

Materiality. The Board believes that the administration of its rules, regulations, and Cost Accounting Standards should be reasonable and not seek to deal with insignificant amounts of cost. Although this rule of common sense is already practiced by the Government, the Board recognizes that, in particular standards, a specific "materiality" statement may be useful; and, in such cases, it will include one.

The Board expects that in implementing its promulgations, it is appropriate to consider the following criteria in determining whether a transaction or a decision about an accounting practice is material in the context of any Board issuance:

1. *The absolute dollar amount involved.* The larger the dollar amount, the more likely it is that a decision involving it will be material.

2. *The amount of total contract cost compared with the amount under consideration.* The larger the portion of the total contract cost which is represented by the item or the decision under consideration, the more likely it is to be material.

3. *The relationship between a cost item and a cost objective.* Decisions about direct cost items, especially if the amounts are themselves part of a base for distribution of indirect cost, will normally be more material than like decisions about indirect costs.

4. *The impact on Government funding.* Decisions about accounting treatment will be more material if they influence the distribution of costs between Government and non-Government cost objectives than if all cost objectives have Government financial support.

5. *The relationship to price.* When contract pricing is based upon estimated cost, decisions about cost accounting treatment in estimates are more material than comparable decisions about treatment of actual costs. When contract pricing is based on actual costs, decisions about accounting treatment for actual costs are more material than comparable decisions about estimates.

6. *The cumulative effect of individually immaterial items.* It is appropriate to consider whether individual variances (a) tend to offset one another, or (b) tend to be in the same direction and hence to accumulate into a material amount.

These criteria should be considered together; no one criterion is wholly determinative of immateriality. In particular standards the Board will give consideration to defining materiality in specific dollar amounts and/or specific percentages of impact on operations covered by the entire Standard or any provision thereof whenever it appears feasible and desirable to do so." (38 FR 6122 and 6123, March 6, 1973.)

(b) The cost of administrative processing of the price adjustment modification shall be considered. If the cost to process exceeds the amount to be recovered, it is less likely the amount will be material.

2. Section 1–3.1203 is changed to amend paragraph (a), revise paragraph (g), and add a new paragraph (i), as follows:

§ 1–3.1203 Applicability of cost accounting standards and prime contractor disclosure statement(s).

(a) *Solicitation notices.* * * *

(1) *National defense contracts.* The notice entitled *Disclosure Statement—Cost Accounting Practices and Certification* set forth in § 1–3.1203(a)(3), the notice entitled *Cost Accounting Standards—Exemption for Contracts of $500,000 or Less—Certification* set forth in § 1–3.1203(h)(2), and the notice entitled *Additional Cost Accounting Standards Applicable to Existing Contracts—Certification* set forth in § 1–3.1203(i)(2) shall be inserted in all solicitations which are likely to result in a negotiated contract exceeding $100,000, except when:

* * * * *

(g) *Amendment of disclosure statement(s).* Amendments of a Disclosure Statement after contract award shall be processed in accordance with 4 CFR

V 40 251 DEC 31 75 XUM

351.120 and §§ 1–3.1205(d) and 1–3.1207 of these regulations.

* * * * *

(i) *Effect of proposed award on existing contracts and subcontracts containing the Cost Accounting Standards clause.*

(1) In addition to compliance with all cost accounting standards in effect on the date of award of a contract or if the contractor has submitted cost or pricing data, on the date of final agreement on price as shown on the contractor's signed certificate of current cost or pricing data, paragraph (a)(3) of the Cost Accounting Standards clause (§ 1–3.1204–1) requires that a contractor comply with any cost accounting standard which thereafter becomes applicable to any other of his contracts or subcontracts. The applicability of the additional standard(s) to an existing contract or subcontract is prospectively from the date of applicability to any other contract or subcontract. Thus, if an additional standard is promulgated by the CASB with an effective date after award of the existing contract, it would not become applicable to that contract until the contractor was awarded a new contract or subcontract to which the additional standard is applicable. This provision operates so that at any given time a contractor is complying with identical cost accounting standards under all of his contracts and subcontracts subject to the clause.

(2) *Third notice for solicitations.* The following notice will be inserted (as well as the notice in paragraph (h)(2) of this section) in all solicitations that contain the notice entitled *Disclosure Statement—Cost Accounting Practices and Certifications* as required by paragraph (a)(3) of this section:

ADDITIONAL COST ACCOUNTING STANDARDS APPLICABLE TO EXISTING CONTRACTS—CERTIFICATION

(a) Cost accounting standards will be applicable and effective as promulgated by the Cost Accounting Standards Board to any award as provided in the Federal Procurement Regulations Subpart 1–3.12. If the offeror presently has contracts or subcontracts containing the Cost Accounting Standards clause, a new standard becomes applicable to such existing contracts prospectively when a new contract or subcontract containing such clause is awarded on or after the effective date of such new standard. Such new standard may require a change in the offeror's established cost accounting practices, whether or not disclosed. The offeror shall specify by an appropriate entry below, the effect on his cost accounting practice.

(b) The offeror hereby certifies that an award under this solicitation [ ] would, [ ] would not, in accordance with paragraph (a)(3) of the Cost Accounting Standards clause require a change in his established cost accounting practices affecting existing contracts and subcontracts.

NOTE: If the offeror has checked "would" above, and is awarded the contemplated contract, he will also be required to comply with the clause entitled Administration of Cost Accounting Standards.

[End of notice]

3. Section 1–3.1204 is revised to change the caption of the section, to designate the present contract clause (§ 1–3.1204) as § 1–3.1204–1 (without change), and to add a new contract clause as § 1–3.1204–2, as follows:

§ 1–3.1204 Contract clauses.

The clauses set forth in §§ 1–3.1204–1 and 1–3.1204–2 shall be inserted in all negotiated contracts exceeding $100,000 unless the procurement is exempted under § 1–3.1203(a)(1), (2), or (h)(1).

§ 1–3.1204–1 Cost accounting standards.

COST ACCOUNTING STANDARDS

* * * * *

§ 1–3.1204–2 Administration of cost accounting standards.

ADMINISTRATION OF COST ACCOUNTING STANDARDS

For the purpose of administering Cost Accounting Standards requirements under this contract, the Contractor shall:

(a) Submit to the cognizant contracting officer a description of the accounting change and the general dollar magnitude of the change to reflect the sum of all increases and the sum of all decreases for all contracts containing the Cost Accounting Standards clause:

(1) For any change in cost accounting practices required to comply with a new Cost Accounting Standard in accordance with paragraphs (a)(3) and (a)(4)(A) of the clause of this contract entitled "Cost Accounting Standards" within 60 days (or such other date as may be mutually agreed to) after award of a contract requiring such change;

(2) For any change to cost accounting practices proposed in accordance with paragraph (a)(4)(B) of the clause of this contract entitled "Cost Accounting Standards" not less than 60 days (or such other date as may be mutually agreed to) prior to the effective date of the proposed change; or

(3) For any failure to comply with an applicable Cost Accounting Standard or to follow a disclosed practice as contemplated by paragraph (a)(5) of the clause of this contract entitled "Cost Accounting Standards" within 60 days (or such other date as may be mutually agreed to) after the date of agreement of such noncompliance by the Contractor.

(b) Submit a cost impact proposal in the form and manner specified by the cognizant contracting officer within 60 days (or such other date as may be mutually agreed to) after the date of determination of the adequacy and compliance of a change submitted pursuant to (a)(1), (2), or (3) above.

(c) Agree to appropriate contract and subcontract amendments to reflect adjustments established in accordance with paragraphs (a)(4) and (a)(5) of the clause of this contract entitled "Cost Accounting Standards."

(d) Include the substance of this clause in all negotiated subcontracts containing the clause entitled "Cost Accounting Standards." In addition, include a provision in these subcontracts which will require such subcontractors, within thirty (30) days after receipt of award, to submit the following information to the contracting officer cognizant of the subcontractor's facility:

(1) Subcontractor's name and subcontract number;

(2) Dollar amount and date of award;

(3) Name of Contractor making the award; and

(4) A statement as to whether the subcontractor has made or proposes to make any changes to accounting practices that affect prime contracts or subcontracts containing the Cost Accounting Standards clause, unless such changes have already been reported. If award of the subcontract results in making a Cost Accounting Standard(s) effective for the first time this shall also be reported.

(e) In the event an adjustment is required to be made to any subcontract hereunder, notify the cognizant contracting officer in writing of such adjustment and agree to an adjustment in the price or estimated cost and fee of this contract, as appropriate, based upon the adjustment established under the subcontract. Such notice shall be given within 30 days after receipt of the proposed subcontract adjustment, and shall include a proposal for adjustment to such higher tier subcontract or prime contract, as appropriate.

(f) When the Cost Accounting Standards clause and this clause are included in subcontracts, the term "contracting officer" shall be suitably altered to identify the purchaser.

[End of clause]

4. Section 1–3.1205 is amended to revise paragraphs (b) and (c), and to add a new paragraph (d), as follows:

* * * * *

§ 1–3.1205 Review of prime contractor Disclosure Statements.

(b) *Determination of adequacy.* The cognizant contract auditor shall perform an initial review of a Disclosure Statement to ascertain whether it adequately describes the offeror's cost accounting practices. In order to be deemed adequate, the Disclosure Statement must be current, accurate, and complete. Upon completion of this initial review the results shall be reported to the cognizant contracting officer. When the cognizant contracting officer determines that adequate disclosure has not been made, he shall identify the areas of inadequacy and request a revised Disclosure Statement from the offeror and so advise the auditor and the procurement contracting officer. When the cognizant contracting officer determines that the Disclosure Statement is adequate, he shall notify the offeror in writing and send a copy to the auditor and the procurement contracting officer. Notification of adequacy or inadequacy shall normally be made within 30 days after receipt of a Disclosure Statement by the cognizant contracting officer. In addition, the notice shall state that a disclosed practice shall not, by virtue of such disclosure, be deemed to be a proper, approved, or agreed to practice for pricing proposals or accumulating and reporting contract performance cost data. The contact may be awarded when it is determined that an adequate disclosure has been made (see § 1–3.1203(b)).

(c) *Determination of compliance.* Subsequent to the issuance of the above notification, a more detailed review of the Disclosure Statement shall be made by the auditor to ascertain whether the disclosed practices are in compliance with Part 1–15 or ASPR Section XV, as applicable, and the Cost Accounting Standards. The auditor shall advise the cognizant contracting officer of his findings. The cognizant contracting officer shall take action regarding noncompliance with Cost Accounting Standards in accordance with § 1–3.1212. A revised Disclosure Statement may be required. In addition, adjustment of the prime contract price or cost allowance in accordance with § 1–3.1207(b) may be required. Noncompliance with Part 1–15 or Section XV shall be processed separately in accordance with normal administrative practices.

(d) *Review of changed practices.* (1) When a change to disclosed practices is proposed or required, a description of the changed practices shall be distributed in accordance with § 1–3.1203(c). The cognizant contract auditor shall review the changed practices for adequacy and compliance (as defined in (b) and (c) of this section) concurrently. Upon completion of the review, the results shall be reported to the cognizant contracting officer. When the cognizant contracting officer determines that the changed practices are adequate and in compliance, he shall so notify the contractor and send a copy of the notification to the auditor.

(2) When the cognizant contracting officer determines that the description of the changed practices is not adequate, or the changed practices are not in compliance, he shall identify the deficiencies and so notify the contractor and send a copy of the notification to the auditor. This notice shall require the contractor to advise the cognizant contracting officer and the auditor of the corrective action taken or to be taken. Resubmission of the changed practices will be required. If the contractor has submitted an adequate description of the changed practices but these practices are determined to be in noncompliance and the contractor does not agree, the cognizant contracting officer shall issue an adequacy determination with the stipulation that if those changed practices are implemented for the purpose of pricing or costing Government contracts, the contractor shall be considered in noncompliance and the cognizant contracting officer shall take action in accordance with § 1–3.1212.

(3) When a change to established, but not disclosed, practices is proposed or required, it shall be processed in accordance with paragraph (d)(1) and (2) of this section except that no submission is required to be made to the Cost Accounting Standards Board.

5. Section 1–3.1207 is amended to revise paragraphs (a), (c) and to add paragraph (c)(3), as follows:

§ 1–3.1207 Contract price adjustments.

(a) *Modification to Disclosure Statements or established practices.* Paragraph (a)(4) of the Cost Accounting Standards clause (§ 1–3.1204–1) provides for adjustment of the contract price under certain circumstances. The cognizant contracting officer is responsible for obtaining the contractor's cost impact proposal and for the conduct of all negotiations of such adjustments to all Government prime contracts.

* * * * *

(c) *Conduct of negotiations of defense and nondefense contracts and execution of supplemental agreements.* The cognizant contracting officer shall require the contractor to include in the cost impact proposal, proposals for adjustment to subcontracts containing the Cost Accounting Standards clause. Negotiations pursuant to paragraphs (a) and (b) of this section shall be conducted on behalf of all Government agencies including, but not limited to, DOD, NASA, ERDA, and GSA. As part of these negotations the cognizant contracting officer shall also determine the effect of the change in accounting practices on each subcontract being performed by the contractor and containing the Cost Accounting Standards clause. The cognizant contracting officer shall invite purchasing officers to participate in negotiations of adjustments when the price of any of their contracts will be increased or decreased by $10,000 or more. At the conclusion of negotiations the following actions shall be taken by the cognizant contracting officer:

* * * * *

(3) When a subcontract is to be adjusted, copies of the memorandum indicating the effect on costs shall be furnished the cognizant contracting officer of the next higher tier subcontractor or prime contractor, as appropriate. This memorandum shall be the basis for negotiation between the subcontractor and the next higher tier subcontractor or prime contractor and execution of a supplemental agreement to the subcontract. The cognizant contracting officer of the next higher tier subcontractor shall furnish in turn a memorandum of these negotiations to the cognizant contracting officer of the next higher tier subcontractor or prime contractor until the adjustment is reflected in the prime contract.

6. Section 1–3.1208 is amended to revise the caption and paragraph (a) and to change paragraph (b) by deleting the first sentence in the paragraph, as follows:

§ 1–3.1208 Contract administration for CASB matters by agencies other than DOD.

(a) A list of agency contact points for the identification of cognizant contracting officers will be published from time to time in FPR Bulletins. (NOTE: The initial GSA Bulletin FPR 22 appears at 40 FR 17644, April 21, 1975.) The various components of the Department of Defense have assigned a CASB cognizant contracting officer for the majority of contractors/subcontractors subject to CASB rules and regulations. This contracting officer is also the cognizant Government contracting officer for nondefense contracts with such contractors/subcontractors awarded by the various civilian agencies. For other contractors/subcontractors a civilian agency may have assigned a CASB cognizant contracting officer. In the event no cognizant contracting officer has been assigned to a particular contractor/subcontractor, an assignment shall be made in accordance with paragraph (b) of this § 1–3.1208. CASB cognizant contracting officers assigned by a civilian agency shall perform for DOD and other civilian agencies all functions set out in §§ 1–3.1205, 1–3.1206, and 1–3.1207 which DOD contracting officers perform for other Government agencies when DOD assigns the cognizant contracting officer.

* * * * *

7. Section 1–3.1212 is added, as follows:

§ 1–3.1212 Administration of noncompliance issues.

(a) *Initial finding of compliance or noncompliance.* The cognizant contracting officer shall promptly, upon receipt of a noncompliance report from the auditor, make an initial finding of compliance or noncompliance and advise the auditor.

(b) *Notification to contractor.* If an initial finding of noncompliance is made, the cognizant contracting officer shall immediately notify the contractor in writing of the exact nature of the noncompliance and request him, within 30 days to agree thereto or to submit reasons why he considers his existing practices are in compliance.

(c) *Agreement of contractor.* If the contractor agrees, he shall:

(1) Correct the noncompliance, and

(2) Submit the information required by paragraph (a) of the Administration Cost Accounting Standards clause (§ 1–3.1204–2).

(d) *Review of contractor change.* Upon receipt of the information required in paragraph (c) of this section indicating agreement with the noncompliance, the cognizant contracting officer shall review the accounting change for adequacy and compliance concurrently in accordance with § 1–3.1205(d). Upon completion of the review indicating that the change is both adequate and in compliance, the contractor shall be notified and requested to submit the cost impact proposal required pursuant to paragraph (b) of the Administration of Cost Accounting Standards clause (§ 1–3.1204–2). The proposal shall be in sufficient detail to permit evaluation and negotiation of the cost impact upon each contract and subcontract containing the Cost Accounting Standards clause (§ 1–3.1204–1). It shall contain as a minimum the following information:

(1) Identification of all contracts and subcontracts containing the Cost Accounting Standards clause and

(2) The effect on each contract and subcontract from the date of failure to comply until the noncompliance is corrected.

(e) *Receipt of cost impact proposal.* Upon receipt of an acceptable proposal from the contractor, the cognizant contracting officer shall promptly analyze the proposal with the assistance of the auditor and negotiate the contract price adjustments pursuant to § 1–3.1207.

(f) *Failure to submit cost impact proposal.* If the contractor fails to furnish the cost impact proposal in the form and time specified, the cognizant contracting officer shall take action in accordance with paragraph (h) of this section.

V 40 251 DEC 31 75 XUM

(g) *Disagreement of contractor.* The cognizant contracting officer shall review the contractor's submission in paragraph (b) of this section and make a determination of compliance or noncompliance.

(h) *Decision of cognizant contracting officer.* (1) If the cognizant contracting officer makes a determination of compliance, he shall so notify the contractor and send a copy to the auditor;

(2) If the cognizant contracting officer makes a determination of noncompliance, or if the contractor fails to furnish the cost impact proposal, the cognizant contracting officer with the assistance of the auditor shall estimate the cost impact of the noncompliance on contracts and subcontracts containing the Cost Accounting Standards clause;

(3) If the cognizant contracting officer's estimate indicates increased costs to the Government, he shall notify the contractor and request agreement as to the cost or price adjustment, together with any applicable interest. The contractor shall also be advised that in the event no agreement on the cost or price adjustment is reached within 20 days, action may be taken in accordance with paragraph (b) of the Cost Accounting Standards clause. If a DOD cognizant contracting officer subsequently takes such action, he shall also consider appropriate action to protect the interests of the Government, pursuant to ASPR Appendix E, Part 6 (32 CFR, Part 163, Subpart F) regarding any cost adjustment demanded by the United States. Cognizant contracting officers of civilian executive agencies shall consider the appropriateness of similar actions in regard to collection of contract debts with respect to their affected contracts and subcontracts; (See also § 1–30.206.)

(4) If the cognizant contracting officer's estimate indicates there are no increased costs as a result of the noncompliance, and the contractor refuses to take corrective action, the cognizant contracting officer shall notify the contractor in writing that he is in noncompliance, that corrective action should be taken, and that if such noncompliance subsequently results in increased costs to the Government, the provisions of the Cost Accounting Standards clause shall be enforced.

8. Section 1–3.1213 is added, as follows:

§ 1–3.1213 Administration of equitable adjustments for new cost accounting standards.

(a) *Solicitation notice.* When the notice "Additional Cost Accounting Standards Applicable To Existing Contracts Certification" is in the solicitation (see § 1–3.1203(i)(2)), the procurement contracting officer shall ensure that the contractor's response to the notice is made known to the cognizant contracting officer (see § 1–3.1208(a)). This may be accomplished by attaching a copy of the response to the copy of the contract provided to the cognizant contracting officer.

(b) *Requirement for equitable adjustment.* Contracts and subcontracts containing the Cost Accounting Standards clause (§ 1–3.1204–1) may require equitable adjustments to comply with new cost accounting standards (see paragraph (a)(4)(A) of the clause). Such adjustments are limited to contracts and subcontracts awarded prior to the effective date of each new standard. A new standard becomes applicable prospectively to these contracts and subcontracts when a new contract or subcontract containing the clause is awarded on or after the effective date of such new standard. Contractors are encouraged to submit to the cognizant contracting officer any change in accounting practice in anticipation of complying with a new standard as soon as praticable after the new standard has been finally promulgated by the Cost Accounting Standards Board. Equitable adjustment is limited to those circumstances when a change in cost accounting practices is required to implement a new standard.

(c) *Review of contractor change.* Upon receipt of information required pursuant to paragraph (a) of the Administration of Cost Accounting Standards clause (§ 1–3.1204–2) from the contractor indicating an accounting change is required to comply with a new standard, the cognizant contracting officer shall review the proposed change concurrently for adequacy and compliance in accordance with § 1–3.1205(d). Upon completion of the review indicating that the change is both adequate and in compliance, the contractor shall be notified and requested to submit the cost impact proposal required pursuant to paragraph (b) of the Administration of Cost Accounting Standards clause. The proposal shall be in sufficient detail to permit evaluation and negotiation of the cost impact upon each contract and subcontract containing the Cost Accounting Standards clause. It shall contain as a minimum the following information:

(1) Identification of each additional standard, together with those contracts and subcontracts containing the Cost Accounting Standards clause having an award date prior to the effective date of such standard and

(2) The effect on each contract and subcontract from the date the contractor is required to follow the standard until completion of the contract or subcontract.

(d) *Receipt of cost impact proposal.* Upon receipt of an acceptable proposal from the contractor, the cognizant contracting officer shall promptly analyze the proposal with the assistance of the auditor and negotiate the contract price adjustments pursuant to § 1–3.1207.

(e) *Failure to submit cost impact proposal or reach agreement concerning cost impact.* (1) If the contractor does not submit a proposal in the form and time specified or if the parties fail to agree concerning the cost impact, the cognizant contracting officer, with the assistance of the auditor, shall estimate the cost impact on contracts and subcontracts containing the Cost Accounting Standards clause;

(2) Upon completion of the estimate indicating the effect on contract costs, the cognizant contracting officer shall request agreement from the contractor as to the cost or price adjustment. The contractor shall also be advised that in the event no agreement on the cost or price adjustment is reached within 20 days, action may be taken in accordance with paragraph (b) of the Cost Accounting Standards clause. If a DOD cognizant contracting officer subsequently takes such action, he shall also consider appropriate action to protect the interests of the Government, pursuant to ASPR Appendix E, Part 6 (32 CFR Part 163, Subpart F) regarding any cost adjustment demanded by the United States. Cognizant contracting officers of civilian executive agencies shall consider the appropriateness of similar actions in regard to collection of contract debts with respect to their affected contracts and subcontracts. (See also § 1–30.206.)

9. Section 1–3.1214 is added, as follows:

§ 1–3.1214 Administration of voluntary changes.

(a) *Notification of proposed change.* When a contractor who has contracts or subcontracts containing the Cost Accounting Standards clause (§ 1–3.1204–1) plans to make a voluntary change to an accounting practice, he must submit the information required by paragraph (a) of the Administration of Cost Accounting Standards clause (§ 1–3.1204–2).

(b) *Review of contractor change.* Upon receipt of the information required in paragraph (a) of this section, the cognizant contracting officer shall review the accounting change concurrently for adequacy and compliance in accordance with § 1–3.1205(d). Upon completion of the review indicating that the change is both adequate and in compliance, the contractor shall be notified and requested to furnish the cost impact proposal required pursuant to paragraph (b) of the Administration of Cost Accounting Standards clause. It shall be in sufficient detail to permit evaluation and negotiation of the cost impact upon each contract and subcontract containing the Cost Accounting Standards clause. It shall contain as a minimum the following information:

(1) Identification of all contracts and subcontracts containing the Cost Accounting Standards clause, and

(2) The effect on each contract and subcontract from the effective date of the proposed change until completion of the contract or subcontract.

(c) *Receipt of cost impact proposal.* Upon receipt of an acceptable proposal from the contractor, the cognizant contracting officer shall promptly analyze the proposal with the assistance of the auditor to determine whether or not the proposed change will result in increased costs being paid by the United States. In considering the proposed adjustments to subcontracts containing the Cost Accounting Standards clause to determine whether increased cost to the United States will result from the change, the cognizant contracting officer shall not consider the effect of the proposed adjustments upon the prime contracts and subcontracts under which the subcontracts were entered into. If the cognizant contracting officer determines that the proposed adjustments will not result in an increase in the aggregate cost to be paid under the contracts and subcontracts containing the Cost Accounting Standards clause he shall promptly negotiate the contract price adjustments pursuant to § 1–3.1207. If the cognizant contracting officer determines that the proposed adjustments will result in an increase in the aggregate cost to be paid under the contracts and subcontracts containing the Cost Accounting Standards clause, he shall so notify the contractor and advise him that the proposed change will not be recognized unless an agreement can be reached which will prevent an increase in the aggregate cost to be paid under such contracts and subcontracts.

(d) *Failure to submit cost impact proposal or reach agreement concerning cost impact.* (1) If the contractor does not submit a proposal in the form and time specified or if the parties fail to agree concerning the cost impact, the cognizant contracting officer, with the assistance of the auditor, shall estimate the cost impact on contracts and subcontracts containing the Cost Accounting Standards clause, and

(2) Upon completion of the estimate indicating the effect on contract costs, the cognizant contracting officer shall request agreement from the contractor as to the cost of price adjustment. The contractor shall also be advised that in the event no agreement on the cost or price adjustment is reached within 20 days, action may be taken in accordance with paragraph (b) of the Cost Accounting Standards clause. If a DOD cognizant contracting officer subsequently takes such action, he shall consider appropriate action to protect the interests of the Government, pursuant to ASPR Appendix E, Part 6 (32 CFR Part 163, Subpart F) regarding any cost adjustment demanded by the United States. Cognizant contracting officers of civilian executive agencies shall consider the appropriateness of similar actions in regard to collection of contract debts with respect to their affected contracts and subcontracts. (See also § 1–30.206.)

10. Sections 1–3.1215 through 1–3.1219 continue to be reserved, as follows:

§ 1–3.1215 [Reserved]

§ 1–3.1216 [Reserved]

§ 1–3.1217 [Reserved]

§ 1–3.1218 [Reserved]

§ 1–3.1219 [Reserved]

11. Section 1–3.1220 is amended by adding definitions to paragraph (b), as follows:

§ 1–3.1220 Standards prescribed by the Cost Accounting Standards Board.

* * * * * * *

(b) * * *

(34) *Compensated personal absence.* Any absence from work for reasons such as illness, vacation, holidays, jury duty or military training, or personal activities, for which an employer pays compensation directly to an employee in accordance with a plan or custom of the employer.

(35) *Entitlement.* An employee's right, whether conditional or unconditional, to receive a determinable amount of compensated personal absence, or pay in lieu thereof.

(36) *Residual value.* The proceeds (less removal and disposal costs, if any) realized upon disposition of a tangible capital asset. It usually is measured by the net proceeds from the sale or other disposition of the asset, or its fair value if the asset is traded in on another asset. The estimated residual value is a current forecast of the residual value.

(37) *Service life.* The period of usefulness of a tangible capital asset (or group of assets) to its current owner. The period may be expressed in units of time or output. The estimated service life of a tangible capital asset (or group of assets) is a current forecast of its service life and is the period over which depreciation cost is to be assigned.

12. Section 1–3.1220–8 is added, as follows:

§ 1–3.1220–8 Accounting for costs of compensated personal absence.

PART 408—ACCOUNTING FOR COSTS OF COMPENSATED PERSONAL ABSENCE

Sec.

408.10 General applicability.
408.20 Purpose.
408.30 Definitions.
408.40 Fundamental requirement.
408.50 Techniques for application.
408.60 Illustrations.
408.70 Exemptions.
408.80 Effective date.

AUTHORITY: 84 Stat. 796, sec. 103 (50 U.S.C. App. 2168).

SOURCE: The provisions of this Part 408 appear at 39 FR 33681, September 19, 1974, unless otherwise noted.

§ 408.10 General applicability.

This standard shall be used by defense contractors and subcontractors under Federal contracts entered into after the effective date hereof and by all relevant Federal agencies in estimating, accumulating, and reporting costs in connection with the pricing, administration, and settlement of all negotiated prime contract and subcontract national defense procurements in excess of $100,000, other than contracts or subcontracts where the price negotiated is based on (a) established catalog or market prices of commercial items sold in substantial quantities to the general public, or (b) prices set by law or regulation.

§ 408.20 Purpose.

The purpose of this standard is to improve, and provide uniformity in, the measurement of costs of vacation, sick leave, holiday, and other compensated personal absence for a cost accounting period, and thereby increase the probability that the measured costs are allocated to the proper cost objectives.

§ 408.30 Definitions.

(a) The following definitions of terms which are prominent in this standard are reprinted from Part 400 of this chapter for convenience. Other terms which are used in this standard and are defined in Part 400 of this chapter have the meaning ascribed to them in that part unless the text demands a different definition or the definition is modified in paragraph (b) of this section:

(1) *Compensated personal absence.* Any absence from work for reasons such as illness, vacation, holidays, jury duty or military training, or personal activities, for which an employer pays compensation directly to an employee in accordance with a plan or custom of the employer.

(2) *Entitlement.* An employee's right, whether conditional or unconditional, to receive a determinable amount of compensated personal absence, or pay in lieu thereof.

(b) The following modifications of definitions set forth in Part 400 of this chapter are applicable to this standard. None.

§ 408.40 Fundamental requirement.

(a) The costs of compensated personal absence shall be assigned to the cost accounting period or periods in which the entitlement was earned.

(b) The costs of compensated personal absence for an entire cost accounting period shall be allocated pro-rata on an annual basis among the final cost objectives of that period.

§ 408.50 Techniques for application.

(a) *Determinations.* Each plan or custom for compensated personal absence shall be considered separately in determining when entitlement is earned. If a plan or custom is changed or a new plan or custom is adopted, then a new determination shall be made beginning with the first cost accounting period to which such new or changed plan or custom applies.

(b) *Measurement of entitlement.* (1) For purposes of compliance with § 408.40(a), compensated personal absence is earned at the same time and in the same amount as the employer becomes liable to compensate the employee for such absence if the employer terminates the employee's employment for lack of work or other reasons not involving disciplinary action, in accordance with a plan or custom of the employer. Where a new employee must complete a probationary period before the employer becomes liable, the employer may nonetheless treat such service as creating entitlement in any computations required by this standard, provided that he does so consistently.

(2) Where a plan or custom provides for entitlement to be determined as of the first calendar day or the first business day of a cost accounting period based on service in the preceding cost accounting period, the entitlement shall be considered to have been earned, and the employer's liability to have arisen, as of the close of the preceding cost accounting period.

(3) In the absence of a determinable liability, in accordance with paragraph (b)(1) of this section, compensated personal absence will be considered to be earned only in the cost accounting period in which it is paid.

(c) *Determination of employer's liability.* In computing the cost of compensated personal absence, the computation shall give effect to the employer's liability in accordance with the following paragraphs:

(1) The estimated liability shall include all earned entitlement to compensated personal absence which exists at the time the liability is determined, in accordance with paragraph (b) of this section.

(2) The estimated liability shall be reduced to allow for anticipated nonutilization, if material.

(3) The liability shall be estimated consistently either in terms of current or of anticipated wage rates. Estimates may be made with respect to individual employees, but such individual estimates shall not be required if the total cost with respect to all employees in the plan can be estimated with

V40251 DEC 31 75 XUM

reasonable accuracy by the use of sample data, experience or other appropriate means.

(d) *Adjustments.* (1) The estimate of the employer's liability for compensated personal absence at the beginning of the first cost accounting period for which a contractor must comply with this standard shall be based on the contractor's plan or custom applicable to that period, notwithstanding that some part of that liability has not previously been recognized for contract costing purposes. Any excess of the amount of the liability as determined in accordance with paragraph (c) of this section over the corresponding amount of the liability as determined in accordance with the contractor's previous practice shall be held in suspense and accounted for as described in subparagraph (3) of this paragraph.

(2) If a plan or custom is changed or a new plan or custom is adopted, and the new determination made in accordance with paragraph (a) of this section results in an increase in the estimate of the employer's liability for compensated personal absence at the beginning of the first cost accounting period for which the new plan is effective over the estimate made in accordance with the contractor's prior practice, then the amount of such increase shall be held in suspense and accounted for as described in subparagraph (3) of this paragraph.

(3) At the close of each cost accounting period, the amount held in suspense shall be reduced by the excess of the amount held in suspense at the beginning of the cost accounting period over the employer's liability (as estimated in accordance with paragraph (c) of this section) at the end of that cost accounting period. The cost of compensated personal absence assigned to that cost accounting period shall be increased by the amount of the excess.

(e) *Allocations.* Except where the use of a longer or shorter period is permitted by the provisions of the Cost Accounting Standard on Cost Accounting Period (Part 406 of this chapter), the costs of compensated personal absence shall be allocated to cost objectives on a pro-rata basis which reflects the total of such costs and the total of the allocation base for the entire cost accounting period. However, this provision shall not preclude revisions to an allocation rate during a cost accounting period based on revised estimates of period totals.

§ 408.60 Illustrations.

(a) Company A's vacation plan provides that on the anniversary of each employee's hiring date, that employee shall become eligible to receive a 2-week vacation with pay. Vacation entitlement must be used within 2 years or forfeited. An employee who leaves the company voluntarily will be paid for any remaining unused vacation entitlement which was earned through the employee's last anniversary date. An employee who is laid off for lack of work will also be paid a pro-rata vacation allowance for service since the employee's last anniversary date. Company A accrues vacation costs each month based on an estimate of the anniversary years which will be completed in that month. At the end of its cost accounting period, Company A adjusts its estimated liability to agree with its actual liability for completed years of service on an individual employee basis.

(1) In order to comply with § 408.50(c), Company A must increase its estimated liability for vacation pay at all times to include the estimated additional amount which would be payable to employees in the event of layoff. The additional liability may be calculated on an individual employee basis or it may be estimated for the employees as a group by the use of sample or historical data.

(2) The following illustrates one method of estimating Company A's liability at the end of its cost accounting period, December 31, with respect to individual employees, in accordance with § 408.50(c).

John Doe, anniversary date July 10:	
unused entitlement resulting from completed service years, 24 hr. at $5	$120
Full months of service since anniversary, 5:	
Pro-rata entitlement on lay-off—80 hr.×5/12=33.3 hr. at $5	167
Total	287
Less estimated allowance for forfeitures, 3½ pct	10
Net liability	277

(b) Company B has a vacation plan similar Company A's, but Company B does not pay pro-rata vacation pay on lay-off for service since the last anniversary data. Company B must include in its estimate of its liability at the end of its cost accounting period only that unused vacation entitlement which results from completed years of service, with allowance for forfeitures if material.

(c) Company C's sick leave plan provides that an employee will accumulate one-half day of sick leave entitlement for each full month of service. Sick leave entitlement may be accumulated without limit, but an employee is paid for sick leave only during actual illness; the Company does not pay for unused sick leave on lay-off. Despite the fact that Company C might be able to estimate the amount which will be paid for sick leave in a future cost accounting period with a high degree of accuracy, it has no liability for payment for unused sick leave entitlement in the event of lay-off. Therefore, in accordance with § 408.50(b)(3), it must assign to each cost accounting period only the costs of sick leave which it pays in that period.

(d) Company D's vacation plan provides that on July 1, each employee who has been employed by the Company for at least 1 year shall be entitled to two weeks of vacation. All vacation must be taken between July 1 and September 30. An employee who terminates after September 30, and before July 1, receives no vacation pay. Company D has a cost accounting period which ends on December 31; however, Company D customarily accrues its anticipated liability for vacation pay at July 1, in 12 equal installments over the "vacation year" starting on July 1 of the previous year and ending on June 30 of the current year. Company D has no liability for vacation pay at January 1 or at December 31. In accordance with § 408.50(b)(3), the amount of vacation cost which Company D must assign to each cost accounting period is the amount of such costs paid in that period. Therefore, Company D may not use the "vacation year" ending June 30 to apportion these costs between cost accounting periods.

(e) Company E's cost accounting period ends on December 31. Its vacation plan provides that on January 1, each employee who has been employed for at least 1 year shall become entitled to 2 weeks vacation. The Company does not recognize a liability for vacation pay at December 31, because an employee must be employed on January 1 to be eligible.

(1) Despite the requirement that the employee also be employed on January 1, the necessary service was completed in the preceding cost accounting period. If the other terms of the plan are such that in accordance with this standard, Company E must recognize its vacation costs on the accrual basis, then in accordance with § 408.50(b)(2), Company E must estimate its vacation costs as if the liability arose on December 31, rather than on the following January 1.

(2) Assume that Company E must comply with this standard beginning on January 1, 1976. Assume that the employees of Company E earned $90,000 in vacation pay in 1975, all of which will be taken in 1976. Assume, further, that because of reduced employment levels, the employees of Company E will earn only $80,000 in vacation pay in 1976, $5,000 of which will be paid in 1976 because of layoffs. The following example illustrates the computation of vacation pay costs for Company E in 1976:

1976 beginning liability:	
With standard (§ 408.50(d)(1))	$90,000
Without standard	0
Amount to be held in suspense (§ 408.50(d)(1))	90,000
1976 ending liability	75,000
Plus: Paid in 1976	95,000
Subtotal	170,000
Less: 1976 beginning liability	90,000
1976 vacation cost, basic amount	80,000
Amount in suspense at beginning of 1976	90,000
Less: 1976 ending liability	75,000
Suspense to be written off in 1976; additional 1976 vacation cost (§ 408.50(d)(3))	15,000
1976 basic vacation cost	80,000
Plus: 1976 reduction of suspense	15,000
1976 total vacation cost	95,000

(3) Assume, further, that all of the vacation entitlement which remained at December 31, 1976 ($75,000) is taken in 1977. Also, Company E hires a substantial number of additional employees in 1977, so that the amount of vacation entitlement earned in 1977 is $85,000. The following example illustrates the computation of vacation pay costs for Company E in 1977:

1977 ending liability	$85,000
Plus: Paid in 1977	75,000
Subtotal	160,000
Less: 1977 beginning liability	75,000
1977 vacation cost, basic amount	85,000
Amount in suspense at beginning of 1977[1]	75,000
1977 ending liability[1]	85,000
1977 basic vacation cost	85,000
Plus: 1977 reduction of suspense[1]	0
1977 total vacation cost	85,000

[1] Because the 1977 ending liability exceeds the amount in suspense at the beginning of 1977, there is no reduction of suspense in 1977.

(4) Assume further, that Company E goes out of business in 1978. All employees are terminated and paid both for the $85,000 vacation liability at the end of 1977 and an additional $40,000 earned in 1978. The following example illustrates the computation of vacation pay costs for Company E in 1978:

1978 ending liability	0
Plus: Paid in 1978	$125,000
Subtotal	125,000
Less: 1978 beginning liability	85,000
1978 vacation cost, basic amount	40,000
Amount in suspense at beginning of 1978	75,000
Less: 1978 ending liability	0
Suspense to be written off in 1978; additional 1978 vacation cost (§ 408.50(d)(3))	75,000
1978 basic vacation cost	40,000
Plus: 1978 reduction in suspense	75,000
1978 total vacation cost	115,000

(f) All of the salary costs of Company F's salaried employees are charged to service, administrative, or overhead functions. No accounting entries are made to segregate costs of compensated personal absence of these employees from their other salary costs, although other records are maintained to control the total amount of such absences.

(1) This policy does not violate the requirement of § 408.40(b) if such salaries are charged to overhead or indirect cost pools for subsequent allocation to final cost objectives over annually determined allocation bases which are appropriate for those pools.

(2) If the same policy were followed in the case of engineers whose salaries were directly allocated to two or more final cost objectives, or to both intermediate and final cost objectives, so that costs of compensated personal absence were charged directly to the jobs on which the individuals were working when paid, then this would violate the requirement of § 408.40(b) that these costs be allocated among cost objectives on the basis of the costs of the entire cost accounting period. Only if all salaries were directly allocated to a single final cost objective, as might be the case with personnel assigned to an overseas base for the performance of a single contract, would this practice be in accord with that requirement.

(g) Company G determines a "charging rate" for each employee. The charging rate includes an allowance for compensated personal absence based on average experience. As the employee performs services, the related cost objectives are charged for the services at the charging rate, the employee is paid at his base rate, and the excess is credited to the accrued liability for each benefit. As benefits are paid, the costs are charged against the accrued liabilities. The amount of each accrued liability is adjusted at the end of the cost accounting period, and any difference is adjusted through appropriate overhead accounts in accordance with company policy.

(1) This method is not a violation of § 408.40(b) if it results in allocating the estimated annual costs of compensated personal absence at a rate which reflects the anticipated costs of the entire cost accounting period.

(2) The computation itself must comply with the criteria of § 408.40(a). For example, if the terms of the Company's sick leave plan are such that in accordance with this standard, the costs should be recognized in the cost accounting period when they are paid, then the computation should be intended to amortize the expected costs of sick leave over the activity of that cost accounting period, leaving no accrued liability for sick leave at the end of the cost accounting period.

§ 408.70 Exemptions.

This standard shall not apply to contractors who are subject to the provisions of Federal Management Circular 73–8 (Cost Principles for Educational Institutions) or Federal Management Circular 74–4 (Principles for Determining Costs Applicable to Grants and Contracts with State and Local Governments).

§ 408.80 Effective date.

(a) The effective date of this Cost Accounting Standard is July 1, 1975 (40 FR 15865, April 8, 1975).

(b) This Cost Accounting Standard shall be followed by each contractor as of the start of his next fiscal year beginning after the receipt of a contract to which this Cost Accounting Standard is applicable.

13. Section 1–3.1220–9 is added, as follows:

§ 1–3.1220–9 Depreciation of tangible capital assets.

409.70 Exemptions.
409.80 Effective date.

AUTHORITY: 84 Stat. 796, sec. 103 (50 U.S.C. App. 2168).

SOURCE: The provisions of Part 409 appear at 40 FR 4259, January 29, 1975, unless otherwise noted.

§ 409.10 General applicability.

This standard shall be used by defense contractors and subcontractors under Federal contracts entered into after the effective date hereof and by all relevant Federal agencies in estimating, accumulating, and reporting costs in connection with the pricing, administration, and settlement of all negotiated prime contract and subcontract national defense procurements with the United States in excess of $100,000, other than contracts or subcontracts where the price negotiated is based on (a) established catalog or market prices of commercial items sold in substantial quantities to the general public, or (b) prices set by law or regulation.

§ 409.20 Purpose.

The purpose of this standard is to provide criteria and guidance for assigning costs of tangible capital assets to cost accounting periods and for allocating such costs to cost objectives within such periods in an objective and consistent manner. The standard is based on the concept that depreciation costs identified with cost accounting periods and benefiting cost objectives within periods should be a reasonable measure of the expiration of service potential of the tangible assets subject to depreciation. Adherence to this standard should provide a systematic and rational flow of the costs of tangible capital assets to benefited cost objectives over the expected service lives of the assets. This standard does not cover nonwasting assets or natural resources which are subject to depletion.

§ 409.30 Definitions.

(a) The following definitions of terms which are prominent in this standard are reprinted from Part 400 of this chapter for convenience. Other terms which are used in this standard and are defined in Part 400 of this chapter have the meaning ascribed to them in that part unless the text demands a different definition or the definition is modified in paragraph (b) of this section:

(1) *Residual value.* The proceeds (less removal and disposal costs, if any) realized upon disposition of a tangible capital asset. It usually is measured by the net proceeds from the sale or other disposition of the asset, or its fair value if the asset is traded in on another asset. The estimated residual value is a current forecast of the residual value.

(2) *Service life.* The period of usefulness of a tangible capital asset (or group of assets) to its current owner. The period may be expressed in units of time or output. The estimated service life of a tangible capital asset (or group of assets) is a current forecast of its service life and is the period over which depreciation cost is to be assigned.

(3) *Tangible capital asset.* An asset that has physical substance, more than minimal value, and is expected to be held by an enterprise for continued use or possession beyond the current accounting period for the services it yields.

(b) The following modifications of definitions set forth in Part 400 of this chapter are applicable to this standard. None.

§ 409.40 Fundamental requirement.

(a) The depreciable cost of a tangible capital asset (or group of assets) shall be assigned to cost accounting periods in accordance with the following criteria:

(1) The depreciable cost of a tangible capital asset shall be its capitalized cost less its estimated residual value.

(2) The estimated service life of a tangible capital asset (or group of assets) shall be used to determine the cost accounting periods to which the depreciable cost will be assigned.

(3) The method of depreciation selected for assigning the depreciable cost of a tangible capital asset (or group of assets) to the cost accounting periods representing its estimated service life shall reflect the pattern of consumption of services over the life of the asset.

(4) The gain or loss which is recognized upon disposition of a tangible capital asset shall be assigned to the cost accounting period in which the disposition occurs.

(b) The annual depreciation cost of a tangible capital asset (or group of assets) shall be allocated to cost objectives for which it provides service in accordance with the following criteria:

(1) Depreciation cost may be charged directly to cost objectives only if such charges are made on the basis of usage and only if depreciation costs of all like assets used for similar purposes are charged in the same manner.

(2) Where tangible capital assets are part of, or function as, an organizational unit whose costs are charged to other cost objectives based on measurement of the services provided by the organizational unit, the depreciation cost of such assets shall be included as part of the cost of the organizational unit.

(3) Depreciation costs which are not allocated in accordance with (b) (1) and (2) above shall be included in appropriate indirect cost pools.

(4) The gain or loss which is recognized upon disposition of a tangible capital asset, where material in amount, shall be allocated in the same manner as the depreciation cost of the asset has been or would have been allocated for the cost accounting period in which the disposition occurs. Where such gain or loss is not material, the amount may be included in an appropriate indirect cost pool.

V 40 N 251 DEC 31 75 XUM

§ 409.50 Techniques for application.

(a) Determination of the appropriate depreciation charges involves estimates both of service life and of the likely pattern of consumption of services in the cost accounting periods included in such life. In selecting service life estimates and in selecting depreciation methods many of the same physical and economic factors should be considered. The following are among the factors which may be taken into account: Quantity and quality of expected output, and the timing thereof; costs of repair and maintenance, and the timing thereof; standby or incidental use and the timing thereof; and technical or economic obsolescence of the asset (or group of assets), or of the product or service it is involved in producing.

(b) Depreciation of a tangible capital asset shall begin when the asset and any others on which its effective use depends are ready for use in a normal or acceptable fashion. However, where partial utilization of a tangible capital asset is identified with a specific operation, depreciation shall commence on any portion of the asset which is substantially completed and used for that operation. Depreciable spare parts which are required for the operation of such tangible capital assets shall be accounted for over the service life of the assets.

(c) A consistent policy shall be followed in determining the depreciable cost to be assigned to the beginning and ending cost accounting periods of asset use. The policy may provide for any reasonable starting and ending dates in computing the first and last year depreciable cost.

(d) Tangible capital assets may be accounted for by treating each individual asset as an accounting unit, or by combining two or more assets as a single accounting unit, provided such treatment is consistently applied over the service life of the asset or group of assets.

(e) Estimated service lives initially established for tangible capital assets (or groups of assets) shall be reasonable approximations of their expected actual periods of usefulness, considering the factors mentioned in paragraph (a) of this section. The estimate of the expected actual periods of usefulness need not include the additional period tangible capital assets are retained for standby or incidental use where adequate records are maintained which reflect the withdrawal from active use.

(1) The expected actual periods of usefulness shall be those periods which are supported by records of either past retirement or, where available, withdrawal from active use (and retention for standby or incidental use) for like assets (or groups of assets), used in similar circumstances appropriately modified for specifically identified factors expected to influence future lives. The factors which can be used to modify past experience include:

(i) Changes in expected physical usefulness from that which has been experienced such as changes in the quantity and quality of expected output.

(ii) Changes in expected economic usefulness, such as changes in expected technical or economic obsolescence of the asset (or group of assets), or of the product or service produced.

(2) Supporting records shall be maintained which are adequate to show the age at retirement or, if the contractor so chooses, at withdrawal from active use (and retention for standby or incidental use) for a sample of assets for each significant category. Whether assets are accounted for individually or by groups, the basis for estimating service life shall be predicated on supporting records of experienced lives for either individual assets or any reasonable grouping of assets as long as that basis is consistently used. The burden shall be on the contractor to justify estimated service lives which are shorter than such experienced lives.

(3) The records required in paragraph (e) (1) and (2) of this section, if not available on the date when the requirements of this standard must first be followed by a contractor, shall be developed from current and historical fixed asset records and be available following the second fiscal year after that date. They shall be used as a basis for estimates of service lives of tangible capital assets acquired thereafter. Estimated service lives used for financial accounting purposes (or other accounting purposes where depreciation is not recorded for financial accounting purposes for some noncommercial organizations), if not unreasonable under the criteria specified in paragraph (e) of this section, shall, be used until adequate supporting records are available.

(4) Estimated service lives for tangible capital assets for which the contractor has no available data or no prior experience for similar assets shall be established based on a projection of the expected actual period of usefulness, but shall not be less than asset guideline periods (midrange) established for asset guideline classes under the Revenue Procedure 72–10 published by the Internal Revenue Service, and any additions, supplements or revisions thereto, which are in effect as of the first day of the cost accounting period in which the assets are acquired. Use of this alternative procedure shall cease as soon as the contractor is able to develop estimates which are appropriately supported by his own experience.

(5) The contracting parties may agree on the estimated service life of individual tangible capital assets where the unique purpose for which the equipment was acquired or other special circumstances warrant a shorter estimated service life than the life determined in accordance with the other provisions of this § 409.50 (e) and where the shorter life can be reasonably predicted.

(f) (1) The method of depreciation used for financial accounting purposes (or other accounting purposes where depreciation is not recorded for financial accounting purposes) shall be used for contract costing unless (i) such method does not reasonably reflect the expected consumption of services for the tangible capital asset (or group of assets) to which applied, or (ii) the method is unacceptable for Federal income tax purposes. If the contractor's method of depreciation used for financial accounting purposes (or other accounting purposes as provided above) does not reasonably reflect the expected consumption of services or is unacceptable for Federal income tax purposes, he shall establish a method of depreciation for contract costing which meets these criteria, in accordance with paragraph (f) (3) of this section.

(2) After the date of initial applicability of this standard, selection of methods of depreciation for newly acquired tangible capital assets, which are different from the methods currently being used for like assets in similar circumstances, shall be supported by projections of the expected consumption of services of those assets (or groups of assets) to which the different methods of depreciation shall apply. Support in accordance with paragraph (f) (3) of this section shall be based on the expected consumption of services of either individual assets or any reasonable grouping of assets as long as the basis selected for grouping assets is consistently used.

(3) The expected consumption of asset services over the estimated service life of a tangible capital asset (or group of assets) is influenced by the factors mentioned in paragraph (a) of this section which affect either potential activity or potential output of the asset (or group of assets). These factors may be measured by the expected activity or the expected physical output of the assets, as for example: Hours of operation, number of operations performed, number of units produced, or number of miles traveled. An acceptable surrogate for expected activity or output might be a monetary measure of that activity or output generated by use of tangible capital assets, such as estimated labor dollars, total cost incurred or total revenues, to the extent that such monetary measures can reasonably be related to the usage of specific tangible capital assets (or groups of assets). In the absence of reliable data for the measurement or estimation of the consumption of asset services by the techniques mentioned, the expected consumption of services may be represented by the passage of time. The appropriate method of depreciation should be selected as follows:

(i) An accelerated method of depreciation is appropriate where the expected consumption of asset services is significantly greater in early years of asset life.

(ii) The straight-line method of depreciation is appropriate where the expected consumption of asset services is reasonably level over the service life of the asset (or group of assets).

(g) The estimated service life and method of depreciation to be used for an original complement of low-cost equipment shall be based on the expected consumption of services over the expected useful life of the complement as a whole and shall not be based on the individual items which form the complement.

(h) Estimated residual values shall be determined for all tangible capital assets (or groups of assets). For tangible personal property, only estimated residual values which exceed 10 percent of the capitalized cost of the asset (or group of assets) need be used in establishing depreciable costs. Where either the declining balance method of depreciation or the class life asset depreciation range system is used consistent with the provisions of this standard, the residual value need not be deducted from capitalized cost to determine depreciable costs. No depreciation cost shall be charged which would significantly reduce book value of a tangible capital asset (or group of assets) below its residual value.

(i) Estimates of service life, consumption of services, and residual value shall be reexamined for tangible capital assets (or group of assets) whenever circumstances change significantly. Where changes are made to the estimated service life, residual value, or method of depreciation during the life of a tangible capital asset, the remaining depreciable costs for cost accounting purposes shall be limited to the undepreciated cost of the assets and shall be assigned only to the cost accounting period in which the change is made and to subsequent periods.

(j) (1) Gains and losses on disposition of tangible capital assets shall be considered as adjustments of depreciation costs previously recognized and shall be assigned to the cost accounting period in which disposition occurs except as provided in paragraphs (h) (2) and (3) of this section. The gain or loss

for each asset disposed of is the difference between the net amount realized, including insurance proceeds in the event of involuntary conversion, and its undepreciated balance. However, the gain to be recognized for contract costing purposes shall be limited to the difference between the original acquisition cost of the assets and its undepreciated balance.

(2) Gains and losses on the disposition of tangible capital assets shall not be recognized where: (i) Assets are grouped and such gains and losses are processed through the accumulated depreciation account, or (ii) the asset is given in exchange as part of the purchase price of a similar asset and the gain or loss is included in computing the depreciable cost of the new asset. Where the disposition results from an involuntary conversion and the asset is replaced by a similar asset, gains and losses may either be recognized in the period of disposition or used to adjust the depreciable cost base of the new asset.

(3) The contracting parties may account for gains and losses arising from mass or extraordinary dispositions in a manner which will result in treatment equitable to all parties.

(4) Gains and losses on disposition of tangible capital assets transferred in other than an arms-length transaction and subsequently disposed of within 12 months from the date of transfer shall be assigned to the transferor.

(k) Where, in accordance with § 409.40(b) (1), the depreciation costs of like tangible capital assets used for similar purposes are directly charged to cost objectives on the basis of usage, average charging rates based on cost shall be established for the use of such assets. Any variances between total depreciation cost charged to cost objectives and total depreciation cost for the cost accounting period shall be accounted for in accordance with the contractor's established practice for handling such variances.

(l) Practices for determining depreciation methods, estimated service lives and estimated residual values need not be changed for assets acquired prior to compliance with this standard if otherwise acceptable under applicable procurement regulations. However, if changes are effected such changes must conform to the criteria established in this standard and may be effected on a prospective basis to cover the undepreciated balance of cost by agreement between the contracting parties pursuant to negotiation under (a) (4) (B) of the Contract clause set out at § 331.50 of the Board's regulations (4 CFR 331.50).

§ 409.60 Illustrations.

The following examples are illustrative of the provisions of this standard.

(a) X, Y, and Z companies purchase identical milling machines to be used for similar purposes.

(1) Company X estimates service life for tangible capital assets on an individual asset basis. Its experience with similar machines is that the average replacement period is 14 years. Under the provisions of the standard, Company X shall use the estimated service life of 14 years for the milling machine unless it can demonstrate changed circumstances to support a different estimate.

(2) Company Y estimates service life for tangible capital assets by grouping assets of the same general kind and with similar service lives. Accordingly, all machine tools are accounted for as a single group. The average replacement life for machine tools for Company Y is 12 years. In accordance with the provisions of the standard, Company Y shall use a life of 12 years for the acquisition unless it can support a different estimate for the entire group.

(3) Company Z estimates service life for tangible capital assets by grouping assets according to use without regard to service lives. Accordingly, all machinery and equipment is accounted for as a single group. The average replacement life for machinery and equipment in Company Z is 10 years. In accordance with the provisions of the standard, Company Z shall use an estimated service life of 10 years for the acquisition unless it can support a different estimate for the entire group.

(b) Company X desires to charge depreciation of the milling machine described in paragraph (a) of this section directly to final cost objectives. Usage of the milling machine can be measured readily based on hours of operation. Company X may charge depreciation cost directly on a unit of time basis provided he uses one depreciation charging rate for all like milling machines in the machine shop and charges depreciation for all such milling machines directly to benefiting cost objectives.

(c) A contractor acquires, and capitalizes as an asset accountability unit, a new lathe. The estimated service life is 10 years for the lathe. He acquires, and capitalizes as an original complement of low-cost equipment related to the lathe, a collection of tool holders, chucks, indexing heads, wrenches, and the like. Although individual items comprising the complement have an average life of 6 years, replacements of these items will be made as needed and, therefore, the expected useful life of the complement is equal to the life of the lathe. An estimated service life of 10 years, should be used for the original complement.

(d) A contractor acquires a test facility with an estimated physical life of 10 years, to be used on contracts for a new program. The test facility was acquired for $5 million. It is expected that the program will be completed in 6 years and the test facility acquired is not expected to be required for other products of the contractor. Although the facility will last 10 years, the contracting parties may agree in advance to depreciate the facility over 6 years.

(e) Contractor acquires a building by donation from its local Government. The building had been purchased new by another company and subsequently acquired by the local Government. Contractor capitalizes the building at its fair value. Under the standard the depreciable cost of the asset based on that value may be accounted for over its estimated service life and allocated to cost objectives in accordance with contractor's cost allocation practices.

(f) A major item of equipment which was acquired prior to the applicability of this standard was estimated, at acquisition, to have a service life of 12 years and a residual value of no more than 10 percent of acquisition cost. After 4 years of service, during which time this standard has become applicable, a change in the production situation results in a well-supported determination to shorten the estimated service life to a total of 7 years. The revised estimated residual value is 15 percent of acquisition cost. The manual depreciation charges based on this particular asset will be appropriately increased to amortize the remaining cost, less the current estimate of residual value, over the remaining 3 years of expected usefulness. This change is not a change of cost accounting practice, but a correction of numeric estimates. The requirement of § 409.50(1) for an adjustment pursuant to section (a) (4) (B) of the CAS clause does not apply.

(g) The support required by § 409.50(e) can, in all likelihood, be derived by sampling from almost any reasonable fixed asset records. Of course, the more complete the data in the records which are available, the more confidence there can be in determinations of asset service lives. The following descriptions of sampling methods are illustrations of techniques which may be useful even with limited fixed asset records.

(1) A company maintains an inventory of assets in use. The company should select a sampling time period which, preferably, is significantly longer than the anticipated life of the assets for which lives are to be established. Of course, the inventory must be available for each year in the sampling time period. The company would then select a random sample of items in each year except the most recent year of the time period. Each item in the sample would be compared to the subsequent year's inventory to determine if the asset is still in service; if not, then the asset had been retired in the year from which the sample was drawn. The item is then traced to prior year inventories to determine the year in which acquired.

NOTE: Sufficient items must be drawn in each year to assure an adequate sample.

(2) A company maintains an inventory of assets in use and also has a record of retirements. In this case the company does not have to compare the sample to subsequent years to determine if disposition has occurred. As in Example (1) above the sample items are traced to prior years to determine the year in which acquired.

(3) A company maintains retirement records which show acquisition dates. The company should select a sampling time period which, preferably, is significantly longer than the anticipated life of the assets for which lives are to be estimated. The company would then select a random sample of items retired in each year of the sampling time period and tabulate age at retirement.

(4) A company maintains only a record of acquisitions for each year. The company should select a random sample of items acquired in the most recent complete year and determine from current records or observations whether each item is currently in service. The acquisitions of each prior year should be sampled in turn to determine if sample items are currently in service. This sampling should be performed for a time period significantly longer than the anticipated life of assets for which the lives are to be established, but can be discontinued at the point at which sample items no longer appear in current use. From the data obtained, mortality tables can be constructed to determine average asset life.

(5) A company does not maintain accounting records on fully depreciated assets. However, property records are maintained, and such records are retained for 3 years after disposition of an asset in groups by year of disposition. An analysis of these retirements may be made by selecting the larger dollar items for each category of assets for which lives are to be determined (for example, at least 75 percent of the acquisition values retired each year). The cases cited above are only examples and many other examples could have been used. Also in any example, a company's individual circumstances must be considered in order to take into account possible biased results because of changes in organizations, products, acquisition policies, economic factors, etc. The results from example (g) (5), for instance, might be substan-

V40251 DEC 31 75 XUM

portation authority to establish the de-

1. § 146.03–14 is revised to read as fol-

3. § 146.03–34a is added to read as fol-

tially distorted if the 3 year period was unusual with respect to dispositions. Therefore, the examples are illustrative only and any sampling performed in compliance with this standard should take into account all relevant information to assure that reasonable results are obtained.

§ 409.70 Exemption.

This standard shall not apply where compensation for the use of tangible capital assets is based on use allowances as provided for by the provisions of Federal Management Circular 73-8 (Cost Principles for Educational Institutions), Federal Management Circular 74-4 (Principles for Determining Costs Applicable to Grants and Contracts with State and Local Governments), or other appropriate Federal procurement regulations.

§ 409.80 Effective date.

(a) The effective date of this Cost Accounting Standard is July 1, 1975 (40 FR 15865, April 8, 1975).

(b) This Cost Accounting Standard shall be followed by each contractor for all tangible capital assets acquired on or after the start of his next fiscal year beginning after the receipt of a contract to which this Cost Accounting Standard is applicable.

PART 1–4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Subpart 1–4.4—Public Utilities

Subsection 1–4.410–5 is amended to revise paragraph (b) (7) as follows:

§ 1–4.410–5 Uniform clauses for utility service contracts.

* * * * *

(b) * * *

(7) *Cost accounting standards.* Insert the three notices for solicitations as set forth in § 1–3.1203 (a) (3), (h) (2), and (i) (2) in negotiated solicitations under the conditions contained in Subpart 1–3.12. Incorporate the required contract clauses set forth in §§ 1–3.1204–1 and 1–3.1204–2 in negotiated contracts under the conditions contained in Subpart 1–3.12. Note that as provided in § 1–3.1203, the notices and clauses shall not be used when the price is set by law or regulation or the contract is otherwise exempt under § 1–3.1203(a) (1) or (2).

PART 1–7—CONTRACT CLAUSES

Subpart 1–7.1—Fixed-Price Supply Contracts

Section 1–7.103–27 is revised, as follows:

§ 1–7.103–27 Cost accounting standards.

(a) Insert the three notices for solicitations set forth in § 1–3.1203 (a) (3), (h) (2), and (i) (2) in negotiated solicitations under the conditions contained in Subpart 1–3.12.

(b) Insert the two clauses set forth in §§ 1–3.1204–1 and 1–3.1204–2 in negotiated contracts under the conditions contained in Subpart 1–3.12.

Subpart 1–7.2—Cost-Reimbursement Type Supply Contracts

Section 1–7.203–23 is revised, as follows:

§ 1–7.203–23 Cost accounting standards.

(a) Insert the three notices for solicitations set forth in § 1–3.1203 (a) (3), (h) (2), and (i) (2) in negotiated solicitations under the conditions contained in Subpart 1–3.12.

(b) Insert the two clauses set forth in §§ 1–3.1204–1 and 1–3.1204–2 in negotiated contracts under the conditions contained in Subpart 1–3.12.

Subpart 1–7.3—Fixed-Price Research and Development Contracts

Section 1–7.303–55 is revised, as follows:

§ 1–7.303–55 Cost accounting standards.

(a) Insert the three notices for solicitations set forth in § 1–3.1203 (a) (3), (h) (2), and (i) (2) in negotiated solicitations under the conditions contained in Subpart 1–3.12.

(b) Insert the two clauses set forth in §§ 1–3.1204–1 and 1–3.1204–2 in negotiated contracts under the conditions contained in Subpart 1–3.12.

Subpart 1–7.4—Cost-Reimbursement Type Research and Development Contracts

Section 1–7.403–50 is revised, as follows:

§ 1–7.403–50 Cost accounting standards.

(a) Insert the three notices for solicitations set forth in § 1–3.1203 (a) (3), (h) (2), and (i) (2) in negotiated solicitations under the conditions contained in Subpart 1–3.12.

(b) Insert the two clauses set forth in §§ 1–3.1204–1 and 1–3.1204–2 in negotiated contracts under the conditions contained in Subpart 1–3.12.

Subpart 1–7.6—Fixed-Price Construction Contracts

Section 1–7.602–16 is revised, as follows:

§ 1–7.602–16 Cost accounting standards.

(a) Insert the three notices for solicitations set forth in § 1–3.1203(a) (3), (h) (2), and (i) (2) in negotiated solicitations under the conditions contained in Subpart 1–3.12.

(b) Insert the two clauses set forth in §§ 1–3.1204–1 and 1–3.1202–2 in negotiated contracts under the conditions contained in Subpart 1–3.12.

Subpart 1–7.7—Transportation Contracts

1. Section 1–7.702 is amended to revise paragraph (c) (3), as follows:

§ 1–7.702 Solicitation instructions and conditions for transportation contracts.

* * * * *

(c) * * *

(3) *Cost accounting standards.* Insert the three notices for solicitations set forth in § 1–3.1203 (a) (3), (h) (2), and (i) (2) in negotiated solicitations under the conditions contained in Subpart 1–3.12.

2. Section 1–7.703–22 is revised, as follows:

§ 1–7.703–22 Cost accounting standards.

Insert the two clauses set forth in §§ 1–3.1204–1 and 1–3.1204–2 in negotiated contracts under the conditions contained in Subpart 1–3.12.

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486 (c)))

Effective date. This amendment is effective February 28, 1976, but may be observed earlier.

(It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with Executive Order 11821)

DWIGHT A. INK,
Acting Administrator of General Services.

NOVEMBER 28, 1975.

[FR Doc.75-34821 Filed 12-30-75;8:45 am]

Title 46—Shipping

CHAPTER I—U.S. COAST GUARD, DEPARTMENT OF TRANSPORTATION

[Docket No. HM-133; Amdt. to 146]

PART 146—TRANSPORTATION OR STORAGE OF EXPLOSIVES OR OTHER DANGEROUS ARTICLES OR SUBSTANCES, AND COMBUSTIBLE LIQUIDS ON BOARD VESSELS

Definitions for Flammable and Combustible Liquids

The purpose of these amendments to the dangerous cargo regulations in 46 CFR Part 146 is to:

1. Specify a new definition for the class of materials identified as "Flammable liquid";

2. Specify a new definition for the class of materials identified as "Combustible liquid";

3. Set forth requirements for the materials that are covered by the new definitions; and

4. Provide exemptions for certain materials covered by the new definitions.

In 49 CFR, amendments 172–23, 173–78, 174–19, 177–29, and 173–78A under Docket No. HM–102 published on January 24, 1974 (39 FR 2768), May 22, 1975 (40 FR 22263), and June 12, 1975 (40 FR 25024), the Hazardous Materials Regulations Board (the Board) adopted a new definition for flammable liquids, created and defined a new class of materials identified as "Combustible liquid," modified the definition for pyrophoric liquids within the flammable liquid class, and set forth the requirements for materials that are covered by the new definitions.

The provisions adopted under Docket No. HM–102 were not made applicable to the transportation of flammable and combustible liquids aboard vessels because of limitation of statutory authority of the Coast Guard imposed under 46 U.S.C. 170(6).

On January 3, 1975, The Hazardous Materials Transportation Act (Title I, Pub. L. 93–633) was signed into law. Section 113(f) of the Act amended 46 U.S.C. 170(6) to give the Secretary of Transportation authority to establish the defining flash point criteria for flammable and combustible liquids. With the necessary statutory authority available, the Bureau considered it appropriate to make the provisions adopted under HM–102 applicable to the carriage of flammable and combustible liquids aboard vessels.

Rather than publishing extensive changes to 46 CFR 146 to accomplish this, the Materials Transportation Bureau (MTB), on September 8, 1975 (40 FR 41537) published a proposal to modify existing proposals under consideration in Docket HM–112; Notice 73–9 (39 FR 3022, January 24, 1974) so that the terms flammable, combustible, and pyrophoric liquid will have the same meaning in regulations for transportation aboard vessels, as they have for transportation by air, rail or highway. HM–112 will have the effect of consolidating the Department's Hazardous Materials Regulations (including those for water made in 46 CFR 146) in Title 49 of the Code of Federal Regulations.

This choice was made on the assumption that HM–112 would be finalized before the provisions under HM–102 became effective on January 1, 1976. If this had occurred, changes to 46 CFR Part 146 would have been unnecessary because the effect of the consolidation under HM–112 would have been to make the amendments to 49 CFR resulting from HM–102 applicable to the water mode.

Because mandatory compliance by the rail, highway and air modes with HM–102 amendments to Title 49 is required on January 1, 1976, and because the Bureau does not foresee the consolidation under HM–112 being finalized by January 1, 1976, as expected, the Bureau now considers it necessary to amend 46 CFR Part 146 to incorporate the amendments made to 49 CFR under HM–102.

Under Docket HM–112; Notice No. 73–9A (40 FR 41537), the public has had the opportunity to present its views on the substance of the amendments being made herein. In addition to written comments accepted until October 8, 1975, the Bureau held a public hearing on Notice 73–9A in Washington, D.C. on October 1, 1975. The Bureau considers further public procedure unnecessary.

The four comments received on Notice 73–9A supported the proposal. One commenter stated that regulations dealing with the carriage of flammable and combustible liquids aboard vessels should take into account the effect of such regulations in relation to the IMCO Dangerous Code. Section 173.404(b) of 49 CFR presently provides the necessary flexibility with respect to the use of labels required for purposes of import or export shipments.

In consideration of the foregoing, 46 CFR Part 146 is amended as follows:

1. § 146.03–14 is revised to read as follows:

§ 146.03–14 Flash point.

(a) "Flash point" means the minimum temperature at which a liquid gives off vapor within a test vessel in sufficient concentration to form an ignitable mixture with air near the surface of the liquid and shall be determined as follows:

(1) For a homogeneous, single-phase, liquid having a viscosity less than 45 S.U.S. at 100° F. (37.8° C.) that does not form a surface film while under test, one of the following test procedures shall be used:

(i) Standard Method of Test for Flash Point by Tag Closed Tester, (ASTM D56–70);

(ii) Standard Method of Test for Flash Point of Aviation Turbine Fuels by Setaflash Closed Tester, (ASTM D3243–73), or

(iii) Standard methods of Test for Flash Point of Liquids by Setaflash Closed Tester, (ASTM D3278–73).

(2) For a liquid other than one meeting all of the criteria of paragraph (a) (1) of this section, one of the following test procedures shall be used:

(i) Standard Method of Test for Flash Point by Pensky-Martens Closed Tester, (ASTM D93–71);

(ii) Standard Method of Test for Flash Point of Aviation Turbine Fuels by Setaflash Closed Tester, (ASTM D3243–73); or

(iii) Standard Methods of Test for Flash Point of Liquids by Setaflash Closed Tester, (ASTM D3278–73).

(3) For a liquid that is a mixture of compounds that have different volatility and flash points, its flash point shall be determined as specified in paragraph (a) (1) or (a) (2) of this section, on the material in the form in which it is to be shipped. If it is determined by this test that the flash point is higher than 20° F. (−6.66° C.) a second test shall be made on a sample of the liquid evaporated from an open beaker (or similar container), under ambient pressure and temperature (20 to 25° C.) conditions, to 90 percent of its original volume or for a period of four hours, whichever comes first. The lower flash point of the two tests shall be the flash point of the material.

(4) For flash point determinations by Setaflash closed tester, the glass syringe specified need not be used as the method of measurement of the test sample if a minimum quantity of two milliliters is assured in the test cup.

2. § 146.03–28a is added to read as follows:

§ 146.03–28a Pyrophoric liquid.

"Pyrophoric liquid" means any liquid that ignites spontaneously in dry or moist air at or below 130° F. (54.5° C.)

3. § 146.03–34a is added to read as follows:

§ 146.03–34a S.U.S.

"S.U.S." means Saybolt Universal Seconds as determined by the Standard Method of Test for Saybolt Viscosity (ASTM D88–56) and may be determined by use of the S.U.S. conversion tables specified in ASTM Method D2161–66 following determination of viscosity in accordance with the procedures specified in the Standard Method of Test for Viscosity of Transparent and Opaque Liquids (ASTM D445–65).

4. § 146.03–36a is added to read as follows:

§ 146.03–36a Viscous liquids.

(a) Flammable liquids are described as viscous flammable liquids based on the viscosity as determined by one of the following methods:

(1) The viscosity of the liquids must be determined in a Stormer viscosimeter with an actuating weight of 400 grams and with the liquid maintained at a temperature of 28° C. The cylinder of the viscosimeter must be immersed in the liquid.

(2) For transparent liquids the sample may be tested in a vertical glass tube, one inch inside diameter by approximately thirteen inches long, having two marks ten inches apart engraved thereon, the lower mark being two inches above the bottom of the tube. The liquid to be tested shall be poured into the tube until its surface rises one-half inch above the upper mark and must be maintained at a temperature of 28° C. during the test. A polished steel ball one-fourth inch in diameter shall be supported one-half inch above the surface of the liquid at the center of the tube and dropped therein.

(3) When the speed of the cylinder in the test under paragraph (a) (1) of this section does not exceed ten revolutions per thirteen seconds, or the time required in the test under paragraph (a) (2) of this section for the steel ball to fall the vertical distance between the two lines upon the glass tube is not less than four seconds, the material is described as "Viscous."

§ 146.04–5 [Amended]

5. In § 146.04–5, the List of explosives and other dangerous articles and combustible liquids is amended by placing an asterisk (*) preceding the following articles: Butyl ether, Chlorobenzol, Dichloropentane, Dinitrotoluene, liquid, Ethyl benzene, Ethyl butyrate, Ethylene glycol diethyl ether, Formaldehyde, Hexaldehyde, Mesityl oxide, Paraldehyde, Stoddard solvent, Styrene, and Turpentine; the following articles are added to the List in their proper alphabetical sequence:

V 40 251 DEC 31 75 XUM

Article	Classed as—	Label required [1]
*Butyl ether (see: Flammable liquid, n.o.s.)	Flam. L.	Flam. L.
*Chlorobenzol (see: Flammable liquid, n.o.s.)	Flam. L.	Flam. L.
*Dichloropentane (see: Flammable liquid, n.o.s.)	Flam. L.	Flam. L.
*Dinitrotoluene, liquid (see: Flammable liquid, n.o.s.)	Flam. L.	Flam. L.
*Ethyl benzene (see: Flammable liquid, n.o.s.)	Flam. L.	Flam. L.
*Ethyl butyrate (see: Flammable liquid, n.o.s.)	Flam. L.	Flam. L.
*Ethylene glycol diethyl ether (see: Flammable liquid, n.o.s.)	Flam. L.	Flam. L.
*Formaldehyde (see: Flammable liquid, n.o.s.)	Flam. L.	Flam. L.

*Turpentine (see: Flammable liquid, n.o.s.)	Flam. L.	Flam. L.

[1] Unless otherwise exempt by the provisions of the detailed regulations.

6. § 146.21–1 paragraph (a) is revised to read as follows:

§ 146.21–1 Definition of flammable liquids.

(a) A flammable liquid is defined as any liquid having a flash point below 100° F. (37.8° C.), that does not meet one of the definitions specified in § 146.24–1.

(1) For the purposes of the regulations in this subchapter, any mixture having one component or more with a flash point 100° F. (37.8° C.) or higher that makes up at least 99 percent of the total volume of the mixture, is not considered to be a flammable liquid.

(2) For the purposes of this subchapter, a distilled spirit of 140 proof or lower is considered to have a flash point no lower than 73° F.

NOTE: A flammable liquid with a flash point of 73° F. or higher in packaging having a capacity of 110 gallons or less, packaged prior to January 1, 1976, may be shipped and transported without being subject to any of the requirements of this subchapter applicable to flammable liquids until January 1, 1977.

• • • • •

7. § 146.21–60 is revised to read as follows:

§ 146.21–60 Potable spirits.

Alcoholic beverages (wine and distilled spirits as defined in 27 CFR 4.10 and 5.11) in containers having a rated capacity of one gallon or less are not subject to the requirements of this subchapter.

8. § 146.21–65 paragraphs (a) and (b) are revised to read as follows:

§ 146.21–65 Limited quantity shipments.

(a) Flammable liquids, except those enumerated in paragraph (c) of this section, are exempt from specification packaging, marking other than name of contents, and labeling requirements, unless otherwise provided, when packed and offered for shipment in accordance with paragraphs (a)(1), (2), (3), and (4) of this section.

(1) In metal containers not over one quart capacity each, packed in strong outside containers.

(2) In containers having a capacity not over one pint or sixteen ounces by weight each, packed in strong outside containers.

(3) In inside containers having a rated capacity of one gallon or less when packed in strong outside containers. The provisions of this partial exemption apply only if the flash point of the material is 73°F. or higher and the flash point or an indication that the flash point is 73°F. or higher is marked on the outside of the package.

(4) Such limited quantity shipments may be accepted on board vessels, subject to the regulations in this Part, provided the bill of lading or other shipping paper correctly describes the article and the required marking on the outside container is in accordance with the true name in the commodity list. Stowage shall be "On deck under cover" or "Tween decks" in a compartment not subject to artificial heat.

(b) A flammable liquid having a flash point of 73°F. or higher is not subject to the specification packaging requirements of this subchapter when in a packaging having a capacity of 110 gallons or less. The provisions of this paragraph apply only if the flash point of the material or and indication that the flash point is 73°F. or higher is marked on the outside of the package.

• • • • •

§§ 146.21–70, 146.21–75, 146.21–77, and 146.21–79 [Removed]

9. In § 146.21, the following subsections are revoked: 146.21–70, 146.21–75, 146.21–77, and 146.21–79.

§ 146.21–100 [Amended]

10. § 146.21–100 Table D—Classification: Flammable liquids is revised as follows:

a. By striking the words "at or below 80°F." in column one in the parenthetical expression "(When possessing a flashpoint at or below 80°F.)" wherever they appear and inserting in place thereof the words "less than 100°F."

b. By revising the heading of column two to read "Characteristic properties [1], cautions, markings required" and by adding the following footnote to each corresponding code page:

"[1] The flash points provided are approximations and are given °F. T.O.C."

c. By revising paragraph (a) in columns 5 and 6 and paragraphs (b) and (f) in columns 4 and 7 for the article Flammable liquids, n.o.s., by striking the words "20°F. to 30°F." and inserting in place thereof "26°F. to less than 100°F."

11. § 146.26–1 is revised to read as follows:

§ 146.26–1 Definition of combustible liquids.

(a) A combustible liquid is defined as any liquid having a flash point at or above 100°F. (37.8°C), and below 200°F. (93.3°C.), which does not meet the definition of any other classification specified in this subchapter.

(b) For the purposes of the regulations in this subchapter any mixture having one component or more with a flash point at 200° F. (93.3° C.) or higher, that makes up at least 99 percent of the total volume of the mixture, is not considered to be a combustible liquid.

(c) For the purposes of this subchapter, an aqueous solution containing 24 percent or less alcohol by volume is considered to have a flash point no less than 100° F. (37.8° C.) if the remainder of the solution does not meet the definition of a hazardous material as defined in this subchapter.

(d) 200° F. (93.3° C.) is a limitation of the application of the regulations in this subchapter and should not be construed as indicating that liquids with higher flash points will not burn. Markings such as "NONFLAMMABLE" or "NONCOMBUSTIBLE" should not be used for materials that have a flash point of 200° F. (93.3° C.) or higher.

§ 146.20–30 [Removed]

12. § 146.26–30 is revoked.

13. § 146.26–33 is added to read as follows:

§ 146.26–33 Exempt shipments.

The requirements of this subchapter do not apply to combustible liquids in packagings having capacities of 110 gallons or less.

§ 146.26–100 [Amended]

14. § 146.26–100 Table J—Classification: Combustible liquids is revised as follows:

A. By striking in column 1 the parenthetical expression "(When possessing a flashpoint at or below 150° F. and above 80° F.)" wherever they appear and inserting in place thereof "When possessing a flash point below 200° F. and at or above 100° F.)."

B. By revising the heading of column two to read "Characteristic Properties. [1]

"[1] The flash points provided are approximations and are given in °F. T.O.C."

cautions, markings required" and by adding the following footnote to each corresponding code page:

C. By revising the entries in column 5 (Passenger vessel) for each article to read as follows:

Stowage:
"On deck in open."
"Portable tanks in compliance with DOT regulations."
"Marine Portable tanks."

D. By revising the entries in column 6 (Ferry vessel, passenger or vehicle) for each article to read as follows:

Ferry stowage (AA) • • •
"Portable tanks in compliance with DOT regulations."
"Marine Portable tanks."
"Tank trucks in compliance with DOT regulations."

E. By revising the entries in column 7 (R.R. car ferry, passenger or vehicle) for each article to read as follows:

Ferry stowage (BB).
"Portable tanks in compliance with DOT regulations."
"Marine Portable tanks."
"Tank trucks in compliance with DOT regulations."
"Tank cars in compliance with DOT regulations."

(46 U.S.C. 170(7), 391a, 49 CFR 1.53 (f)).

Effective date: March 31, 1976. However, immediate compliance with the regulations as amended herein is authorized immediately.

Issued in Washington, D.C. on December 24, 1975.

JAMES T. CURTIS, JR.,
Director, Materials Transportation Bureau.

[FR Doc.75–35125 Filed 12–30–75;8:45 am]

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 75–1367]

PART 5—EXPERIMENTAL RADIO SERVICE (OTHER THAN BROADCAST)

Elimination of Unnecessary Requirements

Adopted: December 16, 1975.

1. Pursuant to the Commission's policy to simplify its regulations and application procedures, Part 5, Experimental Radio Service (Other Than Broadcast) is herewith amended to eliminate various requirements that are no longer necessary.

2. For application processing purposes (§ 5.53 of the rules), it appears that one copy (an original) of the application will be sufficient to meet the Commissions' needs. We are therefore reducing the number of copies required by the rules.

3. In order to eliminate a requirement for those licensees who conduct wildlife and ocean buoy tracking operations under the provisions of Part 5, § 5.155 is amended to delete operator requirements for all stations operating under § 5.108 of the rules. The change will obviate the need to waive the operator requirement individually for each license issued by the Commission.

4. We conclude that, for the reasons set forth above, adoption of the amendments will serve the public interest. Inasmuch as the amendments are procedural in nature, impose no additional burdens, and raise no issue upon which comments would serve any useful purpose, compliance with the prior notice and effective date provisions of 5 U.S.C. 553 is unnecessary.

5. Therefore, *it is ordered*, That, pursuant to section 4(i) and 303 (g) and (r) of the Communications Act of 1934, as amended, Part 5 of the Commission's rules and regulations is amended as set forth below, effective December 31, 1975.

(Sec. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Released: December 19, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

Part 5 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. Section 5.53(f) is revised, to read as follows:

§ 5.53 Filing of applications.

• • • • • •

(f) Unless otherwise specified in a particular case, only the original signed copy of the application shall be filed. Applications with facsimile signatures will not be accepted.

2. Section 5.155(b)(4) is revised to read as follows:

§ 5.155 Operator requirements.

• • • • •

(b)(4) No person is required to be in attendance at a station under the following conditions:

(i) When transmitting on frequencies above 50 MHz for telemetering purposes.

(ii) When serving as a replay station for the purpose of retransmitting by self activating means signals from another station or stations.

(iii) When transmitting in the 40.66–40.70 MHz frequency band in accordance with the provisions of § 5.108.

• • • • •

[FR Doc.75–35117 Filed 12–30–75;8:45 am]

Title 49—Transportation

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

[Docket No. 75–24; Notice 02]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Redefinition of "School Bus"

This notice amends the definition of "school bus" that appears in 49 CFR 571.3, to conform to the mandate of the Motor Vehicle and Schoolbus Safety Amendments of 1974 (The Act), Pub. L. 93–492, by expanding the present definition used by the NHTSA in establishing safety requirements.

The NHTSA's present definition of "school bus" (49 CFR 571.3) is based on the design of the vehicle:

"School bus" means a bus designed primarily to carry children to and from school, but not including buses operated by common carriers in urban transportation of school children.

The Act included a definition of "school bus" based on its usage for transporting students, instead of its design:

(14) "Schoolbus" means a passenger motor vehicle which is designed to carry more than 10 passengers in addition to the driver, and which the Secretary determines is likely to be significantly used for the purpose of transporting primary, preprimary, or secondary school students to or from such schools or events related to such schools;

The legislative history of the Act specifically emphasizes Congress' view that the existing definition based on vehicle design is too narrow and should be expanded to include vehicles likely to be used for school student transportation. H.R. Rep. No. 93–1191, 93rd Cong., 2d Session 42 1974):

Your Committee decided that safety regulation should reach the wide variety of passenger motor vehicles which are actually and significantly used to transport students, not merely those which are primarily designed for this purpose.

The Congressional definition directs the NHTSA (by reference to a Secretarial determination) to establish a regulatory definition that encompasses a described category of bus used for student transportation. The NHTSA subsequently proposed a definition that would accomplish the Congressional intent within the regulatory and enforcement framework of the Act (40 FR 40854, September 4, 1975):

"School bus" means a bus which is equipped to carry more than 10 passengers in addition to the driver and which is sold, or introduced, or delivered for introduction in interstate commerce, for purposes that include carrying students to and from school or related events, but does not include buses designed and sold for operation as a common carrier in urban transportation.

Comments were received from manufacturers and users of school buses (and their associations), the States of Wisconsin and Montana, the California Department of Highway Patrol (CHP), the Vehicle Equipment Safety Commission (VESC), and Mr. George Chambers. The major issue in these comments was the degree to which the proposed definition conformed to Congressional intent. The Motor Vehicle Manufacturers Association (MVMA), Chrysler Corporation, International Harvester (IH), General Motors, and the State of Montana argued that the Congressional expectation of regulating most student-carrying 11-or-more-passenger motor vehicles on the basis of anticipated use could not be reasonably effectuated under the authority of the Act.

The Act provides that "no person shall • • • manufacture for sale, sell, offer for sale, or introduce or deliver for introduction in interstate commerce • • • any motor vehicle • • • unless it is in conformity with [applicable] standard[s] • • •" (15 U.S.C. § 1397(a)(1)

V 40 251 DEC 31 75 XUM

(A)). This provision authorizes placement of responsibility on a seller compliance with standards that apply to school buses. The Congressional definition clearly directs that the likely use of the vehicle as well as its design be considered in the determination of its status as a school bus. The NHTSA remains convinced that, of all the persons in the chain of distribution who are subject to the Act, the seller is most likely to have knowledge of the likely use of the vehicle.

In essence, the NHTSA proposed that "school bus" be defined as a bus that is sold for purposes that include student transportation. Thus the determination of vehicle classification, in close cases, can be made on the basis of the sales transaction. It would not, however, be based solely on an event that occurs after sale, such as the actual use of the vehicle. The MVMA and others assumed from a reference in the proposal to the "intent" of either party that the seller would be held responsible for the unexpressed intent of the purchaser to use the vehicle for student transportation, although this purpose was unknown to the seller. This is not the case. The seller is not held responsible for more than its knowledge of the purpose of the sale. If the seller has reason to believe that a vehicle will be used for student transportation, it can easily ascertain intended use by requesting a written statement of purpose from the purchaser.

The MVMA suggested that "school bus" be defined as a bus that is equipped for the purpose of carrying primary, preprimary, or secondary school students to or from schools or related events. This definition falls short of the Congressional mandate to cover vehicles that are "likely to be significantly used for the purpose of transporting . . . students". For example, all buses purchased for more than a single purpose (e.g., student and faculty transportation) would be excluded from the definition and from coverage by the standards. Also the criterion "equipped for the purpose" of student transportation does not make clear what equipment (e.g., warning lights, school bus seating) would be determinative of the purpose. General Motors' suggested "designed or equipped for the purpose" is also vague as to the meaning of what element of design or equipment would be determinative of the vehicle's classification.

General Motors and Wayne Corporation implied that it is unreasonable to hold manufacturers responsible for what happens to a vehicle in the hands of dealers. There is no intent to do this, however. A manufacturer or other entity in the chain of distribution is only to be held responsible for what it knows. If a vehicle is originally produced as a nonschool vehicle (a van-type multipurpose passenger vehicle (MPV), for example), and subsequently is sold by a dealer for school transportation purposes, it is the dealer who will be held for any noncompliance with school bus standards, not the manufacturer. Actually, final-stage manufacturers (in some cases dealers) have always undertaken modification of trucks and MPV's that result in different requirements from the factory installation. This responsibility has not created an impossible burden on the original manufacturer.

Wayne suggested that "school bus" be defined to mean only those vehicles that a user or regulatory authority designates as a school bus by use of exterior identification such as a label or distinctive lighting or color. This criterion, like MVMA's, falls short of Congress' evident interest in any vehicle likely to be significantly used for student transportation. Evidently vehicles operated by private schools are not, in many cases, given the exterior identification markings suggested by Wayne.

In conforming its proposal to the Congressional definition, the NHTSA limited "school bus" to a bus that carries at least 11 passengers in addition to the driver. Based on comments received from Wayne and CHP, it appears that the definition should be expanded slightly to include buses that carry 10 passengers. This eliminates a departure from previous NHTSA vehicle categorization that classifies vehicles with 10 or fewer occupant seating positions as MPV's or passenger cars and vehicles with 11 or more seating positions as buses. To adhere strictly to the Congressional definition would leave the small group of vehicles that transport 10 students without coverage under either the school bus, the MPV, or the passenger car standards.

Some commenters incorrectly assumed that the Congressional definition of "school bus" established an outer limit on the NHTSA's authority to regulate vehicles that transport students as such. To the contrary, the Congressional definition is a direction to the NHTSA that the new standards in this area must not be applied to a narrower category of vehicle. As long as that direction of Congress is satisfied, the NHTSA is, however, authorized to decide the scope of its standards, and in this case to expand on the Congressional definition to implement the mandate effectively.

In response to Mr. George Chambers' concern that the NHTSA definition is too broad, the NHTSA considers it reasonable to regulate all buses significantly used for transportation of students to and from all schools and related events, not just pre-primary, primary, and secondary schools. The NHTSA concludes that its rewording of the Act's "schools or events related to such schools" as "schools or related events" does not contradict Congressional direction.

Wayne and the National School Transportation Association (NSTA) suggested that buses used in urban transportation must be included in the definition of "school bus" because they are used in some circumstances to transport students to and from school. It is true that the phrase "likely to be significantly used for the purpose of transporting • • • students to or from • • • schools" could arguably be considered to cover transit buses on regular common-carrier routes. Such buses have been explicitly excluded from the NHTSA's definition for several years, however. In light of the major standard-setting activity mandated by Congress in the Act, it is unlikely that such a broad change of regulatory direction would be contemplated by Congress without explicit discussion at some point in the legislative history. The legislative history contains no indication of such a Congressional intent, and this agency therefore concludes that such coverage was not intended. The boundaries of coverage are explicitly left by the statute to agency determination. In light of the purposes for which the school bus standards are being developed, their expected costs and benefits, and the modes of use of transit buses, the NHTSA has concluded that the continued exclusion of buses designed and sold for operation as common carriers in urban transportation is in the public interest.

Mr. George Chambers suggested that limiting the exclusion of transit-type buses to those in urban areas appeared to be illogical. The NHTSA has satisfactorily used this limit for several years, and no problems have developed. If difficulties should appear in the future, further modification of the definition will be considered.

The MVMA and General Motors suggested that the existing description of transit-type buses ("operated" as a common carrier) more simply describes the excluded class than NHTSA's proposed language ("designed and sold"). By limiting the exclusion to buses designed and sold for use as common carriers, the definition conforms to the areas (design and sale) over which the agency has jurisdiction under the statute.

Wayne and the States of Wisconsin and Montana questioned the wisdom of limiting the definition to buses (10 passengers or more), when some school vehicles for handicapped students are equipped for fewer than 10 passengers and would not be required to meet the standards. The NHTSA has carefully considered extension of school bus standards to vehicles other than buses, but concludes that the standards in question have been developed for vehicles with bus seating and loading characteristics. For example, the proposed bus passenger seating and crash protection standard is calculated for cab-chassis- and van-type vehicles with seating for 10 passengers or more.

The VESC asked that only buses primarily used for transportation of students be considered school buses, so that buses used primarily for other purposes would not be able to display the distinctive school bus markings or be used to transport students after their systems had deteriorated in some more abusive use. The agency views the Congressional emphasis on "significant" use of a vehicle as a direction to extend the school bus standards to all buses that transport students, whether or not it is their primary purpose. For the same reason, the NHTSA does not agree with Blue Bird Body Company's opinion that "activity" buses should be excluded from the Congressionally mandated standards. It appears that Congress intended all the school bus standards to apply to buses that carry students to or from events related to their schools.

The definition basically relies on the sales transaction for a determination of a vehicle's status. In some cases vehicles are leased for the purpose of transporting students, and it is for this reason that the definition refers to "introduction in interstate commerce" as well as sale. The description of this "no-sale" event has been simplified somewhat in response to the comments.

The California Department of Highway Patrol asked whether motor vehicles with a capacity of less than 11 occupants (12 as proposed) that transport students are preempted from regulation by the States as school buses. The answer is no. Since motor vehicles with a capacity of fewer than 11 occupants are not regulated as school buses by the NHTSA, State school bus regulations, to the extent that they apply to such smaller vehicles, would not be preempted by the NHTSA school bus standards. For instance, brake systems of MPV's are not regulated by the NHTSA and may be governed by State regulations. Of course, State regulations may not conflict with standards applicable to these vehicles as passenger cars or MPV's.

The State of Montana believed that the definitions of Type I and Type II school buses would be affected by this redefinition. In fact neither the present definition nor the new definition conflict with State or Highway Safety Standard definitions (such as the Pupil Transportation Standard No 17) that regulate the operation of the vehicle, so long as those operational regulations do not dictate the design and performance of the vehicle to the degree that it is subject to a safety standard.

In consideration of the foregoing, the definition of "School bus" in Title 49 of the Code of Federal Regulations (49 CFR § 571.3) is amended to read as follows:

§ 571.3 Definitions.

(b) • • •

• • • • • •

"School bus" means a bus that is sold, or introduced in interstate commerce, for purposes that include carrying students to and from school or related events, but does not include a bus designed and sold for operation as a common carrier in urban transportation.

Title 4—Accounts

CHAPTER I—GENERAL ACCOUNTING OFFICE

MISCELLANEOUS AMENDMENTS

Miscellaneous amendments in the indicated parts are made to accomplish changes necessitated by changes in internal organization of the General Accounting Office, to modify financial reporting requirements for special employees; to correct typographical errors appearing in the regulations governing bid protests; and to reduce the charge for copies of records made on office copying machines.

Accordingly, Parts 1, 6, 20 and 81 are amended as follows:

PART 1—RECOGNITION OF ATTORNEYS AND OTHER REPRESENTATIVES

1. Section 1.5 is amended to read as follows:

§ 1.5 Committee on enrollment and disbarment.

A committee on enrollment and disbarment has been created consisting of the General Counsel, who shall act as chairman, and the Director, Claims Division. The Committee shall meet at such times as are necessary to consider applications for recognition to appear before the General Accounting Office; receive complaints against those enrolled; conduct hearings, make inquiries and perform all duties necessary in the carrying out of their assigned tasks under this part.

(Sec. 311, 42 Stat. 25; 31 U.S.C. 52)

PART 6—EMPLOYEES RESPONSIBILITIES AND CONDUCT

2. Section 6.3 is amended by the addition of a new paragraph (d) as follows:

§ 6.3 Forms.

• • • • • •

(d) OPM Form 78, Certification of Review of Statement of Employment and Financial Interests for a Special Government Employee and Finding of No Conflicts of Interest (Appendix A-3, FPM Chapter 304).

(Sec. 311, 42 Stat. 25; 31 U.S.C. 52. Interpret or apply 18 U.S.C. 201-218)

3. Section 6.55(b) is amended to read as follows:

§ 6.55 Supplementary statements.

• • • • • •

(b) *Special Government Employees.* As long as a special Government employee is subject to the reporting requirements of § 6.50(b) of this chapter, he shall submit a supplementary statement under the following circumstances.

(1) Whenever there occurs a substantial change in or addition to information previously submitted, a special Government employee shall submit a brief statement describing the change or addition. Questions as to what constitutes a substantial change or addition should be directed to the appropriate head of division or office. If that official has further questions, the matter should be referred to the counselor for GAO for resolution.

(2) Upon extension of his appointment at the end of the fiscal year, a special Government employee shall file a supplementary statement by the following July 31. The statement shall consist of a completely executed, up-to-date GAO Form 311. It is permissible to submit a copy of the most recently submitted GAO Form 311 with the date changed, amended to reflect any changes in or additions to previously submitted information or unamended if no such changes have taken place.

PART 20—INTERIM BID PROTEST PROCEDURES AND STANDARDS

4. Section 20.2(b) (2) and (3) and (c) are amended to read as follows:

§ 20.2 Time for filing.

• • • • • •

(b) • • •

(2) In cases other than those covered in subparagraph (1), bid protests shall be filed not later than 10 days after the basis for protest is known or should have been known, whichever is earlier.

(3) The term "filed" as used in this section means receipt in the contrasting agency or in the General Accounting Office as the case may be. Protesters are cautioned that protests should be transmitted or delivered in the manner which will assure earliest receipt. Except as provided in paragraph (c) of this section, any protest received in the General Accounting Office after the time limits prescribed in this section shall not be considered unless it was sent by registered or certified mail not later than the fifth day, or by mailgram not later than the third day, prior to the final date for filing a protest as specified herein. The only acceptable evidence to establish the date of mailing shall be in the U.S. Postal Service postmark on the wrapper or on the original receipt from the U.S. Postal Service. The only acceptable evidence to establish the date of transmission by mailgram shall be the automatic date indication appearing on the mailgram. If the postmark in the case of mail or the automatic date indication in the case of a mailgram is illegible, the protest shall be deemed to have been filed late.

(c) The Comptroller General, for good cause shown, or where he determines that a protest raises issues significant to procurement practices or procedures, may consider any protest which is not filed timely.

(Sec. 311, 42 Stat. 25; 31 U.S.C. 52. Interpret or apply sec. 305, 42 Stat. 24; 31 U.S.C. 74)

5. Section 20.3(b) is amended to read as follows:

§ 20.3 Notice of Protest, submission of agency report and time for filing of comments on report.

• • • • • •

(b) Material submitted by a protester will not be withheld from any interested party outside the Government or from any Government agency which may be involved in the protest except to the extent that the withholding of information is permitted or required by law or regulation. If the protester considers that the protest contains material which should be withheld, a statement advising of this fact must be affixed to the front page of the protest document and the allegedly proprietary information must be so identified wherever it appears.

(Sec. 311, 42 Stat. 25; 31 U.S.C. 52. Interpret or apply sec. 305, 42 Stat. 24; 31 U.S.C. 74)

V 40 251 DEC 31 75 XUM

6. Section 20.6 is amended to read as follows:

§ 20.6 Time for submission of additional information.

Any additional information requested by the Office of General Counsel, General Accounting Office, from the protester or interested parties shall be submitted no later than 5 days after the receipt of such request. If it is necessary to obtain additional information from the agency, the General Accounting Office will request that such information be furnished as expeditiously as possible.

PART 81—PUBLIC AVAILABILITY OF GENERAL ACCOUNTING OFFICE RECORDS

7. Section 81.7(a)(1)(i) is amened to read as follows:

§ 81.7 Fees and charges.

(a) • • •

(1) The reproduction charge per page will be:

(i) Copies made on office copying machines: 10 cents.

• • • • • •

[SEAL] ELMER B. STAATS,
Comptroller General of the United States.

CLAIMS; GENERAL

Miscellaneous Amendments

Pub. L. 93-604 authorized the transfer from the General Accounting Office to the General Services Administration of the function of auditing and settling claims pertaining to payments for transportation services furnished for the account of the United States Government. This transfer necessitates numerous corrections in Subchapter C of the address to which general claims are to be directed as well as a revision of section 30.1(b) to indicate that reclaims of loss and damage deductions are to be filed in the General Accounting Office.

PART 30—SCOPE OF SUBCHAPTER

1. Section 30.1(b) is amended to read:

§ 30.1 Coverage of regulations in Subchapter C.

• • • • • •

(b) Claims for charges for transportation services furnished for the account of the United States, which now are to be filed with the General Services Administration or the agencies out of whose activities they arise. However, claims by carriers and forwarders against the United States for amounts administratively deducted from transportation payment vouchers in connection with loss or damage to property are covered by this subchapter and are to be filed in the General Accounting Office.

(Sec. 311, 42 Stat. 25; 31 U.S.C. 52. Interprets or applies sec. 305, 42 Stat. 24; 31 U.S.C. 71)

2. The words "Claims Division," are substituted for "Transportation and Claims Division" wherever the latter phrase appears throughout Subchapter C, specifically as follows:

PART 31—CLAIMS AGAINST THE UNITED STATES; GENERAL PROCEDURE

(1) In the section analysis to Part 31, the heading for § 31.6;

(2) In the seventh line of § 31.4;

(3) In the address shown in § 31.4;

(4) In the fifth and sixth lines of § 31.5(a);

(5) In the heading of § 31.6;

(6) In the fourth and fifth lines of and in the address shown in § 31.6;

(7) In the first two lines of § 31.8(a);

PART 33—DECEASED CIVILIAN OFFICERS AND EMPLOYEES; PROCEDURES FOR SETTLEMENT OF ACCOUNTS

(8) In the sixth and seventh and the twenty-second and twenty-third lines of § 33.6(c).

PART 34—DECEASED MEMBERS OF THE ARMED FORCES AND NATIONAL GUARD; PROCEDURES FOR SETTLEMENT OF ACCOUNTS

(9) In the seventh and eighth lines of § 34.1(d);

(10) In the third and fourth and the nineteenth and twentieth lines of § 34.3(b).

(Sec. 311, 42 Stat. 25; 31 U.S.C. 52. Interprets or applies sec. 305, 42 Stat. 24; 31 U.S.C. 71)

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Revocation of Service Station Rent Regulations

On November 11, 1975, the Temporary Emergency Court of Appeals in the case of *Shell Oil Co. v. FEA*, —— F.2d —— (No. 5-13), held that FEA's rent regulations, 10 CFR 212.101-103, as applied to rentals charged by Shell, were beyond the scope of FEA's statutory authority and enjoined FEA from enforcing such regulations with respect to Shell. Based on the unanimity of the court on all of the critical issues addressed and other considerations the FEA has decided not to seek further judicial review of this decision.

In view of this judicial determination, and in order to assure its equal application to all firms, the FEA hereby revokes its rent regulations, effective November 11, 1975 (the date of the *Shell* decision). Also in this regard, FEA is withdrawing an earlier notice of proposed rulemaking with respect to service station rent regulations and is proposing to adopt service station rent guidelines.

Revocation of service station rent regulations. The revocation of the rent regulations is effected in amendments adopted today which revoke 10 CFR Part 212, Subpart G, in its entirety. In addition, §§ 212.2 and 212.10, which state the applicability of Part 212 and provide general price rules, are amended to delete references therein to authority to regulate rents in connection with the leasing of real property used in the retailing of gasoline. Also deleted in these two sections are references to the leasing of covered products. Such references, while appropriate under the Economic Stabilization Program regulations upon which the FEA price regulations were constructed, are superfluous under FEA price regulations since petroleum products are not known to be subject to lease (as distinct from sale) in the petroleum industry and the FEA price regulations do not in any event provide general substantive rules governing leasing. Other changes of an editorial nature are also made.

In conformity with the foregoing, other references to leasing in Part 212, such as under the new item rule of § 212.111, have also been deleted under the amendments adopted today.

However, references in § 212.1 to the leasing of real property used in the retailing of gasoline have not been deleted. These references are based on the authority of the Cost of Living Council and the Federal Energy Office under the Economic Stabilization Act of 1970, as amended, to control service station rents until April 30, 1974. Nothing in the decision of the Temporary Emergency Court of Appeals, discussed above, affects the exercise of that authority.

Withdrawal of notice. On September 30, 1975, the Federal Energy Administration issued a notice of proposed rulemaking and public hearing (40 FR 47147, October 8, 1975) with respect to a proposal to modify the gasoline service station rent regulations primarily to permit limited increases in service station rents. Written comments were received and public hearings were held in this matter on October 30, 1975.

In view of the foregoing revocation of those regulations, further action on the proposed amendments is no longer appropriate. Accordingly, the notice of proposed rulemaking entitled "Regulation of Gasoline Service Station Rents" issued September 30, 1975 (40 FR 47147, October 8, 1975) is hereby withdrawn, except as noted below.

FEA called for comment in its notice of proposed rulemaking on how costs of vapor recovery equipment are being borne, with a view toward a possible amendment to the regulations relating to the pass-through of those costs. It was anticipated that an amendment in this respect might be promulgated as an amendment to the rent regulations (Subpart G) or as an amendment to the price regulations under Subpart F. Since comment was received on this subject and rulemaking on this subject is not foreclosed by the revocation of Subpart G, FEA hereby continues this aspect of the rulemaking proceedings. Under current regulations, the costs associated with purchase, installation and operation of vapor recovery equipment are non-product costs and are therefore subject to all restrictions applicable to non-product cost increases.

Development of rent guidelines. In its notice of proposed rulemaking, FEA expressed concern that, because of the inter-relationship between prices charged to service station dealers for gasoline and the rent charged to service station dealers, lessor-suppliers might, in the absence of some control over rents, obtain in the form of rent increases revenues which in reality are gasoline price increases. As also noted in the notice of proposed rulemaking, rents are often expressed in the same cent-per-gallon terms as gasoline sales. The FEA continues to be concerned over the possibility that lessor-suppliers might circumvent the price regulations by charging unreasonably high rentals for service station properties.

In the *Shell* case, the Temporary Emergency Court of Appeals, commenting on the possibility of gasoline price increases "hidden" in rent increases, stated that "FEA could effectively compel the lessor to substantiate the increased rentals by bringing an action to enforce 10 CFR 210.62(c)." (Slip op. at p. 7.)

Section 210.62(c) of the FEA price regulations prohibits "[a]ny practice which constitutes a means to obtain a price higher than is permitted by the regulations in this chapter • • •" FEA believes that, in order to fulfill its mandate under section 4(b)(1)(F) of the Emergency Petroleum Allocation Act of 1973, as amended, to provide for "equitable prices" to gasoline retailers and consumers, it must act administratively as well as through judicial means to challenge any rent increases which appear to violate § 210.62(c).

However, in order to assure that any challenges under § 210.62(c) are effective and fair, and in order to provide a common basis to lessors and lessees for evaluating rentals in light of § 210.62(c), FEA plans to develop and publish as soon as possible guidelines for determining what rental increases and rental practices would be construed by FEA as constituting means to obtain prices higher than those permitted under the pricing regulations. The public is invited to participate in the development of these guidelines by submitting written comment to the FEA pursuant to the procedures set forth below, before January 30, 1976.

Pending issuance of rental guidelines, FEA will continue to investigate complaints of unfair gasoline service station rent increases and will take whatever action appears warranted under §§ 210.62(c), 205.190-205.197, 205.200, 205.201, 205.202, and 205.203 to prevent circumvention or contravention of its price regulations.

In addition, FEA may take action to challenge rental practices which may not otherwise appear to circumvent or contravene the price regulations but which nevertheless appear to discriminate unfairly against independent retail dealers. Section 210.62(b) prohibits "any form of discrimination" among purchasers of a covered product and defines "discrimination" to include "any preference or sales treatment" which frustrates or impairs any of the purposes or objectives of the Emergency Petroleum Allocation Act or the FEA regulations. Since section 4(b)(1) of the Emergency Petroleum Allocation Act specifically requires FEA to preserve the competitive viability of branded and nonbranded independent marketers to the maximum extent practicable, it is clear that preservation of independent marketing is one of the objectives of the EPAA and that a supplier-lessor which engages in discriminatory price or allocation practices which appear to impair or frustrate attainment of that objective may be in violation of § 210.62(b).

Public Comment. Under section 7(i)(1)(B) of the Federal Energy Administration Act of 1974 (FEAA), opportunity to comment prior to the promulgation of a rule, regulation or order is protected except where requirements for opportunity to comment are waived by FEA upon a finding that strict compliance with those requirements would cause serious harm or injury to the public health, safety, or welfare. In addition, section 7(i)(1)(C) of the FEAA guarantees an opportunity for oral presentation of views in all cases in which the rule, regulation or order concerned is likely to have a substantial impact on the national economy or on large numbers of individuals or businesses. To the maximum extent practicable, opportunity for oral presentation of views must be afforded under section 7(i)(1)(C) prior to issuance of the rule, regulation or order, but in all cases that opportunity must be afforded no later than 45 days after the issuance thereof.

The FEA hereby waives the requirements of section 7(i)(1)(B) of the FEAA for opportunity to comment prior to the issuance of the regulation amendments adopted today. The FEA also waives hereby the requirements of section 7(i)(1)(C).

However, FEA will accept written comment with respect to these amendments if received prior to January 30, 1976. Interested persons are invited to submit data, views or arguments with respect to both the amendments set forth herein and the proposal to adopt guidelines for determining what rental increases and rental practices would be construed by FEA as constituting means to obtain prices higher than those permitted under the pricing regulations to Executive Communications, Room 3309, Federal Energy Administration, Box FB, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to FEA Executive Communications with the designation "Rental Guidelines." Fifteen copies should be submitted. All comments received by Friday, January 30, 1976, before 4:30 p.m., d.s.t., and all other relevant information, will be considered by the Federal Energy Administration before final action is taken on the proposal.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

The waiver of the requirements of section 7(i)(1)(B) and (C) of the FEAA is based upon the finding that compliance with solicitation of comments on whether or not the current rental rules should be revoked would be superfluous in view of the definitiveness of the Temporary Emergency Court of Appeals' decision. In addition, the delay which would be occasioned by further review of this matter and further rulemaking in accordance with usual procedures would result in a degree of conflict and confusion over the lawfulness of gasoline prices and service station rents, and possible disruption in service station leasing arrangements, as to cause serious harm to the public welfare.

The review provisions of section 7(c)(2) of the FEAA, relating to prior comment by the Administrator of the Environmental Protection Agency, are also waived in view of the need to make the rule immediately effective.

(Emergency Petroleum Allocation Act of 1973, as amended, Pub. L. 93-159, as amended by Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133 and Pub. L. 94-163; Federal Energy Administration Act of 1974, Pub. L. 93-275; E.O. 11790, 39 FR 23185).

In consideration of the foregoing, Part 212 of Chapter II, Title 10, Code of Federal Regulations, is amended as set forth below, effective November 11, 1975.

Issued in Washington, D.C. December 24, 1975.

MICHAEL F. BUTLER,
General Counsel,
Federal Energy Administration.

1. Section 212.2 is revised to read as follows:

§ 212.2 Applicability.

This part applies to each sale or purchase of a covered product in the United States except as provided in Subpart C.

2. Section 212.10 is revised to read as follows:

§ 212.10 General rules.

(a) No firm (including an individual) may charge a price for any covered product which exceeds the maximum price at which that product is permitted to be sold to the class of purchaser concerned under this part.

(b) No firm (including an individual) may knowingly pay a price for any covered product which exceeds the maximum price at which that product is permitted to be sold to the class of purchaser concerned under this part.

(c) Paragraph (b) of this section does not apply to the purchase of a covered product under circumstances of economic or other coercion in which the purchaser, because of its need for that product, had no reasonable alternative but to pay the unlawful price and he promptly reports the payment of the unlawful price to the Federal Energy Administration.

V 40 251 DEC 31 75 XUM

§ 212.31 [Amended]

3. Section 212.31 is amended as follows:

(a) The words "or lessees" are deleted wherever they appear in the definition of "Class of purchaser".

(b) The definition of "Item" is revised to read as follows:

"Item" means a product sold or offered for sale to a class of purchaser.

(c) The words "or lease" and "rent", and the comma immediately following the word "rent", are deleted from the definition of "Price".

(d) The definition of "Rent" is deleted.

(e) The words "or lease" are deleted from the definition of "Transaction".

§ 212.52 [Amended]

4. Section 212.52 is amended by deleting the comma and the words "lease or lease-sale" following the word "sale".

§§ 212.101–212.103 [Revoked]

5. Subpart G is revoked.

6. Section 212.111 is amended as follows: The title of §212.111 and the first sentence of paragraph (a) (1) (i) thereof are revised; the words "or lease", "or leases", and "or leased" are deleted wherever they appear in paragraphs (a) (1) (ii), (a) (2), and (d); and paragraph (b) (2) is deleted.

§ 212.111 New item and new market rule.

(a) *New item.* (1) An item is a new item if—(i) the firm concerned did not produce or sell it in the same or substantially similar form at any time during the one-year period immediately preceding the day on which the firm offers it for sale. * * *

* * * * *

[FR Doc.75-35130 Filed 12-24-75;12:31pm]

Title 13—Business Credit and Assistance

CHAPTER III—ECONOMIC DEVELOPMENT ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 305—PUBLIC WORKS AND DEVELOPMENT FACILITIES PROGRAM

PART 314—PROPERTY MANAGEMENT STANDARDS

Real Property

Pursuant to the authority vested in it by section 701 of the Public Works and Economic Development Act of 1965, as amended, the Economic Development Administration hereby revises 13 CFR Part 314. The purpose of this change is to group the various property regulations which may apply to more than one EDA program under a single part. Accordingly, § 305.59 on property management is recodified as Subpart A on Real Property. Subpart B is reserved for personal property regulations and Subpart C is a redesignation of § 314.1 on Excess Property.

Subpart A contains several modifications that were not present in § 305.59. The former property management regulation indicated that documents containing the specified covenants were to be recorded in the county public records for real property. Section 314.6 now designates the Bureau of Indian Affairs as the appropriate place for filing documents for projects involving Indian lands. The recording provisions under Subpart A are now less restrictive. Exceptions to the recording requirement have been provided for those situations in which the project facilities are not susceptible of being used for other than their intended purposes, as in the case of gas lines and sewer facilities, and when the EDA grant constitutes only a very small part of a much larger project. Finally, a definition section has been added for further clarification.

Part 305 is also amended for the purpose of coordinating regulations which are affected by the revision of Part 314. Section 305.43 which sets forth the requirements for industrial park projects is being amended in order to advise EDA grantees that these projects must also satisfy the property management requirements for real property contained in Part 314 Subpart A. This rule change is merely informational and does not impose any new restrictions upon recipients of assistance.

In that the material contained herein is a matter relating to the grant and loan program of the Economic Development Administration and because the revision of Part 314 merely clarifies the existing policy of the agency, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation and delay in effective date are inapplicable.

In accordance with the spirit of the public policy set forth in 5 U.S.C. 553, interested persons may submit written comments, suggestions, data or arguments to the Office of Chief Counsel, Economic Development Administration, U.S. Department of Commerce, Room 7009, Washington, D.C. 20230 by January 30, 1975. Material thus submitted will be evaluated and acted upon in the same manner as if this document were a proposal. Until such time as further changes are made, however, the revision of 13 CFR Part 314 and the amendments to 13 CFR Part 305 as set forth below shall remain in effect, thus permitting the public business to proceed expeditiously.

In consideration of the foregoing, Part 305 is hereby amended and Part 314 is hereby revised.

1. Section 305.43 is amended by deleting the last sentence in paragraph (a) and by adding a new sentence to read as follows:

§ 305.43 Industrial parks and sites.

(a) * * * The following requirements, in addition to those contained in Part 314 Subpart A, must be satisfied for such assistance.

* * * * *

§ 305.59 [Amended]

2. Section 305.59 is deleted in its entirety and § 305.60 is redesignated as § 305.59.

3. Part 314 is revised as follows: § 305.59 is recodified as Subpart A, Subpart B is reserved, and § 314.1 is redesignated as Subpart C.

Subpart A—Real Property

Sec.
314.1 Scope.
314.2 Definitions.
314.3 Authorized uses for real property acquired or improved with Federal funds.
314.4 Other uses and disposition of real property.
314.5 Mortgages.
314.6 Recording of covenants.

Subpart B [Reserved]

Subpart C—Excess Property

314.50 General.

AUTHORITY: Sec. 701, Pub. L. 89-136, 79 Stat. 570 (42 U.S.C. 3121); Department of Commerce Organization Order 10-4, 40 FR 56702.

Subpart A—Real Property

§ 314.1 Scope.

The requirements contained in this subpart apply to grant and combination grant/loan projects. They do not apply to projects for which assistance has been provided solely in the form of loans or by purchasing evidence of indebtedness.

§ 314.2 Definitions.

(a) Any grantee under Titles I, IV, IX, or X of the Act or Title II, Chapter IV of the Trade Act of 1974,

(b) The owner, optionor or lessor of land developed by the project in order to sell, lease or otherwise convey it for a specific purpose, or

(c) The owner, optionor or lessor of land on which a project facility is or will be located.

"Real Property" means any land, improved land, structure, appurtenances thereto, or other improvements, excluding movable machinery and equipment. Improved land also includes land which is improved by the construction of such facilities as roads, sewers, and water and gas lines which are not situated directly on the land but which improve such land.

"Sell" and its derivatives shall include any conveyance or transfer of any interest in the real property including, but not limited to renting or leasing such real property.

§ 314.3 Authorized uses for real property acquired or improved with Federal funds.

(a) The grantee/owner shall use any real property acquired or improved in whole or in part with Federal funds only for the authorized purpose of the original grant during the expected useful life of the project or for as long as the Assistant Secretary determines that such real property is needed. Should the grantee/owner fail to comply with this provision, EDA may require the grantee/owner to compensate the agency in accordance with the provisions in § 314.4.

(1) When the authorized purpose of the EDA grant is to develop land in order to sell, lease or otherwise convey it for a specific use, the Assistant Secretary may approve such sale, lease or other conveyance, if he determines that such conveyance is consistent with the authorized general and special purpose of the grant and EDA policies concerning, but not limited to, nondiscrimination, nonrelocation, excessive profits, and adequate consideration. If the Assistant Secretary has approved the sale, lease or other conveyance, the provisions of § 314.4 do not apply.

(b) In the event that the grantee/owner determines that the real property is no longer needed for the original grant purpose it may be used in other Federal grant programs, or programs that have purposes consistent with those authorized for support by EDA if the approval of the Assistant Secretary has been obtained.

§ 314.4 Other uses and disposition of real property.

Whenever the Assistant Secretary determines that the real property is no longer needed as provided in § 314.3 and the expected useful life of such real property has not expired, the grantee/owner shall return all such real property furnished or purchased wholly with Federal grant funds to the control of EDA. In the case of real property acquired or improved in part with Federal grant funds, the grantee/owner may use the real property for purposes other than those provided in § 314.3 or dispose of such property upon compensating the Federal Government for its fair share of the real property. The Federal share of the real property shall be the amount computed by applying the percentage of the Federal participation in the total cost of the grant program for which the real property was acquired or improved to the current fair market value of the real property.

§ 314.5 Mortgages.

Except when real property is sold pursuant to § 314.3(a) (1), such real property may not be used to secure a mortgage or deed of trust or otherwise be used as collateral, except to secure a loan made by a State or Federal agency or other public body participating in the same project, unless EDA has been compensated in accordance with the provisions of § 314.4 prior to the attachment of the encumbrance.

(a) The Assistant Secretary may waive the provisions of this paragraph when he determines all of the following that:

(1) The applicant because of its nature and makeup does not have the financial resources to provide the non-Federal share without a loan from a private lender;

(2) It is in the best interest of the government not to provide to the applicant a Public Works Loan for its matching share;

(3) The project is closely allied with the community in which it is to be located which would make it unlikely that foreclosure by a private lender would be undertaken;

(4) The private lender would not otherwise lend money without the security of a lien on the project property;

(5) There is no reasonable expectation that the loan by the private lender will not be repaid thus eliminating any reasonable expectation of foreclosure by the private lender;

(6) Whenever possible the grantee has obtained an agreement from the private lender that in the event of foreclosure of the project that such property would continue to be used for public purposes.

§ 314.6 Recording of covenants.

(a) The grantee/owner shall execute a document satisfactory to the Regional Director which shall be recorded, before the initial disbursement of funds, in the pertinent county public records affecting real property, or filed with the appropriate office of the Bureau of Indian Affairs in the case of Indian projects. The document shall specify in years the expected useful life of the project which may be derived from Internal Revenue Service depreciation schedules, an architect's or engineer's certified determination for this particular project, or the term utilized by a pertinent State regulatory agency. The document shall include, but not be limited, to the following:

(1) A prohibition against the use of the project during its expected useful life for other than the purpose for which the project was financed by the Economic Development Administration unless the approval of the Assistant Secretary is first obtained in writing;

(2) A prohibition against the sale, lease, transfer, conveyance, or mortgage of the real property acquired as a part of the project or real property specifically improved and included as a part of the project unless the approval of the Assistant Secretary is first obtained in writing. Such approval shall not be arbitrarily withheld, but shall be based on the Assistant Secretary's decision that the sale, lease, transfer, conveyance, or mortgage of the real property is in furtherance of purposes consistent with those authorized for support by EDA and is consistent with EDA policies;

(3) A covenant to comply with 15 CFR 8.5(b) (5);

(4) A covenant to comply with 13 CFR 305.43(a) (2) when the purpose of the grant is to develop land in order to sell, lease or otherwise convey it for a specific purpose.

(b) The provisions of paragraphs (a) (1) and (2) of this section shall not apply if:

(1) The project facilities are not susceptible of being used for other than their intended purposes, or

(2) The EDA grant is only a very small investment in a large project.

(c) Whenever real property is sold, leased or otherwise conveyed pursuant to § 314.3(a) (1), the grantee/owner shall add a covenant to the deed, or document conveying such interest, which must be satisfactory to the Assistant Secretary, prohibiting the use of such property for any purpose other than the general and special purpose of the grant as determined by the Assistant Secretary. The grantee shall notify EDA of the prospective conveyance and provide EDA with a copy of the covenant at least 30 days before the sale, lease or conveyance of the propery. The instrument containing the covenant approved by the Assistant Secretary shall be recorded in the pertinent county public records affecting real property or filed with the appropriate office in the Bureau of Indian Affairs in the case of Indian projects. Should the grantee fail to comply with this provision, EDA may require the grantee to compensate the agency in accordance with the provisions of § 314.4.

Subpart B—[Reserved]

Subpart C—Excess Property

§ 314.50 General requirements.

(a) EDA is authorized to conduct an excess property program subject to all requirements and limitations contained in the GSA Federal Property Management Regulations as published in 41 CFR 101-43.320. EDA will act as a sponsor in forwarding appropriate requests for excess property to the General Services Administration for approval and processing.

(b) Any recipient of an EDA grant or any recipient of an EDA funded cost reimbursement type contract may submit a request to EDA for the use of excess property. Such requests shall be made on forms provided by EDA.

(c) The use of any excess property made available to the recipient of an EDA grant or the recipient of an EDA funded cost reimbursement type contract pursuant to this section will be governed by a written contract between EDA and the recipient. The contract shall specify the rights and obligations of the parties and actions to be taken by the recipient in regard to the shipment, use, care, maintenance and redelivery of the property.

Effective date: This amendment becomes effective on December 31, 1975.

(It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A-107.)

Dated: December 23, 1975.

WILLIAM F. CLINGER, JR.,
Acting Assistant Secretary for Economic Development.

CHAPTER V—REGIONAL ACTION PLANNING COMMISSIONS

PART 590—RULES AND PROCEDURES OF THE FEDERAL COCHAIRMEN

Ozarks Regional Commission

Notice is given that the Federal Cochairman of the Ozarks Regional Action Planning Commission has adopted and made applicable to the employees of the Office of the Federal Cochairman the rules of the United States Department of Commerce regarding Employee Responsibilities and Conduct. Because the employees affected have been notified of this action, the provisions of 5 U.S.C. 553 are not applicable and the following rule is effective December 31, 1975.

§ 590.40 Employee Responsibilities and Conduct.

The Federal Cochairman of the Ozarks Regional Action Planning Commission adopts and makes applicable to em-

V40251 DEC 31 75 XUM

ployees of the Office of the Federal Co-chairman the rules of the United States Department of Commerce regarding Employee Responsibilities and Conduct. These rules of the Department of Commerce have heretofore been approved by the Civil Service Commission and appear in the Code of Federal Regulations as Title 15, Subtitle A, Part O.

(42 U.S.C. 3181 et seq.)

Dated: December 22, 1975.

BILL H. FRIBLEY,
Federal Cochairman, Ozarks Regional Action Planning Commission.

[FR Doc.75-35205 Filed 12-30-75;8:45 am]

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

[Reg. ER-942, Amdt. 1]

PART 223—FREE AND REDUCED-RATE TRANSPORTATION

Direct Filing by Government Agencies of U.S. Standard Form 160

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. December 23, 1975.

Subpart B of Part 223 of the Board's Economic Regulations provides, inter alia, for the free transportation of certain employees of the Federal Aviation Administration, the National Transportation Safety Board, and the National Weather Service. Under § 223.24(d), air carriers providing such free transportation are required to file with the Board's Bureau of Economics a copy of U.S. Government Standard Form No. 160, "Request for Access to Aircraft or Free Transportation." The FAA has requested this amendment so that the agencies involved may file this form directly. Inquiries have been made to the Department of Commerce (National Weather Service) and the Department of Transportation (National Transportation Safety Board). These agencies have indicated that the FAA request would pose no difficulties for them, and the Board has therefore decided to make this change in procedure.

Since the amendment is one of agency practice and procedure and would pose no significant burden on any person, the Board has determined that notice and public procedure are unnecessary.

In consideration of the foregoing, the Board hereby amends Part 223 of the Economic Regulations (14 CFR Part 223), effective January 30, 1976, as follows:

1. Amend § 223.24 by revising paragraph (b) and deleting paragraph (d) to read as follows:

§ 222.24 Requests for access to aircraft and free transportation.

* * * * *

(b) The person to be transported shall deliver to the appropriate agents of the air carrier a properly executed "Request for Access to Aircraft or Free Transportation" (U.S. Government Standard Form No. 160), which request shall be retained by the air carrier.

* * * * *

(d) Removed.

3. Amend § 223.25 to read as follows:

§ 223.25 Responsibility of agencies.

The Federal Aviation Administration, the National Transportation Safety Board and the National Weather Service

(a) Shall be responsible for the issuance of proper credentials or certificates to personnel eligible thereunder;

(b) Shall be responsible for the promulgation of such internal rules as may be required to obtain compliance by such personnel with this part; and

(c) Shall forward, on or before the 10th of each month, one copy of each "Request for Access to Aircraft or Free Transportation" (U.S. Government Standard Form No. 160) executed by it during the second preceding calendar month to the Bureau of Economics, Civil Aeronautics Board, Washington, D.C. 20428.

(Secs. 204, 403, 404, 407, and 416 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 758 (as amended), 760, 766, 771; 49 U.S.C. 1324, 1372, 1374, 1377, and 1386.)

By the Civil Aeronautics Board.

Effective: January 30, 1976.

Adopted: December 23, 1975.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc 75-35153 Filed 12-30-75;8:45 am]

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 15261; Amdt. No. 1001]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Recent Changes and Additions

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPs) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 F.R. 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Information Center, AIS-230, 800 Independence Avenue, SW., Washington, D.C. 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exist for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending, or cancelling the following VOR-VOR/DME SIAPs, effective February 12, 1976.

Ainsworth, NE—Ainsworth Municipal Arpt., VOR-A, Amdt. 3.
Ashtabula, OH—Ashtabula County Arpt., VOR Rwy 8, Amdt. 3.
Ashtabula, OH—Ashtabula County Arpt., VOR/DME Rwy 26, Amdt. 2.
Blythe, CA—Blythe Arpt., VOR Rwy 26, Amdt. 1.
Blythe, CA—Blythe Arpt., VOR-A, Amdt. 2.
Cedar City, UT—Cedar City Municipal Arpt., VOR Rwy 20, Amdt. 1.
Hopewell, VA—Hopewell Arpt., VOR Rwy 26, Amdt. 2.
Lancaster, PA—Lancaster Arpt., VOR Rwy 8, Amdt. 11.
Pocatello, ID—Pocatello Municipal Arpt., VOR/DME Rwy 21, Amdt. 6.
Wichita, KS—Wichita Mid-Continent Arpt., VOR Rwy 14, Amdt. 10.

* * * effective January 29, 1976

East St. Louis, IL—Bi-State Parks, VOR/DME-A, Amdt. 3.

* * * effective January 15, 1976

Parkersburg, WV—Wood County Arpt., Gill Robb Wilson Fld., VOR Rwy 21, Amdt. 10.

2. Section 97.25 is amended by originating, amending, or cancelling the following SDF-LOC-LDA SIAPs, effective February 12, 1976.

Christiansted, St. Croix, V.I., Alexander Hamilton Arpt., LOC Rwy 9, Original.
Waukegan, IL—Waukegan Memorial Arpt., LOC Rwy 23, Amdt. 2.
Wichita, KS—Wichita Mid-Continent Arpt., LOC(BC) Rwy 1L, Amdt. 1.

Issued in Washington, D.C., on December 24, 1975.

JAMES M. VINES,
Chief,
Aircraft Programs Division.

NOTE: Incorporation by reference provisions in §§ 97.10 and 97.20 (35 FR 5610) approved by the Director of the Federal Register on May 12, 1969.

[FR Doc.75-35168 Filed 12-30-75;8:45 am]

Title 15—Commerce and Foreign Trade

CHAPTER I—BUREAU OF THE CENSUS, DEPARTMENT OF COMMERCE

PART 30—FOREIGN TRADE STATISTICS

Foreign Port of Lading for Shipments Other Than by Vessel or Air

The following amendment is made to the regulations published in the FEDERAL REGISTER on August 27, 1966 (31 FR 11367) (15 CFR Part 30). In accordance with administrative procedure 5 U.S.C. 553, notice and hearing on this amendment are unnecessary because the amendment is a statement of interpretation. The effective date is postponed for thirty days to enable importers and brokers to fully understand and comply with these provisions.

These regulations are issued under the authority of Title 13, United States Code, Section 302; and 5 U.S.C. 301; Reorganization Plan No. 5 of 1950; and Department of Commerce Organization Order No. 35-2A, August 4, 1975, 40 F.R. 42765.

Effective date: This amendment to the Foreign Trade Statistics Regulations is effective January 30, 1976.

Section 30.70(c) (1) and (2) are hereby amended to read as follows:

§ 30.70 Statistical information required on import entries.

* * * * *

(c) *Foreign port of lading.* (1) (Customs Forms 7501, 7502, 7512, and 7521.) For merchandise arriving in the United States by vessel or air, the name and country of the foreign port at which the merchandise was actually loaded on the vessel or aircraft that carried the merchandise to the United States is required. For shipments originating in either Canada or Mexico, and arriving in the United States from Canada or Mexico by rail, truck, pipeline, or other nonvessel/nonair mode of transportation, supply the name of the province (Canada) or state (Mexico where the merchandise was first loaded) for exportation to the United States.

(2) For merchandise transshipped overseas in the course of shipment to the United States, whether or not covered by a through bill of lading, the information furnished shall reflect only the foreign port at which the merchandise was loaded on the vessel, aircraft, or other carrier which transported it to the first U.S. port of unlading. Neither the foreign port of original lading nor any port of lading other than the last foreign port of lading shall be substituted. When a single Customs form covers merchandise loaded at more than one foreign port, the foreign port of lading shall be indicated separately above each item (or group of items) for the merchandise loaded at each foreign port.

Section 30.80(b) is hereby amended to read as follows:

§ 30.80 Merchandise Entering U.S. Customs Territory from U.S. Foreign Trade Zones.

* * * * *

(b) *Foreign port of lading.* (Customs Forms 7501 and 7502.) For merchandise which arrived by vessel or air, the name and country of the foreign port at which the merchandise was loaded on the vessel or aircraft that carried it to the U.S. Foreign Trade Zone or to the first U.S. port of unlading prior to entry into the Zone is required. For shipments originating in either Canada or Mexico and arriving from Canada or Mexico by rail, truck, pipeline, or other nonvessel/nonair mode of transportation, the name of the province (Canada) or state (Mexico) where the merchandise was first loaded onto the carrier for exportation to the United States Foreign Trade Zone or to the United States prior to entry into the Zone is required.

VINCENT P. BARABBA,
Director,
Bureau of the Census.

I concur:

DECEMBER 11, 1975.

DAVID R. MCDONALD,
Assistant Secretary of the Treasury.

[FR Doc.75-35115 Filed 12-30-75;8:45 am]

CHAPTER XX—OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

GENERALIZED SYSTEM OF PREFERENCES

Reviews Pertaining to the Eligibility of Articles

By Executive Order No. 11888, of November 24, 1975 (40 FR 55276, November 26, 1975), the President provided for the implementation on January 1, 1976, of the United States Generalized System of Preferences for eligible imports from beneficiary developing countries (hereinafter, "GSP"), authorized by title V of the Trade Act of 1974 (19 U.S.C. 2461-2465, 88 Stat. 2066-2071), hereinafter referred to as the "Trade Act"). One of the implementing steps taken in E.O. 11888 was the designation of articles that will be eligible for duty-free treatment under the GSP.

Regulations establishing procedures for reviewing the designations of eligible articles, and the possible designations of additional articles as eligible for the GSP, are set forth below. These regulations

article to be import-sensitive in the context of the GSP. Requests to be reviewed at the same time. Requests son who submitted it, with a statement

V40251 DEC 31 75 DUXM V

add a new Part 2007 to title 15, Chapter XX of the Code of Federal Regulations, as amended by regulations set forth at 40 FR 14819 (April 28, 1975), 40 FR 48331 (October 14, 1975), and 40 FR 39197 (August 28, 1975). In addition, certain amendments to Parts 2002 and 2003, as amended by regulations appearing at 40 FR 39197, are promulgated in order to conform those Parts to the new Part 2007, and to add the Council on International Economic Policy as a member of the Trade Policy Staff Committee (TPSC) and the Trade Policy Committee Review Group (TPRG).

The regulations set forth below are procedural in nature, and hence, are exempt from the requirements of 5 U.S.C. 553. Accordingly, the regulations are final as published herein. The Office of the Special Representative for Trade Negotiations (hereinafter, "STR") nevertheless, invites comments on the regulations on or before January 31, 1976, and will consider carefully any comments received.

Pursuant to section 8 of E.O. 11846, the STR, in consultation with the Secretary of State, is responsible for the administration of the GSP.

Articles that are eligible for duty-free treatment under the GSP are designated by the President by Executive order upon the advice of the Trade Policy Committee (TPC) as transmitted through its Chairman, the Special Representative for Trade Negotiations (hereinafter, "the Special Representative"). In addition to the Special Representative, the TPC is composed of the Secretaries of Agriculture, Commerce, Defense, Interior, Labor, State, Treasury, the Attorney General, the Assistant to the President for Economic Affairs, and the Executive Director of the Council on International Economic Policy. The TPC was created by section 3 of Executive Order 11846, of March 27, 1975 (40 FR 14291). Subordinate bodies of the TPC, the TPRG and the TPSC were created by regulations which appeared in 40 FR 14819 (April 28, 1975), and which are codified at 15 CFR Chapter XX, Sections 2002.1 and 2002.2 respectively.

PART 2002—OPERATION OF COMMITTEES

1. Part 2002—Operation of Committees is hereby amended as follows:

§ 2002.1 [Amended]

a. Section 2002.1(a) is amended to delete the period at the end of the second sentence of that paragraph, and to add to the end of that sentence the following: ", and the Executive Director of the Council on International Economic Policy", so that the sentence reads: The Review Group consists of a Deputy Special Representative, designated by the Special Representative, as chairman, and of high level officials designated from their respective agencies or offices by the Secretaries of Agriculture, Commerce, Defense, Interior, Labor, State and Treasury, and the Executive Director of the Council on International Economic Policy.

§ 2002.2 [Amended]

b. Section 2002.2(a) is amended by adding, after the word "Treasury" in the second sentence of that section, the words ", by the Executive Director of the Council on International Economic Policy," so that the sentence reads: The Committee consists of a chairman designated by the Special Representative from his Office, and of senior trade policy staff officials designated from their respective agencies or offices by the Secretaries of Agriculture, Commerce, Defense, Interior, Labor, State, and Treasury, by the Executive Director of the Council on International Economic Policy, and by the Chairman of the International Trade Commission.

c. Section 2002.2(b)(1) is amended by deleting the number "7" from the second clause, and by inserting in place thereof the number "8", so that the section reads: "(1) monitors the trade agreements program, reviews the information received pursuant to subparagraphs 2 through 8 below • • •."

d. Sections 2002.2(b)(8) and (9) are redesignated as Sections (9) and (10), respectively.

e. A new Section 2002.2(b)(8) is added to read as follows:

§ 2002.2 Trade Policy Staff Committee.

• • • • • •

(b) • • •

(8) Receives and reviews requests pertaining to the duty-free treatment accorded to articles under the Generalized System of Preferences, and handles such requests and reviews in accordance with Part 2007 of these regulations;.

• • • • • •

PART 2003—REGULATIONS OF TRADE POLICY STAFF COMMITTEE

2. Part 2003 is amended as follows:

f. Section 2003.1(b), as redesignated by amendments appearing at 40 FR 39197, is redesignated as § 2003.1(c), and a new § 2003.1(b) is added to read as follows:

§ 2003.1 Notice of Public Hearings.

• • • • • •

(b) Whenever the Special Representative or the Deputy Special Representative determines that public hearings in connection with the review of a request submitted pursuant to Part 2007 of these regulations, pertaining to the duty-free treatment accorded to articles under the GSP, are in the public interest.

• • • • • •

g. Part 2007 is added to read as follows:

PART 2007—REVIEWS PERTAINING TO ELIGIBILITY OF ARTICLES FOR THE GENERALIZED SYSTEM OF PREFERENCES

Sec.
2007.0 Requests for reviews.
2007.1 Information required in requests.
2007.2 Adequacy of requests.
2007.3 Publication regarding requests.
2007.4 Action following receipt of requests.
2007.5 Written briefs and oral testimony.
2007.6 Information open to public inspection.
2007.7 Information exempt from public inspection.
2007.8 Other reviews of article eligibilities.

AUTHORITY: 19 U.S.C. 2461–2465, 88 Stat. 2066–2071; E.O. 11846 of March 27, 1975, 40 FR 14291, March 31, 1975

§ 2007.0 Requests for reviews.

(a) An interested party may submit a request (1) that additional articles be designated as eligible for the GSP; or (2) that the duty-free treatment accorded to eligible articles under the GSP be withdrawn, suspended or limited.

(b) An interested party is defined as a party who has a significant economic interest in the subject matter of the request, such as a domestic producer of a like or directly competitive article, a commercial importer of an article which is eligible for the GSP, or for which such eligibility is requested, or any other person representing a significant economic interest that would be materially affected by the action requested.

(c) All requests should be submitted in 20 copies, and should be addressed to: Chairman, Trade Policy Staff Committee, Office of the Special Representative for Trade Negotiations, Room 729, 1800 G Street, NW., Washington, D.C. 20506.

§ 2007.1 Information required in requests.

(a) A request submitted pursuant to this part shall state clearly on the first page that it is a request for action with respect to the provision of duty-free treatment for an article or articles under the GSP, and shall contain the following information:

(1) The name of the petitioner, the person, firm or association represented by the petitioner, and a brief description of the interest of the petitioner affected by the GSP;

(2) Identification of the product or products of interest to the petitioner, both by description and by item number of the Tariff Schedules of the United States;

(3) A description of the action requested, together with a statement of the reasons therefor and supporting information, and a statement of whether the reasoning and information has been presented to the TPSC previously by the person making the request;

(4) If the action requested is the designation of an additional article or articles as eligible for the GSP, a statement of why such article or articles should be so designated, together with information relevant to the import-sensitivity of the article in the context of the GSP.

(5) If the action requested is the withdrawal, suspension, or limitation of duty-free treatment accorded under the GSP to an eligible article or articles, information sufficient to show (i) why the article(s) should be determined to be import-sensitive in the context of the GSP, and (ii) which beneficiary developing country's or countries' exports cause the article to be import-sensitive in the context of the GSP; and a statement of whether the person making the request has filed or is filing for other forms of relief under the Trade Act or any other provision of law.

(6) Any other material relevant to the request.

(7) The Chairman of the TPSC may request additional information or clarifications from persons submitting requests.

(b) (1) In considering whether to recommend the designation of additional articles as eligible for the GSP, or the withdrawal, suspension, or limitation of the duty-free treatment accorded to eligible articles under the GSP, the TPSC, the TPRG, or the TPC shall review relevant economic factors indicating the economic effect that such action would have, including the effect upon United States producers of like or directly competitive articles and upon consumers.

(2) If, on the basis of a review described in (1), the appropriate interagency committee considers that the article is or would be import-sensitive in the context of the GSP, then:

(i) If the article has not been designated already as eligible for the GSP, it shall not be recommended for such designation, or it may be recommended for such designation with limits upon the duty-free treatment accorded under the GSP which assure that the article will not be import-sensitive in the context of the GSP; or

(ii) If the article has been designated already as an article eligible for the GSP, it shall be recommended that the duty-free treatment under the GSP shall be withdrawn, suspended, or limited so as to assure that the article no longer is import-sensitive in the context of the GSP.

§ 2007.2 Adequacy of request.

If the request does not conform substantially to the requirements set forth above, the Chairman of the TPSC may return the communication to the person who submitted it, with a written statement of the reasons why it was found not to conform, or he may determine that there is sufficient information on which to proceed.

§ 2007.3 Publication regarding requests.

Whenever a request is received that conforms to these regulations or that is accepted pursuant to section 2007.2, the Chairman of the TPSC shall publish in the FEDERAL REGISTER a statement of the fact that the request has been received, the TSUS item number or numbers of the article or articles covered by the request, the name of the party submitting the request, and an invitation for all interested parties to submit their views to the TPSC.

§ 2007.4 Action following receipt of requests.

(a) The TPSC shall review requests submitted and accepted under this Part. Requests may be accumulated in order to permit a number of such requests to be reviewed at the same time. Requests which indicate the existence of unusual circumstances warranting an immediate review may be reviewed separately. Reviews of pending requests shall be conducted at least once each six months.

(b) In conducting reviews, the TPSC may hold public hearings, or utilize advice of the U.S. International Trade Commission (pursuant to sections 503 and 131 of the Trade Act, or pursuant to a request under 19 U.S.C. 1332(g)), whenever such hearings, or advice is required by law or is deemed by the Special Representative or the Deputy Special Representative to be in the public interest.

(c) The TPSC shall report the results of its review to the Deputy Special Representative and the Special Representative, who may convene the appropriate committees, which may include the TPC, with a view to the possible recommendation of action to the President.

(d) Whenever following a review, there is to be no change in the status of an article with respect to the GSP, the party submitting a request with respect to such article, shall be so notified, and a statement of the decision shall be published in the FEDERAL REGISTER.

§ 2007.5 Written briefs and oral testimony.

Sections 2003.2 and 2003.4 of these regulations shall be applicable to the submission of any written briefs or requests to present oral testimony in connection with a review under this Part.

§ 2007.6 Information open to public inspection.

With the exception of information subject to § 2007.8, an interested person may, upon request, inspect at the office of the TPSC:

(a) Any written request, brief, or similar submission of information made pursuant to this Subpart; and

(b) Any stenographic record of any public hearing which may be held pursuant to this Subpart.

§ 2007.7 Information exempt from public inspection.

(a) The Chairman of the TPSC shall exempt from public inspection information submitted in confidence, if he determines that the disclosure of such information is not required by law.

(b) A party requesting that the Chairman of the TPSC exempt from public inspection information submitted in writing shall clearly mark each page "Submitted in Confidence" at the top, and shall submit a non-confidential summary of the confidential information. Such person shall also provide the Chairman of the TPSC with a written explanation of why the material should be so protected.

(c) The Chairman of the TPSC may deny a request that he exempt from public inspection any particular information, if he determines such information is not entitled to exemption under law. In the event of such a denial, the information will be returned to the person who submitted it, with a statement of the reasons for the denial.

§ 2007.8 Other reviews of article eligibilities.

(a) As soon after the beginning of each calendar year as relevant trade data for the preceding calendar year is available, the TPSC shall consider modifications of the GSP that may be required by section 504(c) of the Trade Act.

(b) The TPSC may, on its own motion, conduct reviews for the possible designation of additional articles as eligible for the GSP, or the possible withdrawal, suspension, or limitation of duty-free treatment accorded under the GSP.

(c) The TPSC shall report the results of reviews conducted pursuant to paragraphs (a) and (b) above to the TPRG and the TPC, and the Special Representative as Chairman of the TPC shall recommend to the President any action that is considered to be required or warranted. Action required to comply with the provisions of section 504(c) shall be taken not later than 60 days after the close of each calendar year.

(d) The STR shall prepare any documents that are necessary to carry out action recommended under this Part.

FREDERICK B. DENT,
Special Representative for Trade Negotiations.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

PART 3—RULES OF PRACTICE FOR ADJUDICATIVE PROCEEDINGS

PART 4—MISCELLANEOUS RULES

Miscellaneous Amendments

The Commission announces amendments to Parts 3 and 4 of Subchapter A of Chapter I of Title 16 of the Code of Federal Regulations which will (1) eliminate the requirement of service of a complaint for purposes of determining when an adjudicative proceeding commences, and (2) provide for substituted service upon the attorney for a party of any document pertaining to a proceeding other than a complaint. The amendments are set forth below.

1. Section 3.11(a) is amended to read as follows:

§ 3.11 Commencement of proceedings.

(a) *Complaint.* Except as provided in § 3.13, an adjudicative proceeding is commenced by the issuance of a complaint by the Commission.

• • • • • •

2. Section 44.(a)(3) is added and (c)(3) is deleted and (c)(4) is renumbered as (c)(3) to read as follows:

§ 4.4 Service.

(a) *By the Commission.* • • •

(3) When a party has appeared in a proceeding by an attorney, service on that individual of any document pertaining to the proceeding other than a complaint shall be deemed service upon the party. However, service of those docu-

ments specified in paragraph (1) shall first be attempted in accordance with the provision of subparagraphs (i), (ii), and (iii).

The above amendments are effective December 31, 1975.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46), 80 Stat. 383, as amended, 81 Stat. 54 (5 U.S.C. 552))

By direction of the Commission dated December 2, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

[FR Doc.75-35229 Filed 12-30-75;8:45 am]

[Docket 9005]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Cargill, Incorporated

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

In the Matter of Cargill, Incorporated, a corporation.

Order dismissing complaint issued against a Minneapolis, Minn., well-diversified, closely-held corporation challenging its acquisition of stock in Missouri Portland Cement Company, Inc. Respondent divested its interest in Missouri Portland, Aug. 28, 1975.

The order granting motion to dismiss complaint, is as follows: [1]

This matter is before us upon the administrative law judge's certification of respondent's motion to dismiss the complaint in view of respondent's divestiture of its interest in the Missouri Portland Cement Company, Inc. (Missouri Portland), on August 28, 1975.

Upon consideration of the matter, the Commission has determined that further proceedings challenging respondent's acquisition of stock in Missouri Portland would not be in the public interest, Accordingly,

It is ordered, That the complaint in this matter be, and it hereby is, dismissed.

Commissioner Dixon not participating, and Commissioner Hanford dissenting.

The order granting motion to dismiss complaint was issued by the Commission December 2, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

[FR Doc.75-35206 Filed 12-30-75;8:45 am]

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 2, 49 Stat. 1526; 15 U.S.C. 45, 13)

In the Matter of Koscot Interplanetary, Inc., Glenn W. Turner Enterprises, Inc., corporations, and Glenn W. Turner, Terrell Jones, Malcolm Julian, Ben Bunting, Michael Delaney, Hobart Wilder, and Raleigh P. Mann, individually and as former officers, officers or directors of said corporation(s).

Order requiring an Orlando, Fla., seller and distributor of cosmetics and cosmetic distributorships, among other things to cease using its open-ended, multilevel marketing plan; engaging in illegal pricefixing and price discrimination and imposing selling and purchasing restrictions on its distributors; and to cease making exaggerated earnings claims and other misrepresentations in an effort to recruit distributors.

The final order, including further order requiring report of compliance therewith, is as follows: [1]

FINAL ORDER

This matter having been heard by the Commission upon the cross-appeals of complaint counsel and respondents' counsel from the initial decision and upon briefs and oral argument in support thereof and opposition thereto, and the Commission, for the reasons stated in the accompanying Opinion, having granted the appeals in part:

It is ordered, That pages 1–65 of the initial decision of the administrative law judge be, and they hereby are, adopted as the Findings of Fact and Conclusions of Law of the Commission, with the following exceptions: Conclusion of Law 12, page 53; those portions of pages 53–65 ("Rationale of the Order") which are inconsistent with the Opinion of the Commission herein.

Other Findings of Fact and Conclusions of Law of the Commission are contained in the accompanying Opinion.

It is further ordered, That the following Order to cease and desist be, and it hereby is, entered:

ORDER

Definitions: For the purposes of this Order, the following definitions shall apply:

(a) The term "distributorship" means any continuing commercial relationship created by written agreement or by understanding in which:

(1) The participant is granted the right or is permitted to offer, sell, or distribute goods or commodities manufactured, processed, or distributed by the respondents; or (2) the participant is granted the right or is permitted to offer or sell services established, organized, approved, or directed by the respondents.

(b) "Participant" means any person to whom a distributorship is granted.

(c) "Person" means any individual, group, association, limited or general partnership, corporation, or any other business entity.

[1] Copies of the Complaint, Opinion, Initial Decision, Final Order filed with the original document.

[1] Copies of the Complaint, and Order Granting Motion to Dismiss Complaint, filed with the original document.

(d) "Koscot" means Koscot Interplanetary, Inc., and its successors or assigns.

I

It is ordered, That respondents Koscot Interplanetary, Inc., and Glenn W. Turner Enterprises, Inc., corporations, their officers, agents, representatives, employees, successors, and assigns, and Glenn W. Turner, Ben Bunting, Hobart Wilder, Malcolm Julian, and Raleigh P. Mann, individually, their agents, representatives, and employees, directly or indirectly, through any corporate or other device, in connection with the advertising, offering for sale, or sale of products, services, franchises, or distributorships, or in connection with the seeking to induce or inducing the participation of persons, firms, or corporations therein, or in connection with any merchandising, marketing, or sales promotion program, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Offering, operating, or participating in, directly or indirectly, any marketing or sales plan or program wherein the financial gains to participants are or are represented to be based in any manner or to any degree upon their recruiting of other participants who obtain the right under the plan or program to recruit yet other participants whose function in the program includes during their first year of participation the recruitment of participants.

2. Offering, operating, or participating in, any marketing or sales plan or program wherein a participant is given or promised compensation (1) for inducing another person to become a participant in the plan or program, or (2) when a person induced by the participant induces another person to become a participant in the plan or program, *provided*, That the term "compensation," as used in this paragraph only, does not mean any payment based on actually consummated sales of goods or services to persons who are not participants in the plan or program and who do not purchase such goods or services in order to resell them.

3. Requiring or suggesting that a prospective participant or a participant in any merchandising, marketing, or sales promotion program purchase any product or services or pay any other consideration, either to respondents or to any person, in order to participate in said program, other than payment for the actual cost to respondents, as determined by generally accepted accounting principles, of those items respondents deem to be reasonable necessary sales materials in order to participate in any manner therein; *provided*, That necessary sales material shall not include any product inventory.

II

It is further ordered, That respondents Koscot Interplanetary, Inc., and Glenn W. Turner Enterprises, Inc., corporations, their officers, agents, representatives, employees, successors, and assigns, and Glenn W. Turner, Ben Bunting, Hobart Wilder, Malcolm Julian, and Raleigh P. Mann, individually, their agents, representatives, and employees, directly or indirectly, through any corporate or other device, in connection with the advertising, offering for sale, or sale of products, franchises, or distributorships, or in connection with the seeking to induce or inducing the participation of persons, firms, or corporations in any merchandising, marketing, or sales promotion program, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication, including the use of hypothetical examples, that participants in any merchandising, marketing, or sales promotion program, will earn or receive, or have the potential or reasonable expectancy of earning or receiving, any stated or gross or net amount or representing in any manner the past earnings of participants, unless in fact the earnings represented are those of a substantial number of participants in the community or geographic area in which such representations are made, and the representation clearly indicates the amount of time required by such past participants to achieve the earnings represented, and failing to maintain adequate records which disclose the facts upon which any claims of the type referred to in this paragraph of the Order [II(1)] are based; and from which the validity of any such claim can be determined.

2. Misrepresenting the ease of recruiting or retaining participants in any merchandising, marketing, or sales promotion programs, as distributors or as sales personnel.

3. Representing, directly or by implication, that any participant in any merchandising, marketing, or sales promotion program can attain financial success.

4. Misrepresenting the supply or availability of potential participants or customers in any merchandising, marketing, or sales promotion program in any given community or geographical area.

5. Misrepresenting that participants can expect to remain active in business for any length of time or misrepresenting in any manner the longevity or tenure of past or current participants, as, for example, by using a hypothetical illustration of how a marketing program operates, which has the tendency or capacity to imply that participants remain active for a given period, when in fact such period is more than the average length of time for which such participants do remain active.

6. Misrepresenting the reasonably necessary and anticipated costs of doing business for prospective distributors, dealers, sales personnel, or franchisees.

7. Representing, directly or by implication, that products will be or have been advertised, either locally or nationally, or in the geographic area in which such representations are made, without clearly and truthfully representing the manner, mode, extent, and amount of the advertising.

8. Representing that a training program will be or is being offered without clearly and truthfully representing the specific type and nature of the training, the number of hours or days of instruction, and the cost to the participant, if any.

9. Misrepresenting the availability of product in any manner, including, but not limited to, misrepresenting the amount of inventory available, the extent to which an order can be filled at a given time, the length of time necessary to replenish items out of stock, and the length of time necessary to deliver an order to a participant.

10. Misrepresenting, directly or by implication, the extent of respondents' sales of products and services, the nature of such sales, including what proportion were derived from the sale of franchises or distributorships, or the market position of respondents in any market.

III

It is further ordered, That respondents Koscot Interplanetary, Inc., and Glenn W. Turner Enterprises, Inc., corporations, their successors or assigns, and respondents Glen W. Turner, Ben Bunting, Hobart Wilder, Malcolm Julian, and Raleigh P. Mann incident to selling any franchise or distributorship, shall:

1. Inform orally all persons to whom solicitations are made, and provide in writing in all applications and contracts, in at least ten-point bold type, that the application or contract may be cancelled for any reason by notification to respondents in writing within at least seven (7) business days from the date of execution.

2. Refund immediately all monies to participants who:

(a) Cancel their contracts in accordance with paragraph 1 of this Section III; or

(b) Show that respondents' contract solicitations or performance were attended by or involved violation of any of the provisions of this Order.

3. Provide to a prospective franchisee or distributor at least fifteen (15) business days prior to the execution by the prospective franchisee or distributor of any franchise or distributorship agreement or any other binding obligation, or the payment by the prospective franchisee or distributor of any consideration in connection with the sale or proposed sale of a franchise:

(a) A certified balance sheet for the most recent year; a certified profit and loss statement for the most recent three year period; and a statement of any material changes in the financial soundness of the franchisor since the date of such financial statements.

(b) A copy of Federal Trade Commission Consumer Bulletin No. 4, "Advice for Persons Who Are Considering an Investment in a Franchise Business."

(c) A statement disclosing (a) the number of franchises or distributorships, whether active or inactive, already sold at the end of the last calendar year, and

V 40 251 DEC 31 75 XUM

(b) the number of franchises or distributorships, whether active or inactive, already present in the market area in which the prospective franchisee or distributor plans to operate.

IV

It is further ordered, That respondents Koscot Interplanetary, Inc., and Glenn W. Turner Enterprises, Inc., corporations, their officers, agents, representatives, employees, successors, and assigns and Glenn W. Turner, Ben Bunting, Hobart Wilder, Malcolm Julian, and Raleigh P. Mann, individually, their agents, representatives, and employees, directly or indirectly through any corporate or other device, in connection with the offering for sale, or distribution of goods or commodities in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from:

1. Entering into, maintaining, promoting, or enforcing any contract, agreement, understanding, marketing system, or course of conduct with any dealer or distributor of such goods or commodities to do or perform or attempt to do or perform any of the following acts, practices, or things:

(a) Fix, establish, or maintain the prices, discounts, rebates, overrides, commissions, fees, or other terms or conditions of sale relating to pricing upon which goods or commodities may be resold; *Provided*, That in those states having Fair Trade laws, products may be marketed pursuant to the provisions of such laws.

(b) Require or coerce any person to enter into a contract, agreement, understanding, marketing system, or course of conduct which fixes, establishes, or maintains the prices, discounts, rebates, overrides, commissions, fees, or other terms or conditions of sale relating to pricing upon which goods or commodities may be marketed pursuant to the provisions of such laws.

(c) Require or coerce any person to enter into a contract, agreement, understanding, marketing system, or course of conduct requiring, inducing, or coercing any distributor to refrain from selling any merchandise in any quantity to or through any specified person, class of persons, business, or class of businesses.

2. Preventing distributors from entering into consignment agreements or selling their business to another individual.

3. Engaging, either as part of any contract, agreement, understanding, or course of conduct with any distributor or dealer of any goods or commodities, or individually and unilaterally, in the practice of:

(a) Publishing or distributing, directly or indirectly, any resale price, product price list, order form, report form, or promotional material which employs resale prices for goods or commodities without stating clearly and visibly in conjunction therewith the following statement:

The prices quoted herein are suggested prices only. Distributors are free to determine for themselves their own resale prices.

(b) Publishing or distributing, directly or indirectly, any schedule of discounts, rebates, commissions, overrides, or other bonuses to be paid by one distributor or class of distributors to any other distributors or class of distributors, without stating clearly and visibly in conjunction therewith the following:

The discounts [rebates, commissions, etc.] quoted herein are suggested only. Distributors are free to determine for themselves any amounts to be paid.

Provided, That in those states having Fair Trade laws, products may be marketed pursuant to the provisions of such laws.

4. Requiring any distributor or dealer or other participant in any merchandising program to obtain the prior approval of respondents for any product advertising or promotion, unless any selling prices and names of any selling outlets are required to be deleted from such proposed advertising or promotion prior to submission for prior approval.

V

It is further ordered, That respondents Koscot Interplanetary, Inc., and Glenn W. Turner Enterprises, Inc., corporations, their officers, agents, representatives, employees, successors, and assigns, and Glenn W. Turner, Ben Bunting, Hobart Wilder, Malcolm Julian, and Raleigh P. Mann, individually, their agents, representatives, and employees, directly or indirectly through any corporate or other device, in connection with the offering for sale, or distribution of goods or commodities in commerce, as "commerce" is defined in the Federal Trade Commission Act and in the Clayton Act, shall forthwith cease and desist from:

1. Entering into, maintaining, promoting, or enforcing any contract, agreement, understanding, marketing system, or course of conduct with any dealer or distributor of such goods or commodities to require or coerce any person to enter into a contract, agreement, understanding, marketing system, or course of conduct which discriminates, directly, or indirectly, in the net price of any merchandise of like grade and quality by selling to any purchaser at net prices higher than the net prices charged to any other purchaser who in fact competes in the resale or distribution of such merchandise with the purchaser paying the higher price.

2. Discriminating, directly or indirectly, in the net price, or terms or conditions of sale of any merchandise of like grade and quality by selling to any purchaser at net prices, or upon terms or conditions of sale, less favorable than the net prices or terms or conditions of sale upon which such products are sold to any other purchaser to the extent such other purchaser competes in the resale of any such products with the purchaser who is afforded less favorable net price or terms or conditions of sale, or with a customer of the purchaser afforded the less favorable net price or terms or conditions of sale.

VI

It is further ordered, That respondents Koscot Interplanetary, Inc., Glenn W. Turner Enterprises, Inc., Glenn W. Turner, Ben Bunting, Hobart Wilder, Malcolm Julian, and Raleigh P. Mann, their successors and assigns shall forthwith deliver a copy of Section II of this order to cease and desist to all present and future salespeople, franchisees, distributors, participants, or other persons engaged in the sale of franchises, distributorships, products, or services on behalf of respondents, and secure from each such person a signed statement acknowledging receipt thereof.

VII

It is further ordered, That the corporate respondents and their successors and assigns shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondents, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporations which may affect compliance obligations arising out of this Order.

VIII

It is further ordered, That each individual respondent (Glenn W. Turner, Ben Bunting, Hobart Wilder, Malcolm Julian, and Raleigh P. Mann) shall promptly notify the Commission of each change in his business or employment status, including discontinuance of his present business or employment, and each affiliation with a new business or employment following the effective date of this Order. Such notice shall include the address of the business or employment with which respondent is newly affiliated and a description of the business or employment as well as a description of the respondent's duties and responsibilities in that business or employment.

IX

It is further ordered, That each of the respondents herein and their successors and assigns shall, within sixty (60) days after the effective date of this Order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with the provisions of this Order.

X

It is further ordered, That the complaint herein be, and it hereby is, dismissed as to Michael Delaney and Terrell Jones; *provided*, However, that the dismissal as to Terrell Jones is without prejudice to the right of the Commission to institute further proceedings against him if the public interest so warrants.

Opinion of the Commission by Commissioner Dixon.

The Initial Decision was issued March 20, 1975.

The Final Order was issued by the Commission Nov. 18, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

[FR Doc.75-35207 Filed 12-30-75;8:45 am]

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 76-2]

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

Duty-Free Entry of Certain Merchandise From Designated Beneficiary Developing Countries

Title V of the Trade Act of 1974 (Pub. L. 93-618, 88 Stat. 1978), hereinafter referred to as the "Trade Act", authorizes the President to establish a Generalized System of Preferences (GSP) which would permit the duty-free entry of eligible merchandise arriving directly from designated "beneficiary developing countries." Section 503(b) of the Trade Act, relating to the requirements which must be met for eligible merchandise to receive duty-free treatment, authorizes the Secretary of the Treasury to prescribe such regulations as may be necessary to carry out the provisions of that subsection.

In accordance with sections 503(a) and 131(a) of the Trade Act, a notice by the President was published in the FEDERAL REGISTER on March 26, 1975 (40 FR 13456), listing the articles which will be considered for designation as eligible articles for purposes of the Generalized System of Preferences. The notice also included a list of countries which were designated by Executive Order 11844 of March 24, 1975 (40 FR 13295), pursuant to sections 502(a)(1) and 503(a) of the Trade Act, as beneficiary developing countries and countries under consideration for designation as beneficiary developing countries.

In order to designate additional beneficiary developing countries and eligible articles, and to implement the Generalized System of Preferences, the President signed Executive Order 11888 on November 24, 1975. This Executive Order, which was published in the FEDERAL REGISTER on November 26, 1975 (40 FR 55276), superseded Executive Order 11844 of March 24, 1975.

On October 28, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 50045) by the U.S. Customs Service, Department of the Treasury, which proposed to amend Part 10 of the Customs Regulations (19 CFR Part 10), by establishing a procedure for the duty-free entry of certain merchandise from designated beneficiary developing countries.

The amendments to Part 10 of the Customs Regulations set forth requirements and procedures for the free entry of eligible merchandise from beneficiary developing countries. The amendments would require the submission of evidence of the country of origin and, if it is determined to be necessary by the appropriate district director of Customs, proof that the merchandise was imported directly from the beneficiary developing country. If the district director is satisfied from other evidence that the merchandise clearly qualifies for duty-free treatment under the Generalized System of Preferences, he would be authorized to waive production of proof of direct shipment.

The amendments further provide that eligible merchandise may qualify for duty-free entry under the Generalized System of Preferences only if the sum of the cost or value of the materials produced in the beneficiary developing country plus the direct costs of processing operations performed there are at least 35 percent of the final appraised value of the merchandise. In the case of eligible merchandise produced by 2 or more countries which are members of an association of countries treated as one country under section 502(a)(3) of the Trade Act, the percentage of the cost or value of the materials produced in those countries plus the direct costs of processing operations performed there must be at least 50 percent of the final appraised value. The amendments also explained the procedure used in computing the cost or value of materials and the direct costs of processing operations.

Interested persons were given until November 28, 1975, to submit relevant data, views, or arguments regarding the proposals set forth in the notice of proposed rulemaking. After consideration of the comments received, the following changes were made to the proposals:

1. Proposed § 10.172 is amended to provide that a written claim for duty-free entry shall be filed on the entry document by placing the symbol "A" as a prefix to the Tariff Schedules of the United States Annotated item number for each article for which such treatment is claimed.

2. Proposed § 10.173(a)(1) is amended by the addition of the title "the Generalized System of Preferences" to the Certificate of Origin Form A. The section is further amended to provide that the Certificate of Origin must be properly completed. However, inasmuch as the instructions on the form are incorrect, the phrase "in accordance with the instructions provided on the form", has been deleted. Additional instructions are to be issued to each of the beneficiary developing countries for the completion of Form A.

3. Proposed § 10.173(a)(3) is amended by deleting the requirement for redelivery of the merchandise for failure to furnish the Certificate of Origin within 60 days after entry, or such additional period as the district director may allow for good cause shown.

4. Proposed § 10.173(a)(5) is amended to provide that the district director may waive production of a Certificate of Origin in the case of articles for personal or household use which are not intended for resale or brought in for the account of others, and in other cases until March 31, 1976, when he is otherwise satisfied that the merchandise qualifies for duty-free entry under the Generalized System of Preferences.

5. Proposed § 10.175 has been amended by the addition of a new paragraph (c) to the definition of "imported directly", to allow, under certain conditions, eligible articles to qualify for treatment under GSP where they have been introduced into a free trade zone in a beneficiary developing country.

6. Proposed § 10.177(c)(2) is amended by providing that the formula used for determining the cost or value of material which is provided to the manufacturer without charge shall also apply where the material is provided at less than fair market value.

In addition to the above changes, a number of editorial corrections have been made in the text of the provisions originally proposed.

Accordingly, Part 10 of the Customs Regulations (19 CFR Part 10) is amended by adding a new centerhead and §§ 10.171 through 10.178 to read as set forth below.

Executive Order 11844 dated November 24, 1975, which was published by the President in the FEDERAL REGISTER on November 26, 1975 (40 FR 55276), provided that the implementation of the Generalized System of Preferences shall be effective on January 1, 1976. In addition, it is desirable to make the benefits of this system available to the public as soon as possible. Therefore, good cause is found for dispensing with the delayed effective date provision of 5 U.S.C. 553(d).

Effective date. These amendments shall be effective with respect to articles that are both (1) imported, and (2)(a) entered for consumption or (b) withdrawn for consumption on or after January 1, 1976.

LEONARD LEHMAN,
Acting Commissioner of Customs.

Approved: December 23, 1975.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

Part 10 of the Customs Regulations (19 CFR Part 10) is amended by the insertion of a new centerheading and §§ 10.171 through 10.178 to read as follows:

GENERALIZED SYSTEM OF PREFERENCES

§ 10.171 General.

(a) *Statutory authority.* Title V of the Trade Act of 1974 (19 U.S.C. 2461–2465) authorizes the President to establish a Generalized System of Preferences (GSP) to provide duty-free treatment for eligible articles imported directly from designated beneficiary developing countries. Beneficiary developing countries and articles eligible for duty-free treatment are designated by the President by Executive order in accordance with sections 502(a)(1) and 503(a) of the Trade Act of 1974 (19 U.S.C. 2462(a)(1), 2463(a)).

(b) *Country defined.* For purposes of §§ 10.171 through 10.178, except as otherwise provided in § 10.176(a), the term "country" means any foreign country, any overseas dependent territory or possession of a foreign country, or the Trust Territory of the Pacific Islands. In the case of an association of countries which is a free trade area or customs union, the President may by Executive order provide

V 40 251 DEC 31 75 XUM

that all members of such association other than members which are barred from designation under section 502(b) of the Trade Act of 1974 (19 U.S.C. 2462 (b)) shall be treated as one country for purposes of §§ 10.171 through 10.178.

§ 10.172 Claim for exemption from duty under the Generalized System of Preferences.

A claim for an exemption from duty on the ground that the Generalized System of Preferences applies shall be allowed by the appropriate district director only if he is satisfied that the requirements set forth in this section and sections 10.173 through 10.178 have been met. A written claim for duty-free entry shall be filed on the entry document by placing the symbol "A" as a prefix to the Tariff Schedules of the United States Annotated item number for each article for which such treatment is claimed.

§ 10.173 Evidence of the country of origin.

(a) *Shipments valued in excess of $250.*—(1) *Certificate of Origin.* Except as provided in paragraph (a)(5) of this section, the importer or consignee of a shipment of eligible merchandise valued in excess of $250 shall file with the district director at the time of entry the Generalized System of Preferences Certificate of Origin Form A, as evidence of the country of origin. Form A shall be signed by the exporter of the merchandise in the country from which it is directly imported, certified by the designated governmental authority in that country, and properly completed.

(2) *Duplicate Certificate of Origin.* In the event of the loss, theft, or destruction of a Certificate of Origin, the district director will accept at the time of entry a duplicate Certificate of Origin issued by the appropriate governmental body in the country of origin and endorsed with the word "duplicate" in box 4. The duplicate shall bear the date of issue of the original Certificate of Origin and will be effective from that date.

(3) *Release under bond.* If the required Certificate of Origin properly completed, or a duplicate thereof as described in subparagraph (2) of this paragraph, is not produced at the time of entry, the entry shall be accepted, subject to compliance with the requirements set forth in § 10.172 and §§ 10.174 through 10.178, only if the importer or consignee gives a bond on Customs Form 7551, 7553, or 7595 for the production of the Certificate of Origin. The bond shall be in the amount required under § 113.14 of this chapter. Within 60 days after such entry, or such additional period as the district director may allow for good cause shown, the importer or consignee shall deliver to the district director the Certificate of Origin. If the Certificate of Origin is not delivered to the district director within 60 days of the date of entry or such additional period as may be allowed by the district director for good cause shown, liquidated damages shall be assessed in the full amount of the bond given on Customs Form 7551. When the transaction has been charged against a bond given on Customs Form 7553 or 7595, liquidated damages shall be assessed in the amount that would have been demanded under the preceding sentence if the merchandise had been released under a bond given on Customs Form 7551.

(4) *Verification of evidence.* Evidence of the country of origin required under this paragraph shall be subject to such verification as the district director deems necessary.

(5) *Waiver of Certificate of Origin.* (i) The district director may waive production of a Certificate of Origin only in the case of articles for personal or household use which are not intended for resale or brought in for the account of others, when he is otherwise satisfied that the merchandise qualifies for duty-free entry under the Generalized System of Preferences.

(ii) Until March 31, 1976, the district director may waive production of a Certificate of Origin when he is otherwise satisfied that the merchandise qualifies for duty-free entry under the Generalized System of Preferences.

(b) *Shipments valued at $250 or less.* Although the filing of a Certificate of Origin, is not required for shipments valued at $250 or less, the district director may require such other evidence of the country of origin as he deems necessary.

§ 10.174 Evidence of direct shipment.

(a) *Documents constituting evidence of direct shipment.* The district director may require that appropriate shipping papers, invoices, or other documents be submitted within 60 days of the date of entry as evidence that the articles were "imported directly", as that term is defined in section 10.175. Any evidence of direct shipment required by the district director shall be subject to such verification as he deems necessary.

(b) *Waiver of evidence of direct shipment.* The district director may waive the submission of evidence of direct shipment when he is otherwise satisfied, taking into consideration the kind and value of the merchandise, that the merchandise clearly qualifies for treatment under the Generalized System of Preferences.

§ 10.175 Imported directly defined.

Eligible articles shall be imported directly from a beneficiary developing country to qualify for treatment under the Generalized System of Preferences. For purposes of §§ 10.171 through 10.178 the words "imported directly" mean:

(a) Direct shipment from the beneficiary country to the United States without passing through the territory of any other country; or

(b) Except as provided in paragraph (c) of this section, if shipped from a beneficiary developing country to the United States through the territory of any other country, the merchandise shall not have entered into the commerce of any other country while en route to the United States, and the invoices, bills of lading, and other documents connected with the shipment shall show the United States as the final destination; or

(c) If shipped from the beneficiary developing country to the United States through a free trade zone in a beneficiary developing country, the merchandise shall not enter into the commerce of the country maintaining the free trade zone, and

(1) The eligible articles must not undergo any operation other than:

(i) Sorting, grading, or testing,

(ii) Packing, unpacking, changes of packing, decanting or repacking into other containers,

(iii) Affixing marks, labels, or other like distinguishing signs on articles or their packing, if incidental to operations allowed under this section, or

(iv) Operations necessary to ensure the preservation of merchandise in its condition as introduced into the free trade zone.

(2) Merchandise may be purchased and resold, other than at retail, for export within the free trade zone.

(3) The Certificate of Origin issued by the designated beneficiary developing country of origin shall state in column 12, that the eligible articles comply with the origin requirements for goods exported to the United States under the Generalized System of Preferences. Column 2 of the Certificate of Origin shall include the name of the consignee in the United States or in the free trade zone.

(4) The certifying authority in the designated beneficiary developing country maintaining the free trade zone shall issue a Certificate of Origin Form A, declaring what operations were performed within the free trade zone. The original Certificate of Origin issued in the beneficiary developing country of origin shall be retained by the designated authority in the country maintaining the free trade zone and a copy thereof shall be furnished to the United States importer.

(5) For the purposes of this section, a free trade zone is a predetermined area or region declared and secured by or under governmental authority, where certain operations may be performed with respect to articles, without such articles having entered into the commerce of the country maintaining the free trade zone.

§ 10.176 Country of origin criteria.

(a) *Merchandise produced in one beneficiary developing country.* Merchandise which is the growth, product, manufacture, or assembly of a beneficiary developing country and which is imported directly from such beneficiary developing country may qualify for duty-free entry under the Generalized System of Preferences only if the sum of the cost or value of the materials produced in the beneficiary developing country, plus the direct costs of processing operations performed in such country, is not less than 35 percent of the value of the article as appraised in accordance with section 402 or 402a, Tariff Act of 1930, as amended (19 U.S.C. 1401a, 1402). For purposes of this paragraph, the term "country" does not include an association of countries which is treated as one country under § 10.171(b), but does include a country which is a member of any such association.

(b) *Merchandise produced in two or more countries which are members of an association.* Merchandise which is the growth, product, manufacture, or assembly of two or more countries which are members of an association of countries treated as one country under section 502(a)(3) of the Trade Act of 1974 (19 U.S.C. 2462(a)(3)) and § 10.171(b), and which is imported directly from a member country, may qualify for duty-free treatment under the Generalized System of Preferences only if the sum of the cost or value of the materials produced in such countries, plus the direct costs of processing operations performed in such countries, is not less than 50 percent of the value of the article as appraised in accordance with section 402 or 402a, Tariff Act of 1930, as amended (19 U.S.C. 1401a, 1402).

(c) *Merchandise grown, produced, or manufactured in a beneficiary developing country.* Merchandise which is wholly the growth, product, or manufacture of a beneficiary developing country, or an association of countries treated as one country under section 502(a)(3) of the Trade Act of 1974 (19 U.S.C. 2462(a)(3)) and § 10.171(b), and manufactured products consisting of materials produced only in such country or countries, shall normally be presumed to meet the requirements set forth in this section.

§ 10.177 Cost or value of materials produced in the beneficiary developing country.

(a) *"Produced in the beneficiary developing country" defined.* For purposes of §§ 10.171 through 10.178, the words produced in the beneficiary developing "country" refer to the constituent materials of which the eligible article is composed which are either:

(1) Wholly the growth, product, or manufacture of the beneficiary developing country; or

(2) Substantially transformed in the beneficiary developing country into a new and different article of commerce.

(b) *Questionable origin.* When the origin of an article either is not ascertainable or not satisfactorily demonstrated to the appropriate district director, the article shall not be considered to have been produced in the beneficiary developing country.

(c) *Determination of cost or value of materials produced in the beneficiary developing country.*

(1) The cost or value of materials produced in the beneficiary developing country includes:

(i) The manufacturer's actual cost for the materials;

(ii) When not included in the manufacturer's actual cost for the materials, the freight, insurance, packing, and all other costs incurred in transporting the materials to the manufacturer's plant;

(iii) The actual cost of waste or spoilage (material list), less the value of recoverable scrap; and

(iv) Taxes and/or duties imposed on the materials by the beneficiary developing country, or an association of countries treated as one country, provided they are not remitted upon exportation.

(2) Where the material is provided to the manufacturer without charge, or at less than fair market value, its cost or value shall be determined by computing the sum of:

(i) All expenses incurred in the growth, production, manufacture or assembly of the material, including general expenses;

(ii) An amount for profit; and

(iii) Freight, insurance, packing, and all other costs incurred in transporting the materials to the manufacturer's plant.

If the pertinent information needed to compute the cost or value of the materials is not available, the appraising officer may ascertain or estimate the value thereof using all reasonable ways and means at his disposal.

§ 10.178 Direct costs of processing operations performed in the beneficiary developing country.

(a) *Items included in the direct costs of processing operations.* As used in § 10.176, the words "direct costs of processing operations" mean those costs either directly incurred in, or which can be reasonably allocated to, the growth, production, manufacture, or assembly of the specific merchandise under consideration. Such costs include, but are not limited to:

(1) All actual labor costs involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training, and the cost of engineering, supervisory, quality control, and similar personnel;

(2) Dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise;

(3) Research, development, design, engineering, and blueprint costs insofar as they are allocable to the specific merchandise; and

(4) Costs of inspecting and testing the specific merchandise.

(b) *Items not included in the direct costs of processing operations.* Those items which are not included within the meaning of the words "direct costs of processing operations" are those which are not directly attributable to the merchandise under consideration or are not "costs" of manufacturing the product. These include, but are not limited to:

(1) Profit; and

(2) General expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen's salaries, commissions, or expenses.

(R.S. 251, as amended, sec. 624, 46 Stat. 759, sec. 503(b), 88 Stat. 2099 (19 U.S.C. 66, 1624, 2463(b)))

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 510—NEW ANIMAL DRUGS

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Tylosin

The Commissioner of Food and Drugs has evaluated a new animal drug application (101-528V) filed by Syntex Agribusiness, Inc., Nutrition and Chemical Division, 1915 West Sunshine, Springfield, MO 65805, proposing safe and effective use of a tylosin premix for the manufacture of swine feed. The application is approved, effective December 31, 1975.

The Commissioner is amending §§ 510.600 and 558.625 (21 CFR 510.600 and 558.625) to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness of data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner (21 CFR 2.120), §§ 510.600 and 558.625 are amended as follows:

1. In Part 510, in § 510.600 by alphabetically inserting a sponsor listing in paragraph (c)(1) and numerically inserting a sponsor listing in paragraph (c)(2) to read as follows:

§ 510.600 Names, addresses, and code numbers of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address:

* * * * *

	Drug listing No.
Syntex Agribusiness, Inc., Nutrition and Chemical Div., 1915 West Sunshine, Springfield, Mo. 65805	017180

(2) * * *

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Docket No. 75F-0352]

PART 121—FOOD ADDITIVES

Antioxidants and/or Stabilizers for Polymers

The Commissioner of Food and Drugs is amending § 121.2566 *Antioxidants and/or stabilizers for polymers* (21 CFR 121.2566) to provide for additional uses of cyclic neopentanetetrayl bis(octadecyl phosphite) effective December 31, 1975; objections by January 30, 1976.

Notice was given by publication in the FEDERAL REGISTER of February 11, 1974 (39 FR 5221) that a petition (FAP 4B2985) had been filed by Weston Chemical, Borg-Warner Corp., Montvale, NJ 07645, proposing that § 121.2566 be amended to provide for the safe use of cyclic neopentanetetrayl bis(octadecyl phosphite) as an antioxidant and/or stabilizer in the manufacture of polystyrene and rubber-modified polystyrene, vinyl chloride polymers and copolymers, and additional olefin polymers intended to contact food. Subsequently, the petitioner amended the petition by withdrawing the request for vinyl chloride polymers and copolymers.

The Commissioner, having evaluated data in the petition and other relevant material, is amending the regulation as set forth below to provide for use of the additive as proposed by the petitioner.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner (21 CFR 2.120), § 121.2566(b) is amended by revising the entry for cyclic neopentanetetrayl bis(octadecyl phosphite), to read as follows:

§ 121.2566 Antioxidants and/or stabilizers for polymers.

• • • • •

(b) List of substances:

Limitations
• • • • •
Cyclic neopentanetetrayl bis(octadecyl phosphite); the phosphorus content is in the range of 7.8–8.2 weight percent.
• • • • •

Any person who will be adversely affected by the foregoing order may at any time on or before January 30, 1976, file with the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Six copies of all documents shall be filed and should be identified with the Hearing Clerk docket number found in brackets in the heading of this order. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This order shall become effective December 31, 1975.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated: December 23, 1975.

WILLIAM F. RANDOLPH,
Acting Assistant Commissioner for Compliance.

[FR Doc.75-35109 Filed 12-30-75;8:45 am]

PART 510—NEW ANIMAL DRUGS

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Tylosin

The Commissioner of Food and Drugs has evaluated a new animal drug application (100–991) filed by Furst-McNess Co., Freeport, IL 61032, proposing safe and effective use of a tylosin premix for the manufacture of swine feed. The application is approved, effective December 31, 1975.

The Commissioner is amending §§ 510.600 and 558.625 (21 CFR 510.600 and 558.625) to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 510 and 558 are amended as follows:

1. In Part 510, § 510.600 is amended by adding a new sponsor, alphabetically to paragraph (c)(1) and numerically to paragraph (c)(2), to read as follows:

§ 510.600 Names, addresses, and code numbers of sponsors of approved applications.

• • • • •

(c) • • •

(1) • • •

• • • • •	
010439	Furst-McNess Co., Freeport, Ill. 61032.
• • • • •	

2. In Part 558, § 558.625 is amended by adding paragraph (b)(42) to read as follows:

§ 558.625 Tylosin.

• • • • •

(b) • • •

(42) To 010439: 0.4, 0.5, and 2 grams per pound, paragraph (f)(1)(vi)(*a*) of this section.

• • • • •

Effective date. This regulation shall be effective December 31, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: December 22, 1975.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

[FR Doc.75-35110 Filed 12-30-75;8:45 am]

[Docket No. 75N-0178]

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Mebendazole Paste

The Commissioner of Food and Drugs has evaluated a new animal drug application (97–221V) filed by Pitman-Moore, Inc., Washington Crossing, NJ 08560, proposing safe and effective use of mebendazole paste for treatment of certain nematode infections in horses. The application is approved, effective December 31, 1975.

The Commissioner is amending § 520.1320, which currently provides for use of mebendazole oral powder, to reflect this new approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness of data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 5.1), § 520.1320 is amended by revising paragraphs (a), (b), (d), (2), and (3), and by deleting paragraphs (d)(4), (5), and (6) as follows:

§ 520.1320 Mebendazole oral.

(a) *Chemical name.* Methyl 5-benzoylbenzimindazole-2-carbamate.

(b) *Specifications.* Oral powder: Each gram contains 166.7 milligrams of mebendazole. Oral paste: Each gram contains 200 milligrams of mebendazole.

• • • • •

(d) • • •

(2) The drug is given at 1 gram of mebendazole per 250 pounds of body weight per dose.

(3) It is administered as follows: (i) *Oral powder.*

(*a*) It is given by sprinkling directly on the grain portion of the ration or dissolving in 2 to 4 pints of water and administering by stomach tube.

(*b*) The drug is compatible with carbon disulfide, which can be used concurrently for bot control (*Gastrophilus spp.*). Routine cautions regarding the use of carbon disulfide must be observed.

(*c*) Do not administer to horses intended for use as food.

(*d*) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(ii) *Oral paste.* (*a*) It is given by dosing gun (syringe), inserting the tip of the gun at the interdental space in the horse's mouth and depositing the paste on the animal's tongue. The hand is placed under the animal's jaw and the head raised to assure the paste is deposited on the roof of the mouth.

(*b*) Not for use in horses intended for food.

(*c*) Consult your veterinarian for assistance in the diagnosis, treatment and control of parasitism.

Effective date. This order shall be effective on December 31, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: December 19 1975.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Furosemide Injection

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (34–478V), filed by Hoechst-Roussel Pharmaceuticals, Inc., Route 202–206, Somerville, NJ 08876, proposing safe and effective use of furosemide injection as a diuretic-saluretic for relief of edema in dogs, cats, horses, and cattle. The supplemental application is approved, effective December 31, 1975.

The Commissioner is amending Part 522 to reflect this approval.

Safe conditions of use for this drug do not require the establishment of a tolerance for residues in edible products as provided in § 556.1(a)(4). (21 CFR 556.1(a)(4)) because the self-limiting aspects involving use of this particular drug would not be expected to yield unsafe residues.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness of data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120), Part 522 is amended by adding new § 522.1010 to read as follows:

§ 522.1010 Furosemide injection.

(a) *Specifications.* Each milliliter of sterile solution contains 50 milligrams of furosemide as the diethanolamine salt.

(b) *Sponsor.* No. 000039 in § 510.600(c) of this chapter.

(c) *Conditions of use.* (1) The drug is used in dogs, cats, and horses for treatment of edema (pulmonary congestion, ascites) associated with cardiac insufficiency and acute noninflammatory tissue edema. It is used in cattle for the treatment of physiological parturient edema of the mammary gland and associated structures.

(2) It is administered at 1 to 2 milligrams per pound of body weight once or twice daily at 6 to 8-hour intervals, either intravenously or intramuscularly. The lower dosage is suggested for cats. Dosage should be adjusted to the individual's response. In severe edematous or refractory cases, the dose may be doubled or increased by increments of 1 milligram per pound of body weight to effect. The established effective dose should be administered once or twice daily.

(3) Horses: Do not use in horses intended for food.

(4) Cattle: Milk taken from animals during treatment and for 48 hours (4 milkings) after the last treatment must not be used for food. Treatment not to exceed 48 hours postparturition. Cattle must not be slaughtered for food within 48 hours following the last treatment.

(5) The drug may result in dehydration and electrolyte imbalance if given in excessive amounts.

(6) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. This regulation shall be effective December 31, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: December 19, 1975.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

[FR Doc.75-35106 Filed 12-30-75;8:45 am]

PART 529—CERTAIN OTHER DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Nifurpirinol Capsules

The Commissioner of Food and Drugs has evaluated a new animal drug application (99–568V), filed by Agricultural and Veterinary Products Division, Abbott Laboratories, North Chicago, IL 60064, proposing safe and effective use of nifurpirinol capsules for control of columnaris diseases in aquarium fish. The applica-

§ 771.22 Interim guidelines for implementation of section 102(2)(C) of the National Environmental Policy Act of 1969.

(a) Environmental impact statements (EIS) are required for all major actions significantly affecting the quality of the human environment. Such statements are to be prepared in accordance with the guidelines published in the FEDERAL REGISTER of August 1, 1973 (38 FR 20550). Copies of draft EIS are to be furnished to other

(5 U.S.C. 3301 3302; E.O. 10577, 3 CFR 1954–58

tion is approved, effective December 31, 1975.

The Commissioner is amending Part 529 to reflect the approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness of data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120), Part 529 is amended by adding new § 529.1526 to read as follows:

§ 529.1526 Nifurpirinol capsules.

(a) *Specifications.* Each capsule contains 3.8 or 7.6 milligrams of nifurpirinol.

(b) *Sponsor.* See No. 043731 in § 510.600(c) of this chapter.

(c) *Conditions of use.* (1) The drug is used in treating aquarium fish for the control of columnaris disease caused by *Chondrococcus columnaris* susceptible to nifurpirinol.

(2) Use one 3.8 milligram nifurpirinol capsule for each 10 gallons of aquarium water. Empty the contents of the capsule directly into the water and stir briefly. Treat for at least 1 hour. If activated charcoal or carbon filtration is being used, disconnect during treatment, but maintain adequate aeration. Resume water filtration after 1 hour treatment. Usually a single treatment is sufficient. For aquariums with charcoal filters, nifurpirinol can be used once each 24 hours up to 3 consecutive days, discontinuing filtration during treatment. If aquarium does not have charcoal filter, do not retreat within 5 days.

(3) Do not use in salt water aquariums.

(4) Do not use while egg bearers or live bearers are reproducing.

Effective date. This amendment shall be effective December 31, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated December 22, 1975.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

[FR Doc.75-35107 Filed 12-30-75;8:45 am]

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Tylosin

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (97-259V) filed by Zip Feed Mills, Inc., P.O. Box 500, 304 East 8th St., Sioux Falls, SD 57101, proposing safe and effective use of a tylosin premix for the manufacture of swine feed. The supplemental application is approved, effective December 31, 1975.

The Commissioner is amending § 558.625 (21 CFR 558.625) to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347, (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120), Part 558 is amended in § 558.625 by revising paragraph (b)(18) to read as follows:

§ 558.625 Tylosin.

• • • • • •

(b) • • •

(18) To 017434: 0.4 and 4 grams per pound; paragraph (f)(1)(vi)(a) of this section.

• • • • •

Effective date. This regulation shall be effective December 31, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: December 22, 1975.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

[FR. Doc.75-35111 Filed 12-30-75;8:45 am]

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

PART 771—ENVIRONMENTAL IMPACT AND RELATED STATEMENTS

Interim Regulations

• Purpose. The purpose of this document is to issue interim regulations implementing section 102(2)(D)(iv) of the National Environmental Policy Act of 1969, as amended. •

Pub. L. 94–83, approved August 9, 1975, was enacted to amend section 102(2) of 1969 (NEPA), 42 U.S.C. 4332, in order to clarify the procedures therein with respect to the preparation of environmental impact statements for major Federal actions funded under a program of grants to States. The Federal-Aid Highway Program established under Title 23, U.S.C., and administered by the Federal Highway Administration (FHWA) represents such a grant-in-aid program. Existing FHWA procedures contained in 23 CFR Part 771 have, therefore, been reviewed in light of the recent NEPA amendment.

Section 102(2)(D)(iv) of the NEPA, as amended, provides for the early notification to and solicitation of views from any Federal land management entity or any other State (i.e. other than the State in which the proposed action is located) relative to any major action or alternative thereto which may have a significant impact upon such entity or State. If there is a disagreement on such impacts, the preparation of a written assessment of such impacts and views is required to be made by the responsible Federal official for incorporation into the final environmental impact statement (EIS). These provisions of the NEPA amendment take effect on January 1, 1976.

In order to clarify existing agency requirements, interim guidelines have been developed for distribution to FHWA field offices and State highway agencies. These guidelines are hereby promulgated in the form of interim regulations and will appear in Title 23, Chapter I, Subchapter H, Part 771 of the Code of Federal Regulations as § 771.22.

The guidelines supplement existing procedures for highway section development and coordination and draft environmental impact statement processing. In addition to providing for early notification and the incorporation of a written assessement in the final EIS when required, the guidelines also provide for coordination efforts in conjunction with preparation of the draft EIS or draft negative declaration as appropriate.

Interested parties and government agencies are encouraged to submit written comments, views, or data concerning these guidelines to the Federal Highway Administration, 400–7th Street, SW., Room 4230, Washington, D.C. 20590, Docket No. 75–10. All submissions received on or before March 26, 1976, will be considered prior to the promulgation of final regulations. Copies of all written communications received will be available for examination during normal business hours at the foregoing address.

This amendment to Title 23, CFR, is made under the authority of 42 U.S.C. 4332 (section 102(2) of the NEPA, as amended), 23 U.S.C. 315 and the delegation of authority by the Secretary of Transportation at 49 CFR 1.48(b).

Effective date. Due to the need for immediate guidance from the FHWA with respect to the processing of major actions after January 1, 1976, and to the interpretive nature of the material being published, issuance of these interim regulations is not subject to the effective date limitation of 5 U.S.C. 553(d). Accordingly, the interim regulations published herein become effective on January 1, 1976.

Issued on: December 24, 1975.

NORBERT T. TIEMANN,
Federal Highway Administrator.

1. *Table of sections.* The table of sections of Part 771 is amended by adding § 771.22 to read as follows:

Sec.
771.22 Interim guidelines for implementing section 102(2)(D)(iv) of the National Environmental Policy Act of 1969, as amended.

2. *Citations of authority.* The citations of authority in Part 771 are amended by revising the first citation to read as follows:

AUTHORITY: 42 U.S.C. 4332(2)(C) and (D), • • •

3. Part 771 is amended by adding a new § 771.22 to read as follows:

§ 771.22 Interim guidelines for implementing section 102(2)(D)(iv) of the National Environmental Policy Act of 1969, as amended.

(a) *Application.* The provisions of this section shall apply to each major FHWA action for which the EIS or negative declaration is initiated after January 1, 1976. These provisions shall also apply to the processing of any EIS or negative declaration which is initiated on or before January 1, 1976, unless one of the following has occurred prior to January 1, 1978:

(1) The FHWA Division Administrator has accepted the draft negative declaration; or

(2) The draft EIS has been made available to the CEQ.

The lists prepared pursuant to § 771.17 shall be used as the basis for determining the date the EIS or negative declaration is initiated. (An EIS or negative declaration included on the last quarterly lists for calendar year 1975 will be considered to have been initiated on or before January 1, 1976.)

(b) *Highway section development and coordination.* (1) Early notification to and solicitation of views from Federal land management entities and other States shall be accomplished in accordance with § 771.8(c).

(i) The notification to other States should be mailed to the clearinghouses of those States unless the Governors designate an agency other than the clearinghouse. The notification to Federal land management entities is to be handled in accordance with instructions from such agencies.

(ii) Each notification shall indicate that it is being made pursuant to section 102(2)(D)(iv) of the National Environmental Policy Act of 1969, as amended.

(iii) A "Federal land management entity" is an agency included under the heading "Public Land Management" in Appendix II of the CEQ Guidelines for Preparation of Environmental Impact Statements (40 CFR Part 1500).

(2) The HA in consultation with the FHWA Division Administrator shall review any comments received from this early notification and identify and evaluate alternative measures to mitigate anticipated adverse impacts. The Division Administrator shall prepare a written evaluation of issues identified during the early coordination efforts which indicate a significant disagreement with a position taken by the HA and FHWA with respect to an impact of the proposed action or any of the alternatives. This evaluation is to be furnished to the HA for incorporation into the draft EIS or draft negative declaration.

(c) *Draft environmental impact statement processing.* (1) The HA shall furnish copies of the draft EIS to Federal land management entities and other States which may be significantly impacted by the proposed action or any of the alternatives with a request that such "entity" or "State" advise the FHWA Division Administrator in writing of any disagreement with the evaluation of impacts in the statement. Copies of the draft EIS are to be furnished to other States' clearinghouses unless the Governors designate an agency other than the clearinghouse. The mailing of copies of the draft EIS to Federal land management entities is to be handled in accordance with instructions from such agencies.

(2) The Division Administrator shall review the comments received and forward them to the HA along with his written assessment of the disagreements for incorporation into the final EIS.

Title 9—Animals and Animal Products

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE (MEAT AND POULTRY PRODUCTS INSPECTION), DEPARTMENT OF AGRICULTURE

PART 308—SANITATION

PART 381—POULTRY PRODUCTS INSPECTION REGULATIONS

Sanitation; Equipment and Utensils; Correction

• Purpose: On June 16, 1975, there appeared in the Federal Register (40 FR 25438–25440) amendments to Part 308 of the Federal meat inspection regulations and Part 381 of the poultry products inspection regulations (9 CFR 308.5, 381.53) concerning procedures for evaluating equipment and utensils to be used in federally inspected plants. These amendments became effective July 17, 1975. The principal purpose of this document is to reinstate provisions inadvertently omitted from the poultry products inspection regulation by those amendments. This document also makes a procedural change in both these regulations and the federal meat inspection regulations concerning disapproval of equipment or utensils. •

The amendments of § 381.53 of the poultry products inspection regulations, unintentionally omitted the then existing texts of paragraphs (b) through (i) of the sections which reflect long standing policies followed in evaluating equipment and utensils under the Act, and their publication is necessary for the information of the public. Accordingly, § 381.53 is hereby revised to include the omitted provisions as paragraphs (c) through (m).

Further, in revising §§ 308.5 and 381.53, the words "before the Administrator" were used in the second sentences of §§ 308.5(f) and 381.53(b), relating to procedure for hearings in connection with actions for denial or conditional approval of equipment or utensils. Provision should have been made for hearings "in accordance with the applicable rules of practice".

§ 308.5 [Amended]

Accordingly, § 308.5(f) is amended by deleting the words "before the Administrator" and substituting in their place the words "in accordance with the applicable rules of practice".

Revised § 381.53 reads as follows:

§ 381.53 Equipment and utensils.

(a)(1) Equipment and utensils used for processing or otherwise handling any edible poultry product or ingredient thereof, in any official establishment shall comply with any applicable provisions of paragraphs (c) through (m) of this section and otherwise shall be of such material and construction as, in

V 40 251 DEC 31 75 XUM

the judgment of the Administrator, will facilitate their thorough cleaning and insure cleanliness in the preparation and handling of all edible poultry products and avoid adulteration and misbranding of such products. In addition to these requirements, equipment and utensils shall not in any way interfere with or impede inspection procedures. Receptacles used for handling inedible products shall be of such material and construction that, in the judgment of the Administrator, their use will not result in adulteration of any edible product or in unsanitary conditions at the establishment, and they shall bear conspicuous and distinctive marking to identify them as only for such use and shall not be used for handling any edible poultry products.

(2) When equipment or utensils for use in preparing or handling product are proposed for use in an official establishment, the operator of the establishment shall so notify the Administrator, and thereafter shall submit to the Administrator such information as the Administrator specifies in each case as necessary to determine whether the equipment or utensils meet the criteria specified in paragraph (a)(1) of this section. The required information shall include, but many not be limited to, assembly type drawings and a list showing the materials of which parts are made. The Administrator will evaluate the model of equipment or utensil and determine whether it is acceptable for its proposed use under the criteria set forth in paragraph (a)(1) of this section.

(3) The Administrator will, from time to time, prepare a listing by name and model number of equipment and utensils that have been evaluated and found to be acceptable for their proposed use in accordance with this section. A copy of such listing can be obtained from Technical Services, Meat and Poultry Inspection Program, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250.

(4) The Administrator may disapprove for use in official establishments particular models of equipment or utensils that he finds do not meet the requirements of paragraph (a)(1) of this section, or that he cannot evaluate because of lack of sufficient information. Further, he may prescribe such conditions for the use of particular models of equipment or utensils, either on a trial or permanent basis, as he finds necessary to prevent adulteration or misbranding of product.

(5) Nothing in this section shall affect the authority of Inspection Service inspectors to reject specific equipment or utensils under § 381.99 of the regulations in this subchapter.

(b) Before approval of any model or specific item of equipment or utensil is finally denied, or is granted only with conditions, the applicant shall be given notice and opportunity to present his views to the Administrator. If the applicant does not accept the Administrator's determination, a hearing in accordance with the applicable rules of practice will be held to resolve such dispute. This shall not preclude rejection of the equipment or utensils under § 381.99 or this section pending the outcome of the presentation of views or hearing.

(c) Refuse containers. Leakproof refuse containers with covers shall be provided, except that perforated containers may be used for the temporary collection of feathers and such containers need not be covered.

(d) Scalding equipment. (1) Scalding tanks shall be constructed and installed so as to prevent contamination of potable water lines and to permit water to enter continuously at a rate which will result in a sanitary scalding operation. The rate of flow necessary to maintain a sanitary scalding operation will be determined on such factors as the class of poultry and the number of birds per minute going into the scalding tank. It shall be the responsibility of the inspector in charge to establish a minimum rate of flow for each scalding tank in each official establishment.

(2) The overflow outlets in scalding equipment shall be of sufficient size to permit feathers and water to be carried off.

(3) The overflow, drawoff valves, and sediment basin drain shall discharge into a floor or valley drain, or onto the floor in proximity to a floor or valley drain.

(e) Wax finishing. When wax dipping is used, metal troughs shall be provided to catch the wax removed from the dipped poultry. Acceptable facilities and methods shall be employed in reclaiming the wax.

(f) Ice shovels. Ice shovels shall be smooth surfaced and entirely constructed of rustproof, impervious material.

(g) Conveyors. (1) Conveyors used in the preparation of ready-to-cook poultry shall be of metal or other acceptable material and of such construction as to permit easy identification of the viscera with their carcass and so designed as will present each carcass or all parts thereof in a way that will permit adequate and efficient inspection.

(2) Overhead conveyors shall be so constructed and maintained that they will not allow grease, oil, or dirt to accumulate on the drop chain or shackle, which shall be of noncorrosive metal.

(3) Nonmetallic belt-type conveyors used in moving poultry products shall be of waterproof composition.

(4) When eviscerated on a conveyor, each carcass shall be suspended and a trough or other acceptable facilities for maintaining proper sanitation shall be provided beneath the conveyor. Such troughs or other facilities shall be flushed or cleaned in an acceptable manner and shall extend beneath the conveyor at all places where processing operations are conducted from the point where the carcass is opened to the point where the viscera have been completely removed.

(h) Chilling and thawing tanks. Chilling and thawing tanks shall be constructed of metal or other suitable material impervious to moisture and shall be of sanitary construction with edges rolled outward. Where mechanical devices are not used for removing carcasses from the chilling or thawing tanks, the tanks shall be of a size that will enable employees to remove poultry without entering the tanks.

(i) Tables. Inspection, eviscerating, and cutting tables shall be made of metal or other acceptable material, have coved corners, and be constructed and placed so as to permit thorough cleaning.

(j) Plants lacking conveyors. In plants where no conveyors are used, each carcass shall be eviscerated in an individual metal tray of seamless construction or in a tray of other acceptable material and construction.

(k) Water spray washing equipment. Water spray washing equipment with sufficient water pressure to thoroughly and efficiently wash carcasses shall be used for washing carcasses inside and out.

(l) Offal receptacles. Watertight receptacles constructed of metal or other acceptable impervious material shall be used for entrails and other waste resulting from preparation of eviscerated poultry.

(m) Receptacles for condemned carcasses. Watertight receptacles for holding or handling condemned carcasses or parts of carcasses shall be so constructed as to be readily and thoroughly cleaned; such receptacles shall be marked in a conspicuous manner with the words "U.S. Condemned" in letters not less than 2 inches high and when required by the inspector in charge, shall be equipped with facilities for locking and sealing.

(Sec. 21, 34 Stat. 1260, as amended, 21 U.S.C. 621; Sec. 14, 71 Stat. 447, as amended, 21 U.S.C. 463; 37 FR 28464, 28477)

It does not appear that further public participation in rulemaking proceedings on these amendments would make additional information available to the Department which would alter the decisions in this matter. Therefore, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that further notice or other public rulemaking proceedings on these amendments are impracticable and unnecessary, and good cause is found for making the amendments effective less than 30 days after publication hereof in the FEDERAL REGISTER.

Accordingly, the amendments shall become effective December 31, 1975.

Done at Washington, D.C., on: December 22, 1975.

HARRY C. MUSSMAN,
Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc.75-35230 Filed 12-30-75;8:45 am]

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. B]

PART 202—EQUAL CREDIT OPPORTUNITY

Obtaining the signature of a spouse prior to January 31, 1976.

This interpretation intends to make clear that until January 31, 1976, creditors may continue to obtain the signatures of both spouses on documents connected with an extension of credit.

Section 202.701—*Obtaining the signature of a spouse prior to January 31, 1976.*

Section 202.7(a) of this Part which becomes effective on January 31, 1976, provides, with certain exceptions not applicable to the present question, that

"• • • a creditor may not require the signature of a spouse or other person on a credit instrument unless such a requirement is imposed without regard to sex or marital status on all similarly qualified applicants who apply for a similar type and amount of credit."

Regulations of certain States require that the signature of both spouses be obtained in connection with credit guaranteed under student loan programs administered by the Department of Health, Education and Welfare. It appears that it may not be possible effectively to amend these regulations in order to eliminate this requirement until the end of January, 1976. Therefore, a question has arisen whether creditors extending credit in connection with such programs may continue until January 31, 1976 to obtain the signatures of both spouses upon instruments connected with the loan.

In deferring the effective date of section 202.7(a), the Board of Governors explained that it had done so because public comment on the regulations as proposed for comment on September 10, 1975 (40 FR 42030) "stated that creditors would need a few months to adapt their application procedures and re-train their employees as to the situations in which a creditor may request or require the signature of a spouse or other person." Accordingly, in extending credit prior to January 31, 1976, in connection with student loan programs administered by the Department of Health, Education, and Welfare a creditor may continue to require the signature of both spouses upon instruments connected with the loan.

(Interprets and applies 12 C.F.R. 202.7)

By order of the Board of Governors, effective December 22, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.75-35143 Filed 12-30-75;8:45 am]

[Reg. D]

PART 204—RESERVES OF MEMBER BANKS

Reserve Requirements

The Board of Governors has amended Regulation D (12 CFR 204) to modify the reserve balances that member banks are required to maintain against certain time deposits. The amendments approved by the Board reduce by ½ percentage point reserves required to be maintained on time deposits having an initial maturity of 180 days or more but less than four years that are outstanding on or issued after December 25, 1975. Prior to these amendments such deposits were subject to a three percent reserve requirement. In no event, however, shall reserves required on a member bank's aggregate amount of time and savings deposits be less than three percent. The effect of these amendments will be to lower the required reserves of member banks by approximately $340 million.

The Board's action is designed to encourage member banks to lengthen the structure of their deposit liabilities and is in line with previous Board action announced on October 15 that was intended to accomplish a similar result. The reduction in reserves announced today will provide member banks with some additional incentive to offer longer term time deposits to depositors.

This action was taken pursuant to the Board's authority under section 19 of the Federal Reserve Act (12 U.S.C. 461) to set reserve ratios for member banks. These amendments to Regulation D are effective on deposits outstanding in the week beginning December 25, 1975, and affect reserves held by member banks in the week beginning January 8, 1976.

On the basis of the Board's assessment of the beneficial effects resulting from its previous actions designed to encourage member banks to lengthen the maturity structure of their liabilities, the Board determined that it was in the public interest to provide immediate additional incentive to member banks to take further steps to restructure the maturity of their deposit liabilities. The restructuring of deposit liabilities achieved by this and other Board actions provides greater stability to the banking system by encouraging member banks to seek to attract longer term time deposits, thus reducing the potential for volatile shifts of funds among deposit institutions. This action will also provide immediate incentive for member banks to offer longer term time deposit instruments on funds available for deposit at the outset of the new year and will allow member banks to plan their liability management programs for the forthcoming year with the prospect of lengthened deposit maturities in mind.

In light of these factors, therefore, the Board determined that good cause exists for dispensing with notice and public participation with respect to these amendments and for promulgating these amendments without deferring the effective date thereof for the 30 day period referred to in section 553(d) of Title 5 of the United States Code, and that it would be impracticable, unnecessary and contrary to the public interest to provide notice and public participation or to defer the effective date. See also § 262.2(e) of the Board's rules of procedure.

Effective December 25, 1975, § 204.5 (a)(1)(ii) and § 204.5(a)(2)(ii) of Regulation D are amended to read as follows:

§ 204.5 Reserve requirements.

(a) • • •

(1) • • •

(ii) 1 percent of its time deposits outstanding on or issued after October 16, 1975, that have an initial maturity of 4 years or more; 2½ per cent of its time deposits outstanding on or issued after December 25, 1975, that have an initial maturity of 180 days or more but less than 4 years; 3 per cent of its time deposits up to $5 million, outstanding on or issued after October 16, 1975, that have an initial maturity of less than 180 days, plus 6 per cent of such deposits in excess of $5 million. *Provided, however,* That in no event shall the reserves required on its aggregate amount of time and savings deposits be less than 3 per cent.

• • • • •

(2) If in a reserve city (except as to any bank located in such a city that is permitted by the Board of Governors of the Federal Reserve System, pursuant to § 204.2(a)(2), to maintain the reserves specified in paragraph (a)(1) of this section)

• • • • •

(ii) 1 per cent of its time deposits outstanding on or issued after October 16, 1975, that have an initial maturity of 4 years or more; 2½ per cent of its time deposits outstanding on or issued after December 25, 1975, that have an initial maturity of 180 days or more but less than 4 years; 3 per cent of its time deposits up to $5 million, outstanding on or issued after October 16, 1975, that have an initial maturity of less than 180 days, plus 6 per cent of such deposits in excess of $5 million. *Provided, however,* That in no event shall the reserves required on its aggregate amount of time and savings deposits be less than 3 per cent.

• • • • •

By order of the Board of Governors, December 24, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

CHAPTER I—COMPTROLLER OF THE CURRENCY, DEPARTMENT OF THE TREASURY

PART 8—ASSESSMENT OF FEES; NATIONAL BANKS; DISTRICT OF COLUMBIA BANKS

Collection of Assessment Suspended

The Comptroller of the Currency has published a proposed revision of the assessment schedule, 12 CFR 8.2, 40 FR 59446. Public comments are being solicited on the proposed revision of the assessment schedule. A decision on the proposed assessment schedule is expected to be made in January, 1976.

The amendment to 12 CFR 8.2 published herewith is merely a temporary and technical one. It postpones the collection of the assessment for the period January 1, to July 1, 1976, until the rule making proceeding has been completed and new rates adopted. The assessments for this period will be made and collected during January or February 1976 at the rates then in effect.

This amendment imposes no burden on any member of the public, but merely postpones payment of an assessment. It is necessary that this amendment be effective immediately so national banks will be timely and authoritatively advised that no payment is due until a decision on the proposed assessment schedule is made by the Comptroller of the Currency. The Comptroller of the Currency thus for good cause finds that notice and public comment upon this temporary and technical amendment are impractical, unnecessary, and contrary to the public interest, and that this amendment should be effective December 31, 1975.

12 CFR 8.2 is amended to read:

§ 8.2 Semiannual assessment rate.

The semiannual assessment consists of a basic assessment of $200 plus 4½ cents for $1,000 of total assets and $50 for each branch. The expense of examination of banks is assessed semiannually, based upon the figures shown on the second and fourth reports of condition of each year. The assessment for the period beginning January 1, 1976, and ending June 30, 1976, will be collected by the Comptroller of the Currency during early 1976 at the above rates or at such other rates as shall then have been adopted by the Comptroller. Each bank subject to the jurisdiction of the Comptroller of the Currency on such dates is subject to the full assessment without proration for any reason.

Effective date. This section becomes effective December 31, 1975.

Dated: December 23, 1975.

JAMES E. SMITH,
Comptroller of the Currency.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Navel Orange Regulation 360]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation fixes the quantity of California-Arizona Navel oranges that may be shipped to fresh market during the weekly regulation period January 2–8, 1976. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 907. The quantity of Navel oranges so fixed was arrived at after consideration of the total available supply of Navel oranges, the quantity currently available for market, the fresh market demand for Navel oranges, Navel orange prices, and the relationship of season average returns to the parity prices for Navel oranges.

§ 907.660 Navel Orange Regulation 360.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the respective quantities of Navel oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Navel orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Navel oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee further reports that the fresh market demand for Navel oranges was fair last week.

Prices f.o.b. averaged $4.35 a carton on a reported sales volume of 1,071 cariots last week, compared with an average f.o.b. price of $4.27 per carton and sales of 1,349 cariots a week earlier.

Track and rolling supplies at 338 cars were down 1 car from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Navel oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on December 29, 1975.

(b) *Order.* (1) The respective quantities of Navel oranges grown in Arizona and designated part of California which maybe handled during the period January 2, 1976, through January 8, 1976, are hereby fixed as follows:

(i) District 1: 776,000 cartons;
(ii) District 2: Unlimited movement;
(iii) District 3: 24,000 cartons."

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as wen use din said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 30, 1975.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-35237 Filed 12-30-75;11:39 am]

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

PART 226—CHILD CARE FOOD PROGRAM

Interim Implementation Provisions

The Food and Nutrition Service hereby issues interim regulations to implement the Child Care Food Program established by the National School Lunch Act and Child Nutrition Act of 1966 Amendments of 1975 (Pub. L. 94–105, enacted October 7, 1975). As the authorizing legislation mandates that regulations to carry out the program be issued not later than 90 days after the date of enactment, time is not available for the publication of a notice of proposed rulemaking with a public comment period preceding the issuance of effective regulations. Accordingly, a notice of proposed rule making is deemed impractical and contrary to the public interest.

In accordance with the spirit of public rule making, however, interested persons are invited to comment on the interim regulations. Written views, arguments, and data received on or before February 15, 1976, will be considered in the promulgation of final Child Care Food Program regulations. Comments should be submitted to William G. Boling, Manager, Child Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, 500 12th Street SW., Washington, D.C. 20250. Copies of all written comments received will be available for inspection by the public during normal business hours in room 598 at the foregoing address.

These interim regulations become effective on January 1, 1976 and replace the regulations governing the year-round operations of the Special Food Service Program for Children (7 CFR Part 225). Final regulations will be issued to be effective July 1, 1976.

The proposed regulations are summarized below: (1) The Program will be administered by the Child Nutrition Division, Food and Nutrition Service, at the national level. Within the States, the Program will be administered by the State educational agency or alternate State agency designated by the Governor, or the appropriate Regional Office of the Food and Nutrition Service.

(2) The Program is available to nonschool, public or private, nonprofit institutions providing day care services where children are not maintained in permanent residence, including day care centers, settlement houses, Head Start centers, family day care programs, recreation centers, and other child care centers.

(3) A public or private nonprofit sponsoring organization may administer the Program for one or more child care centers or family day care programs. The sponsoring organization will be responsible for the development of a management plan, maintenance of food service records for each child care center and family day care program under its jurisdiction, reimbursement to centers and programs and provision of supervisory assistance to centers and programs.

(4) The State agency, or FNSRO where applicable, shall review and approve institution applications, execute operating agreements with institutions, establish accounting procedures for institutions, and monitor the performance of participating institutions. The State agency shall annually submit either a State Plan of Child Nutrition Operations or a State Plan of Child Care Food Program Operations describing program objectives, evaluation methods, and an audit schedule.

(5) Participating institutions must: (a) Demonstrate tax exempt status, be moving toward compliance with IRS requirements, or participate in another Federal program requiring nonprofit status, (b) have Federal, State or local governmental licensing as a child care institution or meet the Federal interagency day care requirements, and (c) provide organized nonresidential child care. Family day care programs operating under the auspices of a nonprofit sponsoring organization are deemed to have nonprofit status for the purposes of this Program.

(6) An institution may serve breakfasts, lunches, suppers, and supplemental food meeting prescribed nutritional standards.

(7) Institutions which serve meals at no separate charge to attending children must serve the same meals to all children regardless of race, color or national origin. Institutions which charge separately for meals must serve meals free or at a reduced price to children eligible for free or reduced price meals in accordance with the State's family-size income standards for free and reduced price school meals.

(8) Institutions must maintain family-size income information on enrolled children, daily records of the number of children served meals by type, copies of invoices and receipts for all operating costs which will be claimed, and records of cash income to the food service program. Additional administrative recordkeeping duties are placed on sponsoring organizations.

(9) State agencies will be funded on the basis of the number of meals served by type (breakfasts, lunches, suppers and supplemental food) and need category (free, reduced price, and paid) multiplied by the national average payment factors.

(10) All institutions must submit information on the number of enrolled children in each need category to the State agency. The State agency will use this information to assign a claiming percentage for each meal served. Reimbursement must not exceed the lesser of (1) food service operating costs less cash income or (2) an amount equal to the number of meals times the assigned reimbursement rates. The State agency may assign varying rates to reflect the relative needs of institutions.

(11) In lieu of maintaining complete food service records, sponsoring organizations may, for family day care programs under their jurisdiction only, consider the cost of food to be 40 cents for a lunch or supper, 20 cents for a breakfast, and 14 cents for a supplement. Such a choice must apply to all family day care programs under the jurisdiction of a sponsoring organization.

These rates are based on rates established for cost of food only under Part 225 of the regulations governing the year-round Special Food Service Program in effect prior to January 1, 1976. The rates have been adjusted to reflect the percent of increase during the period May 1974 to August 1975 in the series of food away from home of the Consumer Price Index, published by the Bureau of Labor Statistics of the Department of Labor.

(12) Commodity assistance will be provided based on the number of lunches and suppers served under the Program in each State in a fiscal year multiplied by the commodity assistance rate established for the fiscal year under the National School Lunch Act. The State agency may elect to receive cash in lieu of commodities as provided in appropriations acts.

(13) Nonfood assistance funds will be allocated among the States according to the ratio among the States of the number of children below age 6 who are members of low income households. Institutions receiving such funds must comply with the property management provisions of Attachment N of Federal Management Circular 74–7.

The interim regulations add a new part to Chapter II of Title 7 of the Code of Federal Regulations, as follows:

Subpart A—General

Sec.
226.1 General purpose and scope.
226.2 Definitions.
226.3 Administration.
226.4 Payment of food assistance funds to States.
226.5 Use of food assistance funds.

Subpart B—State Agency and Regional Office Provisions

226.6 General responsibilities of State agencies and FNSROs.
226.7 State plan of Child Care Food Program Operations.
226.8 Claims against institutions.

Subpart C—Institution Provisions

226.9 Institution provisions.
226.10 Requirements for meals.
226.11 Assignment of rates of reimbursement.
226.12 Claim for reimbursement.
226.13 Effective date for reimbursement payments.
226.14 Free and reduced price meals.
226.15 Additional requirements for sponsoring organizations.
226.16 Donation of commodities.

Subpart D—Nonfood Assistance Provisions

226.17 Definitions.
226.18 Apportionment of nonfood assistance funds to States.
226.19 Payment of nonfood assistance funds to States.
226.20 Matching of nonfood assistance funds.
226.21 Use of nonfood assistance funds.
226.22 Eligibility requirements for nonfood assistance.
226.23 Nonfood assistance reimbursement payments.

Sec.
226.24 Nonfood assistance reimbursement procedures.
226.25 Procurement standards.
226.26 Property management requirements.

Subpart E—Miscellaneous Provisions

226.27 Management evaluations and audits.
226.28 Food service management companies.
226.29 Grant closeout procedures.
226.30 Other provisions.
226.31 Program information.
226.32 Effective date of regulations.

AUTHORITY: Sec. 10, Pub. L. 89-642, 80 Stat. 889 (42 U.S.C. 1779); sec. 16, Pub. L. 94-105, 89 Stat. 522 (42 U.S.C. 1766).

Subpart A—General

§ 226.1 General purpose and scope.

Section 17 of the National School Lunch Act (added by Pub. L. 94-105, enacted October 7, 1975) authorizes the appropriation of funds to enable the Secretary of Agriculture to formulate and carry out a Child Care Food Program to assist States through grants-in-aid and other means to initiate, maintain or expand nonprofit food service programs for children in nonresidential institutions which provide child care. This part announces the policies and prescribes the regulations under which the Program will be carried out. In general, the Program embodies two phases: (a) Payments will be made to State agencies, or FNSROs where applicable, to enable them to reimburse institutions in connection with costs of providing food service to children (food assistance) and (b) payments will be made to State agencies, or FNSROs where applicable, to enable them to reimburse institutions in part for the cost of the purchase or rental of equipment for the storage, preparation, transportation or serving of food to children (nonfood assistance).

§ 226.2 Definitions.

(a) "Act" means the National School Lunch Act, as amended.

(b) "Cash income to the program" means any funds designated for use in an institution's food service program, including children's payments for meals and food service fees.

(c) "CND" means the Child Nutrition Division, Food and Nutrition Service, of the Department.

(d) "Children" means persons 18 years of age or under.

(e) "Claiming percentage" means the ratio of the number of enrolled children in an institution in each need category (free, reduced price, paid) to the total number of enrolled children in the institution.

(f) Costs means administrative costs and operating costs:

"Administrative costs" means operating costs related to planning, organizing, and supervising the Program.

"Operating costs" means costs of obtaining, preparing and serving food (including labor directly involved in preparation and service of food and administrative costs attributable to the Program).

(g) "Department" means the U.S. Department of Agriculture.

(h) "Family" means a group of related or nonrelated individuals who are not residents of an institution or boarding house, but who are living as one economic unit.

(i) "Federal interagency day care requirements" means requirements approved by the Department of Health, Education, and Welfare, the Office of Economic Opportunity and the Department of Labor, on September 23, 1968, for day care centers and family day care programs.

(j) "Fiscal year" means a period of 12 calendar months beginning with July 1, 1975 and ending with June 30, 1976, the period beginning July 1, 1976 and ending September 30, 1976, and the period of 12 calendar months beginning with October 1, 1976, and each October 1 of any calendar year thereafter and ending with September 30 of the following calendar year.

(k) "FNS" means the Food and Nutrition Service of the Department.

(l) "FNSRO" means the appropriate Food and Nutrition Service Regional Office of the Food and Nutrition Service of the Department.

(m) "Free meal" means a meal for which neither the child nor any member of his family pays or is required to work in the institution or the institution's food service.

(n) "Infant cereal" means any iron-fortified dry cereal specially formulated for and generally recognized as cereal for infants that is routinely mixed with formula or milk prior to consumption.

(o) "Infant formula" means any iron-fortified infant formula intended for dietary use solely as a food for normal, healthy infants excluding those formulas specially formulated for infants with inborn errors of metabolism or digestive or absorptive problems. Whole fluid milk used as an alternate for infant formula in the pattern for infants 8 months up to 1 year of age means whole fluid unflavored milk which meets State and local standards.

(p) "Institution" means a family day care program, or a child care center, and includes a sponsoring organization:

"Family day care program" means a licensed organized day care program for children, in a private home, under the auspices of a public or nonprofit private sponsoring organization.

"Child care center" means any licensed nonschool public or private nonprofit institution providing day care services where children are not maintained in permanent residence, including, but not limited to, day care centers, settlement houses, recreation centers, Head Start centers, and institutions providing day care services for handicapped children.

"Sponsoring organization" means any public or private nonprofit organization responsible for the administration of one or more child care centers or family day care programs.

(q) "Meal" means food which is served to children during their attendance at an institution and which meets the nutritional requirements set out in this part.

(r) "Milk" means fluid types of unflavored whole milk or low-fat milk or skim milk or cultured buttermilk which meet State and local standards for such types of milk and flavored milk made from such types of milk which meets such standards; and, in those areas of Alaska, Guam, Hawaii, American Samoa, Puerto Rico, the Trust Territory of the Pacific Islands and the Virgin Islands, where a sufficient supply of such types of milk cannot be obtained, includes recombined or reconstituted whole milk, and, in the areas of Alaska, American Samoa, Puerto Rico, the Trust Territory of the Pacific Islands, where a sufficient supply of such types of milk or of recombined or reconstituted whole milk cannot be obtained, includes reconstituted nonfat dry milk.

(s) "OA" means the Office of Audit of the Department.

(t) "OI" means the Office of Investigation of the Department.

(u) "Private nonprofit institution" means a non-public institution which has tax-exempt status under section 501 (c)(3) of the Internal Revenue Code of 1954 or is moving toward compliance with the requirements for tax exempt status; or is currently operating a federally funded program requiring nonprofit status.

(v) "Program" means the Child Care Food Program authorized by section 17 of the Act.

(w) "Reduced price meal" means a meal which is priced at less than the full price of the meal, and for which neither the child nor any member of his family is required to supply an equivalent value in work for the institution or the institution's food program.

(x) "Reimbursement" means financial assistance paid or payable to institutions for meals or equipment at rates assigned by the State agency, or FNSRO where applicable.

(y) "Secretary" means the Secretary of Agriculture.

(z) "State" means any of the 50 states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

(aa) "State agency" means the State educational agency or any other State agency that has been designated by the Governor or other appropriate executive or legislative authority of the State and approved by the Department to administer the Program.

(bb) "State educational agency" means, as the State Legislature may determine: the chief state school officer (such as the State superintendent of public instruction, commissioner of education, or similar officer), or a board of education controlling the State department of education.

(cc) "State's family-size income standards" means the standards prescribed annually by the State, on the basis of the Secretary's income poverty guidelines, for establishing eligibility for free and reduced price school meals under the National School Lunch Program and the School Breakfast Program.

§ 226.3 Administration.

(a) Within the Department, FNS shall act on behalf of the Department in the administration of the Program. Within FNS, CND shall be responsible for Program administration.

(b) Within the State, responsibility for the administration of the Program shall be in the State agency, except that FNSRO shall administer the Program in any State where the State agency is not permitted by law or is otherwise unable to disburse Federal funds paid to it to any institution in the State. References in this part to "FNSRO where applicable" are to FNSRO as the agency administering the Program within a State.

(c) Each State agency desiring to take part in the Program shall enter into a written agreement with the Department for the administration of the Program in the State in accordance with the provisions of this part. Such agreement shall cover the operation of the Program during the period specified therein and may be extended at the option of the Department.

§ 226.4 Payment of food assistance funds to States.

(a) For the fiscal year ending June 30, 1976, the three-month transition period July 1, 1976 through September 30, 1976, the fiscal year ending September 30, 1977, and for each fiscal year thereafter, the Secretary shall make food assistance payments to each State agency in connection with meals meeting the minimum nutritional requirements set forth in § 226.10 of this part served in participating institutions to children. Food assistance payments shall be made no less frequently than on a monthly basis in an amount no less than the sum of the products obtained by multiplying (1) the number of breakfasts served in the Program within the State by the national average payment rate for breakfasts under section 4 of the Child Nutrition Act of 1966, (2) the number of breakfasts served in the Program within the State to children from families whose incomes meet the eligibility criteria for free school meals by the national average payment rate for free breakfasts under section 4 of the Child Nutrition Act of 1966, (3) the number of breakfasts served in the Program within the State to children from families whose incomes meet the eligibility criteria for reduced price school meals by the national average payment rate for reduced price school breakfasts under section 4 of the Child Nutrition Act of 1966, (4) the number of lunches and suppers served in the Program within the State by the national average payment rate for lunches under section 4 of the National School Lunch Act, (5) the number of lunches and suppers served in the Program within the State to children from families whose incomes meet the eligibility criteria for free school meals by the national average payment rate for free school lunches under section 11 of the National School Lunch Act, (6) the number and lunches and suppers served in the Program within the State to children from families whose incomes meet the eligibility criteria for reduced price school meals by the national average payment rate for reduced price lunches under section 11 of the National School Lunch Act, (7) the number of supplements served in the Program within the State by 5 cents, (8) the number of supplements served in the Program within the State to children from families whose incomes meet the eligibility criteria for free school meals by 15 cents, and (9) the number of supplements served in the Program within the State to children from families whose incomes meet the eligibility criteria for reduced price school meals by 10 cents.

(b) Semi-annually, the Secretary will adjust to the nearest $0.0025 the rates established for supplements by a Notice published in the Federal Register, to reflect the changes in the series of food away from home of the Consumer Price Index published by the Department of Labor. The initial adjustment will be effective January 1, 1976, and will reflect changes in the series of food away from home during the period June through November 1975.

(c) Food assistance funds to be paid to any State shall be made available by means of Letters of Credit issued by FNS in favor of the State agency. The State agency shall: (1) Obtain funds needed for reimbursement to institutions through presentation by designated State officials of a Payment Voucher on Letter of Credit (Treasury Form GFO 7578) in accordance with procedures prescribed by FNS and approved by the U.S. Treasury Department; (2) draw only such funds as are needed to pay claims certified for payment; and (3) use such funds without delay for the purpose for which withdrawn. Notwithstanding the foregoing provisions, if funds are made available by Congress for the operation of the Program under a continuing resolution, Letters of Credit shall reflect only the amount available for the effective period of the resolution.

§ 226.5 Use of food assistance funds.

(a) Federal food assistance funds made available under the Program shall be used by State agencies, or FNSROs where applicable, to reimburse institutions for their costs in connection with food service operations, including labor and administrative expenses of this part. All valid claims from institutions shall be paid within 30 days. However, with the approval of FNS, any State agency, or FNSRO where applicable, may reserve for use in carrying out special developmental projects an amount up to 1 per centum of the funds, including funds for nonfood assistance under § 226.19, earned in any fiscal year under the Program.

(b) The State agency shall report information on the use of Program funds on a monthly basis to FNS on a form provided by FNS.

Subpart B—State Agency and Regional Office Provisions

§ 226.6 General responsibilities of State agencies and FNSROs.

(a) Each State agency, or FNSRO where applicable, shall provide consultive, technical, and managerial personnel to administer the Program and monitor performance and to measure progress toward achieving Program goals, as specified in the State plan provided for under § 226.7. Such assistance shall include visits to participating institutions to ensure compliance with Program regulations and with the Department's nondiscrimination regulations (Part 15 of this title), issued under Title VI of the Civil Rights Act of 1964. Documentation of such assistance shall be maintained on file by the State agency, or FNSRO where applicable.

(b) Each State agency shall establish a system of accounting under which institutions shall report the information required in this part. The system shall be such as to permit determination of the Program operating balances available for institutions at any time.

(c) Each State agency shall submit information to FNS on Program operations and the use of Program funds on a form provided by FNS. Each State agency shall maintain current accounting records of Program operations which will adequately identify funds authorizations, obligations, unobligated balances, assets, liabilities, outlays, and income. The records may be kept in their original form or on microfilm, and shall be retained for a period of three years after the date of submission of the final Financial Status Report (AD Form 626), except that, if audit findings have not been resolved, the records shall be retained beyond the three-year period as long as required for the resolution of the issues raised by the audit. Reports shall continue to be submitted on a regular basis after the end of the fiscal year to which they pertain until all unpaid obligations have been liquidated at which time the next report made should be marked "Final" and submission discontinued for that fiscal year.

(d) Each State agency shall promptly investigate complaints received or irregularities noted in connection with the operation of the Program, and shall take appropriate action to correct any irregularities. State agencies shall maintain on file evidence of such investigations and actions. FNS or OI shall make investigations at the request of the State agency or where FNS or OI determines investigations are appropriate.

(e) State agencies, and FNSROs where applicable, shall require institutions to comply with applicable provisions of this part.

(f) State agencies, or FNSROs where applicable, shall annually for institutions under their jurisdiction: (1) Review and approve institution applications and applications for each licensed day care center or family day care program at which a food service will be conducted. (2) Require each sponsoring or-

V 40251 DEC 31 75 XUM

ganization to submit a management plan for review and approval. Such a plan shall include information on (i) the sponsoring organization's budget, (ii) an allocation plan for equitably disbursing funds to child care centers and family day care programs, and (iii) the sponsoring organization staff. State agencies may require such additional information as is necessary to determine the ability of the sponsoring organization to effectively carry out the Program. (3) Execute Program operating agreements with institutions. (4) Review information submitted by non-licensed institutions, and by sponsoring organizations for child care centers and family day care programs, to determine if such institutions are in conformance with the Federal interagency day care requirements. (5) Provide institutions with information on foods available in plentiful supply, based on information provided by the Department. (6) Require institutions to submit not less frequently than annually, information necessary to determine claiming percentages. (7) Set up claiming percentages for each institution as outlined in § 226.11. (8) Establish procedures for institutions to submit claims for reimbursement and ensure that claims are submitted properly. (9) At the beginning of each fiscal year inform institutions of their responsibility to provide free and reduced price meals to children unable to pay the full price and provide to each a copy of the State's family-sized income standards for determining eligibility for free and reduced price meals under the National School Lunch Program and School Breakfast Program to assist them in meeting their responsibility.

§ 226.7 State Plan of Child Care Food Program Operations.

(a) Not later than May 15 of each year, each State agency shall submit to FNS for approval a State Plan of Child Care Food Program Operations: *Provided, however,* That those State agencies which administer other Child Nutrition and National School Lunch Act programs, as well as the Program, shall submit, in lieu thereof, a State Plan of Child Nutrition Operations, in accordance with section 11(e)(1) of the National School Lunch Act and § 210.4a of the National School Lunch Program regulations. The State Plan of Child Nutrition Operations must comply with the provisions of this part. Approval of the State Plan of Child Care Food Program Operations or the State Plan of Child Nutrition Operations by FNS shall be a prerequisite to the payment of funds to the State agency under this part or to the donation by the Department of any commodities under Part 250 of this chapter for use in institutions under this part.

(b) A State Plan of Child Care Food Program Operations and that portion of the State Plan of Child Nutrition Operations, as a minimum, shall include the following information: (1) The number of institutions in the State participating in the Program, together with the average daily attendance in such institutions; (2) an estimate of the number of institutions needing, but not participating in the Program, together with the average daily attendance in such institutions; (3) an estimate of the funds, other than Federal funds, under the control of the State agency and available for use in financing the Program; and (4) the detailed action the State agency proposes to take to use the Federal funds provided under this part and other funds available to and under the control of the State agency to (i) furnish free or reduced price meals to every needy child; (ii) extend the Program to every institution within the State, giving priority to institutions with a concentration of needy children.

(c) In addition, the State Plan of Child Care Food Program Operations and that portion of the State Plan of Child Nutrition Operations which deals with Program assistance must include: (1) objectives; (2) reasons for the establishment of the objectives; (3) methods to be used to accomplish the objectives; and (4) a plan for the conduct of audits which shall (i) state the frequency of audits of the State agency and institutions, and delineate the positive action to be taken during fiscal years 1976 and 1977, and the three month period July 1, 1976, through September 30, 1976, to achieve an audit frequency of not less than once every two years by the beginning of fiscal year 1978 as required under § 226.27; (ii) provide a description of the organization of the State agency in adequate detail to demonstrate the independence of the audit function; and (iii) provide a systematic method to assure timely and appropriate resolution of audit findings and recommendations; and (iv) provide a plan to monitor Program performance and measure progress in achieving Program goals.

(d) Each State Plan of Child Care Food Program Operations and State Plan of Child Nutrition Operations submitted for approval after the initial plan shall report accomplishments achieved under the plan for the prior fiscal year and shall set forth the progress being made under the plan for the current fiscal year.

(e) The State agency shall give the Governor, or his delegated agency, the opportunity to comment on the relationship of the State Plan of Child Care Food Program Operations or the pertinent portion of the State Plan of Child Nutrition Operations to other programs and the effect on areawide or local jurisdictions. A period of 45 days from the date of receipt of the State Plan shall be afforded to make such comments.

§ 226.8 Claims against institutions.

(a) State agencies shall disallow any portion of a Claim for Reimbursement and recover any payment made to an institution that is or was not properly payable under this part. State agencies may use their own procedures to disallow claims and recover overpayments already made.

(b) The State agency may refer to CND, through FNSRO, for determination of any action it proposes to take under this section.

(c) The State agency shall maintain all records pertaining to action taken under this section. Such records shall be retained for a period of three years after the date of the submission of a final Financial Status Report, except that, if audit findings have not been resolved, the records shall be retained beyond the three-year period as long as required for the resolution of the issues raised in the audit.

(d) If CND does not concur with the State agency's action in paying a Claim for Reimbursement or portion of the Claim or in failing to collect an overpayment, CND shall assert a Claim against the State agency for the amount of such Claim paid or for the overpayment. In all such cases the State agency shall have full opportunity to submit to CND evidence or information concerning the action taken. If, in the determination of CND, the State agency's action was unwarranted, the State agency shall promptly pay to FNS the amount of the Claim or overpayment.

(e) The amounts recovered by the State agency from institutions may be utilized, first, to make payments to institutions for the period for which the funds were initially available, and second, to repay any State funds expended in the payment of Claims for Reimbursement under the Program not otherwise repaid. Any amounts recovered which are not so utilized shall be returned to FNS in accordance with the requirements of this part.

(f) When FNSRO administers the Program with respect to institutions, and disallows a Claim for Reimbursement or a portion of a Claim or makes a demand for refund of an alleged overpayment, it shall notify the institution of the reasons for such disallowance or demand, and the institution shall have full opportunity to submit evidence or to resubmit a Claim for any amount disallowed or demanded in the same manner afforded in this section to institutions with respect to which the Program is administered by State agencies.

(g) In the event that the State agency, or FNSRO where applicable, finds that an institution is failing to meet the meal requirements of § 226.10, the State agency, or FNSRO where applicable, need not disallow payment or collect an overpayment arising out of such failure if the State agency, or FNSRO where applicable, takes such other action as, in its opinion, will have a corrective effect.

Subpart C—Institution Provisions

§ 226.9 Institution provisions.

(a) Institutions shall meet the following minimum eligibility criteria for participation in the Program: (1) Have Federal, State or local governmental licensing or approval as a child care institution. Non-licensed institutions, or institutions which register with a State or local agency and are not required to meet State or local minimum licensing standards, must satisfy the Secretary that their standards are no less comprehensive than the Federal interagency day care requirements. Sponsoring organizations are exempt from this requirement but must ensure that all family day care programs and child care centers under their jurisdiction meet this requirement. (2) Have tax-exempt status under section 501(c)(3) of the Internal Revenue Code of 1954 or be moving toward compliance with the requirements for tax-exempt status (i.e., have filed a letter or application with IRS), or participate in another Federal program which requires nonprofit status. The nonprofit status of family day care programs may be based on the tax-exempt status of the sponsoring organization. (3) Provide organized child care for children in nonresidential, nonschool situations.

(b) Institutions annually shall make written applications to the State agency, or FNSRO where applicable, for participation in the Program. Institutions shall also submit an application for each child care center and family day care program at which a food service program will be conducted. Applications shall contain information in sufficient detail to determine the extent of the need for food assistance payments and the ability of the institutions to effectively conduct a food service program.

(c) Sponsoring organizations shall submit a management plan for review and approval by the State agency, or FNSRO where applicable, in accordance with § 226.6(f).

(d) Institutions shall obtain family-size income information on enrolled children and report to the State agency, or FNSRO where applicable, for reimbursement purposes. If such information is not on hand or obtainable from other sources, such as local welfare offices, they shall require parents of enrolled children to submit an affidavit certifying family size and income.

(e) The State agency, or FNSRO where applicable, shall enter into a written agreement with each institution approved for participation. The agreement shall provide that the institution shall: (1) Accept final financial and administrative responsibility for the conduct of a food service under this part, and, if a sponsoring organization, accept final financial and administrative responsibility for each family day care program and child care center under its jurisdiction. (2) Conduct a nonprofit food service and use income accruing to its food service operations only for Program purposes. (3) Serve meals which meet the minimum requirements prescribed in § 226.10 during a period designated as the attendance period by the institution. (4) If the institution charges separately for meals, serve meals free or at a reduced price to all children eligible for free and reduced price meals in accordance with the State's family-size income standards. (5) Make no discrimination against any child because of his inability to pay the full price of the meals and assure that there will be no overt identification of any child by use of any special tokens or tickets or by any other means because of his inability to pay the full price. (6) Claim reimbursement only for the type or types of meals specified in the agreement and at the rates of reimbursement set by the State agency, or FNSRO where applicable. (7) Submit Claims for Reimbursement in accordance with procedures established by the State agency, or FNSRO where applicable. (8) Maintain, in the storage, preparation, and service of food, proper sanitation and health standards in conformance with all applicable State and local laws and regulations. (9) Purchase, in as large quantities as may be efficiently utilized in its food service, food designated as plentiful by the State agency, or FNSRO where applicable. (10) Accept and use in as large quantities as may be efficiently utilized in its food service, such foods as may be offered as a donation by the Department. (11) Maintain necessary facilities for storing, preparing, and serving food. (12) Maintain a financial management system prescribed by the State agency, or FNSRO where applicable, as required by Federal Management Circular 74-7. (13) Upon request, make all accounts and records pertaining to the Program available to the State agency and to FNS for audit or review, at a reasonable time and place. Such records shall be retained for a period of three years after the end of the fiscal year to which they pertain, except that, if audit findings have not been resolved, the records shall be retained beyond the three-year period as long as required for the resolution of the issues raised by the audit. (14) Comply with the requirements of the Department's regulations respecting nondiscrimination (7 CFR Part 15).

(f) [Reserved]

(g) An institution may utilize existing school food service facilities, or obtain meals from a school food service facility and the pertinent requirements of this part shall be embodied in a written agreement between the service institution and the school. The institution shall maintain responsibility for all Program requirements set forth in this part. In the event that the school is received Federal assistance for its food service under the provisions of Parts 210, 215, 220, or 250 of this chapter, the agreement shall also provide that payments made to the school under the agreement shall be deposited into the school's nonprofit food service account and all expenditures made by the school in connection with the agreement shall be paid from such account.

(h) Any institution participating in the Program may also participate in the Summer Food Program (7 CFR Part 225) under section 13 of the National School Lunch Act. An institution participating in both this Program and the Summer Food Program shall: (1) Not serve the same children in both programs; and (2) maintain separate records to support separate claims for reimbursement.

(i) Institutions approved for participation shall conduct their food service in accordance with the provisions of this part and any instructions and handbooks issued by FNS or instructions and handbooks issued by the State agency which are consistent with provisions of this part.

§ 226.10 Requirements for meals.

(a) Each institution participating in the Program shall serve one or more of the following types of meals, as provided in its approved application: (1) Breakfast; (2) Lunch; (3) Supper; (4) Supplemental food served between such other meals, except that supplemental food shall not be approved for reimbursement if the institution also participates in the Special Milk Program for Children (7 CFR Part 215).

(b) Except as otherwise provided in this section, and in any appendix to this part, each meal shall contain, as a minimum, the food components as follows:

(1) A breakfast shall contain:

(i) A serving of milk as a beverage, or on cereal, or used in part for each purpose.

(ii) A serving of fruit or full-strength fruit or vegetable juice.

(iii) A serving of whole-grain or enriched bread; or an equivalent serving of cornbread, biscuits, rolls or muffins, etc., made of whole-grain or enriched meal or flour; or a serving of whole-grain cereal or enriched or fortified cereal or a combination of any of these foods.

(2) A lunch or supper shall contain:

(i) A serving of milk as a beverage.

(ii) A serving of lean meat, poultry or fish; or cheese; or an egg; or cooked dry beans or peas; or peanut butter; or a combination of any of these foods.

(iii) A serving of two or more vegetables or fruits, or a combination of both.

(iv) A serving of whole-grain or enriched bread; or an equivalent serving of cornbread, biscuits, rolls, muffins, etc., made of whole-grain or enriched meal or flour.

3. Supplemental food shall include:

(i) A serving of milk or full-strength fruit or vegetable juice or an equivalent quantity of fruit or vegetable.

(ii) A serving of whole-grain or enriched bread or cereal; or an equivalent serving of cornbread, biscuits, rolls, muffins, crackers or cookies made of whole-grain or enriched meal or flour.

(4) Except as otherwise provided in this section the minimum amounts of component foods to serve at meals as set forth in subparagraphs (b) (1), (2), and (3) of this section are as follows:

(i) Age 1 up to 3: (A) Breakfast—½ cup of milk; ¼ cup of juice or fruit; ½ slice of bread or equivalent or ¼ cup (volume) or ½ ounce (weight), whichever is less, of cereal or an equivalent quantity of both bread and cereal.

(B) Lunch or supper—½ cup of milk; 1 ounce (edible portion as served) of lean meat or an equivalent quantity of an alternate; ¼ cup of vegetables or fruits or both consisting of two or more kinds;

V40251 DEC 31 75 XUM

½ slice of bread or equivalent.

(C) Supplemental food—½ cup of milk or juice, or equivalent quantity of fruit or vegetables; ½ slice of bread or equivalent.

(ii) Age 3 up to 6: (A) Breakfast—¾ cup of milk; ½ cup of juice or fruit; ½ slice of bread or equivalent or ½ cup (volume) or ½ ounce (weight), whichever is less of cereal or an equivalent quantity of both bread and cereal.

(B) Lunch or supper—¾ cup of milk; 1½ ounces (edible portion as served) of lean meat or an equivalent quantity of an alternate; ½ cup of vegetables or fruits or both consisting of two or more kinds; ½ slice of bread or equivalent.

(C) Supplemental food—½ cup of milk or juice or an equivalent quantity of fruit or vegetable; ½ slice of bread or equivalent.

(iii) Age 6 up to 12: (A) Breakfast—1 cup of milk; ½ cup of juice or fruit; 1 slice of bread or equivalent or ¾ cup (volume) or 1 ounce (weight), or whichever is less, of cereal or equivalent quantity of both bread and cereal.

(B) Lunch or supper—1 cup of milk; 2 ounces (edible portion as served) of lean meat or an equivalent quantity of an alternate; ¾ cup of vegetables or fruits or both consisting of two or more kinds; 1 slice of bread or equivalent.

(C) Supplemental food—1 cup of milk or juice or equivalent quantity of fruit or vegetable; 1 slice of bread or equivalent. Younger children of this group (age 6 up to 9) may be served lesser quantities of the foods (other than bread and milk) in the above types of meals, provided that the quantities are based on the lesser food needs of such children.

(iv) Age 12 and over: Adult-sized portions based on the greater food needs of older boys and girls.

(v) Infant meal patterns: (A) 0 up to 4 months; (1) Breakfast—4–6 fluid ounces of infant formula; 0–1 tablespoon of infant cereal.

(2) Lunch or supper—4–6 fluid ounces of infant formula; 0–1 tablespoon of infant cereal; 0–1 tablespoon of strained fruit or vegetable or a combination of both.

(3) Supplemental food—2–4 fluid ounces of infant formula.

(B) 4 up to 8 months: (1) Breakfast—6–8 fluid ounces of infant formula; 1–2 tablespoons of infant cereal.

(2) Lunch or supper—6–8 fluid ounces of infant formula; 1–2 tablespoons of infant cereal; 1–2 tablespoons of strained fruit or vegetable or a combination of both; 0–1 tablespoon of strained meat, fish, poultry, or egg yolk.

(3) Supplemental food—2–4 fluid ounces of infant formula or full-strength fruit juice; ¼ slice of crusty enriched or whole-grain bread, or 2 cracker-type products suitable for an infant for use as a finger food when appropriate.

(C) 8 months up to 1 years: (1) Breakfast—6–8 fluid ounces of infant formula or 4–6 fluid ounces of whole fluid milk and 2–3 fluid ounces of full-strength fruit juice; 2–3 tablespoons infant cereal.

(2) Lunch or supper—6–8 fluid ounces of infant formula or 4–6 ounces of whole fluid milk and 2–3 fluid ounces of full-strength fruit juice; 3–4 tablespoons of strained, chopped, or mashed fruit or vegetable or infant cereal or combinations of such foods; 1–4 tablespoons of strained, chopped, or mashed meat, fish, poultry, or egg yolk.

(3) Supplemental food—2–4 fluid ounces of infant formula or whole fluid milk or full-strength fruit juice; ¼ slice of crusty enriched or whole-grain bread, or 2 cracker-type products suitable for an infant for use as a finger food when appropriate.

(5) For the purpose of this section, a cup means a standard measuring cup.

(6) To improve the nutrition of participating children additional foods may be served with each meal as follows:

(i) Breakfast: (A) Include as often as practical an egg; or a 1-ounce serving (edible portion as served) of meat, poultry or fish; or 1 ounce of cheese; or 2 tablespoons of peanut butter or an equivalent quantity of any combination of these foods.

(B) Additional foods may be served as desired.

(ii) Lunch or supper: Additional foods may be served as desired.

(iii) Supplemental food: Include as often as practical a serving of meat or alternate such as peanut butter or cheese or other foods needed to satisfy appetites.

(c) If emergency conditions prevent an institution normally having a supply of milk from temporarily obtaining delivery thereof, the State agency, or FNSRO where applicable, may approve the service of breakfasts, lunches or suppers without milk during the emergency period.

(d) The inability of an institution to obtain a supply of milk on a continuing basis shall not bar it from participation in the Program. In such cases, the State agency, or FNSRO where applicable, may approve service of meals without milk, provided that an equivalent amount of canned, whole dry or nonfat dry milk is used in the preparation of the components of all meals.

(e) In American Samoa, Puerto Rico, the Virgin Islands and the Trust Territory of the Pacific Islands the following variations from the meal requirements are authorized: A serving of a starchy vegetable, such as ufi, tanniers, yams, plantains, sweet potatoes, or a serving of enriched rice or enriched or whole-grain cereal products such as macaroni, dumplings, or noodles may be substituted for the bread requirements.

(f) Substitutions may be made in food listed in paragraphs (b), (1), (2), and (3) of this section if individual participating children are unable, because of medical or other special dietary needs, to consume such foods. Such substitutions shall be made only when supported by a statement from a recognized medical authority which includes recommended alternate foods.

(g) FNS may approve variations in the food components of the meals on an experimental or a continuing basis in any institution where there is evidence that such variations are nutritionally sound and are necessary to meet ethnic, religious, economic, or physical needs.

§ 226.11 Assignment of rates of reimbursement.

(a) The State agency, or FNSRO where applicable, shall, for reimbursement purposes, establish claiming percentages for each participating institution.

(b) The State agency, or FNSRO where applicable, shall require each institution to submit, not less frequently than annually, information necessary to determine the claiming percentages for that institution. Such information shall include: (1) The number of enrolled children from families meeting the State's family-size income standards for free school meals. (2) the number of enrolled children from families meeting the State's family-size income standards for reduced price school meals. (3) the number of enrolled children from families with incomes exceeding the State's family-size income standards for reduced price school meals. Based on its claiming percentages, the State agency, or FNSRO where applicable, shall assign rates of reimbursement for each institution for each meal type. Variations in rates between institutions within a State shall reflect the relative need of such institutions for financial assistance in providing meal service to children.

§ 226.12 Claim for reimbursement.

(a) The State agency, or FNSRO where applicable, shall make payments for meals served to children at the assigned rates, on the basis of the claiming percentages established for each institution. To determine the payment, for any institution, the State agency or FNSRO where applicable, may either, (1) apply the applicable claiming percentage or percentages to the total number of meals of each type (breakfast, lunch, supplement and supper) served and multiply the product or products by the assigned rate or rates of reimbursement for each such meal type, or (2) determine a blended per-meal rate of reimbursement by multiplying the assigned rate for each need category by the claiming percentage for that category and multiplying the product by the total number of meals served, by type: *Provided, however*, That the total reimbursement for meals to an institution shall not exceed operating cost of the institution's food service, less cash income to the food service.

(b) Each institution shall report each month to the State agency, or FNSRO where applicable, the total number of meals served to children by meal type (breakfast, lunch, supplement, supper).

(c) Any institution may elect to claim for less than total operating cost of its food service, e.g., may claim for cost of food only. Reimbursement may not, however, exceed the reimbursement rates assigned to the institution by the State agency, or FNSRO where applicable.

(d) In lieu of providing complete family-size income information to the State agency, or FNSRO where applicable, on enrolled children in the three need categories, an institution may elect to claim for all children under the paid category only. Reimbursement may not, however, exceed the lesser of the rates assigned by the State agency, or FNSRO where applicable, for meals in the paid category or operating costs of the institution's food service, less cash income to the Program.

(e) In computing and documenting Program costs for the purposes of claiming reimbursement and in lieu of maintaining complete food service records, sponsoring organizations may, for family day care programs under their jurisdiction only, consider the cost of food to be 40 cents for a lunch or supper, 20 cents for a breakfast, and 14 cents for a supplement.

(f) To be entitled to reimbursement under this part, each institution shall submit to the State agency, or FNSRO where applicable, a monthly Claim for Reimbursement on a form provided by the administering agency.

(g) Each Claim for Reimbursement shall be filed with the State agency, or FNSRO where applicable, by the 10th of the month following the month covered by the Claim. The Claim shall include data in sufficient detail to justify the reimbursement claimed.

(h) Not more than 10 days of the beginning or ending month of Program operations in a fiscal yesar may be combined on a Claim for Reimbursement with the operations of the month immediately following the beginning month, or preceding the ending month. Claims for Reimbursement may not combine operations during the ending month of a fiscal year with the beginning month of the next fiscal year.

(i) In submitting a Claim for Reimbursement, each institution shall certify that the Claim is true and correct, that records are available to support the Claim, and that payment has not been received. Reporting shall be in accordance with the system of accounting established by the State agency, or FNSRO where applicable.

§ 226.13 Effective date for reimbursement payments.

(a) Reimbursement payments shall be made only to institutions operating under an agreement with the State agency, or FNSRO where applicable, and shall be made only after execution of the agreement. Payments shall be made only for types of meals specified in the agreement and meeting the requirements of § 226.10. Payments may include reimbursement in connection with meals served in accordance with provisions of the program in the calendar month preceding the calendar month in which the agreement is executed, including the last month of the preceding fiscal year if carryover funds are available for such reimbursement.

(b) A State agency may make full or partial reimbursement on a Claim for Reimbursement without prior administrative determination of the correctness of the Claim but shall make any adjustments in such payment as are necessary following the administrative approval of such Claim.

(c) An agreement with an institution for the current fiscal year may be cancelled and the institution disqualified from future participation in the Program if all Claims for Reimbursement and the information required under § 226.11 for the prior fiscal year have not been submitted within 90 days after the end of the prior fiscal year.

(d) An institution that is moving toward compliance with the requirements for tax-exempt status under section 501 (c) (3) of the Internal Revenue Code of 1954 (i.e., has filed a letter or application with IRS) may receive reimbursement payments for meals served under this part for 12 months from the date of approval of its application for participation in the Program. If an institution has not secured IRS certification within 12 months, its participation in the Program will be terminated and the institution will not be permitted to reapply until such time as it receives IRS certification.

§ 226.14 Free and reduced price meals.

(a) The State agency, or FNSRO where applicable, shall require each institution to develop, at the time the institution applies for Program participation, a written policy statement concerning free and reduced price meals to be used uniformly in all food service centers under its jurisdiction as required in this section. Institutions shall not be approved for participation nor agreements renewed unless the free and reduced price policy statement has been approved. Pending approval of a revision of a policy statement, the existing policy shall remain in effect.

(b) An institution which serves meals at no separate charge to attending children shall develop a policy statement which consists of an assurance to the State agency, or FNSRO where applicable, that all children are served the same meals at no separate charge, regardless of race, color, or national origin, and that there is no discrimination in the course of the food service.

(c) An institution which charges separately for meals shall develop a policy statement for determining eligibility for free and reduced price meals which shall include the following:

(1) The specific criteria to be used in determining eligibility for free and reduced price meals. The institution's standards of eligibility shall be in conformity with the family-size income standards prescribed by the State agency, or FNSRO where applicable, for determining eligibility for free and reduced price meals under the National School Lunch Program or School Breakfast Program.

(2) A description of the method or methods to be used in accepting applications from families for free and reduced price meals.

(3) A description of the method or methods to be used to collect payments from those children paying the full price of the meal or a reduced price which will protect the anonymity of the children receiving a free or reduced price meal.

(4) An assurance that the institution will establish a hearing procedure which provides: (i) A simple, publicly announced method for a family to make an oral or written request for a hearing; (ii) an opportunity for the family to be assisted or represented by an attorney or other person in presenting its appeal; (iii) an opportunity to examine, prior to and during the hearing, the documents and records presented to support the decision under appeal; (iv) that the hearing shall be held with reasonable promptness and convenience to the family and that adequate notice shall be given to the family as to the time and place of the hearing; (v) an opportunity for the family to present oral or documentary evidence and agreements supporting its position without undue interference; (vi) an opportunity for the family to question or refute any testimony or other evidence and to confront and cross-examine any adverse witnesses; (vii) that the hearing shall be conducted and the decision made by a hearing official who did not participate in making the decision under appeal; (viii) that the decision of the hearing official shall be based on the oral and documentary evidence presented at the hearing and made a part of that hearing record; (ix) that the family and any designated representatives shall be notified in writing of the decision of the hearing official; (x) that a written record shall be prepared with respect to each hearing, which shall include the decision under appeal, any documentary evidence and a summary of any oral testimony presented at the hearing, the decision of the hearing official, including the reasons therefor, and a copy of the notification to the family of the decision of the hearing official; and (xi) that such written record of each hearing shall be preserved for a period of three years and shall be available for examination by the family or its representatives at any reasonable time and place during such period.

(5) An assurance that there will be no identification of free and reduced price meal recipients and no discrimination against any child on the basis of race, color, or national origin.

(d) The hearing procedure prescribed under paragraph (c)(4) of this section shall be followed when an institution challenges the continued eligibility of any child for a free or reduced price meal. During the pendency of the challenge, the child shall continue to receive the free or reduced price meal to which he is entitled under the eligibility standards announced by the institution based upon the information supplied in the application made by the family.

(e) Each institution shall make available on an annual basis to the information media serving the area from which the institution draws its attendance a public release announcing the availability of free and reduced price meals to children meeting the approved eligibility criteria. The public announcement must also state that meals are available to all children in attendance without regard to race, color, or national origin.

(c) Institutions approved for nonfood fiscal year in which the obligation was

V 40 251 DEC 31 75 XUM V

§ 226.15 Additional requirements for sponsoring organizations.

The following requirements are in addition to those applicable to institutions generally:

(a) Sponsoring organizations shall maintain all administrative and financial responsibility for food service in each participating day care center and family day care program under their jurisdiction. Sponsoring organizations shall also ensure that such centers and programs operate in conformance with all applicable provisions of this part.

(b) Sponsoring organizations shall ensure that (1) all day care centers and family day care programs under their jurisdiction meet the licensing requirements contained in § 226.9, and (2) child care centers meet the nonprofit requirements of § 226.9. The nonprofit status of family day care programs may be based on the tax-exempt status of the sponsoring organizations.

(c) Each sponsoring organization shall maintain the following food service records for each day care center and family day care program under its jurisdiction:

(1) Copies of applications submitted by the sponsoring organization to the State agency, or FNSRO where applicable.

(2) Information used to determine licensing status.

(3) Copies of information on the number of enrolled children in each of the three need categories, including affidavits from families of participating children or information from other sources used by the child care centers or family day care programs in making determinations of need category.

(4) Information on the number of children served each type of meal (breakfast, lunch, supplements, supper) daily.

(5) Copies of invoices, receipts, or other records on total operating costs, including food and labor, and, if applicable, any administrative costs.

(6) Information on cash income to each family day care program and day care center for food service purposes, including children's payments for meals, food service fees, or funds from other sources which are identified for the food service.

(7) Federal reimbursement paid.

(d) Sponsoring organizations shall maintain on file for child care centers copies of Internal Revenue Service tax-exempt certification or any indication of participation in another federally-funded program which requires nonprofit status. Sponsoring organizations shall also maintain on file a copy of the management plan approved by the State agency, or FNSRO where applicable, and its free and reduced price policy statement.

(e) Sponsoring organizations shall establish a procedure to collect from child care centers and family day care programs information on (1) daily number of children served different meal types and (2) total food service operating costs, including food and labor, and, if applicable, any administrative costs. Total information for all institutions under the sponsoring organization's jurisdiction shall be submitted to the State agency, or FNSRO where applicable, in accordance with § 226.12.

(f) After receipt of reimbursement from the State agency or FNSRO, the sponsoring organization shall make payments to child care centers and family day care programs for meals served to children under this part. Payments to each center and program should reflect the relative percentage of children in each of the three need categories, but in no case shall payments exceed cost of food service as reflected in the records on file at the sponsoring organization.

(g) Sponsoring organizations shall provide such supervisory assistance to child care centers and family day care programs under their jurisdiction as is necessary to effectively participate in the Program. Such assistance shall include: (1) Consultative and technical assistance to ensure meals meet the requirements of § 226.10, required records are being maintained and that all other applicable Program requirements outlined in this part are met. (2) Training of personnel responsible for the food service. (3) Periodic visits to centers and programs to monitor compliance. Documentation of such visits shall be maintained on file by sponsoring organizations.

§ 226.16 Donation of commodities.

(a) USDA foods available under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) or purchased under section 32 of the Act of August 24, 1935 (7 U.S.C. 1431), section 709 of the Food and Agriculture Act of 1965 (7 U.S.C. 1446–a–1), or other authority, shall be donated by the Secretary of Agriculture to each State.

(b) For each fiscal year, the average value of the commodities donated to each State (or, upon the application of a State agency made no later than 60 days prior to the beginning of the fiscal year, cash in lieu of commodities in such amounts as may be provided in appropriations acts) shall be, at a minimum, the quantity obtained by multiplying the number of lunches and suppers served in participating institutions during that fiscal year by the rate for commodities and cash in lieu thereof established for that fiscal year in accordance with the provisions of section 6(e) of the National School Lunch Act.

(c) Institutions participating in the Program shall be provided commodities in accordance with their needs as determined by the State agencies, or FNSRO where applicable, for utilization in their feeding programs.

Subpart D—Nonfood Assistance Provisions

§ 226.17 Definitions.

In addition to the definitions set out in § 226.2, the following definitions shall be applicable to this subpart:

(a) "Acquisition cost" means the net invoice price of nonexpendable and expendable personal property acquired by purchase. This property may include any attachments, accessories, or auxiliary apparatus necessary to make it usable for the purpose for which it was acquired. Ancillary charges such as taxes, duty, protective intransit insurance, freight, or installation may also be included.

(b) "Especially needy institution" means an institution serving a high percentage of children from families meeting the State's family-size income standards for free and reduced price school meals under the National School Lunch Program (7 CFR Part 210) and the School Breakfast Program (7 CFR Part 220), as determined by the State agency, or FNSRO where applicable.

(c) "Expendable personal property" means all tangible personal property other than nonexpendable personal property.

(d) "Nonexpendable personal property" means tangible personal property having a useful life of more than one year and an acquisition cost of $300 or more per unit. The State agency may use its own definition would at least include all tangible personal property as defined herein.

(e) "Nonfood assistance funds" means funds made available by the State agency, or FNSRO where applicable, to institutions to assist in the purchase or rental of equipment to enable the institutions to establish, maintain and expand food service under the Program.

(f) "Personal Property" means property of any kind except real property. It may be tangible—having physical existence—or intangible—having no physical existence such as patents, inventions, and copyrights.

§ 226.18 Apportionment of nonfood assistance funds to States.

(a) For each fiscal year, the Secretary shall make nonfood assistance payments to each State agency, or FNSRO where applicable, from any Federal funds made available for purchase and rental of equipment to be used in the Program. Such payments shall be apportioned among the States on the basis of the number of children below age 6 who are members of households which have an annual income not above 125 per centum of the applicable family-size income level set forth in the income poverty guidelines prescribed by the Secretary under section 9 of the Act.

(b) If any State cannot utilize all the funds apportioned to it under this section, or if additional funds are made available for apportionment among the States, further apportionment shall be made among the remaining States in the same manner as the initial apportionment: *Provided, however,* That the Department may determine the minimum amount of such funds it is practicable to so apportion.

§ 226.19 Payment of nonfood assistance funds to States.

Nonfood assistance funds to be paid to any State shall be made available by means of Letters of Credit issued by FNS in favor of the State agency. The State agency shall: (a) Obtain funds needed for reimbursement to institutions through presentation by designated State officials of a Payment Voucher on Letter of Credit (Treasury Form GFO 7578) in accordance with procedures prescribed by FNS and approved by the U.S. Treasury Department; (b) draw only such funds as are needed to pay claims certified for payment; and (c) use such funds without delay for the purpose for which withdrawn. Notwithstanding the foregoing provisions, if funds are made available by Congress for the operation of the Program under a continuing resolution, Letters of Credit shall reflect only the amount available for the effective period of the resolution.

§ 226.20 Matching of nonfood assistance funds.

(a) During any fiscal year, nonfood assistance payments by FNS to each State agency and payments made by FNSRO to institutions shall be upon the condition that at least one-fourth of the costs of the equipment acquired shall be borne from sources within the State: *Provided, however,* That funds used to assist institutions which are determined by the State agency, or FNSRO where applicable, to be especially needy need not be so matched. Payments made by FNS to State agencies may be matched either by the recipient institution or from other State or local sources and payments by FNSRO to institutions may be matched either by the recipient institution or from other funds available to the institution within the State.

(b) Funds from sources within the State shall include any source of State or local funds other than Federal grants and children's payments obtained by institutions through any of its nonprofit food services.

§ 226.21 Use of nonfood assistance funds.

Federal funds made available under the Program for nonfood assistance shall be used to reimburse institutions in connection with the cost of purchase or rental of equipment to establish, maintain, or expand nonprofit food service for children in institutions in accordance with the provisions of this part.

§ 226.22 Eligibility requirements for nonfood assistance.

(a) Institutions which are participating in or have filed an application under this part to participate in the Program and which are in need of financial assistance to acquire equipment to establish, maintain, or expand food service under the Program may make written application for such assistance to the State agency, or FNSRO where applicable. Applications shall include information in sufficient detail to ensure that the institution is eligible for nonfood assistance, and to ascertain the amount of financial assistance required.

(b) An institution shall be approved for nonfood assistance on the basis of: (1) The relative need of the institution for assistance in acquiring equipment to operate an adequate food service, determined on the basis of the information supplied for that institution and for other institutions in the applications submitted; and (2) the amount of funds available to the State agency, or FNSRO where applicable.

(c) Institutions approved for nonfood assistance shall enter into written agreements with the State agency or, in those States in which FNSRO administers the Program, institutions shall enter into agreements with the Department. Such agreements shall provide that the institutions shall:

(1) Participate in the food assistance aspect of the Program.

(2) Maintain full and accurate records to account for the cost of the equipment and receipt and use of all nonfood assistance funds, and retain such record for a period of three years after the end of the fiscal year to which they pertain.

(3) Bear such portion of the purchase price as is agreed upon.

(4) Use equipment (purchased or rented) acquired in whole or in part with Federal funds principally in connection with the institution's nonprofit feeding service.

(5) Comply with the provisions of § 226.25, Procurement standards, and § 226.26, Property management requirements, of this part where personal property is acquired with nonfood assistance funds.

§ 226.23 Nonfood assistance reimbursement payments.

Nonfood assistance reimbursement payments shall be made only in an amount, averaged on a Statewide basis, not to exceed three-fourths of the total purchase or rental cost, including delivery and installation charges, of the equipment described on the application approved by the State agency, or FNSRO where applicable.

§ 226.24 Nonfood assistance reimbursement procedure.

(a) Each State agency, or FNSRO where applicable, shall require each approved institution to submit a Reimbursement Voucher for equipment acquired. The Reimbursement Voucher shall include the following items:

(1) The name and address of the institution;

(2) The month and year the equipment was purchased or rented;

(3) The style, model number, serial number, other identification number, quantity, and purchase or rental cost of each item of equipment, exclusive of delivery and installation cost; and

(4) The delivery and installation costs for the equipment.

(b) Each Reimbursement Voucher shall be accompanied by a copy of the bill, invoice, or other evidence of purchase or rental and shall be made part of the institution's case file maintained by the State agency, or FNSRO where applicable, for a period of three years after the end of the fiscal year to which it pertains.

(c) In submitting a Reimbursement Voucher for equipment, each institution shall certify that the voucher is true and correct, that the equipment has been installed and is operating in the capacity for which it was acquired, that records are available to support the voucher, and that the payment has not been received.

(d) Any Reimbursement Voucher filed later than 90 days after the end of the fiscal year in which the obligation was incurred shall be disallowed except where the voucher is filed late because of circumstances determined by the Department to be beyond the control of the institution.

§ 226.25 Procurement standards.

(a) This section provides standards for use by institutions in establishing procedures for the procurement of equipment with nonfood assistance funds for use in the Program. These standards are furnished to ensure that the equipment is obtained in an effective manner and in compliance with the provisions of applicable Federal law and Executive Orders. Institutions may use their own procurement regulations which reflect applicable State and local laws, rules, and regulations, provided that procurement adheres to the standards set forth in this section.

(b) The standards contained in this section do not relieve the institution of the responsibilities arising under its contracts. The institution is the responsible authority regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into under the Program. This includes, but is not limited to: Disputes, claims, protests of award, source evaluation, or other matters of a contractual nature. Matters concerning violation of law are to be referred to the State or Federal authority that has proper jurisdiction.

(c) The institution shall maintain a code or standard of conduct which shall govern the performance of its officers, employees, or agents in contracting with and expending Program funds. The institution's officers, employees, or agents shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or potential contractors. To the extent permissible under State law, rules or regulations, such standards shall provide for appropriate penalties, sanctions, or other disciplinary actions to be applied for violations of such standards either by the institution's officers, employees, or agents or by contractors or their agents.

(d) All procurement transactions of the institution, regardless of whether negotiated or advertised and without regard to dollar value, shall be conducted in a manner so as to provide maximum open and free competition. The institution should be alert to organizational conflicts of interest or noncompetitive practices among contractors which may restrict or eliminate competition or otherwise restrain trade.

(e) The institution shall establish procurement procedures which comply with the provisions of this section.

(f) Proposed procurement actions shall be reviewed by appropriate officials of the institution to avoid purchasing unnecessary or duplicative items. Where appropriate, an analysis shall be made of lease and purchase alternatives to determine which would be the most economical, practical procurement.

(g) Invitations for bids or requests for and accurate description of the technical

V 40 N 251 DEC 31 75 D XUM

requirements for the material, product, or service to be procured. Such description shall not, in competitive procurements, contain features which unduly restrict competition. "Brand name or equal" description may be used as a means to define the performance or other salient requirements of a procurement and, when so used, the specific features of the named brand which must be met by offerers should be clearly specified.

(h) Positive efforts shall be made by the institution to utilize small business and minority-owned business sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for procurements to be made with Program funds.

(i) The type of procuring instruments used (e.g., fixed-price contracts, cost reimbursable contracts, purchase orders, incentive contracts, etc.), shall be appropriate for the particular procurement and for promoting the best interest of the Program. The "cost-plus-a-percentage-of-cost" method of contracting shall not be used.

(j) Formal advertising, with adequate purchase descriptions, sealed bids, and public openings shall be the required method of procurement unless negotiating pursuant to subparagraph 4 of this paragraph is necessary to accomplish sound procurement. However, procurements of $10,000 or less need not be so advertised unless otherwise required by State law or regulations. When formal advertising is employed:

(1) The awards shall be made to the responsible bidder whose bid is responsive to the invitation and is most advantageous to the institution, price and other factors considered. Factors such as discounts, transportation costs, and taxes may be considered in determining the lowest bid.

(2) Invitations for bids shall clearly set forth all requirements which the bidder must fulfill in order for his bid to be evaluated by the institutions.

(3) Any or all bids may be rejected when it is in the institution's interest to do so, and such rejections are in accordance with applicable State and local laws, rules, and regulations.

(4) Procurements may be negotiated by the institution if it is not practicable or feasible to use formal advertising. Notwithstanding the existence of circumstances justifying negotiations, competition shall be obtained to the maximum extent practicable. Generally, procurements may be negotiated if one or more of the following conditions prevail:

(i) The public exigency will not permit the delay incident to advertising;

(ii) The material or service to be procured is available from only one person or firm; all contemplated sole source procurements where the aggregate expenditure is expected to exceed $5,000 shall be referred to the State agency, or FNSRO where applicable, for prior approval;

(iii) The aggregate amount involved does not exceed $10,000;

(iv) No acceptable bids have been received after formal advertising;

(v) Negotiation is otherwise authorized by law, rules, or regulations.

(k) Contracts shall be made by institutions only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources, and accessibility of other necessary resources.

(l) The procurement records or files of institutions for negotiated purchases in amounts in excess of $10,000 shall provide at least the following pertinent information:

(1) Justification for the use of negotiation in lieu of advertising,

(2) Contractor selection,

(3) Basis for the cost or price negotiated.

(m) A system for contract administration shall be maintained by the institution to assure contractor compliance with terms, conditions, and specifications of the contract or order, and to assure adequate and timely follow-up of all purchases.

(n) The institution shall include provisions to define a sound and complete agreement in all contracts which it awards when any part of the contract costs are to be borne by Program funds.

(o) In awarding contracts the institution must comply with the following requirements:

(1) The institution's contracts shall contain contractual provisions or conditions which will allow for administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as may be appropriate.

(2) All contracts awarded by institutions in excess of $10,000 shall contain suitable provisions for termination by the institution, including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall set forth the conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractors.

(3) Where applicable, all contracts awarded by institutions in excess of $10,000 which involve the employment of mechanics or laborers shall include a provision for compliance with section 103 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–330) as supplemented by Department of Labor regulations (29 CFR Part 5). Under section 103 of the Contract Work Hours and Safety Standards Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard work day of 8 hours and a standard work week. Work in excess of the standard work day or work week is permissible provided that the worker is compensated at a rate of pay for all hours worked in excess of 8 hours in any calendar day or 40 hours in the work week. These requirements do not apply to the purchase of supplies or materials or articles ordinarily available on the open market or contracts for transportation.

§ 226.26 Property management requirements.

(a) This section prescribes policies and procedures governing title, use, and disposition of personal property obtained by an institution by purchase, whose cost was borne in whole or in part with nonfood assistance funds. Institutions may follow their own property management policies and procedures provided they observe the requirements of this section.

(b) The following requirements shall be observed in the acquisition, use and disposition of nonexpendable personal property:

(1) When nonexpendable personal property is acquired by an institution in whole or in part with nonfood assistance funds, title shall be vested in the institution.

(2) The institution shall retain such property in the Program as long as there is a need for such property to accomplish the purpose of the Program whether or not the institution's food service continues to be supported by Federal funds.

(3) When there is no longer a need for such property to accomplish the purpose of the Program, the institution shall use the property in connection with other Federal programs it administers. Priority shall be given to Federal programs administered by the Department over the programs administered by other Federal agencies. When the institution no longer has need for such property in any of its federally assisted programs, the property may be used for the institution's own official activities. In such situations, the institution may use the property without reimbursement to the State agency, or FNSRO where applicable, or sell the property and retain the proceeds if the property had an acquisition cost of less than $500 per unit and has been used 4 years or more. In the case of other property, the institution may retain the property for its own use, provided that a fair compensation is made to the State agency, or FNSRO where applicable, for the Federal share of the property. The amount of compensation shall be computed by applying the percentage of Federal participation in the cost of the property to the current fair market value of the property. If the institution has no need for the property, disposition shall be made as follows:

(i) Except for property having an acquisition cost of less than $500 per unit which has been used for four years or more, the institution shall sell property having an acquisition of $1,000 or less per unit and reimburse the State agency, or FNSRO where applicable, in accordance with paragraph (b)(3)(ii) of this section.

(ii) If the property had an acquisition cost of over $1,000 per unit, the institution shall request disposition instructions from the State agency, or FNSRO where applicable. If the State agency, or FNSRO where applicable, has no need for the property, the availability of the property shall be reported to the General Services Administration (GSA) by the Department to determine whether a requirement for the property exists in other Federal programs. The State agency, or FNSRO where applicable, will issue instructions to the institution within 120 days following the receipt of the request. If the institution is instructed to ship the property elsewhere, the institution will be reimbursed by the Department, or State agency where applicable, with an amount which is computed by applying the percentage of the institution's participation in the cost of the property to the current fair market value of the property, plus any shipping or interim storage costs incurred. If the institution is instructed to otherwise dispose of the property, the institution will be reimbursed by the State agency, or FNSRO where applicable, for the costs incurred in the disposition. If disposition instructions are not issued within 120 days after reporting, the institution shall sell the property and reimburse the Department in an amount which is computed by applying the percentage of Federal participation in the cost of the property to the sales proceeds. Further, the institution may be permitted to retain $100 or 10 percent of the proceeds, whichever is greater, for the institution's selling and handling expenses.

(iii) When the State agency, or FNSRO where applicable, determines that nonexpendable personal property with an acquisition cost of $1,000 or more financed solely with nonfood assistance funds is unique or difficult or costly to replace, the State agency, or FNSRO where applicable, may reserve the right to require the institution to transfer title to the property to the State agency, or FNSRO where applicable, or to a third party subject to the following provisions:

(A) The right to require the transfer of title may be reserved only by means of an express special condition in the grant or contract, or, if approval for the acquisition of the property is given after the grant is awarded, by means of a written stipulation at the time the approval is given.

(B) The property shall be appropriately identified in the award document or otherwise made known to the institution.

(C) The State agency, or FNSRO where applicable, will not exercise this right until the institution no longer needs the property in the Program. That need will be deemed to end on the date of completion or termination of the grant of contract unless the institution continues to conduct a food service after that date and demonstrates to the State agency, or FNSRO where applicable, a continued need for the property in its food service.

(D) The State agency, or FNSRO where applicable, will issue disposition instructions within 120 days after the completion of the need for the property under the Program. If instructions are not issued within such 120-day period, the Department's or State agency's right shall lapse, and the institution shall apply the applicable standards contained in the paragraphs (b)(2) and (b)(3) of this section.

(E) The institution shall be entitled to reimbursement for any shipping and interim storage costs it incurs pursuant to the State agency's or FNSRO's disposition instructions.

(4) The institution property management standards for nonexpendable personal property shall also include the following procedural requirements:

(i) Property records shall be maintained accurately and provide for: (A) A description of the property; (B) manufacturer's serial number or other identification number; (C) acquisition date and cost; (D) source of the property; (E) percentage of nonfood assistance funds used in the purchase of the property; (F) location, use, and condition of the property; and (G) ultimate disposition data including sales price or the method used to determine current fair market value if the institution reimburses the Department for its share.

(ii) A physical inventory of property shall be taken and the results reconciled with the property records at least once every two years to verify the existence, current utilization, and continued need for the property.

(iii) A control system shall be in effect to ensure adequate safeguards to prevent loss, damage, or the theft of the property. Any loss, damage, or theft of nonexpendable property shall be investigated and fully documented. The institution shall be responsible for replacing or repairing (with funds of the institution) property which is lost, damaged, or destroyed due to the negligence of the institution.

(iv) Adequate maintenance procedures, recommended by the manufacturer shall be implemented to keep the property in good condition.

(v) Proper sales procedures shall be established for unneeded property which would provide for competition to the extent practicable and result in the highest possible return.

(c) The institution may, at its option, either retain or sell items of expendable personal property when no longer needed for any federally sponsored activity (including activities sponsored by other Federal agencies). Compensation to the Department is required if the aggregate fair market value of all of those items of expendable personal property acquired with nonfood assistance funds exceeds $500 when no longer needed for any federally sponsored activity. The amount of compensation shall be computed by applying the percentage of Federal participation in the cost of the original property to the current fair market value of items retained and to the sales of items sold.

Subpart E—Miscellaneous

§ 226.27 Management evaluation and audits.

(a) In accordance with the plan submitted under § 210.4a of the National School Lunch Program regulations (7 CFR Part 210) or § 226.7, the State agency shall provide for audits at the State and institution levels of the funds and operations of the Program. Such audits shall be made with reasonable frequency, but beginning in fiscal year 1978 once every two years. The audits shall determine the fiscal integrity of financial transactions and reports, and compliance with applicable laws and regulations and with the administrative requirements set forth in Attachment H of Federal Management Circular 74–7 (34 CFR Part 256). Audits may be made by State agency internal auditors, by State auditors general, by State controllers, or by other comparable State audit groups, or by Certified Public Accountants or State licensed public accountants.

(b) While OA shall rely to the fullest extent feasible upon State sponsored audits, it shall, whenever considered necessary: (1) Make audits on a statewide basis, (2) perform on-site test audits, and (3) review audit reports and related working papers of audits performed by or for State agencies.

(c) State agencies shall provide FNS and OA with full opportunity to conduct management evaluations (including visits to institutions). Each State agency shall make available its records, including records of the receipt and expenditure of funds, upon reasonable request by FNS or OA.

(d) Use of audit guides available from OA is encouraged. When these guides are utilized, OA will coordinate its audits with State sponsored audits to form a network of intergovernmental audit systems.

(e) In making management evaluations or audits for any fiscal year the State agency, or OA, may disregard any overpayment which does not exceed $35 or, in the case of State agency administered programs, does not exceed the amount established under State law, regulations or procedure as a minimum amount for which claims will be made for State losses generally. No overpayment shall be disregarded, however, where there are unpaid claims of the same fiscal year from which the overpayment can be deducted, or where there is substantial evidence of violation of criminal law or civil fraud statutes.

§ 226.28 Food service management companies.

(a) Any institution may contract with a food service management company (including any commercial food service enterprise) for the preparation or delivery of unitized meals or for the delivery of individual meal components at institutions. Any institution may employ a food service management company to operate its entire food service. An institution that employs a food service management company shall remain responsible for seeing that the food service is in conformity with its agreement with the State agency, or FNSRO where applicable. Any institution operating a food service serving 500 or more children daily and contracting with a food service management company shall use a competitive bid procedure in the selection of any such company.

Any public institution shall follow applicable State or local laws governing bid procedure. In the absence of any State or local laws, any public or private in-

V 40 251 DEC 31 75 XUM

stitution shall, at a minimum adhere to the following requirements:

(1) The procurement shall be publicly announced at least 14 days prior to the opening of the bid;

(2) The bid shall be publicly opened;

(3) The bid shall not specify a minimum price;

(4) The institution shall make known to the State agency, or FNSRO where applicable, the reason for selecting the food service management company chosen.

(b) The institution and the food service management company shall enter into a written contract which shall expressly provide that:

(1) The food service management company shall maintain such records (supported by invoices, receipts, or other evidence) as the institution will need to meet its responsibilities under this part, and shall report thereon to the institution promptly at the end of each month;

(2) The food service management company shall have local health certification;

(3) Any federally donated commodities received by the institution and made available to the food service management company shall ensure only to the benefit of the institution's feeding operation, and shall be utilized therein;

(4) The books and records of the food service management company pertaining to the institution's feeding program shall be available, for a period of three years from the date of submission of the final Financial Status Report for inspection and audit by representatives of the State agency, or the Department, and the U.S General Accounting Office at any reasonable time and place;

(5) The nutritional requirements of § 226.10 shall be met for all meals;

(6) Health and sanitation requirements shall be met at all times;

(7) Unitized meals or meal components shall be delivered in accordance with a delivery schedule prescribed in the contract;

(8) Increases and decreases in the number of meal orders may be made by the institution daily within a period of prior notice mutually agreed upon;

(9) The food service management company shall be liable for meals that do not meet nutritional requirements, are spoiled or unwholesome at time of delivery or do not otherwise meet the requirements of the contract;

(10) The food service management company's charge to the institution shall reflect the fair wholesale market value of all federally donated food.

(11) Menus shall meet the meal requirements specified in § 226.10.

(12) Remedies for nonperformance shall be as stipulated.

(c) The State agency, or FNSRO where applicable, may review and approve any contract between an institution and a food service management company.

(d) Each State agency, or FNSRO where applicable, shall notify all applicant institutions of the contract requirements specified in this section, and such contract requirements, when applicable, shall be made part of the agreement between the State agency, or FNSRO where applicable, and the institution.

§ 226.29 Grant closeout procedures.

(a) Grant closeout procedures for this Program shall be in accordance with FMC 74–7.

(b) FNS may terminate a State agency's participation in the Program in whole, or in part, whenever it is determined that the State agency has failed to comply with the conditions of the Program. FNS shall promptly notify the State agency in writing of the termination and the reasons for the termination, together with the effective date. A State agency, or FNSRO where applicable, shall terminate an institution's participation in the Program by written notice whenever it is determined by FNS or the State agency that the institution has failed to comply with the conditions of the Program. When a Program has been terminated for cause, any payments made to the State agency or any recoveries by FNS from the State agency or an institution shall be in accordance with the legal rights and liabilities of the parties.

(b) FNS or the State agency may terminate the State agency's participation in the Program in whole, or in part, when both parties agree that the continuation of the Program would not produce beneficial results commensurate with the further expenditure of funds. The two parties shall agree upon the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated. The State agency shall not incur new obligations for the terminated portion after the effective date, and shall cancel as many outstanding obligations as possible. FNS shall allow full credit to the State agency for the Federal share of the noncancellable obligations, properly incurred by the State agency prior to termination. A State agency, or FNSRO where applicable, may terminate an institution's participation in accordance with these provisions.

§ 226.30 Other provisions.

(a) As provided by the Act the value of assistance to children under the Program shall not be considered to be income or resources for any purposes under any Federal or State laws, including, but not limited to, laws relating to taxation, welfare, and public assistance programs. Expenditure of funds from State and local governmental sources for the maintenance of food programs for children shall not be diminished as a result of funds received under the Act.

(b) Any or all of the provisions of this part may be withdrawn or amended at any time by the Department: *Provided, however*, That no change in the requirements for meals which increases the food costs shall become effective less than 60 days after publication of notice thereof.

(c) Nothing contained in this part shall prevent a State agency from imposing additional requirements for participation in the Program which are not inconsistent with the provisions of this part.

(d) The provisions of this part supersede the provisions of Part 244 of this chapter insofar as those provisions were applicable to the Special Food Service Program for Children.

§ 226.31 Program information.

Institutions desiring information concerning the Program should write to the appropriate Regional Office of FNS as indicated below:

(a) In the States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont: New England Regional Office, FNS, U.S. Department of Agriculture, 34 Third Avenue, Burlington, Massachusetts 01803.

(b) In the States of Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico, Virginia, Virgin Islands, and West Virginia: Mid-Atlantic Regional Office, FNS, U.S. Department of Agriculture, 729 Alexander Road, Princeton, New Jersey 08540.

(c) In the States of Alabama, Florida, Georgia, Kentucky, Mississippi: U.S. Department of Agriculture, 1100 Spring Street NW., Atlanta, Georgia 30309.

(d) In the States of Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, and Wisconsin: Midwest Regional Office, FNS, U.S. Department of Agriculture, 536 South Clark Street, Chicago, Illinois 60605.

(e) In the States of Arkansas, Colorado, Louisiana, Montana, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, Utah, and Wyoming: West-Central Regional Office, FNS, U.S. Department of Agriculture, 1100 Commerce Street, Room 5–D–22, Dallas, Texas 75202.

(f) In the States of Alaska, American Samoa, Arizona, California, Guam, Hawaii, Idaho, Nevada, Oregon, Trust Territory of the Pacific Islands, and Washington: Western Regional Office, FNS, U.S. Department of Agriculture, 550 Kearny Street, Room 400, San Francisco, California 94108.

§ 226.32 Effective date of regulations.

The provisions of this part shall become effective January 1, 1976. However, the food assistance payment rates provided for in § 226.4 and the commodity donation provisions of § 226.16 were effective on October 7, 1975, the date of enactment of the National School Lunch Act and Child Nutrition Act of 1966 Amendments of 1975.

(Catalog of Federal Domestic Assistance Program No. 10.556 National Archives Reference Services)

NOTE: The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

RICHARD L. FELTNER,
Assistant Secretary.

DECEMBER 22, 1975.

CHAPTER VII—NATIONAL CREDIT UNION ADMINISTRATION

PART 700—DEFINITIONS

PART 702—RESERVES

Risk Assets; Clarification

Pursuant to the authority conferred by section 120, 73 Stat. 635, 12 U.S.C. 1766, and section 209, 84 Stat. 1014, 12 U.S.C. 1789, the Administrator hereby amends Parts 700 and 702 (12 CFR Parts 700 and 702), effective immediately.

The addition to Part 700 is within previously established policy and further clarifies the definition of "risk assets." The changes to Part 702 are technical in nature. They are needed to clarify and bring this Part into conformity with accounting instructions contained in the Accounting Manual for Federal Credit Unions as well as the remainder of Part 702.

Inasmuch as these amendments are primarily housekeeping measures for the purpose of making the National Credit Union Administration's Rules and Regulations internally consistent, the Administrator has determined that notice and public procedure as to these amendments is impracticable, unnecessary and contrary to the public interest as provided by 5 U.S.C. 553(b).

The amendments are as follows:

1. Section 700.1(j) is amended by adding subsection (14) which shall state, "(14) Loans which are purchased from liquidating credit unions and guaranteed by the National Credit Union Administration."

2. The last sentence of § 702.2(a) is deleted.

3. Section 702.2(a) is redesignated as § 702.2(a)(1).

4. A new § 702.2(a)(2) is added and shall read as follows: "(2) For purposes of this formula: (i) 'gross earnings' shall be defined as the total of the operating income accounts. Nonoperating gains and losses will not be included; (ii) the totals of the Regular Reserve and Allowance for Loan Losses accounts shall be combined for determining the applicable percentage of gross income to be transferred to Regular Reserve; and (iii) the term 'total of outstanding loans and risk assets' shall mean all assets except those nonrisk type assets described in § 700.1(j)(1)–(14) of this chapter."

5. Section 702.2(b) is deleted.

6. Section 702.2(c) is redesignated as "(b)." The first sentence of this section is amended by adding the word "directly" after, "A Federal credit union may charge * * *," and by adding the words, "certain other categories of losses" after, "Regular Reserves * * *," and by deleting the words, "other than those resulting from uncollectable loans to members or to other credit unions."

7. New § 702.2(b)(2)(iv) is changed by deleting "financial and statistical report (Form FCU–109)" and by adding "Statement of Financial Condition (Form FCU 109A)."

Accordingly, the above sections, as amended, are adopted as set forth below, effective immediately.

HERMAN NICKERSON, JR.,
Administrator.

DECEMBER 23, 1975.

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and Sec. 209, 84 Stat. 1014 (12 U.S.C. 1789).)

1. In § 700.1, paragraph (j)(14) is added:

§ 700.1 Definitions.

* * * * *

(j)(14) Loans which are purchased from liquidating credit unions and guaranteed by the National Credit Union Administration.

* * * * *

2. Section 702.2 is revised to read as follows:

§ 702.2 Regular reserve.

(a)(1) Immediately before the payment of each dividend, the treasurer shall determine the gross earnings of the credit union. From this amount there shall be transferred to a reserve to be known as the Regular Reserve, as of the end of each dividend period, (i) 10 per centum of the gross income until the Regular Reserve shall equal 7½ per centum of the total of outstanding loans and risk assets, then (ii) 5 per centum of the gross income until the Regular Reserve shall equal 10 per centum of the total of outstanding loans and risk assets: Provided, however, that whenever the Regular Reserve falls below 10 per centum or 7½ per centum of the total of outstanding loans and risks assets, as the case may be, it shall be replenished by regular contributions in such amounts as may be needed to maintain the reserve goals of 7½ per centum or 10 per centum.

(2) For purposes of this formula:

(i) "Gross earnings" shall be defined as the total of the operating income accounts. Nonoperating gains and losses will not be included;

(ii) The totals of the Regular Reserve and Allowance for Loan Losses accounts shall be combined for determining the applicable percentage of gross income to be transferred to Regular Reserve; and

(iii) the term "total of outstanding loans and risk assets" shall mean all assets except those nonrisk type assets described in § 700.1(j)(1)–(14) of this chapter.

(b)(1) A Federal credit union may charge directly to its Regular Reserve certain other categories of losses provided that each such charge has been approved in advance by the Administrator. In determining whether such charges shall be approved, the Administrator will be guided by the nature of the loss and the financial condition of the Federal credit union concerned as indicated by: The amount of loan delinquency and estimated losses on outstanding loans, current and prospective net earnings, and similar facts which may affect its operations and development.

(2) Applications for approval to charge such losses to the Regular Reserve shall be made in writing to the Regional Director. The application shall: (i) Be authorized by the board of directors of the Federal credit union; (ii) state the amount and nature of the loss; and (iii) describe fully the causes of the loss; and (iv) be accompanied by a copy of the Federal credit union's current Statement of Financial Condition (Form FCU 109A) and a copy of the current schedule of delinquent loans. The Regional Director may request such additional information concerning the financial condition, operating practices, and management of the Federal credit union as he may deem necessary in a particular case.

(3) The Regional Director will investigate each such application and will make a recommendation as to whether it should be approved or disapproved. The application and recommendation of the Regional Director shall be forwarded to the Administration in Washington, D.C. The Administrator shall approve or disapprove the application. The Regional Director will be informed of the Administrator's action on the application and will notify promptly the Federal credit union concerned.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[43 CFR Parts 3500, 3520]

[Circular No. 2377]

COAL LEASES

Diligent Development and Continuous Operations

On page 43229 of the FEDERAL REGISTER of December 11, 1974, there were published a notice and text of a proposed amendment to §§ 3500.0–5 and 3522.1–2 of Title 43, Code of Federal Regulations. The purpose of the amendment was to provide definitions for terms relating to coal leases. Interested persons were granted an opportunity from January 10, 1975, until February 3, 1975, to submit comments, suggestions, or objections to the proposed amendment. Comments have been received and considered, and revisions have been made to the proposed amendment. Since extensive revisions have been made, the new proposed rules are now being published for comment.

Interested persons are invited to submit their comments in writing to the Director, Bureau of Land Management, Department of the Interior, Washington, D.C. 20240, on or before January 30, 1976.

The purpose of the proposed amendment is to revise the regulations relating to coal leases by defining the terms "logical mining unit," "logical mining unit reserves," "diligent development," and "continuous operation," and to modify the regulations relating to the duration and the adjustment of terms and conditions of coal leases. Section 7 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 207), authorizes the issuance of coal leases for an indeterminate period upon condition of diligent development and continued operation of the mine. When read together, the phrases "diligent development" and "continuous operation" indicate a statutory intent that holders of coal leases should promptly reach a reasonable level of production and then maintain it.

The proposed amendment which follows is based on the principle that a clear standard for judging whether development has been diligent and whether operation is continuous requires definition of a rate of production from the mine which is appropriate in light of the size of the leased reserves, and a time by which that rate must be attained. In granting new leases the Bureau of Land Management has already adopted a policy of including financial incentives in the form of advance royalty payments to encourage mining at a rate which would exhaust the recoverable reserves within 40 years from the date of the lease. The same general approach has been used in this proposed amendment. It sets a production standard for diligent development and continuous operation and provides that leases which do not meet the standard would be subject to cancellation. Although all existing leases contain requirements for diligent development, explicit standards of diligent development and continuous operation have not been defined or enforced. Existing leases are, therefore, treated for the purpose of this amendment as though they were dated as of the effective date of the amendment, insofar as the statute and existing lease terms permit.

The Bureau of Land Management is aware that many coal mines involve extraction of both Federal and non-Federal coal, and that inflexibly applied regulations for diligent development and continuous operation on the Federal portion of the mine could lead to distortions of mining practice to the detriment of sound conservation and economic operations. For this reason, the amendment defines a "logical mining unit" which may include non-Federal coal, and defines diligent development and continuous operation for the logical mining unit as a whole in such a way as to give the lessee reasonable flexibility in operating and developing the mine, consistent with exhaustion of the Federal deposits in 40 years.

Finally the amendment announces that, at the time of the next scheduled adjustments of the terms of existing leases, which come at twenty-year intervals dating from the date of issuance of the lease, advance royalty terms will be included based on a schedule of mining which would exhaust the deposit in 40 years from the effective date of the regulation. A lessee who produced ahead of this schedule prior to the next scheduled adjustment of terms would receive credits against later advance royalties, thereby providing a financial incentive to encourage timely development and production of Federal coal before the scheduled adjustment of terms of existing leases.

It is proposed to amend Chapter II of Title 43, Code of Federal Regulations, as set forth below.

1. 43 CFR 3500.05 is amended by the addition of the following new paragraphs (d), (e), (f), and (g):

§ 3500.0–5 Definitions.

* * * * *

(d) *Logical Mining Unit (LMU).* A Logical Mining Unit or LMU is an area of coal land that can be developed and mined in an efficient, economical and orderly manner with due regard to the conservation of coal reserves and other resources. An LMU may consist of one or more Federal leaseholds, and may include intervening or adjacent non-Federal lands, if all lands are under the effective control of a single operator and can be developed and operated as a unified mine. It may also consist of lands committed to a contract for collective prospecting, development, or operations approved by the Secretary pursuant to the Act of August 31, 1964 (30 U.S.C. 201–1). The Mining Supervisor is authorized to approve or establish an LMU. Every Federal lease will automatically be considered by itself an LMU as of the effective date of the lease or (the effective date of these regulations), whichever is later. The boundaries of an LMU may later be changed (1) upon application by the lessee or operator and with the approval of the Mining Supervisor and the concurrence of the authorized officer, or (2) at the discretion of the Mining Supervisor with the concurrence of the authorized officer, or (3) at the request of the authorized officer with the approval of the Mining Supervisor.

(e) *Logical Mining Unit (LMU) Reserves.* LMU Reserves as of a given date are defined as being equal to the sum of (1) estimated recoverable reserves under Federal lease in the LMU at that time and (2) estimated non-Federal recoverable reserves then in the LMU which will be mined prior to the extraction of all estimated Federal reserves then in the LMU. The LMU reserves associated with a given Federal lease are the estimated LMU reserves as of the effective date of that lease or (the effective date of these regulations), whichever is later. Since the effective dates of different Federal leases in a given LMU may differ, the estimated LMU reserves associated with those leases may also differ. The estimate of recoverable reserves under both (1) and (2) above may be adjusted by the Mining Supervisor whenever significant new information becomes available about the amount of such reserves, including the time at which a mining plan is approved for the Federal portion.

(f) *Diligent Development.* Diligent Development of a Federal lease means the timely preparation for and initiation of production of coal from the LMU of which the lease is a part so that one-fortieth of the LMU reserves associated with that lease are extracted within a period of ten years from (the date of this regulation) or from the date of the lease, whichever occurs later.

(1) Upon application by the lessee, the period by the end of which diligent development must have been achieved, shall be increased by an amount of time equal to the period during which diligent development is, in the opinion of the Secretary, significantly impaired by (i) a strike, the elements, or casualties not attributable to the lessee, (ii) an administrative delay in the Department which is not caused by the lessee's action, or (iii) extraordinary circumstances not attributable to the lessee and not foreseeable by a reasonably prudent operator. In the determination of whether any of the conditions listed in (i)–(iii) above occurred and whether one or more of those conditions did in fact significantly impair diligent development, the Secretary's finding shall be final. The Secretary shall, however, not find to be an extraordinary circumstance under (iii) any condition arising out of normally foreseeable business risks such as: fluctuations in prices, sales, or costs, including foreseeable costs of compliance with requirements for environmental protection; commonly experienced delays in delivery of supplies or equipment; or inability to obtain sufficient sales.

(2) Any extension of time for achieving diligent development granted by the Secretary under paragraph (f) (1) of this section shall include notification of the revised date by which diligent development must be achieved.

(g) *Continuous Operation.* Continuous operation on a given lease means extraction, processing or marketing of coal from the LMU of which the lease is a part, after diligent development has been achieved, in the amount of one percent or more of the LMU reserves in each calendar year, subject to the exceptions contained in 30 U.S.C. 207 and in the lease, if any.

2. 43 CFR 3522.2–1 is amended by the following modification (a) and addition (b):

§ 3522.2–1 Terms and Conditions.

(a) *General.* Coal, potassium, and phosphate leases are subject to readjustment of the terms and conditions of the lease at the end of each 20-year period succeeding the date of the lease unless otherwise provided by law at the time of the expiration of such periods. The lessee will be notified of the proposed readjustment of terms or notified that no readjustment is to be made. Within 30 days after receipt of the notice, unless the lessee or operator files his objection to the proposed readjusted terms, or the lessee files a relinquishment of the lease, he will be deemed to have agreed to such readjusted terms. Notice of the proposed readjustments or that no readjustment is to be made will be given, whenever feasible, before the expiration of each such 20-year period.

(b) *Coal.* Coal leases outstanding at the effective date of these regulations which do not contain advance royalties according to a schedule of production sufficient to exhaust the deposit in 40 years, dated prior to January 1, 1975, will be subject to change in advance royalty terms and conditions at the next schedule adjustment of terms and conditions under paragraph (a) of this section after (the effective date of these regulations). The new advance royalty terms and conditions will be based on a standard schedule of production sufficient to exhaust the elapsed deposit within 40 years from (the effective date of these regulations). The advance royalty rates for the years following the readjustment of terms will be those rates appropriate for a lease dated (the effective date of these regulations). Lessees will be allowed to credit against the advance royalties due under those rates any production royalties paid in lease years prior to the readjustment of terms, which production royalties are in excess of advance royalties that would have been due had advance royalties been in effect from (the effective date of these regulations).

3. 43 CFR 3523.2–1(b) (1) is amended to read as follows:

§ 3523.2–1 Judicial Proceedings.

(b) *Exceptions—(1) Coal.* Any coal lease on which there are not diligent development and continuous operation in accordance with Section 3500.0–5 will be subject to cancellation in whole or in part. In deciding whether to cancel a lease under this subparagraph, the Secretary will not consider adverse circumstances which arise out of normally foreseeable business risks, such as fluctuations in prices, sales or costs, including foreeeable costs of compliance with requirements for environmental protection; commonly experienced delays in delivery of supplies or equipment; or inability to obtain sufficient sales.

* * * * *

THOMAS S. KLEPPE,
Secretary of the Interior.

DECEMBER 22, 1975.

[FR Doc.75–35084 Filed 12–30–75;8:45 am]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 53]

LIVESTOCK, MEATS, PREPARED MEATS, AND MEAT PRODUCTS (GRADING, CERTIFICATION, AND STANDARDS)

Official Identification

The Agricultural Marketing Service is considering an amendment to the "Rules and Regulations of the Department of Agriculture Governing the Grading and Certification of Meats, Prepared Meats, and Meat Products" by specifying that lamb carcasses and wholesale cuts be identified for class when quality graded to distinguish them from yearling mutton and mutton carcasses. The Agricultural Marketing Act of 1946 provides for identifying the class, grade, quality, etc., of agricultural products so that they may be marketed to the best advantage; that trading may be facilitated; and that consumers may be able to obtain the quality of product which they desire. Therefore, the following amendment to the regulations is proposed. The provisions of 7 CFR 53.19, Paragraph (b), are amended by inserting the word "LAMB" into the first sentence between the words "calf" and "yearling."

Interested persons may participate in this proposed rulemaking by submitting written data, views, or arguments concerning the proposal set forth above, in duplicate, to Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, on or before March 1, 1976.

All written submissions made pursuant to this Notice will be made available for public inspection during normal business hours at the Office of the Hearing Clerk, Room 112, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250.

Done at Washington, D.C. this 24th day of December 1975.

DONALD E. WILKINSON,
Administrator.

[FR Doc.75–35113 Filed 12–30–75;8:45 am]

[7 CFR Part 907]

NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Proposed Minimum Size Requirement

This notice proposes a minimum size requirement of 2.32 inches in diameter for navel oranges grown in Arizona and designated part of California for the period January 16 through July 15, 1976. The proposed requirement is designed to promote orderly marketing in the interest of producers and consumers.

The proposal would establish a regulation pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

All persons who desire to submit written data, views, or arguments in connection with the proposal should file the same with the Hearing Clerk, Room 112A, U.S. Department of Agriculture, Washington, D.C. 20250, not later than January 6, 1976. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed size regulation was recommended by the Navel Orange Administrative Committee, and it reflects the committee's appraisal of the need for regulation and of the crop and current and prospective market conditions. Shipment of the 1975–76 navel orange crop is now in progress. The proposed regulation is necessary to assure that fresh shipments of navel oranges to markets in the United States and Canada are 2.32 inches in diameter or larger. Supplies of oranges smaller than the proposed 2.32-inch minimum are excessive this season with respect to market demand. Abundant supplies of navel oranges 2.32 inches in diameter or larger are available for fresh shipment this season. Fruit failing to meet the size requirement will be available for shipment to fresh export markets where smaller fruit is in demand, left on the trees to attain further growth, or utilized in processing. The proposed requirement is

V40251 DEC 31 75 D
XUM

consistent with the objectives of the act of promoting orderly marketing and protecting the interest of consumers.

§ 907.662 Navel Orange Regulation 362.

Order. (a) During the period January 16, 1976, through July 15, 1976, no handler shall handle any navel oranges which are smaller than 2.32 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from stem to the blossom end of the fruit: *Provided,* That not to exceed 5 percent, by count, of the navel oranges contained in any type of container may measure smaller than 2.32 inches in diameter.

(b) The terms "handler" and "handle" as used herein shall have the same meaning as is given to the respective terms in said marketing agreement and order.

(It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A-107.)

Dated: December 22, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-34970 Filed 12-30-75;8:45 am]

[7 CFR Part 980]

[980.114 Amdt. 1]

ONION IMPORTS

Proposed Minimum Grade and Size Requirements

This proposal would amend minimum grade and size requirements for imported onions.

Notice is hereby given of a proposed amendment of § 980.114 Onion import regulation (40 FR 32308), applicable to the importation of onions into the United States to become effective March 15, 1976, under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

Under section 8e of the act (7 U.S.C. 608e-1), whenever two or more marketing orders are concurrently in effect regulating the same agricultural commodity produced in different areas of the United States, the importation of such commodity shall be prohibited unless it complies with the grade, size, quality, and maturity provisions of the order which, as determined by the Secretary of Agriculture, regulates the commodity produced in the area with which the imported commodity is in most direct competition.

Onion import regulation § 980.114 (40 FR 32308), became effective August 4, 1975, and sets forth similar grade, size, quality, and maturity requirements as those in effect for onions handled under Marketing Order No. 958, as amended (7 CFR Part 958) regulating the shipments of onions grown in designated counties in Idaho and Malheur County, Oregon.

Grade, size, quality, and maturity requirements would become effective for the period March 8 through May 8, 1976 (40 FR 58656) under Marketing Order No. 959, as amended (7 CFR Part 959), regulating the handling of onions grown in South Texas. It is anticipated that imported onions will be in most direct competition with those regulated under Marketing Order 959 on or about March 15 and the proposed changes will be necessary to bring import regulations into line with domestic regulations covering South Texas onions.

Consideration will be given to any written data, views, or arguments pertaining to the proposed amendment which are filed in duplicate with the Hearing Clerk, Room 112-A, U.S. Department of Agriculture, Washington, D.C. 20250, not later than January 8, 1976. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendment is as follows:

Section 980.114 Onion import regulation (40 FR 32308), is hereby revised to read as follows:

§ 980.114 Onion import regulation.

Pursuant to section 8e of the act (7 U.S.C. 608e-1) and except as otherwise provided herein, during the period beginning March 15, 1976, and continuing through May 8, 1976, the importation of onions is prohibited unless such onions are inspected and meet the requirements of this section.

(a) *Minimum grade and size requirements*—(1) *Grade.* Not to exceed 20 percent defects of U.S. No. 1 grade. In percentage grade lots, tolerances for serious damage shall not exceed 10 percent including not more than 2 percent decay. Double the lot tolerance shall be permitted in individual packages in percentage grade lots. Applications of tolerances in U.S. Grade Standards shall apply to in-grade lots.

(2) *Size.* White onions—1 inch minimum diameter; all other varieties of onions—1¾ inches minimum diameter.

(b) *Condition.* Due consideration shall be given to the time required for transportation and entry of onions into the United States. Onions with transit time from country of origin to entry into the United States of ten or more days may be entered if they meet an average tolerance for decay of not more than 5 percent, provided they meet the other requirements of this section.

(c) *Minimum quantity.* Any importation which in the aggregate does not exceed 100 pounds in any day, may be imported without regard to the provisions of this section.

(d) *Plant quarantine.* Provisions of this section shall not supersede the restrictions or prohibitions on onions under the Plant Quarantine Act of 1912.

(e) *Designation of governmental inspection service.* The Federal or the Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, and the Fruit and Vegetable Division, Production and Marketing Branch, Canada Department of Agriculture, are designated as governmental inspection services for certifying the grade, size, quality and maturity of onions that are imported into the United States under the provisions of Section 8e of the act.

(f) *Inspection and official inspection certificates.* (1) An official inspection certificate certifying the onions meet the United States import requirements for onions under section 8e (7 U.S.C. 608e-1), issued by a designated governmental inspection service and applicable to a specific lot is required on all imports of onions.

(2) Inspection and certification by the Federal or Federal-State Inspection Service will be available and performed in accordance with the rules and regulations governing certification of fresh fruits, vegetables and other products (Part 51 of this title). Each lot shall be made available and accessible for inspection as provided therein. Cost of inspection and certification shall be borne by the applicant.

(3) Since inspectors may not be stationed in the immediate vicinity of some smaller ports of entry, importers of onions should make advance arrangements for inspection by ascertaining whether or not there is an inspector located at their particular port of entry. For all ports of entry where an inspection office is not located, each importer must give the specified advance notice to the applicable office listed below prior to the time the onions will be imported.

Ports	Office	Advance notice (in days)

(4) Inspection certificates shall cover only the quantity of onions that is being imported at a particular port of entry by a particular importer.

(5) Each inspection certificate issued with respect to any onions to be imported into the United States shall set forth, among other things:

(i) The date and place of inspection;

(ii) The name of the shipper or applicant;

(iii) The commodity inspected;

(iv) The quantity of the commodity covered by the certificate;

(v) The principal identifying marks on the containers;

(vi) The railroad car initials and number, the truck and trailer license number, the name of the vessel, or other identification of the shipment; and

(vii) The following statement, if the facts warrant: Meets import requirements or 7 U.S.C. 608e-1.

(g) *Reconditioning prior to importation.* Nothing contained in this part shall be deemed to preclude any importer from reconditioning prior to importation any shipment of onions for the purpose of making it eligible for importation.

(h) It is hereby determined that imports of onions, during the effective time of this section, are in most direct competition with onions grown in South Texas. The requirements set forth in this section are the same as those applicable to grade, size, quality and maturity being made effective for onions grown in South Texas.

(i) *Definitions.* For the purpose of this section, "Onions" means all (except red) varieties of Allium cepa marketed dry, except dehydrated, canned and frozen onions, onion sets, green onions, and pickling onions. Onions commonly referred to as "braided," that is, with tops, may be imported if they meet the grade and size requirements except for top length. The term "U.S. No. 1" shall have the same meaning as set forth in the United States Standards of Bermuda-Granex-Grano Type Onions (§§ 51.3195-51.3209 of this title), United States Standards for Grades of Creole Onions (§§ 51.3955-51.3970 of this title), or in the United States Standards for Grades of Onions Other Than Bermuda-Granex-Grano and Creole Types (§§ 51.2830-51.2854 of this title), whichever is applicable to the particular variety. Tolerances for size shall be those in the applicable United States Standards. The requirements of Canada No. 1 grade are deemed comparable to the requirements of U.S. No. 1 grade. "Importation" means release from custody of the United States Bureau of Customs.

Dated: December 22, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vetgetable Division, Agricultural Marketing Service.

Commodity Credit Corporation

[7 CFR Part 1427]

UPLAND AND EXTRA LONG STAPLE COTTON

Proposed Determinations Regarding 1976 Crops

The Commodity Credit Corporation (CCC) is preparing to make certain determinations with respect to the loan programs for the 1976 crops of upland and extra long staple (ELS) cotton:

(a) Schedule of premiums and discounts for grade and staple length of upland cotton.

(b) Schedule of micronaire differentials for upland cotton.

(c) Schedule of base loan rates by warehouse location for upland cotton.

(d) Schedule of loan rates by location for eligible qualities of ELS cotton.

(e) Schedule of micronaire differentials for ELS cotton.

(f) Detailed operating provisions to carry out the price support program for lint cotton.

(g) Detailed operating provisions to carry out the seed cotton loan program.

The first six of these determinations are to be made pursuant to the Agricultural Act of 1949, as amended (63 Stat. 1051 as amended; 7 U.S.C. 1421 et seq.).

Section 403 of the Act (7 U.S.C. 1423) provides in part that appropriate adjustments may be made in the support price for any commodity for differences in grade, type, staple, quality, location, and other factors. Such adjustments shall, so far as practicable, be made in such manner that the average support price for such commodity will, on the basis of the anticipated incidence of such factors, be equal to the level of support determined as provided in this Act. Under section 103(e) of the Act (7 U.S.C. 1444(e)), however, the base loan rate determined for 1976-crop upland cotton is applicable to Middling 1-inch cotton (micronaire 3.5 through 4.9) at average location in the United States.

The preliminary 1976 loan rate announced for Middling 1-inch by press release (USDA 3162-75) dated October 30, 1975, is 37.12 cents per pound. CCC loans will be adjusted to Strict Low Middling (SLM) 1-1/16 inches cotton, the base quality now being used for spot and futures price quotations.

(a) *Schedule of premiums and discounts for grade and staple length of upland cotton.* This schedule would reflect the differences in loan value between SLM 1-1/16 inches cotton and the various other grade and staple length combinations for upland cotton.

(b) *Schedule of micronaire differentials for upland cotton.* A schedule will reflect differences in loan value between micronaire group 3.5 through 4.9 (the statutory base group) and the various other micronaire groups.

(c) *Schedule of base loan rates by warehouse location for upland cotton.* This schedule will establish base loan rates for upland cotton stored at various warehouse locations.

(d) *Schedule of loan rates by location for eligible qualities of ELS cotton.* In accordance with the Act, the loan rate for 1976-crop ELS cotton was announced at a national average rate. That rate is 73.24 cents per pound, announced by press release (USDA 3162-75) dated October 30, 1975. The schedule of rates would reflect differences in loan value by location for each eligible quality.

(e) *Schedule of micronaire differentials for ELS cotton.* A schedule will reflect differences in loan value between micronaire group 3.5 and above (the base group) and the various other micronaire groups.

(f) *Detailed operating provisions to carry out the price support programs for lint cotton.* Detailed regulations necessary to carry out the price support programs for upland and ELS lint cotton are being reviewed for 1976, including specifications for bale packaging materials used for cotton tendered to CCC under such regulations. Loan provisions in effect under the current program may be found in the Cotton Loan Program Regulations (7 CFR 1427.1-28, as amended by 40 F.R. 30092). The latest revision of the bale packaging specifications was published in the FEDERAL REGISTER on April 14, 1975 (40 FR 16647). Consideration is being given to amending the specifications as recommended by the Cotton Industry Bale Packaging Committee at its meeting held December 4, 1975.

Payment provisions in effect for ELS cotton under the current program may be found in the regulations providing the terms and conditions for payments on ELS cotton for 1968 and succeeding years (7 CFR 722.700-720).

The following determination is to be made pursuant to Section 5(a) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714c(a)):

(g) *Detailed operating provisions to carry out the seed cotton loan program.* The regulations to carry out the seed cotton loan program are also being reviewed for 1976. Provisions in effect under the current program may be found in the Seed Cotton Loan Program Regulations (7 CFR 1427.160-181, as amended by 40 FR 21469).

Prior to making the foregoing determinations, consideration will be given to any data, views, and recommendations relative to these determinations which are submitted in writing to the Director, Grains, Oilseeds and Cotton Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20250. In order to be sure of consideration, all submissions should be received by the Director not later than January 30, 1976. All written submissions pursuant to this notice will be made available for public inspection at the Office of the Director during regular business hours (8:15 a.m. to 4:45 p.m.).

V40251 DEC 31 75 XUM

Signed at Washington, D.C., on December 24, 1975.

WILLIAM L. RUBLE,
Acting Executive Vice President, Commodity Credit Corporation.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social and Rehabilitation Service

[45 CFR Part 248]

MEDICAL ASSISTANCE PROGRAM

Determination of Income and Resources of Spouses and Parents Available to Applicants for or Recipients of Medical Assistance

Notice is hereby given that the regulations set forth in tentative form below are proposed by the Acting Administrator, Social and Rehabilitation Service, with the approval of the Secretary of Health, Education, and Welfare. The proposed regulations is to assure that persons who apply for Medicaid as non-cash assistance recipients will have the income and resources of spouses and parents deemed available to them, and considered in determining their financial eligibility, consistent with the provisions of the cash assistance category on which their financial eligibility is based, i.e., Supplemental Security Income (SSI) or Aid to Families With Dependent Children (AFDC). The basis for the regulations is the need for clear Federal rules in the light of questions which have been raised by State agencies, applicants, recipients and a court case on this subject.

A number of situations have come to the attention of the Service which are not clearly addressed under current regulations. For example, in the absence of clarifying amendments, it is possible for an institutionalized aged, blind or disabled individual to be certified to the State by the Social Security Administration as categorically needy Medicaid-eligible (under the rules of the SSI program) because his spouse's income and resources have ceased to be considered, even though (because of the use of different rules pertaining to spousal income and resources) the State would find such a person ineligible for its medically needy program. The Secretary has concluded that it is inequitable to use different methods to determine what income and resources of relatives are available to cash assistance Medicaid applicants and non-cash Medicaid applicants. For this reason, the Secretary has determined to explicitly conform all Medicaid eligibility determination procedures (relating to deeming parental or spousal income or resources available to the applicant) to those utilized under the statutes and regulations of the cash assistance programs upon which the applicant's categorical eligibility rests, except where the State, in restricting Medicaid eligibility pursuant to Section 1902(f) of the Social Security Act, imposes a more stringent approach. These proposed revisions in the regulations carry out the Secretary's decision.

The proposed regulations are designed to ensure uniformity and equity in Medicaid eligibility determinations and are fully in accord with the applicable statutory and regulatory provisions. The clarifying changes made in the regulations include:

1. Clarification of the present § 248.3 (b) (1). The reference to "actually available" income and resources has inhibited proper imposition of relative responsibility provisions in eligibility determinations, in that support, while available, may not in fact be provided, thus creating an ambiguity as to whether it is "actually" available.

2. Reiteration of the limitation on relative responsibility now contained in § 248.3(b) (2) in a revised § 248.3(b) (3), setting forth the same substantive policy in a format which clarifies that the financial responsibility of parents and spouses of applicants for or recipients of medical assistance is an integrate part of the eligibility determination process.

3. Deletion of the present § 248.3(b) (3) calling upon States to specify the extent to which liable relatives' income and resources are to be considered in determining Medicaid eligibility. The revised regulations themselves will now set forth the extent to which relatives' income and resources are to be considered available in determining eligibility. Income and resources of relatives other than parents or spouses cannot be considered in the eligibility determination unless actually made available to the applicant or recipient, but any property or cash amounts contributed by such relatives to the applicant or recipent must be considered as his income or resources in the eligibility determination process.

4. Addition of a new § 248.3(b) (4) setting forth the rule for use of SSI policy in determining the availability of the income and resources of spouses and parents for aged, blind or disabled applicants in States using title XVI eligibility criteria.

5. Addition of a new § 248.3(b) (5) exempting States using more restrictive eligibility criteria pursuant to section 1902(f) of the Act from the requirement of the proposed § 248.3(b) (4).

6. Addition of a new § 248.3(b) (6) mandating the use of title IV–A cash assistance relative responsibility provisions for applicants who are AFDC-related or individuals under age 21.

7. Addition of a new § 248.3(b) (7) enunciating Service policy that individuals who can qualify for Medicaid coverage on more than one basis shall retain the option of selecting the eligibility category within which their eligibility will be determined.

8. Redesignation of the present § 248.3 (b) (4), (5) and (6) as § 248.3(b) (8), (9) and (10).

9. Revising § 248.21(a) (2) (i), (ii), and (iii) to accomplish parallel changes in this section applicable to Guam, Puerto Rico and the Virgin Islands. Since SSI is not in effect in these jurisdictions, the policies applicable in determining Medicaid eligibility of the aged, blind or disabled are those used in considering such relatives' income and resources in the cash assistance programs under titles I, X, and XIV or XVI of the Act. The new special provision for States exercising their option under section 1902 (f) of the Act is, therefore, not included in this section.

Prior to the adoption of the proposed regulations, consideration will be given to written comments, suggestions or objections thereto addressed to the Administrator, Social and Rehabilitation Service, Department of Health, Education, and Welfare, P.O. Box 2382, Washington, D.C. 20013, and received on or before January 30, 1976.

Such comments will be available for public inspection in Room 5224 of the Department's offices at 330 C Street, SW., Washington, D.C., beginning approximately two weeks after publication of this notice in the FEDERAL REGISTER, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (area code 202–245–0950).

(Sec. 1102, 49 Stat. 647 (42 U.S.C. 1302). (Catalog of Federal Domestic Assistance Program No. 13. 714, Medical Assistance Program.)

Dated: October 31, 1975.

JOHN A. SVAHN,
Acting Administrator, Social and Rehabilitation Service.

Approved: December 22, 1975.

DAVID MATHEWS,
Secretary.

Part 248, Chapter II, Title 45 of the Code of Federal Regulations is revised as follows:

1. Section 248.3 is amended by revising paragraphs (b) (1) and (b) (3), redesignating paragraphs (b) (4), (5) and (6) as (b) (8), (9) and (10), and adding new paragraphs (b) (4) through (b) (7), as set forth below:

§ 248.3 State plan requirements on financial eligibility for medical assistance programs.

* * * * *

(b) With respect to both the categorically needy and, if they are included in the plan, the medically needy, a State plan must:

(1) Provide that only such income and resources as are actualy available will be considered and that income and resources will be reasonably evaluated. Income and resources of relatives other than parents or spouses cannot be considered in the eligibility determination process unless actually made available to the applicant or recipient. Any income or resources contributed by such relatives to the applicant or recipient must be considered as his income or resources in the eligibility determination process.

(2) Provide that financial responsibility of any individual for any applicant or recipient of medical assistance will be limited to the responsibility of spouse for spouse and of parents for children under age 21, or blind, or disabled.

(3) Provide that in no event will eligibility be determined by taking into account the income or resources of individuals other than the applicant or recipient unless such individuals are the spouses or parents (with respect to children under age 21, or blind or disabled) of the applicant for or recipient of medical assistance.

(4) Provide that, except as specified in paragraph (b) (5) of this section, the available income and resources of spouses of aged, blind or disabled applicants or recipients and parents of blind or disabled applicants or recipients shall be determined on the basis of the rules set forth in sections 1612(a), 1614(b) and 1614(f) (1) and (2) of the Act. In no event shall the incomes and resources of spouses and parents which would be considered in determining eligibility for payments under the Supplementary Security Income (SSI) program be disregarded in determining eligibility of an aged, blind or disabled applicant for or recipient of medical assistance.

(5) In the States which have chosen to limit Medicaid coverage for the aged, blind and disabled pursuant to section 1902(f) of the Act, provide that the available income and resources of spouses of aged, blind or disabled applicants or recipients and parents of blind or disabled applicants or recipients may be considered without respect to the limitations set forth in sections 1612(a), 1614 (b) and 1614(f) (1) and (2) of the Act. However, such consideration of income and resources may not be more restrictive than that included in the State's January, 1972 plan nor more liberal than that imposed under the Supplemental Security Income (SSI) program under title XVI.

(6) Provide that, except as specified in paragraph (b) (7) of this section, the available income and resources of spouses and parents of individuals under age 21 (unless blind or disabled) or individuals who apply for or are recipients of medical assistance on the basis of their status as AFDC-related individuals shall be determined on the basis of the rules which would govern if they were applicants for aid under title IV-A of the Act. In no event shall the income and resources of spouses and parents which would be considered in determining eligibility for aid under the AFDC program be disregarded in determining eligibility for medical assistance.

(7) Provide that, where an individual can establish eligibility for medical assistance in more than one category covered in the State plan (title IV-A-related persons, individuals under age 21 (unless blind or disabled), blind, disabled or over age 65), such an individual, or his representative, shall have the right to select the category for which application is made and the income and resources of such an individual's spouse or parents (in the case of children under age 21, or blind or disabled) shall then be considered as available under the appropriate provisions of paragraphs (b) (4), (5) or (6) of this section.

* * * * *

2. In § 248.21 the introductory paragraph to the section and paragraph (a) (2) are revised to read as set forth below:

§ 248.21 Financial eligibility—medical assistance programs.

Effective January 1, 1974, the provisions of this section are applicable only to Guam, Puerto Rico and the Virgin Islands. See §§ 248.1 through 248.4 for provisions applicable to other jurisdictions participating in the medical assistance program under title XIX of the Social Security Act.

(a) *State plan requirements.* A State plan under title XIX of the Social Security Act must:

* * * * *

(2) With respect to both the categorically needy and, if they are included in the plan, the medically needy;

(i) Provide that only such income and resources as are actually available will be considered and that income and resources will be reasonably evaluated. Income and resources of relatives other than parents or spouses cannot be considered in the eligibility determination process unless actually made available to the applicant or recipient. Any income or resources contributed by such relatives to the applicant or recipient must be considered as his income or resources in the eligibility determination process.

(ii) Provide that financial responsibility of any individual for any applicant or recipient of medical assistance will be limited to the responsibility of spouse for spouse and of parents for children under age 21, or blind, or permanently and totally disabled.

(iii) Provide that in no event will eligibility be determined by taking into account the income or resources of individuals other than the applicant or recipient unless such individuals are the spouses or parents (with respect to children under age 21, or blind or disabled) of the applicant for or recipient of medical assistance, even though the income or resources of additional relatives are considered for purposes of financial assistance to the aged, blind and disabled under the provisions of the State plans pursuant to titles I, X, XIV, and XVI (Aid to the Aged, Blind and Permanently and Totally Disabled (AABD)) of the Act.

(iv) Provide that the available income and resources of spouses and parents of aged, blind and disabled applicants or recipients shall be determined on the basis of the rules which would govern if they were applicants for or recipients of aid under titles I, X, XIV and XVI (AABD) of the Act.

(v) Provide that the available income and resources of spouses and parents of individuals under age 21 or individuals who apply for medical assistance on the basis of their status as AFDC-related individuals shall be determined on the basis of the rules which would govern if they were applicants for aid under title IV–A of the Act.

(vi) Provide that, where an individual can establish eligibility for medical assistance in more than one category covered in the State plan (title IV–A related persons, individuals under age 21, blind, disabled or over age 65), such individual, or his representative, shall have the right to select the category for which application is made, and the income and resources of such an individual's spouse or parents (in the case of children under age 21 or blind or disabled) shall then be considered as available under the appropriate provisions of paragraphs (a) (2) (iii), (iv) of this section.

[FHWA Docket No. 75-9; Notice 2]

[23 CFR Part 750]

NATIONAL STANDARDS FOR DIRECTIONAL AND OFFICIAL SIGNS: "AN OVERVIEW OF ADEQUACY OF NATIONAL STANDARDS FOR DIRECTIONAL AND OTHER OFFICIAL SIGNS"

Meeting

The public is invited to submit its views and comments at a Federal Highway Administration meeting on the National Standards for Directional and Official Signs and a study entitled, "An Overview of Adequacy of National Standards for Directional and Other Official Signs." This meeting was requested by the National Caves Association and will consider possible proposals to amend 23 CFR 750, Subpart B.

The meeting will start at 9:30 a.m. on Monday, January 26, 1976, in Room 2230, Nassif Building, 400 7th Street, SW., Washington, D.C. 20590.

It would be appreciated if persons or groups planning to make statements would furnish such statements in writing at the meeting. The study which is the subject of this meeting was first made available to the public in an Advance Notice of Proposed Rulemaking, which appeared in the FEDERAL REGISTER on Tuesday, December 16, 1975. Copies of the study are available for public inspection or may be requested from FHWA as provided in that notice.

NORBERT T. TIEMANN,
Federal Highway Administrator.

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 75-33; Notice 01]

OCCUPANT CRASH PROTECTION

Seat Belt Assemblies in Postal Service Vehicles

This notice proposes an amendment of Standard No 208, *Occupant Crash Protection*, 49 CFR 571.208, that would permit certain U.S Postal Service vehicles to continue to meet present requirements for occupant crash protection after new requirements become effective for most light trucks and multipurpose passenger

V 4012751 DEC 31 75 XUM V

vehicles (MPV) on January 1, 1976 (S4.2).

Standard No. 208 presently requires trucks and multipurpose passenger vehicles (MPV) with a gross vehicle weight rating (GVWR) of 10,000 pounds or less to be equipped with Type I or Type II seat belt assemblies at each designated seating position. A Type II seat belt assembly must be installed at each outboard designated seating position that includes the windshield header within the head impact area, except for three excepted vehicle types.

On and after January 1, 1976, the standard will require the same seat belt assembly installations in these light trucks and MPV's as are now provided in most passenger cars, including a Type II seat belt assembly with non-detachable shoulder belt at each front outboard designated seating position. Six vehicle types (e.g., open-body type vehicles) are excluded from the upcoming requirements because of the difficulty of Type II seat belt installation, but they must continue to meet the present level of occupant crash protection.

The United States Postal Service has petitioned for amendment of the upcoming requirements to provide that its light delivery vehicles also be permitted to continue to meet the present level of occupant crash protection. The light delivery vehicles are manufactured for the Postal Service under contract, with a driver seat only, and mail storage trays convenient to the driver. The vehicles are in some cases equipped with right-hand-drive to improve mailbox delivery. The Postal Service states in its petition "Normal driving during a day's operation often requires more than 450 stop-and-start cycles which would include a great number of exits and entrances by the driver as well as the requirement for delivery to mail boxes."

The NHTSA has considered the particular requirements for operation of these delivery vehicles and the distinctive pattern of seat belt use. The Postal Service has its own safety research organization that has improved seat belt installations in their vehicles over what is currently required. The Postal Service states that its seat belt design has resulted in increased usage by mail carriers. The service judges that installation at the driver's position of Type II belts, with non-detachable shoulder portion, will decrease the percentage of seat belt use.

Based on this information, the agency tentatively concludes that the new requirements for type II seat belt assemblies at the driver's position in this limited category of vehicle would be inappropriate. An active safety research effort by the Postal Service demonstrates that the singular working conditions of motor vehicle mail delivery justify the installation of Type I or Type II seat belts that do not interfere with exit-entry and mail sorting and delivery to the degree that non-detachable Type II seat belts would.

In consideration of the foregoing, it is proposed that S4.2.2 of Standard No. 208 (49 CFR 571.208) be amended by the addition of the phrase, "vehicles designed to be exclusively sold to the U.S. Postal Service" following the phrase "motor homes".

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, S.W., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: February 17, 1976.

Proposed effective date: Date of publication of final rule.

Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.51 and 49 CFR 501.8).

Issued on December 24, 1975.

ROBERT L. CARTER,
Associate Administrator,
Motor Vehicle Programs.

Materials Transportation Bureau

[49 CFR Parts 192 and 195]

[Notice 75-7; Docket No. OPSO-23]

TRANSPORTATION OF NATURAL AND OTHER GAS AND HAZARDOUS LIQUIDS BY PIPELINE

Bending Limitations

The Office of Pipeline Safety Operation (OPSO) is considering amendments of § 192.313 of the Federal gas pipeline safety standards and § 195.212 of the Federal liquid pipeline safety standards to provide more appropriate safety requirements for steel pipe which is subjected to field bending. The amendments would also make the standards for bending gas and liquid pipe consistent insofar as practicable. The need for amended standards in connection with the field bending of steel pipe has become evident with the development of the internal bending mandrel and the recent industry use of reel barges in laying offshore pipelines.

For steel pipe 12 inches or more in diameter which is subjected to field bending, § 192.313(a)(3) presently permits a maximum deflection of 1½ degrees per length of pipe equal to the diameter. This deflection limitation is based on the recommended safety practice contained in the 1968 edition of the United States of America Standards Institute B31.8 Code, which was widely used by the gas pipeline industry before Part 192 was adopted (35 FR 13248, Aug. 19, 1970). Part 195 does not have a comparable requirement.

The 1½ degree deflection limitation was included in the B31.8 Code prior to the development of the internal bending mandrel. The mandrel is used to support the inside wall of pipe during field bending, thereby reducing the possibility of wrinkling, buckling, or collapsing. OPSO believes that, by using the mandrel, field bends larger than those presently permitted by § 192.313(a)(3) may be made without reducing the existing level of safety.

In addition to the internal bending mandrel, the technique of reeling pipe on barges has been developed by industry in recent years. Essentially, the pipeline is fabricated onshore and spooled onto a reel on a barge. The barge is then towed to location and the pipeline is unspooled along the right-of-way. During the spooling of pipe 12 inches or more in diameter, bends in excess of that allowed by § 192.313(a)(3) occur. However, during the laying operation, the pipe is unreeled and straightened so that there is little or no bend in the installed position. From the technical evidence presently available, there is not any indication that the repeated bending reduces the structural integrity of the pipe. OPSO believes that by using the reel barge technique, field bends larger than those permitted by § 192.313(a)(3) may be made without reducing the existing level of safety.

This proceeding was begun by the Office of Pipeline Safety (OPS), which issued an advance notice of proposed rulemaking, Notice 73-1 (38 FR 14969, June 7, 1973), to gain additional information on pipe bending before formulating proposed revisions to the existing rules. (However, after the advance notice was issued, OPS was abolished, and the authority to administer pipeline safety matters was delegated to the Materials Transportation Bureau (40 FR 30821, July 23, 1975)). Besides questions relating to the maximum deflection limitation under § 192.313(a)(3), Notice 73-1 requested interested persons to answer questions concerning the requirement of § 192.313(b) that each circumferential weld of steel pipe that is subjected to stress during bending be nondestructively tested. Further, Notice 73-1 posed questions concerning the requirements of §§ 192.313(d) and 195.212(b) that field bends be free of mechanical damage.

There were 20 persons who submitted comments to Notice 73-1: eight natural gas pipeline companies, three gas and petroleum trade associations, two industry committees on safety practices, three pipe and equipment manufacturers, one pipeline contractor, one pipeline contractors' trade association, and two members of the general public. A discussion of the significant comments and the disposition of those comments in developing the amendments proposed by this notice are discussed hereinafter.

Maximum allowable deflection. With respect to the maximum deflection limit in § 192.313(a)(3), Notice 73-1 asked first, whether a deflection limit should be established, and if so, upon what criteria should it be based and what should be the numerical value. In response, one commenter suggested that the existing deflection limit should not be revised and that the same limit should be established in § 195.212. While stating that a numerical limit is unnecessary, two other commenters suggested that numerical limits of 3.0 and 4.77 degrees per length of pipe equal to pipe diameter could be safely established, based respectively on research and offshore pipe reeling operations. Another commenter suggested adopting the limits set forth in the ANSI B 31.4 Code, which range from a deflection of 3.18 degrees per length of pipe equal to the diameter, for pipe 12¾ inches in diameter and smaller to 1.91 degrees for pipe 20 inches in diameter and larger. Regarding the criteria for establishing a maximum deflection limit, commenters suggested that ductility and yield strength of pipe, ductility of welds, ovalling of pipe, and excessive thinning of the pipe wall be considered in establishing a limit. The majority of commenters, however, indicated that a specific numerical limitation on deflection is unnecessary in light of the existing performance standards for pipe bending in § 192.313.

Secondly, Notice 73-1 asked whether an amount of strain or wall-thinning which occurs during bending should be used to limit deflection, and, if so, what would be the criterion. There were eight comments in response to this question. Some comments indicated that strain and wall-thinning should be used to limit the degree of deflection but did not suggest any applicable criteria. The majority of commenters, however, opposed this proposition stating that the existing performance requirements in the pipe bending regulations regarding ovality, smoothness, mechanical damage, and serviceability limit the amount of strain and wall-thinning which result from bending. These commenters pointed out that those existing performance standards have the indirect effect of limiting the degree of deflection, and since strain varies directly with the degree of deflection, they also limit the amount of strain. While stating that the amount of wall-thinning which occurs during bending is negligible, the majority of commenters further pointed out that the existing design standards governing pipe wall thickness sufficiently limit wall-thinning due to bending. In addition, one commenter stated that buckling or excessive ovalness, which are covered by the existing performance standards, would normally make a bend unacceptable before wall-thinning becomes a significant safety consideration.

Thirdly, Notice 73-1 asked interested persons to comment on the merits of setting a diameter to wall thickness (D/t) ratio above which deflection would be limited, but at or below which there would not be a limitation. Most of the commenters responding to this question stated that a D/t ratio is not needed to limit deflection because performance standards for buckling and excessive ovalness now limit the degree of deflection in the absence of a specified D/t ratio.

Finally, with regard to deflection, Notice 73-1 requested documentation of any recent research or testing on pipe bending. Three recent research or testing projects were documented in response to this question: The Republic Steel Corporation presented the results of bending tests made on four pieces of 30-inch steel pipe containing girth welds. The purpose of the tests was to determine if double-joint girth welded pipe could be field bent, with the girth weld in the bent section, without sustaining damage to the weld metal or the adjacent pipe metal. The degree of bending in the area of the girth weld was equal to or exceeded the existing deflection limit for gas pipelines of 1½ degrees per length of pipe equal to the diameter. The results of tests made after bending, which included X-rays of the welds and mechanical tests on tensile specimens, did not indicate any detrimental effects to either the weld metal or adjacent metal.

The Alyeska Pipeline Service Company presented the results of bending six pieces of 48-inch steel pipe, each 40 feet long, to determine if 48-inch pipe could be smoothly bent to selected radii shorter than the acceptable values in the ANSI B 31.4 Code. The test bend radii ranged from 4 degrees to 20 degrees. The 20 degree bend was equivalent to a deflection of 3 degrees per length of pipe equal to the diameter. All bends were found to be smooth and uniform, and did not cause mechanical damage to the pipe.

The Santa Fe Engineering and Construction Company presented the results of spooling 8-inch and 12-inch diameter steel pipe. The 8-inch pipe was bent to a deflection slightly greater than 1½ degrees per length of pipe equal to the diameter and the 12-inch pipe was bent to 3 degrees of deflection. Santa Fe tested samples from the spooled pipe to determine the following pipe characteristics after bending: tensile properties, work hardening, strain softening, weld ductility, ovalling, and wall thinning. On the basis of the tests, Santa Fe reported that the spooling did not cause any adverse effects or mechanical damage to the pipe and welds.

As a result of the comments regarding a limit on deflection, OPSO believes that the existing maximum degree of deflection prescribed by § 192.313(a)(3) is unnecessarily restrictive in light of the deflection that can be safely obtained with present technology and equipment. As the comments indicated, bends at least 3 degrees per length of pipe equal to the diameter have been made without adverse consequences. Further, it appears that the existing performance standards in § 192.313 regarding smoothness, mechanical damage, ovality, and serviceability are sufficient to provide for a safe bend. This conclusion is supported by the fact that although § 195.212 provides for the safety of bends in performance terms rather than by specifying a numerical limit on the degree of bend, during the 5½ years since § 195.212 became effective, liquid pipeline carriers have not filed with the Department any reports of failures caused by bends with excessive deflection. Thus, OPSO is proposing to amend § 192.313 by deleting the 1½ degree deflection limitation in paragraph (a)(3).

In addition, OPSO agrees with the comments submitted in response to the second and third questions regarding alternative means of limiting deflection. It does not appear that a deflection limit in terms of strain, pipe wall thinning, or D/t ratio is necessary because existing performance standards which provide for a safe bend also govern these related safety factors.

Nondestructive testing. With respect to the requirement of § 192.313(b) that each circumferential weld subjected to stress during bending be nondestructively tested, Notice 73-1 asked, first, whether the test should be performed after bending when a field bending machine is used, or in the case of the reeling process on a barge, before or after bending, taking into account the strain introduced by reeling. Out of the nine persons who responded to this question, four stated that welds in bend sections should be nondestructively tested after bending. However, the Republic Steel Corporation stated that because the welds which it had tested did not contain flaws after bending, nondestructive testing after bending does not appear necessary. Republic said that sound welds would result if they were made according to a welding procedure qualified under API Standard 1104 (§ 192.225), nondestructively tested before bending, and accepted by the standards of acceptability set forth in API Standard 1104 (§§ 192.241, 195.228). Also, some of the commenters noted that because safety problems have not developed in pipe installed from a reel barge, there is no indication that nondestructive testing after reeling is necessary.

Secondly, Notice 73-1 asked whether the decision to nondestructively test before or after bending should be based on a strain limit or other criteria. The relatively few comments on this question opposed the use of a strain limit and did not suggest any criteria which might be used.

Finally, with respect to nondestructive testing, Notice 73-1 asked whether a standard other than "subjected to stress during bending" should be used in § 192.313(b) to determine when a circumferential weld in a bend section must be tested. The majority of commenters who responded to this question indicated that since all circumferential welds in a bend section are subjected to some stress during bending, the standard should be

V 40 N 251 DEC 31 75 XUM

revised to apply only to welds in the immediate area of bending.

OPSO believes that, as the comments indicate, if a circumferential weld is sound, bending will not adversely affect it. However, if a weld contains a flaw, bending can cause the flaw to grow to the point where the weld might fail. The purpose of the nondestructive testing required by § 192.313(b) is to protect against this eventuality. Since even minute flaws which might be affected by bending can be detected by nondestructive testing, it is immaterial from a safety standpoint whether the testing occurs before or after bending. Therefore, OPSO is proposing to amend § 192.313(b) by clarifying that the test may be performed either before or after bending.

In addition, OPSO agrees that the intent of § 192.313(b) is to require that only those circumferential welds which are located in the bent area of a pipe must be nondestructively tested. The rule is not intended to apply to a circumferential weld which lies outside the bent area but is subjected to stress as it moves through a bending machine. To clarify this purpose, OPSO is proposing to further amend § 192.313(b) by providing that each circumferential weld which is located where the stress due to bending causes a permanent deformation in the pipe must be nondestructively tested. This amendment would assure the testing of all welds which are highly stressed during bending but would not require the testing of welds stressed only incidentally as a result of handling during the bending process.

Lastly, OPSO believes that the liquid pipe bending regulations should provide for protection against the adverse consequences that can result from bending a circumferential weld which contains a flaw. Therefore, OPSO is proposing to amend § 195.212 by establishing in a new paragraph (c) the same requirement for nondestructive testing of circumferential welds as is proposed in § 192.313(b).

Mechanical Damage. With respect to the requirement of §§ 192.313(d) and 195.212(b) that a bend be free of mechanical damage, Notice 73–1 asked first, how mechanical damage should be defined and what criteria determines the existence of mechanical damage. In general, commenters stated that mechanical damage includes pipe imperfections which are commonly referred to as buckles, wrinkles, excessive ovalling, gouges, grooves, notches, and dents. Also, commenters indicated that these various types of damage are generally recognized in the absence of identifying criteria.

Second, Notice 73–1 asked what tests should be performed to determine whether mechanical damage exists after bending. The nine commenters who responded to this question generally stated that only visual examination of a bend is necessary to detect damage.

Finally, regarding mechanical damage, Notice 73–1 asked (1) what criteria might be applied in advance of construction to ensure that a field bend would not result in damage to the pipe, (2) should test bends be performed in advance of construction to determine a maximum allowable bend, and if so, (3) should coupons be used in the test bends to check mechanical properties. With regard to criteria, most of the nine comments to this question indicated that the pipe bending regulations currently provide sufficient protective criteria. Most commenters also stated that test bends and the use of coupons are not necessary in view of the safeguards which the regulations now provide.

In view of the comments concerning mechanical damage, OPSO believes that the term "mechanical damage" as it is used in §§ 192.313(d) and 195.212(b) is sufficiently well understood so that a definition of the term is unnecessary. Also, it appears that the types of damage are generally recognized. Consequently, OPSO is not proposing that any determinative criteria or tests be included in the pipe bending regulations. However, as set forth hereinafter, the existing § 192.313(d) would be redesignated as § 192.313(a)(3), and the prohibition therein against mechanical damage would be restated in the terms used in § 195.212 to specifically include buckling and cracks.

Further, OPSO agrees with those commenters who suggested that test bends are not necessary because existing performance standards satisfactorily provide for safe bends. The regulations do not preclude a pipeline operator or carrier from voluntarily making test bends as a check on compliance with the performance standards. OPSO believes that this decision to make test bends should remain voluntary, and is not proposing that test bends be required.

Ovality.—Some commenters to Notice 73–1 recommended that the restriction on ovality, or out-of-roundness, in § 192.313(a)(4) be relaxed, even though this subject was not addressed in the notice. The existing rule provides that for pipe more than 4 inches in nominal diameter, the difference between the maximum and minimum diameters at a bend may not exceed 2½ percent of the nominal diameter. Since the comments did not provide any justification in terms of safety for the recommendation, OPSO is not persuaded that the existing restriction should be modified. However, as set forth hereinafter, the ovality restriction of § 192.313(a)(4) would be redesignated as § 192.313(a)(2).

At the same time, many commenters to Notice 73–1 cited the restriction on ovality in § 192.313(a)(4) as providing for a safe bend in lieu of maximum numerical limit on degrees of deflection. Section 195.212, however, does not prescribe an ovality restriction on bends in liquid pipelines. The comments to Notice 73–1 indicate that the ovality restriction provides a necessary safeguard against wall-thinning and excessive strain due to bending, and OPSO does not see any reason why the gas and liquid pipeline bending regulations should differ in this regard. Therefore, OPSO is proposing to amend § 195.212 to include the ovality restriction of § 192.313(a)(4) in a new § 195.212(b)(2).

Serviceability. Like ovality, the requirement of § 192.313(a)(1) that a bend may not impair the serviceability of the pipe is one of the performance standards to which commenters referred as providing for a safe bend in lieu of a maximum deflection limit. The requirement also provides added protection in the case of pipe 4 inches or less in nominal diameter, which is not subject to the ovality limitation. For these reasons, OPSO believes that the performance standards for bending in § 195.212 should contain the serviceability requirement. Accordingly, it is proposed that the requirement be adopted as a new § 195.212(b)(1).

Effect of bending shoe on girth weld. Section 195.212(d) prohibits the placement of a girth weld inside a shoe of a bending machine when the weld protrudes above the outer wall of the pipe. This requirement is intended to reduce the strain in girth welds during bending. It creates problems, however, in bending double-jointed pipe (80-foot lengths) when the girth weld in the pipe is to pass through a bending shoe. For example, welders may have to defer placing a cap on the girth weld until after the double-jointed length of pipe is bent to ensure there is no weld protrusion during bending.

In an analogous situation, spiral welded pipe with protruding welds has been regularly bent by industry without adverse safety consequences being caused by the unavoidable placement of the spiral weld inside bending shoes. In the opinion of OPSO, this experience with spiral welds indicates that the existing prohibition against a placement of a girth weld inside a bending shoe is unnecessary. Therefore, OPSO is proposing that the requirement of § 195.212(d) be revoked.

Conformity of bend to ditch.—To provide for uniform pipe stress due to backfilling, § 195.212(b) presently requires that bent pipe conform to the profile of the completed ditch. OPSO believes, however, that in the case of over bends and slack loops conformity to the ditch is not always the best safety practice. Where appropriate, it is safer to install these bends high in the ditch to avoid undue longitudinal stresses which may result from changes in temperature. In addition, § 195.246 also provides for uniform stresses in bend sections due to backfilling by requiring that all pipe installed in a ditch be installed so as to minimize the introduction of secondary stresses. (Gas transmission lines are subject to a similar requirement under § 192.319(a).) Therefore, since it appears that the requirement is both imprudent in certain cases and duplicative, OPSO proposes that § 195.212(b) be deleted.

Editorial changes. Finally, along with other modifications in the proposed amendments set forth hereinafter, the existing restrictions on wrinkle bends and miter bends in § 195.212(c) are proposed to be restated as a new § 195.212(a) and § 195.216, respectively.

Offshore pipelines. On September 17, 1975, OPSO issued Notice 75–4 (40 FR 43740, Sept. 23, 1975), proposing, among other things, to extend the coverage of Part 195, including § 195.212, to offshore liquid gathering lines operated by carriers subject to the Transportation of Explosives Act (18 USC 831). Similarly, by Notice 75–5 (40 FR 45192, Oct. 1, 1975), OPSO proposed to extend the coverage of Part 192, including § 192.313, to offshore gas gathering lines subject to the Hazardous Materials Transportation Act (49 USC 1801). To make this notice consistent with these pending rule making proceedings, OPSO hereby proposes that if §§ 192.313 and 195.212 are amended in accordance with this notice, the amended rules be applied respectively to those offshore gas and liquid gathering lines to which Parts 192 and 195 may apply as a result of the aforementioned proceedings as well as to all other offshore and onshore pipelines to which §§ 192.313 and 195.212 now apply.

In consideration of the foregoing, OPSO proposes to amend Parts 192 and 195 of Title 49 of the Code of Federal Regulations, as follows:

1. By revising § 192.313 to read as follows:

§ 192.313 Bends and elbows.

(a) Each field bend in steel pipe, other than a wrinkle bend made in accordance with § 192.315, must comply with the following—

(1) A bend must not impair the serviceability of the pipe.

(2) For pipe more than 4 inches in nominal diameter, the difference between the maximum and minimum diameter at a bend must not be more than 2½ percent of the nominal diameter.

(3) Each bend must have a smooth contour and be free from buckling, cracks, or any other mechanical damage.

(4) On pipe containing a longitudinal weld, the longitudinal weld must be as near as practicable to the neutral axis of the bend.

(b) Each circumferential weld of steel pipe which is located where the stress during bend causes a permanent deformation in the pipe must be nondestructively tested either before or after the bending process.

(c) Wrought-steel welding elbows and transverse segments of these elbows may not be used for changes in direction on steel pipe that is 2 inches or more in diameter unless the arc length, as measured along the crotch, is at least 1 inch.

2. By revising § 195.212 to read as follows:

§ 195.212 Bending of pipe.

(a) Pipe must not have a wrinkle bend.

(b) Each field bend must comply with the following:

(1) A bend must not impair the serviceability of the pipe.

(2) For pipe more than 4 inches in nominal diameter, the difference between the maximum and minimum diameter at a bend may not be more than 2½ percent of the nominal diameter.

(3) Each bend must have a smooth contour and be free from buckling, cracks, or any other mechanical damage.

(4) On pipe containing a longitudinal weld, the longitudinal weld must be as near as practicable to the neutral axis of the bend.

(c) Each circumferential weld which is located where the stress during bending causes a permanent deformation in the pipe must be nondestructively tested either before or after the bending process.

3. By adding a new § 195.216 to read as follows:

§ 195.216 Welding; miter joints.

A miter joint must not deflect the pipe more than 3°.

4. By adding the following new section heading to the table of sections:

Sec.
195.216 Welding: Miter joints.

Interested persons are invited to participate in this rule-making action by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and notice numbers and be submitted in duplicate to the Director, Office of Pipeline Safety Operations, Department of Transportation, 2100 Second Street, S.W., Washington, D.C. 20590. All communications received by February 16, 1976, will be considered before final action is taken on the notice. Late filed comments will be considered so far as practicable. All comments will be available for examination by interested persons at the Office of Pipeline Safety Operations before and after the closing date for comments. The proposal contained in this notice may be changed in the light of comments received.

Request for information. The existing §§ 192.313(a)(2) and 195.212(c) require that after steel pipe containing a longitudinal weld is field bent, the longitudinal weld must be located near the neutral axis of the bend. This requirement reduces the stress longitudinal welds are subjected to during bending. However, recent technological advances and improved quality control in making longitudinal welds indicate that there may no longer be a technical or metallurgical need for the requirement. Because OPSO does not have enough information to adequately evaluate the current need, an amendment or revocation of the requirement is not now being proposed. Nevertheless, looking toward possible future rule making action, when commenting on this notice, interested persons are invited to address the question of whether §§ 192.313(a)(2) and 195.212(c) should be amended or revoked. Comments suggesting an amendment or revocation should provide justification therefor, such as test data or statistical studies, indicating why it is not necessary from a safety standpoint for longitudinal welds to be located near the neutral axis.

This notice is issued under the authority of Section 3 of the Natural Gas Pipeline Safety Act of 1968 (49 USC 1672); Section 105 of the Hazardous Materials Transportation Act (49 USC 1804); Section 834, Title 18, United States Code, Sec. 6(e)(4) of the Department of Transportation Act (49 USC 1655(e)(4)); § 1.53 of the regulations of the Office of the Secretary of Transportation (49 CFR 1.53), and the redelegation of authority to the Director, Office of Pipeline Safety Operations, set forth in Appendix A to Part 102 of the regulations of the Office of the Director, Materials Transportation Bureau (49 CFR Part 102).

Issued in Washington, D.C., on December 24, 1975.

CESAR DELEON,
Acting Director, Office of Pipeline Safety Operations.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 61]

[FRL 476–1]

NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS

Notice of Public Hearing

Section 112(b)(1)(B) of the Clean Air Act (42 USC 1857c–7(b)(1)(B) directs the Administrator of the Environmental Protection Agency to publish proposed regulations establishing emission standards for hazardous air pollutants together with a notice of public hearing. Such a regulation for vinyl chloride was proposed in the December 22, 1975 issue of the FEDERAL REGISTER.

Notice is hereby given of a public hearing concerning the proposed hazardous emission standards to be held at the following date, time and place:

February 3, 1976, beginning at 9 a.m. e.s.t., at the Environmental Protection Agency, Waterside Mall, 401 M Street, SW., Washington, D.C. 20460, Room 3305.

This hearing is intended to provide opportunity for interested persons to state their views or arguments or to provide information as to: (1) Whether vinyl chloride, when emitted to the ambient air, may cause, or contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; and, if so, (2) what standards should be adopted to regulate emissions of such a pollutant. The Administrator is required, under section 112, to establish standards at the level which in his judgment provides an ample margin of safety to protect the public health from any hazardous air pollutant, unless, on the basis of information presented at the hearings, he finds that such pollutant clearly is not a hazardous air pollutant. Accordingly, participants in the hearings are requested to identify specifically the portion of their presentations, if any, directed to the issue of whether the pollutant in question is or is not a hazardous pollutant, as defined in section 112(a)(1) of the Act.

V 40 251 DEC 31 75 XUM

Mr. Richard J. Denny, Jr., hereby is designated Presiding Officer for the hearing. He will have the responsibility for maintaining order; excluding irrelevant or repetitious material; scheduling presentations; and, to the extent possible, notifying participants of the time at which they may appear. The hearings will be conducted informally. Technical rules of evidence will not apply.

Persons wishing to make a statement at a hearing are requested to file a notice of such intention not later than 15 days prior to the appropriate hearing, if practicable, to submit five copies of the proposed statement to the Administrator of the Environmental Protection Agency, Attention: Robert Perman, Office of Air and Waste Management, (AW 443) Room 945 West, Waterside Mall, 401 M Street, SW., Washington, D.C. 20460.

Dated December 23, 1975.

ROGER STRELOW,
Assistant Administrator,
for Air and Waste Management.

[FR Doc.75-35152 Filed 12-30-75;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[FCC 75-1377; Docket No. 20659, RM-2502]

CAPTIONING OF EMERGENCY MESSAGES ON TELEVISION

Proposed Requirements

1. In a joint petition filed January 20, 1975, four organizations representing persons with impaired hearing requested adoption of rule amendments in Part 73 of the Commission's rules that would require television stations to transmit all emergency notifications visually as well as aurally. Petitioners are:

(1) D.E.A.F.W.A.T.C.H. (Demanding Equal Access to Facts and Warnings Aired on Television for Citizens who are Hearing Impaired)

(2) National Association of the Deaf.

(3) Deafpride, Incorporated.

(4) Alexander Graham Bell Association for the Deaf.

2. Petitioners make reference to a previous petition (RM-1600) filed April 23, 1970, by Mrs. Nancy Lipshultz, on behalf of the Illinois Association of the Deaf TV Committee, which requested that television stations be required to transmit the following types of programing visually as well as aurally.

(1) Emergency weather and news bulletins.

(2) Special programing such as subtitled movies, educational programs and whatever else will help to provide entertainment for the hearing impaired person.

3. While RM-1600 did not generate any immediate rule making or modifications, the Commission did issue a Public notice (FCC 70-1328, December 17, 1970) entitled "The Use of Telecasts to Inform and Alert Viewers With Impaired Hearing", which was distributed to all television licensees. Television licensees were requested to air programing in the above categories visually as well as aurally, on a voluntary basis. The notice further stated, with reference to the Commission's concern with the dearth of programing of value to the hearing impaired,

> We will observe developments in this area in the near future, and if the situation does not develop satisfactorily it may be necessary to begin rule making looking toward the adoption of minimum requirements.

4. The current petition differs from RM-1600 in that it addresses itself exclusively to presentation of visual emergency communications, and does not advocate any other type of special programing.[1]

5. The petitioners claim that currently only approximately 30% of the United States television stations visually duplicate any oral announcements, despite the Commission's plea for voluntary participation in this activity, contained in Public Notice FCC 70-1328. They submit that this does not constitute the "satisfactory development" the Commission should have expected in response to the Public Notice, and that the Commission should therefore proceed with its stated intention to initiate rule making.

6. The petitioners further submit that estimates concerning the number of completely deaf or severely hearing impaired people in the United States vary from 13 million to 24 million. It is asserted that in the more than four years since the Public Notice was issued, more than 2,000 people in the above-mentioned categories have lost their lives in natural or man-made disasters, and that possibly many could have survived had television stations in their areas aired visual messages concerning the existence and nature of the disasters.

7. The petitioners also state that claims have been made that very few hearing impaired persons watch much television, and therefore the transmission of visual warnings would at best effect only a minimal improvement in the broadcast industry's overall warning effectiveness. They counter these claims by presenting data from a recent survey of deaf individuals which represents that 71% of the respondents stated that they "usually watch television," and 65% of the total further stated that they watch "six or more hours on weekends." [2]

8. The petitioners are aware that all television stations do not possess electronic captioning equipment, and that cost of this equipment is such that it may impose unreasonable economic hardships upon low-budget stations. For these they suggest alternative methods of transmitting visual messages containing essential emergency information, including, but not necessarily limited to, the following:

(1) Pre-prepared slides listing the general nature of natural emergencies, e.g., tornado, hurricane, flood, etc. The Council on Community Preparedness of the National Weather Service has offered to make low-cost slides containing generalized emergency weather information available to broadcasters. Also it is recommended that the appropriate standard messages (altering, standby script, termination) contained in the Check Lists for the Emergency Broadcast System (EBS) be reproduced on slides.

(2) Blackboard, or easel with black vinyl backing, on which messages with current updated emergency information can be written in white. It is preferable that preset, prefocused cameras be used with these.

(3) Preparation and transmission of updated information typed on cards, as emergency situation changes.

(4) In conjunction with the visual emergency messages, the petitioners urge that an audio tag be added to spoken warning messages, requesting viewers to inform any known deaf or blind persons in the vicinity concerning the emergency in the event they are not watching (or listening to) television at the time.

9. The petitioners express a preference for presenting visual messages by written captioning over the other two options of lipreading or presenting sign language. They point out that the understanding of lipreading and/or sign language is generally limited to people who became deaf or severely hearing impaired early in life and have had special training in these techniques. In contrast to this, they state that a recent study [3] has indicated that a large majority of the deaf and hearing impaired population is proficient at reading the written or printed word, and that their average educational level is only one year below the national average. In addition, they aver, the value of lipreading is limited as a means of communication, since only 25 percent of spoken English can be ascertained from the lips; the other 75 percent must be guessed from the context of the conversation. One complication associated with sign language (signing) is that a station may not have a signer available on the premises when a fast breaking emergency occurs. In addition, signing is hard to understand when reduced to the size of a normal television screen, and because the language of signs is three dimensional, it is not well suited to the two dimensional television screen.

10. The Commission concludes that in view of the limited voluntary compliance with the request contained in Public Notice FCC 70-1328, rule amendments requiring mandatory transmission of visual emergency notifications on television would serve the public interest, convenience and necessity. The petition includes some suggested rule language which the Commission propose to retain in part. However, certain of petitioners requested operational procedures, set forth below, will not be included for the reasons to be stated:

[1] To the extent RM-1600 seeks, inter alia, visual transmission of emergency information, this Notice is to be considered as in response to that petition.

[2] Freebain, T., Television for Deaf People: Selected Projects D37 (1974).

[3] Delk, M. and Schlein, J., The Deaf Population of the United States (1974).

(a) With reference to the possible methods of presenting visual notifications, petitioners propose the following:

> (Television) station shall at all times be prepared to utilize one suitable method and at least one back-up method. The methods and procedures to be used shall be predetermined, included in the operator's manual, and available for public inspection. They shall be posted prominently, both in the control room and in at least one newsroom, and all persons authorized to transmit emergency bulletins shall be informed of these procedures.

The Commission is of the view that licensees should be allowed more discretion and operational flexibility concerning methods of displaying instructions concerning transmission of visual notifications, in view of the variations that exist in the location and layout of the operating areas in different television transmitter and studio buildings. Also, our regulations do not require broadcast stations to have "operator manuals", and should a station possess a document that qualifies for such a designation, it has undoubtedly been specially designed for the operational convenience of the personnel of the individual station. It is also deemed undesirable to promulgate a rule that would give the public unrestricted access to a television broadcast station for the purpose of inspecting its operating procedures with respect to presentation of visual emergency notifications, and this could well cause undue disruption to the station's daily administrative and operational routines. The Commission's field offices are charged with responsibility for inspecting all classes of Commission-licensed broadcast stations within their respective areas of jurisdiction, and station inspections include a determination of whether the applicable rules are being complied with.

(b) In discussing requested modifications of operational procedures for the Emergency Broadcast System (EBS), petitioners urge that ". . . the EBS should prepare a slide to be distributed to all radio stations . . .", and state that, ". . . many EBS broadcasts originate from a central control point rather than from individual stations, and therefore the content and form is beyond the control of local stations. Any visual message must, accordingly, be transmitted by EBS officials. The proposal directs the EBS to immediately initiate procedures for transmitting visually the same information that is transmitted aurally. . . .". In addition the proposal in the petition ". . . directs state and local EBS officials to also broadcast in visual form all information that is transmitted aurally, whether as a result of rule making or internal decision of the EBS."

11. While the language may be subject to other interpretation, it is assumed that the references to "the EBS", "EBS officials" and "state and local EBS officials" mean the applicable disaster control authorities at the national, state or operational area levels, who will be broadcasting pertinent survival information from some "command post" such as a civil defense emergency operating center (EOC), Weather Bureau office, etc.

12. Normally, these disaster control authorities are not FCC broadcast licensees, and the Commission cannot direct them to undertake any of the actions quoted above. Moreover, we have repeatedly cautioned our EBS broadcast licensees that they are solely responsible for all program material originating from their stations, and that even during periods when EBS operational procedures are in effect, it is their responsibility to evaluate the content of the emergency information being broadcast, and discontinue the program should they encounter material that they deem inappropriate or contrary to our rules and policies.

13. At present, it is not possible to originate video communications from EBS program origination points because only audio program channels interconnect these points with the participating stations. National-level EBS programing is afforded nationwide distribution via all of the major radio networks but only on the audio channels of the major television networks. State-level programing is normally distributed throughout the state via a network of FM stations that perform off-the-air reception and relay broadcast of an originating FM station in the vicinity of the state civil defense EOC, this station in turn being connected to the EOC by a wire or radio program channel. This material is subsequently received off the air by other participating standard, FM and TV broadcast stations, from whichever network FM stations afford best reception, and they rebroadcast this for reception by their individual listening audiences. Operational Area (local) programing is fed to a designated key program distribution station from the civil defense EOC responsible for Area program origination, by wire or radio program channel for broadcast, and other participating stations in the Area perform off-the-air pickup and rebroadcast of the key program distribution station. Thus, participating television stations would have to individually originate pertinent visual messages containing essential emergency information, either by one or more of the methods previously discussed, or other appropriate methods that would yield the same end results. In any event, these problems would not arise where a station is rendering emergency service independently of the EBS under § 73.675 of the rules.

14. The petitioners also submit suggested modifications to the EBS Check Lists, designed to bring them into conformity with the rules, if amended. We propose to defer this matter for the present, so that such changes may be reviewed by the National Industry Advisory Committee (NIAC), in light of whatever rules are adopted if we find it in the public interest to adopt rules in this area. Such rules, of course might differ somewhat from those proposed.

15. Finally, we note that on November 6, 1975, the Public Broadcasting Service (PBS) filed a petition for rulemaking to establish transmission standards governing closed captioning for the deaf. The proposal goes considerably beyond emergency communications uses, and would include abbreviated narrative captioning for programming generally. The proposed system has been field-tested by PBS in conjunction with Gallaudet College, and employs line 21 of the vertical interval. It would not be seen on conventional television receivers, and requires the use of a special decoder. We are aware of possible problems of incompatibility arising from the simultaneous use of open and closed captioning systems during a single emergency, and propose to take this into account in connection with any further action on the PBS petition.

16. We invite comments and reply comments on the amendments as proposed in the appendix, and on the points we have discussed.

17. Authority for the adoption of the amendments proposed herein is contained in sections 1, 4(i), 4(o), 303(g) and 303(r) of the Communications Act of 1934, as amended.

18. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before January 29, 1976, and reply comments on or before February 9, 1976. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching the decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by the Notice.

19. In accordance with the provisions of § 1.419 of the rules, an original and 11 copies of all comments, reply comments, pleadings, briefs and other documents shall be furnished the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W. Washington, D.C.

Adopted: December 16, 1975.

Released: December 22, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

1. In § 73.675, paragraphs (b), (c), (d), (e), and (f) are redesignated as (c), (d), (e), (f), and (g) and a new paragraph (b) is added as follows:

§ 73.675 Operation during emergency.

* * * * *

(b) Any emergency information transmitted in accordance with this section shall be transmitted both aurally and visually. Television broadcast stations may use any method of visual presentation which results in a message easily being readable on the receiver's television screen, and which conveys the essential information contained in the aural bulletin. Methods which may be used include, but are not necessarily limited to, electronic captioning, manual methods (i.e., hand printing), or mechanical printing processes. If emer-

V40251 DEC 31 75 XUM

gency operation is contemplated under a Detailed State Emergency Broadcast System (EBS) Operational Plan, slides should be prepared setting forth National, State and Operational Area Emergency Action Notification messages, National Emergency Standby Script, and Emergency Action Termination message, as set forth in the appropriate EBS Check List. It is also advisable to have previously prepared slides stating the general nature of natural emergencies, e.g., tornadoes, hurricane, flood, etc. These slides shall be stored in such a manner that they are readily available, and all responsible operating personnel shall be made aware of their existence and location. Both the aural and visual transmission of all emergency notification messages shall conclude with the following request: "If you have hearing-impaired or blind friends or neighbors, please pass this information on to them."

• • • • • •

2. Section 73.933(b)(4), is revised and note deleted to read as follows:

§ 73.933 Emergency Broadcast System (EBS) operation during a national level emergency.

• • • • • •

(b) • • •

(4) Discontinue normal program and broadcast the following announcement (television stations shall also transmit this and subsequent emergency announcements visually in the manner described in section 73.675(b) of this part): "We interrupt this program. This is a National Emergency. Important instructions will follow. If you have hearing-impaired or blind friends or neighbors, please pass this information on to them."

• • • • • •

3. Sections 73.936(d)(3) is revised and note deleted, and (d)(5) is revised to read as follows:

§ 73.936 Emergency Broadcast System (EBS) operation during a state-level emergency.

• • • • • •

(d) • • •

(3) Discontinue normal program operation and broadcast the following announcement (television stations shall also transmit this and subsequent emergency announcements visually in the manner described in section 73.675(b) of this part): "We interrupt this program because of a statewide emergency. Important information will follow. If you have hearing-impaired or blind friends or neighbors, please pass this information on to them."

• • • • • •

(5) All licensees participating in the State-Level EBS will make the announcement as set forth in the EBS Checklists. Stations broadcasting primarily in a foreign language shall repeat the announcement in that language.

4. Sections 73.937(d)(3) is revised and note deleted, and (d)(5) is revised to read as follows:

§ 73.937 Emergency Broadcast System (EBS) operation during an operational (local) area emergency.

• • • • • •

(d) • • •

(3) Discontinue normal program operation and broadcast the following announcement (television stations shall also transmit this and subsequent emergency announcements visually in the manner described in section 73.675(b) of this part): "We interrupt this program because of a local emergency. Important information will follow. If you have hearing-impaired or blind friends or neighbors, please pass this information on to them."

• • • • • •

(5) All licensees participating in the Operational (Local) Area-Level EBS will make the announcement as set forth in the EBS Checklists. Stations broadcasting primarily in a foreign language shall repeat the announcement in that language.

FEDERAL RESERVE SYSTEM

[12 CFR Parts 211, 213 and 225]

[Regs. K, M and Y]

CORPORATIONS ENGAGED IN FOREIGN BANKING AND FINANCING UNDER THE FEDERAL RESERVE ACT; FOREIGN ACTIVITIES OF NATIONAL BANKS; BANK HOLDING COMPANIES

Proposed Statement of Policy on Stock Interests in Foreign Joint Ventures

The Board of Governors proposes to adopt a general statement of policy on the acquisition of stock interests in foreign joint ventures by U.S. banking organizations, which policy it would apply to applications requiring its specific consent under sections 25 and 25(a) of the Federal Reserve Act, and section 4(c)(13) of the Bank Holding Company Act of 1956, as amended. Accordingly, the policy would apply to applications requiring specific consent under the Board's Regulation K (for Edge or Agreement Corporations), Regulation M (for member banks), and Regulation Y (for bank holding companies).

In general, when a member bank or a corporation organized under section 25 (a) of the Federal Reserve Act (an "Edge" corporation), or operating pursuant to an agreement with the Board under section 25 thereof (an "Agreement" corporation), or a bank holding company requests the Board's specific consent to acquire the stock or other certificates of ownership of a foreign joint venture, which is defined to mean a situation in which a U.S. banking organization with a minority share interest participates directly or indirectly in the overall management of a foreign corporation, the Board considers the degree of legal and practical business responsibility the U.S. banking organization will bear for the financial condition and operations of the foreign joint venture in foreign and international financial markets. In the Board's judgment, this factor is relevant in assessing what effects the proposed investment may have on the financial and managerial resources of the applying U.S. banking organization.

Based on the recent experience of certain foreign joint ventures in foreign and international financial markets, the Board has found that a U.S. banking organization may, in certain circumstances, feel impelled for business reasons to provide financial support to a foreign joint venture in which it has an equity interest in the event the venture has liquidity or other financial needs. This support may be substantially in excess of the U.S. banking organization's original equity investment and may, in some situations, be well in excess of its *pro-rata* share.

The Board therefore proposes to adopt the general policy that, in considering applications by U.S. banking organizations to invest in foreign joint ventures, it will take into account the possibility that the applicant may feel impelled for business reasons to provide financial support for such foreign joint venture in the event the venture has liquidity or other financial needs, and that such support could be significantly greater than the amount of its proposed equity investment. The Board would therefore consider such application in light of the relative ability of the applicant to meet the demands that such potential support could place on its financial and managerial resources. In doing so, the Board would take into consideration the risks associated with the total assets and liabilities of the foreign corporation and its projected expansion, and not merely the size of the proposed equity investment by the applicant.

If, however, in the case of any such proposed joint venture investment, the U.S. banking organization could establish on the record that it had reached an agreement or arrangement whereby its support of the proposed joint venture in the event of liquidity or other financial needs would be limited to its initial equity investment or to some fixed amount, or would be shared *pro-rata* or otherwise with the other shareholders, or would otherwise be limited, the Board would consider the application and the risks associated therewith on the basis of this additional information.

This proposed general statement of policy is not intended to prohibit or discourage investments by U.S. banking organizations in foreign joint ventures, which can be a useful form of corporate organization in appropriate circumstances; rather, due to the difficulty of ascertaining the precise risks undertaken in joint venture investments, its primary purpose would be to clarify for all parties concerned the probable dimensions of risks assumed in any particular investment. Thus, even if an applicant proposed to assume a disproportionate share of the risks in any joint venture, e.g., agreed to stand behind more than its *pro-rata* share of the joint venture's obligations, the Board might be willing to approve the investment if the applicant's financial and managerial resources could bear this additional risk and if other factors indicated that approval would be consistent with the public interest and the governing statute and regulations.

This proposed general statement of policy would apply primarily to proposed investments by U.S. banking organizations in the stock of foreign corporations in which they did not already have an equity investment. Applications involving an additional investment in an ongoing foreign joint venture would continue to be considered by the Board on the basis of outstanding facts and circumstances. The Board would in the case of any ongoing foreign joint venture consider carefully the amount of support, if any, that was being provided by the applicant to the venture and any agreement or arrangement among the joint venturers for the provision of any future support.

Pursuant to this proposal, Parts 211, 213, and 225 of Title 12 would be amended by adding the following new sections:

§ 211.52 Statement of policy on stock interests in foreign joint ventures.

In general, when a member bank or a corporation organized under section 25 (a) of the Federal Reserve Act (an "Edge" corporation), or operating pursuant to an agreement with the Board under section 25 thereof (an "Agreement" corporation), or a bank holding company requests the Board's specific consent to acquire the stock or other certificates of ownership of a foreign corporation that will be jointly-owned by the U.S. banking organization and other foreign or domestic participants (hereinafter referred to as a "foreign joint venture"[1]), the Board considers the degree of legal and practical business responsibility the U.S. banking organization will bear for the financial condition and operations of the foreign joint venture in foreign and international financial markets. In the Board's judgment, this factor is relevant in assessing what effects the proposed investment may have on the financial and managerial resources of the applying U.S. banking organization.

[1] The term "foreign joint venture" is used to describe a situation in which a U.S. banking organization with a minority share interest participates, directly or indirectly, in the overall management of the corporation and thus has an active operating interest. A purely passive minority investment in a foreign corporation will not be deemed a "joint venture" investment for purposes of this statement of policy. This "joint venture" determination will be made on the basis of the facts and circumstances of each case.

Based on the recent experience of certain foreign joint ventures in foreign and international financial markets, the Board has found that a U.S. banking organization may, in certain circumstances, feel impelled for business reasons to provide financial support[2] to a foreign joint venture in which it has an equity interest in the event the venture has liquidity or other financial needs. This support may be substantially in excess of the U.S. banking organization's original equity investment and may, in some situations, be well in excess of its *pro-rata* share. This has seemed most likely to occur in situations where (1) the foreign joint venture has included in its name a reference to the U.S. banking organization, (2) the U.S. banking organization or its affiliates has consistently provided financial support to the foreign corporation in amounts significantly beyond usual commercial limits or significantly disproportionate to its *pro-rata* stock interest, or (3) as the result of substantial managerial support furnished by the U.S. banking organization under a contract or other arrangement, the foreign corporation has been publicly identified as or considered to be, sometimes with the active encouragement of the U.S. banking organization, an integral part of the U.S. banking organization's international operations.

Accordingly, the Board, in considering applications by U.S. banking organizations to invest in foreign joint ventures, will, as a matter of policy, take into account the possibility that the applicant may feel impelled for business reasons to provide financial support for such foreign joint venture in the event the venture has liquidity or other financial needs, and that such support could be significantly greater than the amount of its proposed equity investment. The Board will therefore consider such application in light of the relative ability of the applicant to meet the demands that such potential support could place on its financial and managerial resources. In doing so, the Board will take into consideration the risks associated with the total assets and liabilities of the foreign joint venture and its projected expansion, and not merely the size of the proposed equity investment by the applicant. In particular, the Board will give great weight to these potential risks and their implications for the applicant in cases where the applicant proposes (1) to include a reference to its name in that of the foreign joint venture, (2) to provide general funding support to the foreign joint venture in amounts disproportionate to its *pro-rata* stock interest, or (3) to provide virtually all of the management for such foreign joint venture.

If, however, in the case of any such proposed joint venture investment, the U.S. banking organization can establish on the record that it has reached an agreement or arrangement whereby its support of the proposed joint venture in the event of liquidity or other financial needs will be limited to its initial equity investment or to some fixed amount, or will be shared *pro-rata* or otherwise with the other shareholders, or will otherwise be limited, the Board will consider the application and the risks associated therewith on the basis of this additional information.

This statement of policy is not intended to prohibit or discourage investments by U.S. banking organizations in foreign joint ventures, which can be a useful form of corporate organization in appropriate circumstances; rather, due to the difficulty of ascertaining the precise risks undertaken in joint venture investments, its primary purpose is to clarify for all parties concerned the probable dimensions of risks assumed in any particular investment. Thus, even if an applicant proposes to assume a disproportionate share of the risks in any joint venture, e.g., agrees to stand behind more than its *pro-rata* share of the joint venture's obligations, the Board might be willing to approve the investment if the applicant's financial and managerial resources could bear this additional risk and if other factors indicated that approval would be consistent with the public interest and the governing statute and regulations.

The Board further notes that any action that it might take on an application should not be viewed or relied upon by the applying U.S. banking organization, other participants in the venture, or any third party as constituting approval or disapproval, or ratification or rejection of any agreement or arrangement that may have been entered into by the shareholders of a foreign joint venture; specifically, any Board action should not be viewed as constituting any expression of judgment as to the validity or enforceability of any such agreement or arrangement. Any agreement or arrangement will, rather, be merely one among many factors considered by the Board in deciding an application.

This statement is intended to apply primarily to proposed investments by U.S. banking organizations in the stock of foreign corporations in which they do not already have an equity investment. Applications involving an additional investment in an ongoing foreign joint venture will continue to be considered by the Board on the basis of outstanding facts and circumstances. The Board will, in the case of any ongoing foreign joint venture consider carefully the amount of support, if any, that is being provided by the applicant to the venture and any agreement or arrangement among the joint venturers for the provision of any future support.

§ 213.52 Statement of policy on stock interests in foreign joint ventures.

For text of interpretation, see § 211.52 of this chapter.

[2] As used herein, the term "support" includes, without limitation, contributions to capital, purchase (or causing the purchase) from the foreign corporation of loans or securities, making (or causing the making) of loans to the foreign corporation, and the making (or causing the making) of deposits in the foreign corporation.

V 40 251 DEC 31 75 XUM

§ 225.51 Statement of policy on stock interests in foreign joint ventures.

For text of interpretation, see § 211.52 of this chapter.

* * * * *

Since general statements of policy are exempt from the public notice provisions of the Administrative Procedure Act (5 U.S.C. § 553(b)), the Board usually does not provide opportunity for the submission of public comments on statements of policy adopted and published in the FEDERAL REGISTER. The Board, however, believes that interested persons should have an opportunity to comment on the proposed statement of policy concerning stock interests in foreign joint ventures because of its possible effects on proposed joint venture investments that currently may be being negotiated by U.S. banking organizations, and because of possible reactions to such a statement in foreign and international financial markets. In particular, the Board is interested in receiving comments on the appropriateness or effectiveness of any such statement, and any effects it could have on the foreign commerce of the United States. Thus, to aid in the consideration of the proposed statement of policy on stock interests in foreign joint ventures, interested persons are requested to submit relevant data, views, or arguments. Any such material should be submitted in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than January 24, 1976. Such material will be made available for inspection and copying upon request, except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information.

By order of the Board of Governors, December 23, 1975.

[SEAL] THEODORE E. ALLISON, *Secretary of the Board.*

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Parts 240, 249]

[Release 34-11876, File No. S7-604]

REGULATION OF MUNICIPAL SECURITIES PROFESSIONALS AND TRANSACTIONS IN MUNICIPAL SECURITIES

Proposed Rulemaking

As published at 40 FR 57357 (December 9, 1975) the Commission announced the adoption of § 240.23a-1(T), effective December 1, 1975, which suspends, until March 1, 1976, the operation of certain Commission rules, in whole or in part, in order to prevent the application of those rules to the activities of certain municipal securities professionals (who otherwise would become subject to those rules on December 1, 1975) pending consideration of certain proposed amendments to existing rules as contained herein. The proposed amendments and additions to rules discussed herein should, therefore, be read in conjunction with § 240.230-1(T), as adopted.

The Commission hereby gives notice of proposed amendments to §§ 240.10b-3, 240.10b-16, 240.15b1-3, 240.15b8-1, 240.15b8-2, 240.15b9-1, 240.15b9-2, 240.15c1-1, 240.15c1-3, 240.15c1-4, 240.15c1-5, 240.15c1-6, 240.15c1-7, 240.15c1-8, 240.15c2-4, 240.15c2-5, 240.15c2-7 and 240.15c2-11; and proposed §§ 140.15b10-12, 240.15Ba2-4, 240.15Ba2-5, 240.15Ba2-6, 240.15Bc3-1 and 240.17a-21; and invites comments thereon. The proposals concern the regulation of municipal securities brokers, municipal securities dealers and transactions in municipal securities, as well as reporting requirements for the Municipal securities Rulemaking Board ("MSRB").

A. *Regulatory pattern for municipal securities prior to the Securities Acts amendments of 1975*[1] *(the "1975 Amendments").* Prior to the 1975 Amendments, municipal securities were "exempted securities" for all purposes under the Act, and any section thereunder which by its terms did not apply to an "exempted security" was inapplicable to municipal securities or brokers and dealers effecting transactions only in municipal and other exempted securities. In addition, banks acting as dealers in municipal securities were not within the purview of the Act. Thus, for example, brokers and dealers effecting transactions solely in municipal and other exempted securities, and banks acting as dealers in municipal securities, were not subject either to the registration requirements of section 15,[2] or to the recordkeeping requirements of section 17.[3] In addition, the Commission's rules, promulgated under section 15(b) (15 U.S.C. 78o(b)), applicable to transactions effected by registered brokers and dealers who are not members of the National Association of Securities Dealers, Inc. (the "NASD") (hereinafter referred to as "SECO rules") were inapplicable to transactions in municipal securities effected by brokers and dealers which confined their activities to municipal and other exempted securities.

Similarly, brokers and dealers effecting transactions solely in municipal and other exempted securities were exempt from certain of the anti-fraud and financial responsibility sections of the Act (and the rules and regulations thereunder). Both section 15(c)(2) (15 U.S.C. 78o(c)(2)), which prohibits brokers and dealers from engaging in fraudulent, deceptive or manipulative acts or practices or making any fictitious quotation, and section 15(c)(3) (15 U.S.C. 78o(c)(3)), which prohibits brokers and dealers from acting in contravention of Commission rules and regulations regarding financial responsibility and related practices, as well as rules promulgated pursuant to those sections, were in applicable to transactions in municipal securities since those sections by their terms excluded "exempted securities."[4]

Certain other of the anti-fraud provisions of the Act, such as § 240.10b-5, have applied (and presently apply) to transactions in municipal securities by any person. Certain of the rules under section 10(b) (15 U.S.C. 78j(b)), however, have been, and continue to be, limited in their application to transactions by brokers and dealers and do not apply to transactions by other persons (e.g., §§ 240.10b-3 and 240.10b-16); such rules, therefore, have not applied (and, absent amendment, will not apply) to transactions effected by banks acting as dealers. Of the section 10(b) series of rules, only § 240.10b-4 (which applies only to short tendering in tender offers), §§ 240.10b-6 and 240.10b-7 (which expressly exclude transactions in "exempted securities"), § 240.10b-13 (which by its term applies only to equity securities), and § 240.10b-17 (which is inapplicable to ordinary interest payments on a debt security) have not applied (and, absent amendment, will not apply) to transactions in municipal securities.

Rules adopted pursuant to section 15(c)(1) of the Act (15 U.S.C. 78o(c)(1)) have always applied to transactions in municipal securities effected by brokers and dealers (but not by banks or their separately identifiable departments or divisions acting as dealers), since that section does not expressly exclude (as to sections 15(c)(2) and 15(c)(3) (15 U.S.C. 78o(c)(2) and 78o(c)(3)) transactions in "exempted securities." Thus, for example, brokers and dealers (but not banks or their separately identifiable departments or divisions acting as dealers) effecting transactions in municipal securities have been and are presently required to send written confirmations to customers (§ 240.15c1-4) and to avoid churning of customers' accounts (§ 240.-15c1-7).

B. *Changes effected by the 1975 amendments.* The 1975 amendments altered the pattern of regulation of municipal securities by making several major changes in the Act. The first is the addition of a new Section 15B to the Act, (15 U.S.C. 78o-4), which provides for registration of municipal securities dealers (including banks and separately identifiable departments or divisions of banks),[5] effective December 1, 1975, and establishes a new self-regulatory organization, the MSRB, to adopt rules governing municipal securities trading and the activities of municipal securities brokers and municipal securities dealers.[6]

The second major change involved amendment of certain of the definitions contained in section 3(a) of the Act (15 U.S.C. 78c(a)). In particular, the term "exempted security" as defined in section 3(a)(12) (15 U.S.C. 78c(a)(12)) was modified, effective December 1, 1975, to provide that:

> municipal securities shall not be deemed to be "exempted securities" for the purpose of Sections 15, 15A (except subsections (b)(6), (b)(11) and (g)(2) thereof) and 17A of [the Act].[7]

In addition, new definitions for municipal securities professionals were added to the Act in sections 3(a)(30) and 3(a)(31) respectively (15 U.S.C. 78c(a)(30) and 78c(a)(31)): (i) "municipal securities dealer," which includes all "dealers" in municipal securities (as the term is defined in section 3(a)(5) of the Act (15 U.S.C. 78c(a)(5)) and all banks, and separately identifiable departments and divisions of banks, engaged in the business of buying and selling municipal securities for their own accounts otherwise than in a fiduciary capacity; and (ii) "municipal securities broker," which includes all "brokers" in municipal securities (as that term is defined in section 3(a)(4) of the Act (15 U.S.C. 78c(a)(4))).[8]

Finally, the 1975 Amendment's expanded the Commission's rulemaking authority with respect to municipal securities professionals and transactions in municipal securities. Section 15(c)(1) and 15(c)(2) of the Act (15 U.S.C. 78o(c)(1) and 78o(c)(2)), with respect to manipulative, deceptive and fraudulent acts, practices, devices and contrivances, were amended, effective June 4, 1975, to give the Commission explicit rulemaking authority with respect to the municipal securities dealers (including banks) which "make use of the [jurisdictional means] to effect any transaction in, or to induce or attempt to induce the purchase or sale of, any municipal security * * *" Section 17(a) of the Act (15 U.S.C. 78o(c)(1) and 78o(c)(2)) was also amended, effective June 4, 1975, to give the Commission explicit authority to prescribe records to be maintained and reports to be disseminated by municipal securities dealers and the MSRB.

C. *Regulatory Pattern on December 1, 1975.* The result of these changes will be that, on December 1, 1975, absent Commission action:

(i) Brokers and dealers effecting transactions in municipal securities would become subject to all of the Commission's existing rules under sections 15(c)(2) and 15(c)(3) (15 U.S.C. 78o(c)(1) and 78o(c)(2)) with respect to such transactions for the first time. Because, however, those rules apply only to "brokers" and "dealers" at the present time, and not to all "municipal securities dealers," banks and their separately identifiable departments or divisions would not be covered by those rules.

(ii) Rules promulgated under sections 10(b) (15 U.S.C. 78j(b)) and 15(c)(1) (15 U.S.C. 78o(c)(1)) of the Act which currently apply to transactions in municipal securities effected by brokers and dealers would continue to apply to brokers and dealers, but not to banks (or separately identifiable departments or divisions of banks). Rules and regulations under Sections 10(b) and 15(c)(1) which are not limited in their application to brokers and dealers and which do not exclude transactions in "exempted securities," as defined in Section 3(a)(12) (e.g., §§ 240.10b-5 and 240.15c1-2), would continue to apply to all transactions in municipal securities by any person (for Section 10(b) rules), or by any broker, dealer or municipal securities dealer (for Section 15(c)(1) rules);[9]

(iii) Rules under section 15(b) of the Act (15 U.S.C. 78o(b)) currently applicable to registered brokers and dealers which are not members of the NASD, such as rules governing suitability and handling of discretionary accounts, would also apply to municipal securities brokers and dealers (other than banks and separately identifiable departments or divisions of banks) which are not members of the NASD;[10] and

(iv) Recordkeeping and reporting rules under Section 17(a) of the Act (15 U.S.C. 78o(c)(1)) of the Act which currently apply to transactions in municipal securities effected by brokers and dealers would continue to apply to brokers and dealers, but not to banks (or separately identifiable departments or divisions of banks). Rules and regulations under Sections 10(b) and 15(c)(1) which are not limited in their application to brokers and dealers and which do not exclude transactions in "exempted securities," as defined in Section 3(a)(12) (e.g., §§ 240.10b-5 and 240.15c1-2), would continue to apply to all transactions in municipal securities by any person (for Section 10(b) rules), or by any broker, dealer or municipal securities dealer (for Section 15(c)(1) rules);[9]

(iii) Rules under section 15(b) of the Act (15 U.S.C. 78o(b)) currently applicable to registered brokers and dealers which are not members of the NASD, such as rules governing suitability and handling of discretionary accounts, would also apply to municipal securities brokers and dealers (other than banks and separately identifiable departments or divisions of banks) which are not members of the NASD;[10] and

(iv) Recordkeeping and reporting rules under Section 17(a) of the Act

---

[1] Pub L. 94-29 (June 4, 1975)

[2] 15 U.S.C. 78o.

[3] 15 U.S.C. 78q.

[4] On November 20, 1975, the Commission adopted certain amendments relating to the financial responsibility rules under the Act, and announced certain other actions in connection with related recordkeeping rules. *See* Securities Exchange Act Release No. 11854 (November 20, 1975) (40 FR 57786).

[5] The Commission has already taken action with respect to the registration of municipal securities brokers and municipal securities dealers. In Securities Exchange Act Release No. 11585 (August 11, 1975) (40 FR 37228), the Commission (i) announced that nonbank municipal securities professionals would be required to register on Form BD (§ 249.501); (ii) proposed the adoption of §§ 240.15Ba2-1 and 2 (concerning registration of bank municipal securities dealers and non-bank municipal securities dealers whose business is exclusively intrastate); and (iii) proposed Form MSD for bank registrants. After considering the comments received, the Commission issued Securities Exchange Act Release No. 11742 (October 15, 1975) (40 FR 49772), adopting §§ 240.15Ba2-1 and 240.15 Ba2-2, and two temporary rules, §§ 240.15Ba 2-3(T) and 240.15a-1(T), which provide a grace period for new registrants, under specified conditions, from the requirement that all municipal securities professionals be effectively registered by December 1, 1975. That release also adopted Form MSD (§ 249.950), with amendments to provide for its use by separately identifiable departments and divisions of banks. Simultaneously, in Securities Exchange Act Release No. 11741 (October 15, 1975) (40 FR 49420), the Commission put into effect summarily, pursuant to Section 19(b)(8)(B) of the Act (15 U.S.C. 78s(b)(8)(B)), certain rules of the MSRB, including a rule defining the term "separately identifiable department or division" of a bank.

[6] To date, the MSRB has filed with the Commission tweny-three rules adopted under Section 15B(b) of the Exchange Act (15 U.S.C. 78o-4(b)), all but one of which are housekeeping rules, establishing administrative procedures and providing for the payment by registrants of an initial fee to the MSRB. The one substantive rule, as indicated in note 5 *supra*, established a definition of the term "separately identifiable department or division" of a bank.

[7] Section 3(a)(12) of the Act, as amended by the 1975 Amendments, contains a typographical error insofar as it literally provides that, for purposes of Section 15A(g)(2) (granting power to deny membership on the basis of statutory disqualifications) municipal securities are "exempted securities." The proper section reference should have been to Section 15A(g)(3) (15 U.S.C. 78o-3(g)(3)) (granting authority to deny membership based on operational and professional qualifications), for the reasons discussed below.

Since Section 15A(f) of the Act provides that "[n]othing in this section shall be construed to apply with respect to any transaction . . . in any exempted security," Section 3(a)(12), as written, would prohibit the NASD from denying membership in that organization to persons subject to a statutory disqualification, while granting the NASD the power to establish operational and professional qualifications. In fact, the opposite result was intended by the Congress, as evidenced by the fact that (1) In S. 2474, the predecessor bill to the 1975 Amendments, the definitional section was drafted so that the NASD could not deny membership based on operational and professional qualifications (*see* S. 2474, § 1, 93d Cong., 2d Sess. 1974), and (2) the MSRB was given the rulemaking authority with respect to the establishment of standards of operational capability (*see* Section 15B(b)(2)(A) of the Act) (15 U.S.C. 78o-4(b)(2)(A)).

Legislation which would make certain technical amendments to the 1975 Amendments, including correcting the typographical error, has been introduced in the 94th Congress. In the meantime, the NASD is proceeding as if the error had been corrected.

[8] In contrast with the change in the definition of "exempted security," the definitions in Sections 3(a)(30) and 3(a)(31) were effective on June 4, 1975, the date of enactment of the 1975 Amendments.

[9] Both the amendment to Section 15(c)(1) of the Act which extended the Commission's rulemaking authority to define "manipulative, deceptive, or other fraudulent device or contrivance" to include activities of municipal securities dealers, and the definition of municipal securities dealers in Section 3(a)(30) of the Act, became effective on June 4, 1975, the date of enactment of the 1975 Amendments. *See* Secton 31(a) of the 1975 Amendments (89 Stat. 170). As a result, those rules under Section 15(c)(1) which are not limited in their application to brokers and dealers, such as §§ 240.15c1-2 and 240.15c1-6, became immediately applicable to the activities of municipal securities dealers (including banks and their departments and divisions acting as dealers).

[10] Since the NASD has no power to adopt similar rules governing transactions in municipal securities, transactions in municipal securities effected by municipal securities brokers and municipal securities dealers which are NASD members would not be subject to any rules in these areas. Banks (and separately identifiable departments or divisions of banks) also would not be subject to rules in these areas, since neither the Commission (directly) nor the NASD has rulemaking authority over banks to establish just and equitable principles of trade.

Unless amended, after December 1, 1975, the SECO rules unler Section 15(b) would have to be complied with by all municipal securities brokers and dealers (other than banks and departments or divisions thereof) even prior to the effectiveness of registration by such persons because the temporary exemptions from the requirement that such registrations be effective provided by § 240.15a-1(T) and § 240.15a2-3(T) for municipal securities brokers and municipal securities dealers which have filed applications for registration by November 30, 1975 are conditioned on compliance with all other provisions of the Act, including the rules and regulations promulgated thereunder, as if they were effectively registered.

V40251 DEC 31 75 XUM

(15 U.S.C. 78q(a)) currently applicable to registered brokers and dealers would also apply to registered municipal securities brokers and municipal securities dealers effecting transactions solely in municipal securities (other than banks and separately identifiable departments or divisions of banks).[11]

D. *Municipal securities rulemaking board.* Under the novel self-regulatory pattern established by the 1975 Amendments, the MSRB has primary rulemaking authority with respect to the activities of municipal securities dealers and transactions in municipal securities,[12] subject to Commission approval in the same manner as are the rules of other self-regulatory organizations.[13] The Commission has the authority to alter or supplement rules of the MSRB in any manner consistent with the purposes of the Act.[14] However, the legislative history clearly indicates that

> [t]he Board is intended to be the primary medium for regulation of the municipal securities industry and should be furnished ample opportunity to develop responsible rules for the industry.[15]

Nevertheless, the authority lodged in the MSRB was not designed to supplant or curtail the Commission's powers under the Act. Section 15B(b)(3) (15 U.S.C. (78o–4(b)(3)), for example, specifically provides that "[nothing in Section 15B shall be construed to impair or limit the power of the Commission under [the Act]." Indeed, the Commission's powers were expanded by the 1975 Amendments.

The result of the 1975 Amendments is to create certain areas in which there is concurrent jurisdiction on the part of the Commission and the MSRB with respect to municipal securities activities. Both the MSRB and the Commission have rulemaking power with respect to preventing fraudulent and manipulative acts and practices, establishing qualifications standards for municipal securities professionals (for nonbank municipal securities brokers and dealers), preventing false and misleading quotations, promoting just and equitable principals of trade for non-NASD municipal securities brokers and municipals securities dealers (other than banks and separately identifiable departments or divisions of banks), and setting requirements for books and records.

In its report on S. 249, the Senate Committee on Banking, Housing and Urban Affairs stated with respect to the Commission's direct powers:

> In contrast to the expansive rulemaking functions of the Board, the SEC's direct rulemaking with respect to transactions in municipal securities would be limited to the control of fraudulent, manipulative, and deceptive acts and practices. (Sections 15(c)(1) and (2). This power . . . is included in the bill to make clear that the Commission's responsibility extends beyond sanctioning those who have engaged in manipulative or deceptive practices with respect to municipal securities and includes the promulgation of prophylactic rules.[16]

This language would seem to indicate that, apart from the anti-fraud area, the Congress expected the Commission to defer to the MSRB with respect to rules governing municipal securities transactions. It is also clear, however, that Congress enacted the 1975 Amendments fully cognizant that there existed a regulatory framework governing the activities of brokers and dealers, and that, by amending the Act in the manner it did, municipal securities brokers and municipal securities dealers would be subjected to that existing framework. The Congress' awareness of an existing regulatory scheme is highlighted by references to specific rules which, in their present form, might create difficulties if applied to municipal securities professionals. For example, with respect to application of the net capital rule, the Senate Committee noted that "it may not be appropriate to apply the existing net capital rules to firms that are solely brokers in municipal securities, whose only customers are professional securities dealers and banks."[17] Similarly, with respect to § 240.15c2–11, which prohibits brokers and dealers from initiating market-making activities when certain financial and other information about a security and its issuer are not available, the Committee stated that application of the rule with respect to municipal securities "would have very serious adverse consequences."[18] By including these references, the Committee cautioned the Commission against applying those of its rules which are inappropriate for the municipal securities industry to municipal securities professionals, while at the same time indicating an awareness of the existing regulatory structure and a tacit approval of application of existing rules (appropriately amended, if deemed necessary by the Commission) to municipal securities professionals.

E. *Rules considered by the Commission.* The Commission has reviewed its existing rules to determine the extent to which such rules should be permitted to become applicable on December 1, 1975 with respect to transactions in municipal securities effected by brokers and dealers, as well as the extent to which the Commission should extend to municipal securities dealers which are banks or departments or divisions thereof (in those areas in which it has authority) those rules which are currently limited in their application to brokers and dealers.

1. *Anti-fraud rules.* The Commission has determined that, with certain exceptions, the Commission's anti-fraud rules should apply to transactions in municipal securities regardless of whether the MSRB adopts its own rules to prevent fraudulent and manipulative acts and practices. The Commission's rules under Sections 10(b), 15(c)(1) and 15(c)(2) historically have applied to all brokers and dealers regardless of whether or not they were members of a national securities exchange or the NASD, and regardless of whether any exchange or association had similar rules prescribing the same practices; the Commission sees no reason to depart from this pattern in regulating transactions in municipal securities.

The legislative history of the 1975 Amendments clearly supports such approach. As indicated previously, the Senate report on S. 249 makes clear that the Commission's responsibility "extends beyond sanctioning those who have engaged in manipulative or deceptive practices with respect to municipal securities and includes *the promulgation of prophylactic rules*,"[19] and that expansion of the Commission's authority under Sections 15(c)(1) and 15(c)(2) to cover transactions effected by municipal securities dealers was "a necessary element of comprehensive regulation of municipal securities trading."[20]

The Commission recognizes that there are important differences between the trading market for municipal securities and that for corporate securities, and that rules which may be suitable for application to trading in corporate securities may not be appropriate in all cases for municipal securities. Where it appears that such rules should apply to municipal securities transactions, the Commission has no basis for believing that those rules should distinguish between municipal securities professionals which are brokers and dealers, on the one hand, and municipal securities dealers which are banks and separately identifiable departments or divisions of banks, on the other.

Sections such as §§ 240.10b–6 and 240.10b–7, in the Commission's view, should continue to exempt transactions in municipal securities. Similarly, § 240.15c2–3, which prohibits trading in certain German securities, §§ 240.15c2–5, which requires certain disclosures, as well as a suitability determination, in connection with certain extensions of credit, and § 240.15c2–8, which requires the delivery of a prospectus in connection with a distribution, should be either partially or wholly inapplicable to transactions in municipal securities.[21] Finally, as discussed more fully, infra, § 240.15c2–11, which prohibits the initiation or resumption of quotations without specific information regarding the issuer of the security, should not be applied to quotations in municipal securities.

The Commission believes that the problem of investor protection should be paramount in considering existing anti-fraud rules. The Commission's rules under sections 15(c)(1) and 15(c)(2) are important enforcement tools, necessary to prevent the public from being subjected to fraudulent and deceptive practices in municipal securities. The Commission does not believe that, for example, requiring, under its rules, underwriters to transmit to issuers promptly the proceeds of distributions, requiring municipal securities professionals to identify quotations, or to refrain from representing that distributions are "at the market" when in fact no market exists other than that made or controlled by them will disrupt existing business practices or apply inappropriately to municipal securities professionals.

(a) *Rules under section 10(b).* By their terms, §§ 240.10b–3 and 240.10b–16 currently are limited in their application to brokers and dealers; the Commission believes that they should be amended to apply specifically to activities of municipal securities dealers so that bank dealers are subject to the requirements of these rules.

The Commission notes that certain of the rules would continue to be inapplicable to municipal securities by their very terms. For example, §§ 240.10b–6 and 240.10b–7 would continue to be inapplicable to "exempt securities." § 240.10b–13 would still be inapplicable to municipals since it is limited in its application to equity securities. § 240.10b–17 would also not apply since the rule contains an exemption for "ordinary interest payment(s) on a debt security," and municipal securities clearly fit into the category of debt securities.

In addition, §§ 240.10b–1 (prohibition of manipulations with respect to certain securities exempted by Commission rule under section 12(a)), 240.10b–2 (prohibition of certain payments in connection with distributions on an exchange), 240.–10b–4 (governing short tendering), and § 240.10b–8 (regulating distributions effected through rights), either do not apply by their terms to municipal securities or have no application to the way in which municipal securities are distributed or traded.

Section 240.10b–5, which has always applied to all transactions in municipal securities, regardless of whether a bank was involved, will continue to do so. Section 240.10b–9, which prohibits certain representations in connection with "all-or-none" or "best efforts" underwritings, will have any a minor impact on municipal securities underwritings, since such offerings usually are underwritten on a "firm commitment" basis. Where, however, municipal securities, such as industrial revenue bonds, may be sold occasionally on an "all-or-none" or "best efforts" basis, the Commission believes that certain of the abuses to which § 240.10b–9 is directed may well exist.

(b) *Rules under section 15(c)(1).* The Commission believes that all of the section 15(c)(1) series of rules should apply to transactions in municipal securities effected by banks as well as by brokers and dealers. The Commission, therefore, proposes that all of rules under section 15(c)(1) which specifically refer to brokers and dealers be amended to include municipal securities dealers.

Rules affected by the proposed amendments are § 240.15c1–1 which defines the terms "customer" and "completion of the transaction" for purposes of the section 15(c)(1) series of rules, § 240.15c1–3, which prohibits misrepresentation by brokers and dealers as to registration pursuant to Section 15(b) of the Act, § 240.15c1–4, which prohibits the effecting of transactions without written confirmation thereof, § 240.15c1–5, which prohibits a broker or dealer from effecting a securities transaction for the account of a customer in a security, where the issuer is in a control relationship with the broker or dealer, unless the broker or dealer discloses to the customer the existence of that relationship, § 240.–15c1–6 which requires disclosure of a broker or dealer's participation or interest in a distribution, § 240.15c1–7, which prohibits "churning," and §240.15 c1–8, which prohibits a broker or dealer from representing that a distribution is being made "at the market" unless the broker or dealer knows or has reasonable grounds to believe that a market for such a security exists other than that made, created or controlled by him.

It has been suggested that the requirement in § 240.15c1–4 that a broker disclose on its confirmation either the name of the person from whom the security was purchased or to whom it was sold, or the fact that such information will be furnished upon request, is inappropriate for the municipal securities industry because such disclosure may mislead investors and interfere with the orderly functioning of the municipal securities market. The Commission proposes not to eliminate this feature of the rule with respect to municipal securities brokers; however, in order to prevent possible disruption of the activities of municipal securities brokers required to register with the Commission for the first time on December 1, 1975, and in order to solicit comments from interested persons with respect to the appropriateness of continuing the requirement of disclosing "the other side" in a municipal securities brokerage transaction, the Commission has provided a temporary exemption from this feature, with respect to municipal securities brokers, until March 1, 1976.

In particular, the Commission notes that § 240.15c1–4 embodies traditional agency principles with respect to disclosures required of an agent, and that the Rule would seem to have particular importance in the case of an agent serving two principals with conflicting interests. However, in view of the exclusion of market professionals (i.e., brokers and dealers) from the definition of the term "customer" in § 240.15c1–4 (which exclusion the Commission proposes to expand to cover all municipal securities dealers) for purposes of all rules promulgated under section 15(c)(1), § 240.15c1–4 would not require disclosure of "the other side" of a transaction to a market professional served by a broker. Therefore, whatever concerns may exist with respect to such disclosure by municipal securities brokers generally, as required by § 240.15c1–4, it would appear such concerns would be ameliorated by the Commission's proposed amendments to § 240.15c1–1.

The two remaining rules under section 15(c)(1), §§ 240.15c1–2 and 240.15c1–9, do not require amendment and will continue to apply to all securities professionals (including municipal securities dealers which are banks or departments or divisions of banks).

(c) *Rules under section 15(c)(2).* The Commission believes that, with certain exceptions, the section 15(c)(2) series of rules should also apply to municipal securities transactions, whether effected by brokers and dealers or by municipal securities dealers. The Commission, therefore, proposes to amend all of the rules under section 15(c)(2) which specifically refer to brokers and dealers, other than §§ 240.15c2–3, 240.15c2–8 and 240.15c2–11, to include a reference to municipal securities dealers.

Rules which would be affected by the proposed amendments would be §240.15c2–4, which requires the prompt transmission, or maintenance in escrow, of payments received in connection with distributions which are made on an "all-or-none" basis, or on any other basis which contemplates that payment is not to be made until some future event or contingency occurs, § 240.15c2–5, which requires certain disclosures, as well as a suitability determination, in connection

[11] In this regard, the Commission recently announced certain actions with respect to the reporting and recordkeeping rules under Section 17(a) which are applicable to brokers and dealers. Securities Exchange Act Release No. 11854 (November 20, 1975) (40 FR 57786). In addition, the Commission has proposed certain other amendments to the reporting rules under Section 17(a) in conjunction with the proposed adoption of the FOCUS Report. Securities Exchange Act Release No. 11748 (October 20, 1975) (40 FR 51060).

[12] Specifically enumerated areas in which the MSRB must adopt rules include: (1) standards of training, experience and competence, as well as such other qualifications as the MSRB finds necessary or appropriate in the public interest or for the protection of investors; (2) the prevention of fraudulent and manipulative acts and practices; (3) the promotion of just and equitable principles of trade; (4) providing for the periodic examination of municipal securities brokers and municipal securities dealers to determine compliance with the provisions of the Act, the rules and regulations thereunder, and the rules of the MSRB; (5) the form and content of quotations relating to municipal securities, including rules designed to produce fair and informative quotations, and to prevent fictitious and misleading quotations; and (6) the prescription of records to be made and kept by municipal securities dealer and the periods for which such records shall be preserved. Sections 15B(b)(2)(A), (C), (E), (F), and (G) of the Act (15 U.S.C. 78o–4(b)(2)(A), (C), (E), (F), and (G)).

[13] *See* Section 19(b)(1) and (2) of the Act (15 U.S.C. 78s(b)(2)).

[14] *See* Section 19(c) of the Act (15 U.S.C. 78s(c)).

[15] S. Rep. No. 94–75, *Report of the Senate Committee on Banking, Housing and Urban Affairs to Accompany S. 249*, 94th Cong., 1st Sess. 48 (1975). ("*Senate Report*").

[21] Although § 240.15c2–8 does not apply to municipal securities since such securities are not subject to the Securities Act of 1933, the Commission is considering whether, in connection with a distribution of municipal securities, municipal securities brokers and municipal securities dealers should be required to furnish any offering circular which is made available to them in connection with the offering.

V40251 DEC 31 75 XUM

with certain credit transactions, and § 240.15c2–7, which requires the identification of quotations furnished to an interdealer quotation system.

Although no changes are proposed for §§ 240.15c2–3 and 240.15c2–8, it should be noted that those rules will continue to be inapplicable to transactions in municipal securities. § 240.15c2–3 applies only to German securities, and § 240.15c2–8 applies only to distributions of securities as to which a registration statement has been filed under the Securities Act of 1933 (15 U.S.C. 77a et seq.)

The Commission believes that § 240.15c–5 should not be applied in its entirety to municipal securities. § 240.15c2–5 prohibits a broker or dealer from arranging a loan for a customer to whom a security is sold, unless, before the transaction was entered into, the broker or dealer reasonably determines that the transaction, including the loan arrangement, is suitable for the customer and delivers to him a written statement setting forth certain material information as to the nature and extent of a customer's obligations.

Section 240.15c2–5 was designed originally to deal with certain abuses in connection with the offer and sale of so-called "equity funding" programs, in which securities sold to a customer by a broker or dealer are used as collateral for a loan whose proceeds are in turn used for payment of premiums on a life insurance policy sold to the customer as an integral part of the program.[23] However, although adoption of the rule was prompted by the development of "equity funding" programs, § 240.15c2–5 was broadly drafted to encompass other types of arrangements which would involve the borrowing of funds by customers in a manner other than conventional margin securities transactions governed by Regulation T(21 CFR 220).

Since municipal securities are not subject to section 7 of the Act (15 U.S.C. 78g), and therefore extensions of credit with respect to such securities are not covered by Regulation T (12 CFR 220), credit advanced or arranged by a broker or dealer in connection with municipal securities would come within the literal scope of § 240.15c2–5. Because it appears to the Commission that there may have been certain credit abuses in connection with the sale of municipal securities comparable to those which led to the adoption of the Rule, the Commission believes that it should apply the credit disclosure aspects of the Rule to municipal securities. However, the Commission proposes that municipal securities be exempt from the provisions of paragraph (b) of § 240.15c2–5, which requires a suitability determination prior to entering into the transaction.

With respect to § 240.15c2–11, the Commission believes that a complete exemption from the operation of the rule should be granted for quotations in municipal securities. § 240.15c2–11 provides that it shall be a fraudulent, manipulative or deceptive practice within the meaning of Section (c) (2) of the Act for any broker to disseminate any quotation for a security unless certain information concerning the issuer is available—either in a filing with the Commission or in the broker's own files.

Generally, the type of information required by the rule is that which would be disclosed in a registration statement filed under the Securities Act of 1933 (15 U.S.C. 77a et seq.) or in the periodic reports filed under the Securities Exchange Act (15 U.S.C. 78a et seq.) since municipal securities and their issuers will continue to be exempt from the registration and reporting requirements of the Securities Act of 1933 and the Securities Exchange Act, the Senate Committee correctly pointed out in reporting on S. 249 that "[§ 240.]15c2–11 type of informations is . . . generally not available for municipal securities and their issuers."[24] The Committee then stated that applying § 240.15c2–11 to municipal securities would "preclude brokers and dealers from submitting quotations on most issues of municipal securities,"[24] a development which "would have very serious adverse consequences." The Committee concluded by stating that:

> [i]t expects, therefore, that immediately upon enactment of S. 249, the Commission will exempt municipal securities from [§ 240.] 15c2–11.[25]

The Commission believes, given this clear expression of Congressional intent, that § 240.15c2–11 should be amended to exempt quotations for municipal securities. The Commission, however, does not intend to imply that there are no standards for brokers, dealers, and municipal securities. On the contrary, the Commission believes that persons making markets in municipal securities have an affirmative duty to be informed concerning the securities which they are buying and selling. However, the Commission has not yet determined what specific type of information should be repaired as a general matter in the case of quotations in municipal securities, and, thus, has not yet exercised its authority to require that municipal securities professionals be aware of, and disclose, information concerning issuers available, for example, from sources other than issuers themselves.

2. *Reporting and recordkeeping requirements for the MSRB.* In addition to providing for the creation of the MSRB, the 1975 Amendments grants the Commission the authority to require the MSRB to

> make and keep for prescribed periods such records, furnish such copies thereof, and make and disseminate such reports as the Commission, by rule, prescribe as necessary or appropriate in the public interest for the protection of investors, or otherwise in furtherance of the purposes of [the Act].[26]

Moreover, section 17(b) of the Act provides that the MSRB is subject at any time, or from time to time, to such reasonable periodic, special, or other examinations by the Commission as it deems necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

The Commission has considered the question of what records and reports should be required of the MSRB. In considering the question, the Commission recognizes the unique nature of the MSRB; in that it is empowered only to adopt rules governing municipal securities trading and the activities of municipal securities brokers and municipal securities dealers, and has no inspection or enforcement powers of its own. The Commission believes, however, that this fact does not diminish significantly, if at all, the need for comprehensive reporting requirements for the MSRB, and, ultimately, recordkeeping requirements.

Section 3(a)(26) of the Act (15 U.S.C. 78c(a)(26)) provides that, for purposes of sections 19(b), 19(c) and 23(b) of the Act (15 U.S.C. 78s(b), 78s(c) and 78w(b)), the MSRB is a self-regulatory organization. As a self-regulatory organization, the MSRB is required to file all proposed rule changes with the Commission, and, in general, subject those rule changes to the approval of the Commission pursuant to section 19(b). In addition, the Commission is given authority, under section 19(c) of the Act, to abrogate, add to, and delete from the rules of any self-regulatory organization, including the MSRB, by following the specific procedures set forth in that section.

The Commission has additional responsibilities vis a vis the MSRB under Under section 15B(c)(83) of the Act section 15B of the Act (15 U.S.C. 78o–4). (15 U.S.C. 78o–4(c)(8)), the Commission is authorized, by order, after notice and opportunity for hearing, to remove from office or censure any member or employee of the MSRB upon the Commission's finding that the member or employee has willfully violated any provision of the Act, the rules and regulations thereunder, or the rules of the MSRB, or has willfully abused his authority. Furthermore, the Commission has the authority to enforce rules of the MSRB, both by means of injunctive relief pursuant to section 21 of the Act (15 U.S.C. 78u) and administrative sanction (subject to certain exceptions and procedural requirements) pursuant to section 15B(c) of the Act (15 U.S.C. 78o–4(c)), and, with respect to municipal

[23] *See* Securities Exchange Act Release No. 6851 (July 17, 1962), (27 FR 7091). The abuses included the fact that such programs were being offered indiscriminately to many persons for whom they were not suitable, and that the customers were not being adequately informed of the nature and extent of their obligations under the program, the charges which would be incurred, the risks assumed, and the fact that a substantial part of the customers' payments would go to the broker-dealer and other persons, including the salesman, associated with the broker-dealer.

[24] *Senate Report* at 48.

[25] *Id.*

[26] Section 17(a)(1) of the Act (15 U.S.C. 78q(a)(1).

securities brokers and non-bank municipal securities dealers who are not members of a national securities association, the Commission is required to conduct examinations and tests required by rule of the MSRB.

Finally, pursuant to section 23(b) of the Act (15 U.S.C. 78w(b)) the Commission is required to include in its annual report to the Congress certain information concerning self-regulatory organizations, including the MSRB. The Commission is required under section 23(b)(2) (15 U.S.C. 78w(B)(2)) to include in its annual report a summary of its oversight activities with respect to the MSRB, including a description of any examination conducted as part of such activities, any material recommendations presented as part of such oversight activities to the MSRB for changes in its organization or rules, as well as any action by MSRB in response to any such recommendation. In addition, section 23(b)(4)(B) (15 U.S.C. 78w(b)(4)(B)) requires the Commission to include in its annual report a statement and analysis of the expenses and operations of each self-regulatory organization, including the MSRB, in connection with the performance of its responsibilities under the Act.

In light of the substantial responsibilities which the Commission has with respect to the MSRB and rules adopted by the MSRB, the Commission believes that the MSRB should be required to file with the Commission annual and supplemental reports and to maintain certain books and records. The Commission therefore proposes new § 240.17a–21 for that purpose. The Commission is considering the promulgation of rule proposals with respect to recordkeeping requirements for the MSRB, but is not prepared to propose any such rules at the present time.

3. *Broker/dealer qualification rules*[27]. Both the MSRB and the Commission have rulemaking authority with respect to establishing qualifications standards for municipal securities professionals. Under Section 15B(b)(2)(A) of the Act (15 U.S.C. 78o–4(b)(2)(A), the MSRB is required to adopt rules which provide that

> no municipal securities broker or municipal securities dealer effect any transaction in, or induce or attempt to induce the purchase or sale of, any municipal security unless such municipal securities broker or municipal securities dealer meets such standards of operational capability and such municipal securities broker or municipal securities dealer and every natural person associated with such municipal securities broker or municipal securities dealer meets such standard of training, experience, competence, and such other qualifications as the Board finds necessary or appropriate in the public interest or for the protection of investors.

The Commission's authority in this area is more circumscribed, for although the Commission may adopt rules establishing standards of operational capability, training experience and competence, section 15(b)(7) (15 U.S.C. 78o(b)(7)) grants the Commission such authority with respect only to registered brokers and dealers—but not banks or separately identifiable departments or divisions of banks.[28]

The Commission currently has two rules dealing with qualifications for brokers and dealers. These two rules were adopted by the Commission under old section 15(b)(8) and apply only to brokers and dealers registered under section 15 of the Act who are not members of a national securities association registered with the Commission under section 15A of the Act (15 U.S.C. 78o–3) (i.e., the NASD). Section 240.15b8–1 provides that nonmember brokers and dealers may not effect over-the-counter transactions in securities unless: (1) Each associated person of such nonmember broker or dealer who is engaged directly or indirectly in securities activities any part of which is in (a) sales, (b) trading, (c) research or investment advice, (d) advertising, (e) public relations, (f) hiring or recruitment of salesmen, (g) training of salesmen, or (h) underwriting, and every associated person who supervises others engaged in any of such activities, has successfully completed a general securities examination, and (2) such nonmember broker or dealer shall have filed with the Commission a Form U–4[29] for each associated person engaged directly or indirectly in securities activities. § 240.15b8–2 provides that no nonmember broker or dealer or associated person of a nonmember broker or dealer shall be deemed qualified if, by action of a registered national securities association or exchange, such nonmember broker or dealer or associated person has been and is expelled or suspended from such association or exchange or has been and is barred or suspended from being associated with all members of such association or exchange for violation of any such association or exchange rule which prohibits any act or transaction constituting conduct inconsistent with just and equitable principles of trade. The rule also provides for a procedure for reinstatement upon application to the Commission.

The Commission believes that it is appropriate to permit the MSRB sufficient time to determine which associated persons should be required to take examinations, and what the content of those examinations should be, even though the Commission's explicit authority has now been expanded to include qualifications for all brokers and dealers. The Commission further believes that no harm to the public will occur if qualifications for associated persons of municipal securities brokers and dealers remain undefined until the MSRB has adopted a comprehensive program for all municipal securities professionals. Between the Commission's authority to deny registration and the application of the anti-fraud rules to municipal securities professionals, the Commission believes that the public has adequate interim protection to permit associated persons to submit to a testing program at a later time.

On the other hand, the Commission is of the view that municipal securities professionals (other than banks) who are not members of the NASD should be required to file Form U–4 for their associated persons. Inasmuch as the NASD has the authority to require (and is requiring) that brokers and dealers applying for membership in that organization file Form U–4 for their associated persons for the purposes of determining whether any such person is subject to a "statutory disqualification," within the meaning of the Act, the Commission believes that SECO brokers and dealers should be subject to the same requirement.

Accordingly, the Commission proposes that § 240.15b8–1 be amended to require only that nonmember brokers and dealers file Form U–4 on behalf of their associated persons who engage in municipal securities activities, and keep those forms up-to-date. The Commission believes that requiring Form U–4 for associated persons is necessary to provide information to the Commission concerning the identity and background of associated persons, and that imposing such a requirement will not in any way interfere with the MSRB's function in establishing qualification standards for municipal securities professionals. The Commission also proposes that the definition of nonmember for purposes of § 240.15b8–1 be amended to include non-bank municipal securities dealers whose business is exclusively intrastate and who register pursuant to section 15B of the Act (15 U.S.C. 78o–4) rather than section 15(b) (15 U.S.C. 78o(b)) ("intrastate dealers").

The Commission also proposes certain amendments to § 240.15b8–2. The amendments would provide, in addition to the current disqualification, that a person could not be a SECO broker or dealer or associated person if suspended or expelled by the NASD for violating a rule of the MSRB. In addition, the rule would provide that a person would not be disqualified from being a SECO broker

[27] In addition to rule changes proposed in this release with respect to broker/dealer qualification and SECO rules, the Commission is considering the adoption of further amendments to these rules necessitated by the amendments to Sections 15(b)(7), (8) and (9) of the Act, as redesignated by the 1975 Amendments, and the new requirement for registration of all exchange members. Those amendments, if proposed or adopted, will be announced separately.

[28] The Commission's authority with respect to establishing qualifications for securities professionals was, however, expanded by the Act. Prior to the 1975 Amendments, old Section 15(b)(8) of the Act provided the Commission's authority to set qualifications, but limited such authority to SECO broker-dealers (i.e., those registered brokers and dealers who effected transactions over-the-counter and who were not members of the NASD). The 1975 Amendments renumbered old Section 15(b)(8) and expanded its coverage to include all brokers and dealers registered pursuant to Section 15 of the Act.

[29] Form U–4 (§ 249.503) is the new uniform registration form for associated persons. *See* Securities Exchange Act Release No. 11424 (May 16, 1975) (40 FR 30064).

V40251 DEC 31 75 XUM

or dealer solely in municipal securities if he was disciplined by an exchange or association for corporate activities, unless the MSRB provides otherwise.[30] The appeal and reinstatement provisions of the rule would remain unchanged, so that the Commission could remove a disqualification under appropriate circumstances.

In proposing these amendments, the Commission anticipates that the MSRB will promptly adopt rules resolving the question of whether securities professionals who have been disciplined by, or barred or expelled from, an exchange or association for violation of rules governing just and equitable principles of trade in connection with corporate securities activities should be disqualified from acting as a nonmember municipal securities broker or municipal securities dealer, or from acting as an associated person of such a municipal securities broker or dealer (unless the Commission removes the disqualification). If the MSRB does not promptly adopt such rules, the Commission believes that it should consider whether the proposed rule change should be withdrawn so that a person who is disqualified in the corporate area for conduct inconsistent with just and equitable principles of trade will be similarly disqualified with respect to municipal securities activities.

4. *SECO Fees*[31]. Sections 240.15b9–1 and 240.15b9–2 provide for the payment of fees and assessments by SECO brokers and dealers. Such fees are currently as follows:

1. *Initial Filing:*
a. Form BD (§ 249.501), No Charge.
b. Form SECO–5 (§ 249.505), $500.
c. Form U–4 (§ 249.502), $50/associated person.
2. *Annual Assessment:*
Form SECO–4–75 (§ 249.504i).
a. Firm, $250.
b. Associated Persons, $15/associated person.

The Commission believes that newly registered municipal securities brokers and dealers (other than banks and their departments or divisions) who do not become members of the NASD should pay the existing SECO fees. Despite the fact that the MSRB is entitled to levy assessments on municipal securities brokers and dealers to cover the costs of operating and administering the MSRB,[32] the Commission will have the same enforcement and inspection responsibilities with respect to SECO municipal securities brokers and dealers as it currently has with respect to other SECO fees and assessments will discourage municipal securities brokers and dealers from choosing to be associated with the SECO program rather than with the NASD solely on the basis of fees, since the NASD plans to assess its municipal members in the same manner as other NASD members.

In this regard, the Commission notes that while the initial SECO fee is identical to the initial NASD fee, i.e., $500 per firm, the annual assessment for SECO is computed on a per capita basis, while the NASD assessment is computed as a percentage of income. The Commission is currently considering whether to propose that the basis for computing the SECO assessment should be changed to a percentage of income to more closely parallel the NASD assessments. Municipal securities brokers and dealers may wish to take this fact into account in determining whether or not to join the NASD.

5. SECO rules.[33] Nonmember brokers and dealers are subject to the so-called "SECO program" of the Commission adopted pursuant to sections 15(b)(8), (9), and (10) of the Act.[34] Enacted in 1964 as amendments to the Act, these provisions empowered the Commission to establish for such nonmember broker-dealers and their associated persons supplementary regulatory procedures and rules comparable to those adopted by the NASD for its members and their associated persons. In various rules adopted under these statutory provisions, the Commission has set up specific procedures and norms of conduct closely paralleling those of the NASD in areas such as qualifications of associated persons of broker-dealers (including written examinations), fees and assessments, standards for supervision of securities employees, discretionary accounts and suitability of recommendations.

Section 15A(f) of the Act, as redesignated by the 1975 Amendments (15 U.S.C. 78o–3(f)), provides that section 15A, dealing with the authority of the NASD, is inapplicable to transactions by a broker or dealer in any "exempted security," and, since municipal securities continue to be "exempted securities" for certain purposes under section 15A, including section 15A(b)(6) (15 U.S.C. 78o–3(b)(6)), the NASD has no power to adopt rules prescribing just and equitable principles of trade for municipal securities professionals or to discipline members for violation of existing NASD rules regarding just and equitable principles of trade in connection with municipal securities transactions. Until the MSRB acts pursuant to its authority under section 15B(b)(2)(C) (15 U.S.C. 78o–4(b)(2)(C)) to enact rules applicable to all municipal securities professionals, both municipal securities brokers and dealers which are members of the NASD, and municipal securities dealers which are banks or departments or divisions thereof, will not be subject to any specific rules dealing with just and equitable principles of trade. In light of these facts, the Commission believes that its existing SECO rules should be suspended for persons who are required to register as brokers and dealers solely by reason of acting as municipal securities brokers or municipal securities dealers.

Rules which would be affected by this proposal would be § 240.15b10–1, which defines the terms "nonmember broker or dealer," "associated person," and "complaint;" § 240.15b10–2 which requires nonmember brokers and dealers to observe high standards of commercial honor and just and equitable principles of trade; § 240.15b10–3 which prohibits unsuitable recommendations; § 240.15b–4, which requires that nonmember brokers and dealers exercise diligent supervision over associated persons; § 240.15b10–5, regulating the use of discretionary accounts; § 240.15b10–6, which requires certain records be maintained with respect to customers; § 240.15b10–7, which provides an exception for brokers and dealers who have no customer accounts and have gross income from over-the-counter activities not greater than $1,000; § 240.15b10–8 and § 240.15b10–9, which regulate the offering of securities of nonmember brokers or dealers, including the conditions under which such brokers or dealers may underwrite their own securities or the securities of an affiliate; § 240.15b10–10, which prohibits favoring or disfavoring the distribution of shares of open-end investment companies on the basis of brokerage commissions received from any source; and § 240.15b10–11, which requires fidelity bonds. In any event, should the MSRB not promptly meet its obligation to draft such rules, or should such rules not provide adequate protections for customers, the Commission will reconsider its SECO rules should be reinstituted for persons required to register as brokers or dealers solely by reason of acting as municipal securities brokers or municipal securities dealers.

6. *Broker/dealer registration rules.* On October 15, 1975, the Commission adopted § 240.15Ba2–1, § 240.15Ba2–2, and Form MSD (§ 249.950) governing the registration of municipal securities dealers under Section 15B(a) of the Act.[35] At that time, the Commission did not consider rules governing the registration of successors to a registered municipal securities dealer, the registration of a fiduciary appointed to continue the business of such a registered municipal securities dealer, or the withdrawal from registration of a municipal securities dealer.

The Commission believes rules governing these situations should be adopted as soon as possible. Accordingly, the Commission proposes to adopt new rules under section 15B of the Act to provide for: (1) The registration of a successor to a registered municipal securities dealer (§ 240.15Ba2–4), (2) the registration of fiduciaries (§ 240.15Ba2–5), (3) the adoption by a successor of an application filed by a predecessor municipal securities dealer (§ 240.15Ba2–6), and (4) withdrawal of registration of a municipal securities dealer (§ 240.15Bc3–1). These rules, which would be adopted pursuant to Sections 15B(a)(2) and 15B(c)(3) of the Act (15 U.S.C. 78o–4(a)(2) and 78o–4(c)(3)) are patterned after, and are virtually identical to, existing §§ 240.15b1–3, 240.15b1–4, 240.15b2–1 and 240.15b6–1, governing brokers and dealers registered pursuant to Section 15(b) of the Act. The only significant differences are as follows: (i) § 240.15Ba2–4 provides that the registration of a predecessor shall remain in effect for 75 days after such succession, compared to 60 days under existing § 240.15b1–3;[36] and (ii) § 240.15Bc3–1 does not provide, as does § 240.15b6–1, that a withdrawal from registration which is otherwise effective shall not become effective for an additional six months for purposes of the Securities Investor Protection Act of 1970 (15 U.S.C. 78aaa et seq.). Since municipal securities dealers registered under section 15B(a) of the Act (i.e., banks and their departments and divisions and intrastate dealers) are not subject to SIPC, there appears to be no need to provide any additional time period.

Neither the proposed rules for succession under section 15B (15 U.S.C. 78o–4) nor the Commission's existing succession rules under section 15(b) provide procedures for the succession of a broker or dealer registered under section 15(b) by a municipal securities dealer required to register under section 15B, or the succession of a municipal securities dealer registered pursuant to section 15B by a broker or dealer required to register under section 15(b). The Commission believes that successions of this type will be infrequent and can be handled on a case-by-case basis through the Commission's authority under section 15(a)(2) and 15B(a)(4) (15 U.S.C. 78o(a)(2) and 78o–4(a)(4)) to grant exemptions consistent with the public interest, the protection of investors, and, in the case of exemptions under section 15B(a)(4), the purposes of section 15B of the Act.

The Securities and Exchange Commission hereby proposes certain amendments to Part 240 of Chapter II of Title 17 of the Code of Federal Regulations regarding the regulation of municipal securities professionals and transactions in municipal securities pursuant to its authority under the Securities Exchange Act of 1934, and particularly sections 2, 3, 10, 15, 15B and 23 thereof (15 U.S.C. 78b, 78c, 78j, 78o, 78o–4 and 78w).

The texts of the proposed amendments are as follows (additions are indicated by arrows; deletions are bracketed):

1. Section 240.10b–3 is amended as indicated below:

§ 240.10b–3 Employment of manipulative and deceptive devices by brokers ►,◄ [or] dealers ►or municipal securities dealers◄.

It shall be unlawful for any broker ►,◄ [or] dealer ►or municipal securities dealer◄ directly or indirectly, by the use of any means or instrumentality of interstate commerce, or of the mails, or of any facility of any national securities exchange, to use or employ, in connection with the purchase or sale of any security otherwise than on a national securities exchange, any act, practice, or course of business defined by the Commission to be included within the term "manipulative, deceptive, or other fraudulent device or contrivance," as such term is used in section 15(c)(1) of the act.

2. Section 240.10b–16 is amended as indicated below:

§ 240.10b–16 Disclosure of credit terms in margin transactions.

(a) It shall be unlawful for any broker ►,◄ [or] dealer ►or municipal securities dealer◄ to extend credit, directly or indirectly, to any customer in connection with any securities transaction unless such broker ►,◄ [or] dealer ►or municipal securities dealer◄ has established procedures to assure that each customer

(1) Is given or sent at the time of opening the account, a written statement or statements disclosing (i) the conditions under which an interest charge will be imposed; (ii) the annual rate or rates of interest that can be imposed; (iii) the method of computing interest; (iv) if rates of interest are subject to change without prior notice, the specific conditions under which they can be changed; (v) the method of determining the debit balance or balances on which interest is to be charged and whether credit is to be given for credit balances in cash accounts; (vi) what other charges resulting from the extension of credit, if any, will be made and under what conditions; and (vii) the nature of any interest or lien retained by the broker►,◄ [or] dealer or municipal securities dealer in the security or other property held as collateral and the conditions under which additional collateral can be required: *Provided, however,* That the requirements of this paragraph (a)(1) will be met in any case where the account is opened by telephone if the information required to be disclosed is orally communicated to the customer at that time and the required written statement or statements are sent to the customer immediately thereafter: And *provided, further,* That in the case of customers to whom credit is already being extended on the effective date of this rule, the written statement or statements required hereunder must be given or sent to said customers within 90 days after the effective date of this rule; and

(2) is given or sent a written statement or statements, at least quarterly, for each account in which credit was extended, disclosing (i) the balance at the beginning of the period; the date, amount and a brief description of each debit and credit entered during such period; the closing balance; and, if interest is charged for a period different from the period covered by the statement, the balance as of the last day of the interest period; (ii) the total interest charge for the period during which interest is charged (or if interest is charged separately for separate accounts, the total interest charge for each such account), itemized to show the dates on which the interest period began and ended; the annual rate or rates of interest charged and the interest charge for each such different annual rate of interest; and either each different debit balance on which an interest calculation was based on the average debit balance for the interest period, except that if an average debit balance is used, a separate average debit balance must be disclosed for each interest rate applied; and (iii) all other charges resulting from the extension of credit in that account: *Provided, however,* That if the interest charge disclosed on a statement is for a period different from the period covered by the statement, there must be printed on the statement appropriate language to the effect that it should be retained for use in conjunction with the next statement containing the remainder of the required information: And *provided further,* That in the case of "equity funding programs" registered under the Securities Act of 1933, the requirements of this paragraph (a)(2) will be met if the broker or dealer furnishes to the customer, within one month after each extension of credit, a written statement or statements containing the information required to be disclosed under this paragraph (a)(2).

(b) It shall be unlawful for any broker ►,◄ [or] dealer ►or municipal securities dealer◄ to make any changes in the terms and conditions under which credit charges will be made (as described in the initial statement made under paragraph (a) of this rule), unless the customer shall have been given not less than thirty (30) days written notice of such changes, except that no such prior notice shall be necessary where such changes are required by law: *Provided, however,* That if any change for which prior notice would otherwise be required under this paragraph results in a lower interest charge to the customer than would have been imposed before the change, notice of such change may be given within a reasonable time after the effective date of the change.

3. Section 240.15b1–3(a) is amended as indicated below:

§ 240.15b1–3 Registration of successor to registered broker or dealer.

(a) In the event that a broker or dealer succeeds to and continues the business of another registered broker or dealer, the registration of the predecessor shall be

[30] The Commission also proposes a technical amendments to § 240.15b8–2, identical to that proposed for § 240.15b8–1, to include intrastate dealers who do not join the NASD as "nonmembers" for purposes of the rule.

[31] *See* note 27 *supra.*

[32] Section 15B(b)(2)(J) of the Act (15 U.S.C. 78o–4(b)(2)(J). The MSRB, on November 3, 1975, filed with the Commission a rule change under Rule 19b–4 providing for an initial assessment for municipal securities brokers and dealers of $100 per firm. *See* Securities Exchange Act Release No. 11809 (November 7, 1975) (40 FR 52896).

[33] *See* note 27 *supra.*

[34] These sections were amended and redesignated as Sections 15(b)(7), (8), and (9) by the 1975 Amendments.

[35] Securities Exchange Act Release No. 11742 (October 15, 1975) (40 FR 49772).

[36] The 75 day period is intended to accommodate the 30-day period which the successor has to file his application plus the 45-day period which the Commission has to either approve the application or institute proceedings to disapprove the application. Since the procedure for handling applications of brokers and dealers under Section 15(b) of the Act also requires the Commission to act affirmatively on applications within 45 days (rather than permitting the application to become effective by lapse of time after 30 days), the Commission proposes that the time period in § 240.15b1–3 also be amended to 75 days concurrent with the adoption of § 240.15Ba2–4.

V40251 DEC 31 75 XUM

deemed to remain effective as the registration of the successor for a period of [60] ►75◄ days after such succession provided that an application for registration on Form BD is filed by such successor within 30 days after such succession.

• • • • • •

4. Section 240.15b8–1 is amended by amending paragraph (c)(1) as indicated and adding new paragraph (d) to read as follows:

§ 240.15b8–1 Qualifications and fees relating to brokers and dealers who are not members of a national securities association.

• • • • • •

(c) For purposes of this section:

(1) The term "nonmember broker or dealer" shall mean any broker or dealer, including a sole proprietor, registered under section 15 ►or section 15B◄ of the Act; who is not a member of a national securities association registered with the Commission under section 15A of the Act.

• • • • • •

►(d)(1) Except as hereinafter provided, the provisions of § 240.15b8–1 shall not apply to any person who is required to register as a broker or dealer solely by reason of acting as a municipal securities broker or municipal securities dealer, or to any other broker or dealer insofar as such broker or dealer acts as a municipal securities broker or municipal securities dealer.

►(2) No nonmember broker or dealer who is required to register as a broker or dealer solely by reason of acting as a municipal securities broker or municipal securities dealer, and no other nonmember broker or dealer, insofar as such broker or dealer acts as a municipal securities broker or municipal securities dealer, shall effect any transaction in, or induce the purchase or sale of, any municipal security unless such nonmember broker or dealer meets all the following conditions:

►(i) Such a nonmember broker or dealer shall have filed with the Commission a Form U–4 (§ 249.502) with respect to each associated person engaged directly or indirectly in municipal securities activities, before such person engages in any such activities on behalf of such nonmember broker or dealer;

►(ii) Such nonmember broker or dealer shall file promptly, in writing, information making accurate or complete a Form U–4 on behalf of any associated person whenever the information filed previously on behalf of such associated person is or becomes inaccurate or incomplete for any reason. This information may be in letter form and must be signed by a principal officer, partner, sole proprietor, managing agent, or any person occupying a similar status or performing similar functions.

(b) Upon written application with respect to any person deemed unqualified to engage in securities activities pursuant to paragraph (a) of this Rule, the Commission may, if it finds it appropriate in the public interest and for the protection of investors and to carry out the purposes of section 15(b)[(8)] ►(7)◄, after notice and opportunity for hearing and subject to such terms and conditions as it may determine to be necessary or desirable, find that notwithstanding such association or exchange action such person may engage in securities activities pursuant to such section. The receipt by the Commission of such application shall operate as a stay of the disqualification provisions of paragraph (a) of this section pending the Commission's determination with respect to the merits of the application. Such application should ordinarily be made by the prospective employer of such person.

• • • • • •

(f) For purposes of this section:

(1) The term "nonmember broker or dealer" shall mean any broker or dealer, including a sole proprietor, registered under section 15 ►or section 15B◄ of the Act, who is not a member of a national securities association registered with the Commission under section 15A of the Act.

• • • • • •

►(iii) Such nonmember broker or dealer shall have filed with the Commission on or before July 31 of each year a list of associated persons with respect to whom Form U–4 has been filed with the Commission and who have ceased to be associated persons during the preceding year ending June 30.◄

5. Section 240.15b8–2 is amended by amending paragraphs (a), (b), (f)(1), as shown and adding paragraph (g) to read as follows:

§ 240.15b8–2 Disqualification of nonmember brokers and dealers and their associated persons—association or exchange disciplinary actions.

(a) No nonmember broker or dealer or associated person of a nonmember broker or dealer shall be deemed qualified pursuant to section 15(b)[(8)] ►(7)◄ of the Act, if, by action of a registered national securities association or exchange, such nonmember broker or dealer or associated person has been and is expelled or suspended from such association or exchange or has been and is barred or suspended from being associated with all members of such association or exchange for violation of any such association or exchange rule ►or rule of the Municipal Securities Rulemaking Board◄ which prohibits any act or transaction constituting conduct inconsistent with just and equitable principles of trade or requires any act the omission of which constitutes conduct inconsistent with just and equitable principles of trade.

►(g) Notwithstanding paragraph (a) of this section, no nonmember broker or dealer or associated person of a nonmember broker or dealer shall be deemed unqualified to engage in the business of being a municipal securities broker or municipal securities dealer solely by reason of having been or being expelled or suspended from a national securities exchange or securities association or of having been or being barred or suspended from being associated with all members of any such exchange or association, for violation of any exchange or association rule referred to in paragraph (a), unless a rule of the Municipal Securities Rulemaking Board provides otherwise.◄

6. Section 240.15b9–1(e)(1) is amended as indicated below.

§ 240.15b9–1 Initial fees for registered brokers or dealers not members of a registered national securities association and their associated persons.

• • • • • •

(e) For purposes of this section:

(1) The term "nonmember broker or dealer" shall mean any broker or dealer, including a sole proprietor, registered under section 15 ►or section 15B◄ of the Act, who is not a member of a national securities association registered with the Commission under section 15A of the Act.

7. Section 240.15b9–2(g)(2) is amended as indicated below.

§ 240.15b9–2 Annual fees for registered brokers and dealers not members of a registered national securities association.

• • • • • •

(g) Definitions. For the purpose of this section: • • •

(2) The term "nonmember broker or dealer" shall mean any broker or dealer, including a sole proprietor, registered under section 15 ►or section 15B◄ of the Act, who is not a member of a national securities association registered with the Commission under section 15A of the Act.

• • • • • •

8. Section 240.15c1–1 is amended as indicated below:

§ 240.15c1–1 Definitions.

As used in any rule adopted pursuant to section 15(c)(1) of the act (sec. 2, 52 Stat. 1075; 15 U.S.C. 78o(c)(1)):

(a) The term "customer" shall not include a broker◄,► [or] dealer ►or municipal securities dealer◄,

(b) The term "the completion of the transaction" means:

(1) In the case of a customer who purchases a security through or from a broker►,◄ [or] dealer ►or municipal securities dealer◄, except as provided in paragraph (b)(2) of this section, the time when such customer pays the broker►,◄ [or] dealer ►or municipal securities dealer◄ any part of the purchase price, or, if payment if effected by a bookkeeping entry, the time when such bookkeeping entry is made by the broker►,◄ [or] dealer ►or municipal securities dealer◄ for any part of the purchase price;

(2) In the case of a customer who purchases a security through or from a broker►,◄ [or] dealer ►or municipal securities dealer◄ and who makes payment therefor prior to the time when payment is requested or notification is given that payment is due, the time when such broker►,◄ [or] dealer ►or municipal securities dealer◄ delivers the security to or into the account of such customer;

(3) In the case of a customer who sells a security through or to a broker►,◄ [or] dealer ►or municipal securities dealer◄ except as provided in subparagraph (4) of this paragraph, if the security is not in the custody of the broker►,◄ [or] dealer ►or municipal securities dealer◄ at the time of sale, the time when the security is delivered to the broker ►,◄ [or] dealer ►or municipal securities dealer,◄ and if the security is in the custody of the broker ►,◄ [or] dealer ►or municipal securities dealer◄ at the time of sale, the time when the broker►,◄ [or] dealer ►or municipal securities dealer◄ transfers the security from the account of such customer;

(4) In the case of a customer who sells a security through or to a broker►,◄ [or] dealer ► or municipal securities dealer◄ and who delivers such security to such broker►,◄ [or] dealer ► or municipal securities dealer◄ prior to the time when delivery is requested or notification is given that delivery is due, the time when such broker►,◄ [or] dealer ► or municipal securities dealer◄ makes payment to or into the account of such customer.

9. Section 240.15c1–3 is amended as indicated below.

§ 240.15c1–3 Misrepresentation by brokers ►,◄ [and] dealers ►and municipal securities dealers◄ as to registration.

The term "manipulative, deceptive, or other fraudulent device or contrivance," as used in section 15(c)(1) of the act, is hereby defined to include any representation by a broker or dealer that the registration of a broker or dealer, pursuant to section 15(b) of the Act, ►or the registration of a municipal securities dealer pursuant to section 15B(a) of the Act,◄ or the failure of the Commission to deny or revoke such registration, indicates in any way that the Commission has passed upon or approved the financial standing, business, or conduct of such registered broker►,◄ [or] dealer ►or municipal securities dealer◄ or the merits of any security or any transaction or transactions therein.

10. Section 240.15c1–4(a) is amended as indicated below:

§ 240.15c1–4 Confirmation of transactions.

(a) The term "manipulative, deceptive, or other fraudulent device or contrivance," as used in section 15(c)(1) of the act, is hereby defined to include any act of any broker►,◄ [or] dealer ►or municipal securities dealer◄ designed to effect with or for the account of a customer any transaction in, or to induce the purchase or sale by such customer of any security (other than U.S. Tax Savings Notes, U.S. Defense Savings Stamps, or U.S. Defense Savings Bonds, Series E, F, and G) unless such broker►,◄ [or] dealer ►or municipal securities dealer◄ at or before the completion of each such transaction, gives or sends to such customer written notification disclosing (1) whether he is acting as a broker for such customer, as a dealer or municipal securities dealer for his own account, as a broker for both such customer and some other person; (2) in any case in which he is acting as a broker for such customer or for such customer and some other person, either the name of the person from whom the security was purchased or to whom it was sold for such customer and the date and time when such transaction took place or the fact that such information will be furnished upon the request of such customer, and the source and amount of any commission or other remuneration received or to be received by him in connection with the transaction.

• • • • • •

11. Section 240.15c1–5 is amended as indicated below:

§ 240.15c1–5 Disclosure of control.

The term "manipulative, deceptive, or other fraudulent device or contrivance," as used in Section 15(c)(1) of the act, is hereby defined to include any act of any broker►,◄ [or] dealer or municipal securities dealer controlled by, controlling, or under common control with, the issuer of any security, designed to effect with or for the account of a customer any transaction in, or to induce the purchase or sale by such customer of, such security unless such broker►,◄ [or] dealer or municipal securities dealer, before entering into any contract with or for such customer for the purchase or sale of such security, discloses to such customer the existence of such control, and unless such disclosure, if not made in writing, is supplemented by the giving or sending of written disclosure at or before the completion of the transaction.

12. Section 240.15c1–6 is amended as indicated below:

§ 240.15c1–6 Disclosure of interest in distribution.

The term "manipulative, deceptive, or other fraudulent device or contrivance," as used in Section 15(c)(1) of the act, is hereby defined to include any act of any broker who is acting for a customer or for both such customer and some other person, or of any dealer ►or municipal securities dealer◄ who receives or has promise of receiving a fee from a customer for advising such customer with respect to securities, designed to effect with or for the account of such customer any transaction in, or to induce the purchase or sale by such customer of, any security in the primary or secondary distribution of which such broker►,◄ [or] dealer ►or municipal securities dealer◄ is participating or is otherwise financially interest unless such broker ►,◄ [or] dealer ►or municipal securities dealer,◄ at or before the completion of each such transaction gives or sends to such customer written notification of the existence of such participation or interest.

13. Section 240.15c1–7 is amended as indicated below:

§ 240.15c1–7 Discretionary accounts.

(a) The term "manipulative, deceptive, or other fraudulent device or contrivance," as used in Section 15(c) hereby defined to include any act of any broker►,◄ [or] dealer ►or municipal securities dealer◄ designed to effect with or for any customer's account in respect to which such broker►,◄ [or] dealer ►or municipal securities dealer◄ or his agent or employee is vested with any discretionary power any transactions of purchase or sale which are excessive in size or frequency in view of the financial resources and character of such account.

(b) The term "manipulative, deceptive, or other fraudulent device or contrivance," as used in section 15(c)(1) of the act, is hereby defined to include any act of any broker►,◄ [or] dealer ►or municipal securities dealer◄ designed to effect with or for any customer's account in respect to which such broker►,◄ [or] dealer ►or municipal securities dealer◄ or his agent or employee is vested with any discretionary power any transaction of purchase or sale unless immediately after effecting such transaction such broker ►,◄ [or] dealer ►or municipal securities dealer◄ makes a record of such transaction which record includes the name of such customer, the name, amount and price of the security, and the date and time when such transaction took place.

14. Section 240.15c1–8 is amended as indicated below:

§ 240.15c1–8 Sales at the market.

The term "manipulative, deceptive, or other fraudulent device or contrivance," as used in Section 15(c)(1) of the act, is hereby defined to include any representation made to a customer by a broker►,◄ [or] dealer ►or municipal securities dealer◄ who is participating or otherwise financially interested in the primary or secondary distribution of any security which is not admitted to trading on a national securities exchange that such security is being offered to such customer "at the market" or at a price related to the market price unless such broker►,◄ [or] dealer ►or municipal securities dealer◄ knows or reasonable grounds to believe that a market for such security exists other than that made, created, or controlled by him, or by any person for whom he is acting or with whom he is associated in such distribution, or by any person controlled by, controlling or under common control with him.

15. Section 240.15c2–4 introductory text is amended to read as follows:

§ 240.15c2–4 Transmission or maintenance of payments received in connection with underwritings.

It shall constitute a "fraudulent, deceptive or manipulative act or practice" as used in section 15(c)(2) of the Act, for any broker►,◄ [or] dealer ►or municipal securities dealer◄ participating in any distribution of securities, other than a firm-commitment underwriting, to accept any part of the sale price of any security being distributed unless:

(a) The money or other consideration received is promptly transmitted to the persons entitled thereto; or

(b) If the distribution is being made on an "all-or-none" basis, or on any other basis which contemplates that payment is not to be made to the person on whose behalf the distribution is being made until some further event or contingency occurs, (1) the money or other

V40251 DEC 31 75 XUM

consideration received is promptly deposited in a separate bank account, as agent or trustee for the persons who have the beneficial interests therein, until the appropriate event for contingency has occurred, and then the funds are promptly transmitted or returned to the persons entitled thereto, or (2) all such funds are promptly transmitted to a bank which has agreed in writing to hold all such funds in escrow for the persons who have the beneficial interests therein and to transmit or return such funds directly to the persons entitled thereto when the appropriate event or contingency has occurred.

16. Section 240.15c2–5(c) is added to read as follows:

§ 240.15c2–5 Disclosure and other requirements when extending or arranging credit in certain transactions.

* * * * *

►(c) Paragraph (a)(2) of this section shall not apply to any offer to extend credit or arrange any loan, in connection with any offer or sale, or attempt to induce the purchase, of any municipal security as defined in section 3(a)(29) of the Act.◄

17. Section 240.15c2–7 is amended as indicated below:

§ 240.15c2–7 Identification of quotations.

(a) It shall constitute an attempt to induce the purchase or sale of a security by making a "fictitious quotation within the meaning of section 15(c)(2) of the Act, for any broker►,◄ [or] dealer ►or municipal securities dealer◄ to furnish or submit, directly or indirectly, any quotation for a security to an inter-dealer-quotation-system, unless:

(1) The inter-dealer-quotation-system is informed, if such is the case, that the quotation is furnished or submitted;

(i) By a correspondent broker►,◄ [or] dealer ►or municipal securities dealer◄ for the account or in behalf of another broker►,◄ [or] dealer ►municipal securities dealer◄, and if so, the identity of such other broker►,◄ [or] dealer ►or municipal securities dealer◄; and/or

(ii) In furtherance of one or more other arrangements (including a joint account, guarantee of profit, guarantee against loss, commission, markup, markdown, indication of interest and accommodation arrangement) between or among brokers►,◄ [or] dealers ►or municipal securities dealers◄, and, if so, the identity of each broker►,◄ [or] dealer ►or municipal securities dealer◄ participating in any such arrangement or arrangements: *Provided, however*, that the provisions of this subparagraph shall not apply if only one of the brokers►,◄ [or] dealers ►or municipal securities dealers◄ participating in any such arrangement or arrangements furnishes or submits a quotation with respect to the security to an inter-dealer-quotation-system.

(2) The inter-dealer-quotation-system to which the quotation is furnished or submitted makes it a general practice to disclose with each published quotation, by appropriate symbol or otherwise, the category or categories (subparagraph (1). (i) and/or (ii) of this paragraph) in furtherance of which the quotation is submitted, and the identities of all other brokers►,◄ [or] dealers ►or municipal securities dealers◄ referred to in subparagraph (1) of this paragraph where such information is supplied to the inter-dealer-quotation system under the provisions of subparagraph (1) of this paragraph.

(b) It shall constitute an attempt to induce the purchase or sale of a security by making a "fictitious quotation," within the meaning of section 15(c)(2) of the Act, for a broker►,◄ [or] dealer ►or municipal securities dealer◄ to enter into any correspondent or other arrangement (including a joint account, guarantee of profit, guarantee against loss, commission markup, markdown, indication of interest and accommodation arrangement) in furtherance of which two or more brokers►,◄ [or] dealers ►or municipal securities dealers◄ furnish or submit quotations with respect to a particular security unless such broker►,◄ [or] dealer ►or municipal securities dealer◄ informs all brokers►,◄ [or] dealers ►or municipal securities dealers◄ furnishing or submitting such quotations of the existence of such correspondent and other arrangements, and the identity of the parties thereto.

(c) For purposes of this section:

(1) The term "inter-dealer-quotation-system" shall mean any system of general circulation to brokers►,◄ [and] dealers ►and/or municipal securities dealers◄ which regularly disseminates quotations of identified brokers►,◄ [or] dealers ►or municipal securities dealers◄ but shall not include a quotation sheet prepared and distributed by a broker►,◄ [or] dealer ►or municipal securities dealer◄ in the regular course of his business and containing only quotations of such broker►,◄ [or] dealer ►or municipal securities dealer◄.

* * * * *

(3) The term "correspondent" shall mean a broker►,◄ [or] dealer ►or municipal securities dealer◄ who has a direct line of communication to another broker►,◄ [or] dealer ►or municipal securities dealer◄ located in a different city or geographic area.

18. Section 240.15c2–11 is amended by adding a new paragraph (f)(4).

§ 240.15c2–11 Initiation or resumption of quotations without specific information.

* * * * *

(f) * * *

►(4) The publication or submission of a quotation respecting a municipal security as defined in section 3(a)(29) of the Act.◄

* * * * *

19. The Securities and Exchange Commission hereby proposes certain additions to Part 240 of Chapter II of Title 17 of the Code of Federal Regulations regarding the regulation of municipal securities professionals and transactions in municipal securities pursuant to its authority under the Securities Exchange Act of 1934, and particularly Sections 2, 3, 10, 15, 15B, 17 and 23 thereof (15 U.S.C. 78b, 78c, 78j, 78o, 78o–4, 78q and 78w). The text of the proposed rules are as follows:

§ 240.15b10–12 Exemption for certain municipal securities brokers and municipal securities dealers.

The following sections adopted pursuant to section 15(b) of the Act shall not apply to any person who is required to register as a broker or dealer solely by reason of acting as a municipal securities broker or municipal securities dealer:

240.15b10–1	240.15b10–7
140.15b10–2	240.15b10–8
240.15b10–3	240.15b10–9
240.15b10–4	240.15b10–10
240.15b10–5	240.15b10–11
240.15b10–6	

§ 240.15Ba2–4 Registration of successor to registered municipal securities dealer.

In the event that a municipal securities dealer succeeds to and continues the business of another registered municipal securities dealer the registration of the predecessor shall be deemed to remain effective as the registration of the successor for a period of 75 days after such succession, provided that an application for registration on Form MSD (§ 249.950), in the case of a municipal securities dealer which is a bank or a separately identifiable department or division of a bank, or Form BD (§ 249.501), in the case of any other municipal securities dealer, is filed by such successor within 30 days after such succession.

§ 240.15Ba2–5 Registration of fiduciaries.

The registration of a municipal securities dealer shall be deemed to be the registration of any executor, administrator, guardian, conservator, assignee for the benefit of creditors, receiver, trustee in insolvency or bankruptcy, or other fiduciary, appointed or qualified by order, judgment, or decree of a court of competent jurisdiction to continue the business of such registered municipal securities dealer: provided, that such fiduciary files with the Commission, within 30 days after entering upon the performance of his duties, a statement setting forth as to such fiduciary substantially the information required by Form MSD (§ 249.950), if the municipal securities dealer is a bank or a separately identifiable department of a bank, or Form BD (§ 249.501), if the municipal securities dealer is other than a bank or a separately identifiable department or division of a bank.

§ 240.15B2a–6 Adoption of application filed by predecessor.

Registration of a municipal securities dealer pursuant to an application filed on behalf of such municipal securities dealer by a predecessor shall terminate on the 30th day after the effective date thereof unless the successor shall adopt the application as its own by filing a statement adopting such application on or before such date. Any statement adopting such an application shall constitute a representation to the Commission that the information contained in such application, and in the supplements and amendments thereto, is true and correct.

§ 240.15Bc3–1 Withdrawal from registration of municipal securities dealers.

(a) Notice of withdrawal from registration as a municipal securities dealer pursuant to section 15B(c) shall be filed on Form MSDW (§ 249.950a), in the case of a municipal securities dealer which is a bank or a separately identifiable department or division of a bank, or Form BDW (§ 249.501a), in the case of any other municipal securities dealer, in accordance with the instructions contained therein.

(b) Except as hereinafter provided, a notice to withdraw from registration filed by a municipal securities dealer pursuant to section 15B(c) shall become effective for all matters on the 60th day after the filing thereof with the Commission or within such shorter period of time as the Commission may determine. If a notice to withdraw from registration is filed with the Commission at any time subsequent to the date of the issuance of a Commission order instituting proceedings pursuant to section 15B(c) of the Act to censure, place limitations on the activities, functions or operations of, or suspend or revoke the registration of, such municipal securities dealer, or if, prior to the effective date of the notice of withdrawal pursuant to this paragraph (b), the Commission institutes such a proceeding or a proceeding to impose terms or conditions upon such withdrawal, the notice of withdrawal shall not become effective pursuant to this paragraph (b) except as such time and upon such terms and conditions as the Commission deems necessary or appropriate in the public interest or for the protection of investors.

(c) Every notice of withdrawal filed pursuant to this section shall constitute a "report" within the meaning of sections 17 and 32(a) of the Act.

§ 240.17a–21 Reports of Municipal Securities Rulemaking Board.

(a) Annual Report of the Municipal Securities Rulemaking Board. The Municipal Securities Rulemaking Board shall file annual reports with Commission as follows:

(1) Prior to September 1 of each of the years 1976 and 1977 the Municipal Securities Rulemaking Board shall file with the Commission an annual report for the twelve months immediately preceding July 1 of that year and shall include whatever information, data and recommendations it considers advisable with regard to matters within its jurisdiction.

(2) Prior to December 1 of each year beginning in 1978, the Municipal Securities Rulemaking Board shall file with the Commission an annual report for the twelve months immediately preceding October 1 of that year and shall include whatever information, data and recommendations it considers advisable with regard to matters within its jurisdiction.

(3) The Muncipal Securities Rulemaking Board shall include in its annual report a statement and an analysis of its expenses and operations including:

(i) A balance sheet as of the end of the Board's latest fiscal year and a statement of revenues and expenses for the Board for that fiscal year;

(ii) The rules of the Board (including a statement indicating all additions to or deletions from the rules of the Board during the period covered by the report);

(iii) Interpretations of the rules of the Board (including staff interpretative letters);

(iv) All forms required by rule of the Board to be filed by municipal securities brokers or municipal securities dealers or any class thereof;

(v) The following information concerning members of the Board: (A) Name, (B) dates of commencement and termination of present term of office, (C) length of time each member has held such office, (D) name of firm with which connected, (E) title of such firm, (F) city wherein the principal office of such firm is located;

(vi) Address of the Board, the name and address of each person authorized to receive notices on behalf of the Board from the Commission, and the name and address of counsel to the Board, if any;

(vii) Any classes of municipal securities brokers or municipal securities dealers, the purpose for which such persons are classified, and the rules of the Board which apply differently to different classes of such persons;

(viii) A list as of the latest practicable date, alphabetically arranged, of all municipal securities brokers and municipal securities dealers required to pay to the Board fees and charges to defray the costs and expenses of operating the Board. The list should include for each:

(A) The name,

(B) The principal place of business,

(C) Form of organization (e.g., sole proprietorship, partnership, corporation),

(D) In the case of a municipal securities dealer, whether or not such municipal securities dealer is a bank or a separately identifiable department or division of a bank.

(4) Within 10 days after the discovery of any inaccuracy in its annual report or in any amendment thereto, the Municipal Securities Rulemaking Board shall file with the Commission an amendment correcting such inaccuracy.

(b) Supplemental Reports of the Municipal Securities Rulemaking Board. The Municipal Securities Rulemaking Board shall file supplemental reports with the Commission as follows:

(1) Within 10 days after issuing or making generally available to municipal securities brokers and municipal securities dealers any materials (including notices, circulars, bulletins, lists, periodicals, etc.) the Municipal Securities Rulemaking Board shall file with the Commission three copies of such material (unless such material is filed with the Commission pursuant to Rule 19b–4) (§ 240.19b–4).

(2) Within 10 days after any action is taken which renders no longer accurate any of the information required by paragraph (a) of this section to be contained in the annual report of the Municipal Securities Rulemaking Board (except action reported to the Commission pursuant to Rule 19b–4 (§ 240.19b–4) and action affecting a balance sheet or income statement contained in such report), the Board shall file with the Commission written notification in triplicate setting forth the nature of such action and the effective date thereof. Such notice may be filed either in the form of a letter or in the form of a notice made generally available to municipal securities brokers and municipal securities dealers.

20. The Securities and Exchange Commission hereby proposes the following addition to Part 249 of Chapter II of Title 17 of the Code of Federal Regulations to provide for the withdrawal from registration of a municipal securities dealer, pursuant to its authority under the Securities Exchange Act of 1934, and particularly sections 2, 3, 10, 15B, 17 and 23 thereof (15 U.S.C. 78b, 78c, 78j, 78o–4, 78q and 78w). The proposed addition is as follows:

§ 249.950a Form MSDW, Notice of withdrawal from registration as a municipal securities dealer pursuant to § 240.15Bc3–1 of this chapter.

This form shall be used by banks or separately identifiable departments or divisions of banks for filing a notice of withdrawal as a municipal securities dealer pursuant to Rule 15Bc3–1 (§ 240.15Bc3–1 of this chapter).

All interested persons are invited to submit their views on the foregoing rule proposals in writing to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, not later than January 15, 1976. Commentators should make specific reference to those proposed rules (or parts thereof) which they believe should be amended further in any way. Comments are also invited on any other existing rules which presently do (or, on December 1, 1975, will apply to municipal securities professionals or transactions in municipal securities which commentators believe should be abrogated or amended in those respects; the Commission particularly wishes to receive comment on the matters discussed above with respect to the consequences of its proposed amendment of § 240.15c1–1 and its belief that § 240.15c1–4 should not be amended insofar as requires disclosure of "the other side" in agency transactions. All communications should refer to File No. S7–604, and will be available for public inspection in the Commission's Public Reference Room, 1100 L Street, N.W., Washington, D.C.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

SECRETARY OF STATE'S ADVISORY COMMITTEE ON PRIVATE INTERNATIONAL LAW; STUDY GROUP ON NEGOTIABLE INSTRUMENTS

Meeting

A meeting of the Study Group on Negotiable Instruments, a subgroup of the Secretary of State's Advisory Committee on Private International Law, will be held on Friday, January 23, 1976, in the Ernest Scott Seminar Room (146) of the University of Pennsylvania Law School, 3400 Chestnut Street, Philadelphia, Pennsylvania. The meeting, which will begin at 10 a.m., will be open to the public.

The primary purpose of the meeting is to review a draft uniform law on negotiable instruments under consideration by a Working Group of the United Nations Commission on International Trade Law.

Members of the general public may attend up to the limits of the capacity of the meeting room and participate in the discussion subject to instructions of the Chairman. It is requested that prior to January 23, 1976, members of the public who desire to attend the meeting inform their name and affiliation and address to Mr. Robert E. Dalton, Office of the Legal Adviser, Department of State; the telephone number is area code 202, 632-2107.

Dated: December 18, 1975.

ROBERT E. DALTON,
Executive Director.

U.S. NATIONAL COMMITTEE FOR THE INTERNATIONAL RADIO CONSULTATIVE COMMITTEE (CCIR)

Meeting

The Department of State announces that the U.S. National Committee for the International Radio Consultative Committee (CCIR) will meet on February 5, 1976, at 9:30 a.m. in Room 1105, Department of State, 22nd and C Streets, NW., Washington, D.C.

The U.S. National Committee assists in the resolution of administrative/procedural problems pertaining to U.S. CCIR activities; provides advice on matters of policy and positions in preparation for CCIR Plenary Assemblies and meetings of the international Study Groups; and recommends the disposition of proposed U.S. contributions to the international CCIR which are submitted to the Committee for consideration.

The purposes of the meeting on February 5 will be:

a. Review of preparations for the international meetings of CCIR Study Groups in 1976 and consideration of position papers;

b. Consideration of U.S. participation in a Joint Working Party for Coordination of CCIR Report to the 1977 World Administrative Radio Conference for the planning of the Broadcasting Satellite Service in the 12 GHz band;

c. Review of preparations for the 1979 World General Administrative Radio Conference;

d. Review of the U.S. CCIR Research Objectives.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. It is requested that prior to February 5, 1976, members of the general public who plan to attend the meeting inform their name and address to Mr. Gordon L. Huffcutt, Office of International Communications Policy, Department of State; the telephone number is Area Code 202, 632-2592. All non-Government attendees must use the C Street entrance to the building.

Dated: December 18, 1975.

GORDON L. HUFFCUTT,
Chairman,
U.S. National Committee.

Office of the Secretary

INCOME TAX TREATY

United States and Yugoslavia To Hold Discussions

The Treasury Department today announced that representatives of the United States and Yugoslavia plan to meet in Belgrade in February 1976 to begin discussions of a proposed bilateral income tax treaty.

At present, there is no income tax convention between the two countries.

The proposed treaty is intended to prevent double taxation and to facilitate trade and investment between the two countries. It will be concerned with the tax treatment of income of individuals and companies from business, investment, and personal services, and the procedures for administering the provisions of the treaty.

The "model" income tax treaty developed by the Organization for Economic Cooperation and Development will be taken into account along with recent U.S. treaties with other countries, such as the treaties with Romania and Poland, which were signed in 1973 and 1974, respectively, and were recently approved by the United States Senate.

Persons wishing to make comments and suggestions about the discussions to be held with representatives of Yugoslavia should submit their views in writing before February 1, 1976, to Charles M. Walker, Assistant Secretary of the Treasury, U.S. Treasury Department, Washington, D.C. 20220.

[SEAL] ROBERT J. PATRICK, JR.,
International Tax Counsel,
Office of Tax Analysis.

[FR Doc.75-35102 Filed 12-30-75;8:45 am]

Office of Revenue Sharing

ENTITLEMENT DATA

Procedure for Improvement

The Office of Revenue Sharing is conducting a Supplemental Data Improvement Program during the period from December 8, 1975 to January 12, 1976 on data to be used in computing final allocations for units of State and local government pursuant to the State and Local Fiscal Assistance Act of 1972 (Pub. L. 92-512, 31 U.S.C.A. Chapter 24) for the sixth entitlement period (July 1, 1975 through June 30, 1976). All State governments, the District of Columbia, and only those units of local government whose data elements for the sixth entitlement period have been revised since February 1975 are participants in this Supplemental Data Improvement Program. These participating governments have been provided those data elements for review which have been revised since February 1975. These data, which were mailed on December 8, 1975, were compiled by the Bureau of the Census, the Internal Revenue Service and the Bureau of Indian Affairs. Definitions of each data element are provided in this notice.

Each participating recipient unit of local government will receive either a Form 3233 or a Form 3240. Only those participating local governments in areas declared major disaster areas since April 1, 1974 under the Disaster Relief Act of 1974 (Pub. L. 93-288, 42 U.S.C. Chapter 58) and whose Fiscal Year 1974 adjusted taxes and/or intergovernmental transfers were possibly adversely affected by the major disaster will receive Form 3240. These local governments, in order to be eligible for the data stabilization benefit of that Act, which allows them to use their predisaster data figures for adjusted taxes and/or intergovernmental transfers rather than their post-disaster figures, are required to certify that both or either of their 1974 adjusted taxes and intergovernmental transfers were adversely affected by the disaster. Such certification must be received in the Office of Revenue Sharing by January 12, 1976.

All other participating recipient local governments with data revisions for the sixth entitlement period since February, 1975, received Form 3233. State governments and the District of Columbia were notified by letter.

If any recipient State or local government believes that there are errors in these data, relative to these definitions and effective dates, they should so inform the Office of Revenue Sharing in writing with appropriate documentation on or before January 12, 1976. Local governments may do this by returning Form 3233, with evidence and documentation to fully justify the proposed corrections of data. Governments which receive Form 3240 also have the opportunity to question their data elements by returning Form 3240 with evidence and documentation to fully justify the proposed corrections to these data. Form 3233 or 3240 and supporting justifications must be received by the Office of Revenue Sharing on or before January 12, 1976 in order that corrections to data elements may be used in determining final sixth entitlement period allocations.

Governments which receive Form 3233 and which do not wish to question their data are requested not to return the form. Governments which receive Form 3240 and which do not wish to question their data or provide a disaster certification are requested not to return the form.

The data of record in the Office of Revenue Sharing for those participating governments which do not respond by January 12, 1976, will be used to calculate their final allocation for the sixth entitlement period. In the case of those participating local governments sent Form 3240, the post-disaster data of record in the Office of Revenue Sharing will be considered valid if the Office of Revenue Sharing has not received a disaster certification by January 12, 1976.

Upon receipt of any written response from a participating recipient State or local government, the Office of Revenue Sharing, with the cooperation of the Bureau of the Census or the Bureau of Indian Affairs, will substantiate or correct all data questioned and advise the recipient government of its findings. Those findings will constitute final administrative action for purposes of giving recipient governments standing to obtain judicial review of the questioned data.

In order to assure equitable treatment of each recipient, the books will be kept open until all evidence and documentation received in the Office of Revenue Sharing on or before January 12, 1976 have been reviewed and data determined to be erroneous have been corrected.

Dated: December 22, 1975.

[SEAL] JOHN K. PARKER,
Acting Director,
Office of Revenue Sharing.

Approved: DONALD L. E. RITGER, *General Counsel.*

LOCAL GOVERNMENT DATA DEFINITIONS

1. POPULATION

Population of Counties, Cities, Towns, and Townships

The *population* of a unit of government for revenue sharing purposes is the resident population as of July 1, 1973 as determined by the Bureau of the Census. The July 1, 1973 estimates of population were derived by the Bureau of the Census using a component procedure whereby components of population *change* are estimated separately and then added to the enumerated 1970 census populations of the units of local government. The population base reflects all population corrections made to the data after the initial Bureau of the Census publication as well as changes due to new incorporations, disincorporations and annexations.

The components of population change are:

1. *Natural increase, i.e. the excess of births over deaths:* Annual births and deaths were compiled from State vital statistics offices supplemented by data from the National Center for Health Statistics. County statistics were available for all States. When vital statistics were not available for all areas within a county, the births and deaths for these areas were distributed proportionately on the basis of the 1970 census population.

2. *Net Migration:* This component of population change was estimated for each unit of government by developing a net migration rate for the period between 1970 and 1973. The net migration rate was developed by matching IRS files of 1972 tax returns and 1969 tax returns. Thus it was possible to determine for each unit of local government the number of taxpayers who did not move, or who moved in or out of the jurisdiction between 1970 and 1973. The number of those who moved in minus the number of those who moved out yields the net migration. The net migration rate of taxpayers was applied to the total population in an area.

In addition to the estimates of natural increase and net migration, adjustments were incorporated into the estimates to account for immigration from abroad, institutional inmates, members of the armed forces and college students. For all areas where special censuses were taken by the Bureau of the Census close to the July 1, 1973 estimate date, the special census counts were used in lieu of the estimates. The special census counts were adjusted to the July 1, 1973 estimate date. In several States, the subcounty estimates were also merged with estimates developed by State agencies participating in the Federal-State Cooperative Program for Local Population Estimates.

The July 1, 1973 population estimates being used for revenue sharing for counties represent the average of July 1, 1973 administrative record-based estimates derived by the procedure described above and July 1, 1973 estimates derived from the Federal-State Cooperative Program. The county populations were further adjusted to be consistent with State estimates published by the Bureau of the Census in Current Population Reports Series P-25. The population estimates for the governments in each county area were adjusted to be consistent with the county population.

The July 1, 1973 population estimates are related to boundaries as of December 31, 1973. New incorporations, disincorporations and qualifying annexations, i.e., annexations made by places with a 1973 population of at least 5,000 and for which are annexed areas include population equal to 5% or more of the annexing government's population have been recognized up through 1974.

Population of Indian Tribes and Alaskan Native Villages

The population of an Indian tribe or Alaskan Native village for revenue sharing purposes is the resident population as of July 1, 1973 as determined by the Bureau of Indian Affairs. For Indian tribes, the resident population is the number of Indians living within the boundaries of the tribal reservation plus the number of Indians living on trust land (including public domain allotments) adjacent to the reservation and pertaining to the tribe. The adjacent trust land may be tribally owned or individually owned. Resi-

V40251 DEC 31 75 XUM

dent non-Indian members of families with an Indian head or spouse are also included in the population estimates.

For Alaskan Native villages, the resident population is the number of Indians, Aleuts and Eskimos living within the boundaries of the village. Resident non-Alaskan Native members of families with an Alaskan Native head or spouse are also included in the population estimate.

The methodology used by the Bureau of Indian Affairs to update the 1970 population of an Indian tribe or Alaskan Native village depended on the type of accurate data that was available for that tribe or village. The types of data available varied from place to place. Two examples of the types of data used to make the July 1, 1973 population estimates are lists of residents and school enrollment data. In many cases the Bureau of Indian Affairs worked directly with the Indian tribe or Alaskan Native village to obtain the best available data.

II. PER CAPITA INCOME

The 1972 per capita income (PCI) is the estimated mean or average amount of total money income received during calendar year 1972 by all persons residing in a given political jurisdiction in April 1973. The 1972 PCI estimates are based on data from the 1970 Census, or later special censuses, and reflect corrections to the Census data which have been made since 1970.

The 1970 census PCI data were updated to 1972, based on income data from the 1969 and 1972 Federal income tax returns and State and county income estimates prepared by the Bureau of Economic Analysis (BEA) to measure the change from 1969 to 1972.

Total money income is the sum of:
- Wage or salary income
- Net nonfarm self-employment income
- Net farm self-employment income
- Social Security or railroad retirement income
- Public assistance income
- All other income such as interest, dividends, veteran's payments, pensions, unemployment insurance, alimony, etc.

The total represents the amount of income received before deductions for personal income taxes, Social Security, bond purchases, union dues, medicare deductions, etc.

Receipts from the following sources are not included as income: Money received from the sale of personal property; capital gains; the value of income "in kind" such as food produced and consumed in the home or free living quarters; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; gifts and lump sum inheritances, insurance payments, and other types of lump sum receipts.

County Estimates

At the county level, 1972 PCI estimates were developed by carrying forward the per capita amount for each income type listed above. Census wage and salary per capita income amounts were updated using the percent change in the IRS wage and salary per exemption. For the remaining income types, the percent change in the BEA per capita amounts were used. The 1972 per capita amounts for each income type were then multiplied by the July 1, 1973 population estimates, and the resulting county income aggregates were adjusted to State income aggregates. For each county the aggregate amounts for each income type were added to get an estimated 1972 total money income which was then divided by the estimated population to derive the 1972 PCI estimate.

Subcounty Governmental Unit Estimates

For all townships over 1,000 population and for all municipalities over 1,000 not in townships, the updates were also developed using per capita amounts. Updated census earnings plus "other income" per capita were developed using the percent changes in IRS Adjusted Gross Income per exemption. The estimates for Social Security and public assistance were made by assuming that the 1970 census per capita amounts for these income types grew at the same rate as that for the county. The PCI for places over 1,000 population in townships was assumed to grow at the same rate as that for the entire township.

The PCI estimates for governmental units of 500–999 population were computed by applying the average percent change in PCI for the county, excluding large places (population of 10,000 or more), to their 1970 census PCI. PCI estimates for governmental units of under 500 population were assumed to be equal to the average PCI of the county excluding any large places. The subcounty estimates were adjusted to the county estimates to insure conformity.

III. ADJUSTED TAXES

The *adjusted taxes* for a unit of local government, as derived from the General Revenue Sharing Survey conducted by the Bureau of the Census in 1974, are the total taxes of the unit of government in Fiscal Year 1974 (that government's 12-month accounting period that ended between July 1, 1973 and June 30, 1974) *excluding* taxes for schools and other educational purposes. A government's total Fiscal Year 1974 taxes are those which were exacted by that government and which were collected by or for that government during Fiscal Year 1974. Total general purpose taxes include:

1. *Property taxes*—county, municipal or township taxes levied on the value of real or personal property.

2. *Sales taxes*—county, municipal or township taxes, either general or specific, on goods and services, measured as a percent of sales or receipts, or as an amount per unit sold.

Sales taxes are of two types:
a. General sales or gross receipts tax
b. Selective sales or gross receipts tax.
Examples of selective sales taxes are:

- Gasoline tax
- Liquor tax
- Cigarette and Tobacco tax
- Public utilities excise tax
- Amusement tax
- Hotel and motel room occupancy and meals tax

3. *Licenses, permits and other taxes*—county, municipal or township taxes not included in items 1 and 2 above.
Examples of license taxes are:

- Alcoholic beverage licenses
- Business privilege licenses
- Motor vehicle and operators licenses
- Hunting and fishing licenses
- Marriage licenses
- Inspection fees charged in connection with the granting or renewal of a license

Examples of permits are:
- Building permits
- Permits for a business or non-business privilege

Examples of other taxes are:
- Income, payroll or earnings tax
- Mortgage transfer and recordation tax
- Severance tax
- Fee retained by a government for collecting taxes for other governments

General purpose taxes do not include receipts from service charges, special assessments, interest earnings or fines.

A tax which is jointly imposed by a State government and units of local government is apportioned in order to determine local tax effort. An example of a jointly imposed tax would be a five percent sales tax of which four percent was imposed by the State government and one percent was imposed by the local government. In such case the amount of revenue realized by virtue of the one percent locally imposed portion will be credited to local tax effort. It is important to distinguish a "jointly imposed tax" from a wholly State imposed tax where part of the tax revenue is shared with local governments. An example of a shared State tax would be a five percent sales tax wholly imposed by the State, but which provides a 20 percent revenue share to units of local government. A local government's share of a "wholly State imposed tax" is classified as an intergovernmental transfer and not as local tax effort. Thus, in determining local tax effort the point of reference is the government which imposed the tax rather than the government which expended the resulting tax revenue.

Certain sales taxes imposed by counties which meet the requirements of Section 109 (e) (2) (B) of the Revenue Sharing Act may be considered to be taxes of the units of local government within the county rather than the county government. The "Memphis Rule," as this section is called, provides for situations whereby a county government imposes a sales tax within the geographic area of local governments within the county, and then shares part or all of the applicable tax revenue with those local governments. These taxes must be transferred by the county government without specifying the purposes for which the local governments may spend the revenues. In such cases, the Governor of the State must certify to the Secretary of the Treasury that the requirements of the "Memphis Rule" are met. This certification must be made by the Governor before the beginning of the entitlement period when the "Memphis Rule" is to take effect. The taxes which are transferred by the county to the units of local government will then be considered for revenue sharing purposes to be taxes of the local governments and not the taxes of the county government.

Amounts in lieu of taxes received by a government from a utility it operates are treated as internal transfers and are excluded from taxes. Amounts in lieu of taxes received from utilities operated by other governments are reported as intergovernmental transfers.

School taxes are tax revenues of a unit of government which are allocated for school purposes. They consist of taxes levied for current operation, capital outlay and debt service including amounts collected for a governmental unit's schools by the State or a local government acting as collecting agent.

In some jurisdictions tax revenues for purposes of education are not separately identifiable because education is financed by expenditure or transfer of monies from a general fund to a school fund. If so, then the ratio of tax revenues to total revenues in such general fund multiplied by the expenditure or transfer of monies from the general fund (or similarly named fund) for education purposes is taken to be the amount of tax revenues allocable to expenses for education.

IV. INTERGOVERNMENTAL TRANSFERS OF REVENUES

Intergovernmental transfers of revenue are amounts received by a unit of government from other governments in Fiscal Year 1974 (the government's 12-month accounting period that ended between July 1, 1973 and June 30, 1974) for use either for specific functions or for general financial support.

This amount is derived from the General Revenue Sharing Survey conducted by the Bureau of Census in 1974. The figure includes grants, shared taxes, contingent loans and reimbursments for tuition costs, hospital care, construction costs, etc. Intergovernmental revenue does not include amounts received from sale of property or commodities, utility services to other governments, or Federal general revenue sharing entitlement funds.

STATE GOVERNMENT AND DISTRICT OF COLUMBIA DATA DEFINITIONS

I. POPULATION

Population shall be determined on the same basis as resident population as determined by the Bureau of the Census for general statistical purposes.

The population of States used for revenue sharing purposes in Entitlement Period 6 is the *1974 population of States*. The 1974 population data for States are the estimates of the total resident populations of States as of July 1, 1974. These population estimates are those which were published by the Bureau of the Census in a report entitled *Estimates of the Population of States, July 1, 1974 and 1975* (*Current Population Reports*, Series P–25, No. 615) dated December 1975. Incorporated in these population totals for the year ending July 1, 1974, are estimates of population change, including migration, based on vital statistics, key population indicators and extrapolations of past trends. For a complete description of the methodology used, please consult the full report in the Bureau of the Census, Series P–25.

II. URBANIZED POPULATION

Urbanized population means the population of any area consisting of a central city or cities of 50,000 or more inhabitants (and beginning of the entitlement period when the "Memphis Rule" is to take effect. The taxes which are transferred by the county to the units of local government will then be considered for revenue sharing purposes to be taxes of the local governments and not the taxes of the county government.

Amounts in lieu of taxes received by a government from a utility it operates are treated as internal transfers and are excluded from taxes. Amounts in lieu of taxes received from utilities operated by other governments are reported as intergovernmental transfers.

School taxes are tax revenues of a unit of government which are allocated for school purposes. They consist of taxes levied for current operation, capital outlay and debt service including amounts collected for a governmental unit's schools by the State or a local government acting as collecting agent.

In some jurisdictions tax revenues for purposes of education are not separately identifiable because education is financed by expenditure or transfer of monies from a general fund to a school fund. If so, then the ratio of tax revenues to total revenues in such general fund multiplied by the expenditure or transfer of monies from the general fund (or similarly named fund) for education purposes is taken to be the amount of tax revenues allocable to expenses for education.

IV. INTERGOVERNMENTAL TRANSFERS OF REVENUES

Intergovernmental transfers of revenue are amounts received by a unit of government from other governments in Fiscal Year 1974 (the government's 12-month accounting period that ended between July 1, 1973 and June 30, 1974) for use either for specific functions or for general financial support.

This amount is derived from the General Revenue Sharing Survey conducted by the Bureau of Census in 1974. The figure includes grants, shared taxes, contingent loans and reimbursments for tuition costs, hospital care, construction costs, etc. Intergovernmental revenue does not include amounts received from sale of property or commodities, utility services to other governments, or Federal general revenue sharing entitlement funds.

STATE GOVERNMENT AND DISTRICT OF COLUMBIA DATA DEFINITIONS

I. POPULATION

Population shall be determined on the same basis as resident population as determined by the Bureau of the Census for general statistical purposes.

The population of States used for revenue sharing purposes in Entitlement Period 6 is the *1974 population of States*. The 1974 population data for States are the estimates of the total resident populations of States as of July 1, 1974. These population estimates are those which were published by the Bureau of the Census in a report entitled *Estimates of the Population of States, July 1, 1974 and 1975* (*Current Population Reports*, Series P–25, No. 615) dated December 1975. Incorporated in these population totals for the year ending July 1, 1974, are estimates of population change, including migration, based on vital statistics, key population indicators and extrapolations of past trends. For a complete description of the methodology used, please consult the full report in the Bureau of the Census, Series P–25.

II. URBANIZED POPULATION

Urbanized population means the population of any area consisting of a central city or cities of 50,000 or more inhabitants (and for such city or cities) which is treated as an urbanized area by the Bureau of the Census for general statistical purposes.

The urbanized population of States used for revenue sharing purposes in Entitlement Period 6 is the *1970 urbanized population of States*. A State's urbanized 1970 population is the amount of that State's 1970 population which was classified as an urbanized area according to Bureau of the Census 1973 Urbanized Area Criteria. (The Bureau of the Census revised its definitional criteria in 1973 for urbanized areas to make them more consistent with the criteria for Standard Metropolitan Statistical Areas (SMSAs). An urbanized area was defined for each SMSA using 1970 Census population.)

1. An urbanized area must include a central city or cities that qualify under one of the criteria listed below. *All population criteria refer to 1970 census population counts (except as specified in item 1a).*

a. A city of 50,000 inhabitants or more according to the 1970 census, a special census taken between 1960 and 1970 or the 1960 census provided that the city is located in an SMSA and is not included in an existing urbanized area.

b. A city having a population of at least 25,000 which, with the addition of the population of contiguous places, (incorporated or unincorporated) each of which has a population density of at least 1,000 persons per square mile, and which together constitute for general economic and social purposes a single community with a combined population of at least 50,000, provided that the city is located within an SMSA and is not included in an existing urbanized area.

2. In addition to a central city or cities, an urbanized area includes contiguous territory meeting the following criteria:

a. Incorporated places of 2,500 inhabitants or more but excluding the rural portions of extended cities.

b. Incorporated places with fewer than 2,500 inhabitants, provided that each has a closely settled area of 100 housing units or more; and all unincorporated places recognized in the 1970 census.

c. Contiguous small parcels of unincorporated land (delineated as either enumeration districts or block parcels prior to the 1970 census) determined to have a 1970 census population density of 1,000 inhabitants or more per square mile. (In this instance the areas of large nonresidential tracts devoted to such urban land uses as railroad yards, airports, factories, parks, golf courses, and cemeteries are excluded in computing the population density.)

d. Other similar small areas in unincorporated territory without regard to population density provided that they serve to eliminate enclaves, or to close indentations of one mile or less in width across the open end of the urbanized areas in order to eliminate narrow fingers of "rural" area, or to link outlying areas of qualifying density provided that these are not more than 1½ miles from the main body of the urbanized area.

III. INCOME

Income means total money income received from all sources, as determined by the Bureau of the Census for general statistical purposes.

The per capita income (PCI) of States used for revenue sharing purposes in Entitlement Period 6 is the *1972 per capita income of States*. The per capita income is the estimated mean or average amount of total money income received during calendar year 1972 by all persons residing in a State in April 1973. The 1972 PCI estimates are based on data from the 1970 Census, or later Special Censuses, and reflect corrections to the Census data which have been made since 1970.

Total money income is the sum of:
- Wage or salary income
- Net nonfarm self-employment income
- Net farm self-employment income
- Social Security or railroad retirement income
- Public assistance income
- All other income such as interest, dividends, veteran's payments, pensions, unemployment insurance, alimony, etc.

The total represents the amount of income received before deductions for personal income taxes, Social Security, bond purchases, union dues, medicare deductions, etc.

Receipts from the following sources are not included as income: Money received from the sale of personal property; capital gains; the value of income "in kind" such as food produced and consumed in the home or free living quarters; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; gifts and lump sum inheritances, insurance payments, and other types of lump sum receipts.

The 1970 census PCI data were updated to 1972, based on income data from the 1969 and 1972 Federal income tax returns and State income estimates prepared by the Bureau of Economic Analysis to measure the change from 1969 to 1972.

At the State level, 1972 per capita income estimates were developed by carrying forward the 1970 census aggregates for each type of income (as itemized above) and dividing the sum of the 1972 aggregates for each State by the estimated April 1973 population. The percent change in wage and salary income as reflected by the IRS data, was used to update the 1970 census wage and salary amount, while the remaining income types were carried forward using the percent change implied in estimates developed by the Bureau of Economic Analysis.

IV. STATE INDIVIDUAL INCOME TAX

The individual income tax of any State is the tax imposed upon the income of individuals by such State and described as a State income tax under section 164(a)(3) of the Internal Revenue Code of 1954.

The State individual income tax data for Entitlement Period 6 are calendar year *1974 State individual income tax collections*. Actual calendar year 1974 State individual income tax collections were obtained from the Bureau of the Census publication entitled *Quarterly Summary of State and Local Tax Revenue October–December 1974*. These are collections of taxes on individuals measured by net income and taxes distinctively on special types of income (e.g., interest, dividends, income from intangibles, etc.)

The calendar year 1974 State individual income tax collections data may not agree exactly with the figures in Census' *Quarterly Summary of State and Local Tax Revenue*, if corrections to these data were made subsequent to its publication.

V. FEDERAL INDIVIDUAL INCOME TAX LIABILITIES

Federal individual income tax liabilities attributed to any State for any period shall be determined on the same basis as such liabilities are determined for such period by the Internal Revenue Service for general statistical purposes.

In general, the Federal individual income tax liability of a State means the total annual Federal individual income taxes after credits attributed to the residents of the State by the Internal Revenue Service. Income tax after credits is determined by substracting statutory credits from the total of income tax before credits and the tax surcharge. It does not include self-employment tax or tax from recomputing prior year investment credit, nor does it take into account refundable credits.

Income tax before credits is the tax liability computed on taxable income based on:
1. The regular combined normal tax and surcharge including tax from the optional tax tables,
2. Alternative tax, or
3. Tax computed using the income averaging provisions.

Examples of credits which are applied against income taxes are:
1. Retirement income credit,
2. Investment credit,
3. Foreign tax credit, and
4. Other tax credits.

The State and Local Fiscal Assistance Act of 1972 (Revenue Sharing Act) specifies that, if available, data on Federal individual income tax liabilities should be "for taxable years ending . . . during the last calendar year ending before the beginning of such entitlement period."

The most recent Federal individual income tax liabilities available for revenue sharing use in Entitlement Period 6 are the *1973 IRS estimates of Federal individual income tax liabilities of States*. These estimated tax amounts for calendar year 1973 are the 1973 estimates from the Internal Revenue Service's *Statistics of Income*.

VI. STATE AND LOCAL TAXES

The State and local taxes are the compulsory contributions exacted by the State (or by any unit of local government or other political subdivision of the State) for public purposes (other than employee and employer assessments and contributions to finance retirement and social insurance systems, and other special assessments for capital outlay), as such contributions are determined by

V40251 DEC 31 75 XUM V

the Bureau of the Census for general statistical purposes.

State and local taxes data used for revenue sharing purposes in Entitlement Period 6 are the *fiscal year 1972–73 State and local taxes*, as reported by the Bureau of the Census in Table 17 of *Governmental Finances 1972–73* (GF 73, No. 5). Fiscal year 1972–73 is a government's 12-month accounting period that *ended* between July 1, 1972 and June 30, 1973 except for the State governments of Alabama and Texas (as well as school districts in those States). These latter governments have fiscal years which end at the end of September and August, respectively, and are treated as though they were part of the group with fiscal years ending June 30.

Tax revenue comprises amounts collected from all taxes which are imposed by a government and collected by that government or which are collected for it by another government acting as its agent. This includes interest and penalties but does not include amounts paid under protest and amounts refunded. For purposes of this definition, local governments and political subdivisions include counties (parishes in Louisiana and boroughs in Alaska), municipalities, townships, school districts, and special districts. A unit of government also includes, in addition to the central authority of the unit, any semi-autonomous boards, commissions, or other agencies dependent on it that do not in themselves meet requirements as to fiscal and administrative independence even though as to accounting records and other specific administrative aspects such agencies may operate outsid the central accounting and administrative pattern of the unit.

The State government information contained in State and local taxes is based on the annual Bureau of the Census survey of State finances. State finances statistics are compiled by representatives of the Bureau of the Census from official records and reports of the various States. The local government portion of the State and local taxes data are estimates based on information received from a sample of such governments. The sample consisted of approximately 16,000 local governments. Survey coverage applied to all counties having a 1970 population of 50,000 or more, all cities having 1970 population of 25,000 or more, all other governments whose relative importance in their State based on expenditure or debt was above a specified size, and a random sample of remaining units.

The fiscal year 1972–73 State and local taxes data may not agree exactly with the figures in *Governmental Finances 1972–73*, because corrections to these data have been made subsequent to its publication.

VII. GENERAL TAX EFFORT FACTOR

The general tax effort factor of any State for any entitlement period is the net amount collected from the State and local taxes of such State during the most recent reporting year, divided by the aggregate personal income attributed to such State for the same period. Personal income means the income of individuals, as determined by the Department of Commerce for national income accounts purposes.

The general tax effort factor of any State used for Entitlement Period 6 is the amount of fiscal year 1972–73 State and local taxes of the State divided by the aggregate personal income of the State for 1972. State and local taxes for fiscal year 1972–73 are as defined above, and as reported by the Bureau of the Census in Table 17 of *Governmental Finances 1972–73* (GF 73, No. 5).

Aggregate personal income for States in calendar year 1972 is estimated by the Bureau of Economic Analysis of the Department of Commerce for national income accounting purposes as reported in Table 1, pages 10–11, of *Survey of Current Business* August 1975, Volume 55, Number 8.

Aggregate personal income represents the total current income received by persons residing in the State from all sources, including transfers from government and business but excluding transfers among "persons." Not only individuals (including owners of unincorporated enterprises), but also nonprofit institutions, private trust funds, and private pension, health, and welfare funds are classified as "persons." Personal income is measured on a before-tax basis, as the sum of wages and salary disbursements, other labor income, proprietors' and rental income, interest and dividends, and transfer payments, minus personal contributions for social insurance, etc.

Department of the Army

ARMED FORCES EPIDEMIOLOGICAL BOARD

Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following committee meeting:

An ad hoc Study Team operating as a subcommittee of the Armed Forces Epidemiological Board will meet 15 January 1976 in Room 65, New York Academy of Medicine, 2 East 103rd St., N.Y., N.Y. 10029, from 0900 to 1700 hours. The purpose of the meeting is to review the current US Army Medical Department physical examination policy and to provide advice regarding the scope of periodic physical examinations for active duty Army personnel. The proposed agenda includes a discussion of current policy and procedures, proposed additional screening procedures and the development of improved health maintenance programs.

This meeting is open to the public, but limited by space accommodations.

Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. Interested persons wishing to participate should advise the Executive Secretary, AFEB in writing, Room 1B472 Pentagon, Washington, D.C. 20310.

DUANE G. ERICKSON,
LTC, MSG, USA,
Executive Secretary.

DECEMBER 23, 1975.

Office of the Secretary

DEPARTMENT OF DEFENSE WAGE COMMITTEE

Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, the Federal Advisory Committee Act, effective January 5, 1973, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, February 3, 1976; Tuesday, February 10, 1976; Tuesday, February 17, 1976; and Tuesday, February 24, 1976, at 9:45 a.m., in Room 1E801, The Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower and Reserve Affairs) concerning all matters involved in the development and authorization of wage schedules for Federal prevailing rate employees pursuant to Pub. L. 92–392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92–463, the Federal Advisory Committee Act, meetings may be closed to the public when they are "concerned with matters listed in section 552(b) of Title 5, United States Code." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency" (5 USC 552(b)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 USC 552(b)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that this meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 USC 552(b)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 USC 552(b)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the Chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by contacting the Chairman, Department of Defense Wage Committee, Room 3D281, The Pentagon, Washington, D.C.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD(C).

DECEMBER 24, 1975.

ENDANGERED SPECIES PERMIT

Notice of Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (P.L. 93–205).

Applicant: Regional Director, U.S. Fish and Wildlife Service, Post Office Box 3737, Portland, Oregon 97208.

OMB NO. 42-R1570

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE
FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Indicate only one)
☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
Management and perpetuation of the Palirump killifish, genus Empetrichythys in various natural and artificial habitats

3. APPLICANT. (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested)
R. Kahler Martinson, Regional Director
U.S. Fish and Wildlife Service
P.O. Box 3737
Portland, Oregon 97203

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:
☐ MR. ☐ MRS. ☐ MISS ☐ MS.
HEIGHT: WEIGHT:
DATE OF BIRTH: COLOR HAIR: COLOR EYES:
PHONE NUMBER WHERE EMPLOYED: SOCIAL SECURITY NUMBER:
OCCUPATION:

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION
U.S. Fish and Wildlife Service
Department of the Interior

ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT
University of Nevada, Las Vegas; Nevada Steinhardt Aquarium, San Francisco, California

NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.

IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED
NA

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED
States of Nevada and California at the following locations:
Corn Creek - Desert NWR
School Springs Pupfish Facility
Manse Springs
Ely Endangered Fish Refugium
Campus - Univ. of Nev., Las Vegas
Steinhardt Aquarium

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL, FISH AND WILDLIFE LICENSE OR PERMIT? ☐ YES ☒ NO
(If yes, list license or permit number)

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☐ YES ☒ NO
(If yes, list jurisdictions and type of document)

9. CERTIFIED CHECK OR MONEY ORDER (If applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF
$

10. DESIRED EFFECTIVE DATE: 11/23/75

11. DURATION NEEDED: 5 years

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (Do not type): William H. Meyer, Acting Regional Director
DATE: 11/14/75

3-200
R1-70

V40251 DEC 31 75 XUM

Date: NOVEMBER 14, 1975.

TO: Associate Director, Fish & Wildlife Management, Washington, D.C.

FROM: Acting Regional Director, Portland, Oregon.

SUBJECT: Request for an Endangered Species Permit.

1. This is a request for an Endangered Species Permit to cover scientific research including capture, management, transportation, reintroduction, and culture under artificial conditions, the Pahrump killifish *Empetrichythys latos*.

2. No contract or importation involved. Fish will come from the only remaining source of the species which is the Corn Creek Pond site located on the Desert National Wildlife Range, Las Vegas, Nevada.

3. The only known remaining populations of the Pahrump killifish were located in Manse Spring near Pahrump, Nevada. Manse Spring was in danger of being pumped dry, consequently 40 fish were transplanted to the Corn Creek Pond at Desert NWR in 1971. The Manse Spring water level dropped to a point where all fish were killed during the summer of 1975. As a consequence the transplanted individuals in Corn Creek Pond are the only remaining fish of this species.

Unfortunately Corn Creek Pond was inhabited with mosquito fish which pose a threat to the reproductive success of the remaining Pahrump killifish.

Plans have been made to rehabilitate Corn Creek Pond then reintroduce the Pahrump killifish while other transplant sites are located in order that perpetuation may be insured.

Under a temporary authorization some Pahrump killifish were seined from Corn Creek Pond and placed in a holding tank at Desert NWR. Although all precautions were taken in seining and transportation to the holding tank, some loss has occurred which has heightened concern for the remaining fish. At present the action plan to be carried out under this permit will be:

a. Trap and remove killifish by January 1, 1976. Place killifish in holding and rearing areas at:

1. Manse Springs.
2. School Spring facility.
3. University of Nevada, Las Vegas.
4. Steinhardt Aquarium, San Francisco.

b. Clean emergent vegetation from Corn Creek Pond, drain pond and remove remaining killifish by January 15, 1976.

c. Rehabilitate Corn Creek Pond January 15, 1976.

d. Reintroduce killifish after toxicant dissipation.

Concomitant with the above operation it has been deemed advisable by the recovery team, in nomination stage at present, that a portion of the population be transported to the University of Nevada, Department of Biological Sciences, at Las Vegas where they can be placed under the care of Dr. James E. Deacon, a member of the recovery team. The recovery team also recommended that twenty of the fish be air transported to the Steinhardt Aquarium in San Francisco and placed under the care of Mr. Al Castro, who is a recognized expert in breeding cyprinodonts. In regard to this matter, the California Department of Fish and Game has been contacted and will cooperate in every manner with regard to interstate transportation requirements. The State of Nevada is being contacted at present to determine the steps necessary to satisfy their import-export requirements.

Additional work to be carried out after the initial transplant-rehabilitation steps include construction of sheds over spring heads to protect the water source of Corn Creek Pond by April 1, 1976, lining of water channels by April 1, 1976, and the rehabilitation of two lower ponds by September 1, 1976.

Upon population recovery and stabilization in the Corn Creek Pond, transplant to additional sites will be considered including a pond on BLM land near Ely, Nevada. The proposed date for this action is during the spring of 1976.

4. Cooperators in management and restoration of this species are:

Dr. James E. Deacon,
Department of Biological Sciences,
University of Nevada,
Las Vegas, Nevada 89109.
Mr. Al Castro,
Steinhardt Aquarium,
California Academy of Sciences,
Golden Gate Park,
San Francisco, California 94118.

5. At this time the remaining killifish are transplants from the Manse Spring pond and are located in Corn Creek Pond on Desert NWR and in a holding tank at the refuge. These fish were seined and placed in the tank under emergency authorization by the Director of the U.S. Fish and Wildlife Service.

6. NA.

7. NA.

WILLIAM H. MEYER.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. TOMAHAWK WILDLIFE 4H CLUB
P.O. Box 70, R.F.D. 1
East New Market, Md.

AUGUST 12, 1975.

U.S. DEPARTMENT OF THE INTERIOR,
U.S. FISH AND WILDLIFE SERVICE,
Washington, D.C.

(Attention Endangered Species Division).

DEAR SIR: I am the leader of the Tomahawk Wildlife 4H Club. We are the only 4H club in Maryland that works with wildlife conservation.

I am writing you about an Endangered Species permit for Eastern Timber Wolf pups, to raise and carry to shows and programs on wildlife to let people know what a timber wolf looks like and to see some of the wildlife on the endangered list.

Thank you for your kindness.

Your truly,

HARLAN TJADEN,
4H Leader.

PART 17

Common Name: Eastern Timber Wolf (*Canis lupus lycaon*)—For propagation.

Number and age: 1—up to 1 year, male; 1—up to 1 year female.

Harlan Tjaden, leader of the Tomahawk Wildlife 4H Club.

The person who will be caring for them is a Migratory Bird Propagator.

We will be glad to send data to a studbook which will help endangered wildlife.

Will use proper transportation container.

All data will be recorded.

All information needed for contracts and agreements will be sent by copy to the Director—FWS/LE.

The Club does not want to see the Eastern Timber Wolf and other endangered wildlife become extinct.

We plan to keep this activity going as long as we can, to help the wildlife.

ADDITIONAL INFORMATION—NOVEMBER 1975

The pair of Timber Wolves are in the Warbonnet Zoo, Hazelhurst, Wisconsin 54531.

The Timber Wolves are in captivity in the Warbonnet Zoo.

The Timber Wolves were born in the Warbonnet Zoo at Hazelhurst, Wisconsin.

Facilities in which the wildlife will be housed:

2 x 4 x 8½ thick plywood roof.
2 x 4 x 8½ thick plywood sides.
Concrete pin floor.
2 x 4 x 6 wire fence; 12 ga wire.
Metal fence post.

The Club Leader, Harlan Tjaden, who will be taking care of the wolves, is a Federal Migratory Bird Propagator. He has been a Federal Migratory Bird Propagotar since April 4, 1974, and likes working with wildlife to save them from extinction.

We are willing to participate in a cooperative breeding program, and will maintain a studbook to help same the timber wolf from extinction.

The wolves will be shipped by air freight in wooden shipping containers. By shipping air freight they will leave the zoo in the morning and I will be able to pick them up that night.

A complete record of the following will be kept: The number born, the number of females, the number of males, the number that die, the number of calls to a veterinarian.

We have a wildlife 4H club that puts on programs to try to teach the public wildlife conservation.

The propagation of the timber wolf is to help it survive for years to come so live ones can be seen instead of pictures in books.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, N.W., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received within 30 days of the date of publication will be considered.

Dated: December 19, 1975.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

National Park Service

CHESAPEAKE AND OHIO CANAL NATIONAL HISTORICAL PARK COMMISSION

Meeting

Notice is hereby given in accordance with Federal Advisory Committee Act that a meeting of the Chesapeake and Ohio Canal National Historical Park Commission will be held on Saturday, January 17, 1976, at 9 a.m., at the Stephen Mather Training Center, Harpers Ferry, West Virginia.

The Commission was established by Pub. L. 91-664 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Chesapeake and Ohio Canal National Historical Park.

The members of the Commission are as follows:

Miss Nancy Long (Chairman), Glen Echo, Maryland.
Mrs. Caroline Freeland, Bethesda, Maryland.
Mr. Donald Frush, Hagerstown, Maryland.
Honorable Vladimir R. Wahbe, Baltimore, Maryland.
Mr. Anthony Abar, Annapolis, Maryland.
Mr. John C. Lewis, Hamilton, Virginia.
Mrs. Dorothy Grotos, Arlington, Virginia.
Mr. Burton C. English, Berkeley Springs, West Virginia.
Mr. Henry W. Miller, Jr., Paw Paw, West Virginia.
Mr. Lorenzo W. Jacobs, Jr., Washington, D.C.
Mr. Joseph H. Cole, Washington, D.C.
Mr. Ronald A. Clites, LaVale, Maryland.
Mrs. Mary Miltenberger, Cumberland, Maryland.
Dr. James H. Gilford, Frederick, Maryland.
Dr. Kenneth Bromfield, Frederick, Maryland.
Mr. Grant Conway, Brookmont, Maryland.
Mr. Edwin F. Wesely, Chevy Chase, Maryland.
Mr. John C. Frye, Gapland, Maryland.
Mr. Rome P. Schwagel, Keedysville, Maryland.

The matters to be discussed at this meeting include:

1. Proposed acquisition of abandoned Western Maryland Railway right-of-way, Hancock to Cumberland.
2. Watkins Island pumping station.
3. Report of the Commission's planning committee on the use of buildings along the canal.
4. Status of the General Plan.
5. Interpretive prospectus.
6. Jellystone Park.
7. Land acquisition.
8. Canal construction projects.
9. Abner Cloud House.
10. Proposed legislation Potomac National River.
11. Superintendents' reports.
12. County, State, and Washington, D.C., reports.

V 40 251 75 DEC 31 XUM

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited and it is expected that not more than 30 persons will be able to attend the sessions. Any member of the public may file with the Committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact Richard L. Stanton, Associate Director, Cooperative Activities, National Capital Parks, at Area Code 202–426–6715. Minutes of the meeting will be available for public inspection 2 weeks after the meeting, at the Office of National Capital Parks, Room 208, 1100 Ohio Drive, SW., Washington, D.C.

Dated: December 16, 1975.

J. L. DUNNING,
Director, National Capital Parks.

DEPARTMENT OF AGRICULTURE

Forest Service

HONKER DIVIDE MANAGEMENT UNIT

Land Use Plan: Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Honker Divide Management Unit, USDA–FS–R10–FES(Adm) 75–08.

This environmental statement is for the land use plan for the Honker Divide Management Unit, Prince of Wales Island, on the Tongass National Forest. Recreation, fish, wildlife, and timber are all key resources in the Unit. This plan proposes managing the Snakey Lakes and Thorne River-Hatchery Creek water travel route in a natural-appearing environment. The remainder of this management unit will be managed to optimize the fish, wildlife, timber, water, and recreation resources. The primary action having impact on the land is timber harvest, although increased recreation use and harvest of fish and game will also affect the ecosystem.

This final environmental statement was transmitted to CEQ on December 18, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service,
South Agriculture Bldg., Room 3231,

NEW YORK ZOOLOGICAL SOCIETY

Modification of a Permit

Notice is hereby given that, pursuant to the provisions of § 216.33(d) and (c) of the regulations Governing the Taking and Importing of Marine Mammals (39 FR 1851, January 15, 1974), the Public Display Permit issued to the New York Zoological Society, Boardwalk West 8th Street, Brooklyn, New York 11224, on May 9, 1975, is modified in the following manner:

Two (2) vice four (4) Atlantic bottlenosed dolphins (*Tursipps truncatus*) may be taken. The modification is due to the acquisition, by the New York Zoological Society, of two Atlantic bottlenosed dolphins already in captivity.

This modification is effective December 31, 1975.

The Permit, as modified, and documentation pertaining to the modification, is available for review in the Office of the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, and the Office of the Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Florida 33702.

Dated: December 3, 1975.

JACK W. GEHRINGER,
Deputy Director,
National Marine Fisheries Service.

SOUTHWEST FISHERIES CENTER

Modification of Permit

Notice is hereby given that, pursuant to the provisions of § 216.33(d) and (e) of the regulations governing the taking and importing of marine mammals (39 FR 1851, January 15, 1974), the Scientific Research Permit issued to the Southwest Fisheries Center, National Marine Fisheries Service, on December 11, 1974, as modified on January 6, 1975 (40 FR 1112) and on October 29, 1975 (40 FR 50299) is further modified in the following manner:

The period of validity of the Permit, during which the authorized taking and importing may occur, is extended from December 31, 1976, to December 31, 1980.

This modification is effective December 31, 1975.

The Permit, as modified, and documentation pertaining to the modification, is available for review in the Office of the Director, National Marine Fisheries Service, Washington, D.C. 20235, and the Office of the Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: December 4, 1975.

JACK W. GEHRINGER,
National Marine Fisheries Service.

FOUKE CO.

Receipt of Recommended Decision on Application to Waive Moratorium, MMPAH #1, 1975

The passage of the Marine Mammal Protection Act of 1972, 16 U.S.C. 1361–1407, among other things, imposed a moratorium on the importation of marine mammals and marine mammal products. The Act provides that waivers of the moratorium may be granted after a hearing on the record.

The Fouke Company of Greenville, South Carolina applied for a waiver of the moratorium to import up to 70,000 skins from the 1975 South African harvest. On July 7, 1975, a proposed waiver of the moratorium on importation, proposed regulations to govern the waiver, and notice of a hearing on these proposals were published in the FEDERAL REGISTER, 40 FR 28469.

On September 18, 1975, the hearing commenced and continued until September 24, 1975. The hearing was presided over by an Administrative Law Judge, the Honorable James W. Mast.

The Director, National Marine Fisheries Service, announces that on December 22, 1975, he received a recommended decision from Judge Mast. The decision, among other things, recommends a waiver of the moratorium.

Pursuant to 50 CFR 216.89 (40 FR 10183, March 5, 1975), interested persons are afforded an opportunity to submit written comments on the recommended decision. The decision is available for review in the Office of the Director, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C. 20235. Written comments, sent to the above address, will be accepted by the Director, National Marine Fisheries Service, through January 19, 1976.

Date: December 24, 1975.

HARVEY M. HUTCHINGS,
Acting Associate Director, for Resource Management, National Marine Fisheries Service.

Alcohol, Drug Abuse, and Mental Health Administration

MINORITY ADVISORY COMMITTEE

Meeting

In accordance wtih section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of January 1976:

Minority Advisory Committee, ADAMHA: January 14–16—Open Meeting; January 14, 15; 9:30 a.m., Room 13C–26, January 16; 9:30 a.m., Room 14–105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852. Contact Ernest F. Hurst, Parklawn Building, Room 13C–15, 5600 Fishers Lane, Rockville, Md. 20852, 301–443–3838.

Purpose: The Minority Advisory Committee, ADAMHA, advises the Secretary, Department of Health, Education, and Welfare, and the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, on needs, programs, and activities regarding minority alcohol, drug abuse and mental health matters, and makes recommendations for possible solutions which meet the needs and concerns of minority groups throughout the United States. The Committee functions in an advisory capacity to the Administrator, ADAMHA, on these matters which relate to the National Institute on Alcohol Abuse and Alcoholism, National Institute on Drug Abuse, and the National Institute of Mental Health.

Agenda: This meeting will be open to the public. Agenda items include (1) Planning Session, FY 1976–1977 Operating Plan, (2) Liaison and Orientation Sessions with Staff of the Three ADAMHA Institutes, (3) Report on Early and Periodic Screening, Diagnosis and Treatment Program, and (4) Discussion with the Administrator. Agenda items are subject to change as priorities dictate. Attendance by the public will be limited to space available.

Substantive program information may be obtained from the contact person listed above.

Mr. James C. Helsing, Deputy Director, Office of Public Affairs, ADAMHA will furnish, on request, summaries of the meeting and a roster of committee members. Mr. Helsing is located in Room 16–95, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, telephone 301–443–3783.

Dated: December 24, 1975.

DAVID F. KEFAUVER,
Assistant Administrator for Extramural Programs, Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

[NADA NO. 42–680V]

HOFFMAN TAFF, INC.

Chlormadinone Acetate (Skedule); Withdrawal of Approval of New Animal Drug Application

The Commissioner of Food and Drugs is withdrawing approval of a new animal drug application for Chlormadinone Acetate (Skedule); effective December 31, 1975.

Under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 360b(e))), and under authority delegated to the Commissioner 21 CFR 2.120), the following notice is issued:

On December 14, 1971, the Commissioner issued a notice of opportunity for hearing (36 FR 23733) to Syntex Laboratories, Animal Health Division, Stanford Industrial Park, Palo Alto, CA 94304, and Elanco Products Co., Division of Eli Lilly and Co., Indianapolis, IN 46206, and to any interested persons who might be adversely affected that he proposed to issue an order under the provisions of section 512(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(e)) withdrawing approval of NADA (new animal drug application) Nos. 37–146V and 37–147V regarding chlormadinone acetate when administered in beef heifers and beef cows for synchronization of estrus, i.e., heat. Based on new information on the drug evaluated together with the evidence available to him when the applications were approved, the Commissioner had concluded that the drug was not shown to be safe under the conditions of use upon the basis of which the applications had been approved. Information available to the Commissioner established that oral administration of the drug resulted in the development of mammary tumors in

V 40 251 DEC 31 75 XUM

dogs, so the drug was not considered safe for use in the absence of appropriately sensitive methods of analysis to establish its absence in food derived from treated animals.

Subsequently, Hoffman Taff, Inc., subsidiary of Syntex, Inc., P.O. Box 1246 S.S.S., Springfield. MO 65805, holder of approved new animal drug application (NADA) No. 42-680V for Chlormadinone Acetate (Skedule), requested by letter dated December 10, 1974, that approval of its application be withdrawn because the firm has never manufactured or marketed the product and does not plan to do so in the future. NADA No. 42-680V was not specifically named in the FEDERAL REGISTER notice of December 14, 1971, but that notice pertained to all products of this drug, including this product.

Therefore, in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA No. 42-680V, and all supplements and amendments thereto, is hereby withdrawn, effective December 31, 1975.

Dated: December 16, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

PANEL ON REVIEW OF ANTIMICROBIAL DRUG PRODUCTS

Meeting Change

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), the Food and Drug Administration announced in a notice published in the FEDERAL REGISTER of December 17, 1975 (40 FR 58479), public advisory committee meetings and other required information in accordance with provisions set forth in section 10(a)(1) and (2) of the act.

Notice is hereby given that the open session of the meeting fo the Panel on Review of Antimicrobial Drug Products scheduled for January 9 from 9 a.m. to 10 a.m. is to be expanded to the entire day on January 9. During this time the topics is to be discussed are as follows: Clinical aspects of fungal infections of the feet (Dr. H. Blank); epidemiology of fungal foot infections (Dr. A. Allen); morphology and cultural characteristics of fungi that cause foot infection and methods for assessing in vitro activity of antifungal compounds (Dr. William Merz); etiological factors and role of nonfungal microorganisms in fungal foot infections (Dr. J. Leyden and Mr. D. Taplin); mycological diagnosis of fungal foot infections, relaps, and reinfection (Dr. G. Rebell); topical therapy and management (Dr. N. Zaias); prevention of fungal infection (Dr. L. Levy); problems in diagnosis and therapy (Dr. W. Schorr); methods of clinically evaluating topical antifungal products (Mr. D. Taplin); and panel discussions on methods of clinically evaluating topical antifungal products (Mr. Taplin, Dr. Zaias, Dr. Allen, Dr. C. C. Evans, Dr. J. Leyden, Dr. W. Guess).

Dated: December 24, 1975.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

Office of Education

EDUCATION PROFESSIONS DEVELOPMENT

Closing Dates for Receipt of Applications

In the matter of notice of closing dates for receipt of applications for Bilingual Education Training, Teachers for Indian Children, Urban/Rural School Development, and Vocational Education State Systems, and for Receipt of Applications and Recommendations for Programs for Vocational Education Leadership Development Awards.

Pursuant to authority contained in sections 501(b), 531, 532, and 551-554 of the Education Professions Development Act (Title V of the Higher Education Act of 1965, as amended (20 U.S.C. 1091, 1119-1119a, 1119c-1119c-3)) notice is hereby given that the Commissioner of Education has established closing dates (a) for receipt of applications under the Bilingual Education Training, Teachers for Indian Children, Urban/Rural School Development, Vocational Education Leadership Development Awards, and Vocational Education State Systems Programs; and (b) for receipt of recommendations from State boards for vocational education, for: (1) Graduate programs of vocational education leadership development in institutions of higher education to participate in the Vocational Education Leadership Development Awards Program, and (2) individuals to receive Leadership Development Awards.

A. *Institutional applications and recommendations.* (1) Applications for new awards under the Bilingual Education Training and the Teachers for Indian Children Programs must be received by the U.S. Office of Education Application Control Center in Washington, D.C., on or before February 5, 1976. (The funds available are limited to approximately $250,000 for each of these programs. In fiscal year 1975 the average grant was approximately $65,000.)

(2) Applications under the Urban/Rural School Development Program for new awards for "National Projects" must be received by the U.S. Office of Education Application Control Center in Washington, D.C., on or before February 5, 1976. All other applications for continuation awards under the Urban/Rural School Development Program must be received by the Application Control Center of the Regional Office of Education serving the area in which the applicant is located on or before February 5, 1976.

(3) Applications for new awards under the Vocational Education State Systems Program must be received by the Application Control Center of the appropriate Regional Office on or before February 27, 1976.

(4) Applications for new awards under the Vocational Education Leadership Development Program, from institutions of higher education for approval of their graduate programs of vocational education leadership development, must be submitted through the State board for vocational education in the States in which the institutions are located, to the Commissioner of Education for approval. These applications, and the recommendations from State boards regarding their approval must be received in the U.S. Office of Education Application Control Center in Washington, D.C., on or before February 2, 1976.

B. *Individual applications and recommendations.* Applications from individuals for Leadership Development Awards must be submitted to the Commissioner through the appropriate State board for vocational education. These applications and recommendations by the State board regarding their approval must be received by the U.S. Office of Education Application Control Center in Washington, D.C., on or before March 18, 1976.

C. *Recommendations and applications sent by mail.* Recommendations and applications sent by mail to the Application Control Center in Washington, D.C., should be addressed as follows: U.S. Office of Education, Grant and Procurement Management Division, Application Control Center, 400 Maryland Avenue SW., Washington, D.C. 20202. Applications sent by mail to the Regional Offices should be addressed to the appropriate office in the list set forth below. Documents sent by mail will be deemed to have been received on time:

(1) If the document was sent by registered or certified mail (a) not later than February 5, 1976, for institutional applications under the Bilingual Education Training, Teachers for Indian Children, and Urban/Rural School Development Programs, and for applications and recommendations under the Vocational Education Leadership Development Program, due on or before February 5, 1976; (b) not later than February 23 for applications under the Vocational Education State Systems Program, due on February 27; and (c) not later than March 15 for individual applications and recommendations under the Leadership Development Awards Program, due on March 18 as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) If the document is received on or before the closing date by either the Department of Health, Education and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C., or, if required to be sent to a Regional Office, by the appropriate Regional Office of Education mailroom. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education and Welfare, or the U.S. Office of Education and its Regional Offices.

D. *Hand delivered documents.* A document to be hand delivered must be taken to the U.S. Office of Education Application Control Center; Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C., or, if required to be sent to the Regional Office, to the Application Control Center of the appropriate Regional Office. Hand delivered documents will be accepted daily between the hours of 8:30 a.m. and 4 p.m. local time except Saturdays, Sundays, or Federal holidays. Documents will not be accepted after 4 p.m. local time on the closing dates.

OFFICE OF EDUCATION REGIONAL OFFICES

THE NATIONAL ADVISORY COUNCIL ON EXTENSION AND CONTINUING EDUCATION

Public Meeting

Notice is hereby given, pursuant to the Federal Advisory Committee Act, Pub. L. 92-463 that a meeting of the Council will be held on January 21-23, 1976 at the Marriott Motor Hotel, Cain & Courtland Sts., Atlanta, Georgia. The meetings on January 21 and 22 are scheduled from 9 a.m. to 5 p.m.; and on January 23, from 9 a.m. to 12 noon.

The National Advisory Council on Extension and Continuing Education is authorized under Pub. L. 89-329. The Council is directed to advise the Commissioner of Education in the preparation of general regulations and with respect to policy matters arising in the administration of Title I, and to report annually to the President on the administration and effectiveness of all federally supported extension and continuing education programs, including community service programs.

The meeting of the Council will be open to the public. The agenda for the morning of the 21st will include a discussion of Title I (HEA), the Council's relations with State Title I agencies, and the Council's Tenth Annual Report. The afternoon will be devoted to a meeting with representatives from the University of Georgia to discuss continuing education and community service programs.

On Thursday, January 22, the morning session will include guest presentations on three broad areas of Council concern: review of Federal Programs, Lifetime Learning Act, and Continuing Education and the part-time student.

Standing committees of the Council will meet in separate sessions in the afternoon of January 22; and reports of the committees and discussions of proposed recommendations will be heard during the final session on January 23. All records of Council proceedings are available for public inspection at the Council's staff office, located in Suite 529, 425 13th St., NW., Washington, D.C.

JAMES A. TURMAN,
Executive Director.

Comprehensive Bilateral Agreement

DECEMBER 22, 1975.

On January 8 and May 16, 1975, in furtherance of the objectives of, and under the terms of, the Arrangement Regarding International Trade in Textiles, done at Geneva on December 20, 1973, the Governments of the United States and Malaysia concluded a comprehensive bilateral agreement concerning exports of cotton, wool, and man-made fiber textile products from Malaysia to the United States over a period of three years beginning on January 1, 1975. Among the provisions of the agreement are those establishing an aggregate limit for cotton textiles and cotton textile products in Categories 1–64, wool textile products in Categories 101–132, and man-made fiber textile products in Categories 200–243. Group limits have been established within the aggregate for Categories 1–38, 64, 200–213, and 241–243; Categories 39–63 and 214–240; and Categories 101–132. Within the aggregate and applicable group limits, specific limits have been established for Categories 9/10, 18/19, 22/23, 26, 39, 45/46/47, 49, 50/51, 60, 229, and 234/235 for the agreement year beginning on January 1, 1976.

Accordingly, there is published below a letter of December 22, 1975 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that for the twelve-month period beginning on January 1, 1976 and extending through December 31, 1976, entry into the United States for consumption and withdrawal from warehouse for consumption of textile products in Categories 9/10, 18/19, 22/23, 26, 39, 45/46/47, 49, 50/51, 60, 229, and 234/235 be limited to the designated levels.

This letter and the actions taken pursuant thereto are not designed to implement all of the provisions of the bilateral agreement but are designed to assist only in the implementation of certain of its provisions.

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

DECEMBER 22, 1975.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of January 8 and May 16, 1975, between the Governments of the United States and Malaysia, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective on January 1, 1976 and extending through December 31, 1976, entry into the United States for consumption of textile products in Categories 9/10, 18/19, 22/23, 26, 39, 45/46/47, 49, 50/51, 60, 229 and 234/235 in excess of the following levels of restraint:

Category:		*12-mo level of restraint*
9/10	square yards	1,498,000
18/19	do	2,461,000
22/23	do	2,568,000
26	do	5,885,000
39	dozen pairs	428,000
45/46/47		[1] 4,494,000
49	dozen	26,338
50/51	do	[2] 66,340
60	do	42,807
229	do	26,319
234/235		[1] 2,782,000

[1] Equivalent to square yards.
[2] Of which not more than 41,463 doz may be in either category 50 or in category 51.

In carrying out this directive, entries of cotton and man-made fiber textile products in the foregoing categories, produced or manufactured in Malaysia and exported to the United States during the twelve-month period beginning on January 1, 1975 and extending through December 31, 1975, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during that period. In the event those levels have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels of restraint set forth above are subject to future adjustment pursuant to the provisions of the bilateral agreement of January 8 and May 16, 1975 between the Governments of the United States and Malaysia which provide, in part, that: (1) within the aggregate and applicable group limits, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Appropriate adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Malaysia and with respect to imports of cotton, wool, and man-made fiber textile products from Malaysia have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

CONSUMER PRODUCT SAFETY COMMISSION

[CP 74-8]

PET TURTLES

Denial of Petition

The purpose of this notice is to announce denial of a petition from Consumers Union to ban pet turtles from commercial distribution.

Section 10 of the Consumer Product Safety Act (15 U.S.C. 1059) provides that any interested person may petition the Consumer Product Safety Commission to commence a proceeding for the issuance of a consumer product safety rule. Section 10 of the Act also provides that if the Commission denies such petition, it shall publish in the FEDERAL REGISTER its reasons for denial.

On December 11, 1973, the Consumers Union (CU) petitioned the Commission to ban pet turtles because they present an unreasonable risk of injury particularly to children. Specifically, the petitioner claims that diseased pet turtles transmit salmonellosis and therefore such turtles should be classified as banned hazardous products under Section 8 of the Consumer Product Safety Act (15 U.S.C. 2057). The Food and Drug Administration (FDA) an Agency of the Department of Health, Education, and Welfare was also petitioned by CU to prohibit the sale and distribution of pet turtles.

On April 2, 1974, CU was advised by the Commission's General Counsel that where diseased pet turtles are concerned, Commission jurisdiction over pet turtles is shared with those agencies of the Department of Health, Education, and Welfare which are authorized by the Public Health Service Act (42 U.S.C. 264) to promulgate regulations designed to control the spread of communicable diseases.

Since the Food and Drug Administration was considering a proposal to either ban pet turtle sales or provide for improved certification on the interstate sales of pet turtles, the General Counsel advised CU that the Commission would decide what further action would be necessary after FDA published its final rule.

On May 23, 1975, FDA published a Ban on Sale and Distribution of Small Turtles (40 FR 22543). The Commission agrees with FDA on the coverage and implementation of the ban and the reasons stated therefor. Since the Commission believes that the substance of the CU petition has been granted by FDA and agrees with the FDA findings, the Commission concludes that no reason exists for pursuing further action under Section 8 of the Act.

Accordingly, pursuant to Section 10(d) of the Consumer Product Safety Act (Pub. L. 92-573, 86 Stat. 1217; 15 U.S.C. 2059), notice is hereby given that the Commission denies the above-described petition of Consumers Union.

Dated: December 24, 1975.

SHELDON D. BUTTS,
Acting Secretary,
Consumer Product Safety Commission.

[FR Doc.75-35140 Filed 12-30-75;8:45 am]

[CPSC Docket No. 75-21]

WESTLAND CARPET MILLS, INC. ET AL.

Commencement of Enforcement Proceeding and Notice of Prehearing Conference

On November 24, 1975, by direction of the Commission, the Acting Secretary issued a Notice of Enforcement prepared by the Bureau of Compliance and directed to Westland Carpet Mills, Inc., a corporation, and Westland Carpet of Nevada, Inc., a corporation, and Ervin Preuss, individually, and as an officer of both corporations (Respondents) declaring in substance that the Commission's Staff believes that Respondents have violated the provisions of the Federal Trade Commission Act (FTCA) (15 U.S.C. 41 et seq.), the Flammable Fabrics Act (FFA) (15 U.S.C. 1191 et seq.), the rules and regulations promulgated under the FFA (16 CFR 302), and the Standard for the Surface Flammability of Carpets and Rugs (Standard) (FF 1-70, 35 FR 6211, April 16, 1970). Commission jurisdiction over this matter is based on the transfer of functions under the foregoing Acts to the Commission by section 30 of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2051, 2079).

The Staff states its charges as follows:

1. Respondent Westland Carpet Mills, Inc., is a corporation organized and doing business under the laws of the State of California. Westland Carpet of Nevada, Inc., is a corporation organized and doing business under the laws of the State of Nevada. Respondent Ervin Preuss is an officer of the corporations. He formulates, directs, and controls the acts, practices and policies of the corporations.

Respondents are engaged in the manufacture and sale of carpets and rugs with their office and principal place of business located at 12802 Knott Avenue, Garden Grove, California 92641.

2. Respondents are now and have been engaged in the manufacturing for sale, sale and offering for sale, in commerce, and have introduced, delivered for introduction, transported and caused to be transported in commerce, and have sold or delivered after sale or shipment in commerce, products, as the terms "commerce" and "product," are defined in the FFA. These products fail to conform to the requirements of and applicable standard as required by section 3(a) of the FFA (15 U.S.C. 1192).

Among such products mentioned above was carpeting designated as Riviera, Star Trek, Candy Stripe and Special Custom, subject to the Standard for the Surface Flammability of Carpets and Rugs (FF-1-70), but which was not manufactured in conformance with all of the requirements of that Standard.

3. Attached hereto are copies of the principal items of written evidence, marked Commission Exhibits 1-18 which the Staff considers to constitute a *prima facie* case. Briefly described, the exhibits are inspection and test reports relating to samples of carpet manufactured by Respondents which failed the aforementioned flammability tests under the Carpet Standards, and invoices showing sales of such carpet. Commission exhibits shall not preclude Enforcement Counsel from offering further evidence bearing on the subject matter.

4. The aforesaid acts and practices of Respondents were and are in violation of the FFA, as amended, and the rules and regulations promulgated thereunder and as such constitute unfair methods of competition and unfair and deceptive acts and practices in commerce, within the intent and meaning of the FTCA.

A proposed Order to Cease and Desist to be issued if the facts are found as alleged in the Notice of Enforcement was furnished to Respondents. In addition, the proposed Order would require Respondents *inter alia* to conform to the FFA and the regulations thereunder, to notify their customers who have purchased certain designated carpet rolls that the Commission has found that the carpet failed to meet the flammability standard and to recall for replacement or refund, including transportation costs, all such carpet in the hands of the distributors, wholesalers, retailers, and purchasers whether or not the carpet has been installed.

Counsel for Respondents has filed an answer constituting, in effect, a general denial of the substantive allegations in the Notice of Enforcement, and in addition, has included several affirmative defenses as follows:

1. That the jute backing used by Respondents in the manufacture of the carpet in question does not constitute a product, fabric, or related material as those terms are defined in 15 U.S.C.A. Sec. 1191 (F, G, H).

2. That the Commission (staff) seeks to require Respondents to recall carpet which has not been sold or offered for sale in commerce as defined in 15 U.S.C.A. Sec. 1191(b) and, therefore, the Staff's proposed Order is beyond the authority of the FFA.

3. That the Commission (Staff) by these proceedings seeks to regulate and control activities and transactions of Respondent which are purely intrastate in nature and which do not affect interstate commerce, a purpose beyond the scope and authority of the FFA.

By reason of the foregoing, Respondents request dismissal of the Notice of Enforcement.

Issue having been joined, it is deemed necessary in order to organize the preparation for, and conduct of, the hearing, and further to minimize expense to the Government and the parties, that a prehearing conference, by transcontinental telephone, be held at 2 p.m., e.s.t. (11 a.m., p.s.t.), Thursday, January 15, 1976, originating in Room 600 of the Commission's offices at 1750 K Street, N.W., Washington, D.C. 20207.

The General Services Administration will be asked to arrange the conference call at the following numbers: Administrative Law Judge at (202-634-7780); Enforcement Counsel Earl Gershenow and Alice Wegman at (301-492-6614); Respondents' Counsel James E. Carter, Esq., Suite 601, Security Bank Building, Santa Ana, California 91701, tele. (714-543-9295).

Counsel are requested to exchange and file with this office memoranda setting forth (1) a definition of the issues to be heard, (2) requests for discovery, if any, (3) disclosure of the number of witnesses and the approximate length of time each presentation will entail, and (4) a proposal for the time, date and place of the hearing, no later than January 12, 1976.

So that Respondents may be properly apprised of all communications between the Staff and the Commission relating to the institution of this proceeding and in order to adequately prepare for hearing, the Secretary is hereby requested to release to Respondents' Counsel copies of the Briefing Package transmitted by the Staff of the Commission prior to the Commission's approval of the issuance of the Notice of Enforcement. This material is to be distributed to Respondents as part of the prehearing discovery process and will not become a part of the administrative record unless offered in evidence at the hearing.

Dated: December 19, 1975.

PAUL N. PFEIFFER,
Administrative Law Judge.

SCIENCE ADVISORY BOARD HAZARDOUS MATERIALS ADVISORY COMMITTEE

Postponement of Meeting

The meeting of the Hazardous Materials Advisory Committee of the Science Advisory Board, previously scheduled at 9 a.m., January 8 and 9, 1976, in Room 1112, Building 2, Crystal Mall, 1921 Jefferson Davis Highway, Arlington, Virginia, and announced in the December 22 FEDERAL REGISTER, p. 59241, has been postponed. The meeting has been rescheduled for Thursday and Friday, January 29 and 30, 1976, at 9 a.m., in Room 1112, Building 2, Crystal Mall, 1921 Jefferson Davis Highway, Arlington, Virginia.

The agenda includes a report on the activities of the Science Advisory Board; discussion on the ad hoc panel activities associated with the evaluations of the documents, Review of the Environmental Effects of Asbestos and the Technical Bulletin on Acceptable Methods for the Utilization and Disposal of (Municipal) Sludges; presentations and discussion on possible environmental hazards associated with the increasing use of nitrogen fertilizers; report on the National Conference on Polychlorinated Biphenyls (PCB's); discussion of a prioritization scheme for scheduling review of certain chemicals under section 3 of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA); status of EPA's review of the nitrosamine issue; discussion of research on vinyl chloride; and member items of interest.

The meeting is open to the public. Any member of the public wishing to attend, participate, or obtain additional information should contact Dr. J. Frances Allen, Executive Secretary, Hazardous Materials Advisory Committee, (703) 557-7720.

THOMAS D. BATH,
Staff Director,
Science Advisory Board.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

[ERDA-1538]

WASTE MANAGEMENT OPERATIONS, HANFORD RESERVATION

Availability of Final Environmental Statement

Notice is hereby given that a Final Environmental Statement, Waste Management Operations, Hanford Reservation (ERDA-1538), has been issued by the Energy Research and Development Administration (ERDA) pursuant to the National Environmental Policy Act of 1969. The Statement was prepared to assess the environmental impact of continuing ERDA's waste management operations at the Hanford Reservation in Benton County, Washington.

Copies of the Final Environmental Statement are available for public inspection in the ERDA's Public Document Rooms at:

ERDA Headquarters,
20 Massachusetts Avenue,
Washington, D.C.

Albuquerque Operations Office,
Kirtland Air Force Base East,
Albuquerque, New Mexico.

Chicago Operations Office,
9500 South Cass Avenue,
Argonne, Illinois.

Idaho Operations Office,
550 Second Street,
Idaho Falls, Idaho.

Oak Ridge Operations Office,
Federal Building,
Oak Ridge, Tennessee.

Nevada Operations Office,
2753 South Highland Drive,
Las Vegas, Nevada.

Richland Operations Office,
Federal Building,
Richland, Washington.

San Francisco Operations Office,
1333 Broadway,
Oakland, California.

Savannah River Operations Office,
Savannah River Plant,
Aiken, South Carolina.

In addition, copies of the draft statement, public hearing record on the draft statement, and the documents referenced in this statement are available for inspection at the Washington, D.C.; Richland, Washington; Idaho Falls, Idaho; Savannah River Plant; and Oakland, California, locations.

Copies of the final statement have been furnished to those who commented on the draft statement that was issued by the Atomic Energy Commission as WASH-1538, September 27, 1974.

A limited number of single copies are available for distribution from the Technical Information Center, P.O. Box 62, Oak Ridge, Tennessee 37830, (615) 483-8611, extension 34672. The statement is also available from the National Technical Information Service, Springfield, Virginia 22161.

Dated at Germantown, Maryland, this 17th day of December, 1975.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator
for Environment and Safety.

FEDERAL ENERGY ADMINISTRATION

OLD OIL ALLOCATION PROGRAM

Rescinding Entitlement Notice for October 1975 and Announcing Intent to Issue Revised Entitlement Notice for October 1975

Notice is hereby given to all firms subject to the provisions of 10 CFR 211.67, the Old Oil Allocation Program, that the Entitlement Notice for October 1975, as issued on December 12, 1975 (40 FR 58619, December 17, 1975), is hereby rescinded and that the Federal Energy Administration intends to issue a revised Entitlement Notice for October 1975 on or about December 29, 1975.

This notice is being issued in order to advise refiners of the steps the FEA intends to take in order to provide for immediate and orderly implementation of certain provisions of the Energy Policy and Conservation Act ("EPCA"), which was signed into law on December 22, 1975. Section 403 of the EPCA requires that the FEA exempt from the purchase obligations of the entitlements program the first 50,000 barrels per day of input or receipts of any refiner whose total refining capacity did not exceed 100,000 barrels per day on January 1, 1975 and does not thereafter exceed 100,000 barrels per day. This requirement must be implemented with respect to payments due on or after the last day of the month during which enactment of the EPCA occurred. Thus, it applies to entitlements transactions which must be completed by December 31, 1975.

In order to implement section 403, the FEA will issue on or about December 29, 1975 a special rule amending 10 CFR 211.67 to implement the exemption required by the EPCA and at the same time will issue a revised Entitlements Notice for October 1975 reflecting the exemption. The time for completion of the transactions required by the revised notice will be extended from December 31, 1975, to January 7, 1976, but, for purposes of complying with FEA's pricing regulations, all firms subject to 10 CFR 211.67 will be required to treat such transactions as though they occurred in December 1975.

Issued in Washington, D.C., on December 24, 1975.

MICHAEL F. BUTLER,
General Counsel.

[FR Doc.75-35129 Filed 12-24-75;12:30 pm]

FARM CREDIT ADMINISTRATION

PRIVACY ACT OF 1974

Amendment to Notices of Existence and Character of Systems of Records

The Farm Credit Administration, in order to implement the Privacy Act of 1974, adopted notices of the existence and character of the systems of records containing information about individuals which it maintains. Such notices were published in proposed form in the FEDERAL REGISTER for September 8, 1975 (40 FR 41731) and adopted without change (40 FR 46288, October 6, 1975). The Office of Management and Budget recommended that an additional routine use be established by each agency for the purpose of assuring that implementation of the Act does not have the unintended effect of denying individuals the benefit of congressional assistance which they request. Accordingly, the Farm Credit Administration published for comment in the FEDERAL REGISTER for November 17, 1975, a notice of its proposal to amend each of the notices described above by inserting, at the end of the material under the heading "Routine uses of records maintained in the system, including categories of users and the purpose of such uses," the following paragraph:

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Interested persons were afforded the opportunity to file written comments on the proposed amendment not later than December 15, 1975. No comments were received. Therefore, the amendment to the notices of existence and character of systems of records as set forth above is adopted without change.

JON F. GREENEISEN,
Acting Governor,
Farm Credit Administration.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 75R-470; Docket No. 20343, File No. BPH-8665; Docket No. 20344, File No. BPH-8858]

COUNTRY-POLITAN BROADCASTING, INC. AND TIPPAH BROADCASTING COMPANY

Construction Permits; Memorandum Opinion and Order

1. This proceeding involves the mutually exclusive applications of Country-Politan Broadcasting, Incorporated (Country-Politan) and Jesse R. Williams, tr/as Tappah Broadcasting Company (Tippah), for a construction permit for a new FM broadcast station at Ripley, Mississippi. Presently before the Review Board is a second petition to enlarge issues, filed October 10, 1975, by the Broadcast Bureau; seeking the addition of Section 1.594 and abuse of process issues against Tippah.[1]

2. In support of its request, the Bureau first points out that the designation Order in this proceeding, 40 FR 7006, published February 18, 1975, specified funds availability and ascertainment issues against Tippah, a standard comparative issue, and a conclusory issue. However, the Bureau asserts, on March 27, April 3, and April 10, 1975, Tippah published in the Southern Sentinel (a weekly newspaper in Ripley, Mississippi) a notice of hearing stating that no qualifying issues had been specified against it, that a financial issue had been specified against Country-Politan, and that an issue had been specified "to determine if the applicant's sole intention is to use this license to further enhance his position as Mayor of Ripley, Mississippi."[2] Tippah never supplied the Commission with evidence of this publication, the Bureau avers,[3] a failure which the Bureau suggests was motivated by a desire on Tippah's part to conceal its attempt to mislead and deceive the public. Moreover, the Bureau maintains, citing Tung Broadcasting Company, 33 FCC 2d 1145, 23 RR 2d 1185 (1972), Tippah's publication of a completely false set of issues on its face raises serious questions as to whether it has abused the Commission's processes and, therefore, as to whether it is qualified to be a Commission licensee.[4]

3. In opposition, Tippah contends that it made a diligent effort to comply with § 1.594 of Commission's rules but was hindered by difficulties with its attorney, and that its records reflect that an original and the necessary copies of the publication were mailed to the Commission. As for the contents of the published notice, Tippah admits that it erred in some respects but denies that it intended to abuse the Commission's processes. The Bureau in reply dismisses this denial, arguing that Tippah's self-serving excuse for its conduct in no way diminishes the necessity for the requested issues. Further, the Bureau asserts, if Tippah's opposition is construed as an argument that it lacked effective counsel, this argument, is unpersuasive in several respects. Thus, the Bureau notes, Tippah's principal, Jesse R. Williams, testified at hearing that he has been a licensee of the Commission since 1964 and has conducted most of his Commission—related affairs on his own without counsel and Rule 1.594 gives explicit and unmistakable instructions with respect to how issues are to be published. Lack of counsel, in any event, cannot justify serious misconduct of this nature, the Bureau concludes.

4. In the Board's view, further inquiry into this matter is clearly warranted. Rather than publishing the hearing issues actually designated by the Commission, Tippah by its own admission published an incorrect set if issues falsely suggesting that the Commission had accused its opponent of concealing financial information and of seeking a broadcast license solely to enhance its political interests. Such a use of the Commission's publication requirement to convey inaccurate and misleading information not only casts doubt on Tippah's good faith compliance with this requirement but also raises substantial questions as to whether Tippah has misused and thus abused the Commission's procedures, see Tung Broadcasting Co., *supra*. Because these questions cannot be resolved solely on the basis of Tippah's self-serving denials of bad faith and pleas of ineffective counsel, we will grant the Bureau's petition and add the requested issues.

5. Accordingly, *it is ordered*, That the second petition to enlarge issues, filed October 10, 1975, by the Broadcast Bureau, IS GRANTED; and

6. *It is further ordered*, That the issues in this proceeding are enlarged to include the following issues:

(1) To determine the accuracy of a publication of a notice of hearing by Tippah Broadcasting Company in the Southern Sentinel, including the facts and circumstances relating to the nature and extent of participation, if any, of the principals or agents of Tippah in such publication.

(2) To determine in light of the evidence adduced under the above issue:

(a) Whether Tippah Broadcasting Company has complied with § 1.594 of the Commission's Rules;

(b) Whether Tippah Broadcasting Company has engaged in an abuse of Commission processes; and

(c) In light of the foregoing, whether Tippah Broadcasting Company possesses the requisite qualifications to be a licensee of the Commission.

7. *It is further ordered*, That the burden of proceeding with the introduction of evidence under the issues added herein shall be on the Broadcast Bureau and the burden of proof shall be on Tippah Broadcasting Company.

Adopted: December 18, 1975.

Released: December 23, 1975.

FEDERAL COMMUNICATIONS COMMISSION

[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75-35118 Filed 12-30-75;8:45 am]

[1] Also before the Board are the following related pleadings: (a) opposition filed October 28, 1975, by Tippah; (b) reply, filed November 4, 1975, by the Broadcast Bureau.

[2] Kerry W. Hill, Country-Politan's sole stockholder, is the Mayor of Ripley, Mississippi.

[3] In support of its allegation, the Bureau submits the affidavit of Herschel G. Stennett, publisher of the Southern Sentinel.

[4] The proof of publication upon which the Bureau relies (see note 3, supra) was obtained by Bureau counsel.

[5] The Bureau maintains that its petition was filed within fifteen days of its examination of the Stennett affidavit. The Board is satisfied with this explanation, and, in any event, the petition raises serious public interest questions which require consideration pursuant to The Edgefield-Saluda Radio Co., 5 FCC 2d 148, 8 RR 2d 614 (1966).

DOMESTIC LAND MOBILE RADIO ADVISORY COMMITTEE

1979 World Administrative Radio Conference

DECEMBER 19, 1975.

The next meeting of the Common Carrier Domestic Land Mobile Radio Advis-

V 40 251 DEC 31 75 XUM

ory Committee in preparation for the 1979 World Administrative Radio Conference will be held on Wednesday, January 21, 1976, at 10 a.m. in Room 752, 1919 M Street, NW., Washington, D.C. The same room will be available in the afternoon for task group meetings.

The meeting will be open to the public and any member of the public is invited to participate and present oral or written statements of relevance to the agenda upon recognition by the Chairman.

The meeting will be conducted in accordance with the following agenda:

1. Committee Chairman's opening remarks.
2. Reports from Chairmen of Fact-Finding Task Groups.
3. Discussion of preliminary draft of spectrum requirements.
4. Establish timetable for submission of work.
5. Set date for next meeting.
6. Further business.
7. Adjournment.

No part of this meeting will be concerned with matters which are within the exemptions of the Public Information Act, 5 U.S.C. 55s(b).

FCC PBX TECHNICAL STANDARDS

Meeting

DECEMBER 22, 1975.

In accordance with Pub. L. 92-463, announcement is made of a public meeting of the PBX Technical Standards Subcommittee Task Groups to be held January 28-29, 1976 in Washington, D.C. The meeting on January 28 will commence at 10 a.m. and will be held in Room 752, 1919 M Street NW, and will be related to the work of the Glossary Task Group. The meeting on January 29 will commence at 10 a.m. and will be held in Room 752, 1919 M Street NW and will be related to the Equipment Test Standards Task Group.

1. Purpose: The purpose of this Subcommittee is to prepare recommended standards and procedures to permit the interconnection of customer-provided and maintained PBX equipment to the public switched network without the need for carrier-provided connecting arrangements.

2. Activities: As at prior meetings, Subcommittee members and observers present their suggestions and recommendations regarding the various technical criteria and standards that should be considered in respect to the interconnection of PBX equipment to the public telephone network.

3. Agenda: The agenda for the January 28th Glossary Task Group will be as follows:

(a) Continue the review of the draft glossary to eliminate duplicate definitions and words not specifically related to the fields of interconnection and PBX systems.

(b) Plan for completion of glossary.

The agenda for the January 29th Equipment Test Standards Task Group will be as follows:

(a) Review status of Equipment Test Standards and completed homework draft documents.

(b) Plan for completion of draft standards and acceptance of new homework assignments.

4. Public Participation: The public is invited to attend this meeting. Any member of the public wishing to file a written statement with the Subcommittee may do so before or after the meeting.

For more information, contact the Common Carrier Bureau on (202) 632-6917.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FCC 75-1363]

EMERGENCY BROADCAST SYSTEM

Closed Circuit Test

DECEMBER 22, 1975.

A quasi-random test of the Emergency Broadcast System (EBS) has been scheduled for the near future. Only ABC, CBS, NBC, IMN, MBS, and NPR radio network affiliates and UPI-audio clients will participate. Television networks are not participating in this test.

Network affiliates will not be notified of the impending test date and time.

Final evaluation of the test is scheduled to be made by the end of January, 1976.

This is a closed circuit test and will not be broadcast over the air.

Action by the Commission December 16, 1975. Commissioners Wiley (Chairman), Lee, Reid, Hooks, Quello, Washburn, and Robinson.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75-35119 Filed 12-30-75;8:45 am]

PRIVATE LAND MOBILE ADVISORY COMMITTEE

Meeting

In preparation for the 1979 World Administrative Radio Conference (WARC), the Private Land Mobile Advisory Committee, headed by Neal Pike, will hold its next meeting on January 21, 1976, in Washington, D.C. The meeting will be held in conference room 8210, Federal Communications Commission, 2025 M Street, NW., at 1:30 p.m.

The purpose of the meeting is to prepare and approve land mobile frequency allocation recommendations. The meeting is open to the public and oral and written statements may be presented by members of the public.

The meeting will be conducted in accordance with the following agenda.

1. Call of the Agenda.
2. Preparation, review and approval of frequency allocation recommendations for Private Land Mobile.
3. Set next meeting date.
4. Adjournment.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

RADIO TECHNICAL COMMISSION FOR MARINE SERVICES

Meetings

In accordance with Pub. L. 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

Special Committee No. 66: "Receiver Standards for the Maritime Mobile Service."

Notice of 35th Meeting:
Tuesday, January 13—9:30 a.m. (All-day meetings).
Conference Room A-205,
1229-20th Street NW.,
Washington, D.C.

AGENDA

1. Call to Order; Chairman's Report.
2. Adoption of Agenda; Appointment of Rapporteur.
3. Acceptance of SC-66 Summary Record.
4. Review comments on MMSR4:
   a. from USCG
   b. from FCC
   and agree on appropriate modifications to the standard.
   (Note: a. and b. above were mailed to the SC-66 attendees as enclosures 2 and 3 with the Chairman's letter dated 25 November 1975.)
5. Discussion of problem areas.
6. Solicitation of Work Assignments.
7. Other business.
8. Establishment of next meeting date.
   H. R. Smith, Chairman, SC-66
   ITT Mackay Marine
   441 US Highway #1, Elizabeth, N.J. 07202
   Phone: (201) 527-0300

Special Committee No. 68: "Marine Radiotelephone Operator Education."

Notice of 11th Meeting:
Wednesday, January 14, 1976—9:30 a.m.
Conference Room 752
1919 M Street NW.
Washington, D.C.

AGENDA

1. Call to Order; Chairman's Report.
2. Adoption of Agenda; confirmation of Secretary.
3. Acceptance of SC-68 Summary Records.
4. Approval of MRT Handbook Work Assignment. Limited Coast Station section and appendices.
5. Establishment of next meeting date.
   A. Newell Garden, Chairman, SC-68
   Raytheon Company
   141 Spring Street
   Lexington, Mass. 02173
   Phone: (617) 862-6600 (Ext. 414)

Executive Committee Meeting, Thursday, January 15, 1976.

The next Executive Committee Meeting will be on Thursday, January 15, 1976, at 1:45 p.m. in Conference Room 752, 1919 M Street, N.W., Washington, D.C.

AGENDA

1. Call to Order; Chairman's Report.
2. Introduction of Attendees; Adoption of Agenda.
3. Acceptance of the Minutes of Executive Committee Meetings.
4. Progress Reports on Currently Active Committees.
   SC-65: "Ship Radar"
   SC-66: "Receiver Standards for the Maritime Mobile Service"
   SC-68: "Marine Radiotelephone Operator Education"
5. Status Reports on other Committees:
   SC-69: WARC Advisory Committee
6. Special Report: The CARDIS Program—Maurice F. Ronayne, Chief, Documentation and Procedures Division, Office of Facilitation, Department of Transportation
7. Approval of SC-66 Report.
   Minimum Standards for Single Sideband Receivers in the Maritime Mobile Service.
8. Approval of SC-64 Report.
   MF, HF, and VHF Maritime Radioteleprinter and Data Systems and Operations.
9. Executive Committee Preliminary Review of MRT Draft text.
10. Acceptance of FY-1975 Audit Report.
11. Administrative Action Items.
12. Summary Reports and Announcements.
13. New Business.
14. Establishment of next meeting date.

Members of Special Committee No. 65: "Ship Radar"

Notice of Collision Avoidance Work Group Meeting:
Wednesday, January 21, 1976—9:30 a.m.
Conference Room 8210
2025 M Street NW.
Washington, D.C.

Formal Meeting Schedule for SC-65 Working Groups:
To be held at 2025 M Street NW., Washington, D.C.

Working Group: Collision Avoidance
Room: 8210
Date: January 21
Time: 9:30 a.m.

If other Working Group meetings are scheduled, Group Members will be notified.

Irvin Hurwitz, Chairman, SC-65
Federal Communications Commission
Washington, D.C. 20554
Phone (202) 632-7197

RTCM SC 69/FCC WARC-79 Advisory Committee for Maritime Mobile Service, Third Meeting, 2025 M St. NW., Washington, D.C., Room 8210, 9:30 a.m. to 12:30 p.m., Tuesday, January 27, 1976.

AGENDA

1. Call of the Agenda
2. Chairman's opening remarks.
3. Reports of the Task Forces
4. Review work to be accomplished.
5. Further business.
6. Set date for next meeting.
7. Adjournment.

Charles Dorian, Chairman, SC-69
COMSAT General
950 L'Enfant Plaza, S.W.
Washington, D.C. 20025
Phone: (202) 55406829

To comply with the advance notice requirements of Pub. L. 92-463, a comparatively long interval of time occurs between publication of this notice and the actual meeting. Consequently, there is no absolute certainty that the listed meeting room will be available on the day of the meeting. Those planning to attend the meeting should report to the room listed in the notice. If a room substitution has been made, the new meeting room location will be posted at the room listed in this notice.

Agendas, working papers, and other appropriate documentation for the meeting is available at that meeting. Those desiring more specific information may contact either the designated Chairman or the RTCM Secretariat. (Phone (202) 632-6490)

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. Problems are studied by Special Committees and the final report is approved by the RTCM Executive Committee. All RTCM meetings are open to the public. Written statements are preferred but by previous arrangement, oral presentations will be permitted within time and space limitations.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

FEDERAL MARITIME COMMISSION

BARBER LINES, ET AL.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N. Y., New Orleans, La., San Juan, Puerto Rico and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before January 12, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

BARBER LINES, A/S; BLACK STAR LINE; COMPAGNIE MARITIME BELGE, S.A.; COMPAGNIE MARITIME DES CHARGEURS REUNIS, S.A.; COMPAGNIE MARITIME ZAIROISE, S.A.R.L.; DAFRA LINES; DELTA STEAMSHIP LINE, INC.; ELDER DEMPSTER LINES, LTD.; FARRELL LINES INC.; NOPAL WEST AFRICA LINE; WESTWIND AFRICA LINE LTD.

Notice of Agreement Filed by:

John K. Cunningham, Chairman, American West African Freight Conference, 67 Broad Street, New York, New York 10004.

Agreement No. 10159-2, among Barber Lines, A/S; Black Star Line; Compagnie Maritime Belge, S.A.; Compagnie Maritime Des Chargeurs Reunis, S.A.; Compagnie Maritime Zairoise, S.A.R.L.; Dafra Lines; Delta Steamship Lines, Inc.; Elder Dempster Lines, Ltd.; Farrell Lines Inc.; Nopal West Africa Line and Westwind Africa Line Ltd., all of whom are member lines of the American West African Freight Conference, amends the rationalization agreement designated as Agreement No. 10159 by (1) inserting a new Article 10 to provide that any member line of the American West African Freight Conference may become a party to Agreement No. 10159 twelve (12) months following the date of its written application for membership, by affixing its signature to the agreement or an amendment thereto, and by paying an admission fee of $50,000 to the parties to the agreement, and (2) renumbering Articles 10, 11, 12 and 13 as Articles 11, 12, 13 and 14, respectively.

By order of the Federal Maritime Commission.

Dated: December 23, 1975.

FRANCIS C. HURNEY,
Secretary.

[FR Doc.75-35086 Filed 12-30-75;8:45 am]

[Exemption Nos. 18, 19 and 20]

PUGET SOUND TUG AND BARGE CO., ET AL.

Environmental Negative Declaration

In the matter of Puget Sound Tug and Barge Company, Alaska Barge & Transport, Inc., Foss Launch and Tug Company, and Foss Alaska Line, Inc.

Upon completion of an environmental assessment, the Federal Maritime Commission's Office of Environmental Analysis has determined that environmental issues relative to the above referenced applications do not constitute major Federal action significantly affecting the quality of the human environment with-

V40251 DEC 31 75 XUM

in the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. § 4321, et seq., and that the preparation of a detailed environmental impact statement will not be required under section 4332 (2) (C) of NEPA.

It was concluded, among other things, that the environmental impacts of the proposed actions basically relate only to the extension of "currently existing exemptions" which have been in effect since 1970. There will be no increase in the level of energy consumption, noise exposure, oil pollution and the local use of the environment by the all-water services involved in the proposed exemptions. These operations will substantially conform to the existing use of the environment in the area involved.

This determination was based upon the staff's preparation and consideration of a Threshold Assessment Survey which is available for inspection on request from the Public Information Office, Room 11413, Federal Maritime Commission, Washington, D.C. 20573, telephone 202–523–5764.

Any person disagreeing with the Negative Declaration shall have ten (10) days within which to note exceptions to the Commission by filing exceptions to the Negative Declaration with the Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. 20573. No final Commission action shall be taken within thirty (30) days following the publication of the Negative Declaration in the FEDERAL REGISTER. If the Commission fails to otherwise act within twenty (20) days following the time provided for the filing of exceptions to the Negative Declaration, the determination of the Office of Environmental Analysis will be adopted by the Commission as its final determination of environmental issues.

By the Commisson.

[SEAL] FRANCIS C. HURNEY, *Secretary.*

[FR Doc.75–35085 Filed 12–30–75;8:45 am]

[Nos. 73–28; 73–29]

U.S. WEST COAST/JAPAN TRADE; U.S. ATLANTIC AND GULF/JAPAN TRADE

Publication of Discriminatory Rates; Further Dismissal in Part; Extension of Alternate Procedures

These proceedings were instituted by the Commission in its attempt to rid the U.S./Japan trades of inbound-outbound rate disparities. Pursuant to procedures adopted by subsequent Commission orders, various proposals of the conferences and motions of Hearing Counsel have resulted in eliminaton of many of the items from this proceeding. December 31, 1975 is the current deadline within which the disparities are to be removed pursuant to these procedures.

Hearing Counsel currently have three additional motions pending before the Commission by which they seek dismissal of various items of disparity from these proceedings. Hearing Counsel point out that if the three motions to dismiss are granted, disparities will remain on only 30 items in 73–28 and 22 items in 73–29.

Hearing Counsel also have filed a motion for extension through March 31, 1976, of the authority for use of alternate procedures which have been followed in eliminating the disparities.

We are disposed to grant Hearing Counsel's motions to dismiss because the grounds offered therefor are identical to those previously endorsed in these proceedings. Accordingly, as to the commodities listed in Hearing Counsel's motions of May 21, 1975, November 19, 1975, and November 26, 1975, these proceedings are hereby discontinued.

We hereby also grant Hearing Counsel's request for extension of use of alternate procedures through March 31, 1976, inasmuch as these procedures have been effective in eliminating the disparities in these proceedings.

By the Commission.

[SEAL] FRANCIS C. HURNEY, *Secretary.*

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–255]

CONSUMERS POWER CO.

Issuance of Amendment to Provisional Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 17 to Provisional Operating License No. DPR–20 issued to Consumers Power Company which revised Technical Specifications for operations of the Palisades Plant located in Covert Township, Van Buren County, Michigan. The amendment is effective as of its date of issuance.

This amendment permits the containment to be ventilated (purged) on a one-time basis for an accumulated period of time not to exceed 24 hours after the reactor has been brought to hot shutdown in preparation for the December 1975 maintenance and inspection outage.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5 (d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated December 11, 1975, and related letter dated November 21, 1975, (2) Amendment No. 17 to License No. DPR–20 with Change No. 21, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Michigan.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 18th day of December 1975.

For the Nuclear Regulatory Commission.

ROBERT A. PURPLE, *Chief, Operating Reactors Branch No. 1, Division of Reactor Licensing.*

[FR Doc.75–35131 Filed 12–30–75;8:45 am]

FEDERAL WATER POLLUTION CONTROL ACT AMENDMENTS OF 1972

Second Memorandum of Understanding and Policy Statement Regarding Implementation of Certain NRC and EPA Responsibilities

Prior to the enactment of Pub. L. 92–500, the Federal Water Pollution Control Act Amendments of 1972 (FWPCA), the Atomic Energy Commission (AEC) had regulatory authority pursuant to the National Environmental Policy Act of 1969 (NEPA), and in consideration of the environmental impact of the discharge of pollutants and other factors, to impose limitations on the discharge of pollutants from nuclear power plants and other facilities or activities requiring an

V 401251 DEC 31 75 XUM

AEC license or permit, as a condition of such license or permit.

The FWPCA now requires the Environmental Protection Agency (EPA) to establish (for use in permits for the discharge of pollutants to waters of the United States from point sources as defined in the FWPCA such as nuclear power plants, etc.) effluent limitations for all pollutants. The FWPCA provides that nothing under NEPA shall be deemed to authorize any Federal agency to review any effluent limitation or other requirement established pursuant to the FWPCA, or to impose, as a condition of any license or permit, any effluent limitation other than any such limitation established pursuant to FWPCA.

Pursuant to the authority of the FWPCA, EPA requires applicants for discharge permits to submit information required by EPA in order to establish effluent limitations in permits. Pursuant to the authority of NEPA, the Nuclear Regulatory Commission (NRC) may require applicants for licenses or permits to submit information required by NRC in order to evaluate and consider the environmental impacts of any actions it may take. Consequently, the informational needs imposed by the two agencies may be similar in the area of impacts on water quality and biota.

NEPA requires that all Federal agencies prepare detailed environmental statements on proposed major Federal actions which can significantly affect the quality of the human environment. A principal objective of NEPA is to require the agency to consider, in its decision-making process, the environmental impacts of each proposed major action and the available alternative actions. Both EPA and NRC have responsibilities pursuant to NEPA regarding the issuance of licenses or permits for nuclear power plants and certain other facilities.

The purpose of the memorandum is to clarify the respective roles of EPA and NRC in the decision-making processes concerning nuclear power plants and other facilities requiring an NRC license or permit.

In late 1973, the Chairman of the Council on Environmental Quality (CEQ) wrote to the Chairman of the then AEC and the Administrator of EPA suggesting steps that might be taken "to make the analysis of the water quality impact of nuclear power plants more effective and more meaningful and, at the same time, reduce demands for data being placed upon applicants for licenses."

In summary, CEQ suggested that AEC and EPA:

(1) Explore mechanisms available to assure that applicants' environmental reports to AEC contain sufficient data to satisfy EPA requirements on water quality matters;

(2) Consider the possibility of preparing a single impact statement to meet AEC's requirements under NEPA and EPA's requirements under FWPCA; and

(3) Consider the possibility of unified hearings.

In response to CEQ's suggestions, AEC and EPA developed the Proposed Second Memorandum of Understanding regarding their respective responsibilities under NEPA and FWPCA, which was published in the FEDERAL REGISTER for public comment on ovember 7, 1974 (39 FR 39490). Comments on the Proposed Second Memorandum of Understanding were received from 15 sources representing more than 200 electric utilities, three states, one river basin commission, and one regional office of EPA.

On January 29, 1973, the AEC published in the FEDERAL REGISTER a first "Memorandum of Understanding Regarding Implementation of Certain Complementary Responsibilities" between AEC and EPA under the Federal Water Pollution Control Act Amendments of 1972. On the same date the AEC published in the FEDERAL REGISTER an Interim Statement of Policy concerning the effect of section 511 of the FWPCA upon the AEC's statutory responsibility and authority under NEPA in licensing actions covered by 10 CFR Part 50, Appendix D (now superseded by 10 CFR Part 51). Both the first Memorandum and Interim Policy Statement were made effective upon publication, but comments were invited from interested persons with a view to possible amendments to the Interim Policy Statement.

After consideration of comments to both notices and other relevant factors, NRC and EPA have entered into the Second Memorandum of Understanding set forth below and NRC has adopted the revised Policy Statement set forth in Appendix A to this Second Memorandum. The revised Policy Statement will serve as the legal framework for NRC decision-making concerning licensing matters covered by NEPA and FWPCA section 511. The January 29, 1973, Memorandum is superseded by the present Second Memorandum of Understanding.

The significant changes from the language of the Proposed Second Memorandum of Understanding and the significant comments received on the Second Memorandum are summarized below:

1. A number of comments were received concerning NRC–EPA–State relationships. The principal comments are discussed below:

a. It was recommended that the NRC–EPA–State relationship be clarified and that States should be made a full party to any agreement of understanding on specific projects. The requested clarification is provided in Sections 8 & 9 of this Memorandum. Both NRC and EPA plan to work closely with States in all cases; however, it was not considered practical to make the 50 States a party to this Memorandum at this time. NRC and EPA plan to work with States in order to achieve the substance of the Memorandum on a State-by-State basis.

b. It was recommended that the States should be informed of the results of the EPA, NRC, and Energy Research and Development Administration (ERDA) working groups. Eight such working groups covering the various biological and engineering areas of interest for section 316 (a) and (b) determinations were established by EPA to generally identify the information on water quality and biota that must be included in applicants' environmental reports to permit early water quality decisions. This will be done by EPA in the form of a section 316(a) technical manual and a section 316(b) technical manual.

c. It was stated that when a State is the permit issuance authority pursuant to section 402, EPA should not duplicate the State's evaluation of compliance with FWPCA requirements. EPA will not duplicate State efforts; however, section 402(d) provides for EPA review of the State action.

d. It was urged that EPA require that State permit programs include procedures for early determinations under sections 316(a) and (b) of the FWPCA. It is the view of the parties that the States with approved National Pollutant Discharge Elimination System (NPDES) permit programs have authority to establish a procedure similar to the early permit issuance procedure discussed in Paragraph 3. hereof. Both EPA and NRC strongly encourage States which have such authority to institute a similar early issuance procedure and to cooperate with EPA and NRC in implementing this procedure.

e. It was pointed out that a number of States have adopted "Permit and Install Regulations", e.g., Ohio, South Carolina and New York, which must be taken into account. Such State regulations will be taken into account by NRC and EPA.

2. It was suggested that the fact should be clarified that a single environmental statement will be prepared to meet NRC and EPA needs. This comment has been adopted.

3. It was suggested that an actual section 402 discharge permit should be issued rather than a "Preliminary Determination" and the effective date of such permit should coincide with the NRC operating license issuance date. This suggestion was partially adopted, by providing for early issuance of section 402 permits. Such permits will contain appropriate terms and conditions for all discharge of pollutants expected during the life of the permit (five years maximum) and terms and conditions with regard to cooling water intake structures and Section 316(a) determinations concerning thermal discharges. Additional permit terms and conditions for discharges not contemplated during the life of the permit (such as certain chemical and other releases not expected until operation startup) may be derived from applicable State water quality standards and applicable new source performance standards contained in 40 C.F.R. Chapter I, Subchapter N. Permits will be reissued, as appropriate, and any reissued permit, to be effective at the commencement of actual discharge as provided above, may require additional limitations and controls based on data gathered during the initial permit or may require additional section

316(a) and (b) studies for the purpose of confirming conclusions reached from previous predictive studies.

4. It was suggested that NRC's role in the water quality area should be clarified and NRC should discontinue its practice of determining compliance with requirements of the FWPCA and should cease evaluating alternatives relating to environmental effects regulated under the FWPCA. This matter is addressed in the Policy Statement (Appendix A to this Memorandum) which is discussed in more detail below.

5. It was recommended that NRC should initiate a rulemaking proceeding to develop regulations through which the environmental effects of activities subject to the FWPCA can be factored into the cost-benefit analyses performed in each individual licensing proceeding. Prior to completion of that rulemaking, NRC should continue to evaluate, on a case-by-case basis, the environmental effects of facility systems either as proposed by applicants or as described in the Section 401 certificate or Section 402 permit issued for the particular facility, as appropriate. This suggestion was not adopted since NRC does not feel it would be practical at this time to treat the many individual and site specific facets of water quality impacts in a generic fashion.

6. It was pointed out that the EPA headquarters-regional responsibility needs to be clarified, i.e., the Assistant Administrator for Enforcement is named as the prime EPA contact. The matter has been clarified in the Memorandum by stating that the principal EPA contact shall be the Assistant Administrator for Enforcement and/or the Regional Administrator or his designee as appropriate.

7. It was suggested that once a "Preliminary Determination" has been issued at the construction permit stage, one should not have to go through the "Preliminary Determination" at the operating license stage. The "Preliminary Determination" concept has been dropped and actual Section 402 permits will be issued; however, as indicated in the response to Comment 3, there will be need for reissuance of the permits at appropriate intervals.

8. It was suggested that Paragraph 1 of the applicability statement be broadened to apply to all environmental impacts of cooling systems, e.g., the effect of chemical effluents, entrainment of biota, etc. EPA's early section 402 permit will contain terms and conditions regarding thermal releases and cooling water intake requirements. In addition, with regard to chemical or other requirements, where an applicant seeks a variance from new source performance standards or any other applicable EPA regulations relative to discharges, EPA will consider the issues as necessary at the early section 402 permit stage. (See response to comment number 3)

9. The question was raised as to whether discharge permit requirements will be made a part of the NRC environmental technical specifications. The matter of incorporation of permit requirements will depend on a case-by-case application of the requirements of NEPA and the Policy Statement set forth in Appendix A to the Memorandum.

10. It was stated that the terms and conditions of Section 401 certifications must not be changed between the Construction Permit and Operating License stage. Section 401 certifications are subject to change pursuant to section 401 (a) (3) of the FWPCA and are, therefore, beyond the scope of this Memorandum.

11. It was noted that the proposed Memorandum should be coordinated with the appropriate river basin commissions. Activities under the Memorandum will be coordinated with appropriate river basin commissions.

12. It was suggested that only the existence of significant issues should serve as a basis for revision of the "Preliminary Determination" at the time of issuance of the NPDES permit. It is suggested that "good cause" be replaced by "significant issues". As indicated above, the concept of "Preliminary Determinations" has been dropped in favor of the actual issuance and reissuance of section 402 permits.

In summary, the Memorandum:

1. Specifies the statutory authority of both agencies for entering into the Memorandum.

2. Defines those licensing and regulatory activities to which the Memorandum shall be applicable.

3. Designates NRC as the lead agency for preparation of environmental statements for the identified activities as provided for in § 1500.7(b) of the CEQ Guidelines for Preparation of Environmental Impact Statements (August 1, 1973).

4. Specifies that NRC and EPA will work together to identify needed environmental information for early evaluations related to impact from the identified activities on water quality and biota.

5. Provides for EPA to exercise its best efforts to evaluate impacts on water quality and biota as far as possible in advance of the issuance of NRC's final environmental impact statement for any covered activity and specifies that EPA and NRC will maintain close working relationships during the entire environmental review process.

6. Specifies that EPA will issue to the applicant, where appropriate, in light of substantive requirements, a complete Section 402 permit as far as possible in advance of authorization by the NRC of any commencement of construction or issuance by NRC of a license or early site approval, whichever is applicable.[1] Such permits will contain appropriate terms and conditions for all discharges of pollutants expected during the life of the permit (five years maximum) and terms and conditions with regard to cooling water intake structures and Section 316(a) determinations concerning thermal discharges. Additional permit terms and conditions for discharges not contemplated during the life of the permit (such as certain chemical and other releases not expected until operation startup) may be derived from applicable State water quality standards and applicable new source performance standards contained in 40 CFR Chapter I, Subchapter N. Permits will be reissued, as appropriate, and any reissued permit, to be effective at the commencement of actual discharge as provided above, may require additional limitations and controls based on data gathered during the initial permit or may require additional section 316 (a) and (b) studies for the purpose of confirming conclusions reached from previous predictive studies. It is expected that the early issuance of Section 402 discharge permits will assure, to the maximum extent possible, that considerations regarding impacts on water quality and biota will not result in the need for significant changes in plant design or in the costs and benefits of the operation of the facility subsequent to the completion of NRC's environmental review.

7. Specifies that EPA and NRC will consider the feasibility of holding combined or concurrent hearings on EPA's proposed section 402 permits and NRC's proposed issuance of construction permits or other activities where appropriate.

8. Rescinds the Memorandum of Understanding Regarding Implementation of Certain Complementary Responsibilities under the FWPCA and dated January 15, 19 and 22, 1973 (38 FR 2713).

After consideration of the comments received on the Interim Policy Statement and other factors involved, the NRC has adopted the revised Policy Statement set forth in Appendix A to the Memorandum. The significant changes from the language of the previous Interim Policy Statement are as follows:

a. Additional language has been included to make it clear that limitations imposed through the exercise of State authority preserved by section 510 of the FWPCA will be regarded by NRC as minimum limitations if they address matters different from matters addressed by other limitations imposed pursuant to the FWPCA.

b. The bases for cost-benefit analyses of alternatives have been clarified and modified. First, the specific requirement that, in designated circumstances, NRC independently determine the matter of compliance with FWPCA limitations and requirements has been deleted. NRC believes that in light of the general requirement that full certifications regarding compliance be furnished to it prior to license or permit issuance pursuant to section 401, and in light of the provisions of the memorandum providing for early issuance of permits pursuant to section 402, due regard will be given to the compliance matter within the NRC regulatory context without NRC assuming an independent and essentially duplicative function in this regard. Second, the requirement that environmental impact be

[1] See 10 CFR Part 2, Appendix A, Paragraph I(c).

V40251 DEC 31 75 XUM

evaluated on the basis of discharges or other activities at the level of FWPCA limitations or requirements has been replaced by the requirement that environmental impact simply be evaluated. Whether that evaluation should be conducted at the level of the FWPCA requirements or at some level more protective of the environment will depend upon such factors as the physical nature of the facility and other circumstances of the case. Third, the provisions regarding alternatives have been modified and simplified so as to provide that NRC will not require adoption of an alternative in order to minimize impacts on water quality and biota that are subject to FWPCA limitations or requirements.

c. A new Paragraph has been added in response to a comment that the status of certifications issued pursuant to section 21(b) of the FWPCA as in effect immediately prior to the date of enactment of the FWPCA should be clarified. In addition, the definition of FWPCA limitations or other requirements has been expanded to include limitations or other requirements of State law preserved by Section 510 of the FWPCA which have been imposed as license conditions pursuant to section 401(a)(2) of the FWPCA, and other paragraphs in the Policy Statement have been modified as appropriate to reflect this expanded definition.

d. A new Paragraph has been added to address the situation where limitations or other requirements with respect to heated effluents have been promulgated or imposed but a request for alternative effluent limitations under section 316(a) may be filed and no limitations under section 316(a) have yet been imposed. Under these circumstances less stringent limitations or other requirements could be imposed with respect to heated effluents under section 316(a). The NRC would in this situation retain authority under NEPA, where necessary from the standpoint of environmental protection, to impose its own requirements with respect to heated effluents which were less stringent than or equally stringent as those promulgated or imposed under the various sections of the FWPCA other than Section 316(a). It is recognized that any such NRC requirements regarding heated effluents may be subject to modifications in light of the provisions of any later section 402 permit. Of course, where an early discharge permit is required, any NRC requirements would need to be consistent with the terms of the permit, and paragraph 8 of the Policy Statement would be inapplicable.

e. Finally, a new Paragraph 6 has been added to provide for an orderly transition period for proceedings, where the application and environmental report had been filed prior to enactment of the FWPCA, by affording recognition to proposals by the applicants to abide by more stringent requirements.

No comments were received on the Interim Policy Statement from any governmental agency or environmental organization. The comments that were received by NRC generally reflected the opinion that NRC was precluded by section 511 of the FWPCA from considering any water quality matters generally covered by the FWPCA regardless of the status of FWPCA implementation, and that the Interim Policy Statement would result in duplication of effort and confusion in licensing proceedings because of the evolving nature of FWPCA requirements. The NRC believes that NEPA and FWPCA require that NRC continue to exercise its NEPA responsibility to evaluate environmental impacts. The revised Policy Statement set forth in Appendix A to the Memorandum of Understanding seeks to avoid duplication of effort to the maximum extent consistent with statutory requirements. The NRC recognizes that some limited duplication of effort will result from the NRC continuing to evaluate environmental impact regardless of the status of FWPCA implementation but believes that this limited duplication of effort is a necessary incident to a proper implementation of section 511.

Several comments suggested that Paragraph 3. of the Interim Policy Statement was inconsistent with Paragraphs 4. and 5. dealing with alternatives. Revised paragraph 4 indicates that NRC will not require adoption of an alternative because it would produce less water pollution than allowed by FWPCA limitations on requirements. However, NRC would not be precluded from insisting on an alternative which is a better environmental solution taking into account total impacts such as air quality, aesthetics, etc., simply because it also produces less water pollution. Thus, for example, if a plant with once through cooling system complied with FWPCA thermal effluent limitations under section 316(a) of the FWPCA, more stringent thermal limitations would not be imposed by NRC as a result of consideration of another cooling system as an alternative unless matters not covered by the thermal effluent limitations, such as effects of fogging, indicated that such adoption was warranted.

Accordingly, pursuant to NEPA, FWPCA, Section 161 of the Atomic Energy Act and the Energy Reorganization Act of 1974, notice is hereby given that NRC and EPA with the concurrence of CEQ have entered into the following Memorandum of Understanding.

The NRC and EPA invite all interested persons to submit written comments or suggestions for consideration in connection with the Memorandum. The comments should be sent to the Secretary of the NRC, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section on or before January 20, 1976. Consideration will be given to such submissions with the view to possible further amendments. Copies of comments received may be examined at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

On January 27, 1976, NRC and EPA will hold a heeting to discuss the Memorandum and answer questions. All interested persons are invited to attend, provided that notice of intent to attend is received by NRC prior to Jan. 20, 1976. The meeting will be held at NRC's Offices at 7920 Norfolk Avenue, Bethesda, Maryland, beginning at 9:30 a.m. in Room P-118.

Dated at Washington, D.C. this 23rd day of December 1975.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

SECOND-MEMORANDUM OF UNDERSTANDING REGARDING IMPLEMENTATION OF CERTAIN NRC AND EPA RESPONSIBILITIES

Prior to the enactment of P.L. 92-500, the Federal Water Pollution Control Act Amendments of 1972 (FWPCA), the Atomic Energy Commission (AEC) had regulatory authority pursuant to the National Environmental Policy Act of 1969 (NEPA), in consideration of the environmental impact of the discharge of pollutants and other factors, to impose limitations on the discharge of pollutants from nuclear power plants and other facilities or activities requiring an AEC license or permit, as a condition of such license or permit.

The FWPCA now requires the Environmental Protection Agency (EPA) to establish (for use in permits for the discharge of pollutants to navigable waters of the United States from point sources as defined in the FWPCA, such as nuclear power plants, etc.) effluent limitations for all pollutants. The FWPCA (section 511) provides that nothing under NEPA shall be deemed to authorize any Federal agency to review any effluent limitation or other requirement established pursuant to the FWPCA, or to impose, as a condition of any license or permit, any effluent limitation other than any such limitation established pursuant to the FWPCA.

Pursuant to the authority of the FWPCA, EPA requires applicants for discharge permits to submit information required by EPA in order to establish effluent limitations in permits. Pursuant to the authority of NEPA, NRC may require applicants for licenses or permits to submit information required by NRC in order to evaluate and consider the environmental impacts of any actions it may take. Consequently, the informational needs imposed by the two agencies may be similar in the area of impacts on water quality and biota.

The NEPA requires that all Federal agencies prepare detailed environmental statements on proposed major Federal actions which can significantly affect the quality of the human environment. A principal objective of NEPA is to require the Agency to consider in its decision-making process the environmental impacts of each proposed major action and the available alternative actions. Both EPA and NRC have responsibilities pursuant to NEPA regarding the issuance of licenses or permits for nuclear power plants and certain other facilities.

The purpose of the memorandum is to clarify the respective roles of EPA and NRC in the decision-making processes concerning nuclear power plants and other facilities requiring an NRC license or permit.

Requirements under the FWPCA which affect actions for NRC include: (1) The requirement under section 401 of the FWPCA for a state certification to be received by NRC prior to the issuance of a license or permit to conduct any activity which may result in any discharges into navigable waters; (2) the requirement under section 301 of the FWPCA that a Section 402 National Pollutant Discharge Elimination System (NPDES) permit

be issued for the discharge of any pollutant; (3) the possibility that variances from section 301 or 306 thermal effluent limitations may be granted under Section 316(a); (4) the requirement under section 316(b) that the location, design, construction, and capacity of cooling water intake structures reflect the best technology available for minimizing adverse environmental impact; and (5) the provisions of section 511 as discussed above. Recognizing (1) NRC's and the applicant's need for early evaluation of impacts on water quality and biota that may arise from nuclear power plants, and certain other activities requiring an NRC license or permit which are subject to the requirements of 10 CFR 51.5 (a); (2) EPA's and NRC's desire to reach such evaluations consistent with the requirements of the FWPCA and NEPA, and (3) the need for minimizing duplication of effort, EPA and NRC agree that pursuant to their statutory authorities:

1. NRC will exercise its responsibility and authority under NEPA as modified by Section 511 of the FWPCA in accordance with the statement of policy set forth in Appendix A hereto. The Memorandum of Understanding Regarding Implementation of Certain Complementary Responsibilities Under the FWPCA and dated January 15, 19 and 22, 1973 (38 FR 2713) is hereby rescinded.

2. Paragraphs 3 through 14 of this Memorandum of Understanding shall apply to requirements for the control and consideration of impacts on water quality and biota associated with the licensing and regulation, including early site approval,[1] of the following plants or facilities:

a. Nuclear power and test facilities,
b. Nuclear fuel reprocessing facilities,
c. Uranium isotope enrichment facilities,
d. Nuclear fuel fabrication plants,
e. Uranium hexafluoride conversion plants,
f. Uranium milling plants, and
g. Nuclear waste treatment and storage plants.

3. NRC and EPA will work together to identify and consolidate the environmental information needed for early evaluations related to impacts on water quality and biota under the FWPCA with the objective that the cope, form and timeliness of the information to be submitted by the applicant satisfy the requirements of both Agencies. This will include information needed for issuance of State water quality certifications pursuant to section 401 and NPDES permits pursuant to section 402, (including where applicable section 316(b) considerations regarding best technology available as applied to cooling water intake structures and section 316(a) determinations regarding the granting of alternative effluent limitations for the thermal component of discharges) and information needed to evaluate the environmental impact of the facility based on compliance with FWPCA requirements.

4. Where a facility specified in section 2 of this Memorandum is a "new source" (as defined under Section 306 of the FWPCA) and EPA is the permit issuing authority, EPA has a responsibility to comply with section 102 (2)(C) of NEPA. EPA and NRC intend that a single environmental impact statement will be prepared for the facility, and that NRC will be the lead agency for preparation of such a statement as provided in § 1500.7(b) of the CEQ guidelines for Preparation of Environmental Impact Statements (August 1, 1973).

(a) EPA will participate in the preparation of the water quality and related sections of the draft statement prepared by NRC staff. EPA may provide assistance to the NRC staff in areas (other than water quality) where EPA has jurisdiction or expertise.

(b) During the draft statement comment period, EPA will review and comment pursuant to section 309 of the Clean Air Act, as amended, and § 1500.7(b) of the CEQ Guidelines for Preparation of Environmental Impact Statements (August 1, 1973) on the draft environmental impact statement prepared by NRC staff. EPA will participate with NRC in the review of comments on the draft EIS and in the preparation of the final EIS.

(c) Where there are areas of disagreement that cannot be resolved prior to issuance of the final statement, both NRC's and EPA's views shall be accurately set forth in the final statement.

(d) It is expected that where EPA does not agree with any of the discussions, analyses and conclusions of the NRC staff as set forth in the final environmental impact statement, EPA may petition for leave to intervene pursuant to 10 CFR 2.714 in any proceeding pending before an NRC atomic safety and licensing board on the license or permit application at issue in order to have its opposing views considered further on their merits by NRC.

(e) In any hearing held by EPA pursuant to 40 CFR 125.36 regarding the issuance of a issues concerning matters within EPA's regulatory jurisdiction will be considered, and those NEPA issues outside of EPA's regulatory jurisdiction will be resolved in the NRC impact statement and, if necessary,

5. NRC will take the lead in communicating to the applicant those minimum NRC and EPA requirements for information to facilitate their respective environmental evaluations. Requests for additional information, as needed in specific situations, may be directed to the applicant by EPA. Such requests will be coordinated with NRC to the maximum extent practicable in order to avoid duplication of effort.

6. EPA and NRC will meet, as appropriate, at an early time prior to and/or during the environmental review process for each facility or plant specified in Section 2 of this Memorandum to discuss potential impacts on water quality and biota.

7. EPA will exercise its best efforts to evaluate the levels of discharges and impacts on water quality and biota pursuant to sections 402 and 316(a), as appropriate, and complete cooling water intake structure evaluations pursuant to section 316(b) as far as possible in advance of the planned date of issuance by NRC of the final environmental impact statement for the construction permit or operating license for each nuclear power reactor. EPA also will exercise its best efforts to make such evaluations as far as possible in advance of the planned date of issuance of the final environmental impact statement for any other plant or facility specified in section 2 of this Memorandum, or issuance of early site approvals associated with nuclear power and other facilities.

Further, where possible, EPA's comments on NRC's draft environmental impact statement for each such facility or plant will reflect such evaluations. EPA will, if necessary, undertake to revise existing NPDES regulations in order to establish a procedure for issuance to the applicant (copy to NRC), where appropriate in light of the substantive requirements of section 402, of a complete section 402 permit as soon as possible prior to the planned date of authorization by the NRC of any commencement of construction[2] or issuance by NRC of a license, or early site approval, whichever is applicable.

Such permits will contain appropriate terms and conditions for all discharges of pollutants expected during the life of the permit (five years maximum) and terms and conditions with regard to cooling water intake structures and section 316(a) determinations concerning thermal discharges. Additional permit terms and conditions for discharges not contemplated during the life of the permit (such as certain chemical and other releases not expected until operation startup) may be derived from applicable State water quality standards and applicable new source performance standards contained in 40 CFR, Chapter I, Subchapter N. Permits may be reissued, or modified as appropriate, and any reissued or modified permit, to be effective at the commencement of actual discharge as provided above may require additional limitations and controls based on data gathered during the initial permit or may require additional section 316(a) and (b) studies for the purpose of confirming conclusions reached from previous predictive studies. Applications for permit reissuance as provided above will be evaluated by EPA in light of a policy to assure to the maximum extent possible that subsequent considerations regarding impacts on water quality and biota will not result in the need for significant changes in plant design or in the costs and benefits of the operation of the facility subsequent to the completion of NRC's environmental review.[3]

8. EPA will work closely with NRC in connection with NRC's efforts with State and regional authorities to assure that water quality certifications pursuant to section 401 for the facilities specified in section 2 that require such certification are issued in advance of the planned date of issuance of NRC staff's final environmental impact statement for the facility. Where needed EPA also will work closely with NRC in connection with NRC's efforts with State and regional authorities to assure that discharge permits pursuant to section 402 for facilities specified in section 2 are issued as soon as possible prior to the planned date of authorization by NRC of any commencement of construction or issuance by NRC of a license, or early site approval, whichever is applicable.

9. It is the view of the parties that the States which have approved NPDES permit programs have authority to establish a procedure similar to the early permit issuance procedure discussed in Paragraph 7 hereof. Both EPA and NRC strongly encourage States which have such authority to institute an early issuance procedure relevant at least to thermal discharge and intake structure determinations and other discharges anticipated during the life of the permit and to cooperate with EPA and NRC in implementing this procedure.

10. EPA and NRC will maintain close contact on water quality and related matters during the entire environmental review, including:

(1) Open interagency communications, and mutual cooperation and coordination on all relevant water quality matters;

(2) A status meeting, where appropriate, after completion of the public comment period on NRC staff's draft environmental impact statement; and

(3) Notification to the other Agency, by the Agency first becoming aware of the situation, at any point during the environmental review or subsequent thereto, of any significant new considerations that develop, e.g., a major change in plant design or the identification of significant considerations regard-

[1] See 10 CFR Part 2, Appendix A, Paragraph I(c).

[2] The term "commencement of construction" means commencement of construction as defined in 10 CFR 30.4(w), 40.4(n), 50.10 (c) or 70.4(s), as applicable.

[3] A facility which has been given section 316(a) alternative effluent limitations is not entitled to the 10-year grace period (or applicable amortization period) provided for in section 306(d) for new sources or in 316 (c) for modified sources.

V40251 DEC 31 75 XUM

ing impacts on water quality or biota that were not previously evaluated as may result from a major change in plant design.

11. EPA and NRC will consider the feasibility of holding combined or concurrent hearings on EPA's section 402 permits and NRC's construction permits, or other actions, on a case-by-case basis. If there are areas involving impact on water quality or biota where there are significant differences of opinion between NRC and EPA, every reasonable attempt will be made to identify and resolve these differences prior to the planned date of issuance of NRC's final environmental statement.

12. The principal NRC contact under this Memorandum of Understanding shall be the Assistant Director for Environmental Projects. The principal EPA contact under this Memorandum of Understanding shall be the Assistant Administrator for Enforcement, and/or the Regional Administrator or his designee as appropriate.

13. Nothing in this Memorandum of Understanding is intended to restrict the statutory authority of either Agency. The Memorandum of Understanding regarding NRC-Licensed Facilities and dated August 21 and 27, 1973 (38 FR 24936) shall remain in effect in accordance with its terms.

14. This Memorandum of Understanding shall take effect on January 30, 1976 after the signing by authorized representatives of the respective Agencies and approval by the Council on Environmental Quality. The Memorandum shall apply to all pending and future applications for licenses or permits covered by paragraphs 1 and 2 except that, with respect to applications for licenses or permits for facilities and plants docketed prior to the effective date of this Memorandum, Paragraphs 2 through 14 shall only be applied to the maximum extent practicable. This Memorandum of Understanding and Appendix A hereto supersede the Memorandum of Understanding Regarding Implementation of Certain Complementary Responsibilities Under the FWPCA and dated January 15, 19 and 22, 1973 (38 FR 2713) and associated Interim Policy Statement (38 FR 2679).

Dated at Washington, D.C. this 17th day of December 1975.

FOR THE UNITED STATES NUCLEAR REGULATORY COMMISSION,

LEE V. GOSSICK,
Executive Director for Operations.

FOR THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY,

STANLEY W. LEGRO,
Assistant Administrator for Enforcement.

APPROVED BY THE COUNCIL ON ENVIRONMENTAL QUALITY FOR THE COUNCIL,

GARY WIDMAN,
General Counsel.

APPENDIX A—POLICY STATEMENT ON IMPLEMENTATION OF SECTION 511 OF THE FEDERAL WATER POLLUTION CONTROL ACT (FWPCA)

1. Applicability: This statement and Paragraph 1 of the Memorandum shall apply to all licensing proceedings subject to 10 CFR Part 51, involving facilities or activities which may result in the discharge of a pollutant into the navigable waters, as defined in section 502(12)(A) of the FWPCA.

2. Definition of Terms. As used in this statement: a. Limitations or other requirements promulgated or imposed pursuant to the FWPCA means effluent limitations or other requirements promulgated or imposed pursuant to sections 208(e), 301, 302, 303(e), 304(b), 306, 307, 316, 316, 401, 402, 403, or 404 of the FWPCA. It also includes (1) water quality standards continued in effect or promulgated pursuant to Sections 303(a), 303 (b), or 303(c) of the FWPCA; (2) maximum daily loads for pollutants and maximum daily thermal loads, promulgated pursuant to section 303(d) of the FWPCA; and (3) limitations or other requirements of State law under authority preserved by section 510 of the FWPCA, but only if and to the extent that such limitations or other requirements covered by this Paragraph (a)(3) are imposed and set forth in a certification pursuant to Section 401(d) of the FWPCA, or are imposed as a condition in the license pursuant to section 401(a)(2) of the FWPCA, or are imposed and set forth as a condition in a permit issued pursuant to section 402 of the FWPCA. It does not include effluent limitations or other requirements regarding source, byproduct, or special nuclear materials, which are subject to regulation by the Nuclear Regulatory Commission (NRC) pursuant to the Atomic Energy Act of 1954, as amended, or limitations or other requirements promulgated or imposed pursuant to other Federal law.

b. Pollutant discharge system means equipment or mode of operation designed or intended for the control of the discharge of pollutants, as that last phrase is defined in Section 502(12) of the FWPCA. It does not include equipment or mode of operation designed or intended for the control of source, byproduct or special nuclear materials, which are subject to regulation by NRC pursuant to the Atomic Energy Act of 1954, as amended.

c. Cooling water intake structure location, design, construction and capacity means cooling water intake structure location, design, construction and capacity within the meaning of Section 316(b) of the FWPCA.

3. Authority to Impose Requirements or Limitations Pursuant to National Environmental Policy Act of 1969 (NEPA).

Except as provided in Paragraph 7, if and to the extent that there are applicable limitations or other requirements promulgated or imposed pursuant to the FWPCA, different limitations or requirements will not be imposed by NRC pursuant to NEPA as a condition to any permit or license, provided however, that limitations or other requirements of State law, under authority preserved by Section 510 of the FWPCA which (1) are imposed and set forth in a certification pursuant to Section 401(d) of the FWPCA, or imposed as a condition in the license pursuant to Section 401(a)(2) of the FWPCA, or imposed and set forth as a condition in a permit issued pursuant to Section 402 of the FWPCA, and (2) address matters different from the matters addressed by other limitations or other requirements promulgated or imposed pursuant to the FWPCA, shall be regarded as only minimum limitations or requirements and NRC shall retain any authority under NEPA to impose more stringent limitations or requirements.

4. Alternatives. a. Neither alternative cooling water intake structure location, design, construction, and capacity, nor alternative pollutant discharge systems will be considered by NRC pursuant to NEPA (1) if and to the extent that conditions imposed as a part of the license or permit for the facility of activity pursuant to section 401(d) or section 401(a)(2) of the FWPCA require that a particular alternative be adopted, or (2) if and to the extent that a permit or determination with a condition requiring the adoption of a particular alternative has been issued for the facility or activity pursuant to sections 208(b)(2)(C)(ii) and 303(e)(3)(B), 318, 402 or 404 of the FWPCA.

b. Alternative pollutant discharge systems will not be considered by NRC pursuant to NEPA where effluent limitations have been imposed on the facility or activity under sections 301(c) or 302 of the FWPCA.

c. Neither alternative sites, facilities or activities, nor alternative systems will be considered by NRC pursuant to NEPA if and to the extent that a determination made with respect to the facility or activity under sections 208(b)(2)(C)(ii) and 303(e)(3)(B) of the FWPCA requires as a condition that a particular site, facility or activity, or system be adopted.

d. NRC will not require adoption of an alternative pursuant to NEPA in order to minimize impacts on water quality and biota that are subject to limitations or other requirements promulgated or imposed pursuant to the FWPCA.

5. Cost-Benefit Balances. In evaluting the costs and benefits of a proposed action pursuant to NEPA, NRC will evaluate impacts on water quality and biota notwithstanding that such impacts are subject to limitations or other requirements promulgated or imposed pursuant to the FWPCA.

6. Certifications. A certification issued pursuant to section 21(b) of the FWPCA in effect immediately prior to the date of enactment of the Federal Water Pollution Control Act Amendments of 1972 will be accepted as satisfying the certification requirements of FWPCA section 401(a) with respect to NRC licensing actions after that date subject to section 401(a) if the certification otherwise remains in effect.

7. More Stringent Requirements—Transition Period. The NRC may include limitations or requirements in the license or permit that are more stringent than limitations or requirements promulgated or imposed pursuant to the FWPCA where such limitations or requirements are proposed by the license or permit applicant in a licensing proceeding in which the applicant's license or permit application at issue and environmental report had been filed prior to enactment of the FWPCA.

8. Effect of section 316(a). Whenever there are limitations or other requirements promulgated or imposed pursuant to the FWPCA with respect to discharges of heated effluent but a request pursuant to section 316(a) has been or may be filed and no limitations pursuant to section 316(a) have yet been imposed, the other limitations or other requirements respecting discharges of heated effluent shall be regarded as expressing only the most stringent limitations or other requirements that might be promulgated or imposed pursuant to the FWPCA in implementing Paragraph 3.

9. Effect on Part 51. To the extent that there is a conflict between any of the provisions of this statement of policy and the provisions of 10 CFR Part 51, the provisions of this statement shall govern.

EXECUTIVE OFFICE OF THE PRESIDENT
COUNCIL ON ENVIRONMENT QUALITY

DECEMBER 17, 1975.

DEAR MESSRS. GOSSICK AND LEGRO: The Council on Environmental Quality is pleased to approve the Second Memorandum of Understanding Regarding Implementation of Certain NRC and EPA Responsibilities. The memorandum provides for the coordination and integration of NEPA review concerning licensing of certain nuclear facilities. Such coordination is a goal which the Council supports and encourages in CEQ's Guidelines.

Recognizing that the agreement is limited to states where EPA is the permit-issuing authority, the Council nevertheless wishes to clarify its interpretation of a sentence in Paragraph 4 of the Memorandum, in order to avoid any misunderstanding of the Council's position. Paragraph 4 provides, inter alia, Where a facility specified in section 2 of this Memorandum is a new source (as defined under section 306 of the FWPCA) and EPA is the permit issuing authority, EPA has a responsibility to comply with section 102(2)(C) of NEPA.

The Council agrees with this statement. However, to the extent this sentence may suggest that NEPA does not apply to EPA if EPA has approved a state permit program pursuant to section 402(b) of the FWPCA, the Council believes that such a suggestion is legally inaccurate. After reviewing the applicable provisions of the FWPCA and NEPA, their legislative histories and relevant case law, CEQ believes that EPA has sufficient authority over permits in states with approved programs to establish responsibility for its own compliance with Section 102(2)(C) of NEPA.

Sincerely,

GARY L. WIDMAN,
General Counsel.

MR. LEE V. GOSSICK,
Executive Director for Operations, Nuclear Regulatory Commission.

MR. STANLEY W. LEGRO,
Assistant Administrator for Enforcement, Environmental Protection Agency.

GARY WIDMAN, *Esquire, General Counsel, Council on Environmental Quality, 722 Jackson Place NW., Washington, D.C.*

DECEMBER 17, 1975.

DEAR MR. WIDMAN: The purpose of this letter is to confirm our mutual understanding of the purpose and intent of paragraph 4.c. of the policy statement set forth as Appendix A to the "Second Memorandum of Understanding Regarding Implementation of Certain NRC and EPA Responsibilities."

The paragraph reflects the constraint on NRC's authority under NEPA imposed by section 511(c)(2) of the FWPCA. The paragraph limits the authority of NRC under NEPA to review and evaluate alternative sites where a State or EPA, acting under section 208(b)(2)(C)(ii) of the FWPCA, establishes and implements in the particular case a regulatory program which includes review and analysis of sites and which is essentially equivalent in its scope and depth of review of environmental factors and alternatives to that required of Federal agencies, such as NRC, under NEPA.

NRC is not relieved of its responsibility to review and evaluate alternative sites under NEPA to the extent that the State or EPA review program under section 208(b)(2)(C)(ii) is narrower in scope of review of environmental factors than required of Federal agencies by NEPA. For example, if environmental impacts of transmission lines or if land use impacts were not considered, NRC would consider such impacts in its review of the application.

Sincerely,

LEE V. GOSSICK,
Executive Director for Operations.

[FR Doc.75-35138 Filed 12-30-75;8:45 am]

GENERAL ELECTRIC CO.

General Electric Standard Safety Analysis Report; Issuance of a Safety Evaluation Report and Preliminary Design Approval

Notice is hereby given that the staff of the Nuclear Regulatory Commission (the NRC staff) has issued a Safety Evaluation Report (SER) dated December 1975, and a Preliminary Design Approval No. PDA-1 dated December 22, 1975, for the nuclear island portion of a nuclear power plant as described in General Electric Standard Safety Analysis Report (GESSAR-238). GESSAR-238 was reviewed by the NRC staff pursuant to Appendix O to 10 CFR Part 50.

GESSAR-238 contains preliminary safety-related design information for the nuclear island portion of a BWR/6-Mark III boiling water type nuclear power plant which includes the nuclear steam supply system (NSSS), engineered safety feature systems, containment structure, auxiliary building, control building, radwaste building, fuel handling building, and related systems and structures. The GESSAR-238 reference system is designed to operate at a core thermal power level of 3579 megawatts (1220 megawatts electrical, nominal net).

The SER, which documents the results of the staff's review and evaluation of GESSAR-238, including Amendments 1 through 39 thereto, and the design information incorporated by letters from the General Electric Company dated November 21, 1975 (from W. Gilbert to NRC) and December 16, 1975 (from I. Stuart to NRC), integrates and updates the Safety Evaluation Report dated November 1974, and Supplements 1, 2 and 3 thereto, dated December 1974, February 1975, and March 1975, respectively. Moreover, the SER addresses the comments of the Advisory Committee on Reactor Safeguards (ACRS) as reflected in its report to the Commission dated March 14, 1975. A copy of the ACRS report is included as Appendix F to the SER.

PDA-1 provides NRC staff approval of the preliminary nuclear island design described in GESSAR-238, including Amendment 1 through 39 thereto, and the above described letters from the General Electric Company. By the issuance of PDA-1, the NRC staff has determined that the design is acceptable for referencing in utility applications for construction permits with the exception of those features of the design for which the staff has identified requirements that differ from those described in the GESSAR-238 document. These design features relate to tornado missiles, main steam line isolation valve leakage control system interlock, containment purge, and Mark III containment dynamic loading criteria, which are discussed in the SER and incorporated as conditions of PDA-1. The GESSAR-238 nuclear island design as described in that document subject to the conditions of the PDA-1, shall be utilized by and relied upon by the NRC staff and the ACRS in their review of facility license applications for construction permits incorporating by reference the GESSAR-238 nuclear island preliminary standard design unless there exists significant new information which substantially affects the determinations in PDA-1 or other good cause.

Issuance of PDA-1 and the staff's Safety Evaluation Report does not constitute a commitment to issue a permit or license, or in any way affect the authority of the Commission, Atomic Safety and Licensing Appeal Board, Atomic Safety and Licensing Boards and other presiding officers in any proceeding under Subpart G of 10 CFR Part 2. This action only approves the design of a facility for use for reference purposes in applications for permits to construct a nuclear power plant. It does not authorize the construction or operation of any nuclear power plant or any other facility. The environmental impacts associated with any facility proposed to be constructed utilizing the approved reference design will be considered in accordance with the Commission's regulations in 10 CFR Part 51.

PDA-1 is effective as of its date of issuance and shall expire on December 22, 1978, unless earlier superseded by issuance of an appropriate FDA for the GESSAR-238 nuclear island standard design, or unless extended by the NRC staff. The expiration of PDA-1 on December 22, 1978, should not affect use of PDA-1 for reference in any construction permit application docketed prior to such date.

A copy of (1) the Preliminary Design Approval No. PDA-1 dated December 22, 1975, and Attachment A thereto; (2) the report of the Advisory Committee on Reactor Safeguards dated March 14, 1975; (3) the NRC staff's Safety Evaluation Report, NUREG 75/110, dated December 1975, which updates the Safety Evaluation Report dated November 1974, and Supplements 1, 2 and 3 thereto, dated December 1974, February 1975, and March 1975, respectively; (4) the General Electric Standard Safety Analysis Report and Amendments 1 through 39 thereto and letters from the General Electric Company dated November 21, 1975 (from W. Gilbert to NRC) and December 16, 1975 (from I. Stuart to NRC); and (5) WASH 1341, the Commission's "Programmatic Information for the Licensing of Standardized Nuclear Power Plants," dated August 1974, which also includes the Standardization Policy issued on March 5, 1973, are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. 20555. A copy of PDA-1 and Attachment A thereto, may be obtained upon request. The request should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing. Copies of the Safety Evaluation Report (Document No. NUREG-75/110) may be purchased at current rates from the National Technical Information Service, Springfield, Virginia 22161.

Dated at Bethesda, Maryland, this 22nd day of December 1975.

For the Nuclear Regulatory Commission Staff.

JOHN F. STOLZ,
Light Water Reactors Project, Branch No. 2-1, Division of Reactor Licensing.

[Docket Nos. 50-522; 50-523]

PUGET SOUND POWER AND LIGHT CO.

Order Cancelling Evidentiary Hearing

In the matter of Puget Sound Power and Light Company, Pacific Power and

V 40 251 DEC 31 75 D XUM

Light Company, the Washington Water Power Company, and Washington Public Power Supply System (Skagit Nuclear Power Project, Units 1 and 2).

The Atomic Safety and Licensing Board has been informed by the Regulatory Staff of the Commission that additional time is needed so that the Staff can complete its independent assessment of certain outstanding site suitability matters. In a telephone conversation, these matters were identified as unresolved geologic problems. The Staff did not specify a date on which it would be ready to proceed but requested a postponement of the evidentiary session presently scheduled by Order issued on November 6, 1975 to convene on January 13, 1976 in Seattle. The Staff further stated that the attorneys for the parties had been informed and no objections were asserted to this request.

The Atomic Safety and Licensing Board finds good cause to cancel the January 13, 1976 session of evidentiary hearings and a later order respecting a date for resumption of the postponed hearings will be issued when information is transmitted to the Board that the Staff is ready to proceed.

Wherefore, *it is ordered*, in accordance with the Atomic Energy Act, as amended, and the Rules of Practice of the Commission, that the session of evidentiary hearings scheduled to convene on January 13, 1976 in Seattle, Washington is cancelled, and a later order will be issued for resumption of evidentiary hearings when information is received that the Regulatory Staff is ready to proceed.

Issued: December 22, 1975, Bethesda, Maryland.

ATOMIC SAFETY AND LICENSING BOARD
SAMUEL W. JENSCH,
Chairman.

[Docket No. 50-206]

SOUTHERN CALIFORNIA EDISON CO. AND SAN DIEGO GAS AND ELECTRIC CO.

Issuance of Amendment to Provisional Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 16 to Provisional Operating License No. DPR-13 issued to Southern California Edison Company and San Diego Gas and Electric Company which revised Technical Specifications for operation of the San Onofre Nuclear Generating Station, Unit 1, located in San Diego, California. The amendment becomes effective 30 days after the date of issuance.

This amendment revises the provisions in the Technical Specifications relating to reporting requirements and also updates the Nuclear Audit and Review Committee membership titles.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the applications for amendment dated February 28 and November 11, 1975, (2) Amendment No. 16 to License No. DPR-13, with Change No. 26 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the San Clemente Public Library, 233 Granada Street, San Clemente, California.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated Bethesda, Maryland, this 18th day of December 1975.

For the Nuclear Regulatory Commission.

ROBERT A. PURPLE,
Chief, Operating Reactors Branch No. 1, Division of Reactor Licensing.

[FR Doc.35134 Filed 12-30-75;8:45 am]

[Docket Nos. 50-259 and 50-260]

TENNESSEE VALLEY AUTHORITY

Issuance of Amendment to Facility Operating Licenses

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 18 to Facility Operating License No. DPR-33 and Amendment No. 15 to Facility Operating License No. DPR-52 issued to Tennessee Valley Authority (the licensee) which revised Technical Specifications for operation of the Browns Ferry Nuclear Plant, Units 1 and 2, located in Limestone County, Alabama. The amendments are effective as of the date of issuance.

The amendments revise the Interim Technical Specifications to remove the requirements for certain cooling and ventilation equipment that are no longer needed. The cooling requirements are reduced since the decay heat of the fuel has been greatly reduced with the elapsed time since reactor operation. The ventilation requirements are reduced for the same reason and because the need to control air movement to prevent the spread of chloride contamination no longer exists with the burned cables and soot having been removed from the plant. These amendments do not allow the licensee to return the plant to operation. These amendments only affect the Interim Technical Specifications that cover this period of time during restoration and are not a part of the proposed Technical Specifications dated August 13, 1975, associated with returning the plant to operation following restoration. Those changes are the subject of a separate licensing action.

This change is required in order to allow the installation of the permanent control and power supplies to this equipment and in the case of the Standby Gas Treatment System to allow the connection of the third train of the system to accommodate the requirements of Unit 3. This equipment and their associated systems also are involved in the retest program that is required prior to return to operation. The licensee informed us that this work must be started at this time so as not to adversely impact the restoration schedule. The Interim Technical Specifications, as amended, continue to ensure that the two units will remain in a safe and stable posture during the period of the remaining restoration work with the fuel stored in the fuel storage pools.

The application for these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments is not required since the amendments do not involve a significant hazards consideration.

For further details with respect to action, see (1) the application for amendments dated November 7, 1975, (2) Amendment No. 18 to License No. DPR-33 and Amendment No. 15 to License No. DPR-52 with Changes No. 16, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Athens Public Library, South and Forrest, Athens, Alabama 35611.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 19th day of December 1975.

For the Nuclear Regulatory Commission.

TRAIL CLINIC

Order Convening Prehearing Conference

The Nuclear Regulatory Commission issued a Notice of Hearing in this proceeding and provided for the convening of a prehearing conference to be conducted by the undersigned. Inquiry has been made of the attorneys, in accordance with the Rules of Practice of the Commission, respecting a convenient date for convening a prehearing conference and January 20, 1976 has been agreed as suitable for the Licensee and the Regulatory Staff.

Wherefore, *it is ordered*, In accordance with the Atomic Energy Act, as amended, and the rules of practice of the Nuclear Regulatory Commission that a prehearing conference in this proceeding shall convene at 9 a.m. on Tuesday, January 20, 1976, in the United States Tax Court, Room 1017, Federal Building and Courthouse, 231 West Lafayette Street, Detroit, Michigan 48226.

Issued: December 22, 1975, Bethesda, Maryland.

[Docket No. 50-305]

WISCONSIN PUBLIC SERVICE CORP. ET AL.

Issuance of Amendment to Facility Operating License

In the matter of Wisconsin Public Service Corporation; Wisconsin Power and Light Company; and Madison Gas and Electric Company.

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 5 to Facility Operating License No. DPR-43 issued to Wisconsin Public Service Corporation which revised Technical Specifications for operation of the Kewaunee Nuclear Power Plant located in Kewaunee, Wisconsin. The amendment becomes effective 30 days after the date of issuance.

This amendment revises the administrative controls and reporting requirements of the Technical Specifications for the Kewaunee Nuclear Power Plant.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regualtions. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated January 15, 1975, (2) Amendment No. 5 to License No. DPR-43, with Change No. 7, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Kewaunee Public Library, 314 Milwaukee Street, Kewaunee, Wisconsin 54216.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 18th day of December 1975.

For the Nuclear Regulatory Commission.

NATIONAL SCIENCE FOUNDATION

AD HOC ADVISORY COMMITTEE ON THE SACRAMENTO PEAK OBSERVATORY

Partially Open Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Ad Hoc Advisory Committee on the Sacramento Peak Observatory.
Date: January 18-20, 1976.
Time: 8 p.m., January 18, 9 a.m., January 19-20.
Place: National Science Foundation, 1800 G Street, N.W., Room 338, Washington, D.C. 20550 (See agenda below).
Type of meeting: Part Open—Open 1/18 (8-10 p.m.); 1/19 (9 a.m.-5 p.m.); 1/20 (9-12 noon); Closed 1/19 (8-10 p.m.).
Contact person: R. R. La Count, Acting Head, National Astronomy Centers Section, Room 605, National Science Foundation, Washington, D.C. 20550; Telephone: (202) 632-5712.
Summary minutes: (Open Portion) May be obtained from the Committee Management Coordination Staff, Management Analysis Office, Room 248, National Science Foundation, Washington, D.C. 20550.
Purpose of advisory committee: To review the research activities at Sacramento Peak Observatory (SPO) and assess the scientific priority of SPO research in relation to other Federal support for ground-based astronomical research.
Agenda: Will include the following discussions and presentations:

January 18, 1976 (Room 338)

Preliminary review of private and Federal support of solar research in the United States. Organization of meeting.

January 19, 1976 (Room 338)

9:00 a.m.-4:00 p.m.: Presentation from invited experts on solar astronomy research in the U.S. and its relation to other branches of astronomy.
4:00 p.m.-5:00 p.m.: Open discussion.
8:00 p.m.: Review and evaluation of scientific research at Sacramento Peak Observatory (closed).

January 20, 1976 (Room 338)

9:00 a.m.-10:30 a.m.: Presentation of draft conclusions.
10:30 a.m.-12:00 noon: Comments and questions from invited experts.
12:00 noon-12:30: Open discussion.

Reason for closing: The Committee in its assessment of Sacramento Peak Observatory will conduct a review of the scientific personnel attached to the observatory.

Authority to close meeting: These matters are within the exemption 6 of 5 U.S.C. 552(b). The closing of this portion of the meeting is in accordance with a December 1975 determination by the Director of the National Science Foundation, pursuant to the provisions of Section 10(d) of P.L. 92-463.

GAIL A. MCHENRY,
Acting Committee Management Officer.

[FR Doc. 75-35145 Filed 12-30-75; 8:45 am]

ADVISORY GROUP ON CONTRIBUTIONS OF TECHNOLOGY TO ECONOMIC STRENGTH

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Group on Contributions of Technology to Economic Strength.
Date: January 15, 1976.
Time: 9:00 a.m. to 4:00 p.m.
Place: Rm. 2008, New Executive Office Building, 726 Jackson Place, N.W., Washington, D.C.
Type of meeting: Part Open—Closed 9:00 a.m. to 12 Noon. Open 1:00 p.m. to 4:00 p.m.
Contact person: Mr. William Montgomery; Special Assistant, Science and Technology Policy Office, National Science Foundation, Washington, D.C. 20550, telephone 202/632-8914. Anyone planning to attend the open portion of the meeting should contact Mr. Montgomery by January 10, 1976.
Summary minutes: (open portion) May be obtained from the Committee Management Coordination Staff, Management Analysis Office, Rm. 248, National Science Foundation, Washington, D.C. 20550.
Purpose of advisory group: To provide advice on issues that may lead to policy supporting an improved utilization of technology and fostering economic strength. This group will consider these subjects in a manner which will facilitate the planning for the proposed Office of Science and Technology Policy.
Tentative agenda: 9:00 a.m. to 12 Noon—closed. Briefings and discussions of interagency documents which treat possible program and budget initiatives involving several agencies of the Executive Branch.

1:00 p.m. to 4:00 p.m.—open

1:00: Technology and Innovation.
3:00: Committee Discussion of Future Agenda Items and Issues.
4:00: Adjourn.

Reason for closing: The Group will be reviewing and discussing interagency documents which treat possible program and budget initiatives involving several agencies in the Executive Branch.
Authority for closing: The Director of the National Science Foundation determined on December 15, 1975, that the portion of the meeting dealing with interagency documents is within exemption 5 of section 552(b), Title 5, United States Code, and should, therefore, be closed to the public.

Dated: December 24, 1975.

GAIL A. MCHENRY,
Acting Committee Management Officer.

[FR Doc.75-35146 Filed 12-30-75;8:45 am]

V40251DEC3175XUM

OFFICE OF MANAGEMENT AND BUDGET

PROPOSED REGULATION; INVITATION FOR PUBLIC COMMENT

Public Meetings

The Office of Federal Procurement Policy (OFPP) plans to promulgate the following OFPP Regulation No. 2, pursuant to the authority and requirements of Pub. L. 93-400, and invites the written comments of interested parties for consideration in the drafting of the regulation.

Such comments should be addressed to the Administrator for Federal Procurement Policy, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503, and should be submitted by February 29, 1976.

JAMES D. CURRIE,
Acting Administrator for Federal Procurement Policy.

OFFICE OF FEDERAL PROCUREMENT POLICY REGULATION NO. 2

PUBLIC MEETINGS

1. *Purpose.* This regulation provides for the conduct of formal public meetings by the Office of Federal Procurement Policy (OFPP) in connection with the establishment of procurement policies by the Administrator for Federal Procurement Policy.

2. *Authority.* Section 14(b) of the Office of Federal Procurement Policy Act (Public Law 93-400; 41 U.S.C. 412(d)) provides that the Administrator shall, by regulation, require that formal meetings of the Office, as designated by him, for the purpose of establishing procurement policies and regulations, shall be open to the public, and that public notice of each such meeting shall be given not less than 10 days prior thereto.

3. *Applicability.* This regulation applies to all procurement policy and regulation matters within the Administrator's authority under the Act, including procurement by executive agencies and recipients of Federal grants and assistance.

4. *Scheduling.* In matters designated by him, the Administrator, or his designee for such purpose, will schedule one or more formal public meetings of the OFPP in connection with the establishment of OFPP policies and regulations.

5. *Conduct.* Any such meeting will ordinarily be conducted primarily to: (a) Act on a report or recommendation developed by the Federal agencies or officials designated by the Administrator; (b) consider written comment thereon from members of the public; and (c) provide an opportunity for formal discussion of such report, recommendation and comment by representatives of Federal agencies and the Administrator and his staff. Members of the public who have made written submissions at least 24 hours in advance of the meeting may be permitted to make brief oral presentations. The Administrator may require that such oral presentations be limited to a brief summary of the main points in the written submissions. At his discretion, the Administrator may allow other members of the public an opportunity to comment briefly on matters under discussion. In any case, the conduct of such meetings and the participation of all present will be subject to the control and direction of the Administrator at all times.

6. *Criteria.* A public meeting shall be convened incident to the adoption, amendment or repeal of an OFPP policy or regulation when the Administrator determines that a public meeting would materially benefit the consideration of the issues or is likely to develop significant additional information or views or provide useful public visibility to the policy determination of the Office.

7. *Notice.* Notice of any such public meeting shall be published in the FEDERAL REGISTER at least 10 days prior thereto. The notice shall give the time, place and purpose of the meeting and shall include either the text or a summary of the matter to be considered. If a summary is published, the notice shall advise where the text may be examined. If a copy of any related agency or other official report or recommendation is available for inspection, the notice shall advise where it may be examined. The notice shall also invite interested organizations, associations, firms, and members of the public to comment in writing and shall offer an opportunity for oral presentation by or on behalf of any interested party making a written submission at least 24 hours in advance of the meeting.

DEPARTMENT OF LABOR

Office of the Secretary

[TA-W-228]

B & G SILVERMAN, INCORPORATED

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1914, an investigation was initiated on October 14, 1975 in response to a worker petition dated September 22, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing men's suits and sportcoats at B & G Silverman, Incorporated, Philadelphia, Pennsylvania.

Notice of the investigation was published in the FEDERAL REGISTER on October 24, 1975 (40 FR 49626). No public hearing was requested and none was held.

During the course of the investigation it was established that the most recent involuntary separations at B & G Silverman, Inc. occurred in August of 1974. Section 223(b)(2) of the Trade Act of 1974 provides, in substance, that a certification shall not apply to any worker whose last total or partial separation from the firm or an appropriate subdivision of the firm occurred more than 6 months before the effective date of the adjustment assistance provisions of the Trade Act, namely, April 3, 1975.

Since, in this case, the most recent involuntary separations occurred prior to October 3, 1974, the workers could not be eligible for program benefits under Title II, Chapter 2, Subchapter B of the Trade Act of 1974, Therefore this investigation has been terminated.

Signed at Washington, D.C. this 17th day of December 1975.

DOMINIC SORRENTINO,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-209]

ELKTON FASHION INDUSTRIES

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-209; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 223 of the Act.

The investigation was initiated on October 2, 1975 in response to a worker petition received on October 2, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing men's suit coats and sportcoats at Elkton Fashion Industries, Elkton, Maryland.

The notice of investigation was published in the FEDERAL REGISTER on October 16, 1975 (40 FR 48558). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Elkton Fashion Industries its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. The average number of production workers declined 80 percent in 1975 compared to 1974. Average employment declined 16 percent in the fourth quarter of 1974 compared to the third quarter of 1974.

Sales or production, or both, have decreased absolutely. Sales at Elkton Fashion Industries declined 90 percent in the first three quarters of 1975 compared to the first three quarters of 1974. Sales in December 1974 were 75 percent below November 1974 and 50 percent below December 1973 levels.

Increased imports contributed importantly. Imports of articles like or directly competitive with those produced at Elkton Fashion Industries increased from 3,562 thousand units in 1971 to 7,393 thousand units in 1973.

The ratios of imports to domestic consumption and production increased from 8.5 percent and 9.3 percent, respectively in 1971 to 14.1 percent and 16.4 percent in 1974. The ratio of imports to domestic production increased from 16.4 percent in the first seven months of 1974 to 28.5 percent in the comparable period in 1975. This represents an increase of 74 percent.

Elkton Fashion Industries obtained 100 percent of the pre-cut cloth it sewed into finished suit coats and sportcoats from Wm. B. Kessler, Incorporated. Continually declining sales to Wm. Kessler in 1974 forced Elkton Fashion to close from December 1974 to mid-May 1975, except for a small group of workers employed for the month of February. Since June 1975 the company has operated at approximately 25 percent of its pre-December 1974 employment levels. There is no expectation that sales or employment will regain pre-1974 levels.

Prior to 1974, Wm. B. Kessler normally had about 40 percent of its suit coats and sportcoats sewn by Elkton Fashion and sewed the other 60 percent itself. During 1974, retail sales of suits and sportcoats by Wm. B. Kessler declined 40 percent. Wm. B. Kessler decided that it would maintain sewing levels at its own facility and cutback its business with Elkton Fashion to parallel reduced sewing requirements. As a result, by December 1974 Wm. B. Kessler had no suit coats or sportcoats for Elkton Fashion to sew. With the exception of a very few small orders placed in February and early March 1975, Wm. B. Kessler provided no business to Elkton Fashion until June 1975. Business levels are not expected to reach more than 50 percent of pre-1974 levels in the future.

Major customers indicated that they are purchasing men's apparel from foreign sources because of intense price competition in the industry and in response to the switch of consumer preferences from the traditional types of men's apparel to casual types of apparel.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suit coats and sportcoats produced at Elkton Fashion Industries contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All hourly, piecework, and salaried workers engaged in employment related to the production of men's suit coats and sportcoats at the Elkton, Maryland plant of Elkton Fashion Industries who become totally or partially separated from employment on or after December 7, 1974 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[FR Doc.75-34902 Filed 12-30-75;8:45 am]

[TA-W-226]

JACOB SIEGEL CO., INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-226: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 14, 1975 in response to a worker petition received on October 14, 1975 which was filed by the Amalgamated Clothing Workers Union on behalf of workers formerly producing men's overcoats at the Philadelphia, Pennsylvania plant of Jacob Siegel Company, Inc.

The notice of investigation was published in the FEDERAL REGISTER on October 28, 1975, (40 FR 50164). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Jacob Siegel Company, the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

V40251 DEC 31 75 XUM

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard as to whether the other criteria are satisfied, the investigation reveals that the second criterion has not been met.

From 1973 to 1974 company sales increased 15.4 percent and production decreased 2.1 percent. The slight decline in production from 1973 to 1974 resulted from a 25 percent decline in the first quarter of 1974, which is prior to the trade act coverage period, compared to the first quarter of 1973. In every other quarter in 1974, production was higher than in comparable quarters in 1973. In the first nine months of 1975, company sales and production increased 11.8 percent and 7.7 percent, respectively, compared to the like period in 1974. Company officials attributed the increase in sales and production to the acquisition of many of the accounts of former domestic manufacturers of men's coats that went out of business in 1974 and 1975.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's overcoats, top coats and car coats produced at the Philadelphia, Pennsylvania plant of Jacob Siegel Company, Inc. did not contribute importantly to the total or partial separation of the workers of such plant. Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

KANSAS CITY WORKS OF THE WESTERN ELECTRIC CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-198; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on September 29, 1975 in response to a worker petition received on September 24, 1975 which was filed by the Communications Workers of America (AFL-CIO) on behalf of workers and former workers producing electronic component parts and telephone transmission equipment at the Kansas City Works, Lee's Summit, Missouri, of the Western Electric Company.

The notice of investigation was published in the FEDERAL REGISTER on October 7, 1975 (40 FR 46376). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Western Electric Company, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. The average number of production workers decreased 5 percent from 1973 to 1974 and 17 percent in the first three quarters of 1975 compared to the same period in 1974. Average weekly hours declined five percent from 1973 to 1974 and increased three percent in January-September 1975 compared to the like period in 1974.

Sales or production, or both, have decreased absolutely. The dollar value of total production was divided almost evenly between telephone transmission equipment and electronic component parts during 1972-1974. Production of telephone transmission equipment increased in dollar value by three percent from 1973 to 1974 and decreased by 25 percent in January-September 1975 compared to the like period in 1974. The value of electronic component parts produced at the plant declined two percent from 1973 to 1974 and rose six percent in the first three quarters of 1975 over the same period in 1974.

Increased imports contributed importantly. From January-August 1974 to the like period in 1975, imports of telephone and telegraph apparatus declined 42 percent in dollar value, and the import/consumption ratio fell from 3.8 percent to 2.3 percent. Specific import information on microwave equipment and on electronic components for use in telephone transmission is not available. Industry analysts, however, indicated that such imports did not represent a large intrusion into the domestic market. Imports by the Kansas City Works were valued at less than one percent of the value of total plant production for each year since 1972.

The Kansas City Works is a captive supplier of electronic component parts and telephone transmission equipment for Western Electric. The evidence developed in the Department's investigation indicates that production and employment at the plant have been hurt in recent years by technological changes in telephone transmission systems, increased competition in the telephone market, and the general economic recession. The increased use of solid state circuits in telephone transmission has shifted production at the plant away from electron tubes and into semi-conductors. Yet increased automation in the production of semi-conductors has hurt employment in this area of the plant. Growing domestic competition in the microwave communications market since 1973 has tended to dampen demand by Bell telephone companies for Western Electric's microwave equipment. The decline in housing construction in 1974 reduced overall demand for new telephone equipment, which in turn has affected employment and production at the Kansas City Works since late 1974.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the electronic component parts and telephone transmission equipment produced at the Kansas City Works, Lee's Summit, Missouri, of the Western Electric Company did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[FR Doc.75-34898, Filed 12-30-75;8:45 am]

[TA-W-299]

LESH CLOTHING, INC.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on November 5, 1975 in response to a worker petition received on that date which was filed by the Amalgamated Clothing Workers Union on behalf of workers and former workers producing men's and boys' tailored suits at Lesh Clothing, Inc., New York City, New York.

Notice of the investigation was published in the FEDERAL REGISTER on November 19, 1975 (40 FR 53644). No public hearing was requested and none was held.

During the course of the investigation it was established that the most recent separations at Lesh Clothing Inc. occurred in January 1974. Section 223(b) of the Trade Act of 1974 provides, in substance, that a certification shall not apply to any worker whose last total or partial separation from the firm or an appropriate subdivision of the firm occurred more than one year before the date of the petition on which such certification is granted.

The date of the petition in this case is October 20, 1975 and, thus, workers laid off prior to October 20, 1974 could not be eligible for program benefits under Title II, Chapter 2, Subchapter B of the Trade Act of 1974. Therefore, this investigation has been terminated.

Signed at Washington, D.C. this 17th day of December 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[FR Doc.75-34905 Filed 12-30-75;8:45 am]

[TA-W-218]

MAJOR COAT CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-218; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 3, 1975 in response to a worker petition received on October 3, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing men's sportcoats at the Bridgeton, New Jersey plant of the Major Coat Company, Bridgeton, New Jersey.

The notice of investigation was published in the FEDERAL REGISTER on October 15, 1975 (40 FR 48416). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Major Coat, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, The National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. The average number of production workers declined 1.1 percent in the first three quarters of 1975 compared to the like period in 1974. The average number of production workers declined 62 percent from 1973 to 1974. Average employment fluctuated erratically from the third quarter of 1974 through the third quarter of 1975.

Sales or production, or both, have decreased absolutely. Sales at Major Coat Company declined 15.8 percent in the first three quarters of 1975 compared to the first three quarters of 1974. Sales declined 73 percent in 1973 compared to 1972.

Increased imports contributed importantly. Imports of sportcoats like or directly competitive with those produced at Major Coat Company prior to November 1974 increased from 4.2 million units in 1972 to 4.9 million units in 1974.

The ratios of imports to domestic consumption and production increased from 14.6 percent and 17.1 percent, respectively in 1972 to 18.2 percent and 22.3 percent in 1974.

The evidence developed by the Department's investigation indicated that increases of imports like or directly competitive with articles produced by Major Coat Company did not contribute importantly to the total or partial separation of its workers.

In the nine months prior to January 1974, Major Coat Company cut and sewed sportcoats for only one private customer and the U.S. Government. At approximately the same time in early 1974, Major Coat lost both a substantial portion of its private business and its U.S. Government contract. The decrease in sales experienced by Major Coat in the first quarter of 1974 was so severe that substantial layoffs occurred in February and March of that year. Continued difficulty in finding new long term private contracts plus a lack of any new major government contracts led to an unstable employment situation that has continued to date.

The decision by Major's prime private contractor to terminate business with Major Coat was not related to a transfer of purchases overseas, as alleged by Major Coat. This customer, which accounted for over 90 percent of Major's private contract sales, decided to de-emphasize its sportswear business in 1974. As a result of this decision, the customer gradually reduced its business with Major Coat until October 1974 when all business was terminated. A test lot of sportcoats had been imported from South America by the customer in late 1973 but there were no subsequent purchases of imported sportcoats and all of these coats are now purchased from one domestic contractor. Declining retail sales were not a controlling factor in the corporate decision to alter its sportswear product line.

In the seven months prior to February 1974, the contract with the U.S. Government accounted for 66 percent of Major Coat's sales. The decline in sales in the first quarter of 1974 which led to the subsequent unemployment and continuing unstable employment situation was primarily the result of the loss of this contract. There are no imports of U.S. military uniforms due to the "Buy American Act" which requires that sources and products shall be used and acquired for public use.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's sportcoats produced at the Major Coat Company, Bridgeton, New Jersey did not contribute importantly to the total of partial separations of the workers at such plant.

Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planing and Evaluation Staff.

[FR Doc.75-34899 Filed 12-30-75;8:45 am]

[TA-W-237]

THE MIDDISHADE CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-237: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 14, 1975 in response to a worker petition received on that date which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing men's suits and sportcoats at The Middishade Company, Philadelphia, Pennsylvania.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 49829) on October 24, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of The Middishade Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers'

V 40 251 DEC 31 75 XUM

firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. The average number of production workers at The Middishade Company declined 60 percent in 1974 from 1973. All production-related employment was terminated at the firm by the end of 1974. Workers currently employed by The Middishade Company are involved in the firm's continuing retail operations.

Sales or production, or both, have decreased absolutely. Production of suits, sportcoats, and trousers at The Middishade Company declined 49 percent in value in 1974 from 1973. All production operations at the firm were terminated by the end of November 1974 when the plant closed. The Middishade Company continues to operate as a retailer of men's apparel produced by other manufacturers.

Increased imports contributed importantly. Imports of men's tailored suits declined absolutely and relatively to domestic production and consumption in 1974 from 1973. Imports of men's tailored sportcoats declined absolutely but increased as a ratio of domestic consumption and production during the same period. Imports of men's and boys' trousers declined absolutely and relatively compared to domestic production and consumption in both 1973 and 1974 compared to the previous year.

The evidence developed in the Department's investigation indicates that the decline in sales and ultimate closure of The Middishade Company's production operations were due to excess inventory levels in 1974 which resulted in the firm's selling its products out-of-season and at lower than profitable prices. Customers of The Middishade Company indicated that increased imports were not a factor in their decision to reduce purchases from the firm. One customer cited a deterioration in Middishade's product and service, caused primarily by the firm's internal problems, as a reason for reduced purchases from Middishade.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suits, sportcoats, and trousers produced by The Middishade Company, Inc. did not contribute importantly to the total or partial separations of the workers of that firm.

Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[TA-W-315]

NEWPORT CLOTHING MANUFACTURING CO., INC.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on November 5, 1975 in response to a worker petition received on that date which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing men's sportcoats at Newport Clothing Manufacturing Company, Inc., Newport, New Hampshire.

Notice of the investigation was published in the FEDERAL REGISTER on November 19, 1975 (40 FR 53646). No public hearing was requested and none was held.

During the course of the investigation it was established that the most recent involuntary separations at Newport Clothing occurred in September 1974. Section 223(b) of the Trade Act of 1974 provides, in substance, that a certification shall not apply to any worker whose last total or partial separation from the firm or an appropriate subdivision of the firm occurred more than one year before the date of the petition on which such certification is granted.

The date of the petition in this case is October 14, 1974 and, thus, workers laid off prior to October 14, 1974 could not be eligible for program benefits under Title II, Chapter 2, Subchapter B of the Trade Act of 1974, Therefore, this investigation has been terminated.

Signed at Washington, D.C. this 17th day of December 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-284]

REGENT ADVANCE STYLES, INC.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on November 4, 1975 in response to a worker petition received on that date which was filed by the Almagamated Clothing Workers Union on behalf of workers and former workers producing men's and boys' tailored clothing at Regent Advance Styles, Inc., New York City, New York.

Notice of the investigation was published in the FEDERAL REGISTER on November 19, 1975 (40 FR 53647). No public hearing was requested and none was held.

During the course of the investigation it was established that the most recent involuntary separations at Regent Advance Styles, Inc. occurred in September 1974. Section 223(b) of the Trade Act of 1974 provides, in substance, that a certification shall not apply to any worker whose last total or partial separation from the firm or an appropriate subdivision of the firm occurred more than one year before the date of the petition on which such certification is granted.

The date of the petition in this case is October 14, 1975 and, thus, workers laid off prior to October 14, 1975 could not be eligible for program benefits under Title II, Chapter 2, Subchapter B of the Trade Act of 1974, Therefore, this investigation has been terminated.

Signed at Washington, D.C. this 17th day of December 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-194]

SAGNER INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-194; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 22 of the Act.

The investigation was intiated on September 26, 1975 in response to a worker petition received on September 26, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers formerly producing men's suits, sportcoats, and trousers at the Frederick, Maryland; the McConnelsburg, Pennsylvania; and the New Bern, North Carolina plants of Sagner Inc.

The notice of investigation was published in the FEDERAL REGISTER October 16, 1975 (40 FR 48560). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Sagner Inc., its customers, industry analysts, and Department files, the U.S. Department of Commerce, the U.S. International Trade Commission, and the National Cotton Council.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. The average number of production workers declined 33 percent in 1974 compared to 1973. Employment declined 64 percent in the first quarter of 1975 compared to the like period in 1974.

Sales or production, or both, have decreased absolutely. Total sales of all articles produced at Sagner's three plants declined 28 percent in value in 1974 compared to 1973. Sales declined 20 percent in value in the first quarter of 1975 compared to the first quarter of 1974. The three plants of Sagner Inc. have all closed permanently. The New Bern plant closed in September 1974; the McConnelsburg plant closed in March 1975; and the Frederick plant closed in April 1975.

Increased imports contributed importantly. Imports of men's and boys' suits, sportcoats and trousers declined in absolute terms in 1974 compared to 1973. The ratios of imports to U.S. consumption of men's and boys' suits and trousers also declined between 1973 and 1974. The ratio of imports to U.S. consumption of men's and boys' sportcoats increased slightly between 1973 and 1974, from 17.4 percent to 18.2 percent. In the first 7 months of 1975 imports of men's and boys' suits and trousers increased compared to the same period in 1974. Imports of men's and boys' sportcoats declined in the first 7 months of 1975 compared to the same period in 1974.

The evidence developed by the Department's investigation indicates that Sagner's customers reduced purchases because of unpopular styling and the quality of the firm's products, and because of decreased demand associated with the recession. Those customers that were dissatisfied with Sagner's products shifted purchases to other domestic manufacturers. One of Sagner's major customers had purchased imports from 1973 to 1974 and reduced such purchases of men's and boys' suits and sportcoats by 86 percent in the first seven months of 1975 compared to the same period in 1974 while his domestic purchases of the same products declined by only 13 percent in the same period.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's and boy's suits, sportcoats, and trousers produced at the Frederick, Maryland; McConnelsburg, Pennsylvania; and New Bern, North Carolina plants of Sagner Inc. did not contribute importantly to the total or partial separations of the workers at such plants.

Signed at Washington, D.C. this 16th day of December 1975.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[TA-W-200]

WOLFF SHOE MANUFACTURING CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-200: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on September 20, 1975 in response to a worker petition received on September 29, 1975 which was filed by workers and former workers producing women's leather shoes at the Union, Missouri plant of the Wolff Shoe Manufacturing Company.

The notice of investigation was published in the FEDERAL REGISTER on October 7, 1975, (40 FR 46377). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Wolff Shoe Manufacturing Company, its customers, the American Footwear Industries Association, the U.S. Department of Commerce, and the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. The average number of production workers decreased 5 percent from 1973 to 1974, 4 percent in the fourth quarter of 1974 compared to the like period in 1973, and 37 percent in the first nine months of 1975 compared to the like period in 1974. Average weekly hours worked by production workers fell 6 percent from 1974 to 1975 and 19 percent in the first nine months of 1975 compared to the like period in 1974.

Sales or production, or both, have decreased absolutely. Sales of shoes manufactured at the Union plant declined 7 percent from 1973 to 1974. Total sales decreased six percent from 1973 to 1974 and 26 percent in the first nine months of 1975 compared to the same period in 1974.

Sales by Wolff Shoe of domestically manufactured shoes fell 26 percent in the fourth quarter of 1974 compared to the same period in 1973. Sales of imported shoes rose 11 percent in the fourth quarter of 1975 compared to the same quarter, previous year. Sales of domestically manufactured shoes fell 43 percent in the first nine months of 1975 compared with the same period in 1974, while sales of imported shoes fell 9 percent in the same time period.

Increased imports contributed importantly. Imports of articles like or directly competitive with those produced at the Union plant increased from 167 million pairs in 1970 to 216 million pairs in 1973, while domestic consumption declined. In 1974 both imports and consumption declined.

The ratios of imports to domestic consumption and production increased from 40 percent and 66 percent, respectively in 1974 to 52 percent and almost 110 percent in 1973. The ratios for 1974 were higher than those for 1972 and prior years but lower when compared to 1973. Imports of women's and misses footwear competitive with those produced at the Union plant increased both absolutely and relatively to domestic consumption and production in the first half of 1975 compared to the same period in 1974.

Customers reduced purchases of Wolff shoes in favor of lower priced, more fashionable imports. The Wolff Shoe Manufacturing Company imported 60.7 percent of shoes it sold in the first nine months of 1975, as compared to 49.1 percent in the same period of 1974.

Reduced sales and increased company imports of women's shoes have led to declining production at the Union plant in late 1974 and the first nine months of 1975. The company responded to reduced sales and production by both reducing the work force and by reducing hours of employment in the latter part of 1974 and the first half of 1975.

The evidence developed by the Department's investigation indicated that the separation of workers engaged in employment related to the production of women's shoes at the Union, Missouri plant of the Wolff Shoe Manufacturing Company was related importantly to the increased share of the market supplied

V 40251 DEC 31 75 XUM

by competitive imports, by increased purchases of imported shoes by customers, and to increased importing of shoes by the Wolff Shoe Manufacturing Company.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's leather fashion and novelty shoes produced at the Union, Missouri plant of the Wolff Shoe Manufacturing Company contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All hourly, piecework, and salaried workers engaged in employment related to the production of women's shoes at the Union, Missouri plant of the Wolff Shoe Manufacturing Company who became totally or partially separated from employment on or after October 3, 1974 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

ASSIGNMENT OF HEARINGS

DECEMBER 24, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 8497 Sub 1, Glascow Hauling, Inc., now assigned January 21, 1976 is canceled and application dismissed.

MC-FC-75074, American Tank Transport, Inc., Curtis Bay, Maryland Transferee and Yale Transport Corp. F. Ralph Nogg, Successor Trustee, Secaucus, New Jersey Transferror, now assigned January 26, 1976, at Washington, D.C. is postponed to February 23, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 99149 Sub 11, Midway Motor Freight Lines, Inc., now assigned January 12, 1976, at Little Rock, Ark., will be held at The Justice Building, State Capitol.

MC 130302, Eastern Ski Tours, Inc., now being assigned February 2, 1976, (1 week), at Philadelphia, Pa., in a hearing room to be later designated.

MC 140686, Mayfield Motor Lines, Inc., now assigned January 19, 1976, at Nashville, Tenn., will be held at the *Jack Spence Motor Inn, 823 Murfreesboro Road,* Nashville, Tenn., instead of *Room 651 Federal Courthouse Bldg., 8th and Broad Streets.*

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc. 75-35163 Filed 12-30-75; 8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

DECEMBER 24, 1975.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with rule 40 of the general rules of practice (49 CFR 1100.40) and filed on or before January 15, 1976.

FSA No. 43095—*Sulphur from Texas City, to Official Territory.* Filed by Southwestern Freight Bureau, Agent, (No. B-578), for interested rail carriers. Rates on sulphur (brimstone), crude, in carloads, as described in the application, from Texas City, Texas, to stations in official territory. Grounds for relief—Market competition.

Tariff—Supplement 67 to Southwestern Freight Bureau, Agent, tariff 102-A, ICC 5077. Rates are published to become effective on January 31, 1976.

FSA No. 43096—*Starch and Dextrine from Indiana to Southern Territory.* Filed by Traffic Executive Association—Eastern Railroads, Agent, (E.R. No. 3047), for interested rail carriers. Rates on starch and dextrine, in carloads, as described in the application, from Indianapolis and LaFayette, Indiana, to stations in Alabama, Florida, Georgia, North Carolina, and South Carolina. Grounds for relief—Market competition.

Tariff—Supplement 223 to Traffic Executive Association—Eastern Railroads, Agent, tariff C/S-128-E, I.C.C. C-611. Rates are published to become effective on January 24, 1976.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.75-35162 Filed 13-30-75;8:45 am]

[Notice No. 45]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application), to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules-Motor Carriers of Property, 1969 (49 CFR 1042.4(c)(11)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 1042.4(c)(12)) at any time, but will not operate to stay commencement of the proposed operations unless filed on or before January 30, 1976.

Successively filed letter-notices of the same carrier under the Commission's Revised Deviation Rules-Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

MOTOR CARRIERS OF PROPERTY

No. MC 10343 (Deviation No. 21), CHURCHILL TRUCK LINES, INC., Highway 36 West, Chillicothe, Mo. 64601, filed December 17, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From Quincy, Ill., over U.S. Highway 24 to junction Illinois Highway 103, thence over Illinois Highway 103 to junction Illinois Highway 100, thence over Illinois Highway 100 to junction U.S. Highway 136, thence over U.S. Highway 136 to junction Interstate Highway 55, thence over Interstate Highway 55 to Chicago, Ill., (2) From Quincy, Ill., over U.S. Highway 24 to junction U.S. Highway 51, thence over U.S. Highway 51 to junction Illinois Highway 71, thence over Illinois Highway 71 to junction Illinois Highway 47, thence over Illinois Highway 47 to junction U.S. Highway 30, thence over U.S. Highway 30 to Aurora, Ill., (3) From Springfield, Mo., over Interstate Highway 44 to junction Interstate Highway 55, thence over Interstate Highway 55 to Chicago, Ill., and (4) From Springfield, Mo., over Interstate Highway 44 to junction Interstate Highway 55, thence over Interstate Highway 55 to junction Illinois Highway 59, thence over Illinois Highway 59 to junction U.S. Highway 30, thence over U.S. Highway 30 to Aurora, Ill., and return over the same routes, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over pertinent service routes as follows: (1) From Quincy, Ill., over Illinois Highway 61 to junction Illinois Highway 94, thence over Illinois Highway 94 to junction Illinois Highway 9, thence over Illinois Highway 9 to junction Illinois unnumbered Highway, thence over Illinois unnumbered highway to junction U.S. Highway 34, thence over U.S. Highway 34 to Chicago, Ill., and (2) From Springfield, Mo., over U.S. Highway 65 to junction U.S. Highway 36, thence over U.S. Highway 36 to junction U.S. Highway 24, thence over U.S. Highway 24 to junction U.S. Highway 61, thence over U.S. Highway 61 to junction U.S. Highway 34, thence over U.S. Highway 34 to Chicago, Ill., and return over the same routes.

No. FC 59583 (Deviation No. 52), THE MASON AND DIXON LINES, INCORPORATED, P.O. Box 969, Kingsport, Tenn. 37662, filed December 9, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From Williamsport, Pa., over U.S. Highway 15 to Trout Run, Pa., thence over Pennsylvania Highway 14 to the Pennsylvania-New York State line, thence over New York Highway 14 to Elmira, N.Y., and (2) From Halls, Pa., over U.S. Highway 220 to Waverly, N.Y., and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Williamsport, Pa., over U.S. Highway 220 to Halls, Pa., thence over Pennsylvania Highway 147 (formerly Pennsylvania Highway 14) to Muncy, Pa., thence over Pennsylvania Highway 442 to Millville, Pa., thence over Pennsylvania Highway 42 to Bloomsburg, Pa., thence over U.S. Highway 11 via Scranton, Pa., to Binghamton, N.Y., thence over New York Highway 17C to Owego, N.Y., thence over New York Highway 17 to Elmira, N.Y., and return over the same route.

No. MC 106163 (Deviation No. 2), ET&WNC TRANSPORTATION COMPANY OF ARKANSAS, 132 Legion Street, Johnson City, Tenn., 37601, filed December 22, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From junction Interstate Highway 30 and U.S. Highway 270 over Interstate Highway 30 to Little Rock, Ark., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From junction Interstate Highway 30 and U.S. Highway 270 (near Malvern, Ark.) over U.S. Highway 270 to Pine Bluff, Ark., thence over U.S. Highway 65 to Little Rock, Ark., and return over the same route.

No. MC 112713 (Deviation No. 32), YELLOW FREIGHT SYSTEM, INC., P.O. Box 7270, 10990 Roe Ave., Shawnee Mission, Kans. 66207, filed December 15, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Albuquerque, N. Mex., over Interstate Highway 40 to Memphis, Tenn., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Albuquerque, N. Mex., over U.S. Highway 85 to junction unnumbered highway (formerly U.S. Highway 85), near Palmer Lake, Colo., thence over unnumbered highway to junction U.S. Highway 85, near Larkspur, Colo., thence over U.S. Highway 85 to Denver, Colo., thence over U.S. Highway 36 to Atwood, Kans., thence over Kansas Highway 25 to Colby, Kans., thence over U.S. Highway 24 to junction U.S. Highway 83, thence over U.S. Highway 83 to junction unnumbered highway, thence over unnumbered highway to junction U.S. Highway 40, near Salina, Kans., thence over U.S. Highway 40 to junction unnumbered highway, thence over unnumbered highway to junction U.S. Highway 40, thence over U.S. Highway 40 to junction Kansas Highway 18, thence over Kansas Highway 18 to junction U.S. Highway 24, thence over U.S. Highway 24 to junction U.S. Highway 40, thence over U.S. Highway 40 to St. Louis, Mo., thence across the Mississippi River to East St. Louis, Ill., thence over Illinois Highway 13 to Belleville, Ill., thence over Illinois Highway 15 to Mt. Vernon, Ill., thence over U.S. Highway 460 to junction Illinois Highway 142, thence over Illinois Highway 142 to junction Illinois Highway 13, thence over Illinois Highway 13 to Shawneetown, Ill., thence across the Ohio River to Blackburn, Ky., thence over Kentucky Highway 56 to junction Alternate U.S. Highway 41, thence over Alternate U.S. Highway 41 to junction U.S. Highway 41, thence over U.S. Highway 41 to Hopkinsville, Ky., thence over Alternate U.S. Highway 41 to Nashville, Tenn., thence over Interstate Highway 40 to Memphis, Tenn., and return over the same route. Restriction: The service authorized herein at Memphis, Tenn., is restricted to points in Tennessee within the Memphis, Tenn., Commercial Zone.

By the Commission.

[Notice No. 103]

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, freight forwarder and rail proceedings indexed as follows: (1) Grants of authority requiring republication prior to certification; (2) notices of filing of petitions for modification of existing authorities; (3) new operating right's applications directly related to and processed on a consolidated record with finance applications filed under sections 5(2) and 212(b); (4) notices of filing of

V 40 251 DEC 31 75 D XUM

sections 5(2) and 210a(b) finance applications; and (5) notices of filing of section 212(b) transfer applications.

Each applicant (except as otherwise specifically noted) states that there will be no significant effect on the quality of the human environment resulting from approval of its application in compliance with the requirements of 49 CFR 1100.250.

Protests to the granting of the requested authority must be filed with the Commission on or before January 30, 1976 (unless otherwise specified). Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest should comply with section 247(d) or section 240(c) as appropriate of the Commission's general rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and a detailed description of the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest (except for petitions and Finance Dockets under Rule 40 requiring the original and six (6) copies of the protest) shall be filed with the Commission, and a copy shall be served concurrently upon applicant's or petitioner's representative, or applicant or petitioner if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) or section 240(c)(4) of the special rules, and shall include the certification required therein.

No. MC 108119 (Sub-No. 37) (Republication), filed March 12, 1973, and published in the FEDERAL REGISTER issue of May 10, 1973, and republished this issue. Applicant: E. L. MURPHY TRUCKING CO., a Corporation, 3303 Sibley Memorial Highway, St. Paul, Minn. 55121. Applicant's representative: Andrew A. Clark, 1000 First National Bank Bldg., Minneapolis, Minn. 55402. A Corrected Decision and Order of the Commission, Review Board Number 3, dated November 11, 1975, and served December 8, 1975, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, of *Metal and metal articles*, (1) between points in Minnesota, on the one hand, and, on the other, points in Iowa, North Dakota, South Dakota, Wisconsin, and the Upper Peninsula of Michigan; (2) between points in Minnesota, on the one hand, and, on the other, points in Montana, Missouri, Illinois, Indiana, Ohio, and the Lower Peninsula of Michigan; (3) between points in Minnesota, on the one hand, and, on the other, points in the United States (except points in Montana, North Dakota, South Dakota, Iowa, Missouri, Wisconsin, Illinois, Michigan, Indiana, Minnesota, Ohio, Washington, Oregon, and Idaho); and (5) between points in Minnesota, on the one hand, and, on the other, points in Ada and Jerome Counties, Idaho, restricted in (5) above to joinder or interline at Ada and Jerome Counties, Idaho, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate applicant's "rounded-out" grant of authority to include the transportation of non-"heavy hauling" commodities as well as those within the ambit of "heavy hauling". Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a Certificate in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced. Pleadings may be tendered with respect to the modification(s) of applicant's grant of authority indicated by the purpose for this republication.

No. MC 113855 (Sub-No. 286) (Republication), filed November 12, 1973, and published in the FEDERAL REGISTER of January 3, 1974, and republished this issue. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Road SE., Rochester, Minn. 55901. Applicant's representative: Alan Foss, 502 First National Bank Bldg., Fargo, N. Dak. 58102. A Corrected Decision and Order of the Commission, Review Board Number 3, dated November 11, 1975, and served December 8, 1975, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, of *metal and metal articles*, (1) between Minot, N. Dak., and points in Minnesota and those in that part of North Dakota south and west of a line beginning at the Montana-North Dakota State line and extending along U.S. Highway 2 to Lakota, N. Dak., thence along North Dakota Highway 1 to the United States-Canada Boundary line, not including points on the indicated portions of the highways specified other than Minot, N. Dak.; (2) between Escanaba, Mich., and points in Wisconsin, on the one hand, and, on the other, points in Idaho, Oregon, and Washington, restricted against the transportation (a) of aircraft and missiles and parts thereof, and (b) further restricted against service to or from those points in Wisconsin on and south of U.S. Highway 12, on and west of U.S. Highway 53, and on and north of U.S. Highway 8, and further restricted against shipments to Escanaba, Mich., and to points in the above-described service area in Wisconsin against those commodities as are being transported for rebuilding or repair.

(3) Between Davenport, Iowa, on the one hand, and, on the other, points in that part of Illinois on, north and west of a line beginning at Quincy, Ill., and extending along Illinois Highway 104 to junction U.S. Highway 66, thence northward along U.S. Highway 66 to junction Illinois Highway 53 (formerly Alternate U.S. Highway 66), at or near Gardner, Ill., thence along Illinois Highway 53 to junction U.S. Highway 66 at a point approximately 10 miles northeast of Plainfield, Ill., and thence along U.S. Highway 66 to Chicago, Ill.; (4) between Elgin, Ill., on the one hand, and, on the other, Scranton, Reading, Allentown, Harrisburg, Lancaster, and Hazleton, Pa., and mines in that part of Pennsylvania south and west of a line beginning at the Pennsylvania-Ohio State line and extending along U.S. Highway 224 to junction U.S. Highway 422, thence along U.S. Highway 422 to junction U.S. Highway 19 near Rose Point, Pa., thence along U.S. Highway 19 to junction unnumbered highway near Portersville, Pa., thence along unnumbered highway via Prospect, Pa., to junction U.S. Highway 422, thence along U.S. Highway 422 to Ebensburg, Pa., thence along U.S. Highway 22 to junction U.S. Highway 522, thence along U.S. Highway 522 to junction Pennsylvania Highway 641 (formerly Pennsylvania Highway 433), thence along Pennsylvania Highway 641 to junction Pennsylvania Highway 997, and thence along Pennsylvania Highway 997 to the Pennsylvania-Maryland State line, including points on the indicated portions of the highways specified, and points in West Virginia, Kentucky, Indiana, and Ohio.

(5) Between points in Pennsylvania on and east of a line beginning at the Maryland-Pennsylvania State line and extending along unnumbered highway (formerly portion U.S. Highway 15), to junction Business U.S. Highway 15, near Fairplay, Pa., thence along Business U.S. 15 through Gettysburg, Pa., to junction U.S. Highway 15, thence along U.S. Highway 15 to junction unnumbered highway (formerly portion U.S. Highway 15), thence along unnumbered highway through Clear Spring, Pa., to junction U.S. Highway 15, thence along U.S. Highway 15 to the Pennsylvania-New York State line (except points in Berks, Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pa., and points in Pennsylvania on and east of the above-described line in Adams, York, Cumberland, Perry, Dauphin, Lebanon, and Lancaster Counties, Pa., and points in Pennsylvania on and east of U.S. Highway 15 and north of the East Branch of the Susquehanna River in Tioga, Bradford, Lycoming, Sullivan, Union, Snyder, Northumberland, Montour, and Columbia Counties, Pa.), on the one hand, and, on the other, points in Rhode Island, Massachusetts, Connecticut, New York, New Jersey, Delaware, Maryland, Virginia, North Carolina, Ohio, and the District of Columbia; (6) between points in South Dakota, and those in Minnesota and Iowa within 50 miles of Sioux Falls, S. Dak., on the one hand, and, on the other, points in Iowa, Nebraska, and North Dakota, and those in Minnesota on or south of U.S. Highway 12 and on or west of a line beginning at Minneapolis, Minn., and extending along U.S. Highway 65 to junction Minnesota Highway 50 (formerly portion of U.S. Highway 65), thence along Minnesota Highway 50 to Farmington, Minn., thence along Minnesota Highway 3 (formerly portion of U.S. Highway 65), via Northfield, Minn., to Fairbault, Minn., thence along U.S. Highway 65 to junction Minnesota Highway 30 (formerly portion U.S. Highway 65), thence along Minnesota Highway 30 to junction unnumbered highway east of Ellendale, Minn., thence along unnumbered highway to Geneva, Minn., and thence along U.S. Highway 65 via Albert Lea, Minn., to the Minnesota-Iowa State line.

(7) Between points in South Dakota, and those in Minnesota and Iowa within 50 miles of Sioux Falls, S. Dak., on the one hand, and, on the other, points in Colorado, Wisconsin, Illinois, Michigan, Indiana, Kansas, and Missouri; (8) between points in the part of South Dakota east of the Missouri River, and those in Minnesota and Iowa within 50 miles of Sioux Falls, S. Dak., on the one hand, and, on the other, points in Montana and Wyoming; (9) between points in South Dakota, on the one hand, and, on the other, points in Ohio, Pennsylvania, and Utah; (10) from Beresford, Sioux Falls, Dell Rapids, and Hawarden, S. Dak., to points in California, Oregon, and Washington; (11) between points in California, on the one hand, and, on the other, points in Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming; (12) between points in Oregon and Washington, on the one hand, and, on the other, points in Montana, Nevada, Utah, and Wyoming; (13) between points in Idaho and Nevada, on the one hand, and, on the other, points in Montana, Wyoming, and Utah, restricted to service at points in Montana, Wyoming, and Utah for purposes of joinder only; (14) from points in Michigan and Ohio to points in California, Nevada, and Utah; (15) between points in California and Utah, on the one hand, and, on the other, points in Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maryland, Massachusetts, Michigan, Missouri, Nebraska, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, Virginia, West Virginia, and Wisconsin, and the District of Columbia.

(16) From points in California and Utah to points in Maine, New Hampshire, and Vermont; (17) from points in California to points in North Dakota, South Dakota, Tennessee, and Mississippi; and (18) between points in Wisconsin, those in that part of Illinois on and north of U.S. Highway 6, those in that part of Iowa on and north of a line beginning at the Iowa-Illinois State line and extending along U.S. Highway 6 to junction unnumbered highway (formerly portion of U.S. Highway 6), thence along unnumbered highway through Victor and Brooklyn, Iowa, to junction U.S. Highway 6, thence along U.S. Highway 6 to junction Iowa Highway 90 (formerly portion of U.S. Highway 6), thence along Iowa 90 through Colfax, Iowa, to Des Moines, Iowa, and on and east of U.S. Highway 65 from Des Moines to the Iowa-Minnesota State line, and those in part of Minnesota within 25 miles of the Minnesota-Iowa State line and of the Minnesota-Wisconsin State line; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate applicant's "rounded-out" grant of authority to include the transportation of non-"heavy hauling" commodities as well as those within the ambit of "heavy hauling". Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a Certificate in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced. Pleadings may be tendered with respect to the modification(s) of applicant's grant of authority indicated by the purpose for this republication.

No. MC 140497 (Republication), filed December 10, 1974, and published in the FEDERAL REGISTER issue of April 3, 1975, and republished this issue. Applicant: CONTAINER HAULAGE CORP., East Broadway, Monticello, N.Y. 12701. Applicant's representative: Jay M. Zerin, 26 Court Street, Brooklyn, N.Y. 11242. An Order of the Commission, Review Board Number 2, dated November 24, 1975, and served December 10, 1975, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *contract carrier* by motor vehicle, over irregular routes, of *Shipping containers, truck bodies, and truck trailers*, between Monticello, N.Y., on the one hand, and, on the other, New York, Brooklyn, and Staten Island, N.Y., Newark and Jersey City, N.J., Norfolk, Va., Boston, Mass., and Philadelphia, West Point, and Harrisburg, Pa., under a continuing contract or contracts with Fountain Welding Corp., of Monticello, N.Y., Quickway Metal Fabricators, Inc., of Monticello, N.Y., and Goldmark Industries, Inc., of Swan Lake, N.Y., that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the authorization of service between Monticello, N.Y., on the one hand, and, on the other, the involved destination points. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a Permit in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced. Pleadings may be tendered with respect to the modification(s) of applicant's grant of authority indicated by the purpose for this republication.

APPLICATIONS UNDER SECTIONS 5 AND 210a (b)

The following applications are governed by the Interstate Commerce Commission's special rules governing notice of filing of applications by motor carriers of property or passengers under sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto. (49 CFR 1.240).

MOTOR CARRIERS OF PROPERTY

APPLICATIONS FOR CERTIFICATES OR PERMITS WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATIONS UNDER SECTION 5 GOVERNED BY SPECIAL RULE 240 TO THE EXTENT APPLICABLE

No. MC-F-12709. Authority sought for continuance in control by TRANSPORTATION CONSULTANTS, INC., 6538 Collamer Rd., E. Syracuse, NY 13057, of FAIRFIELD TRANSPORTATION CORP., and for acquisition by FREDERICK J. DURKIN, AND JOHN C. DURKIN, JR., all of the above-mentioned address, of control of FAIRFIELD TRANSPORTATION CORP., through the acquisition by TRANSPORTATION CONSULTANTS, INC. V 40 251 DEC 31 75 XUM

taraugus, Cayuga, Chautauqua, Chemung, Clinton, Columbia, Cortland, Erie, Essex, Franklin, Fulton, Genesee, Jefferson, Monroe, Niagara, Oneida, Onondaga, Ontario, Orange, Rensselaer, St. Lawrence, Schenectady, Steuben, Tompkins, and Warren Counties, N.Y.; and (3) materials, supplies and equipment used in the production, packaging, sale and distribution of beverages (except commodities in bulk), between points in Connecticut, New Jersey, Pennsylvania and Vermont, on the one hand, and, on the other, points in Albany, Allegany, Broome, Cattaraugus, Cayuga, Chautauqua, Chemung, Clinton, Columbia, Cortland, Erie, Essex, Franklin, Fulton, Genesee, Jefferson, Monroe, Niagara, Oneida, Onondaga, Ontario, Orange, Rensselaer, St. Lawrence, Schenectady, Steuben, Tompkins and Warren Counties, N.Y., under a continuing contract or contracts with Clinton's Ditch Cooperative Company, Inc. of Cicero, N.Y. (Permit not yet issued).

No. MC–F–12715. Authority sought for purchase by OVERNITE TRANSPORTATION CO., 1100 Commerce Road, Richmond, VA 23209, of a portion of the operating rights and property of KENT FREIGHT LINES, INC., 304 Stockhams Lane, Aberdeen, MD 21001, and for acquisition by J. HARWOOD COCHRANE, also of Richmond, VA 23209, of control of such rights and property through the purchase. Applicants' attorneys: Eugene T. Liipfert, 1660 L St., N.W., Washington, DC 20036, and William B. Dulany, 127 E. Main St., Box 525, Westminster, MD 21157. Operating rights sought to be transferred: *General commodities*, with exceptions, as a *common carrier* over regular routes, between Elkton, Md., and Wye Mills, Md., between Galena, and Federalsburg, Md., between junction Maryland Highways 313 and 16 south of Denton, and Federalsburg, Md., between Denton, and Baltimore, Md., between Washington, D.C., and Stevensville (Kent Island), Md., with restrictions; between Chestertown, and Rock Hall, Md., between junction U.S. Highways 50 and 301 near Queenstown, Md., and junction U.S. Highways 301 and 213 near Centerville, Md., between junction Maryland Highways 312 and 313 at or near Baltimore Corners, Md., and Junction Maryland Highways 312 and 404 at or near Downes, Md., serving all intermediate points; *linoleum and linoleum installation materials*, over irregular routes, from Camden, N.J., to points in Harford County, Md.; *general commodities*, with exceptions, between Baltimore, Md., on the one hand, and, on the other, points in Baltimore and Harford Counties, Md., with restriction, between Aberdeen, Md., and points within 10 miles thereof, on the one hand, and, on the other, Camden, N.J., points in Delaware north of the Chesapeake-Delaware Canal, and points in Pennsylvania within 75 miles of Aberdeen except those in Adams, Dauphin, Franklin, and Lancaster Counties, Pa., and in Chester, Franklin, and Lancaster Counties, Pa., and in Chester County, Pa., on and west of Pennsylvania Highway 896; *concessionaires supplies and equipment*, between race tracks in Maryland, on the one hand, and, on the other, race tracks in Charles Town and Wheeling, W. Va.; *canned goods*, and *agricultural commodities* when moving in mixed loads with canned goods, between points in Cecil and Hartford Counties, Md., on the one hand, and, on the other, Atlantic City, Millville, Camden, and Trenton, N.J., Wilmington, Del., Culpeper, Fredericksburg, and Orange, Va., Martinsburg, W. Va., and points in that part of Pennsylvania on and east of a line beginning at the Pennsylvania-Maryland State line about 6 miles north of Cumberland, Md., thence over U.S. Highway 220 to Williamsport, Pa., thence over U.S. Highway 15 to the Pennsylvania-New York State line near Lawrenceville, Pa., except those in Adams, Dauphin, Franklin, and Lancaster Counties, Pa., and those in that part of Chester County, Pa., on and west of Pennsylvania Highway 896. Vendee is authorized to operate as a *common carrier* in Alabama, Florida, Tennessee, North Carolina, South Carolina, Kentucky, Virginia, West Virginia, Ohio, Delaware, Maryland, New Jersey, Georgia, and Indiana. Application has been filed for temporary authority under section 210a(b).

No. MC–F–12716. Authority sought for purchase by McVEY TRUCKING, INC., R.R. No. 1, Oakwood, IL 61858, of a portion of the operating rights of COOK TRANSPORTS, INC., Paxton, IL 60957, and for acquisition by LLOYD McVEY AND NORMA McVEY, also of Oakwood, IL 61858, of control of such rights through the purchase. Applicants' attorney: Clyde Meachum, 41 On The Mall, Danville, IL 61832. Operating rights sought to be transferred: *Dry fertilizer*, in bags, as a *common carrier* over irregular routes, from Danville, Ill., to points in Indiana, Kentucky, Ohio, Michigan, and Wisconsin. Vendee is authorized to operate as a *contract carrier* in Illinois, Indiana, Kentucky, Ohio, Michigan, and Wisconsin. Application has not been filed for temporary authority under section 210a(b).

NOTICE

Chicago and North Western Transportation Company, 400 West Madison Street, Chicago, Cook County, Illinois 60606, represented by Mr. Stuart F. Gassner, General Attorney, Chicago and North Western Transportation Company, 400 West Madison Street, Chicago, Illinois 60606, hereby gives notice that, on the 17th day of December, 1975, it filed with the Interstate Commerce Commission at Washington, D.C., an application under Section 5(2) of the Interstate Commerce Act for an order approving and authorizing the acquisition of trackage rights over the Milwaukee Road between Milepost 706.3 and Milepost 777.04 in the City of Aberdeen, Brown County, South Dakota, a distance of approximately 1.9 miles, which application is assigned Finance Docket No. 28081.

In the opinion of Applicant, the Commission's action requested, i.e., approval of the trackage rights, will not have any significant impact and will not significantly adversely affect the quality of the human environment. In accordance with the Commission's regulations (49 C.F.R. 1100.250) in Ex Parte No. 55 (Sub-No. 4), Implementation—Nat'l Environmental Policy Act, 1969, 340 I.C.C. 431 (1972), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall include information relating to the relevant factors set forth in Ex Parte No. 55 (Sub-No. 4), supra, Part (b)(1)–(5), 340 I.C.C. 431, 461.

The proceeding will be handled without public hearings unless protests are received which contain information indicating a need for such hearings. Any protests submitted shall be filed with the Commission no later than 30 days from the date of first publication in the FEDERAL REGISTER.

CHICAGO AND NORTH WESTERN TRANSPORTATION COMPANY

By the Commission.

[Notice No. 149]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

DECEMBER 31, 1975.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before January 20, 1976. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC–76193. By order entered December 24, 1975, the Motor Carrier Board approved the transfer to Donald L. Kerbs, doing business as C & R Truck Line, Salina, Kans., of the operating rights set forth in Certificate No. MC 98658 (Sub-No. 1) and Certificates of Registrations Nos. MC 98658 (Sub-No. 4), MC 98658 (Sub-No. 5), MC 98658 (Sub-No. 6), MC 98658 (Sub-No. 7), and MC 98658 (Sub-No. 8), issued June 22, 1970, June 22, 1970, September 1, 1970, April 4, 1972, September 21, 1973, and September 18, 1975, respectively, to Donald L. Kerbs and Neal J. Lovin, doing business as C & R Truck Line, Salina, Kans., authorizing the transportation of general commodities, with exceptions, between specified points in Kansas. Donald L. Kerbs, 1012 W. North St., Salina, Kans. 67401, representative for applicants.

No. MC–FC–76165. By order of December 23, 1975, the Motor Carrier Board approved the transfer to Tri-State Air Freight, Inc., Essington, Pa., of Certificate No. MC 133629 Sub-No. 1, issued January 25, 1974, to Michael Scalea, Sr., D/B/A Scalea's Delivery Service, Broomhall, Pa., authorizing the transportation of general commodities between specified points in Pennsylvania and New Jersey. Leonard A. Jaskiewicz, Grove, Jaskiewicz, Gilliam and Cobert, 1730 M Street, N.W., Washington, D.C., 20036, Attorney for Transferee.

No. MC–FC–76204. By order of December 23, 1975, the Motor Carrier Board approved the transfer to Careful Enterprises, Ltd., D/B/A Julka Moving & Storage Co., Fond du Lac, Wisconsin, of Certificate No. MC–2879 issued June 4, 1959, to Petrie Storage & Transfer Co., Inc., Fond du Lac, Wisconsin, authorizing the transportation of household goods and general commodities from to and between specified points in Wisconsin and Illinois. Frank S. Fuller, President, Careful Enterprises, Ltd., 221 Lewis Street, Fond du Lac, Wisconsin 54935.

No. MC–FC–76208. By order of December 23, 1975, the Motor Carrier Board approved the transfer to Lakin Moving and Storage, Inc., Fond du Lac, Wisconsin, of Certificate No. MC 60727 issued March 26, 1974, to Careful Enterprises, Ltd., D/B/A Julka Moving & Storage Division, Fond du Lac, Wisconsin, authorizing the transportation of household goods, between points in Fond du Lac County, Wis., on the one hand, and, on the other, points in Illinois. Gary E. Lakin, President, Lakin Moving and Storage, Inc., 223 West Eleventh Street, Fond du Lac, Wisconsin 54935.

No. MC–FC–76239. By order of December 24, 1975, the Motor Carrier Board approved the transfer to Reliance Van Company, Inc., Conshohocken, Pa., of Certificates Nos. MC 21436 and MC 21436 Sub 2 issued by the Commission August 9, 1961, and February 26, 1970, respectively, authorizing the transportation of household goods between Philadelphia, Pa., and points within 15 miles thereof, on the one hand, and, on the other, points in New Jersey, Delaware, Maryland, the District of Columbia, and a described portion of New York, and potted flowers from Norwood, Pa., to New York, New Rochelle, and Mt. Vernon, N.Y., Baltimore, Md., and Washington, D.C.; and used household goods between points in Pennsylvania, New Jersey, and Delaware, respectively. Robert J. Gallagher, Esquire, Brodsky, Linett and Altman, 1776 Broadway, New York, NY 10019.

No. MC–FC–76254. By order of December 24, 1975, the Motor Carrier Board approved the transfer to Jenkins and Nagel, Inc., Wolcott, Indiana, of Permits No. MC 133922 Subs 1, 3 and 4, issued October 12, 1970, April 20, 1971, and March 6, 1972, to William H. Nagel, D/B/A Jenkins and Nagel Trucking Co., Wolcott, Indiana, authorizing the transportation of various specified commodities from and to points in the United States. Alki E. Scopelitis, 815 Merchants Bank Building, Indianapolis, Ind. 46204.

[Notice No. 104]

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER APPLICATIONS

DECEMBER 26, 1975.

The following applications are governed by Special Rule 1100.247[1] of the Commission's general rules of practice (49 CFR, as amended), published in the FEDERAL REGISTER issue of April 20, 1966, effective May 20, 1966. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) of the Commission's rules of practice further provides that each applicant shall, if protests to its application have been filed, and within 60 days of the date of this publication, notify the Commission in writing (1) that it is ready to proceed and prosecute the application, or (2) that it wishes to withdraw the application, failure in which the application will be dismissed by the Commission.

Further processing steps (whether modified procedure, oral hearing, or other procedures) will be determined generally in accordance with the Commission's general policy statement concerning motor carrier licensing procedures, published in the FEDERAL REGISTER issue of May 3, 1966. This assignment will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

Evidence respecting how equipment is expected to be returned to an origin point, as well as other data relating to operational feasibility (including the need for dead-head operations), must be presented as part of an applicant's initial evidentiary presentation (either at oral hearing or in its opening verified statement under the modified procedure) with respect to all applications filed on or after December 1, 1973.

If an applicant states in its initial evidentiary presentation that empty or partially empty vehicle movements will result upon a grant of its application, applicant will be expected (1) to specify the extent of such empty operations, by mileages and the number of vehicles, that would be incurred, and (2) to designate where such empty vehicle operations will be conducted.

Each applicant (except as otherwise specifically noted) states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 31389 (Sub-No. 209), filed November 24, 1975. Applicant: MCLEAN TRUCKING COMPANY, 617 Waughtown Street, P.O. Box 213, Winston-Salem, N.C. 27102. Applicant's representative: David P. Eshelman (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the plantsite and distribution facilities of W. R. Grace and Company, Washington Research Center, located at or near Columbia, Md., as an off-route point in conjunction with applicant's regular route operations.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 41432 (Sub-No. 147), filed Nov. 26, 1975. Applicant: EAST TEXAS MOTOR FREIGHT LINES, INC., 2355 Stemmons Freeway, P.O. Box 10125, Dallas, Tex. 75207. Applicant's representative: J. Raymond Chesney (same address as applicant). Authority sought to oper-

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

V 40 251 DEC 31 75 XUM

ate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment): Serving the plantsite and warehouse facilities of Amoco Chemicals Corporation, at or near Chocolate Bayou, Tex., as an off-route point in connection with carrier's authorized regular-route operations to and from Houston, Tex.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Houston or Dallas, Tex.

No. MC 52709 (Sub-No. 336), filed November 21, 1975. Applicant: RINGSBY TRUCK LINES, INC., 5773 South Prince St., Littleton, Colo. 80120. Applicant's representative: Robert P. Tyler (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), between Las Vegas, Nev. and junction U.S. Highway 40 and U.S. Highway Alternate 50 near Wendover, Utah, alternate routes for operating convenience only, serving no intermediate points: From Las Vegas, Nev. over U.S. Highway 93 to junction U.S. Highway Alternate 50, thence over U.S. Highway Alternate 50 to junction U.S. Highway 40 near Wendover, Utah, and return over the same route.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Denver, Colo. or Salt Lake City, Utah.

No. MC 59640 (Sub-No. 49), filed November 26, 1975. Applicant: PAULS TRUCKING CORPORATION, Three Commerce Drive, Cranford, N.J. 07106. Applicant's representative: Charles J. Williams, 47 Lincoln Park, Newark, N.J. 07102. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by wholesale, retail, and chain camping and sporting goods stores and in connection therewith, *equipment, materials, and supplies* used in the conduct of such business, between the facilities of Lionel Morsan, Inc., at Mahwah, N.J., on the one hand, and, on the other, Atlanta, Doraville, Decatur, and Forest Park, Ga., under a continuing contract or contracts with Lionel Morsan, Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at New York, N.Y. or Newark, N.J.

No. MC 60014 (Sub-No. 41), filed November 20, 1975. Applicant: AERO TRUCKING, INC., Box 308, Monroeville, Pa. 15146. Applicant's representative: A. Charles Tell, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, the transportation of which, by reason of their size or weight require the use of special equipment), (1) between points in Ohio west of a line beginning at Sandusky, Ohio, thence south over U.S. Highway 250 to junction Ohio Highway 13, thence over Ohio Highway 13 to junction U.S. Highway 33, thence over U.S. Highway 33 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Illinois; and (2) between points in Ohio west of a line beginning at Vermilion, Ohio, thence south over Ohio Highway 60 to junction Ohio Highway 162 at New London, thence west over Ohio Highway 162 to junction Ohio Highway 13 at Fitchville, thence south over Ohio Highway 13 to junction U.S. Highway 33 at Athens, Ohio, thence south over U.S. Highway 33 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Indiana.

NOTE.—This application seeks to eliminate gateways resulting from Commission approval of MC-F-11586, Aero Trucking, Inc.-Purchase-Kenyon Motor Express, Inc. The purpose of this application is to eliminate the gateway at any point in Ohio on and east of a line extending from Mansfield, to Pomeroy, Ohio along Ohio Highway 13 to junction thereof with U.S. Highway 33 thence along U.S. Highway 33 to Pomeroy, and on and south of U.S. Highway 30 extending from Mansfield to the Ohio-West Virginia State line (except points in Licking County, Ohio). If a hearing is deemed necessary, the applicant requests it be held at either Columbus, Ohio or Pittsburgh, Pa.

No. MC 61396 (Sub-No. 300), filed November 26, 1975. Applicant: HERMAN BROS. INC., 2565 St. Marys Ave., P.O. Box 189, Omaha, Nebr. 68101. Applicant's representative: John E. Smith, II (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Inedible tallow*, in bulk, in tank vehicles, (1) from points in Nebraska, to points in Iowa, Kansas, Missouri, Arkansas, Illinois, Wisconsin, Minnesota, South Dakota, Colorado, and Wyoming; and (2) from points in Iowa, to points in Nebraska, Kansas, Missouri, Arkansas, Illinois, Wisconsin, Minnesota, South Dakota, Colorado, and Wyoming.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Omaha or Lincoln, Nebr.

No. MC 61403 (Sub-No. 235), filed November 24, 1975. Applicant: THE MASON AND DIXON TANK LINES, INC., Highway 11-W, Kingsport, Tenn. 37662. Applicant's representative: W. C. Mitchell, Suite 1201, 370 Lexington Ave., New York, N.Y. 10017. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, in bulk, in tank vehicles, from Owensboro, Ky., to points in Illinois, Indiana, Kentucky, Missouri, Tennessee, Ohio, Virginia, and West Virginia.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 78830 (Sub-No. 4), filed November 19, 1975. Applicant: DEPENDABLE TRUCK LINES, INC., 23322 S.E. 400th., Enumclaw, Wash. 98022. Applicant's representative: James T. Johnson, 1610 IBM Bldg., Seattle, Wash. 98101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between points in King and Pierce Counties, Wash., restricted to shipments moving to or from the plantsites and facilities utilizted by Industrial Skills of Washington.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Seattle, Wash.

No. MC 83217 (Sub-No. 67), filed November 10, 1975. Applicant: DAKOTA EXPRESS, INC., 550 E. 5th Street South, South St. Paul, Minn. 55075. Applicant's representative: Bill White (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuff*, from the plantsite and/or warehouse facilities of Jeno's, Inc., located at or near Sodus, Mich., to points in Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota, restricted to traffic originating at and destined to named states.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant does not specify a location.

No. MC 109397 (Sub-No. 324), filed November 21, 1975. Applicant: TRI-STATE MOTOR TRANSIT CO., P.O. Box 113-Business-I-44, Joplin, Mo. 64801. Applicant's representative: Max G. Morgan, Suite 223 Ciudad Bldg., Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cellular expanded or foamed plastic carpet cushion*, in rolls, from the plantsite of Burton-Dixie Corporation located at Blacksburg, S.C., to points in and east of Minnesota, Iowa, Missouri, Arkansas, and Louisiana.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either St. Louis or Kansas City, Mo. or Washington, D.C.

No. MC 109462 (Sub-No. 26), filed November 24, 1975. Applicant: LUMBER TRANSPORT, INC., Highway 85, East, Madisonville, Ky. 42431. Applicant's representative: Carl U. Hurst, P.O. Drawer L, Madisonville, Ky. 42431. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Gypsum, gypsum wallboard, gypsum joint cement, and related commodities*, from Acme, Tex., to points in Kansas.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Portland, Oreg., or Seattle, Wash.

No. MC 113855 (Sub-No. 335), filed November 19, 1975. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Road, S.E., Rochester, Minn. 55901. Applicant's representative: Alan Foss, 502 First National Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Farm machinery and agricultural implements;* and (2) *attachments, accessories and parts* for farm machinery and agricultural implements, from points in Steuben County, N.Y., to points in the United States including Alaska but excluding Hawaii.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 113855 (Sub-No. 336), filed November 21, 1975. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Road, S.E., Rochester, Minn. 55901. Applicant's representative: Thomas J. Van Osdel, 502 First National Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pre-cut log buildings*, and *materials and supplies*, used in the construction, installation and erection thereof, from points in Albany County, Wyo., to points in Minnesota, Iowa, Missouri, Arkansas, Tennessee, Kentucky, Ohio, Pennsylvania, Michigan, Indiana, Illinois, and Wisconsin.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.

No. MC 113855 (Sub-No. 337), filed November 24, 1975. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Road, S.E., Rochester, Minn. 55901. Applicant's representative: Alan Foss, 502 First National Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Heat exchangers and equalizers* for air, gas or liquids; *machinery and equipment* for heating, cooling, conditioning, humidifying, dehumidifying, and moving of air, gas or liquids; and (2) *parts, materials, equipment and supplies* (except commodities in bulk) used in the manufacture, distribution, installation or operation of those items named in (1) above between points in Monroe, Randolph, Perry, and St. Clair Counties, Ill., on and south of State Highways 177 and 158, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), restricted to shipments originating at or destined to the plantsite and warehouse facilities of the Singer Company, located at Monroe, Randolph, Perry, and St. Clair Counties, Ill.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Washington, D.C., or Chicago, Ill.

No. MC 116300 (Sub-No. 21), filed November 19, 1975. Applicant: NANCE AND COLLUMS, INC., P.O. Drawer J, Fernwood, Miss. 39635. Applicant's representative: Harold D. Miller, Jr., 1700 Deposit Guaranty Plaza, P.O. Box 22567, Jackson, Miss. 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sugar*, in sacks or packages, (1) from Supreme, La., to points in Tennessee; and (2) from Houma, La., to points in Georgia and Florida.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at New Orleans, La.

No. MC 117109 (Sub-No. 15), filed November 25, 1975. Applicant: SYKES TRANSPORT COMPANY, a Corporation, Highway 85 East, Madisonville, Ky. 42431. Applicant's representative: Carl U. Hurst, P.O. Drawer L, Madisonville, Ky. 42431. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities* (except in bulk), used in the manufacture or repair of trailers, semi-trailers, trailer equipment, and semi-trailer equipment, between Alcoa, Tenn., on the one hand, and, on the other, West Point, Pa.; Charleston, Ill.; Longview, Tex.; Chowchilla, Calif.; Springdale, Ark.; Buffalo, N.Y.; and Detroit, Mich.

NOTE.—Common control and dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at either Knoxville or Nashville, Tenn.

No. MC 117344 (Sub-No. 248), filed November 21, 1975. Applicant: THE MAXWELL CO., a Corporation, 10380 Evendale Drive, Cincinnati, Ohio 45215. Applicant's representative: John R. Stiverson, 1396 West Fifth Avenue, Columbus, Ohio 43212. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sulphuric acid*, in bulk, in tank vehicles, from East Chicago, Ind., to Cincinnati, Ohio.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Columbus, Ohio or Cincinnati, Ohio.

No. MC 117851 (Sub-No. 20), filed November 21, 1975. Applicant: JOHN CHEESEMAN TRUCKING, INC., 501 North First Street, Fort Recovery, Ohio 45846. Applicant's representative: Earl N. Merwin, 85 East Gay Street, Columbus, Ohio 43215. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), from points in Connecticut, Georgia, Illinois, Indiana, Massachusetts, Michigan, North Carolina, New Jersey, New York, Ohio, Pennsylvania, Tennessee, and Wisconsin, to points in Florida, under contract with Scotty's Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio, or Washington, D.C.

No. MC 117956 (Sub-No. 10) (Clarification), filed October 1, 1975, published in the FEDERAL REGISTER issue of October 23, 1975, and republished as clarified this issue. Applicant: SCOTT TRANSFER CO., INC., 920 Ashby Street, SW., Atlanta, Ga. 30310. Applicant's representative: William Addams, Suite 212, 5299 Roswell Road, NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Metal containers, metail container ends, pallets, paper shrouds, chipboard, lacquer*, in drums, *decorated tin plates*, in sheets, *sheet plastic and bottle caps*, (a) between the plantsite of Crown Cork & Seal Company, Inc., located at Atlanta, Ga., on the one hand, and, on the other, points in Indiana; and (b) between the plantsites of Crown Cork & Seal Company, Inc., located at Chicago and Bradley, Ill., on the one hand, and, on the other, points in Georgia, Kentucky, and Tennessee; (2) *metal containers and container ends*, (a) between the plantsites of Crown Cork & Seal Company, Inc., located at Atlanta, Ga., Birmingham, Ala., Spartanburg, S.C., Baltimore, Md., Philadelphia, Pa., and Bartow and Orlando, Fla.; and (b) between the plantsites named in (2) (a) above, on the one hand, and, on the other, Louisville, Ky., and points in Alabama, Florida, Georgia, North Carolina and South Carolina; (3) lacquer, in containers and *decorated tin plates*, in sheets, from the plantsite of Crown Cork & Seal Company located at Atlanta, Ga., to Birmingham, Ala., Spartanburg, S.C., Philadelphia, Pa., and Bartow and Orlando, Fla.

(4) *Metal containers, container closures, lacquer* in containers, *decorated tin plate* in sheets, and *sheet plastic*, (a) between the plantsite of Crown Cork & Seal Company, Inc., located at Winchester, Va., and the plantsites of Crown Cork & Seal Company, Inc., located at Atlanta, Ga., Birmingham, Ala., Spartanburg, S.C., Baltimore, Md., Philadelphia, Pa., and Bartow and Orlando, Fla.; and (b) between the plantsite of Crown Cork & Seal Company, Inc., located at Winchester, Va., and the plantsites of Crown Cork & Seal Company, Inc., located at Atlanta, Ga., Birmingham, Ala., Spartanburg, S.C., Baltimore, Md., Philadelphia, Pa., and Bartow and Orlando, Fla., on the one hand, and, on the other, points in Alabama, Florida, Georgia, North Carolina, South Carolina, and Tennessee; (5) (a) *metal containers*, (b) *metal container parts*, (c) *materials and equipment* used in connection with the distribution of metal containers; and (d) *metal container ends*, from Fruitland, Md., to points in Alabama, Florida, Georgia, Kentucky, North Carolina, South Carolina, and Tennessee; (6) *metal containers*, from the plantsites of National Can Corporation, located at Baltimore, Md., Long Island City, N.Y., Edison, N.J., Collierville, Tenn., and Hamburg, Pa., to points in Alabama, Arkansas, Florida, Georgia, Kansas, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas, (7) *metal containers, and equipment, materials and supplies* used in the manufacture, sale and distribution of metal containers and metal container ends (except in bulk, in tank vehicles), between the facilities of National Can Corporation, located at Madisonville, Ky., on the one hand, and, on the other, points in Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Kansas, Missouri, Oklahoma, and Texas; (8) *metal cans and can ends*, from the facili-

V 40 251 DEC 31 75 XUM

ties of the Ball Corporation, located at or near Williamsburg, Va., to the facilities used by Anheuser-Busch, located at or near Jacksonville, Fla.

(9) *Metal containers, metal container ends, shrouds, pallets, chipboard and dunnage materials,* (a) between Memphis, Tenn., and Winston-Salem, N.C.; and (b) between Tampa, Fla., and Winston-Salem, N.C.

NOTE.—The purpose of this republication is to indicate that the sole purpose of applicant's request for authority in this proceeding is to convert its existing and pending contract carrier authorities (or application) to common carrier authority. Applicant presently holds all the authority sought above (except (9)(b) which is pending before the Commission in MC 116947 (Sub-No. 38), in MC 116947 (Sub-Nos. 7, 22, 31 and 37). Applicant holds contract carrier authority in MC 116947 and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at Atlanta, Ga.

No. MC 119777 (Sub-No. 322) (Amendment), filed September 8, 1975, published in the FEDERAL REGISTER issue of October 2, 1975, and republished as amended this issue. Applicant: LIGON SPECIALIZED HAULER, INC., Highway 85 East, Madisonville, Ky. 42431. Applicant's representative: Carl U. Hurst, P.O. Drawer L, Madisonville, Ky. 42431. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: (1) *Iron and steel articles,* from points in Liberty County, Tex., to points in the United States (except Alaska and Hawaii), restricted to the transportation of traffic originating at the facilities of National Pipe & Tube Company; and (2) *materials, equipment and supplies,* used in the production and distribution of iron and steel articles (except in bulk, in tank vehicles), from points in the United States (except Alaska and Hawaii), to points in Liberty County, Tex.

NOTE.—The purposes of this republication are to indicate that the origin restriction applies to Part (1) only, and except bulk commodities in tank vehicles in Part (2) above. Applicant holds contract carrier authority in MC 126970 and subs thereunder, therefore dual operations may be involved. Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either St. Louis, Mo., or Washington, D.C.

No. MC 123407 (Sub-No. 274), filed November 24, 1975. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Highway 6, Valparaiso, Ind. 46383. Applicant's representative: Stephen H. Loeb (same address as applicant). Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Iron and steel articles,* from the plantsite and warehouse facilities of North Star Steel Company, located at Newport, Minn., to points in Washington, Oregon, California, Nevada, Idaho, Montana, Wyoming, Arizona, Utah, New Mexico, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Minnesota, Iowa, New York, Vermont, Maine, New Hampshire, Massachusetts, Connecticut, Rhode Island, New Jersey, and Delaware, restricted to traffic originating at said plantsite and warehouse facilities.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either St. Paul, Minn., or Washington, D.C.

No. MC 123407 (Sub-No. 275), filed November 21, 1975. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Hwy. 6, Valparaiso, Ind. 46383. Applicant's representative: Stephen H. Loeb (same address as applicant). Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Plastic conduit and iron fittings and connections, valves, hydrants, and gaskets* (except oil field commodities, as described in *Mercer Extension Oil Field Commodities,* 74 M.C.C. 459), from the plantsite and warehouse facilities of Clow Corporation, at Columbia, Mo., to points in Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Idaho, Washington, Oregon, Nevada, and California.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Chicago, Ill., or Columbia, Mo.

No. MC 125708 (Sub-No. 142), filed November 26, 1975. Applicant: THUNDERBIRD MOTOR FREIGHT LINES, INC., Highway 32 E., P.O. Box 192, Crawfordsville, Ind. 47933. Applicant's representative: Donald W. Smith, Suite 2465 One Indiana Square, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: (1) *Iron and steel articles,* from the plant site and storage facilities of North Star Steel Company, at or near Wilton, Iowa, to points in the United States (except Hawaii) and (2) *materials, equipment and supplies* (except in bulk) used in the manufacture and distribution of iron and steel articles from points in the United States (except Hawaii), to the plant site and storage facilities of North Star Steel Company, at or near Wilton, Iowa, restricted to traffic originating at and destined to the above named points.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 126286 (Sub-No. 15), filed November 21, 1975. Applicant: NIX TRANSPORTATION, INC., 335 West Queen, P.O. Box 721, Albany, Oreg. 97321. Applicant's representative: Lawrence V. Smart, Jr., 419 N.W. 23rd Ave., Portland, Oreg. 97210. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Lumber and lumber mill products,* between points in Oregon and Washington.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Portland, Oreg.

No. MC 127737 (Sub-No. 4), filed November 19, 1975. Applicant: JIM EDWARD GODFREY, Route 3, Gaffney, S.C. 29340. Applicant's representative: Mitchell King, Jr., P.O. Box 1628, Greenville, S.C. 29602. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Dry fertilizer and dry fertilizer materials* (except in bulk, in tank or dump vehicles), from points in Spartanburg County, S.C., to points in Georgia on or north of Interstate Highway 20.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Charlotte, N.C.

No. MC 128698 (Sub-No. 11), filed November 26, 1975. Applicant: ERDNER BROS., INC., Davidson Road, Swedesboro, N.J. 08085. Applicant's representative: Chester A. Zyblut, 366 Executive Building, 1030 Fifteenth Street NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Foodstuffs,* in vehicles equipped with mechanical refrigeration, from the warehouse and storage facilities utilized by Pepperidge Farm located at points in Delaware, Maryland, and Pennsylvania, to points in Delaware, Maryland, New Jersey, New York, Ohio, Pennsylvania, Virginia, West Virginia, and the District of Columbia.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 129301 (Sub-No. 3), filed November 19, 1975. Applicant: ENGLISH AND SONS CORPORATION, 412 Kingshighway, Thorofare, N.J. 08086. Applicant's representative: James H. Sweeney, P.O. Box 684, Woodbury, N.J. 08096. Authority sought to operate as a *contract carrier,* by motor vehicle, over irregular routes, transporting: *Room fresheners,* from Camden, N.J., to points in Alabama, Connecticut, Delaware, District of Columbia, Florida, Georgia, Illinois, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, and Wisconsin, under a continuing contract with Certified Chemicals, Inc.

NOTE.—Applicant holds common carrier authority in MC 135966 therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Philadelphia, Pa., or Washington, D.C.

No. MC 133920 (Sub-No. 12), filed November 25, 1975. Applicant: HOWARD SHEPPARD, INC., P.O. Box 755, Sandersville, Ga. 31082. Applicant's representative: Virgil H. Smith, Suite 12, 1587 Phoenix Boulevard, Atlanta, Ga. 30349. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Lime slurry,* in bulk, in tank vehicles, from points in Georgia, to Dotham, Ala.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Atlanta or Columbus, Ga.

No. MC 134068 (Sub-No. 24), filed November 25, 1975. Applicant: KODIAK REFRIGERATED LINES, INC., 3336 E. Fruitland Ave., P.O. Box 58327, Vernon, Calif. 90058. Applicant's representative: Donald L. Stern, Suite 530, Univac Bldg., 7100 W. Center Rd., Omaha, Nebr. 68106. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Toilet preparations, shampoo, cleaning compounds, paper products, advertising matter, and supplies, materials and articles,* used by manufacturers or distributors of beauty supplies, from Fridley, Minn., to points in Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Texas, and Washington.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 134388 (Sub-No. 10), filed November 18, 1975. Applicant: HOME RUN, INC., 3 East Washington Street, Jamestown, Ohio 45335. Applicant's representative: Boyd B. Ferris, 50 West Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *contract carrier,* by motor vehicle, over irregular routes, transporting: *Buildings and component parts, materials, supplies and fixtures* used in the erection or assembly of buildings (except buildings in sections when mounted on wheeled undercarriages, and cement), between points in New Jersey, on the one hand, and, on the other, points in Delaware, Maryland, New York, Pennsylvania, Virginia, and the District of Columbia, under a continuing contract with Levitt Residential Communities, Inc.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Columbus, Ohio.

No. MC 135811 (Sub-No. 6), filed November 26, 1975. Applicant: GARDNER TRUCKING CO., INC., 320 Woodlawn, P.O. Box 567, Walterboro, S.C. 29488. Applicant's representative: Theodore Polydoroff, 1250 Connecticut Avenue NW., Washington, D.C. 20036. Authority sought to operate as a *contract carrier,* by motor vehicle, over irregular routes, transporting: *Chains and related attachments, electric welders, and materials and supplies* used in connection with electric welders, from the plantsites and shipping facilities of Teledyne McKay at or near Waukesha, Wis. and York, Pa., to points in Arkansas, Arizona, California, Colorado, Idaho, Louisiana, Montana, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming, under a continuing contract with Teledyne McKay.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 136408 (Sub-No. 32), filed November 26, 1975. Applicant: CARGO CONTRACT CARRIER CORP., P.O. Box 206, U.S. Highway 20, Sioux City, Iowa 51102. Applicant's representative: William J. Hanlon, 60 Park Place, Newark, N.J. 07102. Authority sought to operate as a *contract carrier,* by motor vehicle, over irregular routes, transporting: *Chemcals and plastics* (except in bulk, in tank vehicles), from Sanford, Maine, to Detroit, Mich.; Chicago, Ill.; Dallas, Tex.; and Los Angeles, Calif., restricted to a transportation service to be performed under a continuing contract or contracts with American Cyanamid Co., at Wayne, N.J.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y., or Washington, D.C.

No. MC 139091 (Sub-No. 13), filed November 20, 1975. Applicant: LOGAN MOTOR LINES, INC., Rt. 2, Box 174A, Canyon, Tex. 79015. Applicant's representative: Gailyn Larsen, P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier,* by motor vehicle, over irregular routes, transporting: *Vacuum bottles and fillers, lunch and picnic boxes and kits, containers, travel bags, camping equipment, stoppers, plastic articles, jugs, cooling boxes and chests, tents, displayracks, and insulating material,* from the plantsite and storage facilities of King-Seeley Thermos Co., at or near Macomb, Ill., to points in Kentucky, Louisiana, Tennessee, North Carolina, South Carolina, Georgia, Florida, Alabama, and Mississippi, under contract with King-Seeley Thermos Co.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Amarillo, Tex., or Washington, D.C.

No. MC 139269 (Sub-No. 6), filed October 14, 1975. Applicant: C. P. CRASKA, INC., 207 Cosby Manor Road, Utica, N.Y. 13502. Applicant's representative: Murray J. S. Kirshtein, 118 Bleecker Street, Utica, N.Y. 13501. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Meats, meat products and meat byproducts,* as described in sections A & C of Appendix I to *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209 and 766, and *Foodstuffs* in vehicles equipped with mcehanical temperature control devices: (1) Between points in New York; and (2) From points in Albany, Schenectady, Montgomery, and Rensselaer Counties, N.Y., to points in Vermont, and New Hampshire, and points in Massachusetts on and west of U.S. Highway 5.

NOTE.—Applicant holds motor contract carrier authority in MC 9279, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Utica, Syracuse, Albany, or New York, N.Y.

No. MC 139495 (Sub-No. 113), filed November 19, 1975. Applicant: NATIONAL CARRIERS, INC., 1501 East 8th Street, P.O. Box 1358, Liberal, Kans. 67901. Applicant's representative: Herbert Alan Dubin, 1819 H Street NW., Suite 1030, Washington, D.C. 20006. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Plastic and rubber materials* (except in bulk, in tank vehicles), from the plantsite of The B. F. Goodrich Chemical Company, located at or near Henry, Ill., to points in Colorado, Kansas, Oklahoma, Texas, Arizona, and Los Angeles and Orange Counties, Calif.

NOTE.—Applicant holds contract carrier authority in MC 133106 and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 140648 (Sub-No. 4), filed November 19, 1975. Applicant: FRANKS & SON, INC., Route 1, Box 108A, Big Cabin, Okla. 74332. Applicant's representative: James E. Frazier, Mezzanine Floor, Beacon Bldg., Tulsa, Okla. 74103. Authority sought to operate as a *contract carrier,* by motor vehicle, over irregular routes, transporting: *Wood products, plastic products and sporting goods,* (1) from Wilton, Maine to points in Hutchinson, Kans.; Salt Lake City, Utah; Spokane and Tacoma, Wash.; Portland, Oreg.; Union City, San Diego and Fresno, Calif.; Tulsa and Oklahoma City, Okla.; Tolleson, Ariz.; Houston and San Antonio, Tex.; Memphis, Tenn.; Little Rock, Ark.; Joplin, Mo.; Miami, Jacksonville, Dodge Island, Hialeah, Orlando and Tampa, Fla.; Atlanta, Ga.; Monroe, La.; Indianola and Jackson, Miss.; and (2) from Guilford, Maine to points in Dallas, Tex., Los Angeles and San Francisco, Calif.; and Seattle, Wash., under a continuing contract or contracts with Forster Mfg. Co., Inc., and Harwood Products Co.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Boston, Mass., Portland, Maine, or New York, N.Y.

No. MC 141345 (Sub-No. 1), filed November 25, 1975. Applicant: JOSEPH DUBIN TRUCKING CORPORATION, 477 Leonard Street, Brooklyn, N.Y. 11222. Applicant's representative: Robert B. Pepper, 168 Woodbridge Avenue, Highland Park, N.J. 08904. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Juvenile furniture and baby wheel goods,* from Brooklyn, N.Y. to Fairfield County, Conn., Philadelphia, Pa. and points in Bergen, Essex, Hudson, Mercer, Middlesex, Monmouth, Morris, Passaic, Somerset, and Union Counties, N.J.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either New York, N.Y. or Newark, N.J.

No. MC 141463 (Sub-No. 1), filed November 18, 1975. Applicant: J. C. DUNCAN CO., INC., 1212 Harrison Avenue, Arlington, Tex 76011. Applicant's representative: Billy R. Reid, 6108 Sharon Road, Fort Worth, Tex. 76116. Authority sought to operate as a *contract carrier,* by motor vehicle, over irregular routes, transporting: (1) *Garbage containers and bodies* with capacity of one cubic yard or greater, and *garbage compaction equipment* having capacity of one cubic yard or greater, from Arlington, Tex., to points in the United States (except Alaska and Hawaii); (2) *garbage compactors,* from Louisville, Ky., to Arlington, Tex.; and (3) *materials, equipment and supplies* used in the manufacture and distribution of garbage containers, bodies and garbage compactors, and the distribution of garbage, from points in the United States (except Alaska and Hawaii), to Arlington, Tex., under a continuing contract or contracts with Duncan Distributing, Inc.; Duncan Equipment Co., Inc., and Grand Prairie Disposal Co., Inc.

V 40 251 DEC 31 75 XUM

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Dallas or Fort Worth, Tex.

No. MC 141540, filed November 21, 1975. Applicant: B.M.I.L. INC., 7018 Berkshire Place, Las Vegas, Nev. 89114. Applicant's representative: John Paul Fischer, 140 Montgomery Street, San Francisco, Calif. 94104. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat by-products, and packing house products*, from points in Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota, to points in California, under contract with Pacific Provisions, Inc., restricted to service to be rendered for the account of Pacific Provisions, Inc., at South San Francisco, Calif.

NOTE.—Dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at either San Francisco or Fresno, Calif.

No. MC 141572, filed November 21, 1975. Applicant: COUNCILL HAULING, INC., 1447 Clay Street, Franklin, Va. 23861. Applicant's representative: Ragsdale & Leggett, P.O. Box 349, Raleigh, N.C. 27602. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Lumber, particleboard, waste paper, and wood residuals, and paper*, between points in Virginia, North Carolina, and South Carolina, under a continuing contract or contracts with Union Camp Corporation and restricted to the transportation of paper within the state of Virginia having a prior or subsequent movement by water.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Raleigh, N.C.; Norfolk, Va. or Washington, D.C.

PASSENGER APPLICATION

No. MC 1934 (Sub-No. 38), filed November 13, 1975. Applicant: THE ARROW LINE, INC., 105 Cherry Street, East Hartford, Conn. 06108. Applicant's representative: Frank Daniels, 15 Court Square, Boston, Mass. 02108. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers*, in special and round-trip operations, beginning and ending at Hartford, Meriden, New Britain, Wallingford, New Haven, Bridgeport, and Waterbury, Conn. and extending to the site of the New Jersey Sports and Exposition Authority located at East Rutherford, N.J.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Hartford or New Haven, Conn.

No. MC 2832 (Sub-No. 11), filed November 21, 1975. Applicant: THE KELLEY TRANSIT COMPANY, INC., 30 Railroad Square, Torrington, Conn. 96790. Applicant's representative: Thomas A. Kelley, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Passengers and their baggage* in the same vehicle with passengers, in special and round trip operations, beginning and ending at points in Litchfield County, Conn., and Waterbury, Conn. and extending to ski areas located at Manchester, Waitsfield, Wilmington, Jay, Marlboro, Killington, Londonderry, West Dummerston, Mount Snow, Ludlow, Rutland, Stratton, Warren, and Stowe, Vt.; New Ashford and Great Barrington, Mass.; and Hillsdale, N.Y.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Hartford, Conn. or Springfield, Mass.

No. MC 10302 (Sub-No. 7), filed November 18, 1975. Applicant: THE CHIEPPO BUS COMPANY, 192 Forbes Avenue, New Haven, Conn. 06501. Applicant's representative: Frank Daniels, 15 Court Square, Boston, Mass. 02108. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, when moving in the same vehicle, in special round-trip operations, beginning and ending at New Haven, Conn., and extending to the sites of Aqueduct Race Track, New York, N.Y.; Belmont Park, Elmont, N.Y.; Saratoga Springs, N.Y.; Lincoln Downs Race Track, Lincoln, R.I., and Narragansett Park, Pawtucket, R.I.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at New Haven, Conn.

FREIGHT FORWARDER APPLICATION

No. FF–322 (Sub-No. 1), filed November 24, 1975. Applicant: SUNPAK MOVERS, INC., 100 West Harrison Plaza, Seattle, Wash. 98119. Applicant's representative: Alan F. Wohlstetter, 1700 K Street NW., Washington, D.C. 20006. Authority sought to engage in operation, in interstate commerce, as a *freight forwarder*, through use of the facilities of common carriers by rail, motor, water and express, in the transportation of (a) *Used household goods and unaccompanied baggage*, and (b) *used automobiles* between points in the United States including Hawaii and Alaska, restricted in (b) above to the transportation of export and import traffic.

NOTE.—The purpose of this application is to add Alaska to applicant's present authority. Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Seattle, Wash.

No. FF–366 (Sub-No. 1), filed November 24, 1975. Applicant: LYON HOUSEHOLD SHIPPING, INC., 1950 South Vermont Avenue, Los Angeles, Calif. 90007. Applicant's representative: Alan F. Wohlstetter, 1700 K Street NW., Washington, D.C. 20006. Authority sought to engage in operation, in interstate commerce, as a *freight forwarder*, through use of the facilities of common carriers by rail, motor, water and express, in the transportation of (a) *Used household goods and unaccompanied baggage*, and (b) *used automobiles*, between points in the United States, including Alaska and Hawaii, restricted in (b) above to the transportation of export and import traffic.

NOTE.—Common control may be involved. The purpose of this application is to add Alaska to applicant's present authority. If a hearing is deemed necessary, the applicant requests it be held at Los Angeles, Calif.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

POSTAL SERVICE

TEMPORARY POSTAGE RATES

Effective Date

In the FEDERAL REGISTER of October 9, 1975 (40 FR 47589), with minor corrections as made in the FEDERAL REGISTER of Oct. 24, 1975 (40 FR 49823), the Postal Service in compliance with 39 U.S.C. § 3641 gave notice of its intent to place in effect, on December 28, 1975, temporary changes in rates of postage, as shown in column 5 of the tables that were published in the FEDERAL REGISTER at the same time.

These temporary changes were prevented from going into effect on December 28, 1975, as announced, by reason of a December 16, 1975 order of the U.S. District Court for the District of Columbia in the case of *Associated Third Class Mail Users, et al. v. United States Postal Service, et al.*, D.D.C. Civil Action No. 75–1809. The United States Court of Appeals for the District of Columbia Circuit, on December 29, 1975, in its Docket No. 75–2227, granted a stay of that part of the order of the District Court which relates to temporary changes that were the subject of the October 9, 1975, FEDERAL REGISTER Notice.

Accordingly, the increased rates scheduled to become effective on a temporary basis on December 28, 1975, pursuant to the Notice published in the FEDERAL REGISTER on October 9, 1975 (40 FR 47589), as corrected, are under 39 U.S.C. § 3641, the applicable rates of postage enforcement of which will commence at 12:01 A.M. December 31, 1975.

ROGER P. CRAIG, *Deputy General Counsel.*

PART II:

FEDERAL ELECTION COMMISSION

FEDERAL ELECTIONS

Advisory Opinions and Requests

V 40 251 DEC 31 75 XUM

FEDERAL ELECTION COMMISSION

[Notice 1975–97]

ADVISORY OPINIONS

The Federal Election Commission announces the publication today of Advisory Opinions 1975–39, 1975–55, 1975–84, 1975–95, 1975–99, 1975–105, 1975–106, 1975–107. The Commission's opinions are in response to questions raised by individuals holding Federal office, candidates for Federal office and political committees, with respect to whether any specific transaction or activity by such individual, candidate, or political committee would constitute a violation of the Federal Election Campaign Act of 1971, as amended, of Chapter 95 or 96 of Title 26, United States Code, or of Sections 608, 610, 611, 613, 614, 615, 616, or 617 of Title 18 United States Code.

The Commisison points out that these advisory opinions should be regarded as interim rulings which are subject to modification by future Commission regulations of general applicability. In the event that a holding in either opinion is altered by the Commission's regulations, the persons to whom the opinions were issued will be notified.

ADVISORY OPINION 1975–39

SETTLEMENT OF CAMPAIGN DEBTS OWED TO CORPORATIONS

The Federal Election Commission renders this advisory opinion under 2 U.S.C. 437f in response to a request submitted by Mr. Marvin S. Schwarzwald on behalf of the Metzenbaum Post-Campaign Committee. This request was made public by the Commission and published in the FEDERAL REGISTER on September 3, 1975 (40 FR 40676). Interested parties were given an opportunity to submit comments relating to the request. One comment was received.

The requesting party seeks an advisory opinion as to whether a candidate's committee, which incurred debts during the 1974 senatorial campaign, may settle those debts with corporate or non-corporate creditors, if the committee has made a serious effort to bring down the amount of said debts since the date of the election and has little likelihood of raising additional funds sufficient to pay all debts in full.

After the 1974 election, the Metzenbaum campaign had outstanding debts of $113,000, but subsequently decreased that debt to approximately $79,000. The Committee expresses concern that, in view of Advisory Opinions 1975–5 and 1975–6, (40 FR 31316, July 25, 1975), cash settlements with corporate creditors may constitute violations of 18 U.S.C. 610 or 611. Advisory Opinion 1975–6 stated that "if the creditor is a national bank, corporation, labor organization, or government contractor, cancellation of the debt may be a 'contribution' of the type that have been prohibited under 18 U.S.C. § 610 and § 611 for many years."

However, in Advisory Opinion 1975–50 (40 FR 58392, December 16, 1975) the Commission set forth the conditions under which debts owed by political committees to corporations could be settled without being regarded as a corporate contribution in violation 18 U.S.C. 610. The Commission stated:

> The final question concerns the application of 18 U.S.C. 610 to the settlement or forgiveness of debts owed by a candidate or political committee to corporations. In general, a corporation may not forgive prior debts or settle these debts for less than the amount owed by the candidate or committee, because settlement or forgiveness of a corporate debt is a contribution under § 610. However, in certain extenuating circumstances (which shall be subject to Commission scrunity on a case by case basis), settlement or forgiveness of such a corporate debt may not be considered a contribution under section 610 if a showing is made to the Commission that the corporate creditor has treated the outstanding debt of a candidate or political committee in a commerically reasonable manner.
>
> Such a showing must include at least the following:
>
> (1) That the initial extension of credit to the candidate or political committee was made in a manner and on terms similar to extensions of credit to a non-political debtor or in accordance with regulations prescribed by a regulatory Board or Commission pursuant to 2 U.S.C. 451;
>
> (2) That the candidate or political committee has undertaken an exhaustive effort to satisfy the outstanding debt; and
>
> (3) The corporate creditor has pursued its remedies in a manner similar in intensity to that employed in pursuit of a non-political debtor.

Should the Metzenbaum Committee wish to settle a corporate contribution, the Committee and the corporation must make a showing that, at the minimum, the above criteria have been met.

The Commission recently concluded in Advisory Opinion 1975–82 (40 FR 57757, December 11, 1975) that contributions to retire pre-1975 campaign debts could be solicited, received, and expended for that purpose after December 31, 1975, without regard to the limits in 18 U.S.C. 608 (b) and (c). The opinion set forth several restrictions on fundraising efforts to retire debts incurred with respect to 1974, and earlier, elections. The Metzenbaum Post-Campaign Committee is generally referred to AO 1975–82 as applicable to its situation. In view of the Commission's policy reflected in that opinion, the Committee must obviously undertake additional efforts to retire its outstanding debts before corporate creditors can properly settle or forgive debts owed to them. AO 1975–50, supra.

This advisory opinion is issued on an interim basis only pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–55

ORGANIZATION CONTRIBUTIONS TO CHARITY IN LIEU OF HONORARIUM TO FEDERAL OFFICEHOLDER OR SCHOLARSHIP FUND

This advisory opinion is rendered under 2 U.S.C. 437f in response to a request for an advisory opinion which was submitted by Congressman Al Ullman and was published as AOR 1975–55 in the September 3, 1975, FEDERAL REGISTER (40 FR 40679). Interested parties were given an opportunity to submit written comments relating to the request, but none were received.

The request asks generally whether money donated by a private organization to a legitimate charity or scholarship fund, either in lieu of or in addition to any honorarium accepted by a Member of Congress, is subject to the limitations of section 616 of Title 18, United States Code. Specifically, the request asks whether:

(a) A private organization can in proper fashion make a donation to a legitimate charity either in lieu of, or in addition to honorariums that might otherwise be accepted by a Member of Congress from the same organization; and

(b) A Member of Congress can establish in a proper fashion a scholarship fund with an independent board of directors, and then in some manner, indicate to the organization that it consider making a donation to the scholarship fund in lieu of providing him with a honorarium, while stressing that such a donation would not be a condition for the Congressman's appearance.

It is the opinion of the Commission, as expressed in Advisory Opinion 1975–8 (Part A), 40 FR 36747 (August 21, 1975), that if the Member of Congress has any dominion or control over the money paid in lieu of an honorarium to a legitimate charity, then he or she has "accepted" it as an honorarium and the limits of 18 U.S.C. § 616 will apply. For a fuller discussion of what generally constitutes the exercise of dominion and control, see AO 1975–8, supra.

The Commission is, however, of the opinion that dominion or control, and hence acceptance, will not be imputed where (1) an elected or appointed Federal officeholder delivers a speech or makes an appearance before an organization which ordinarily pays honorariums in similar circumstances; (2) the officeholder expressly informs the organization that payment of an honorarium is not a condition for his or her speech; and (3) subsequent to the speech, the organization makes a gift to a charity to which the officeholder has previously contributed or otherwise endorsed.

The Commission stresses that the donation to a charitable organization must be voluntary and not contingent upon a speech or appearance by the Federal officeholder. In addition, the charitable gift must be in the name of the organization before which the speech or appearance occurs, and not in the name of the officeholder (otherwise the honorarium will be considered as "accepted" by the officeholder, see AO 1975–8, (supra)). Accordingly, and subject to the foregoing, a charitable contribution by an organization that would otherwise pay an honorarium for a Federal officeholder's appearance will not be regarded as an honorarium for purposes of 18 U.S.C. 616. This conclusion also applies where

the donee is a properly constituted "scholarship fund."

This advisory opinion is issued on an interim basis only pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–84

COVERAGE OF AGENT'S FEES BY HONORARIUM LIMITATIONS

This advisory opinion is rendered under 2 U.S.C. 437f in response to a request for an advisory opinion which was submitted by Congressman Tom Railsback and was published as AOR 1975–84 in the November 4, 1975, FEDERAL REGISTER (40 FR 51355). Interested parties were given an opportunity to submit written comments relating to the request. No comments were received.

The request asks whether a Member of Congress, who retains a speaker's bureau or agent to obtain speaking engagements or appearances in exchange for a fee (computed as a percentage of the honorarium accepted for the speech) may regard the honorarium as reduced by the amount of the fee for purposes of applying the limits in 18 U.S.C. § 616. Congressman Railsback asks whether this percentage fee is to be included under the $1,000 per engagement and $15,000 annual limits provided in 18 U.S.C. § 616, or whether these limits apply only to income actually received by the Member.

It is provided in 18 U.S.C. 616 that:

> Whoever, while an elected or appointed officer or employee of any branch of the Federal Government—
>
> (1) accepts any honorarium of more than $1,000 (excluding amounts accepted for actual travel and subsistence expenses) for any appearance, speech, or article; or
>
> (2) accepts honorariums (not prohibited by paragraph (1) of this section) aggregating more than $15,000 in any calendar year;
>
> shall be fined not less than $1,000 nor more than $5,000.

This provision clearly limits the amount of honoraria which may be accepted for an appearance, speech or article. The question then arises as to whether the honorarium accepted by the Member should be reduced by an amount equal to the fee paid to some other person for arranging the speech or appearance. In this case, the Commission concludes that the words "accepts any honorarium" and "accepts honorariums" should be read narrowly to reflect only the obvious intent of the statute, and should not be interpreted as meaning "honoraria minus arrangement expenses."

When Congress enacted 18 U.S.C. 616, it specifically exempted "amounts accepted for actual travel and subsistence expenses" from any computation of honoraria limits (see in general AO 1975–8, 40 FR 36746, August 21, 1975). The fact that Congress did not provide an exemption for agents' and speakers' bureau's fees requires that they be treated identically to any costs which may be incurred in connection with making the appearance, such as travel and subsistence expenses when not paid or reimbursed by the person or organization paying the honorarium.

Accordingly, it is the conclusion of the Commission that any percentage of an honorarium, which is paid as a fee to an agent or speaker's bureau in consideration for arranging a speaking engagement or other appearance for the Member, is part of the honorarium. Thus, the total amount of the honorarium shall be subject to the limitations of 18 U.S.C. 616.

This advisory opinion is issued only on an interim basis pending the promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–95

SEPARATE COMMITTEES TO RECEIVE AND EXPEND FEDERAL AND NON-FEDERAL FUNDS

This advisory opinion is rendered under 2 U.S.C. 437f in response to a request by Mr. Carl M. Williams, Chairman of the Colorado Republican State Central Committee. It was published in the FEDERAL REGISTER on November 4, 1975 (40 FR 51357). Interested persons were invited to submit written comments, but none were received.

The Colorado Republican State Central Committee (CRSCC) requests the Commission's approval of its plan for establishing separate committees for State and Federal election campaign purposes.

The request states that in the past, CRSCC supported Federal, State, and local political candidates and, since 1972, reported to the previous supervisory officers all "funds received and expenditures made" from its general account. On June 23, 1975, a new committee, the Colorado Republican Committee (CRC) was formed to contribute to or expend on behalf of candidates for State and local offices only. CRSCC intends to transfer to CRC its remaining cash balance and to file a statement of termination with the Commission in its January 31, 1976, report, 2 U.S.C. 433, 434.

Before December 31, 1975, the Colorado Republican Federal Campaign Committee (Federal Committee) will be established to solicit contributions and make expenditures for Federal campaign purposes only. CRC will not be a subordinate committee to the Federal Committee, and will not report to it. CRC and the Federal Committee will maintain separate campaign depositories, accounting systems, chairmen and treasurers. The Federal Committee will pay to CRC "appropriate charges" for various items of administrative overhead. Although both will report to the Secretary of State under Colorado law, only the Federal Committee will report to the Federal Election Commission.

It is the opinion of the Commission that the establishment of CRC and the Federal Committee, if conducted as explained above and pursuant to the Commission's proposed regulations on disclosure, will be in compliance with the disclosure requirements of the Federal Election Campaign Act of 1971, as amended. Contributions and expenditures received or made by the Federal Committee are, of course, subject to other applicable Federal laws including 18 U.S.C. §§ 501, 608, 610, and 611. The Commission notes that its general audit authority (2 U.S.C. 437d and 438) extends to both CRC and the Federal Committee for purposes of verifying that all financial operations of the two committees conform to the representations made in the request.

This advisory opinion is issued on an interim basis only pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–99

APPLICATION OF 18 U.S.C. 611 TO CONTRIBUTIONS MADE BY GOVERNMENT CONTRACTORS TO NON-FEDERAL CANDIDATES OR FOR NON-FEDERAL POLITICAL PURPOSE

This advisory opinion is issued pursuant to 2 U.S.C. 437f in response to a request submitted by the San Francisco Republican County Central Committee. The request was published on November 5, 1975, in the FEDERAL REGISTER (40 FR 51612). Interested parties were then given an opportunity to comment, and a number of comments were received by the Commission.

The San Francisco Republican County Central Committee (hereinafter the Committee) states that it is a political committee within the meaning of 18 U.S.C. 591(d). It conducts various activities related to State, local and Federal elections. The Committee's State and local activities are funded out of a separate, restricted bank account to which various persons (as defined by 18 U.S.C. 591(g)) and labor organizations (as defined by 18 U.S.C. 610) make contributions. The Committee asks whether this account may receive contributions from persons and labor organizations which are government contractors within the meaning of 18 U.S.C. 611.

The Commission concludes that the prohibitory language of 18 U.S.C. 611 extends only to Federal elections.

The portion of 611 at issue herein generally forbids parties entering into or performing contracts with the Federal government from:

> "• • • directly or indirectly mak(ing) any contribution of money or other thing of value, or promis(ing) expressly or impliedly to make any such contribution, to any political party, committee, or candidate for public office or to any person for any political purpose or use;

It also prohibits any person from "knowingly solicit(ing)" any contribution from a government contractor.

Although the preceding language is not dispositive of the question raised by the Committee, when it is examined in the context of the "separate segregated fund" clause which was added to section 611 by a 1974 congressional amendment, there is a persuasive suggestion that it was intended to apply to Federal elections only.

V 40 251 DEC 31 75 XUM

The clause states that a government contractor may establish a separate segregated fund "for the purpose of influencing the nomination for election, or election, of any person to *Federal* office" (emphasis added). If the word Federal is not read back into the prior prohibition portion of section 611, there is an obvious internal inconsistency in the entire statute. On the one hand corporations and labor unions which are Government contractors could make contributions to Federal elections out of separate segregated funds; on the other hand, the same corporations and labor unions, as well as all other persons and parties falling within the ambit of section 611, would be absolutely prohibited from contributing to state and local elections. In short, Congress, for no apparent reason, would have created a distinction between contributions of Government contractors to state and local elections and contributions to Federal elections. The distinction would produce a more restrictive result where there is clearly less of a Federal interest.

The Commission's conclusions are also consonant with the overall rationale behind section 611. This rationale—from the time of the statute's enactment in 1940—is clearly to prohibit improper political contracts between, on the one hand, Federal contractors and, on the other, the Federal officials awarding the contracts. [See Cong. Rec., Vol. 84, Part 9, p. 9599 (1939); Cong. Rec., Vol. 86, pp. 2981–82 (1940).] The likelihood that such contracts would result from contributions to a *state* campaign is too remote to warrant infringement of First Amendment rights by application of section 611.

It is also to be noted that the plain intent and meaning of the amendments to 18 U.S.C. 591,611 made by the Federal Election Campaign Act of 1971 and the 1974 Amendments thereto, is directed at Federal elections. If Congress intended that § 611 apply to State and local elections ofter the 1971 Act it would seem logical that there would be some specific language or legislative history to this effect. However, there is none. Indeed, if section 611 is deemed applicable to Federal, State and local elections, this would make Federal contractors more strictly regulated than any corporation or labor organization covered only by section 610.

In rendering this opinion, the Commission is mindful of the fact that under the 1974 amendments to the 1971 Act, the definition of contribution in section 591(e), which is restricted to "influencing" a person's nomination or election "to Federal office," does not govern the interpretation of section 611 if it is "otherwise specifically provided" in that section. However, within § 611 there is no internal definition of "contribution" nor of several other crucial terms which are defined in § 591; nor is there any language expressly indicating that the section is intended to reach State and local as well as Federal elections. Thus, it seems evident that the definitions of section 591 continue to preclude the application of § 611 to State and local elections.

The most reasonable construction of the language of section 611 prohibiting contributors from contributing "to any political party, committee, or candidate . . . or to any person for any political purpose or use" is that it was meant to be a catchall clause applying to any gift of money which affects the Federal election process, irrespective of whether such gift is to a specific political party, committee, or candidate. This would follow the well accepted doctrine of statutory construction that, "where general words follow specific words in an enumeration describing the legal subject, the general words are construed to embrace only objects similar in nature to those objects enumerated by the preceding specific words." 2A J. Sutherland, Statutes and Statutory Construction, § 47.17 (and cases cited therein); FMC v. Seatrain Lines, Inc., 411 U.S. 726 (1973).

This advisory opinion is issued on an interim basis pending final promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–105

PRE-PRIMARY NOMINATING CONVENTION AS PART OF PRIMARY ELECTION PROCESS

The Federal Election Commission renders this advisory opinion under 2 U.S.C. § 437f in response to a request submitted by Mr. Jack Stahl on behalf of the Republican Party of New Mexico. This request was pubished in the FEDERAL REGISTER on November 12, 1975 (40 FR 52797). Interested parties were given an opportunity to submit comments relating to the request, but no comments were received.

Mr. Stahl seeks an advisory opinion concerning the New Mexico nominating process. New Mexico law requires that all candidates seeking position on the primary ballot, other than write-in positions, must seek their party's convention designation. Mr. Stahl asks whether such a pre-primary convention is a separate election as defined by 18 U.S.C. 591(a), and whether limitations on expenditures and contributions therefore apply as provided in 18 U.S.C. 608.

The Commission is of the opinion that a political party's caucus or convention held prior to a primary election which does not select a nominee is part of the primary election rather than a separate election.

18 U.S.C. 608 provides separate contribution and expenditure limitations for the period during which nomination is sought and for the period when election is sought. A pre-primary convention for the purpose of gaining access to a primary ballot would be part of the primary process; thus, when a candidate campaigns for selection by such a convention he or she would be engaged in an effort to secure nomination and the limits applicable to that process would be in effect. These candidates would be responsible for determining what portion of their expenditures would be necessary for campaigning before the convention and what portion would be needed to campaign before the primary election itself. Competing candidates could, by agreement, voluntarily limit expenditures for a convention or caucus to a fixed amount so that an adequate amount remained to be expended in connection with the actual primary.

This advisory opinion is issued on an interim basis pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–106

This advisory opinion is issued pursuant to 2 U.S.C. 437f in response to a request submitted by Michael Kantor on behalf of Citizens for Senator Allen Cranston (hereinafter Committee). This request was published in the FEDERAL REGISTER on November 7, 1975 (40 FR 52796). Interested persons were invited to submit written comments. No comments were received.

This request relates to a $10,000 debt of the Committee from the 1974 campaign. The Committee wishes to retire this outstanding debt from funds raised in the next few months. Senator Cranston's current term does not expire until 1981 and thus he does not expect to become a candidate for quite some time.

Specifically, these questions have been asked:

1. Whether the 1974 debt is subject to the disclosure requirements of the Federal Election Campaign Act of 1971, as amended (the Act);

2. Whether the contribution limits of 18 U.S.C. 608 will be applied to persons contributing to retire the 1974 debt; and

3. Whether the funds used to retire the 1974 debt will be charged against the expenditure limits of 18 U.S.C. 608(c) of Senator Cranston should he become a candidate with respect to a Federal election in 1980.

The Commission in Advisory Opinions 1975–5 and 1975–6 (40 FR 31316, July 25, 1975), an Interim Guideline (40 FR 32950, August 5, 1975) and a Policy Statement (40 FR 32952, August 5, 1975), outlined requirements for the disclosure of pre-1975 campaign debts. These publications point out generally that the limits in 18 U.S.C. 608 (b) and (c) do not apply to contributions and expenditures related only to retiring past campaign debts. Further, in Advisory Opinion 1975–82 (40 FR 57757, December 11, 1975) the Commission extended the time in which candidates and political committees could solicit contributions for the repayment of pre-1975 debts. The Cranston Committee is referred to AO 1975–82 for specific guidance in reporting contributions and expenditures to retire its 1974 debt. The Commission thus answers the first question in the affirmative.

With reference to question two, the limits of 18 U.S.C. 608(a) on the amount a candidate or his immediate family may expend on a candidate's behalf are applicable to a 1974 debt. Therefore, Senator Cranston (or his immediate family) may not at any time expend in excess of $35,000 with respect to the 1974 campaign. The limits of 18 U.S.C. 608(b), however, will not be applicable to contributions by others given solely for retirement of pre-1975 campaign debts.

The Commission answers the last question in the negative. The Commission recognizes the obligation and responsibility of candidates and committees to retire their debts and encourages the liquidation of these debts at the earliest possible date. But whether or not the Senator decides to become a candidate with respect to an election in 1980, the Commission will not count expenditures related to the retirement of a 1974 debt against any § 608(c) limits applicable in a future Federal election.

This advisory opinion is issued on an interim basis pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–107

EXPENSES FOR A TELEVISION SHOW

This advisory opinion is issued pursuant to 2 U.S.C. 437f in response to a request submitted by Representative Edward P. Beard as to whether his costs for a television show are expenditures within the meaning of the Federal Election Campaign Act of 1971, as amended (FECA). The request was published as AOR 1975–107 in the December 1, 1975 FEDERAL REGISTER (40 FR 55827). Interested parties were given an opportunity to submit written comments pertaining to the request. No comments were received.

The request states that the television show is a "newsletter of the air." Supplemental communications with the Congressman make it clear that the TV show will consist of a review of the Congressman's past year, problems that face the Congressman's district, major areas of national concern, and a personal holiday greeting. The show will be aired on December 23, 1975, over two television stations which cover the Congressman's district. All production and air time costs are proposed to be paid out of the Congressman's personal account.

Representative Beard indicates that he has not yet decided whether to run for re-election. Reports filed by his authorized political committee which was created for his 1974 campaign and has continued in existence do not make clear whether he has received contributions or made expenditures with a view toward "influencing [his] nomination for election, or • • • election • • • to Federal office." [See 2 U.S.C. 431 (e), (f) and 18 U.S.C. 591 (e) and (f).]

Based on the particular facts alleged by Congressman Beard, the Commission is of the view and the costs [1] of the show need not be counted as expenditures within the meaning of the FECA and may be paid from the Congressman's personal funds so long as the show relates to legislative business and not to an upcoming campaign. Payment from campaign funds would, however, raise a presumption that the program is political in nature and an expenditure within the meaning of 18 U.S.C. 591(f). This conclusion is premised on an assumption that the Congressman is not a candidate within the meaning of 2 U.S.C. 431(b) and 18 U.S.C. 591(b).

An expenditure is defined under the FECA as "a purchase, payment, distribution, loan, advance, deposit, or gift of money or anything of value . . . made for the purpose of influencing the nomination for election, or election of any person to Federal office." [See 2 U.S.C. § 431 (f); 18 U.S.C. § 591(f).] In the view of the Commission, a brief television show summarizing a Congressman's activities and shown on a single occasion to his constituents does not, at least in a non-election year, fall within the scope of this definition.

This advisory opinion is issued on an interim basis only pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

Dated: December 18, 1975.

THOMAS B. CURTIS,
Chairman for the Federal Election Commission.

[FR Doc.75-34716 Filed 12-30-75;8:45 am]

[1] Since, regardless of whether or not he is a candidate, Congressman Beard would not have to report in 1975 "the value of • • • recording services furnished to him by the • • • House Recording Studio," [2 U.S.C. § 434(d)] this opinion does not deal with costs so incurred. However, it should be noted that the § 434(d) exemption does not apply for "recording services furnished during the calendar year before the year in which the Member's term expires." In other words, the value of recording services provided in calendar year 1976 would be reportable.

[Notice 1975–98, AOR 1975–122 through AOR 1975–124]

ADVISORY OPINION REQUESTS

In accordance with the procedures set forth in the Commission's Notice 1975–4, published on June 24, 1975 (40 FR 26660), Advisory Opinion Requests 1975–122 through 1975–124 are published today.

Interested persons wishing to comment on the subject matter of any Advisory Opinion Request may submit written views with respect to such requests on or before January 10, 1975. Such submission should be sent to the Federal Election Commission, Office of General Counsel, Advisory Opinion Section, 1325 K Street, NW., Washington D.C. 20463. Persons requiring additional time in which to respond to any Advisory Opinion Request will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered by the Commission before it issues an advisory opinion. The Commission recommends that comments on pending Advisory Opinion Requests refer to specific AOR number of the Request commented upon, and that statutory references be to the United States Code citations, rather than to the Public Law Citations.

AOR 1975–122: Contributions from An Incorporated Membership Organization. (Request Edited by the Commission.)

DEAR MR. CURTIS:

• • • • • •

The Council For A Livable World was founded in 1962 by the world-renowned physicist and biologist Leo Szilard. It is a nonpartisan, national political organization with headquarters in Washington, D.C. The principal purpose of the Council is to help clarify, in the minds of the public, the Administration, and the Congress, what needs to be done to reduce the danger of war, to further eliminate war as an instrument of national policy, and to advance the creation of livable world wherein acceptable standards of freedom and economic well-being prevail in as large a part of the world as possible. • • •

In pursuit of its purpose, the Council facilitates discussions between scientists, scholars, and other well informed persons with members of the Administration and members of Congress. • • •

In the course of its multifacted activities, which also include the publication of a newsletter to its individual subscribing members, the Council solicits contributions for political candidates campaigning for Federal office. Clearly, the Council holds no economic leverage over any potential contributor nor will the latter realize any personal pecuniary profit by support of the Council or candidates it recommends. As a result, it is submitted that the Council has characteristics which distinguish it from most, but not all, groups which seek to encourage and support political candidates.

• • • • • •

[Although now unincorporated, the Council is considering incorporating for liability purposes only.] The dilemma facing the Council is clear: if it incorporates to protect its members from civil liability, it must be wary in expressing its viewpoints lest it become liable to criminal prosecution under the ambiguous provisions of 18 U.S.C. 610 relating to nonmonetary campaign contributions. The Council is concerned that, if it incorporates, almost any statement it makes about elected officials or candidates in its newsletter to its members might be viewed as a campaign "contribution" because of the ambiguous definition of that term in section 610. • • •

Finally, if the Council incorporates, would it be required to qualify as a new committee for the contribution limits allowed by 18 U.S.C. 608(b)(2), or would its prior unincorporated status under that section remain applicable?

Terry F. Lenzner.

AOR 1975–123: Treatment of Transportation Offered to a U.S. Senator Who Is Not a Candidate (Request Edited by the Commission).

GENTLEMEN:

• • • • • •

Senator Bumpers was elected in 1974 and took his seat in 1975. His term will expire in January of 1981. He has taken no steps to qualify as a candidate to succeed himself, nor has he made a decision whether to run for re-election. He is not a candidate for any other office.

• • • This inquiry is directed toward the following situations:

V40251 DEC 31 75 XUM

A Senator is invited to speak to the Chamber of Commerce, the Bar Association, the Insurance Association, etc., in his home state. The sponsoring organization or a person who is a member of such organization furnishes an airplane to pick the Senator up and return him either to his home within the state, or Washington. The airplane may be owned by an individual or by a corporation. Has a political contribution or expenditure been made within the meaning of the law?

Assume the same situation except that the airplane is furnished by an individual or corporation who is not a member of the organization, but who is simply making a friendly gesture on behalf of the organization or some member of the organization. In such event has a contribution or expenditure been made?

Please also assume for purposes of your opinion that none of the Senator's appearances or speeches is for, or on behalf of, a campaign or candidacy or any other person.

• • • • •

RICHARD S. ARNOLD.

Source: Richard S. Arnold, Legislative Assistant, Senator Dale Bumpers, United States Senate, Washington, D.C. 20510. (December 9, 1975.)

AOR 1975–124: Status of Copies of Federal Election Reports Filed with the Various Secretaries of State; Effect of Federal Election Laws on Florida Elections Laws (Request Edited and Paraphrased by the Commission) (A Condensation of Two Letters).

DEAR SIR: You are advised I have filed as a candidate for the office of President of the United States.

• • • • •

As I am now a candidate, it is requested your office provide me with an Advisory Opinion • • •

1. Is it illegal for anyone to use for political fund raising purposes the information contained in the *campaign contribution report* submitted by various candidates for public office and *filed* with the various Secretaries of State?

2. Do the copies (not submitted to the Federal Election Commission) fall within the category of items contemplated by the Federal Freedom of Information Act and becomes public information for use by any person for any purpose?

3. Do the "copies" of the Federal campaign contribution reports filed with the Secretaries of State ever become subject to *state laws* which prohibit use of contribution reports for fund raising purposes?

4. Was it illegal to use for political fund raising purposes the names identified in the General Accounting Office publication of contributors who provided monies to the 1972 presidential candidates?

5. Has the subsequent amendment to the election laws (with later re-alignment of responsibility) changed the law so that the use of the alphabetical listing of 1972 Presidential Campaign Receipts is now legal?

6. Has the current Federal Election Law totally preempted state laws for congressional and presidential elections?

7. Has the Federal law requiring a candidate to have a committee made it unnecessary for a Federal candidate to file his own separate contribution and expenditure report?

8. In the event the current Federal law has only partially preempted state election laws, have the following Florida laws been nullified by the current Federal law?

A. Has the Federal requirement for a committee nullified state laws requiring the candidate to file a report?

B. Did the current Federal election provision requiring a campaign treasurer and committee nullify Florida law permitting the candidate to be his own campaign treasurer?

C. Did the current Federal election provisions nullify Florida law permitting the use of one or more "Deputy Campaign Treasurers" who have the same power and authority as a campaign treasurer?

D. Did the • • • Federal election law nullify the provisions of the Florida law which prohibited expending funds for "printing" and "renting of halls" until approximately 60 days before an election?

9. • • • [I]n the event your office determines that all use of campaign contributions lists for fund raising purposes are illegal, we would appreciate an opinion on the legality of using "testimonial fund raising lists" for fund raising purposes.

10. Is it necessary to *register* the campaign committee (required by the Federal statute) *with the states* that require registration of political committees?

11. We propose to use as *voluntary workers* two persons who receive Federal funds. One of the individuals receives *Aid to Dependent Children* and the other individual is totally *disabled* and receives a small income as welfare. The Florida State Rehabilitation and the U.S. Social Security Administration have indicated both funds are U.S. Social Security funds. [Would the use of such voluntary workers be prohibited by the Federal Election Campaign Act of 1971, as amended?]

PART III:

FEDERAL TRADE COMMISSION

DISCLOSURE OF WRITTEN CONSUMER PRODUCT WARRANTY TERMS AND CONDITIONS, PRE-SALE AVAILABILITY OF WRITTEN WARRANTY TERMS, AND INFORMAL DISPUTE SETTLEMENT MECHANISMS

Rules, Regulations, Statements and Interpretations Under Magnuson-Moss Warranty Act

V40251 DEC 31 75 XUM

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER C—RULES, REGULATIONS, STATEMENTS, AND INTERPRETATIONS UNDER MAGNUSON-MOSS WARRANTY ACT

PART 701—DISCLOSURE OF WRITTEN CONSUMER PRODUCT WARRANTY TERMS AND CONDITIONS

PART 702—PRE-SALE AVAILABILITY OF WRITTEN WARRANTY TERMS

I. History of the Proceeding. The Federal Trade Commission, pursuant to Title I, sections 109 and 110 of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act, Pub. L. 93-637 (15 U.S.C. §§ 2309, 2310), hereafter referred to as "the Act", has conducted a proceeding for the promulgation of two Rules, one setting forth the terms and conditions to be disclosed in written consumer product warrantles, and another setting forth requirements for making written warranties available to consumers prior to sale.

Notice of this proceeding, including the proposed rules, was published in the FEDERAL REGISTER on July 16, 1975 (40 FR 29895 (1975)). The notice urged all interested persons to express their approval or disapproval of the proposed rules, or to recommend revisions thereof, and to give a full statement of their views, supplemented by all appropriate documentation. The documents supporting the proposed rules, and a report of the Commission staff discussing the proposed rules and the supporting documentation, were placed on the public record and made available for examination and copying.

Interested parties were thereafter afforded opportunity to participate in the proceeding through the submission of written data, views and arguments, and to appear and express their views orally and to suggest amendments, revisions, and additions to the proposed rules. A period of 60 days was allowed for submission of written comments on the proposed rules. Public hearings, as announced in the notice, were held in Washington, D.C., September 15–18, 1975; in Chicago, Illinois, September 22–25, 1975; in Los Angeles, California, September 29 through October 1, 1975; and in San Francisco, California on October 2, 1975. Every person who had expressed a desire to present his or her views orally at these hearings was accorded an opportunity to do so. The public record remained open thirty days following the hearings for receipt of any other written data, views or arguments.

Upon careful analysis and review of the written and oral comments, the Commission has made certain modifications to the proposed Rules published July 16, 1975. The rules, the rationale for the modifications, and the record relating thereto, are discussed within the Statement of Basis and Purpose appearing below as part of this notice. The modifications do not raise issues of law or fact which were not fully addressed in and supported by the record. Therefore the Commission is promulgating these rules without further invitation for comment on the modifications.

II. *Background.* (A) *The Magnuson-Moss Warranty Act.* Recognizing the need for minimum warranty protection for consumers, for consumer understanding of warranties, for assurance of warranty performance, and for better product reliability, the 93rd Congress passed the Magnuson-Moss-Federal Trade Commission Improvement Act,[1] which was signed into law on January 4, 1975.

An examination of the legislative history of the Act reveals the congressional intent in requiring the disclosure of written warranty terms and conditions. The statements of Messrs. Moss and Magnuson in introducing the warranty legislation, as well as the Senate Report accompanying the legislation, highlight the need for warranty disclosures.

Congressman Moss, stated:

"The need for warranty reform has become apparent ever since the mid-sixties, when the Federal Trade Commission and the Senate Commerce Committee began investigating consumer product warranties.

. . . One of the most important effects of this bill will be its ability to relieve consumer frustration by promoting understanding and providing meaningful remedies. This bill should also foster intelligent consumer decisions by making warranties understandable. At the same time, warranty competition should be fostered since consumers would be able to judge accurately the content and differences between warranties and competing consumer products . . .

Perhaps one of the potentially most important and long range effects of this bill resides in its attempt to assure better product reliability. The bill . . . attempts to organize the rules of the warranty game in such a fashion as to stimulate manufacturers, for competitive reasons, to produce more reliable products. This is accomplished using the rules of the marketplace by giving the consumer enough information and understanding about warranties so as to enable him to look to the warranty duration of a guaranteed product as an indicator of product reliability." [2]

As further illumination on the background and need for the warranty legislation, and for disclosure of written warranty terms, the Senate report accompanying S. 356,[3] the Senate version of the warranty legislation, stated:

For many years warranties have confused and misled the American consumer. A warranty is a complicated legal document whose full essence lies buried in myriads of reported legal decisions and in complicated State codes of commercial law. The consumer's understanding of what a warranty on a particular product means to him frequently does not coincide with the legal meaning.

This was not always the case. When the use of a warranty in conjunction with the sale of a product first became commonplace, it was typically a concept that the contracting parties understood and bargained for, usually at arms length. One could decide whether or not to purchase a product with a warranty and bargain for that warranty accordingly. Since then, the relative bargaining power of those contracting for the purchase of consumer products has changed radically. Today, most consumers have little understanding of the frequently complex legal implications of warranties on consumer products. Typically, a consumer today cannot bargain with consumer product manufacturers or suppliers to obtain a warranty or to adjust the terms of a warranty voluntarily offered. Since almost all consumer products sold today are typically done so with a contract of adhesion, there is no bargaining over contractual terms. S. 356 attempts to remedy some of the defects resulting from this gross inequality in bargaining power, and return the sense of fair play to the warranty field that has been lost through the years as the organizational structure of our society has evolved. The warranty provisions of S. 356 are not only designed to make warranties understandable to consumers, but to redress the ill effects resulting from the imbalance which presently exists in the relative bargaining power of consumers and suppliers of consumer products." [4]

Senator Magnuson's remarks in introducing S. 356 to the Senate also described the necessity for requiring disclosure of warranty terms and conditions:

". . . [W]arranties have for many years confused, misled, and frequently angered American consumers . . . Consumer anger is expected when purchasers of consumer products discover that their warranty may cover a 25-cent part but not the $100 labor charge or that there is full coverage on a piano so long as it is shipped at the purchaser's expense to the factory . . ."

". . . [T]he bill is designed to promote understanding. Far too frequently, there is a paucity of information supplied to the consumer about what in fact is offered him in that piece of paper proudly labeled 'warranty.' Many of the most important questions concerning the warranty are usually unanswered when there is some sort of product failure. Who should the consumer notify if his product stops working during the warranty period? What are his responsibilities after notification? How soon can he expect a fair replacement? Will repair or replacement cost him anything? There is a growing need to generate consumer understanding by clearly and conspicuously disclosing the terms and conditions of the warranty and by telling the consumer what to do if his guaranteed product becomes defective or malfunctions. Presently the consumer only learns of the extent of his warranty coverage when his guaranteed product becomes defective or malfunctions and he is told that the guarantee in question does not cover the part that failed, or that the retailer does not handle the manufacturer's repair work, or that the guarantee does not cover labor costs and so forth." [5]

The Act, among other things, provides disclosure standards for written consumer product warranties. The Proposed Rule on Warranty Disclosures was based upon the disclosure requirements set forth in Section 102(a) of the Act. The Act also requires the Commission to prescribe rules to assure the availability of warranty information prior to the actual

purchase. The Proposed Rule on Pre-Sale Availability of Written Warranty Terms was based on the authority given to the Commission in Section 102(b)(1)(A) of the Act.

(B) *FTC Guides Against Deceptive Advertising of Guarantees.* The items authorized for disclosure in written warranties in Section 102(a) of the Act are substantially the same as those which have been required by the Commission's *Guides Against Deceptive Advertising of Guarantees* (the "*Guides*"),[6] which codify the FTC case law concerning disclosure requirements for warranties. The *Guides*, applicable to both actual warranty documents and advertisements of warranties, enunciate the policy that in conjunction with any representation that a product is guaranteed there must be full and accurate disclosure of the terms, conditions, and limitations of such guarantee. As stated in the *Guides*, the representation must disclose the nature and extent of the guarantee, 16 CFR 239.1(a), the manner in which the guarantor will perform, 16 CFR 239.1(b), and the identity of the guarantor. The *Guides* also contain special provisions dealing with pro-rata adjustment of guarantees, "satisfaction or your money back" representations, lifetime guarantees, savings guarantees, and guarantees under which the guarantor does not or cannot perform. Since the Guides were promulgated in 1960, there have been well over 1,000 informal actions under them. The *Guides* have been cited in several cases and advisory opinions rendered by the Commission.[7]

With the proliferation of new products on the market and the increased use of product warranties as marketing devices in recent years, new problems in the area of warranties have arisen which necessitate a revision of the 1960 *Guides*. The steady influx of consumer complaint letters regarding warranties serves as further indication of the need to expand the *Guides* to encompass a wider range of warranty problems.[8]

(C) *House Interstate and Foreign Commerce Committee, Subcommittee on Commerce and Finance Staff Report On Consumer Product Warranties.* The staff of the House Interstate and Foreign Commerce Committee, Subcommittee on Commerce and Finance, at the direction of Chairman John E. Moss, published a study on September 17, 1974 concerning consumer product warranties currently being used in commerce.[9] The purpose of this study was to determine the effect of various government studies, including *The President's Task Force Report on Appliance Warranties and Service*[10] and the 1966 FTC investigation of automobile warranties, as well as voluntary action throughout the past decade on the quality of warranties for consumer products presently on the market. The staff of the House Commerce and Finance Subcommittee examined approximately 200 warranties from 51 American manufacturers. The products involved included household appliances, mobile homes, automobiles, television and radio receivers and stereo equipment. The Subcommittee staff found that no significant changes had occurred in warranty documents since 1969. According to the staff report:

"(A)ny actions taken on the part of manufacturers and trade associations to clean up these guarantees during the past five years appear to have had minimal results. These certificates, often marked 'WARRANTY' and printed on good quality paper with a fancy filigree border, in many cases serve primarily to limit obligations otherwise owed to the buyer as a matter of law. This is done by disclaimers and exemptions and by ambiguous phrases and terms. All too often the warranties shroud and effectively cover-up the obligations of the seller." [11]

The conclusion of Congressman Moss highlighted the need for action on warranties: "It is all but fraud when a guarantee declares in large print that the manufacturer is giving protection to the buyer and in the fine print attempts to take away common-law buyer protection." [12]

(D) *NBCCA and MACAP Reports.* The business community, too, has recognized the need to re-examine and reformulate current warranties. A report "Product Warranties: Business Guidelines to Meet Consumer Needs," written by the Sub-Council on Warranties and Guarantees of the National Business Council for Consumer Affairs [13] reflects the business community's own interest in straightforward warranty content. The Council, composed of over 100 business leaders, was established by former President Richard M. Nixon in 1971 for the purpose of advising the Federal government on consumer affairs. The Sub-Council's report represents an effort to assist the business community in re-examining its warranty policies and practices in the light of consumer expectations. It recommends action which businesses might take to improve warranty practices.

The Major Appliance Consumer Action Panel (MACAP), sponsored by the Association of Home Appliance Manufacturers (AHAM), the Gas Appliance Manufacturers Association (GAMA), and the National Retail Merchants Association (NRMA), has conducted two studies on warranties in the major appliance industry.[14] The first study, conducted in 1971–72, analysed seventy warranties voluntarily submitted by members of the industry. These were evaluated against recommended warranty guidelines drafted by the Panel.

A more extensive follow-up study, undertaken in 1973, elicited response from 106 companies. In the 1973 study, the Panel's evaluation criteria were drawn from the appliance industry's voluntary recommended guidelines, published by the three associations that sponsor MACAP. The 1973 study found that 75% of the appliance industry was in compliance with MACAP's guidelines. The same degree of compliance was cited in MACAP's 1971–72 study. Only 17 of the 106 warranties submitted fulfilled all the guidelines. The appliance industry's inability to meet even industry-established criteria for warranties, as evaluated by industry members, lends further support for the necessity for Commission action on warranty disclosure.

III. Disclosure of Written Consumer Product Warranty Terms and Conditions. The items required for disclosure by this Rule are material facts about product warranties, the non-disclosure of which constitutes a deceptive practice.

Numerous Commission decisions [15] have affirmed the principle that the failure to disclose material facts in circumstances where the effect is to deceive a substantial segment of the purchasing public is a violation of Section 5 of the Federal Trade Commission Act.[16]

In addition to these cases, the Commission's Octane Rule [17] and Light Bulb Labeling Rule [18] indicate that the failure to disclose facts which are essential to

V40251 DEC 31 75 XUM

the consumer's ability to make an informal purchasing decision is a deceptive practice. Likewise, the failure to disclose information about consumer product warranties which is material to the making of an intelligent and knowledgeable consumer choice is deceptive.

Under the "technical truth" rule,[19] a claim or representation which is literally true is found to be deceptive because of a failure to disclose material facts that qualify and explain the claim. The rationale behind this principle is that the deception stems from the false or misleading impression which is created in the mind of the consumer by virtue of the fact that the claim is removed from its proper context. The concern is with the truth as viewed by the consumer, rather than with the technical truth. As a further example of the application of this Rule, the Commission, in *Clinton Watch Co.*[20] held that it was a deceptive trade practice for the respondent watch manufacturer to advertise a "lifetime guarantee" without disclosing that there was a charge for warranty service. Likewise, the failure to disclose all conditions, limitations, and exclusions as to product warranties renders any affirmative claims about warranties deceptive. "To tell less than the whole truth is a well known method of deception."[21] By the same token, absolute silence on a material fact may be deceptive where the public assumes from this silence that a state of facts exists when, in fact, affirmative disclosure would reveal that these assumptions are unfounded. In such instances, the consumer's normal and reasonably foreseeable expectations are exploited, and a false or misleading impression is created.

The omission of any material terms or conditions from a warranty may prevent the intelligent use of the warranty as informational input into the consumer's purchasing decision, and may contribute to the generation of unrealistic consumer expectations about product reliability or efficacy. Thus, consumers may be induced to make purchases that they would not otherwise have made, with a resulting gap between anticipated and actual product and warranty performance.

Silence on the subject of product warranties and warranty terms can lead consumers to make erroneous assumptions and decisions. For example:

(1) In the absence of a disclosure as to the identity of the warrantor, the consumer might assume that the warrantor is the retailer, whereas in fact the warrantor might be the manufacturer.

(2) If a warrantor is silent as to which parts, components, characteristics or properties are covered by the warranty, the consumer might erroneously assume that warranty coverage is more extensive than it actually is.

(3) Silence as to the fact that limitations on implied warranties are unenforceable in certain states may erroneously lead consumers in such jurisdictions to assume that the warranty document states the full extent and limit of their warranty rights.

These examples illustrate some of the ways in which some warranty documents in their current form can have the capacity or tendency to mislead consumers. Affirmative disclosure of warranty terms will serve to eliminate deception by providing material facts, the absence of which could lead consumers into purchasing one product, instead of a competing item, on the basis of what is ostensibly a better, more extensive warranty, but which in fact provides more limited coverage and fails to fully disclose all of its conditions and limitations. A requirement of minimum uniformity in warranty disclosures should enable consumers to make valid and informed comparisons of warranties for similar products, and insofar as their purchasing decisions are influenced by such comparisons, better able to make educated buying choices.

IV. The Final Rule. 1. *§ 701.1 Definitions.* Except as discussed below, the definitions in the final Rule are those set forth in proposed Part 701. As the definitions used in Part 702 have been made to conform to the corresponding definitions in Part 701, the following discussion applies to both Parts.

The definitions given in the proposed Rule for "The Act", "written warranty", "implied warranty", "remedy", "supplier", and "binder" have not been modified. With the exception of the terms "The Act" and "binder", the definitions correspond to those used in the Act. No substantial comment was received as to the use of these definitions.

a. *"Consumer product", "consumer" and "seller".* Comments from Standard Oil Co. of Indiana, Mohasco Corporation and others concerning the definitions of "consumer product" and "consumer" stated that the proposed Rule did not deal adequately with the problem of industrial or commercial use of products normally used for personal, family, or household purposes.[22] Several comments including those of Toyota Motor Sales, and the National Sporting Goods Association, recommended that warranties extended to commercial or industrial users of consumer goods should be exempted from the requirements of the Act.[23] O. M. Scott and Sons claimed that the proposed Rule would have allowed industrial users to put consumer goods to commercial use and then to claim the benefits of warranty protection intended for consumers.[24]

For the purposes of these rules only, the definition of "consumer product" was amended by adding the following language: "Products which are purchased solely for commercial or industrial use are excluded solely for purposes of this Part". Paralleling this revision, the following underlined language was inserted in the definition of "consumer": "Consumer" means a buyer (other than for purposes of resale *or use in the ordinary course of the buyer's business* of any consumer product . . ."[25]

The definition of "seller" was revised as follows: " 'Seller' means any person who sells or offers for sale for purposes other than resale *or use in the ordinary course of the buyer's business* any consumer product."[26] This definition was changed to conform to the definition adopted for "consumer". It is not the Commission's intent to apply these rules to purely commercial users.

b. *"Warrantor".* Sears Roebuck and Co. ("Sears") suggested that the definition of "warrantor" be limited to those offering written warranties and not include those only obligated under implied warranties. As proposed, the definition of "warrantor" would have made a seller who did not offer a written warranty of his own, but who was obligated under an implied warranty by operation of law, a "warrantor," and thus subject to the duties of a "warrantor" as well as a "seller" under § 702.3.[27]

Exxon Co. and Engine Service Associates, Inc. commented on the addition of the language ". . . arising under state law . . . in connection with the sale by a supplier." in § 702.1(d).[28]

For the purposes of these rules, the definition of "warrantor" has been redrafted to include only persons who give or offer to give a written warranty. The Commission concluded that the Act's definition was overly broad for purposes of a rule concerning disclosures in written warranties.

c. *"On the face of the warranty."* Section 108 of the Act[29] and section 701.3(a)(7) of the final Rule require that any limitations on the duration of implied warranties be disclosed "on the face of the warranty."

Section 104 of the Act requires that "a warrantor" offering a full warranty ". . . may not exclude or limit consequential damages for breach of any written or implied warranty on such product, unless such exclusion or limitation conspicuously appears on the face of the warranty."[30]

The definition of "on the face of the warranty" was added to clarify the required location of disclosures under Sections 104(a)(3) and 108(b). The final Rule provides:

"(i) On the face of the warranty means—

(1) where the warranty is a single sheet with printing on both sides of the sheet, or where the warranty is comprised of more than one sheet, the sheet on which the warranty text begins;

(2) where the warranty is included as part of a longer document, such as a use and care manual, the page in such document on which the warranty text begins."

The intent of this definition is to place important warranty information on page one of the multipage warranty where it can easily be scanned by a reader reviewing the designation(s). The "face" of a one page, one sided document is evident.

2. *§ 701.3 Disclosure of Written warranty terms. Scope of the Rule. "Actually Costing the Consumer More than $15.00."* Section 701.3 of the Proposed Rule required a warrantor warranting a consumer product "actually costing the consumer more than $5.00" to make the required disclosures. The duties of the seller and the warrantor in proposed Part 702 were also triggered by the $5.00 threshold. Comments on the Record[31] suggested that the final rules raise the threshold from $5.00 to a higher level.[32]

Two principal reasons were given for this suggestion:

(1) the cost of complying with the requirements of Parts 701 and 702 would be prohibitive in relation to the selling price of the product;[33] and the extra cost would force manufacturers to eliminate their warranty programs on the inexpensive items, and thus, the Congressional purpose of expanding the availability of warranties would be frustrated; [34] and

(2) since consumers rarely read warranties on relatively inexpensive items, requiring compliance with Part 701, thus increasing the length of the warranty, would further discourage the consumer from reading warranties prior to sale.[35]

The Commission has concluded that applying these rules only to products actually costing the consumer more than $15.00 would be in the public interest. Although the rules have been modified to eliminate unnecessary burdens, they will impose a compliance obligation. Although reasonable, this obligation is not a costless endeavor. The Commission is persuaded that existing disclosure and availability practices pertaining to inexpensive products, while far from perfect, have not caused substantial harm to the public. The need for warranty information before and after a purchase is affected by the cost of the product involved. Section 102(3) of the Act recognizes this fact. Faced with the possibility that compliance with these rules may result in a decision by warrantors not to offer written warranties, the Commission has concluded that, for these products, some warranty information is likely to be better than none at all. This conclusion is buttressed by the recognition that Section 5 of the Federal Trade Commission Act and Section 110 of this Act provide ample authority to deal with unfairness and deception in the warranty practices associated with inexpensive products. The Commission will not hesitate to use this authority where the public interest requires action.

The remaining question is whether the Act gives the Commission the authority to raise the $5.00 figure. Section 102(e) provides:

> The provisions of this section apply only to warranties which pertain to consumer products actually costing the consumer more than $5.

In response to a request from the Commission' staff, the National Consumer Law Center submitted that the Commission does not have the authority to raise the $5 figure.[36]

Generally, courts have held that an agency has wide discretion in interpreting a statute and that any agency decision should be given great deference by a reviewing court.[37] *Red Lion Broadcasting v. FCC*, 395 U.S. 367, 381 (1969). The Court in *Red Lion* stated:

> . . . Agency construction of a statute should be followed unless there are compelling indications that it is wrong.

Moreover, deference to agency discretion is particularly high where the interpretation involves the first implementation of the statute, in other words, the "setting up of the machinery".

> When faced with a problem of statutory construction this court shows great deference to the interpretation given the statute by the officers or agency charged with its administration. . . . Particularly is this respect due when the administrative practice at stake 'involves a contemporaneous construction of a statute by the men charged with the responsibility of setting its machinery in motion, of making the parts work efficiently and smoothly while they are yet untried and new'. *Udall v. Tallman*, 380 U.S. 1, 16 (1964) citing in part *Power Reactor Co. v. Electricians*, 367 U.S. 396, 408 (1960)

The legislative intent and the public policy behind the Act make it clear that the Commission has the authority to raise the $5 figure.

There are two possible constructions of Section 102(e) of the Act. The first is that Congress intended affirmatively to *include* all consumer products costing $5 and above within the scope of the Act. The second is that Congress only wanted to *exclude* all consumer products below $5 from protection of the Act. In other words, paragraph (e) was intended to impose a limit on Commission authority to apply Section 102 to products below $5 but not to prohibit the Commission from exercising discretion to select a *higher* threshold. Under this interpretation, the products Congress intended to exclude would still be excluded by the higher figure set by the Commission.

The legislative history of the Act supports the latter interpretation. The most important evidence of the intent behind Section 102(e) is the Conference Committee Report. The Report section dealing with dollar limitations, speaks of "exclusion". The Report shows that Congress was concerned with what was excluded rather than with what was included.[38]

[37] See also *In the Matter of Hollow Tree Lumber Company*, 91 N.L.R.B. 635 (1950). In that case the Board noted its long standing practice not to exercise its jurisdiction to the fullest extent possible under the authority delegated to it by Congress since such practice would better effectuate the purposes of their Act. The Board required that a certain dollar level be reached before they would invoke jurisdiction. Similarly here, the Commission would require a certain dollar level to be reached ($15) for implementation of the Act.

[38] H.R. Rep. No. 1509, 93d Cong. 2d Sess. 24 (1974):

"3. Dollar Limitations

Under the Senate bill, the labeling and designation provisions applied only to consumer products actually costing $5 or more. Any warrantor who was selling a consumer product costing less than $5 who used the full warranty designation would have been

Footnote continued on next page.

V40 N251 DEC 31 75 XUM

Consequential use of the word "only" in section 102(e) indicates an intention to *exclude* those items under $5. If the Congress had opted for an "inclusion" approach it is likely that the statute would have read, "this section *shall* apply to *all* products actually costing more than $5."

The $15 figure was chosen in order to gain the benefits of raising the $5 figure outlined previously, without losing coverage of any significant consumer products.

Guenther Baumgart, on behalf of the Association of Home Applicance Manufacturers, pointed out that a $15 figure would still bring almost all portable appliances within the purview of the Act, stating:

"Assuming for a moment that the threshold limit was raised to $15.00 (our recommendation), we feel that it would encourage the protection of the consumer rather than removing such protection. At a $15.00 threshold limit all of the major portable appliances such as an automatic drip coffeemaker, rotisserie, electric skillet would still come within the purview of the Act. The portable appliances excluded from the Act would be such marginal items as a corn popper or bun warmer . . . By raising the threshold limit manufacturers would be encouraged to continue warranties on present marginal items."[38]

Accordingly, Parts 701 and 702 have been amended, raising the threshold amount which triggers the duties under those parts, to $15.00.

"In a single document". The proposed Rule required that the items of warranty information be disclosed "in a single document." Many comments by warrantors were received, citing the potential costs and other difficulties of a "single document" requirement. Westinghouse Electric Corporation, National Electrical Manufacturers Association ("NEMA"), and others said that it was normal for warranties to be printed on the front, back, or middle page of a use and care manual,[39] especially in the appliance industry.[40] The Waltham Watch Company and the National Association of Chain Drug Stores argued that the reprinting of such manuals, to conform with the single document rule, would be unreasonably costly.[41] NEMA also suggested that imprinting the warranty directly on the product[42] might not conform to a "single document" rule.

The Air Conditioning and Refrigeration Institute argued that if the warranty were required to be separate from the manual of operating instructions, it would be more likely to get lost, whereas a manual, which could contain the warranty, would more likely be retained and used by the consumer.[43]

Standard Oil suggested that, in some instances, it would be physically impossible to put all the specifications and standards referenced in the warranty in a single document.[44] They estimated that literal compliance with "the single document" rule would add approximately $192,500 in annual costs.[45]

These comments reflect a misapprehension of the purpose of the single document language". "Single" does not equal "separate". The "single document" requirement does not preclude printing the warranty in a use and care manual, or directly on the product itself. It does require that all terms and conditions be presented in (at least) one location, as a coherent, easily assimilated statement.

PARTIES WHO CAN ENFORCE

701.3(a)(1) The identity of the party or parties to whom the written warranty is extended, if the enforceability of the written warranty is limited to the original consumer purchaser or is otherwise limited to persons other than every consumer owner during the term of the warranty;

Section 102(a)(2) of the Act authorizes the disclosure of "the identity of the party or parties to whom the warranty is extended." MACAP included a similar requirement in its 1971 guidelines for evaluating warranties, i.e., "a warranty should set forth to whom the warranty is extended." This guideline was dropped in the 1973 study. MACAP reasoned that the failure to state the "warrantee" would mean that any owner was covered by the subsequent warranty provisions, and therefore, that the warranty which does not make such a disclosure, while not meeting the guideline, would offer the broadest possible coverage with regard to this factor.[46]

The proposed Rule required the disclosure of "the identity of the party or parties to whom the warranty is extended, including, where applicable, any limitation on its enforceability by any party other than the first purchaser at retail." Comments submitted by Montgomery Ward, Sears, Proctor Silex and others followed the reasoning of the 1973 MACAP study; i.e., that the consumer would (properly) infer from the absence of words of limitation that the warranty would extend to anyone in possession during the warranty period.[47] The Carpet and Rug Institute (CRI) the Boating Industry Association (BIA), the National Retail Merchants Association (NRMA) and others argued that the disclosure should be required only when the warranty does not extend to the original purchaser[48] and all transferees during the period of the warranty.[49] NRMA also suggested that this paragraph refer only to the *written* warranty, to clarify that the warranty need not serve as a "treatise on privity."[50]

The National Association of Photographic Manufacturers recommended that the language "first purchaser at retail," used in the proposed Rule, be altered to read "original consumer purchaser", since the word "consumer" is clearly defined in § 701, and since the avoidance of the words "at retail" would prevent misinterpretations where the warranted consumer product was sold in wholesale or discount stores at prices below suggested list price.[51]

The final Rule incorporates the three recommendations discussed above. The Commission has concluded that the changes reflected in the final Rule would be consistent with consumer understanding and would simplify warranty language.

---

subject to the full requirements in the bill. The House amendment *excluded* from the disclosure requirements of the bill products costing less than $5; it *excluded* from the designation requirements of the bill products costing less than $10. The minimum federal standard applicable to full warranties was not applicable to products costing less than $10, even in situations where warrantors of products costing less than $10, used the full warranty designation.

The conference substitute *excludes* from the disclosure requirements of the bill warranties on consumer products actually costing less than $5 and *excludes* from the designation requirements of the bill warranties on consumer products actually costing less than $10. However, the conference substitute provides that any warrantor giving a warranty characterized as a full warranty must comply with the minimum Federal standards set forth in section 104, no matter what the actual cost of the consumer product to which the warranty applies." WARRANTY COVERAGE

701.3(a)(2) A clear description and identification of products, or parts, or characteristics, or components or properties covered by and where necessary for clarification, excluded from the warranty;

Sections 102(a)(3) and (12) of the Act provide for the disclosure of "the product or parts covered" and "the characteristics or properties of the products or parts thereof, that are not covered by the warranty". The MACAP guidelines similarly require "the product or specific parts covered and against what".[52] The NBCCA report states that "written warranties should specify the extent of parts coverage."[53]

The *Guides* require that:

"In general, any guarantee in advertising shall clearly and conspicuously disclose—

(a) The nature and extent of the guarantee. This includes disclosure of (1) What product or part of the product is guaranteed, (2) What characteristics or properties of the designated product or part thereof are covered by, or excluded from, the guarantee . . ."[54]

A long line of FTC orders have required the disclosure of "the nature and extent of the guarantee and the manner in which the guarantor will perform."[55] Although none of these orders delineates the meaning of "the nature and extent of the guarantee" or "the manner in which the guarantor will perform," the *Guides* establish that this general language encompasses the characteristics or properties covered by or excluded from the guarantee, the duration of the guarantee, the guarantor's manner of performance, the product or part guaranteed, and the purchaser's obligations. Thus, there is support for including this paragraph on the basis of past Commission case law.

A consumer letter, illustrative of the problems which this paragraph is designed to solve, complained that the consumer's automobile warranty explicitly did not extend to "service items", but did not enumerate those items which were considered "service items" by the manufacturer; as a result, it did "not indicate that [the automobile manufacturer] is using this term in an extremely broad and uncommon sense so as to exclude the myriad of items which would be included under other warranties using the same terminology".[56]

The proposed Rule required the disclosure of:

a clear description and identification of parts, characteristics, components and properties covered by, and excluded from the warranty.

Baldwin Piano, Sunbeam Corp. and many other participants found the words "characteristics" and properties" vague and urged deletion.[57] The final Rule amends the phrase containing these terms to read *"products*, or parts, or characteristics, or components or properties." The disjunctive language makes it ". . . clear that a warranty covering all defects in a product (which is a characteristic) must not also list every part, component, and property of the product covered. A reference to all defects in a product should include defects in all parts without a statement to that effect."[58] The addition of the word "products" uses the statutory language set forth in § 102(a)(3) of the Act,[59] as recommended by Ross, Hardies, O'Keefe, Babcock & Parsons ("Ross, Hardies"), SCM Corp., and Thermador.[60]

Warren Tool Corp., MACAP and NRMA and others suggested that warrantors be required to disclose either the items covered or those not covered by the warranty.[61] Gambles stated:

(T)he requirement could become rather cumbersome if the warrantor had to identify all the parts of a product not covered by the warranty if the warranty was limited to only one component or part of the product."[62]

"An example utilizing a major appliance can best show the problems which this provision would pose. Assume a product with two hundred parts carries a full one year warranty and thereafter a limited four year warranty on its major component. As drafted the regulation would require a detailed listing of 400 parts in the warranty text.

"For the full one year warranty period there would have to be a listing of each and every part contained in the product and an indication that those parts are covered by the warranty.

"The text of a limited portion of the warranty would have to indicate that the major component is covered and contain a listing of every other part as being excluded from that portion of the warranty. This is clearly unnecessary and unworkable and would only tend to confuse rather than enlighten even those consumers who would try to read and understand it."[63]

Toyota Motor Sales, the National Paint and Coatings Association, and the Southern Furniture Manufacturers Association (SFMA) stated that if a warrantor lists those items which are covered, those which are not listed should implicitly be excluded.[64]

The final Rule is similar to proposals submitted by Sears and NRMA.[65] Under this language the items not covered by the warranty need only be disclosed if the disclosure of what *is* covered is unclear, standing alone.

For example, a common warranty is one which covers all defects in material and workmanship. It should not be necessary to also include a list of all the possible causes of malfunctions of the product which would not be defects, e.g., misuse, abuse, externally caused casualties. . . . However, . . . if some part of the product covered by such a warranty were not covered as to a defect in that part, a clear statement that that part is excluded should be included in the warranty, e.g., "This warranty covers defects in material or workmanship in this product (except in light bulbs)." Without the statement of exclusion in such a warranty, it would appear to cover more than it does.[66]

For ease of communication to consumers, it should not be necessary in all cases to enumerate every covered part if the warranty covers the entire product with the exception of one or two minor parts. In such instances, the following language would meet the requirements of § 701.3(a)(2). "XYZ Company warrants your [----------], except the [----------]."[67]

The Association of Home Appliance Manufacturers (AHAM), in their written submission, stated:

Practice in the appliance and other industries is to warrant a product against manufacturing defects and to list the exclusions, such as light bulbs in a refrigerator or damage from misuse, fire, flood and the like.[68]

The Rule is intended to permit this practice. Conversely, if the warranty covers only a few parts, or characteristics, the warranty might state: "This product is not warranted in any way except against rust" or "This warranty covers the drive shaft *only*." A disclosure of the exclusions from the warranty accom-

panied by a statement such as "all other [*parts*] are covered by this warranty" [69] would also satisfy the requirements of this paragraph.

WARRANTY PERFORMANCE

701.3(a)(3)

A statement of what the warrantor will do in the event of a defect, malfunction or failure to conform with the written warranty, including the items or services the warrantor will pay for or provide, and, where necessary for clarification, those which the warrantor will not pay for or provide;

Section 102(a)(4) of the Act authorizes the disclosure of "a statement of what the warrantor will do in the event of a defect, malfunction, or failure to conform with such written warranty—at whose expense—and for what period of time". The MACAP guidelines require the warrantor to state: "In case of a claim: Exactly what the warrantor will do and at whose expense." [70]

The *Guides* require the disclosure of:

The manner in which the guarantor will perform. This consists primarily of a statement of exactly what the guarantor undertakes to do under the guarantee. Examples of this would be repair, replacement, refund. If the guarantor or the person receiving the guarantee has an option as to what may satisfy the guarantee, this should be set out.[71]

Past FTC warranty orders have consistently required the disclosure of the manner in which the warrantor will perform. (See the discussion and citations in the explanation of section 701.3(a)(2), *supra*.)

The Commission has received a number of letters from consumers indicating the need for clarification in warranty documents as to what items or services the warrantor will and will not pay for or provide in the event of a failure defect or malfunction in the product.[72]

The proposed Rule required the disclosure of

a statement of what the warrantor will do to remedy a defect or malfunction in the product, or failure to conform with the written warranty, including but not limited to the items or services the warrantor will and will not pay for or provide.

Many industry comments were received to the effect that it would be unnecessarily verbose to require a statement reciting what the warrantor will not do in a warranty which clearly states what the warrantor will do.[73] Armstrong Cork Co. argued that compliance with this paragraph would unduly lengthen warranties, and that "a delineation of each conceivable item or service which will not be paid or provided would tax even the wildest imagination."[74]

The language adopted in this paragraph of the final Rule parallels that in section 701.3(a)(2), discussed *supra*. As suggested by Sears, a warrantor need only state what he will not do if the disclosure of what he will do, standing alone, is unclear.[75]

For example, if a warranty provides that the product will be replaced at no charge if the product is returned to the store, it should not be necessary to also recite that the product will not be repaired, or that the warrantor will not pay for travel expenses. The affirmative statement in such a warranty clearly states what the warrantor will do, and there is no implication that anything else will be done.[76]

The requirement of this sub-part could be satisfied by stating, for example: "We will pay for parts and service *only*;" or by disclosing the services which the warrantor will not perform, accompanied by a statement such as: "You must pay all other expenses incurred in obtaining repairs." [77]

A number of industry representatives objected to the use of the word "remedy" in the proposed Rule.[78] The language used in Section 102(a)(4) of the Act [79] was preferred. A warrantor is not required to "remedy" a product unless the applicable warranty is designated as a "full (statement of duration) warranty." The final Rule substitutes the statutory language, "in the event of" for the word "remedy."

WARRANTY DURATION

701.3(a)(4)

The point in time or event on which the warranty term commences, if different from the purchase date, and the time period or other measurement of warranty duration.

Section 102(a)(4) of the Act calls for the disclosure of "a statement of what the warrantor will do in the event of a defect, malfunction or failure to conform with such written warranty . . . and for what period of time." MACAP's guideline, requiring "the specific time for which the product or parts are covered" [80] was fulfilled by 95% of the warranties submitted in the 1973 study. The *Guides*, too, require the disclosure of "what is the duration of the guarantee".[81] The NBCCA report states that "written warranties should specify the specific duration of the warranty." [82]

Paragraph 701.3(a)(4) also requires the warrantor to specify the point in time (if other than the purchase date) when the warranty term begins. This is to ensure that the purchaser is informed as to whether the warranty terms starts to run immediately upon manufacture, purchase, delivery, or the date on which the product is first used. Several consumer letters illustrate the need for the disclosures required by this paragraph.[83]

The proposed Rule required the disclosure of:

The point in time or event on which the warranty term commences, and the time period or other measurements of duration for which the product and/or its parts, characteristics, components, or properties are warranted.

Montgomery Ward, Timex, and NRMA took the position that the consumer's normal expectation is that a warranty takes effect on the date of purchase. Therefore, the warrantor should be required to make a disclosure about the beginning of the warranty only when this is not the case.[84] The final Rule incorporates the language submitted by Montgomery Ward,[85] and requires that the commencement date of the warranty need only be disclosed "if different from the purchase date."

CONSUMER DUTIES

701.3(a)(5)

A step-by-step explanation of the procedure which the consumer should follow in order to obtain performance of any warranty obligation, including the persons or class of persons authorized to perform warranty obligation(s), This includes the name(s) of the warrantor(s), together with: the mailing address(es) of the warrantor(s), and/or the name or title and the address of any employee or department of the warrantor responsible for the performance of warrantor obligations, and/or a telephone number which consumers may use without charge to obtain information on warranty performance;

[85] "The point in time or event on which the warranty terms commences, if different from the purchase date, and the time period or other measurements of duration for which the product and/or its parts, characteristics, components or properties are warranted." R 1-3-2, 490 Montgomery Ward & Co., Inc.

Section 102(a)(7) of the Act authorizes the disclosure of "the step-by-step procedure which the consumer should take in order to obtain performance of any obligation under the warranty, including the identification of any class of persons authorized to perform the obligations set forth in the warranty."

MACAP found that its analogous requirement, i.e., that the warranty state "in case of a claim: exactly what the consumer must do and at whose expense" [86] was the guideline most frequently not fulfilled in the 1973 study. According to MACAP, this guideline "requires that a warranty describe the steps the appliance owner should follow to obtain in-warranty service".[87] The NBCCA report states that "written warranties should specify "the obligations of the owner." [88]

The *Guides* require the disclosure of "what, if anything, anyone claiming under the guarantee must do before the guarantor will fulfill his obligation under the guarantee, such as return of the product and payment of service or labor charge." [89] The fact that not all warranties currently fully disclose all the requirements which must be fulfilled by consumers in order to obtain warranty performance is illustrated by several consumer complaints.[90]

The disclosures required by paragraph 701.3(a)(5) are intended to inform the consumer of the full extent of his or her obligations under the warranty, and to eliminate confusion as to the necessary steps which he or she must take in order to get warranty performance.

This sub-paragraph of this section also requires that the warrantor apprise the consumer of the persons or organizations authorized to perform warranty service. This provision conforms with recommendations in the NBCCA report that "written warranties should specify where warranty service can be obtained." [91]

The proposed Rule required the disclosure of:

A step-by-step explanation of the procedure which the purchaser should follow in order to obtain performance of any warranty obligation, including the persons or organizations authorized to perform warranty service, or a telephone number which consumers may use without charge from which such information may be obtained. This information shall include the name and address of any corporate officer or department responsible for the resolution of such matters, and/or any telephone number which consumers may use without charge for such purposes;

Many industry comments were received which stated that the number of service outlets or representatives were far too numerous to list in the warranty.[92] AHAM, in its written sunbmission stated that

(a) literal interpretation of the requirement . . . would require the listing of hundreds or thousands of persons or organizations in a warranty.[93]

Also, independent or other service outlets used by a warrantor change from time to time.[94] Thus, any listing of such outlets compiled when a product is manufactured and shipped could be out-of-date by the time the product is displayed or sold. AHAM noted that:

Frustration would inevitably result should a consumer read in a written warranty that the ABC Service Center will provide warranty service, only to find that ABC is no longer in business, through no fault of the warrantor, when a call for service is made.[95]

McGraw Edison Co., Sunbeam, Amana, and others claimed that the alternative of maintaining a telephone number which consumers can use without charge, from which such information could be obtained, would be too costly.[96] Many other negative comments from warrantors concerning the use of toll-free lines are included in the record.[97]

EIA stated that:

(P)ersons calling on such a line could not be expected to confine their inquiries to obtaining names of repairmen. Persons on the receiving end of such telephone lines would necessarily have to be well informed and skilled in handling complaints. . . . (T)here . . . would be insufficient profit margin of a toll free telephone service. . . . In many cases, the manufacturers have no control over, and in fact may not even know who is authorized to sell and repair their products.[98]

Nixon, Hargrave, Devans and Doyle, ("Nixon, Hargrave"), Colt Industries, and others suggested use of the language used in § 102(a)(7) of the Act, "person or class of persons." [99] The Air Conditioning and Refrigeration Institute and SCM recommended that the language "*types* of organizations" [100] be adopted.

The final Rule requires the disclosure of the "persons or *class of persons* authorized to perform warranty obligations". The final Rule would permit a warrantor to use language such as "any authorized [----------] dealer," [101] or "contact your local dealer for warranty service," [102] provided that consumers have ready access to a listing of authorized facilities. This may be accomplished by supplying a listing with the product, providing a source for such information in the warranty, or where a national service network is provided, through reference to a telephone directory.

Further industry comments received on the proposed Rule stated that the warrantor should not be required to include the name and address of a corporate officer responsible for the resolution of warranty complaints. Union Carbide Corporation suggested that this be deleted or at least changed to permit the name of any person in the warrantor's employ, and not just a corporate officer,[103] or any appropriate department.[104] The Gas Appliance Manufacturers Association (GAMA) argued that if disclosure of a *name* of a corporate officer were required, personnel shifts would necessitate the reprinting of the warranty.[105]

NRMA submitted that the name and address or the phone number of a warranty "referee" should only be required if such a disclosure is applicable to the warrantor.[106] GAMA and NEMA commented that the phrase "resolution of"

should be deleted since it implied that there was a dispute, which would not be the case when the warranty was extended.[107]

The final Rule deletes the words "resolution of such matters" and substitutes "the performance of warranty obligations." It provides three alternative means for the disclosure of how the consumer may contact the warrantor.

Armstrong Cork, Sears, NEMA, and Nixon, Hargrave stated that paragraph (a) of the proposed Rule, which required the disclosure of the "full name(s) and address(es) of the warrantor," overlapped with paragraph (h).[108] The substance of former paragraph (a) was incorporated as one of the three alternatives in section 701.3(a)(5) of the final Rule. The purpose of this disclosure is to provide an address which the consumer can use to communicate with the warrantor concerning warranty claims.[109] Such information need not be provided twice in the same warranty.

Section 102(a)(1) of the Act authorizes the Commission to require the disclosure of "the clear identification of the names and addresses of the warrantors". The MACAP guidelines similarly require the inclusion of "the name and address of the warrantor, on the same page as the body of the warranty."[110] The NBCCA report states that "written warranties should specify the identity of the warrantor."[111]

The *Guides* require the disclosure of "the identity of the guarantor," stating that:

> the identity of the guarantor should be clearly revealed in all advertising, as well as in any documents evidencing the guarantee. Confusion of purchasers often occurs when it is not clear whether the manufacturer or the retailer is the guarantor.[112]

A consumer complaint, indicating that the absence of the warrantor's address has been a problem, related that neither the warranty nor the package for a mattress cover, nor the cover itself disclosed the address of the warrantor. Thus, when the cover ripped, the consumer was unable to locate the warrantor so as to secure performance on the five-year warranty.[113] Another consumer stated, after having suffered considerable delay in having a hot water tank repaired,

> I honestly believe some of this confusion could have been eliminated if my warranty had spelled out exactly what department of the company warranty requests should be forwarded to. Maybe the FTC should require such information be included in warranty statements.[114]

The final Rule permits the warrantor to include such a department or an employee of the warrantor responsible for the performance of warranty obligations. The "corporate officer" language was dropped, in accordance with the comments discussed previously. It is not necessary to identify an individual in order to provide the consumer with proper access for obtaining warranty performance.

§ 701.3(a)(5) of the Rule also permits the warrantor to maintain a telephone number which consumers may use without charge. Use of such a device is not required. The purpose of the last sentence in section 701.3(a)(5) is to provide the consumer with a means for contacting the warrantor, and the use of any or all of the three alternatives set forth will satisfy this requirement.

Finally, it should be noted that the word "purchaser" has been replaced by the word "consumer," since the Rules define the word "consumer," and since the person invoking the warranty need not in fact be a "purchaser" of the product.[115]

INFORMAL DISPUTE SETTLEMENT MECHANISMS

701.3(a)(6)

Information respecting the availability of any informal dispute settlement mechanism elected by the warrantor in compliance with Part 703 of this subchapter;

Section 102(a)(8) of the Act authorizes the inclusion in warranties of "information respecting the availability of any informal dispute settlement procedure offered by the warrantor . . .". The Senate Report provides the rationale behind the analogous provision in the Senate version of the bill:

> . . . [T]he consumer should be notified of his ability to seek redress through . . . any informal dispute settlement mechanisms that the warrantor may offer. Furthermore, if the warrantor is required to inform the consumer of his rights in the event the warrantor fails to perform, the Committee believes that the warrantor will have greater incentive to perform as promised.[116]

As the NBCCA report states:

> [T]he consumer's need for warranty information continues and is more pronounced after the product has been purchased . . . some companies have begun to encourage consumers to make toll-free calls to a centralized location . . . In other cases, metropolitan consumer response offices have been established to serve these needs. However organized, some convenient means of obtaining information on the product . . . warranty should be available to consumers after sale.[117]

The proposed Rule required the disclosure of "(i)nformation respecting the availability of any informal dispute settlement procedure as specified in Part 703 of this subchapter." Mohasco Corp. and CRI stated that such information should be required only where such a procedure is offered or required by the warrantor, and not wherever a procedure is merely "available," regardless of whether or not the warrantor offers or requires it.[118] In order to clarify the intent of this section the language of this provision has been revised to read "mechanism elected by the warrantor in compliance with Part 703 of this subchapter."

LIMITATION ON IMPLIED WARRANTIES AND REMEDIES

701.3(a)(7)

Any limitations on the duration of implied warranties, disclosed on the face of the warranty as provided in Section 108 of the Act, accompanied by the following statement:

"Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.".

701.3(a)(8)

Any exclusions of or limitations on relief such as incidental or consequential damages, accompanied by the following statement, which may be combined with the statement required in sub-paragraph (7) above:

"Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you."

Section 102(a)(6) of the Act provides for the disclosure of "exceptions and exclusions from the terms of the warranty." The MACAP guidelines require disclosure of "exceptions, disclaimers or exclusions with the same prominence as the affirmative statements in the body of the warranty."[119]

The Uniform Commercial Code, ("U.C.C.") which, with variations, is the law in the District of Columbia and in every state except Louisiana, provides, at §§ 2-314 and 2-315, that in a contract for sale certain warranties are implied by law. The implied warranties of merchantability (which encompasses the concept that goods must be fit for the ordinary purpose for which they are used) and fitness for a particular purpose (which may arise when a seller has reason to know the particular purpose for which the goods are required and that the buyer is relying on the seller's skill or judgment to furnish suitable goods) in certain circumstances may provide a buyer with broader protection and rights than a written warranty document.

Although the U.C.C. provides a procedure whereby such implied warranties may be disclaimed and excluded, several states have prohibited disclaimers or exclusions and have made them legally unenforceable.[120] The use of disclaimers or exclusions of implied warranties and limitations and exclusions of remedies under implied warranties in any state where such a clause or clauses are enforceable as written has the clear capacity and tendency to deceive purchasers in those states as to the true nature of their warranty rights and remedies. A consumer may reasonably be expected to believe that a warranty document states the full extent and limit of his warranty rights and remedies and rely on that belief. This reliance tends to eliminate attempts to determine whether such a written warranty states limitations, disclaimers or exclusions fully or correctly.

Paragraph (k)(1) of the proposed Rule provided that:

> "Where any such modification, limitation, or exclusion is unenforceable under applicable State law, that fact shall be disclosed in a manner which specifically names such jurisdictions."

This proposal elicited substantial industry opposition. Many warrantors claimed that this requirement was unduly onerous in that it would necessitate research of the case law in every state in which a product is offered for sale, often in all fifty states.[121] Many industry representatives noted that a constant monitoring and review of state law would be required in order to keep abreast of any modifications.[122] Warranties would have to be revised continuously and reprinted because of changes in state law.[123] Armstrong Cork argued that because state law is constantly changing, the warranty could "be incorrect by intervention of judicial act before the ink was dry. . . ."[124] North American Philips Corp. stated that this could cause ". . . confusion to the consumer because it would be impossible to avoid having different warranty cards being distributed at the same time because of the products that would be in the distribution pipeline whenever a change occurred."[125]

Another line of criticism challenged the Rule's imposition on warrantors of the duty to interpret uncertain unsettled state law.[126] Standard Oil of California stated that this could lead to "public confusion resulting from inconsistent and/or inaccurate monitoring and reporting of state law by various warrantors."[127] Warren Tool, the Electronic Industries Association (EIA), and others objected that this would require warrantors to advise consumers as to complex issues of law.[128]

The Association of Auto & Truck Recyclers (NATWA) argued that the Rule, "in effect, precludes many warrantors from modifying, limiting or excluding implied warranties or consequential damages, although the Act itself specifically allows these types of modifications, limitations or exclusions."[129] Others stated that compliance with this requirement would unduly lengthen warranties.[130]

The proposed Rule also required disclosure of "all modifications and limitations on implied warranties, and all exclusions of or limitations on relief such as incidental or consequential damages." Nixon, Hargrave noted that this language appeared to permit the modification of implied warranties,[131] prohibited by Section 108(a) of the Act.[132]

Paragraph (k)(2) of the proposed Rule required that "any limitation on or exclusion of consequential damages for breach of any written or implied warranty on the consumer product shall be disclosed on the face of the warranty, as provided in § 104 of the Act."

Mohasco, Briggs & Stratton Corp., Chrysler Corp., Nixon, Hargrave, and CRI argued that the Commission ignored the intention of Congress by imposing the requirement of stating exclusions or limitations on consequential damages on the face of the warranty on "limited" warranties.[133] The Act requires only that such disclosure be made on the face of "full" warranties.[133a]

In light of the substantial criticisms of paragraph (k) of the proposed Rule, the Commission has deleted this paragraph, and has substituted paragraphs 701.3(a)(7) and (8). The final Rule does not require that warrantors specifically name the jurisdictions in which limitations or exclusions are unenforceable under state law. It does require that the consumer be alerted to the possible inapplicability of limitations on the duration of implied warranties or exclusions or limitations of incidental or consequential damages in his or her jurisdiction by the use of brief, simple disclosures. These may be combined, if both are applicable, and may also be combined with the statement required by § 701.3(a)(9), discussed *infra*. These disclosures will not serve to unduly lengthen warranty statements and will put consumers on notice as to the possible inapplicability of paragraphs concerning limitations and exclusions in the warranty. The language used in paragraphs (a)(7) and (8) is

Section 104(a)(3).

V40251 DEC 31 75 XUM

similar to several proposals made on the record.[134]

The language "all modifications and limitations on implied warranties" has been changed to "any limitations on the duration of implied warranties," to eliminate any conflict with the requirements of Section 108.

The requirement that limitations on or exclusions of consequential damages be disclosed as provided in Section 104 of the Act has been deleted. Full warranties must of course comply with the applicable requirements of the Act.

Finally, the proposed Rule required that:

> Any modification, limitation, or exclusion, or any statement that such modification, limitation, or exclusion is unenforceable under applicable State law shall be set apart from the balance of the warranty by the use of type size larger than the body copy of the warranty, or by the use of all capital letters, or by underlining.

Although this paragraph has been deleted from the final Rule, such deletion should not be viewed as a tacit statement on the part of the Commission that limitations are not to be made conspicuously. Rather, in this instance, the Commission recognizes that some flexibility in making such disclosures may be necessary. The failure to make disclaimers conspicuous, as required by § 2-316 of the U.C.C., renders such disclaimers ineffective. The use of underlining, capital letters, or larger type size are examples of possible means of satisfying the statutory mandate of prominence and conspicuousness.[135]

DISCLOSURE OF THE WARRANTY RIGHTS

701.3(a)(9)

A statement in the following language:

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Section 102(a)(9) of the Act authorizes the Commission to require the inclusion of a "brief, general description of the legal remedies available to the consumer."

The full and accurate disclosure of warranty terms is a major element in the warranty enforcement program created by the Act. The Act is designed to give individuals the information they need to enforce their warranty rights. To do this, the individual must have at least a threshold understanding of the legal significance of the warranty document.

If attempts by consumers to assert their warranty rights are to be made easier and encouraged, as Congress intended, written warranties must disclose information about the buyer's legal rights and remedies. As the record amply demonstrates, there is substantial room for improvement in the public's general understanding of buyer's rights and remedies. The Act recognizes the written warranty as the logical and efficient means of accomplishing this result. The warranty is, in the end, simply part of the agreement between buyer and seller. It is wholly proper that the terms and significance of the agreement be understood by the buyer as well as the seller. The free market economy depends upon adequately informed buyers to stimulate competition.

The proposed rule sought to achieve the goals described above without unduly lengthening the written warranty. The proposed rule required the disclosure of one of the statements below:

> This warranty gives you specific legal rights. You also have implied warranty rights. In the event of problem with warranty service or performance, you may be able to go to a small claims court, a State court, or a Federal district court.
>
> or
>
> This warranty gives you specific legal rights. You also have implied warranty rights, including an implied warranty of merchantability which means that your product must be fit for the ordinary purposes for which such goods are used. In the event of a problem with warrarnty service or performance, you may be able to go to a small claims court, a State court, or a Federal district court.

The proposed disclosures elicited substantial comment, both adverse and favorable. While some voiced a basic disagreement with the Act's basic goal of informing buyers of their rights and remedies, several lines of comment developed on the record. Westinghouse, Sunbeam, Shell Oil, Walker Manufacturing Co. and others expressed the concern that consumers would be encouraged to go to court, rather than trying the normal remedies outlined in the warranty, or dealing directly with the warrantor initially.[136] Sears argued that the proposed language "could mislead some consumers into the belief that they *must* resort to the courts to obtain any performance under the warranty." [137] Husky Oil Co., Guren, Merrit, Sogg & Cohen ("Guren, Merritt"), and others felt that inclusion of such a provision would encourage litigation[138] in already congested courts.[139] Lear Siegler, Inc. and National Association of Photographic Manufacturers argued that the disclosures were in conflict with the legislative intent of the Act to encourage informal settlements.[140]

North American Philips Corp., AHAM, and others claimed that the proposed statements would serve to confuse rather than inform consumers.[141] SCM Corp. stated:

> The implication of both versions of the specified statement is that judicial remedies are readily available without cost or difficulty to a consumer who is dissatisfied with warranty performance. The fact that jurisdictional requirements may bar an action in federal court, that federal or state court procedure must be followed, that an attorney may be necessary, and the fact that there may be costs to the consumer which may or may not be reimbursable at the end of the proceeding make the inclusion of the proposed statements unreasonable and misleading to consumers.[142]

AHAM, in its written submission, stated:

> Encouraged by a written warranty to seek redress in court, unable in many instances to find the proper court, and finding in most instances that the assistance of a lawyer is necessary, a dissatisfied purchaser would be rewarded only with disillusionment and frustration. Unfortunately, the frustration and disillusionment and resulting animosity would be directed against the warrantor. . . .[143]

General Mills Fun Group and Eddie Bauer commented that insertion of such statements would subject them to a barrage of questions from consumers as to their legal rights, and that answering such inquiries would increase their operating costs.[144] Westinghouse, Black and Decker, Sears, EIA and others expressed the view that these statements were appropriate for a consumer education campaign, but not for disclosure in warranties themselves.[145] Westbend Co., among others, argued that the nuances of implied warranties and legal rights could not adequately be explained to consumers in just five or six lines.[146] Zenith Radio

Corp., Nutone Division, and others claimed that even the inclusion of the existing statements would unduly lengthen warranties.[147]

The need for some form of disclosure as to the consumer's legal rights is documented in the record.[148] Hershel Elkins, California Deputy Attorney General, in his testimony stated:

> . . . (T)he experience we have have indicates that consumers, if they have an occasion to look at their warranty . . . believe that that restricts their rights to go further. In fact, we have had individuals who have gone back to the sellers, and the sellers have said 'Look; take a look at your warranty. It says right here that this is the only protection you have.' And consumers often do not realize that they have other theories. They have implied warranty. There is also negligence even without warranties. There are all sorts of breach of contract theories which might be utilized; and that is not an end all . . .'[149]

The final Rule does not require the disclosure of either of the two alternatives as proposed. Since the proceeding did show the need for some kind of disclosure concerning warranty rights, a brief general statement was adopted, which puts the consumer on notice that other rights might accrue to him or her, in addition to those cited in the warranty. The substance of the language used in this statement follows several suggestions offered in the written comments on paragraphs (k) and (l) of the proposed Rule.[150] By the use of such statement, suggests NRMA, the consumer can

> be informed generally of his or her contract, tort, and strict liability rights in a manner that suggests that further inquiry as to the nature of those rights might be fruitful, but without confusing or misleading as to the details.[151]

The Commission concluded that paragraph (a)(9) of the final rule can accomplish this task without imposing unreasonable burdens on warrantors. The warranty need not be a legal treatise. Indeed, the final rule should preclude such a result. However, the warranty must at least contribute to the buyer's understanding of its legal consequences. To require less could result in misleading the public by failing to negate the assumption (often incorrect) that the warranty sets forth the buyer's only recourse. The final rule will go far to correct this situation and will adequately implement the intent of Congress.

SEALS OF APPROVAL

701.3(b)

Paragraph (a)(1)-(9) of this section shall not be applicable with respect to statements of general policy on emblems, seals, or insignias issued by third parties promising remedial action with respect to a consumer product, which statements contain no representation or assurance of the quality or performance characteristics of the product; provided that (1) the disclosures required by paragraph (a)(1)-(9) are published by such third parties in each issue of a publication with a general circulation, and (2) such disclosures are provided free of charge to any consumer upon written request.

This paragraph was added to the final Rule in response to concerns expressed by *Parents* and *Good Housekeeping Magazines* that the proposed rule would force the elimination of "seal" programs.[152] It relieves these and other similar seal programs from having to set forth the disclosure requirements set forth in 701.3(a) in the actual seal itself. These disclosures must, however, be set forth in a publication. The required disclosures are thus the same for seal programs as for other warranties; only the medium for disclosure has been altered.

A specific provision for seal programs has been granted because of circumstances which the Commission believes are unique. First, third party seals are too small to contain the disclosures required by the rule and still remain legibly printed and readable by the consumer.[153] Also, magazines such as *Parents* and *Good Housekeeping* are not in the chain of distribution of products bearing the seal. They are merely third-party guarantors.[154] Finally, the public policy stated in 102(a) of the Act of "improving competition in the marketing of consumer products" would not be served by a rule which terminated seals of approval such as Parents and Good Housekeeping.[155]

Whatever the merits of such programs, we do not choose to eliminate them at the stroke of a pen. The Commission has instructed its staff to monitor the impact of this exception and to recommend modifications if needed to protect the public.

OWNER REGISTRATION CARDS

701.4

When a warrantor employs any card such as an owners' registration card, a warranty registration card, or the like, and the return of the card is a condition precedent to warranty coverage and performance, the warrantor shall disclose this fact in the warranty. If the return of such card reasonably appears to be a condition precedent to warranty coverage and performance, but is not such a condition, that fact shall be disclosed in the warranty.

The disclosures required by this section are in accord with specific disclosures required by the Act. Section 102(a)(5) authorizes the disclosure of "[a] statement of what the consumer must do and the expenses he must bear." Section 102(a)(7) provides for the disclosure of "[t]he step-by-step procedures which the consumer should take in order to obtain performance of any obligation under the warranty . . ." Section 701.4 which requires the warrantor to disclose in the warranty document itself, the purposes for which the card is intended, is necessary in order to alert the consumer as to whether or not the return of the card is a precondition to warranty service or performance.

MACAP's 1973 evaluation of warranties notes that an increased number of companies stated in their warranties that the consumer was required to return a warranty registration card in order to have the warranty honored. A special questionnaire was sent to the 48 companies who included such a requirement to ascertain (1) whether in practice the return of the warranty registration card was required in order for the company warranty to be honored; (2) whether the warranty would be honored without the return of such card; and (3) whether there were other reasons why the return of such card was helpful to the company.[156] Twenty-eight of the thirty-two companies that responded to this inquiry replied that the warranty would be honored in practice even if the registration card was not returned. MACAP also found, in evaluating the comments of the responding companies, that there are a number of uses for warranty registration card information. The predominant uses were (1) verification of warranty status in dispute situations; (2) identification of the "original owner"; (3) identification of the product location for purposes of product modifications, product recall, and evaluation of the need for service centers and/or parts distributors; and (4) marketing or sales purposes. On the basis of this information, MACAP recommended that appliance warrantors who use such cards "candidly and clearly state the purpose of the card, if other

than or in addition to registration of the product to assure warranty service." [157]

The NBCCA report lends further support to MACAP's recommendation as to warranty registration cards. The report states:

> registrations on consumer usage may be reasonable but should be used only when the restriction has a real purpose. For example, consumers should not be misled to believe that mailing a registration card is necessary precondition to obtaining the benefits of a warranty. In sum, any restriction or other obligation imposed upon the consumer should be clearly defined and carefully explained in the material available to the consumer at the time of purchase.[158]

The practice of stating that the card is a prerequisite to warranty coverage and performance, even where this is never enforced, may chill the assertion and exercise of warranty rights. Some purchasers may not request warranty service if they did not return the card in the prescribed period of time, because of the mistaken (although logical) belief that the warranty accurately states the warrantor's intentions.

Furthermore, a requirement, that a purchaser complete and return a warranty registration card appears to be unenforceable under Section 2-313 of the U.C.C. An express warranty must be "a basis of the bargain", or part of the actual sales transaction. According to the House Subcommittee Staff Report,

> most warranties and warranty registration cards appear to be of the type that are packaged with the product. . . . This discovery often takes place at home, long after the actual sales transaction has been completed. Thus, the requirement of filling out and returning a warranty registration card in order to obtain full warranty protection . . . is likely to be held invalid by most courts.[159]

The House Subcommittee Staff states further that

> some of the warranties that had these cards did not expressly require that the cards be filled out and returned, but instead state to 'please' do so. However, the fact that it is labeled 'Warranty Registration Card' and is attached to the warranty can nevertheless convey the idea that the card is needed to validate the warranty . . . (M)ost of these cards appear to be clearly for the benefit of the manufacturer—to obtain marketing information . . . Questions seeking this kind of information can pose a threat to privacy, especially if it is given under the mistaken notion that the buyer will obtain full warranty protection by doing so.[160]

This section of the Rule is intended to eliminate the deception inherent in the situation where a warrantor purports to condition warranty protection upon a timely return of the registration card, while in fact using such cards solely for marketing or other purposes.

The original proposal had also required a disclosure in the warranty of the purpose for which a card was used, if the return of such card was not a condition precedent to warranty coverage.[161] NEMA, AHAM, SCM, and others argued against including a statement about an unrelated subject (e.g., market research) in an already lengthy warranty.[162] Cox, Langford, and Brown stated that "(s)uch a requirement may encourage manufacturers to condition their warranties on the return of such cards, and therefore reduce the protection given to consumers." [163] Sears claimed that "(s)uch a disclosure in the warranty may even mislead consumers into believing that since the disclosure is in the warranty that the card must have something to do with the warranty." [164]

This requirement has been modified in the final Rule, which requires disclosure only if the card is or reasonably appears to be required for warranty performance. The strictures of Section 5 of the Federal Trade Commission Act, 15 U.S.C. 45, are adequate to deal with any other deceptive uses of non-warranty related cards.

PARAGRAPHS DELETED FROM THE PROPOSED RULE

701.3(a) Section 701.3(a), which required the disclosure of "the full name(s) and address(es) of the warrantor(s)", has been incorporated as an alternative in paragraph 701.3(a)(5). (See discussion of paragraph 701.3(a)(5), *supra*.)

701.3(e) Paragraph 701.3(e) of the proposed Rule required the disclosure of:

> The period of time, stated in terms of hours, business days or days, within which, after notice of a defect, malfunction, or failure to conform with the warranty, the warrantor will perform any obligations under the warranty.

This provision evoked much negative comment from warrantors. Many industry representatives stated that the warrantor could not control the length of time within which warranty obligations could be performed because of the use of independent contractors, such as retail dealers.[165] Other warrantors claimed that they could not control the length of time because of problems in securing parts or supplying replacement parts.[166] CRI, EIA, NRMA and many others argued that requiring the inclusion of such a time period would not be helpful to consumers because it would lead warrantors to set long, maximum times for performance, representing the most extreme cases.[167] Montgomery Ward, General Electric, and others stated that averages could not be obtained [168] and would not be useful even if they could be derived.[169]

Many warrantors cited the variables which make setting a time for performance exceedingly difficult. In different areas, a different service organization or differing backlog may account for a variation in the amount of time needed for performance of obligations.[170]

A compelling argument, directed at the effects of the insertion of the proposed language, was presented by Thomas W. Clark, Director of Marketing Services of Bang & Olufsen of America, Inc. ("B & O A"). In his testimony he stated:

> . . . (L)arge manufacturers could use their sheer size to gain a competitive edge. . . . (M)any of B & O A's authorized service stations repair a great many different brands. A large manufacturer whose products represent, for instance, 30-40 percent of a repair facility's business has the economic power to promise consumers a three-day repair period and force the repair facility to honor it at the expense of one such as B & O A whose products represent less than one percent of the facility's business. The ultimate result of this provision could well be to reduce competition in the market place, a result directly contrary to the interest of the consumer it is meant to "protect".[171]

This paragraph was proposed because consumer complaints had indicated that securing timely repairs under warranty was a major problem. If the consumer were apprised at the outset of the period of time within which the warrantor would perform any warranty obligations, he or she would be better able to differentiate among similar warranties for competing products, and any false expectations as to time for repairs could be dispelled. However, although the problem of obtaining timely warranty performance which motivated the inclusion of this paragraph is serious, the Commission, having reviewed the record, is of the opinion that the insertion of this paragraph in this Rule is not the appropriate means for addressing this problem. Because warrantors might be encouraged, on the basis of the inclusion of such a provision, to set and operate under a longer time for repair than currently exists in practice, the best interest of the consumer would be served by deletion of this requirement.

701.3(g) Section 701.3(g) of the proposed Rule required the disclosure of

> any requirement or duty which must be fulfilled by the purchaser as a condition precedent to securing warranty performance, including any expenses which must be borne by the purchaser.

Of the comments which were received concerning this paragraph, most were directed at the interrelation and overlap between paragraphs (g) and (h) of the proposed Rule.[172] The Commission has determined that the information disclosures called for in (g) are fully addressed by § 701.3(a) (3) and (5) of the final Rule. The information required by those sub-paragraphs includes disclosure of all responsibilities which the consumer must perform in order to obtain warranty performance. Therefore, paragraph (g) was deleted from the final Rule.

701.3(j) Paragraph (j) of the proposed Rule required the disclosure of

> any limitations on the time of day or days of the week during which the warrantor will perform his warranty obligations if such performance is not available Monday through Saturday, 9:00 a.m. to 6:00 p.m. local time. .

This paragraph spawned a deluge of negative comments from warrantors. Many warrantors stated that they provided for too many service facilities to specify the working hours of each in the warranty.[173] Others, such as The Coleman Co. and Kohler Co., claimed to have no control over the hours during which warranty service is available.[174] Others simply did not know the hours that their services were open for business.[175] Baldwin Piano, Altheimer & Gray, and SFMA complained that since different stores had different hours, warrantors would have to determine the ultimate destinations of their products and would be forced to print several different warranties.[176] Sunbeam, Chrysler Corp. and others stated that the hours for service establishments changed frequently, making compliance with this paragraph difficult.[177] CRI, Sears, Questor Corp., and others claimed that this paragraph would force servicers to conform to the same hours, exceeding the Commission's authority under Section 102(a).[178] Other industry representatives stated that the hours set forth in the proposed paragraph were not consonant with those of most businesses.[179]

This paragraph was inserted in the proposed Rule because it was felt that the consumer should know whether or not a warrantor's service hours were more limited than those normally offered by others in the same or similar line of business. This information could play a part in the consumer's purchasing decision.

The Record is replete with comments stressing that the inclusion of this paragraph would lead to voluminous warranties, and that the servicers would be forced to conform to the same hours. Therefore, although the Commission feels that this paragraph might have provided useful information to consumers, it has decided that the public interest is best served by its deletion, since the language as originally proposed would have created a disincentive for the setting of flexible hours.

701.3(m)

Paragraph (m) of the proposed Rule required that the warranty contain:

> If the terms "Life", "Lifetime", or words of similar meaning are used to indicate the duration of a warranty, a clear and conspicuous disclosure of the life referred to.

Although this paragraph does not appear in the final Rule, the disclosure which it requires, i.e., that of the life referred to, is required by Section 701.3(a)(4), which requires the disclosure of the duration of the warranty. Further-

V40251 DEC 31 75 XUM

more, Section 103(a)(1) of the Act requires a warrantor offering a "full" warranty to disclose the duration of the warranty in the warranty designation.[100]

It should also be noted here that the Commission still retains its jurisdiction over unfair and deceptive warranty practices under Section 5 of the Federal Trade Commission Act.[101]

Past Commission orders have required the disclosure of the lifetime referred to by the warrantor giving a lifetime guarantee. In *Matter of Burstein-Applebee Company, et al.*, 69 F.T.C. 16 (1966), respondent retailer advertised that their wristwatches were "guaranteed for life", whereas in fact such watches were not guaranteed for the life of the purchaser. The Commission ordered the respondent to cease and desist from

> Using the word 'Lifetime' or any other term of the same import to refer to any guarantee which is not for the duration of the life of the purchaser or original user without clearly and conspicuously disclosing the life to which such reference is made; or representing, in any manner, that the duration of a guarantee is other than respondents are able to establish is the fact.

See also *In the Matter of Solmica, Inc., et al.* 66 F.T.C. 566 (1964), *In the Matter of Fingerhut Manufacturing Company, et al.* 657 F.T.C. 751 (1964). A warrantor choosing a "lifetime" duration must thus disclose the lifetime referred to in the warranty, and must recognize that the warranty obligation cannot be revoked or modified so long as the measuring "life" continues.

A separate Rule provision on lifetime warranty duration is unnecessary. The final Rule requires a simple and readily understandable disclosure of warranty duration. Standing alone, the word "lifetime" does not meet this requirement.

OTHER COMMENTS

Virginia Knauer, Director of the Office of Consumer Affairs for the Department of Health, Education, and Welfare testified that "the proposed rule on disclosure of warranty terms will cause warranties to be lengthened in verbiage, which could in turn cause key facts to be submerged in information clutter unless the presentation of such facts is highlighted through rules or guidelines for presentation."[102] Professor Laurence Feldman, of the University of Illinois, commented that the proposed Rule "fails to recognize, as Shakespeare did that 'They are stick that surfeit with too much, as they that starve.'"[103] Many others cited the need for a requirement of some type of standardized format and headings,[104] because of the potential length of warranties complying with the requirements set forth in Part 701.

The Commission recognizes the need for warranties to be simple, understandable, and concise. The final Rule has been simplified and streamlined to accomplish that result. The Commission does not believe that the final rule will contribute to the evils of undue length and complexity. It is not prepared, on the basis of the record, to impose a standardized format on all consumer product warranties.

V. Pre-Sale Availability of Written Warranty Terms. Section 102(b)(1)(A) of the Act directs the Federal Trade Commission to "prescribe rules requiring that the terms of any written warranty on a consumer product be made available to the consumer (or prospective consumer) prior to the sale of the product to him."

Consumer product warranties are not always made available to the consumer prior to the sale of the product. Instead, the terms and conditions of the warranty are often available only after the sale has been consummated and the package opened or product delivered. A consumer complaint regarding a wristwatch warranty illustrates the types of problem which may arise with respect to prepackaged consumer products: "The buyer is instructed that while the watch is 'guaranteed', there is a 'service charge' of $2.75 for repairs during the warranty period. This information is not known prior to purchase, and due to the type of packaging of this item, the existence of a charge for any warranty service is not known until the sale is completed."[105]

If the warranty is in fact only available after the sale, the use of the warranty as an informational input in the consumer's purchasing decision and as a tool for making product comparisons is precluded. Furthermore, it may be argued that an express warranty undisclosed prior to sale is inoperative. Section 2-313 of the U.C.C. requires that an express warranty be "a basis of the bargain," or part of the actual sales transaction. Accordingly, the enforceability of a warranty, the existence of which the purchaser is made aware only subsequent to the actual sales transaction has been completed, would be questionable. The House Subcommittee Staff Report, found that only two of the 51 participating manufacturers offered warranties which were actually designed to be part of the actual sales contract.[106]

The other warranties examined appear to be of the "prepackaged" variety—the type packaged with the product resulting often in the buyer not being aware of the terms of the warranty, or its existence, until he or she gets home and opens the box containing the product. In such instances, it is questionable whether the prepackaged warranty would be a basis of the bargain.[107]

Congressman Bob Eckhardt, a member of the Conference Committee on S. 356,[108] addressed the issue of pre-sale availability of warranty information:

> We require the FTC to write rules to assure the availability of warranty information prior to the actual purchase. The consumer should be able to base his/her decision to buy on the quality of the warranty as well as factors such as the cost and the appearance of the product. It is unfair for a consumer to learn only after arriving home and unpacking a sealed carton that what was said to be a full 5-year warranty does not cover costs of labor and parts. There are those who argue that in the case of such 'packaged warranties,' the consumer could legally challenge the effectiveness of the warranty. . . . This, I think, is true but it is an inadequate solution. There are only a handful of consumers who know that such a challenge could be made and even less of them with the financial resources and personal energy to make it, especially when a product costs only, say $30. Furthermore, we think it is an unfair burden to impose on the individual consumer. That is why we require the FTC to prescribe rules to assure availability of warranty information.[109]

Availability of warranty terms prior to sale is important for consumers in light of the increasing trend toward the sale of service contracts, particularly for major appliances. The scope and duration of the written warranty must form a significant element in the careful consumer's decision whether, or at what point in time, to sign a service contract.

That warranty information is currently either unavailable or difficult to procure at point of sale is illustrated by an informal survey undertaken by the Consumer Affairs Department in Detroit, Michigan.[110] Some of the findings of the survey indicated that

> In no case . . . was a copy of the full warranty available for inspection. The warranty comes packed in the 'box' was the regular response. . . . The information available on lower cost appliances was significantly less than that experienced with major appliances. In no instance did a salesperson offer any information and in no case was a copy of the written warranty available . . . In general the results of this survey confirm the need for and the validity of the proposed rules . . .[111]

Like findings resulted from a similar endeavor by *Home Furnishings Daily*.

> In each instance, no information was volunteered, and when this reporter did get answers to questions, data was often vague. Frequently, salesmen said warranty information was contained in instruction manuals, however, no instruction manuals were readily available. Only two lines . . . had warranty information on the front of refrigerators.[112]

Trying to get warranty information on a refrigerator was likened to "trying to defrost the North Pole with an ice pick."[112a]

Both of these informal surveys indicate that warranty data is currently difficult to obtain or unavailable at present.

SCOPE OF THE RULE

§ 702.3(a) Duties of the Seller

Section 702.3(a) of the proposed Rule required the seller to

> . . . maintain a binder or a series of binders in each department in which any consumer product with a written warranty is offered for sale, containing copies of the warranties for the products sold in such department.

The proposal of a binder system as the means for making warranties available to consumers prior to sale met with considerable opposition. Many complaints were received from retailers concerning the logistics and the expense of setting up and maintaining a binder system.[113]

Virginia Knauer and Robert Sprouse, President of Sprouse-Reitz, among others, stated that the binder system was inconvenient for consumers to use, that it was not consonant with normal consumer buying patterns, and that consumers would not make the effort to use it.[114] George Zweibel of DC Neighborhood Legal Services and J. T. Church of Roses Stores Inc. suggested that the use of only one set of binders would be insufficient to serve consumers' needs.[115] The specter of consumers fighting to get to the warranty binders was also raised.[116]

There was no substantial record support from consumers or consumer groups for the use of the binder system as initially proposed.

A major and repeated concern voiced in an overwhelming number of comments was the inflexibility of the proposed rule.[117] The failure of the Commission to take cognizance of the range of retail establishments which would fall under the aegis of the proposed Rule was cited by NRMA, American Retail Federation ("ARF"), and others.[118] ARF stated:

> The retailers affected . . . encompass the full range of merchants from the small, independent specialty store to the large, traditional multidepartment store . . . In the larger multi-department stores the heavy volume of customers and the vast quantities of consumer products carried and sold each day make the use of warranty binders simply impractical. In high volume discount and self-service stores, these problems are magnified by lack of sales personnel required to keep the binders updated and by the fast turnover of consumer products frequently sold on a 'one-time' basis only.[119]

Other comments as to the inflexibility of the proposed rule, including those of Montgomery Ward, noted that the Commission had failed to recognize the variety of products encompassed by the Rule.[120] Similarly, it was argued that the proposed scheme failed to take into account the "many different ways that consumer products are sold."[121] Furthermore, ARF claimed that "(t)he merger of *seller* and *warrantor* in the case of private brand retailers . . . has . . . been overlooked by the Commission staff."[122]

The final Rule heeds the retailers' cry for greater flexibility. It provides the seller with four alternative means by which warranties can be made available to prospective buyers prior to sale. The seller must, as a minimum, employ one of the means cited, but may use any additional means desired. It should be noted that only the "text" of the warranty need be disclosed, rather than the actual warranty document.

702.3(a)(1)(i) "clearly and conspicuously displaying the text of the written warranty in close conjunction to each warranted product;"

The idea of displaying the warranty with the product being offered for sale was suggested or endorsed by Hook Drugs, Georgia Retail Association, SCM, F. W. Woolworth Co. ("Woolworths"), and others as a viable means for pre-sale warranty disclosures.[123]

This sub-paragraph substantially incorporates the language suggested in the statement submitted by the American Retail Federation.[124]

702.3(a)(1)(ii)

Maintaining a binder or series of binders which contains(s) copies of the warranties for the products sold in each department in which any consumer product with a written warranty is offered for sale. Such binder(s) shall be maintained in each such department, or in a location which provides the prospective buyer with ready access to such binder(s), and shall be prominently entitled "Warranties" or other similar title which clearly identifies the binder(s). Such binder(s) shall be indexed according to product or warrantor and shall be maintained up to date when new warranted products or models or new warranties for existing products are introduced into the store or department by substituting superseding warranties and by adding new warranties as appropriate. The seller shall either:

(A) display such binder(s) in a manner reasonably calculated to elicit the prospective buyer's attention; or

(B) make the binders available to prospective buyers on request, and place signs reasonably calculated to elicit the prospective

---

[100] "If the written waranty meets the Federal minimum standards for warranty . . . then it shall be conspicuously designated a 'full (*statement of duration*) warranty'."

[112a] *Id.*

[113] See, e.g. Tr. 446-47, Church ("The binder rule would require using square footage in a nonvolume way and would drive up square footage cost . . . In addition to space costs, the binders themselves would represent a significant cost . . .

In our stores 10 departments sell warranted products. In the hardware department we sell about 50 items under warranty. That department, therefore, would require at least three identical warranty books. The cost per store would be $33. To supply all hardware departments would cost $8,811. In our music and electronics department we sell more than 70 warranted items. For such a department I would estimate customer convenience requiring four sets of binders with two volumes per set. The cost per department would be $72, with a total cost for all departments running to $19,224. In the appliance departments, where more than 80 warranted items are sold, the total cost of three sets of warranty books per store would be $15,219. To maintain the notebooks, including clerical time used in writing manufacturers for copies of warranties, filing, and updating the warranty book, we estimate will cost 2,000 man-hours per year at the minimum wage rate of $2.10 per hour, for a total labor cost of $4,200. In addition to the foregoing costs, there will be the cost of replacement of binders and protective coverings. We estimate that if the binders were in fact used, they would have to be replaced at least once a year.

Therefore, to give effect to the rule, Rose's Stores would have an additional annual cost in excess of $200,000 per year. While those not familiar with retailing might consider this a small cost, the reality is that no cost is small, and most cost must be passed along to the customers in the prices they pay for goods."); TR 1865, Danners; TR. 2106-7, Sprouse; R1-3-3, 1099-1101, City Products.

V 40 251 DEC 31 75 XUM

buyer's attention in prominent locations in the store or department advising such prospective buyers of the availability of the binders, including instructions for obtaining access.

Some retailers such as Woolworths, Sears, and Montgomery Wards acknowledged that there were instances in which the binder might be the only or the best means for making pre-sale warranty disclosures.[205]

The language in the final Rule is substantially similar to that suggested in the written comments submitted by Sears and Roebuck.[206]

This sub-paragraph requires that the binders be maintained either in the department where the warranted product is sold, or in a location which provides the prospective buyer with ready access to the binders. Gambles, in its written submission, noted that "(w)hile the provision that binders be kept on a departmental basis is reasonable in the case of large retail outlets where it would be a burden on the customer to require that he or she go to one specific location in the store to find the binders, there are many small retail outlets which may have merchandise laid out by department, yet are small enough so that one complete set at a single location in the store would suffice." [207]

Thus, in such instances, it would be permissible to place the binders in a location other than in the departments in which the products are being sold.

The final Rule also affords the seller who elects to utilize the binder system a choice of either prominently displaying the binders, for example, at an appropriate counter, or making them available on request. If the latter alternative is chosen, a prominent notice or series of notices must alert the prospective buyer's attention to the existence of the binders and the means for obtaining access to them.[208]

The requirement that the binder be indexed is intended to maximize the ease with which the consumer can locate and compare the warranties contained in the binder for a particular type of product.

The seller is given latitude both to determine the kind of system to use for compiling the warranty information, and to decide whether to organize such a system according to warrantor or product.

Also, part of the seller's duty to maintain the binder includes keeping the binder current. If a new warranted product is introduced, the warranty for that product must be placed in the binder in the appropriate indexed section. If a new model is introduced, the warranty for such model must appear in the binder. If a new warranty supersedes a prior warranty, the old warranty must be removed from the binder.

702.3(a) (1) (iii)

Displaying the package of any consumer product on which the text of the written warranty is disclosed, in a manner such that the warranty is clearly visible to prospective buyers at the point of sale;

Seeman Co., Fieldcrest Mills and others suggested that the warranties be printed on or otherwise attached to the product containers.[209] If the warrantor elects to do this, the retailer may then display the package in a manner which makes the warranty clearly visible to prospective buyers.

The language adopted in this paragraph is derived from that suggested in several of the written submissions.[210]

702.3(a) (1) (iv)

Placing in close proximity to the warranted consumer product a notice which discloses the text of the written warranty, in a manner which clearly identifies to prospective buyers the product to which the notice applies.

Walker Manufacturing Co., National Tire Dealers and Retreaders Association, and others suggested that signs containing the warranty text be used in lieu of binders.[211] ARF stated that "private brand warrantors frequently use a common warranty for broad categories of products. Where this is done, warranty terms can be conveniently disclosed at point of sale by use of common signs located in closed proximity to the warranted products." [212] Accordingly, this alternative has been included in the final Rule. The language used is substantially derived from language suggested by ARF and Sears.[213]

702.3(a) (2)

Not remove or obscure any warranty disclosure materials provided by a warrantor, except:

(i) where such removal is necessary for store window displays, fashion shows, or picture taking; or

(ii) where the seller otherwise through means provided for in sub-paragraph (1) above, makes the terms of the warranty information available to the consumer.

The proposed Rule required that the seller "(n)ot remove or obscure any warranty information disclosure materials attached to a warranted consumer product by a warrantor."

The revised sub-paragraph in the final Rule provides two exceptions which allow the seller to remove warranty information. First, if the product is part of a store window display or a fashion show, or is being photographed, it need not bear any warranty information. This exception is permitted on the theory that warranty information will be available for the particular product in the department in which it is offered for sale.

Second, if the seller elects to make the warranty information available to the consumer by some means other than that provided by the warrantor, the seller may remove the information provided, so long as the alternate means complies with section 702.3(a) (1).

The language used in this provision is substantially drawn from that suggested by the ARF.[214]

---

[205] TR 2464, Evans ("In some areas we may . . . have to have a binder. For example in our jewelry department . . . The warranties that are involved in items such as that, we agree we would have to have them in a binder.") R 1-3-2, 662, Sears ("In a particular product situation, the use of binders may be found by a retailer to be the most feasible method of compliance."); R-1-4-1, 58, NRMA ("Binders could be used where no display option is workable, e.g. for products . . . which are inaccessible because they are locked in a display case."); R 1-3-2, 505, Montgomery Ward ("a binder or similar device might be utilized for the availability of the warranties in the camera department."); R 1-4-2, 677-678, ARF.

[206] See R 1-3-2, 663, Sears:

"Maintain a binder or a series of binders in the store or each department in which any consumer product with a written warranty is offered for sale which contains copies of warranties for the products sold in the store or department. Such binders shall be prominently entitled "Warranties" or other similar title which clearly identifies the binder. Such binders shall be indexed according to product or warrantor and shall be maintained up to date when new warranted products or models or new warranties for existing products are introduced into the store or department by substituting superseding warranties or by adding new warranties as appropriate. The seller shall make the binder available to consumers on request, and shall place signs in prominent locations in the store or department advising consumers of such availability."

[207] R 1-3-2, 345, Gambles.

[208] See suggestion in R 1-3-2, 505-506, Montgomery Ward ("If the latter method of availability is utilized for [binders] the consumer would be told by means of a clear and conspicuous notice where in the department those terms are available.")

[210] R-1-3-2, 663, Sears ("Display any consumer product with a written warranty which is packaged and on which package the terms of the written warranty are disclosed in a clear and conspicuous manner so that such warranty disclosures are clearly visible to consumers at the point of sale"); R-1-4-2, 681, ARF ("displaying any packaged consumer product on which package the terms of the written warranty are disclosed in a clear and conspicuous manner so that such disclosures are available to the consumer").

[211] R-1-3-1, 19, Walker Manufacturing; R-1-4-1, 101 National Tire Dealers and Retreaders; R-1-3-2, 659, Sears ("Warranties common to a line of merchandise could be disclosed on one sign prominently displayed near the display of such merchandise.").

[212] R-1-4-2, 679, ARF.

[213] R-1-4-2, 681, ARF ("In those departments where a single warranty applies to many consumer products, placing a common notice in close proximity to those products disclosing the terms of that written warranty, provided, however, that it is clear to which consumer products the common notice applies"); R-1-3-2, 663, Sears ("Placing a sign in close proximity to the display of any warranted products . . . which sign . . . clearly discloses the terms of the written warranty and is visible to consumers at the point of sale; provided that nothing shall require a separate sign . . . on each warranted product on display if common signs . . . clearly identify the products to which the warranty terms disclosed thereon apply").

[214] R-1-3-2, 681, ARF "Not reasonably remove or obliterate any warranty information disclosure materials accompanying a warranted consumer product by a warrantor, except:

(i) where such removal is necessary for store window displays, fashion shows, or such other promotional purposes; or

(ii) where the seller otherwise, through means provided for in paragraph (1) above, makes the terms of the warranty information available to the consumer."

DUTIES OF THE WARRANTOR

(1) Under the proposed Rule, the seller was requested to

upon specific written or oral request from a prospective consumer, promptly provide a copy of each written warranty requested.

Much negative comment was received concerning this requirement. North American Philips Corp., CRI, and NRMA argued that the phrase "make available" used in the Act did not "contemplate that the written warrantor must 'provide' the full text of written warranties to each consumer who seeks to obtain it. Rather, the term 'make available' connotes 'availability for inspection', with delivery being required only if inspection is impossible." [215]

GAMA, NEMA, EIA, J. C. Penney Co. ("Penneys"), and others claimed that such a requirement was superfluous if warranties were available at point of sale.[216]

National Association of Catalog Showroom Merchandisers expressed the concern that "this rule invites harassment or predatory competition because someone could request 10,000 warranties with a single letter." [217]

Several warrantors submitted estimates of what compliance with this provision would cost them. Air Conditioning and Refrigeration Institute stated:

The cost of doing this includes much more than paper and printing. This includes making sure that the product is properly identified so that a copy of the applicable warranty can be provided. (This may require correspondence or telephone calls to make sure that the correct product, even down to the model number, has been specified.) Even if there are no special problems with product designation or identification, it would probably cost a manufacturer somewhere between fifty cents and one dollar to identify the product, locate the pertinent warranty, and mail it to a consumer.[218]

In view of the aforementioned comments, the Commission has decided that it would be in the public interest to eliminate this requirement.

The final Rule requires the warrantor to "provide sellers with warranty materials necessary for such sellers to comply with the requirements set forth in paragraph (a) of this section" and to "provide catalog, mail order, and door-to-door sellers with copies of written warranties necessary for such sellers to comply with the requirements set forth in paragraphs (c) and (d) of this section."

These paragraphs obligate the warrantor to provide the seller with the materials necessary to make the required pre-sale warranty disclosures to consumers. In the event that the warrantor does not deal directly with the seller or does not know who the sellers will ultimately be, the warrantor must distribute sufficient quantities of the required pre-sale materials through normal distribution channels to insure receipt by sellers.

The final Rule gives the warrantor four alternative means by which warranty materials may be provided to sellers in order for such sellers to comply with Section 702.3(a). The warrantor must, as a minimum, use one of these means, but may use any combination of the means listed or any additional means desired. The alternatives correspond to the four alternatives set forth in Section 702.3(a), under "Duties of the Seller."

702.3(b) (1) (i) (A)

Providing a copy of the written warranty with every warranted consumer product;

This sub-paragraph parallels that in Section 702.3(a) (1) (i), which allows the seller to display the warranty text in close conjunction to the product, and that in 702.3(a) (1) (ii), which allows the seller to maintain a binder containing copies of the warranties for warranted consumer products being offered for sale.

Olin Corporation, Montgomery Ward, NRMA, and many others stated that the Commission should have specifically required that the warranty accompany the product.[219]

The language used in this paragraph follows that suggested in the written statement submitted by ARF, NRMA and Montgomery Ward.[220]

702.3(b) (1) (i) (B)

Providing a tag, sign, sticker, label, decal or other attachment to the product, which contains the full text of the written warranty;

This sub-paragraph tracks that in 702.3(a) (1) (i), which permits the seller to display the warranty text in close conjunction to the product.

702.3(b) (1) (i) (C)

Printing on or otheriwse attaching the text of the written warranty to the package, carton, or other container if that package, carton or other container is normally used for display purposes. If the warrantor elects this option, a copy of the written warranty must also accompany the warranted product;

This sub-paragraph parallels 702.3(a) (1) (iii) which allows the seller to display the package of any product on which the warranty text is disclosed.

If the warrantor elects to print or otherwise attach the warranty to the package, a copy of the written warranty must also accompany the product. This is to ensure that the consumer will not inadvertently discard the package on which the warranty is printed, and, thus be left without a copy of the warranty in his or her possession.[221]

702.3(b) (1) (i) (D)

Providing a notice, sign, or poster disclosing the text of a consumer product warranty. If the warrantor elects this option, a copy of the written warranty must also accompany each warranted product.

This sub-paragraph corresponds to that of 702.3(a) (1) (iv), which permits the seller to post a sign disclosing the text of the warranty.

If the warrantor chooses to provide such a sign, a copy of the written warranty must also accompany the product. This is to ensure that the consumer has a copy of the written warranty which he or she may retain to refer to in the event of a product failure, defect, or malfunction.

The proposed Rule required the warrantor to

clearly and conspicuously disclose any applicable warranty designation(s) contained in the written warranty for the product, and the following statement:

The retailer has a copy of the complete warranty on this product. Ask to see it.

(i) By means of a tag, sign, sticker, label, decal or other attachment to the product; and

(ii) By printing such disclosure on the principal display panel of the package, carton or other product container.

The purpose of this paragraph in the proposed Rule was to notify the consumer that warranties were available for examination upon request from the retailer, since there was no requirement that the binders be conspicuously displayed. Rather, they were only to be made available upon request. Under the final Rule, the warranties must either be conspicuously displayed on the product package, or in close conjunction to the warranted products. If a binder is used, it must either be conspicuously displayed, or a notice as to its availability posted conspicuously.

Thus, this paragraph has been eliminated from the final Rule, as it is no longer necessary as a means to inform the consumer of warranty availability.

V 40 251 DEC 31 75 5 XUM

702.3(b)(2)

Sub-paragraph (1) of this paragraph (b) shall not be applicable with respect to third parties issuing statements of general policy on emblems, seals or insignias promising replacement or refund if a consumer product is defective, which statements contain no representation or assurance of the quality or performance characteristics of the product; provided that (i) the disclosures required by 701.3(a)(1)–(9) are published by such third parties in each issue of a publication with a general circulation, and (ii) such disclosures are provided free of charge to any consumer upon written request.

This sub-paragraph has been added in response to concerns expressed by magazines such as *Parents'* and *Good Housekeeping* that, under the present structure of their respective "seal" programs, they would be unable to comply with the pre-sale availability requirements set forth in the proposed Rule.[223]

This sub-paragraph therefore exempts such "seal" programs from the duties set forth in Section 702.3(b)(1). This specific exemption for such "seal" programs has been inserted for several reasons. Under the structure of the "seal" programs, the magazine merely authorizes the use of the "seal." It does not know if the seal is in fact used by the manufacturer or not. The seal may be used oh only certain models, or on certain sizes, or in some parts of the country only. Therefore, there is no way of their knowing on what products the seal must be made available.[224]

Furthermore, because they are not in the chain of distribution, these publications have no way of knowing the identity of the retailers who are selling the products bearing its seal, even if the publication knew what products carried the seal.[224]

The Rule does require, however, that the publication make all disclosures within the magazine itself, and that it provide the consumer with a copy of the warranty, free of charge, at his or her request. The requirement or providing of a free copy of the warranty is necessary since the consumer would otherwise have no opportunity to read the warranty prior to the sale of a product bearing the seal unless he or she purchased the magazine containing the necessary disclosures. In all other pre-sale situations contemplated by the final Rule, the consumer can see the warranty at no cost. Thus, this requirement was inserted so as to provide the consumer with an equal opportunity to examine the warranty without incurring any expenses.

CATALOG AND MAIL ORDER SALES

Examination of the catalogs of several major catalog companies has revealed that such catalogs do publish product warranties.[225] However, the companies do not always include in their catalogs the specific warranties covering each product that carries a warranty. This problem is compounded by the fact that catalogs often advertise satisfaction guarantees as well as specific product warranties. Therefore, the purchaser may not be apprised of the specific warranty for the product purchased until he or she actually receives the item. This may serve to confuse the potential purchaser, for it is often unclear whether the mail order company's satisfaction guarantee replaces, supplements, or complements the specific product warranty. Many consumers have no other encounter with a mail order seller than an advertisement seen on television or in the back of a magazine. Therefore, if the requirement of making warranties available to consumers prior to purchase is to be met, it must apply to mail order advertisements and solicitations. It is important that the consumer know, prior to ordering products through the mail, whether such products have written warranties, and if so, the nature of such warranties.

This sub-paragraph is intended to eliminate the situation where the purchaser receives his or her first notification of the specific product warranty upon receipt of the ordered merchandise. Rather, the consumer will be able to examine the complete warranty prior to purchase, and will be able to use it to make a purchase decision.

The proposed Rule contained separate sections, setting forth the duties of catalog sellers and the duties of mail order sellers. Montgomery Ward and Mail Order Association of America ("MOAA") noted the overlap between these two paragraphs, and suggested that the two paragraphs be consolidated.[226] This suggestion has been adopted in the final Rule, with the definition of "catalog and mail order sales" provided as follows:

"Catalog or mail order sales", means any offer for sale, or any solicitation for an order for a consumer product with a written warranty, which includes instructions for ordering the product which do not require a personal visit to the seller's establishment.

The proposed Rule had defined "catalog" as "any multi-page solicitation, flier, or brochure distributed to consumers in which more than one consumer product is offered for sale."

A "mail order seller" was one who offered for sale to consumers "a consumer product with a written warranty by means of direct mail solicitation or by means of an advertisement, in any medium, which includes instructions for ordering the product."

Montgomery Ward stated that these definitions, as written in the proposal, would encompass circulars, which are not catalogs, which "are intended to offer merchandise to the consumer at the advertised price which must be purchased at our stores. . . . The written warranties will be available for . . . inspection at the store."[227] The primary distinction between circulars and catalog/mail order sales, stated MOAA, was that the latter should cover "only those printed materials which include instructions for ordering the product without personally visiting a seller's retail establishment."[228] Thus, the language suggested by Montgomery Ward, to wit "which includes instructions for ordering the product which do not require a personal visit to the seller's establishment"[229] was incorporated into the final Rule.

It was also suggested by MOAA that the final Rule clarify that catalog and mail order sellers do not have the same duties as sellers covered by Section 702.3(a).[230] Accordingly, the language suggested in the statement of the American Retail Federation,[231] to wit:

Duties of the seller. Except as provided in paragraphs (c)–(d) of this section, the seller of a consumer product with a written warranty shall . . .

was adopted.

The proposed Rules had required the disclosure, in close conjunction to the warranted products of:

(i) The warranty designation of each such product, and

(ii) That the written warranty is available free on request, and the address where such warranty can be obtained.

Beatrice Foods, NRMA and others recommended the deletion of the requirement that warranty designations be included in catalogs and mail order solicitations, as being impractical, unnecessary, or unduly burdensome.[232] NRMA stated that:

. . . (a) retailer may prefer not to discuss warranties at all, and the designation requirement therefore introduces an unwanted factor. Space and time are at a premium in all advertising, and the retailer should be free to use its time and space in what it considers the most effective method . . . Furthermore, requiring disclosure of warranty designation(s) will fall discriminately on interstate retailers, because designations may vary

from one state to another, depending on the availability of certain remedies . . . For retailers which do business in more than one state, specifying such complexities in each advertisement or catalog would take up an undue amount of space . . . Moreover, a single product may be burdened with numerous disclosures, all of which must be 'clear and conspicuous.'[233]

Nutone Division stated that "if a catalogue includes a copy of the complete warranty for the products which are described therein, it would not be necessary to show the warranty designation and the address which a free copy of the warranty can be obtained on each page. . . ."[234] Sears said: "The warranty statement could be provided on one page and references to it could be set forth where the products are displayed."[235] Direct Mail & Marketing Association ("DMMA"), National Association of Photographic Manufacturers and others suggested that a single location in the catalog or solicitation contain warranty information, and that catalog and mail order sellers be permitted to refer consumers to such page or pages.[236] Gambles and Eddie Bauer suggested that the catalog seller be given the option of either printing the entire warranty or warranties covering the merchandise being offered for sale, or mailing the disclosure as to the availability of warranties and responding to warranty requests from consumers.[237]

In view of these submissions, the final Rule has been changed to require that mail order or catalog sellers

clearly and conspicuously disclose in such catalog or solicitation in close conjunction to the description of warranted product, or in an information section of the catalog or solicitation clearly referenced, including a page number, in close conjunction to the description of the warranted product, either:

(A) the full text of the written warranty; or

(B) that the written warranty can be obtained free upon specific written request, and the address where such warranty can be obtained. If this option is selected, such seller shall promptly provide a copy of any written warranty requested by the consumer.

DMMA, MOAA, NRMA and Montgomery Ward stated that the warrantor should be required to supply the catalog or mail order sellers with copies of warranties, so as to enable such sellers to comply with the requirements set forth in this sub-paragraph.[238] Accordingly, section 702.3(b)(2) requires warrantors to "provide catalog, mail order. . . . sellers with copies of written warranties necessary for such sellers to comply with the requirements set forth in paragraph(s) (c) . . . of this section."

DOOR-TO-DOOR SALES

The proposed rule stated:

any seller who offers for sale to consumers a consumer product with a written warranty by means of door-to-door sales shall, prior to any sales transaction, present the consumer with a copy of the written warranty which the consumer may retain even if no purchase is made.

(2) Door-to-door-sale means a sale of consumer products in which the seller or his representatives personally solicits the sale, including those in response to or following an invitation by a buyer, and the buyer's agreement to offer to purchase is made at a place other than the place of business of the seller.

Herschel Elkins and Harvey Freed suggested that the language "prior to any sales transaction" was unduly vague,[239] and Sears stated that it could be construed as "requiring the warranty to be provided to consumers before any sales presentation is made, regardless of whether there is any possibility of a sale being made."[240] Dutterer's of Manchester Corp. pointed out that a distinction needed to be drawn between "prospecting for an *appointment* at the door" and the actual commencement of the sale process in the home, when the representative has returned to comply with a preset appointment; only during the latter instance should the written warranty be presented.[241] Accordingly, the final Rule uses the language "prior to the consummation of the sale."

Some of the comments submitted by industry representatives also disclosed the need for a definition of the term "consumer" for purposes of this section. Field Enterprises ("Field") stated: ". . . (T)here are many circumstances in which either the insubstantial nature of the seller's contact, or the express or implied unwillingness or inability of the person contacted to enter into a sales transaction, would justify the sales representative's concluding that the person contacted is not a 'consumer' or 'prospective consumer' for purposes of the Act. Unfortunately, proposed Section 702(3)(e)(1) . . . offers no criteria . . . To resolve this ambiguity . . . the Commission should define 'consumer' for purposes of Section 702.3(e) to include only individuals solicited by a door-to-door seller who either indicates sufficient interest in the seller's product or maintain sufficient contact with the seller for the seller reasonably to conclude that the individual solicited is interested in purchasing the product."[242]

In light of these comments, the Commission has changed the word "consumer" to "prospective buyer", and has adopted the definition suggested by Field Enterprises, and endorsed by the Direct Selling Association ("DSA").

any individual solicited by a door-to-door seller to buy a consumer product who indicates sufficient interest in that consumer product or maintains sufficient contact with the seller for the seller reasonably to conclude that the person solicited is considering purchasing the product.[243]

DSA and Field also argued in some of the comments that the proposed Rule discriminated against door-to-door sellers.[244] Fixed location sellers as opposed to door-to-door sellers, were not required under the proposed Rule to provide consumers with copies of warranties but merely to make copies available for the consumer's inspection. Also, fixed location sellers as well as catalog and mail order sellers were only required to make warranties available upon request under the proposed Rule.

The final Rule adopts portions of the language proposed by Field,[245] and endorsed by DSA,[246] and seeks to equalize the duties of the door-to-door seller with those imposed on other sellers.

The final Rule requires the door-to-door seller to "disclose the fact that the sales representative has copies of the warranties for the warranted products being offered for sale which may be in-

[243] R–1–3–3, 809, Field; Tr. 759, DSA.

[244] R–1–4–1, 287–89, DSA; R–1–3–3, 805–808 Field.

[245] R–1–3–3, 808–9, Field: "(e) *Door-to-door sales.*

(1) This subsection contains the rules applicable to door-to-door sellers under this Part.

(2) Any seller who offers for sale a consumer product with a written warranty by means of door-to-door sales to individuals shall, prior to the completion of any sales transaction:

(A) Disclose to consumers in a manner permitted by paragraph (3) of this subsection (e):

(i) The written warranty designation of each product;

(ii) The fact that the sales representative has in his possession copies of the warranties for the products, and that these copies may be inspected by the consumer at his request at any time during the course of a sales presentation; and

(iii) The fact that a copy of the written warranty may be obtained for the consumer to retain free on request, and the means by which such a copy may be obtained (including the address where such warranty may be obtained, if it is to be made available by mail);

(B) Ensure that each of its sales representatives carries with him a copy of each warranty for each product offered for sale, and cause such copies to be kept up-to-date in the manner required of other sellers with respect to binders under subsection (a);

(C) Provide a copy of any written warranty requested by the consumer, either by mailing or otherwise delivering to the consumer a separate document containing such warranty or by setting forth in a copy of any sales contract actually entered into with the consumer a clear and conspicuous statement of the warranty;

(3) The disclosure required by paragraph (2)(A) of this subsection (e) may be made either (A) orally or (B) clearly and conspicuously in writing, on the page containing the description of the warranted product, in any flier or brochure distributed to consumers which they are permitted by the seller to retain.

(4) For the purposes of this subsection (a): (A) "door-to-door sale" means [present definition in section 702.3(e)(2)]".

[246] Tr. 759, DSA.

V40251 DEC 31 75 XUM

spected by the prospective buyer at any time during the sales presentation. Such disclosure shall be made orally and shall be included in any written materials shown to prospective buyers."

The duty corresponds to that required of other sellers. Sales representatives need only disclose the fact that they have copies or the warranties for the warranted products being offered for sale, which may be inspected by the prospective buyer.

Finally, DSA recommended that the final Rule clarify that door-to-door sellers are to be governed by this section only, and not by other sections governing other sellers.[247] Section 702.3(a) of the final Rule accomplishes this purpose.[248]

VI. *Effective Date of the Rules.* Section 112(b) of the Act states:

> Section 102(a) shall take effect 6 months after the final publication of rules respecting such section; except that the Commission, for good cause shown, may postpone the applicability of such sections until one year after such final publication in order to permit any designated classes of suppliers to bring their written warranties into compliance with rules promulgated pursuant to this title.

The Commission has given careful consideration to requests by affected parties that a reasonable length of time be allowed to afford them opportunity to come into conformity with the provisions of the Rules.[249] Montgomery Ward submitted that:

> Catalog sellers will have to revise the media. Many catalog pages are 'locked in' six months before publication and changes after that date are extremely expensive. Since the sellers cannot 'set' their catalog until warrant(ors) of products listed in their catalogs have finalized the warranties, one year after publication is a minimum time for compliance by catalog sellers.[250]

The Commission recognizes the special problems concerning lead time for publications of catalog sellers. It is also aware that the revisions in warranties, packaging, and related materials necessitated by the final Rules may affect literally billions of pieces of paper. Furthermore, the Commission may promulgate other related Rules with respect to written warranties within the next six months. It is not the intent of the Commission to have warrantors incur unnecessary expenses in having to reprint their warranties multiple times in order to come into compliance with the successive promulgation of warranty rules.

For these reasons the Commission believes that a delay of the effective date of the Rule is necessary. Accordingly, Parts 701 and 702 will become effective one year after the date of promulgation.

[247] R-1-4-1, 291, DSA.

[248] "(a) *Duties of the seller.* The seller, *except as provided in paragraphs* (c)-(d) *of this Section*, of a consumer product with a written warranty shall": (emphasis supplied).

[249] R-1-3-2, 511-13, Montgomery Ward; Tr. 286, Friedman, National Association of Catalog Showroom Merchandisers; Tr. 951, Daly, Direct Mail/Marketing Association.

[250] R-1-3-2, 513, Montgomery Ward.

The Commission has now considered all matters of fact, law, policy and discretion, including the data, views, and arguments presented on the Record by interested parties in response to the Notices, as prescribed by law, and has determined that the adoption of the Trade Regulation Rule and its Statement of Basis and Purpose set forth herein is in the public interest.

Accordingly, the Commission hereby adopts the foregoing Statement of Basis and Purpose, and hereby amends Title 16 of CFR, Chapter 1, Subchapter G, Rules, Regulations, Statements and Interpretations under the Magnuson-Moss Warranty Act, by adding new parts 701 and 702 as follows:

PART 701—DISCLOSURE OF WRITTEN CONSUMER PRODUCT WARRANTY TERMS AND CONDITIONS

Sec.
701.1 Definitions.
701.2 Scope.
701.3 Written warranty terms.
701.4 Owner registration cards.

AUTHORITY: 15 U.S.C. 2302 and 2309.

§ 701.1 Definitions.

(a) "The Act" means the Magnuson-Moss Warranty Federal Trade Commission Improvement Act, 15 U.S.C. 2301, *et seq.*

(b) "Consumer product" means any tangible personal property which is distributed in commerce and which is normally used for personal, family, or household purposes (including any such property intended to be attached to or installed in any real property without regard to whether it is so attached or installed. Products which are purchased solely for commercial or industrial use are excluded solely for purposes of this Part.

(c) "Written warranty" means—(1) any written affirmation of fact or written promise made in connection with the sale of a consumer product by a supplier to a buyer which relates to the nature of the material or workmanship and affirms or promises that such material or workmanship is defect free or will meet a specified level of performance over a specified period of time, or

(2) any undertaking in writing in connection with the sale by a supplier of a consumer product to refund, repair, replace, or take other remedial action with respect to such product in the event that such product fails to meet the specifications set forth in the undertaking, which written affirmation, promise or undertaking becomes part of the basis of the bargain between a supplier and a buyer for purposes other than resale of such product.

(d) "Implied warranty" means an implied warranty arising under State law (as modified by secs. 104(a) and 108 of the Act) in connection with the sale by a supplier of a consumer product.

(e) "Remedy" means whichever of the following actions the warrantor elects:
(1) repair,
(2) replacement, or
(3) refund; except that the warrantor may not elect refund unless: (i) the warrantor is unable to provide replacement and repair is not commercially practicable or cannot be timely made, or
(ii) the consumer is willing to accept such refund.

(f) "Supplier" means any person engaged in the business of making a consumer product directly or indirectly available to consumers.

(g) "Warrantor" means any supplier or other person who gives or offers to give a written warranty.

(h) "Consumer" means a buyer (other than for purposes of resale or use in the ordinary course of the buyer's business) of any consumer product, any person to whom such product is transferred during the duration of an implied or written warranty applicable to the product, and any other such person who is entitled by the terms of such warranty or under applicable State law to enforce against the warrantor the obligations of the warranty.

(i) "On the face of the warranty" means—(1) where the warranty is a single sheet with printing on both sides of the sheet or where the warranty is comprised of more than one sheet, the page on which the warranty text begins;
(2) where the warranty is included as part of a larger document, such as a use and care manual, the page in such document on which the warranty text begins.

§ 701.2 Scope.

The regulations in this part establish requirements for warrantors for disclosing the terms and conditions of written warranties on consumer products actually costing the consumer more than $15.00.

§ 701.3 Written warranty terms.

(a) Any warrantor warranting to a consumer by means of a written warranty a consumer product actually costing the consumer more than $15.00 shall clearly and conspicuously disclose in a single document in simple and readily understood language, the following items of information: (1) The identity of the party or parties to whom the written warranty is extended, if the enforceability of the written warranty is limited to the original consumer purchaser or is otherwise limited to persons other than every consumer owner during the term of the warranty;

(2) A clear description and identification of products, or parts, or characteristics, or components or properties covered by and where necessary for clarification, excluded from the warranty;

(3) A statement of what the warrantor will do in the event of a defect, malfunction or failure to conform with the written warranty, including the items or services the warrantor will pay for or provide, and, where necessary for clarification, those which the warrantor will not pay for or provide;

(4) The point in time or event on which the warranty term commences, if different from the purchase date, and the time period or other measurement of warranty duration;

(5) A step-by-step explanation of the procedure which the consumer should follow in order to obtain performance of any warranty obligation, including the persons or class of persons authorized to perform warranty obligations. This includes the name(s) of the warrantor(s), together with: the mailing address(es) of the warrantor(s), and/or the name or title and the address of any employee or department of the warrantor responsible for the performance of warranty obligations, and/or a telephone number which consumers may use without charge to obtain information on warranty performance;

(6) Information respecting the availability of any informal dispute settlement mechanism elected by the warrantor in compliance with Part 703 of this subchapter;

(7) Any limitations on the duration of implied warranties, disclosed on the face of the warranty as provided in Section 108 of the Act, accompanied by the following statement:

> Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

(8) Any exclusions of or limitations on relief such as incidental or consequential damages, accompanied by the following statement, which may be combined with the statement required in sub-paragraph (7) above:

> Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

(9) A statement in the following language:

> This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

(b) Paragraph (a)(1)—(9) of this Section shall not be applicable with respect to statements of general policy on emblems, seals or insignias issued by third parties promising replacement or refund if a consumer product is defective, which statements contain no representation or assurance of the quality or performance characteristics of the product; provided that (1) the disclosures required by paragraph (a)(1)—(9) are published by such third parties in each issue of a publication with a general circulation, and (2) such disclosures are provided free of charge to any consumer upon written request.

§ 701.4 Owner registration cards.

When a warrantor employs any card such as an owner's registration card, a warranty registration card, or the like, and the return of such card is a condition precedent to warranty coverage and performance, the warrantor shall disclose this fact in the warranty. If the return of such card reasonably appears to be a condition precedent to warranty coverage and performance, but is not such a condition, that fact shall be disclosed in the warranty.

PART 702—PRE-SALE AVAILABILITY OF WRITTEN WARRANTY TERMS

Sec.
702.1 Definitions.
702.2 Scope.
702.3 Pre-sale availability of written warranty terms.

AUTHORITY: 15 U.S.C. 2302 and 2309.

§ 702.1 Definitions.

(a) "The Act" means the Magnuson-Moss Warranty Federal Trade Commission Improvement Act, 15 U.S.C. 2301, *et seq.*

(b) "Consumer product" means any tangible personal property which is distributed in commerce and which is normally used for personal, family, or household purposes (including any such property intended to be attached to or installed in any real property without regard to whether it is so attached or installed). Products which are purchased solely for commercial or industrial use are excluded solely for purposes of this Part.

(c) "Written warranty" means—(1) any written affirmation of fact or written promise made in connection with the sale of a consumer product by a supplier to a buyer which relates to the nature of the material or workmanship and affirms or promises that such material or workmanship is defect free or will meet a specified level of performance over a specified period of time, or

(2) any undertaking in writing in connection with the sale by a supplier of a consumer product to refund, repair, replace, or take other remedial action with respect to such product in the event that such product fails to meet the specifications set forth in the undertaking, which written affirmation, promise or undertaking becomes part of the basis of the bargain between a supplier and a buyer for purposes other than resale of such product.

(d) "Warrantor" means any supplier or other person who gives or offers to give a written warranty.

(e) "Seller" means any person who sells or offers for sale for purposes other than resale or use in the ordinary course of the buyer's business any consumer product.

(f) "Supplier" means any person engaged in the business of making a consumer product directly or indirectly available to consumers.

(g) "Binder" means a locking binder, notebook, or similar system which will provide the consumer with convenient access to copies of product warranties.

§ 702.2 Scope.

The regulations in this part establish requirements for sellers and warrantors for making the terms of any written warranty on a consumer product available to the consumer prior to sale.

§ 702.3 Pre-sale availability of written warranty terms.

The following requirements apply to consumer products actually costing the consumer more than $15.00: (a) *Duties of the seller.* Except as provided in paragraphs (c)-(d) of this section, the seller of a consumer product with a written warranty shall:

(1) make available for the prospective buyer's review, prior to sale, the text of such written warranty by the use of one or more of the following means:

(i) clearly and conspicuously displaying the text of the written warranty in close conjunction to each warranted product; and/or

(ii) maintaining a binder or series of binders which contain(s) copies of the warranties for the products sold in each department in which any consumer product with a written warranty is offered for sale. Such binder(s) shall be maintained in each such department, or in a location which provides the prospective buyer with ready access to such binder(s), and shall be prominently entitled "Warranties" or other similar title which clearly identifies the binder(s). Such binder(s) shall be indexed according to product or warrantor and shall be maintained up to date when new warranted products or models or new warranties for existing products are introduced into the store or department by substituting superseding warranties and by adding new warranties as appropriate. The seller shall either:

(A) display such binder(s) in a manner reasonably calculated to elicit the prospective buyer's attention; or

(B) make the binders available to prospective buyers on request, and place signs reasonably calculated to elicit the prospective buyer's attention in prominent locations in the store or department advising such prospective buyers of the availability of the binders, including instructions for obtaining access; and/or

(iii) displaying the package of any consumer product on which the text of the written warranty is disclosed, in a manner such that the warranty is clearly visible to prospective buyers at the point of sale; and/or

(iv) "placing in close proximity to the warranted consumer product a notice which discloses the text of the written warranty, in a manner which clearly identifies to prospective buyers the product to which the notice applies;

(2) Not remove or obscure any warranty disclosure materials provided by a warrantor, except:

(i) where such removal is necessary for store window displays, fashion shows, or picture taking; or

(ii) where the seller otherwise, through means provided for in subparagraph (1) above, makes the terms of the warranty information available to the consumer.

(b) *Duties of the warrantor.* (1) A warrantor who gives a written warranty warranting to a consumer a consumer product actually costing the consumer more than $15.00 shall:

(i) Provide sellers with warranty materials necessary for such sellers to comply with the requirements set forth in

Under Section 110(a)(4) the Commis-

federal rights or remedies whether or not

if a warrantor incorporates an informal

V40251 DEC 31 75 XUM

paragraph (a) of this section, by the use of one or more by the following means:

(A) Providing a copy of the written warranty with every warranted consumer product; and/or

(B) Providing a tag, sign, sticker, label, decal or other attachment to the product, which contains the full text of the written warranty; and/or

(C) Printing on or otherwise attaching the text of the written warranty to the package, carton, or other container if that package, carton or other container is normally used for display purposes. If the warrantor elects this option a copy of the written warranty must also accompany the warranted product; and/or

(D) Providing a notice, sign, or poster disclosing the text of a consumer product warranty.

If the warrantor elects this option, a copy of the written warranty must also accompany each warranted product.

(ii) Provide catalog, mail order, and door-to-door sellers with copies of written warranties necessary for such sellers to comply with the requirements set forth in paragraphs (c) and (d) of this section.

(2) Sub-paragraph (1) of this paragraph (b) shall not be applicable with respect to statements of general policy on emblems, seals or insignias issued by third parties promising replacement or refund if a consumer product is defective, which statements contain no representation or assurance of the quality or performance characteristics of the product; provided that (i) the disclosures required by 701.3(a)(1)–(9) are published by such third parties in each issue of a publication with a general circulation, and (ii) such disclosures are provided free of charge to any consumer upon written request.

(c) *Catalog and Mail Order Sales.* (1) For purposes of this paragraph:

(i) "Catalog or mail order sales", means any offer for sale, or any solicitation for an order for a consumer product with a written warranty, which includes instructions for ordering the product which do not require a personal visit to the seller's establishment.

(ii) "Close conjunction" means on the page containing the description of the warranted product, or on the page facing that page.

(2) Any seller who offers for sale to consumers consumer products with written warranties by means of a catalog or mail order solicitation shall:

(i) clearly and conspicuously disclose in such catalog or solicitation in close conjunction to the description of warranted product, or in an information section of the catalog or solicitation clearly referenced, including a page number, in close conjunction to the description of the warranted product, *either:*

(A) the full text of the written warranty; or

(B) that the written warranty can be obtained free upon specific written request, and the address where such warranty can be obtained. If this option is elected, such seller shall promptly provide a copy of any written warranty requested by the consumer.

(d) *Door-to-door sales.* (1) For purposes of this paragraph:

(i) "Door-to-door sale" means a sale of consumer products in which the seller or his representative personally solicits the sale, including those in response to or following an invitation by a buyer, and the buyer's agreement to offer to purchase is made at a place other than the place of business of the seller.

(ii) "Prospective buyer" means an individual solicited by a door-to-door seller to buy a consumer product who indicates sufficient interest in that consumer product or maintains sufficient contact with the seller for the seller reasonably to conclude that the person solicited is considering purchasing the product.

(2) Any seller who offers for sale to consumers consumer products with written warranties by means of door-to-door sales shall, prior to the consummation of the sale, disclose the fact that the sales representative has copies of the warranties for the warranted products being offered for sale, which may be inspected by the prospective buyer at any time during the sales presentation. Such disclosure shall be made orally and shall be included in any written materials shown to prospective buyers.

Effective: December 31, 1976.

Promulgated by the Federal Trade Commission December 31, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

[FR Doc.75-34894 Filed 12-30-75;8:45 am]

PART 703—INFORMAL DISPUTE SETTLEMENT MECHANISMS

Promulgation of Rule

THE PROCEEDINGS

The Federal Trade Commission, pursuant to Title I, Sections 109 and 110 of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act, Pub. L. 93-637 (15 U.S.C. §§ 2309, 2310), hereafter referred to as the "Act", has conducted a proceeding for the promulgation of a Rule setting forth minimum requirements for the implementation and operation of any informal dispute settlement mechanism incorporated into the terms of a written warranty subject to the Act.

Notice of this proceeding, including a proposed Rule, was published in the FEDERAL REGISTER of July 16, 1975 (40 FR 29895). The Notice urged all interested persons to express their approval or disapproval of the proposed Rule, or to recommend revisions thereof, and to give a full statement of their views, supplemented by all appropriate documentation. In addition, the Notice highlighted certain issues or provisions of the proposed Rule that were believed to be important in the successful establishment or operation of informal dispute settlement mechanisms. The documents supporting the proposed Rule, and a report of the Commission staff discussing the proposed Rule and the supporting documentation, were placed on the public record and made available for examination and copying.

Interested parties were thereafter afforded opportunity to participate in the proceeding through the submission of written data, views and arguments, and to appear and express their views orally and to suggest amendments, revisions, and additions to the proposed Rule. A period of 60 days was allowed for submission of written comments on the proposed Rule. Public hearings, as announced in the Notice, were held in Washington, D.C., September 15–18, 1975, in Chicago, Illinois; September 22–25, 1975, in Los Angeles, California; September 29 through October 1, 1975; and in San Francisco, California, on October 2, 1975. Every person who had expressed a desire to present his or her views orally at these hearings was accorded an opportunity to do so. The public record remained open for thirty days following the hearings for receipt of any other written data, views or arguments.

Upon careful analysis and review of the written and oral comments, the Commission has made certain modifications to the proposed Rule published on July 16, 1975. The Rule, the rationale for the modifications, and the Record relating thereto, are discussed within the Statement of Basis and Purpose appearing below as part of this Notice. The modifications do not raise issues of law or fact which were not fully addressed in the Proceeding. Therefore with good cause the Commission is promulgating this Rule without further invitation for comment on the modifications. The full text of the Rule follows the Statement of Basis and Purpose.

STATEMENT OF BASIS AND PURPOSE

I. Overview of the Act. Section 110(a)(2) of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act, P.L. 93-637 (15 U.S.C. 2310) directs the Federal Trade Commission to prescribe rules setting forth minimum standards for any informal dispute settlement mechanism which is incorporated into the terms of a written warranty subject to the Act.

Section 110(a)(1) of the Act begins with a broad statement of Congressional policy:

> Congress hereby declares it to be its policy to encourage warrantors to establish procedures whereby consumer disputes are fairly and expeditiously settled through informal dispute settlement mechanisms.

Section 110(a)(2) provides:

> The Commission shall prescribe rules setting forth minimum requirements for any informal dispute settlement procedure which is incorporated into the terms of a written warranty to which any provision of this title applies. Such rules shall provide for participation in the procedure by independent or governmental entities.

Under Section 110(a)(4) the Commission may review the operation of any dispute settlement procedure, resort to which is stated in a written warranty to be a pre-requisite to the consumer pursuing a legal remedy under Section 110 of the Act. In addition, any interested person may file a written complaint with the Commission and cause the Commission to conduct such a review. If the Commission finds that the procedure or its implementation, is not in compliance with minimum requirements prescribed by the Commission, then under Section 110(a)(4) the Commission may take appropriate remedial action under this Act, or any other provision of law. Section 110(b) of the Act states that failure by any person to comply with any requirement imposed on such person by the Act, or by a Rule thereunder, shall be a violation of Section 5(a)(1) of the Federal Trade Commission Act (15 U.S.C. 45(a)(1)), thus making available the Commission's injunctive and other powers.

Under Section 110(a)(3), if a warrantor incorporates a complying dispute settlement mechanism into the terms of the written warranty, and the warrantor requires that the consumer resort to the mechanism before pursuing any rights or remedies under Section 110, then the consumer may not commence a civil action under Section 110(d) (except for the limited purpose of establishing the representative capacity of a class of plaintiffs), without first seeking redress through the mechanism.

Section 110(d) permits any consumer damaged by reason of the failure of any supplier, warrantor, or service contractor to comply with any obligation under the Act, or under a written or implied warranty, or service contract, to bring suit in either a State court, or federal district court (specific jurisdictional requirements are imposed on federal district court actions). This Section also permits a consumer who prevails in a legal action to recover costs and expenses, including reasonable attorney fees.

When read together with Section 110(d), Section 110(a)(3) might be construed as requiring a consumer to resort to warrantor's complying informal dispute settlement mechanism before pursuing *any* legal rights or remedies. However, Section 111(b)[1] and the Conference Report[2] make clear that the consumer would be free to pursue alternate state or federal rights or remedies whether or not warrantor has incorporated a complying mechanism into the terms of his written warranty.

Thus the proper reading of Sections 110(a)(3) and 110(d) is that the consumer would be required to resort to warrantor's complying mechanism only when pursuing rights or remedies newly created by Section 110(d), such as the class action under Section 110(d)(3), attorney fees under Section 110(d)(2), or, by reference, any right or remedy newly created by Title I of the Act (or Rules thereunder) relating to written or implied warranties, service contracts, or other obligations.

Section 110(e) and the legislative history of the Act, indicate that Congress envisioned mechanisms as a warrantor's opportunity to cure a possible breach of warranty in lieu of other opportunities:

Section 110(e) states:

> No action (*other than . . . an action . . .* to which *subsection (a)(3)* [an informal dispute settlement mechanism] *applies*) [Emphasis added] may be brought under subsection (d) for failure to comply with any obligation under any written or implied warranty or service contract, unless the person obligated under the warranty or service contract is afforded a reasonable opportunity to cure such failure to comply.

The Conference Report states:

> A consumer might not bring an action for failure of a supplier to comply with his obligations under Title I or under a warranty or service contract on a consumer product *with respect to which no informal dispute settlement mechanism was available* unless the person obligated under the warranty or service contract had been afforded a reasonable opportunity to cure the breach. (Emphasis added)[3]

Thus an informal dispute settlement mechanism incorporated into the terms of a written warranty, may operate in lieu of a warrantor's right to an opportunity to cure, and a consumer may proceed directly to warrantor's dispute settlement mechanism without affording warrantor an opportunity to cure under subsection (e). (For reasons of fact and policy, the Rule makes clear that warrantors may encourage, though not require, consumers to seek redress from a warrantor directly,[4] and it appears that most consumers do contact the seller or warrantor directly.)[5]

Section 110 does not require warrantors to establish complying informal mechanisms for resolution of consumer warranty disputes. Rather, the legislative policy, set out in Section 110(a)(1), is to "encourage" warrantors toward that end. The Section requires only that if a warrantor incorporates an informal mechanism into the terms of a written warranty, then the mechanism, and its implementation, must comply with minimum requirements to be prescribed by Federal Trade Commission Rules.

It should be noted that the incorporation of a complying mechanism into the terms of a written warranty would not relieve a warrantor of other obligations under this Act, or under other provisions of law, to proceed fairly and expeditiously in non-mechanism complaint handling, or in complaint handling through an informal dispute settlement mechanism not incorporated into the terms of a written warranty. In other words, by incorporating a mechanism into a written warranty, the warrantor undertakes obligations in addition to, not in lieu of, obligations under existing law.

II. General Basis for the Rule. Section 110 of the Act requires that warranty disputes referred to informal dispute settlement mechanisms are to be resolved "fairly and expeditiously." Section 110(a)(2) requires that the Commission rule provide for participation by independent or governmental entities. Section 110(a)(4) contemplates that the rule will contain requirements to facilitate monitoring of Mechanisms by the Commission and interested persons. The legislative scheme of "encouraging" warrantors to voluntarily bear the cost of establishing informal mechanisms necessitates a careful analysis of costs or other disincentives that might result from the Commission rule. Beyond these general contours, the Act and the legislative history, including the Conference Report[6] and the Senate[7] and House[8] Reports, are largely silent as to the precise form, procedures and other requirements that the Commission must prescribe.

Accordingly, the Commission has relied on a variety of secondary legislative and other sources, including the following: Studies of existing intra-company and third-party complaint handling mechanisms; charters, audits and reports of current industry-sponsored informal dispute settlement mechanisms; interviews with consumer affairs professionals, including persons presently engaged in resolving consumer complaints; analyses of consumer warranty complaints received by the Commission; and other sources. The nature and general implications of these materials for this rule are presented briefly below.[9]

---

[1] Nothing in this title shall invalidate or restrict any right or remedy of any consumer under State law or any other Federal law. 15 U.S.C. § 2311(b)(1).

[2] Of course, if a consumer chooses to seek redress without utilizing the provisions of Section 110, section 111(b) preserves all *alternative* avenues or redress, and utilization of any informal dispute settlement mechanism would then not be required by any provision of this Act. (Emphasis added) Conference Report [to accompany S. 356], S. Report No. 93-1408, 93rd Cong. 2d Sess. (1974) (Hereafter cited as R 1-2-3, 1060, Conference Report.) [9] The specific Rule provisions (including modifications) are predicated on the conclusions or implications drawn from the statutory language and history, from the extensive Record compiled following publication of the proposed Rule, and from the array of source material cited. The rationale for specific Rule provisions and modifications is discussed in the section by section analysis in part IV, below.

V40251 DEC 31 75 XUM

Extensive discussions of current warrantor mechanisms employed to handle consumer complaints can be found in a 1973 Conference Board Report [9] and a 1972 report entitled "Initiatives in Corporate Responsibility" prepared for the Senate Committee on Commerce.[11] Both reports illustrate the wide variety of forms and procedures of in-house consumer affairs programs currently sponsored by warrantors. These generally reflect inherent differences in products, in distribution and in warranty service patterns. For example, while large appliances are traditionally serviced at the consumer's residence, automobiles are customarily serviced at dealerships. Small appliances are often taken to a service center or returned to the factory for repair or servicing. Among these, and even within product classes, warranty performance modes may vary considerably.[12] While warrantors may in some instances authorize local dealers to make repair or replacement decisions, in other instances warrantors will rely only on zone or factory personnel to authorize service or replacement. Occasionally authority may be divided. Under any of these systems there may be considerable confusion among consumers as to where to turn for warranty performance authorization. Instances have been reported in which the confusion has apparently been exploited by warrantors to avoid warranty performance altogether.[13]

The Conference Board Report cited a number of illustrations in which improved company complaint handling actually brought a reduction in the incidence of consumer complaints. For example, within five years after Whirlpool substantially revamped its complaint handling practices, complaints dropped from nine per thousand products sold, to only two per thousand—in spite of the fact that complaint ratios for other appliance companies were rising during this period.[14]

Nonetheless, the Conference Board Report indicated that consumer complaints, involving both warranted and unwarranted products, are not always handled fairly and expeditiously by warrantors or retailers. Delays or failure to handle complaints may be due to two factors:

(1) Some companies evidently place little or no importance in handling such complaints.

A recent report prepared for the Senate Committee on Commerce describing consumer affairs programs offered by major U.S. corporations found that replies to the Committee's questionnaire indicated that some corporations were unfavorable to the idea of initiating such programs.[15]

The Conference Board found some companies openly hostile to the idea of instituting consumer affairs programs and cited a number of companies' attitudes toward such programs as "public relations facelifting" activities rather than honest attempts to remedy consumer problems.[16]

(2) The mere existence of manufacturer complaint-handling mechanisms does not in itself guarantee fair and expeditious settlement of warranty disputes.

The Report noted:

. . . (i)t would be an overstatement to assert that simply because a firm has a consumer affairs unit it has necessarily launched an effective customer relations effort—the facts are not always coincident.[17]

The consumer affairs professionals surveyed by the Conference Board agreed that consumer problems would result from the following complaint handling practices: delay in responding to complaints, attempts to shift the responsibility elsewhere, using form letter responses, failure to take corrective action to forestall additional complaints, alienating company personnel or dealers by promising action to consumers that could not be performed, and failure to explain why a complaint was unjustified.[18]

Studies examined by Staff, interviews with third-party complaint handling officials, and analysis of consumer complaints addressed to the Commission during the course of drafting the proposed Rule indicated that current corporate complaint handling mechanisms can and have operated to delay consumers from fair and expeditious settlement of warranty disputes.[19]

For example, a study published in the Winter, 1973 issue of the *Journal of Consumer Affairs* (which attempted to draw socio-economic profiles of consumers dissatisfied with household appliances) found respondents registering a large number of complaints before receiving satisfactory resolution:

Approximately 48 percent complained only once, 23 complained twice, and almost 29 percent made three or more expressions of dissatisfaction before the matter was resolved to their satisfaction. Reasons for the multiple effort included a failure to take the appliance to the correct outlet in the channel for repair, shoddy workmanship in the initial repair process, disagreement over whether a given problem was covered by warranty, and disagreement as to which person in the distribution channel was responsible for the repairs.[20]

The Federal Trade Commission regularly receives correspondence from consumers complaining of unreasonable delays in remedying defects of warrantied products.[21] A number of these letters have been placed on the public record.[22] While the validity and prevalence of such complaints cannot be judged solely on the basis of Commission correspondence, two examples illustrate the potential for delay and frustration under current complaint handling practices in some companies.

A California consumer described thirty separate contacts with a dealer, factory representative and warrantor. Although promises to remedy the defect were made at a number of distributional levels, the consumer alleges that an apparent auto transmission defect has never been corrected. The consumer's log of repair attempts ends on this note:

In conclusion ---------- (auto company) has sold me a new car with a warranty that they will not back up or honor. I don't feel I am asking much, just a new car that runs like a new one . . .[23]

Even a favorable small claims court judgment was unable to help one frustrated consumer with a defective bicycle purchased for nearly $150. Although the warrantor offered a lifetime written guarantee, ten days after purchase the bike developed hairline cracks in the frame. The dealer attributed the cracks to poor packaging and rough shipping practices by the warrantor. A month later, hairline cracks split the frame rendering the bike unsafe to ride. The dealer returned the bike to the supplier for inspection. Neither the dealer, the supplier nor the warrantor would refund the consumer's purchase price. A month later the consumer received a favorable judgment in small claims court ordering that the guarantee be honored. Due to lack of jurisdiction the court could not levy execution on the judgment.[24]

III. General Conclusions and Implications for the Rule. The concerns expressed in the legislative history of the Act, in studies, interviews with consumer affairs professionals, and other sources referred to in the sections above, and in the Record compiled since publication of this proceeding, have included the following: frequent lack of clear avenues of redress; delays; absence of managerial commitment to complaint resolution; undue burdens placed on consumers, such as use of complicated forms and procedures; and unfulfilled promises to resolve complaints. The Commission has also recognized that despite these shortcomings, certain existing complaint handling mechanisms—third party and intracompany—have operated to resolve consumer complaints in a fair and expeditious manner.

The intent of the Act is to provide for fair and expeditious settlement of consumer warranty disputes, through informal mechanisms established voluntarily by warrantors. The Commission has determined that this legislative scheme is best implemented by a careful balancing of consumer and warrantor interests. The Rule is intended to establish a framework for fair and expeditious settlement of warranty disputes at cost levels acceptable to warrantors. The Commission's determination to minimize Mechanism costs stems from two major concerns: If costs are too high, warrantors may decline to incorporate Mechanisms; in any event costs will be passed through to consumers in the form of higher product prices. Moreover, the Rule is intended to avoid disruption of current complaint handling mechanisms wherever possible. Emphasis is on mechanism self-regulation bolstered by public review of mechanism self-regulation bolstered by public review of mechanism operations, with minimal direct Federal Trade Commission involvement.

The Rule will permit a wide variation in form and procedures among complying mechanisms, in recognition of the variety among effective complaint handling mechanisms currently in existence. The intent is to avoid creating artificial or unnecessary procedural burdens so long as the basic goals of speed, fairness and independent participation are met. Specific requirements of the Rule are intended to ensure the integrity of Mechanisms, facilitate the monitoring and enforcement obligations of the Commission, and encourage consumer review and participation.

The Rule contains provisions relating to duties of warrantors, organization of dispute settlement mechanisms, qualifications of members, procedures, recordkeeping, audits, and openness of records and proceedings to the public. A section by section analysis of the Rule, including modifications based on the Record compiled following publication of the proposed Rule, is presented as part IV of this Statement of Basis and Purpose.

IV. Section by Section Analysis. *SECTION 703.2—DUTIES OF WARRANTORS.*

INTRODUCTION

In accordance with Section 110 of the Act,[25] the Commission hereby sets forth minimum rules to be adhered to by warrantors incorporating an informal dispute settlement mechanism into the terms of a written warranty.

A detailed discussion of these duties can be found below. Within the framework of Congressional intent as expressed in Title I, Section 110 and legislative history preceding adoption of the Act as discussed, the Rule prescribes duties of the warrantor to ensure that, if a warranty complaint arises:

(1) consumers have access to the Mechanism;

(2) consumers realize the legal consequences flowing from the decision to utilize or not utilize the Mechanism; and

(3) the Mechanism is able to settle warranty disputes fairly and expeditiously.

The rule proscribes warrantors from incorporating an informal dispute settlement mechanism ("Mechanism") that fails to comply with the provisions of Sections 703.3–703.8 of this Rule. Additionally, those warrantors incorporating a complying Mechanism into a written warranty are required to include minimal information disclosing the availability of an informal dispute settlement mechanism to be placed at points likely to attract the attention of consumers experiencing problems with a warranted product. Under the proposed Rule, this information would appear: (1) on the face of the written warranty; and (2) in a separate section of materials accompanying the product, if applicable. Also, a provision in the proposed Rule requiring warrantors to provide information regarding the Mechanism to retailers for distribution to consumers has been revised to allow warrantors greater flexibility in publicizing the existence of the Mechanism. Comments which resulted in this change are discussed *infra* in this Statement within the Section entitled "Consumer Awareness."

In addition to disclosure requirements fashioned to ensure accessibility for consumers and consumer awareness of legal consequences flowing from a choice to use or not to use the Mechanism at the time warranty complaints occur, the Rule contains additional warrantor duties to ensure the Mechanism's ability to handle warranty disputes fairly and expeditiously.

DUTIES OF THE WARRANTOR

(a) The warrantor shall not incorporate into the terms of a written warranty a Mechanism that fails to comply with the requirements contained in §§ 703.3–703.8. This paragraph shall not prohibit a warrantor from incorporating into the terms of a written warranty the step-by-step procedure which the consumer should take in order to obtain performance of any obligation under the warranty as described in section 102(a)(7) of the Act and required by Part 701 of this subchapter.

The Staff Report accompanying Part 703 discussed provision 703.2(a) in terms of language contained in the Act:

Section 110(a)(1) of the Act states that:

The Commission shall prescribe rules setting forth minimum requirements for *any informal dispute settlement procedure which is incorporated into the terms of a written warranty* to which any provision of this title applies. (Emphasis added.)

Thus any informal dispute settlement procedure incorporated by a warrantor into the terms of a written warranty is required by the Act to comply with minimum requirements prescribed by the Commission.[26]

The Staff Report indicated the interplay between Parts 701 and 703:

The last sentence of Section 703.2(a) makes it clear, however, that the warrantor may use the warranty as a place to provide information to consumers as to what steps they must take to obtain warranty relief from the warrantor. This would include information as to the steps consumers must take and the person or department consumers must contact to obtain performance of warranty obligations. Such a step-by-step procedure is not considered to be an informal dispute settlement procedure, since a dispute does not arise until the consumer has attempted, and failed, to get warranty performance. Additionally, Section 102(a)(7) of the Act authorizes the Commission to require warrantors to include in written warranties this step-by-step procedure, and the Commission has proposed to require it under proposed Part 701.[27]

The Record does not reflect opposition to Section 703.2(a). The Association of Home Appliance Manufacturers (AHAM) commended the provision:

We believe this section which prohibits reference to non-qualifying dispute mechanisms is sound. We commend especially the clarifying sentence which protects the warrantor's privilege to state the procedure a consumer should take to secure performance under warranty. However, to be consistent with our testimony under § 701.3(h) we urge the words "step-by-step" be eliminated, because they imply more than necessary detail.[28]

Ford Motor Company asked that the section be amended to clarify that the section applies only to warrantors offering complying informal dispute settlement mechanisms.[29]

Comments were received asking for clarification on inclusion of information regarding the existence of the Mechanism under Part 701 of the Rules.[30] It should be noted that under Section 701.2 (a) warrantors may include information regarding their own internal procedures for handling warranty disputes.

To prevent consumers from being misled into believing a Mechanism included under this provision complies with the Rule in Part 703 and must be used by the consumer, in certain instances, only complying Mechanisms can be included in the written warranty.

WARRANTY DISCLOSURE

(b) The warrantor shall disclose clearly and conspicuously at least the following information on the face of the written warranty:

Section 703.2(b) requires warrantors to disclose brief information on the face of the written warranty regarding the existence of a Mechanism, the name and address or name and telephone number of the Mechanism whereby consumers may register warranty complaints, a brief statement regarding the legal consequences flowing from a consumer's utilization or non-utilization of the Mechanism, as well as a reference to where more detailed information on the Mechanism could be found.

The Commission's authority to require warrantors to fully and conspicuously disclose information regarding the availability of a Mechanism and legal consequences stemming from a consumer's utilization or non-utilization of a Mechanism is found in Title I, Section 102 of the Act.

The Senate Report on the Act stressed the Committee's belief that Mechanisms will only be useful if consumers realize they exist.[31] The Report suggested that items specified for disclosure by the Act were not intended to be mandatory or exclusive.[32]

The Staff Report indicated that:

Other proposed Rules stemming from the Act will require other kinds of disclosure on the face of the written warranty. Therefore, extensive disclosures within the warranty regarding the mechanisms are neither necessary nor appropriate. Instead, the proposed Rule requires warrantors to clearly and conspicuously disclose on the face of the written warranty brief items of information concerning the availability of the Mechanism and the legal implications stemming from a consumer's decision to utilize or fail to utilize the Mechanism. . . . Since the Mechanism, while offering warrantors an opportunity to cure, delays consumers from pursuing legal remedies under Title I of the Act, the Mechanism necessarily becomes an important basis for the consumer's decision to purchase a particular product. Thus brief information concerning the Mechanism should be located within the written warranty.[33]

General comments on Section 703.2(b) varied widely with consumer representatives generally favoring even more extensive warranty disclosures[34] and a few industry representatives favoring modification[35] or exclusion of disclosures to avoid lengthening the warranty document.[36] However, most comments unfavorable to the provision simply suggested that the information could just as effectively be placed on the reverse side of the warranty.[37]

Comments from consumers cited the need for information regarding the Mechanism on the face of the warranty to ensure consumer access at the time of experiencing warranty disputes. The few industry comments on this provision failed to persuade the Commission that other disclosure modes, as provided in the Rule, were sufficient in themselves to fulfill one of the Rule's main purposes, that of ensuring access to the Mechanism at the time consumers experience warranty disputes. Comments on the public record indicate that Section 703.2(b) strikes a reasonable balance between consumer and warrantor interests.

(b)(1) a statement of the availability of the informal dispute settlement mechanism;
(2) the name and address of the Mechanism, or the name and telephone number of the Mechanism which consumers may use without charge;

The Staff Report accompanying proposed Part 703 indicated that Sections 703.2(b) (1) and (2) were included to ensure that information as to the availability of the Mechanism, its location and telephone number is available to consumers upon consulting a written warranty at the time of experiencing a warranty dispute. The Staff Report indicated that:

One of the concerns which led to the adoption of the Act was that consumers were not being given the information necessary for them to enforce their warranty rights. This is reflected in Senator Magnuson's remarks in introducing S. 356, the Senate version of the warranty legislation, to the Senate.[38]

The Staff Report noted that concern about consumers having sufficient information regarding dispute settlement Mechanisms is reflected in Section 102(a)(8) of the Act, which states that the rules of the Commission may require inclusion in the written warranty of information regarding the Mechanism and a recital, if appropriate, that use was mandatory in some instances.[39]

The first two disclosures required by paragraph (b) are intended to meet this concern by providing consumers with information needed for redress of warranty rights.

General comments, both favorable and unfavorable, regarding Section 703.2(b) have been discussed *supra* in the introduction to this Section. However, only one comment dealt specifically with Section 703.2(b) (1) and (2). Victoria Special, Cook County State's Attorneys Office, Consumer Fraud Division, Chicago, noted that consumers would realize the existence of the Mechanism if they were given the name, address and possibly a toll-free telephone number disclosed in bold letters within the warranty document.[40] Thus Section 703.2(b) (1) and (2) appears to be a reasonable provision to ensure access to the Mechanism at the time a consumer consults his or her written warranty upon experiencing a warranty dispute.

LEGAL CONSEQUENCES

(b)(3) a statement of any requirement that the consumer resort to the Mechanism before exercising rights or seeking remedies created by Title I of the Act; together with the disclosure that if a consumer chooses to seek redress by pursuing rights and remedies not created by Title I of the Act, resort to the Mechanism would not be required by any provision of the Act;

As discussed in the Introduction to this Statement, *supra*, at Part I, Section 110(a)(3) of the Act provides that the consumer must resort to the Mechanism before commencing a civil action (other than a class action) under Section 110(d) of the Act if:

(A) a warrantor establishes such a procedure,
(B) such procedure, and its implementation, meets the requirements of [FTC] rules, and
(C) he [the warrantor] incorporated in a written warranty a requirement that the consumer resort to such procedure before pursuing any legal remedy under this section respecting such warranty . . .

The third disclosure required by Paragraph (b)(3) merely incorporates the third requirement under Section 110(a)(3) of the Act into the Rule, as is contemplated by Section 102(a)(8) of the Act, quoted above. It states that Commission rules may require disclosure in the warranty of any requirement of the warrantor that the consumer must resort to the Mechanism.

The second clause of Section 703.2(b)(3) is designed to ensure that the consumer is not deceived into believing that prior resort to the Mechanism is required in all instances. As discussed in Part I of the Introduction to this Statement, the Act only allows the Mechanism to delay consumers seeking rights or remedies newly created by Title I of the Act.

This Rule provision requires that this be made clear to consumers.

Many comments addressed to 703.2(b)(3) treated possible interpretations of Section 110 (a) and (d) of the Act. Since 703.2(b)(3) deals merely with the disclosure that consumers may be obligated to use the Mechanism if they are seeking rights and remedies created by the Act, a discussion of these comments is not appropriate in the section. However, the Commission's interpretation of Sections 110 (a) and (d) of the Act can be found at Part I of the Introduction to this statement. Few comments were received on the Record regarding the warranty disclosures required by Section 703.2(b)(3) of the proposed Rule.

Industry comments were divided as to the value of the disclosure. Schwinn Bicycle Corporation supported the usefulness of the provision to warrantors in disclosing that in certain instances use of the Mechanism by consumers would be mandatory.[41] However, Whirlpool urged that disclosure of such information to consumers was unreasonably burdensome.[42]

Comments from consumers on the record stressed the importance of a simple and clearly worded disclosure to prevent consumers from thinking that they would be required in all instances to use a warrantor's Mechanism.[43]

Two consumer representatives suggested specific language that the Commission might prescribe to convey the importance of the information respecting mandatory and nonmandatory resort to the Mechanism by consumers without unduly confusing them.[44]

Comments from industry and consumer representatives indicating concern over mandatory or optional resort to a Mechanism by consumers have been discussed, *infra*, at "Redress Directly from the Warrantor." Briefly, industry representatives wished to clarify those instances in which consumers could be obligated to first use a Mechanism before going to court, since this possibility offered warrantors an inducement to incorporate Mechanisms into written warranties. On the other hand, consumer representatives were concerned that warrantors could mislead consumers into believing Mechanism use was compulsory in every instance. Thus, although few comments were received on Section 703.2(b)(3), concern reflected in the record over interpretation of 110 (a) and (d) of the Act leads the Commission to believe that Section 703.2(b)(3) of the Rule is both necessary and reasonable. If resort to the Mechanism by consumers is of mutual and material concern to consumers and warrantors, such information should be placed in the warranty.

Although two consumer representatives recommended specific language instead of the general disclosure requirement contained in the provision, the Commission finds the general requirement adequate. Specific language might add undesirable bulk to the written warranty. Additionally, "boiler-plate" language would not offer warrantors the flexibility of phrasing the disclosure in a simpler, more understandable manner than the disclosures suggested in the Record.

Thus the Commission expects that Section 703.2(b)(3) will allow warrantors flexibility in phrasing the disclosure requirement so long as the language employed is simple and understandable to consumers and would not tend to mislead consumers into thinking that resort to the Mechanism is mandatory when consumers are not seeking rights and remedies newly created by Title I of the Act.

§ 703.2(b)(4) Further Information

A statement, if applicable, indicating where further information on the Mechanism can be found in materials accompanying the product, as provided in § 703.2(c).

Although warrantors, under the above provision, would be free to attach the more detailed information provided for in Section 703.2(c) to the body of the written warranty, the Commission believes it is appropriate to allow the warrantor to include additional information important to consumers at another place, provided the consumer's attention is directed to that information. If the consumer consults his or her written warranty at the time a warranty complaint occurs, he or she will receive guidance as to where further information on the Mechanism can be found. This will enable the consumer to weigh the advantages and disadvantages of utilization or non-utilization of the Mechanism.

Studies point to the widespread industry practice of distributing product use and instruction booklets.[45] Under the final Rule, a warrantor need only indicate a page number or location within the booklet or other materials where additional information can be found, provided that if no use and instructions book or other suitable materials accompanied the product, the warrantor would be required to give the information specified in Section 703.2(c) in the written warranty.

The Commission has concluded that Section 703.2(b)(4) should be included as proposed in the final Rule. No comments, favorable or unfavorable, were received on the record respecting the above provision.

ADDITIONAL DISCLOSURES

(c) The warrantor shall include in the written warranty or in a separate section of materials accompanying the product, the following information:

(1) Either (i) a form addressed to the Mechanism containing spaces requesting the information which the Mechanism may require for prompt resolution of warranty disputes; or (ii) a telephone number of the Mechanism which consumers may use without charge;
(2) The name and address of the Mechanism;
(3) A brief description of Mechanism procedures;
(4) The time limits adhered to by the Mechanism; and
(5) The types of information which the Mechanism may require for prompt resolution of warranty disputes.

Provisions of Paragraph (c) of the final Rule are designed to ensure awareness of and access to the Mechanism at the time consumers experience difficulty with the resolution of warranty disputes and minimize consumer failure to utilize the Mechanism by simplifying procedures.

Paragraph (c) of the proposed Rule would provide consumers with one of two simple ways to register a warranty complaint—filling out a pre-addressed form or making a free telephone call. Warrantors could choose the least costly, most effective option best suited to their commercial needs and current complaint handling patterns.

Section 703.2 (c) (3) is a provision which was not included in the proposed Rule. The provision would require warrantors to provide consumers with a brief description of Mechanism procedures. The change reflects concerns expressed by consumer and industry representatives on the public record and is discussed in detail, *infra*, at § 703.2(c)(3).

(a) *Simplified Access and Procedures Section 703.2(c) (1) and (2).* Provisions of Section 703.2(c), designed to ensure consumer access to the Mechanism and simplify procedures for consumers registering warranty disputes, are consistent with Congressional intent expressed prior to passage of the Act. The Conference Report states that the purpose of informal dispute settlement mechanisms is to, "*simplify* and expedite the resolution of warranty disputes".[46] (Emphasis added)

Consumers affairs professionals interviewed by Commission staff members consistently cited the detrimental effect of complicated and protracted procedures on consumers with warranty and

V 40 251 DEC 31 75 XUM

non-warranty related complaints. Complicated forms, numerous levels required for complaint resolution, even writing a letter detailing a consumer complaint can cause some consumers to "drop-out" of the complaint-handling procedure.[47]

A study entitled, "Fraud, Dispute and the Consumer—Responding to Consumer Complaints," discussed the complaint process in terms of a continuum. Less formal procedures require the expenditure of fewer resources; more formal procedures, i.e., small claims court or a private suit, involve the expenditure of greater resources. The author suggested that at various points during this process, consumers reach a point where they "drop-out" of the process because resources expended become too large relative to the importance of the dispute to the consumer.[48] The requirement of either a pre-addressed form or a free telephone number for consumers to use in registering warranty complaints is designed to minimize this drop out.

The form could be as simple as a postcard. Various complaint handling mechanisms currently use postcards to notify the consumer at various points in the complaint procedure, to follow-up on the success or failure of attempts to remedy complaints and to obtain information from consumers necessary for settlement of disputes.[49]

If the consumer is able to provide the Mechanism, by using the spaces included on the form, with that information needed by the Mechanism to commence investigation of a dispute, the Mechanism will be able to begin settlement of consumer disputes more quickly and efficiently, thus minimizing costs that would accrue from further contacts with consumers necessary to obtain needed information.

Mailing a postcard or form is less burdensome and time consuming than writing a letter. Spaces for information which the Mechanism may require for investigation leading to settlement of a consumer's warranty dispute enable the consumer to anticipate the Mechanism's needs thereby simplifying and accelerating the Mechanism's complaint handling process. Of course, nothing contained in the Rule would prevent the consumer's writing a letter enclosing additional information regarding the dispute in lieu of the postcard. Burdens on the consumer would involve only the cost of a stamp and the effort of mailing the card or form. Thus, drop-out problems cited previously could be minimized.

The Commission has determined that costs incurred by the warrantor in providing such information would be reasonable. Since use and instruction materials are commonly provided consumers at the time of purchase, costs of forms or postcards would be one more item to be included in such materials. Printing costs for postcards do not seem great.[50]

The Rule gives warrantors the option to include in lieu of such postcard a telephone number which consumers may use without charge to register warranty complaints.

Some companies already use toll-free numbers for consumers to register warranty complaints. The existence of such numbers enables consumers to register complaints speedily and conveniently.

The ease of using such numbers could minimize the possibility of consumer dropout. Such numbers would enable the Mechanism to handle complaints fairly and expeditiously, since the staff of the Mechanism could obtain necessary information for the Mechanism to commence settlement of the warranty dispute at the time of the telephone call.

In spite of the advantages of free telephone numbers in ensuring access to the Mechanism and accelerating the investigational process, they are costly; mandating them could unduly burden Mechanisms and thereby contravene Congressional intent to encourage warrantors to establish informal grievance settlement mechanisms. Therefore, the Rule provides Mechanisms with an option—pre-addressed forms—which is effective yet not as costly.

Section 703.2 (c)(1) and (2) engendered little comment on the public record regarding the need for consumer access to the Mechanism and simplified procedures for consumer utilization of the Mechanism upon the occurrence of a warranty dispute.

The American Arbitration Association agreed that a communication by postcard or telephone could cut Mechanism costs.[51] The Major Appliance Consumer Action Panel commented against attaching the the information required by Section 103.2(c) to the written warranty, recommending instead a "Warranty Procedural Guide" where all information regarding the Mechanism would be placed.[52] The Association of Home Appliance Manufacturers (AHAM) noted that most members of MACAP already directs consumers to the group in a manner similar to that required by the Rule.[53]

Two industry representatives suggested that the consumer need receive only a pre-addressed form which he/she could mail to the Mechanism in order to receive instructions on how to submit a complaint.[54] Armstrong Cork Company commented that such an easy and simple procedure might increase frivolous claims.[55] However, the likelihood of pre-addressed forms and toll-free telephone numbers increasing costs as a result of increased numbers of frivolous complaints appears remote.[56]

Section 703.2 (1) and (2) engendered few comments on the record and appear reasonable and desirable from the standpoint of ensuring easy access to the Mechanism at the time consumers experience warranty disputes. The provisions are promulgated as proposed.

Paragraph (c) now requires the warrantor to make four other disclosures to consumers: First, the name and address of the Mechanism must be separately disclosed. If the warrantor has utilized the form option, consumers who had utilized the form and then experienced a further complaint might not know where to address their complaint if they had misplaced their warranty. Even if the Mechanism possesses a free telephone number, some consumers might wish to write a letter instead of telephoning the Mechanism because of the complexity of the dispute.

Additionally, the warrantor must state the time limits adhered to by the Mechanism. Since the consumer retains the option to pursue other rights and remedies than those created under Title I of the Act, the consumer should be able to weigh the advantages of enduring the delay incurred in using the mandatory Mechanism against the advantages of

[53] R 1-4-1, 503, AHAM.
"Manual instructions ask consumers to:
1. Check plugs, fuses, instructions;
2. Check your dealer or the repair service he recommends;
3. Notify Mr. W. C. Blank, National Service Manager, XYZ Corp., Centerville, Ohio 6666 (or call 800-000-0000);

[54] *See, e.g.*, R 1-4-1, 81, NRMA (less expensive to use pre-addressed card for consumers' use in obtaining Mechanism information); R 1-4-1, 46, National Furniture Manufacturers Association (pre-addressed card for use in obtaining Mechanism information).

[55] R 1-3-2, 422, Armstrong Cork Company (encouraging frivolous claims might increase costs.)

[56] For a discussion of the possibility of an increase in frivolous complaints, see the discussion accompanying § 703.3(a) *infra*. The section concludes that benefits resulting from increased consumer registration of legitimate warranty disputes outweigh the possibility of a small increase in nonlegitimate complaints.

pursuing remedies other than those created under Title I of the Act. Even those consumers unconcerned with seeking legal remedies should be informed of the time period for resolution by the Mechanism. Some consumers may possess defective products which require immediate repair. For example, a housewife with a broken dryer and a small baby may wish to weigh the cost of subscribing to a diaper service for a month because of the delay caused by a mechanism decision against the cost of an immediate repair call which will remedy the defect.

The warrantor must also list the types of information which the Mechanism may require for prompt resolution of warranty disputes. If the consumer has already mailed the optional form and experiences another warranty complaint, he or she should be aware of that information needed by the Mechanism so that he or she can include such information at the time of registering his or her complaint and thus ensure the Mechanism's ability to fairly and expeditiously settle warranty disputes.

If the consumer is provided with a telephone number which he or she may use without charge, the consumer should know of the information which the Mechanism requires for prompt resolution of the dispute prior to placing a call registering a complaint. For example, a consumer, noting such disclosures, would be able to determine such information as brand, model number, date of purchase and place of purchase thus expediting calls placed to the Mechanism. This could result in lower costs incurred by the Mechanism from use of such numbers and increased ability to handle disputes fairly and expeditiously.

Provision 703.2(c)(3) has been added to require the warrantor to disclose brief information regarding Mechanism procedures. It has been transferred to Section 703.2(c) primarily in response to adverse comments received on the record regarding § 703.5(b) discussed in detail, *infra*.

Proposed § 703.5(b) originally required that:

(b) Upon notification of a dispute, the Mechanism shall immediately inform both the warrantor and the consumer of receipt of the dispute, and shall promptly supply the consumer with a description of the procedures and time limits adhered to by the Mechanism.

The Final Rule provision 703.5(b) now reads:

(b) Upon notification of a dispute, the Mechanism shall immediately inform both the warrantor and the consumer of receipt of the dispute.

Under the final Rule, the burden of the Mechanism is reduced at the time of receipt of a dispute, since the Mechanism can now acknowledge receipt of a dispute, if it wishes, by dispatch of a postcard. The postcard could refer consumers to information regarding Mechanism time limits, procedures and types of information required from consumers either in the written warranty or separate materials accompanying the product.

The provision is a reasonable attempt to reduce administrative burdens on the Mechanism. Reducing such burdens would act to decrease costs thus posing an added incentive to warrantors to incorporate Mechanisms. Proposed provisions 703.2(c) (2), (3) and (4) have been incorporated into the final Rule as Section 703.2(c), (2), (4) and (5).

These subparagraphs appear to be a reasonable means for consumer to gain easy access to the Mechanism by the use of simplified procedures. Moreover, no adverse comment was addressed to these provisions on the Record. The addition of provision 703.2(c)(3) will give consumers additional information needed at the time of warranty disputes and will also eliminate a potentially costly notification step by the Mechanism.

b. *Consumer Awareness.* Paragraphs (c) and (d), providing easy access to the Mechanism and simplified procedures for filing complaints, are designed to ensure that the consumer will be aware of the existence of the Mechanism at the time when that information is important—at the time a warranty dispute arises. Paragraph (d) requires that:

(d) The warrantor shall take steps reasonably calculated to make consumers aware of the Mechanism's existence at the time consumers experience warranty disputes.

Both paragraphs reflect concern expressed in the Senate Report which stressed that Mechanisms will be useful only if their existence is known.[57]

Although under the proposed Rule brief information regarding the existence of the Mechanism must be included on the face of the written warranty, studies on consumer complaint registration patterns and interviews with consumer affairs professionals indicated that more information is necessary so that consumers have information regarding Mechanism at points where they are likely to turn when a warranty complaint surfaces. Providing consumers with product use and instruction materials is a common industry practice.[58] The Staff Report indicated that a number of consumer affairs professionals have noted consumer tendencies to avoid reading use and instruction materials until a complaint arises.[59] While consumers might misplace a warranty or fail to consult it at the time of experiencing a product malfunction or defect, a larger number of consumers would be more likely to consult use and instructions materials in an effort to remedy the malfunction or determine the procedure for contacting the retailer or warrantor to remedy malfunctions or defects.

Thus, placing more detailed information regarding the Mechanism at a location where consumers would be likely to turn in case of a product malfunction or defect would serve as a valuable guide to consumers on procedures to follow for remedying such complaints. Reference to the location of more detailed information on the face of the written warranty serves to assure consumer access at the time of complaints. Consumers are thus provided with both brief and more detailed information at two points where they are likely to turn when a warranty problem surfaces.

The importance of consumer awarenes of the Mechanism was stressed in comments received on the record. Christopher Wheeler, from the Center for the Study of Responsive Law, testified to the need for Mechanism visibility and expressed doubt that the proposed Rule provisions would accomplish this purpose.[60] David Swankin, National Consumers League, stressed the importance of consumer awareness as a way to improve the general quality of dispute handling.

Few comments were received on the record concerning provisions of Paragraph 703.2(c) designed to ensure consumer access to the Mechanism at the time warranty disputes occur. Comments supported placing information required by Paragraph (c) in the written warranty or in an operations manual as both reasonable and desirable.[61]

The Commission has thus concluded that provisions of Paragraph (c) designed to ensure consumer awareness of the Mechanism at the time warranty disputes arise should be promulgated as proposed.

More extensive comments were received on the record concerning proposed Paragraph (d). The provision has been modified to require a warrantor to take

[60] R 1-6, p. 57, Center for the Study of Responsive Law, September 16, 1975. The Center noted that: Like a tree falling in the forest, if consumers do not know about this mechanism, it never exists".

[61] *See e.g.*, TR 225-226, Guenther Baumgart, AHAM, who noted that MACAP's ". . . [e]xperience has been that the most effective method is the appearance of the name and address of the panel in the instruction book. All the previous publicity, including a Johnny Carson Show plug one night and many consumer columnists—does not have nearly the effect from what I have observed from the simple information in the instruction book." *See also*, R 1-8, 90, Charlotte Pownell, Long Beach, California Department of Consumer Affairs noted that:
"A number of our consumers have been introduced to various arbitration mechanisms of industry (CRICAP, MACAP, Carpet Institute) through the mediation efforts of our agency. Our experience has been that, prior to being apprised of such mechanisms through our agency, our consumers, at least, has no knowledge of their existence. . . . The most logical method of disclosing an arbitration mechanism prior to the sale of a consumer product would be on the product packaging and in the operating manual of the product." See also: R 1-6, 36, National Consumer Law Center. *But, see*, R 1-4-1, 504, AHAM (urged deletion of that provision of former provision § 703.2(c)(3) providing for a disclosure of time limits adhered to by the Mechanism. AHAM found time limits for Mechanism decisions generally undesirable).

V 40 N 251 DEC 31 75 XUM

reasonable steps to make consumers aware of its Mechanism. Reasons for the modification are discussed *infra* in this section. The proposed provision would have required warrantors to provide to sellers and service centers the more detailed information regarding the Mechanisms required by Paragraph (c). Additionally, warrantors would have been required to take steps reasonably calculated to ensure that this information was provided to consumers requesting such information or registering warranty disputes. The provision was originally proposed in response to studies which showed that most consumers commence registration of a warranty or non-warranty complaint by what consumer affairs professionals term, "banging on the counter" of the warrantor's retailer or service center.[64] Proposed Paragraph (d) therefore required more detailed information to be provided at those places where warrantor's products are sold and serviced. In order to ensure that retailers and service centers provided the information to consumers requesting it or registering a warranty complaint, a requirement that a warrantor was required to take those reasonable steps calculated to *ensure* that such information would be distributed to such consumers was included. While it may have been difficult for a warrantor to police all retailers and service centers to ensure that such information was properly distributed, the warrantor was required to offer incentives to retailers and service centers that would maximize the possibility that such information would be duly distributed.

Suggestions that warrantors be required to engage in media advertising to publicize the existence of Mechanisms were rejected, because substantial costs involved might discourage warrantors from sponsoring Mechanisms, thereby frustrating Congressional intent.[65] The requirements in Paragraphs (c) and (d) were designed to work together to reach most consumers at the time when they most needed access to the Mechanism without placing an unreasonable financial burden on the Mechanism.

While the provisions of Paragraph (c) evoked little criticism on the record, Paragraph (d) was criticized by warrantors and consumer representatives alike. Warrantors criticized the provision as both unnecessary and unenforceable.[66]

The National Retail Merchants Association (NRMA), found the provision to be unnecessary. Retailers would provide this information to consumers in the interest of future goodwill whether or not the warrantor required retailers to give out such information.[67]

In contrast, consumer representatives commented that the provision was not stringent enough to fulfill its purpose of making consumers aware of the Mechanism's existence at the time warranty disputes occur.[68] A number of consumer representatives suggested that stickers should be attached to the product itself as a way of informing consumers about the Mechanism's existence at the time of warranty disputes.[69]

One group noted that signs should be posted at retailers and service centers as an additional way to inform consumers of the availability of the information.[70] provisions for not requiring warrantors Other groups criticized the proposed to engage in media advertising—a method they felt sure would result in consumer awareness of the Mechanism's existence.[71]

Christopher Wheeler, Center for the Study of Responsive Law, offered the most detailed explanation for the necessity of media advertising.[72] Wheeler stressed that advertising would be the only certain way to ensure Mechanism visibility.[73] He recommended that warrantors be required to engage in media advertising at a cost of at least 1 percent of gross sales[74] since companies routinely spend up to 25 percent of their gross sales in product advertising.[75] Wheeler found the proposed requirements too general to be enforced.[76]

Responding to warrantor and consumer criticism, the Commission has revised proposed provision 703.2(d) to require warrantors to take steps reasonably calculated to ensure consumer awareness of the Mechanism at the time warranty disputes occur. The change is designed to balance concerns expressed by industry and consumer representatives on the public record. First, it offers warrantors flexibility lacking in the proposed provision. The Commission is aware of general testimony on the public record regarding differing warrantor distribution and marketing methods. Some warrantors retain direct control over dealers or service centers by means of franchise agreements. This arrangement lends itself easily to provision of Mechanism information to retailers since the warrantor may require retailers to provide this information by including the requirement as a part of a dealer/warrantor agreement. Varying methods of warrantor control over product distribution and marketing fall between complete control over retailers and none at all. The opposite end of the spectrum is reflected by warrantors selling only to jobbers. Here, the warrantor effectively maintains no control over the final distribution of his product. Thus, proposed provision 703.2(d) may have been possible for some warrantors to enforce but impossible for others and would not ensure maximum consumer awareness.

Warrantors with complete control over product distribution and marketing may wish to provide information to retailers for distribution to consumers; in contrast, a warrantor selling only to jobbers may wish to engage in media advertising to publicize the Mechanism's existence. From a public relations standpoint,

[66] *See, e.g.*, R 1-2-1, 81 (unfair to retailers); R 1-4-1, 47 (lack of warrantor control over retailers).

[67] R 1-4-1, 82. *See, also*, R-1-3-3, 816. The Chicago Better Business Bureau commented that: 703.2(d) is . . . "very broad and unenforceable. It is our considered belief that this should be left to self-regulatory efforts and the Federal Trade Commission, where indicated. Responsible and capable warrantors will view their settlement procedures as a marketing factor and we will all benefit from this approach." *But, see*, TR 102-103, Dean Determan, Vice President, Council of Better Business Bureaus, who commented on the desirability, from CBBB's point of view, of placing the burden to provide such information on the retailer. However, Determan noted the impossibility of enforcing the provision.

But, *see also*, TR 170, Ray Afferbach, National Association of Kitchen Dealers who commented that Section 703.2 (c) and (d) were sufficient to ensure consumer awareness.

[68] *See, e.g.*, R 1-6, 55, Center for the Study of Responsive Law, September 16, 1975; R-1, 165, Wisconsin Governor's Council for Consumer Affairs; TR 149, Shelby County Legal Services.

But see, TR 125, MACAP, who emphatically supported the proposed provision. The panel chairman commented that: "We contend that there ought to be some responsibility from the manufacturer to the dealer and the servicer and that the manufacturer ought to provide the people to whom he sells and the people to whom he gives the authority to deal as an authorized dealer."

R 1-6, 158, Connecticut Citizen's Research Group agreed with MACAP: "Particular stress should be put on the responsibility of large discount centers to make information concerning warranties and dispute mechanisms readily available."

[69] *See, e.g.*, TR 151-152, Shelby County Legal Services (cheaper for warrantors to provide stickers than providing the required information to retailers); R 1-6, 57-58, Center for the Study to Responsive Law, suggested that if the product were too small for a sticker, the FTC could grant an exception. *But, see*, R 1-6, 159, Brian Sullivan commenting for Connecticut Citizen Research Group, found stickers to be unnecessary at this time. (Warrantors will voluntarily take steps to make Mechanism known).

[70] R 1-6, 58, Center for the Study of Responsive Law.

[71] *See, e.g.*, R 1-6, 147, Joseph F. Thomas, Executive Director, Wisconsin Governor's Council for Consumer Affairs felt media advertising would create increased awareness of the entire warranty system.

[72] R 1-6, 56-57, Center for the Study of Responsive Law.

[73] *Id.*, Center for the Study of Responsive Law stated: "Experience with MACAP in some cities has shown that single broadcast descriptions of MACAP produce sudden and direct dispute referrals in large numbers. The Maryland State Home Improvement Commission discovered that media publicity of their existence and their action against a particular business led to a huge influx of complaints against that business."

[74] *Id.* at 57.

[75] *Id.* CSRL, Wheeler gave the Center's reasoning: ". . . if companies can routinely spend up to 25% of the gross sales in advertising the merits of their products, they can afford to spend 1 percent telling the consumer what to do should something go wrong with their product."

[76] *Id.* at 56.

some warrantors may want to publicize a Mechanism more than others. While some warrantors may elect to engage in widespread media advertising; others, because of budgetary considerations, may wish to utilize alternate avenues to create awareness. Salesmen may wish to provide point of sale material by means of posters or signs. Some warrantors may wish to use product stickers. Others may wish to publicize a Mechanism by participating in T.V. "talk" shows or providing materials for use by consumer columnists.

The new provision effectively deals with consumer representatives' criticism that provision of Mechanism materials to retailers would not sufficiently ensure consumer awareness. Many different avenues can now be utilized to ensure the level of awareness desired by these representatives. Criticism that the provision is unenforceable is addressed by a new provision under § 703.7(b)(1) which requires an impartial auditor to evaluate annually warrantors' efforts to make consumers aware of the Mechanism's existence. Warrantors incorporating a Mechanism will realize that to comply with the Rule they must publicize the Mechanism's existence and will be accountable annually for such efforts. Audit reports indicating a lack of reasonable efforts by the warrantor would provide the Commission with a means to enforce compliance with the Rule.

Thus, by offering warrantors flexible means of complying with provision 703.2(d) and permitting warrantors to engage in a variety of means to publicize the Mechanism's existence, the Commission has concluded that provision 703.2(d) creates a reasonable balance between warrantor and consumer interests. Objections to the unenforceability of the provision have been dealt with by the addition of an audit provision which will provide the Commission with information as to compliance or noncompliance. See, § 703.7(b)(1), *infra*. Warrantors will be able to balance cost and public relations considerations while adhering to a general requirement that will result in consumer awareness of the Mechanism.

REDRESS AVAILABLE DIRECTLY FROM THE WARRANTOR

Nothing contained in paragraphs (b), (c) or (d) of this section shall limit the warrantor's option to encourage consumers to seek redress directly from the warrantor as long as the warrantor does not expressly require consumers to seek redress directly from the warrantor. The warrantor shall proceed fairly and expeditiously to attempt to resolve all disputes submitted directly to the warrantor.

This provision has been modified to preserve a warrantor's option to encourage consumers to seek redress directly from the warrantor so long as he/she does not *expressly* require consumers to seek redress directly from the warrantor. The provision retains optional direct access to the Mechanism for consumers at any time during, prior to or after a warrantor's handling of the complaint. The original provision read:

Nothing contained in paragraphs (b) (c) or (d) of this section shall limit the warrantor's option to encourage consumers to seek redress directly from the warrantor; but the warrantor shall clearly and conspicuously disclose that access to the Mechanism is available without restriction at a consumers option. The warrantor shall proceed fairly and expeditiously to attempt to resolve all disputes submitted directly to the warrantor.

The Staff Report noted the reasoning of the original provision:

Some warrantors may wish to minimize Mechanism costs by promptly handling disputes at the retail or corporate level to avoid referrals to the Mechanism. The proposed provision is not intended to discourage nor burden current legitimate attempts of warrantors to settle disputed complaints.

Some warrantors have internal complaint handling processes which require consumers to go through various levels during the course of settlement. For example, automobile warrantors sometimes ask consumers to go first to a dealer, then to a factory or regional representative, and then resort to the home office of the warrantor. It is possible that some number of consumers may elect to use a warrantor's process only to discover that the process involves shuttling back and forth between different corporate levels. An example of this is contained in a letter from a consumer to the FTC which describes thirty separate unsuccessful attempts to remedy a warranted auto transmission defect. The Proposed Rule requires the disclosure to the consumer that access to the Mechanism is available at any time at a consumer's option.

In order to prevent some consumers from electing in good faith to undergo a warrantor dispute settlement process which delays and frustrates rather than expedites dispute settlement, the proposed Rule included a general requirement that warrantor complaint handling mechanisms operate fairly and expeditiously. As indicated earlier this did not set a new standard, but merely incorporates the existing standard under Section 5(a) of the FTC Act.[78]

The above provision engendered extensive favorable and unfavorable comment on the public record. In response to such comments, discussed *infra* in this Section, the Commission has eliminated the provision requiring warrantors to clearly and conspicuously disclose that direct access to the Mechanism is always available at the consumer's option. However, the Commission has added a provision that would prohibit a warrantor from expressly providing that a consumer seek redress directly from a warrantor before proceeding to the Mechanism.

It should be noted that the reasoning behind the provision remains unchanged. The provision has been modified in light of the Act's purpose to encourage warrantors to adopt Mechanisms so that consumer warranty disputes can be settled fairly and expeditiously. Comments from industry representatives discussed below strongly indicated that warrantor interpretations of the proposed provision would dissuade warrantors from incorporating Mechanisms. Consumers would have experienced no benefits from a rule that created no Mechanisms for the settlement of warranty disputes. However, our original concerns over the possibility of consumer frustration and drop-out from internal warrantor complaint handling procedures are reflected by the maintenance of the provision allowing consumers direct access to the Mechanism at any stage of the complaint procedure.

(a) *Industry Comment Regarding Direct Access.* Industry representatives stressed that adoption of the proposed provision would discourage warrantors from incorporating Mechanisms.[79]

Many warrantors cited their present internal complaint handling procedures with pride.[80] Comments were received indicating that direct consumer access would result in atrophy of present warrantor complaint handling procedures and destroy desirable buyer-seller relationships.[81] A number of industry representatives requested that consumer use of internal complaint handling procedures be required before contact of the Mechanism.[82] Some warrantors and consumer representatives noted the desirability of encouraging direct buyer/seller contact.[83] A number of comments indicated that consumers already resort to the retailer/warrantor and would continue to do so in spite of the proposed Rule provision.[84] One comment noted

[83] *See, e.g.*, TR 2068, Legal Aid Foundation, Long Beach, California; TR 843-844, Professor Donald P. Rothschild, "Consumer Help", George Washington University, Washington, D.C.; TR 1478, American Arbitration Association; R 1-4-1, 621, MACAP (indicated that out of 192 complaints received by MACAP during the week of September 22, 1975, 110 were referred to manufacturers. However, the comment did not indicate which consumers submitting complaints had already contacted the retailer); TR 96, Council of Better Business Bureaus (Vice President Determan indicated that 50% of those contacting the BBB, had already contacted the business); TR 2429, John Pound, San Francisco Consumer Action, testified that around 10 to 20% of consumers contacting his group had failed to contact the retailer/seller.

V 40 251 DEC 31 75 XUM

that such contacts are in the best interest of warrantors, retailers and sellers since the strongest impetus for redress of disputes stems from the good-will of both warrantors and retailers.[81] Consumer representatives noted that some consumers may have valid reasons for not contacting a retailer or warrantor upon experiencing a dispute.[82]

A common reason cited by consumer representatives fearing an express requirement that consumers resort first to in-house procedures was that consumers might be shuttled back and forth between different corporate levels.[83] Comments indicated that consumers, frustrated and discouraged by this shuttling process, sometimes drop their complaints, thus leaving some disputes unsolved.[84]

(c) *Alternatives Available Without Requiring Consumers To Directly Contact A Warrantor/Retailer.* Some comments suggested that alternative means were available to balance the desire of warrantors to utilize internal complaint handling procedures thus minimizing costs and still guard against consumers dropping out of the complaint handling process.[85]

Two comments suggested that the Commission promulgate rules for warrantor internal complaint-handling procedures.[86] Other comments indicated that the proposed provision did not bar warrantors from encouraging consumers to use internal complaint handling procedures before resorting to the Mechanism, noting that contacting the warrantor/seller is a natural tendency of consumers.[87] Consumer representatives commented that if the Mechanism received complaints from consumers who had not first contacted a retailer or a warrantor, nothing in the proposed Rule would prevent the Mechanism from referring such complaints to the warrantor for resolution.[88] By keeping track of complaints referred to a warrantor, the Mechanism would thus minimize consumer drop-out.[89] Administrative costs, including staff time and recordkeeping, result from monitoring such complaints.

However, such costs could be balanced against the desirability of minimizing consumer drop-out.[90]

CONCLUSION

In response to comments received on the public record regarding provision 703.2(d) requiring the warrantor to clearly and conspicuously disclose that direct access to the Mechanism is always a consumer option, the Commission has modified the provision. Warrantors need not disclose clearly and conspicuously that direct access is optional but may not expressly require consumers to resort to internal complaint handling procedures. Objections by warrantors that the proposed disclosure would destroy present complaint handling procedures, overburden the Mechanism, and result in added costs to warrantors and consumers, have been met by omitting the necessity for warrantors to clearly and conspicuously disclose the direct access option. As a result of the modification, warrantors will thus be encouraged to incorporate Mechanisms as well as present in-house complaint handling procedures. With the establishment of these Mechanisms, consumers will be able to have warranty disputes settled fairly and expeditiously.

However, the Commission's initial provision allowing consumers direct access to the Mechanism has been retained in the final Rule. Strong consumer support for this provision can be found in the Record. Consumers may resort to the Mechanism at any time, thus minimizing the possibility that some consumers may be shuttled back and forth within a corporate structure and drop out with unresolved complaints. Possibilities of increased complaints over-burdening the Mechanism and increasing costs are minimized by the Mechanism's ability to refer complaints to warrantors for settlement while working within time constraints imposed by the Rule. Thus added protection to consumers against discouragement and drop-out has been provided. Moreover, warrantors are required to handle disputes fairly and expeditiously.

Thus, the Commission has concluded that the modification of the Rule is reasonable and necessary to ensure the balance of warrantor and consumer interests envisioned by Congress in the Act. The provision as promulgated maximally encourages warrantors to incorporate Mechanisms while utilizing present in-house complaint handling procedures but ensures that consumers do not drop out of a prolonged and complicated complaint handling procedure that would fail to settle warranty disputes fairly and expeditiously.

DISPUTES SUBMITTED DIRECTLY TO THE WARRANTOR

(e) Whenever a dispute is submitted directly to the warrantor, the warrantor shall, within a reasonable time, decide whether, and to what extent, it will satisfy the consumer, and inform the consumer of its decision. In its notification to the consumer of its decision, the warrantor shall include the information required in § 703.2 (b) and (c).

Section 703.2(e) deals with the warrantor's obligation to make a decision regarding a warranty dispute submitted directly to the warrantor within a reasonable time and notify the consumer of this decision. At the same time, the warrantor would provide information regarding the Mechanism required by Section 703.2 (b) and (c). The provision promulgated differs from the proposed version. The change reflects comment received on the record regarding the proposed provision's potential burdensomeness. As a result, the Commission has adopted an alternative frequently proposed on the record. The alternative provision reduces a warrantor's burdens to forward unresolved disputes to the Mechanism. However, the new provision ensures that consumers will receive notice of a warrantor's decision and necessary information allowing them to easily and quickly register their complaints with the Mechanism.

Section 703.2(e) originally provided that:

(e) Whenever the warrantor determines that a dispute submitted directly to it cannot be resolved to the consumer's satisfaction, the warrantor shall immediately refer the dispute to the Mechanism, together with any information which the Mechanism may require for prompt resolution of warranty disputes.

The Staff Report's reasoning for the original provision requiring warrantors to forward unresolved complaints to the Mechanism was that since the Mechanism served as the warrantor's opportunity to cure, he should be obliged to forward unresolved disputes to the Mechanism. Materials received from warrantors regarding such disputes could be used by the Mechanism to resolve these disputes within a shorter time, thus reducing the Mechanism's investigatory burden.[91] The provision engendered little consumer comment. MACAP favored the provision as a statement of good intent by the warrantor.[92] Industry comments on the provision were generally unfavorable.[93] One industry comment suggested that the provision is burdensome since warrantors have no clear way of determining whether consumers are satisfied.[94] The provision could thus discourage warrantors from incorporating Mechanisms.[95] It was noted that frivolous claims sometimes arise and the necessity of forwarding such complaints could increase costs to the Mechanism and warrantors.[96]

The alternative frequently suggested and adopted in the final Rule was that the warrantor should instead be obliged to notify the consumer of his decision in writing and provide information regarding Mechanism operations." The most persuasive testimony on the desirability of this alternative was given by Gerald Aksen of the American Arbitration Association (AAA). Aksen cited to the AAA's experience with New York State's No-Fault Insurance Program. The program's uniform denial of claim form is sent to consumers upon the insurance company's decision to deny a claim. Upon receipt of the company's written refusal, the consumer fills out the simple form and mails it to the AAA to commence arbitration proceedings.[97] Aksen suggested the written denial of a warranty dispute would provide the Mechanism with a firm basis to begin investigatory work on the dispute.[98]

While reducing burdens on the Mechanism and warrantor which might discourage establishment of Mechanisms, the modified provision provides consumers with notice of the warrantor's decision respecting a dispute and information regarding the Mechanism. Moreover, written denial of a dispute will give the Mechanism a starting point from which to begin investigation.

ADDITIONAL WARRANTOR DUTIES

(f) The warrantor shall: (1) respond fully and promptly to reasonable requests by the Mechanism for information relating to disputes;

Paragraph (f) ensures a warrantor's good faith cooperation with the Mechanism he has elected to serve as his opportunity to cure. Since the Act specifies that the Mechanism shall settle warranty disputes fairly and expeditiously, the warrantor must assist the Mechanism in any reasonable ways that would help the Mechanism comply with the Rules. With the exception minor changes in language in 703.2(f), the provision has been adopted as proposed.

As proposed, paragraph 703.2(f)(1) provided that the warrantor respond fully and promptly to requests by the Mechanism for information. In the course of investigating and settling warranty disputes, the Mechanism might require additional information from the warrantor on various facets of the dispute. Under the proposed Rule, the Mechanism would have only 40 days from receipt of the dispute to decide the dispute. If a warrantor were to refuse to provide information necessary for the Mechanism's decision, the Mechanism could be delayed in settling a dispute and thereby fail to comply with the proposed Rule. Thus, good faith by the warrantor implies full and complete cooperation to requests made by the Mechanism for the purpose of settling warranty disputes. Minor changes have been effected in the wording of the section in response to comments received on the record. The word "reasonable" has been added to requests made by the Mechanisms to warrantors for information. Moreover, such requests must be related to disputes. The addition of these terms was suggested by comments stating that the provision in its original form might be burdensome and discourage some warrantors from establishing Mechanisms.[99] The Commission has concluded that changes in the language of Section 703.2(f)(1) are reasonable. The section now provides that the warrantor respond to reasonable requests by the Mechanism for information relating to the dispute.

---

[81] TR 1647, Professor Lawrence Feldman, University of Illinois, Chicago.

[82] *See, e.g.*, TR 38, Cathleen O'Reilly, Consumer Federation of America, commented that some consumers may have had particularly frustrating prior experiences with a warrantor or seller and do not wish to repeat a meaningless process; TR 844, Professor Donald P. Rothschild, "Consumer Help", George Washington University, Washington, D.C., commented that some consumers may be hostile or embarrassed. Rothschild noted that some consumers are naturally hostile after discovering that a warrantied product is defective. Some consumers are unable to advocate their dispute. Rothschild gave senior citizens as an example of those easily frustrated and discouraged by attempts to remedy disputes through internal warrantor procedures; *See, also*, TR 1804, Consumer Fraud Division, Cook County State Attorney General's Office, Chicago, Illinois.

[83] R 1–6, 70, Center for the Study of Responsive Law, Christopher Wheeler noted that "run-arounds" by warrantors may not be a result of conscious policy, stating that:

"It is fundamental to understand that a perceived "run-around" is not always the result of conscious policy. Rather in a generic sense, it is the result of the franchiser-franchisee or manufacturer-dealer relationships which have come to dominate our market structure. Inherent in these relationships is the issue of accountability. Where the buck finally stops becomes a central, dominating question. Thus with even the best of complaint-handling intentions, sellers on occasion must send the consumer elsewhere in the corporate structure to get a decision on his claim."

TR 695, Cleveland Citizens Action Group; TR 937, Board of Freeholders of New Jersey; R 1–4–1, 505, AHAM (consumers would not undergo shuttling if they contacted MACAP). *See, also*, The record reflects comments from consumer representatives and consumers noting the occurrence of the shuttling process:

R 1–8, 101, Long Beach Department of Consumer Affairs (consumer with a defective dryer whose vain attempts to remedy the defect lasted over a year); TR 1805–1815, Ronald Rodriguez, a consumer who testified regarding lengthy attempts to remedy auto tire defects; TR 1910–11, Governor's Consumer Advocate's Office, State of Illinois. (auto dealer withholding warranty service from an uninformed Spanish speaking consumer); TR 1313–1326, John Czarnecki, a consumer commented that his attempts over a six month period at various corporate levels to remedy a water leak in a new Plymouth Duster had been unsuccessful; R 1–5, 185–86, Joseph R. Holzum, a consumer who testified regarding vain attempts to correct defects in 4 electric stoves over 5 years; R 1–5, 237, Ray Lindsey, Guadalajara, Mexico, a consumer who recounted unsuccessful efforts with his Ford dealer and factory representatives to correct front grill and window problems.

[84] *See, e.g.*, R 1–6, 71, Christopher Wheeler, Center for the Study of Responsive Law, noted that: ". . . consumers will drop out in rapid numbers as they find they are forced to proceed through one corporate layer after another. If the "run-around" is an inherent structural by-product of our present corporate structure, public policy should not exacerbate it. Public policy should bypass it"; R 1–8, 165, Governor's Council for Consumer Affairs, State of Wisconsin which noted that: "Granted, many consumers are very persistent, but our experience has been that it does not take many obstacles to discourage the consumer in pursuing a complaint . . . Some drop the complaints if they face the prospect of a long, involved dispute settlement procedure; others contact a government or independent consumer agency to intervene on their behalf, others do nothing;" Tr 852–853, Professor Donald P. Rothschild, George Washington University, Washington, D.C., "Consumer Help" who commented that even with extensive follow-up procedures, 9% of the 3800 consumers who complained to the Center in the past year dropped out with disputes unresolved. Rothschild noted that this was a very low figure. Rothschild noted that elderly persons are especially prone to dropping a complaint; R 1–4, 621, MACAP (The panel followed up on 107 referrals they had made to manufacturers in June, 1975. Only thirty-nine consumers responded to the Panel's request for information regarding the disposition of their complaint. Of those responding, 8% or 3 out of the 39, had made no attempts to contact the warrantor). *See, also:* TR 96, Council of Better Business Bureaus (Consumers can become discouraged if they contact the wrong person).

[85] *See, e.g.*, TR 1303, Indianapolis, Indiana, Better Business Bureau Director Ray Dearing suggested that the warrantor should notify its customer in writing stating the reason for the rejection. That same written notification could advise the customer that he can appeal the decision and set forth the steps necessary to initiate such appeal.

[86] *See, e.g.*, R 1–6, 91, National Consumers League; TR 112, Council of Better Business Bureaus.

But, see, TR 243–244, Center for the Study of Responsive Law, (supported the provision and disfavored the Commission's creation of a tiered system).

[87] *See, e.g.*, TR 843–844, Professor Donald P. Rothschild, "Consumer Help", George Washington University, Washington, D.C. (as a practical matter, consumers will always have to use in-house procedures); TR 34, Consumer Federation of America suggested what it considered to be a non-threatening disclosure method to be used if in-house procedures were optional:

"The law requires us to inform you of your right and the mechanism which will attempt complaint mechanism described above in paragraph such and such. We respect the right and the mechanism which will attempt to settle the dispute within 40 days. However, you may choose to first contact our own complaint department which has settled 85 percent of all complaints to the satisfaction of the customer within seven days at no expense to the customer. We encourage you to contact us first because we want to satisfy you in the fairest and fastest way possible."

V 40 N 251 DEC 31 75 XUM

(f) (2) upon notification of any decision of the Mechanism that would require action on the part of the warrantor, immediately notify the Mechanism whether, and to what extent, warrantor will abide by the decision;

This provision has been promulgated as proposed. The Staff Report on the provision indicated that:

Failure of the warrantor immediately to notify the Mechanism whether and to what extent it will abide by the Mechanism's decision would again show a lack of good faith by the warrantor in the Mechanism it has elected as his right to cure. Under the proposed Rule, the warrantor will have known of the existence of the dispute and have had more than a month to consider its actions regarding a Mechanism decision. Under the proposed Rule, the Mechanism has 40 days to decide the dispute, obtain a decision from a warrantor as to whether the warrantor will abide by the decision, and notify the consumer of his decision. Were the warrantor to delay notification of the Mechanism of his decision, the Mechanism, operating as warrantor's right to cure, would fail to comply with the proposed Rule.

Failure to notify the consumer of the warrantor's intended actions would further delay consumers from seeking legal remedies created under Title I of the Act since passage of the 40 days ends warrantor's right to cure. Since the consumer has made a decision or been required to forebear suit in order to afford the warrantor a right to cure, further delays from the Mechanism because of warrantor failure to reply would be unreasonable.[101]

The provision engendered few comments on the public record.[102] The provision appears necessary to ensure the Mechanism's ability to comply with the Rule. Moreover, the Commission has concluded that since warrantors have elected to incorporate Mechanisms, it is reasonable to require warrantors to aid the compliance of their duly-incorporated Mechanisms by immediate notification as to a warrantor's decision to accept or reject a Mechanism decision.

(f) (3) perform any obligations it has agreed to.

Paragraph (f) (3) of the Rule is promulgated as proposed. The provision would require warrantors to perform any obligations agreed to. The warrantor is not bound to abide by the decisions of the Mechanism even though he has incorporated the Mechanism into the terms of the written warranty.

The rationale for the provision was indicated in the Staff Report:

While the warrantor may decide not to abide by some of the decisions of its duly incorporated Mechanism, upon its notification by the Mechanism and agreement to perform, fairness requires that the warrantor be bound to perform such agreed-to obligations.

At the time of notification, the warrantor was free to decide to abide or not to abide by the decision of the Mechanism. The Mechanism, compelled by the Rule to decide a warranty dispute within 40 days, must have already notified the consumer of the warrantor's decision to perform. Thus, assured by the Mechanism that the warrantor would perform, the consumer would have delayed seeking legal redress created under Title I of the Act. Failure of the warrantor to perform agreed-to obligations would mean that warranty disputes were not, in fact, settled fairly and expeditiously by the warrantor's Mechanism, would delay consumers from seeking legal remedies available after the 40 days had passed, and would show lack of good faith on the part of the warrantor.[103]

Only two comments were received on the proposal. Virginia Knauer, Office of Consumer Affairs, HEW, asked that the Commission require a warrantor to state in the warranty to what extent he/she agreed to abide by Mechanism decisions.[104]

The Commission promulgates Section 703.2(f)(3) as proposed and has determined from the Record that the provision requiring warrantors to perform obligations incurred as a result of incorporating a Mechanism is reasonable.

GOOD FAITH REQUIREMENT

(g) The warrantor shall act in good faith in determining whether, and to what extent, it will abide by a Mechanism decision.

Paragraph 703.2(g) imposes a general good faith requirement on warrantors with regard to determinations to abide by Mechanism decisions. It has been promulgated as proposed. The rationale for the provision was indicated in the Staff Report:

Warrantors can choose whether or not to incorporate a Mechanism into the terms of a written warranty as their opportunity to cure. Additionally, they may choose one of a number of different types of Mechanisms which suit their particular commercial needs and complaint handling patterns. Warrantor's incorporation of a particular Mechanism indicates that he, in good faith, considered that the particular Mechanism chosen would fairly and expeditiously settled warranty disputes involving his firm. Thus, since the warrantor has made a conscious choice to incorporate a particular Mechanism into the terms of his written warranty, he should act in good faith toward such a Mechanism and agree to abide by a substantial number of its decisions.

While the consumer is delayed from seeking legal remedies created under Title I of the Act because of mandatory utilization of the Mechanism, the warrantor has had the opportunity to decide both whether or not to incorporate a Mechanism and to choose among a variety of Mechanisms.

A warrantor's failure to act in good faith toward his chosen Mechanism would bar the Mechanism from settling warranty disputes fairly and expeditiously and serve only to delay and frustrate consumers from seeking legal remedies, thus contravening the basic purpose of the Act.[105]

Comments received on the record regarding the provision were mixed. Industry representatives indicated resistance to imposing a good faith requirement on warrantors but not consumers.[106] Two industry representatives indicated that the requirements was superfluous,[107] and noted that good faith would always depend on the goodwill of the warrantor.[108] Two comments indicated that the provision as proposed seeed incorrectly to imply that decisions of the Mechanism were binding on the warrantor.[109] One comment suggested that the Rule include a prima facie "good faith" defense for warrantors in FTC or possible court actions.[110]

Consumer representatives commented that the provision as written was too general to permit effective enforcement.[111] One comment suggested that in determining damages, a court be allowed to consider the fact that the warrantor had failed to abide by a decision he/she had agreed to.[112] One consumer representative suggested that a warrantor be obliged to abide by 85% of all decisions made by the Mechanism.[113] However, another consumer representative noted that consumers may submit groundless complaints.[114]

Comments received on the record regarding Section 703.2(g) have led the Commission to conclude that the provision fairly balances consumer and warrantor interests and is therefore promulgated as proposed. Since the warrantor has incorporated a Mechanism which delays consumers from seeking available legal remedies, it should be obliged to abide in good faith by decisions made by its incorporated Mechanism. However, a general "good faith" requirement rather than a percentage figure allows the warrantor not to comply with an occasional invalid decision. The decision to refrain from setting a percentage requirement connotes a reluctance to establish a figure that might encourage a minimum standard. Valid disputes might be rejected by some warrantors as exceeding the number required by percentage figures. Some warrantors may wish to commit themselves to abiding by 100% of Mechanism decisions. The Rule does not preclude this desirable possibility. Moreover, no workable alternatives were suggested on the record that would meet consumer criticisms regarding generality yet ensure that a percentage figure would not become a fixed minimum.

Consumer interests are preserved by the "good faith" requirement of acquiescence in decisions by warrantors. As previously discussed, *supra*, at 77, consumer criticisms as to enforceability were not persuasive. Using audit reports to gauge compliance, the Commission will be able to proceed against warrantors not acting in "good faith" by employing the same methods used in dealing with FTC Act Section 5(a) actions.

COMPLIANCE WITH OTHER MECHANISM REQUIREMENTS

(h) The warrantor shall comply with any reasonable requirements imposed by the Mechanism to fairly and expeditiously resolve warranty disputes.

Paragraph (h) is a general requirement designed to enable the Mechanism to require warrantors to comply with any requirements imposed in the interest of fair and expeditious resolution of warranty disputes. Because of comments received on the record, the word "reasonable" has been added to those requirements which may be imposed by the Mechanism on warrantors. The provision was included to permit Mechanisms to provide for the particular needs that will arise with their establishment. Thus, the requirement provides for the possibility of miscellaneous housekeeping requirements or other needs of various Mechanisms. Few comments were received on the provision. One comment criticized the provision's openendedness and felt it might discourage warrantor establishment of Mechanisms since the Mechanism was implicitly free to impose any requirements on the warrantor.[115] To prevent the possibility of Mechanisms imposing unreasonable requirements on warrantors, the provision has been modified to require warrantors to comply with *reasonable* requirements of the Mechanism.

MINIMUM REQUIREMENTS OF THE MECHANISM

Minimum requirements for informal dispute settlement Mechanisms are set out in Sections 703.3–703.8. A warrantor is prohibited by Section 703.2(a) from incorporating a Mechanism into the terms of a written warranty which does not comply with these requirements.

The Staff Report states:

Sections 703.3–703.8 are designed to permit any form of Mechanism that can settle disputes fairly and expeditiously. General performance requirements are used whenever possible; detailed procedural and other requirements are only specified when necessary either to ensure fair and expeditious settlement of disputes or to allow the Commission to fulfill enforcement responsibilities.[116]

Much comment was directed to the general approach taken by the Commission as well as to specific provisions.

Comments were generally directed to the issue of whether the proposed Rule struck the appropriate balance between "general performance requirements" and "detailed procedural and other requirements." One consumer group strongly objected to many of the performance requirements.[117] Several other groups supported the balance of these requirements.[118]

On the other hand many warrantors and industry groups protested that the minimum requirements of the Mechanism were far too complex and costly.[119] In response to this criticism the Commission has made revisions in many of the provisions to eliminate burdens not essential to fair and expeditious settlement of disputes.

A few industry groups suggested that more flexibility should be built into the Rule by means of a Commission certification procedure which would be an alternative to the requirements of Sections 703.3 through 703.8.[120] These comments were unpersuasive. Maintaining a required certification procedure for any group desiring to be named as a Mechanism complying with Part 703 would be a great burden on the Commission. It would also place an unnecessary burden on prospective Mechanisms, since they would no doubt be required to make formal submissions of relevant procedural and other documents to the Commission. The Commission's role is to set out the minimum requirements for those interested in offering §110 Mechanisms, which it has done in Part 703. The Commission, through its staff, has in the past provided guidance for those bound by its Rules, and it will continue to do so in the future.

One final general suggestion was offered by the National Consumers League, which advocated that some of the specific provisions should be waived by the Commission if necessary to allow a government agency to set up a complying Mechanism.[121] Since the government agencies which expressed a willingness to be named as Mechanisms felt they could easily comply with all of the requirements,[122] a waiver provision is not included in the Rule.

703.3 MECHANISM ORGANIZATION, FUNDING AND STAFFING

(a) The Mechanism shall be funded and competently staffed at a level sufficient to ensure fair and expeditious resolution of all disputes, and shall not charge consumers any fee for use of the Mechanism.

This paragraph requires that the Mechanism must have sufficient staff and funds to perform all the functions required by other sections of the Rule within the prescribed time limits. The staff must be competent to gather the information necessary for a fair decision in each dispute. Competence includes knowing what information is necessary in each dispute and being able to get that information without placing undue burdens on the consumer. Some Mechanisms would require larger budgets and a different staff composition than others. For example, a Mechanism that actively engaged in mediation might cost more per dispute than a Mechanism that limited itself to gathering facts and deciding disputes. The higher costs of the first Mechanism would be due not only to the greater number of staff hours invested in each dispute but also to the need to hire staff persons who were qualified to perform the mediation function fairly.

Only a few comments were directed to the first portion of this paragraph. MACAP and AHAM (a MACAP sponsor) both praised the provision as written. MACAP felt that it "would give us more leverage with the sponsors in requesting funds as the need arises."[123] AHAM thought the rule was "admirable in its setting forth goals in such a way as to allow leeway in achieving the goals."[124]

Objections were received from NRMA and NAFM that .. would be impossible to determine beforehand the amount of funds necessary to ensure fair and expeditious resolution of disputes, so this provision should be modified by a phrase such as "reasonably calculated".[125] The provision as written would require warrantors to initially fund the Mechanism at a level estimated to be sufficient. If it appeared at some later date that this amount was inadequate, the warrantors would have to increase the funding. As MACAP argued, Mechanisms need a clause such as this to use for leverage when requesting additional funds necessary to their operation from warrantors.[126] The weakening language suggested by NAFM and NRMA would greatly reduce this leverage and might harm the Mechanism's ability to handle all cases fairly and expeditiously. Therefore, the Rule was not changed.

DEC 31 1975 V 40 251 XUM

The last clause of this paragraph prohibits the Mechanism from charging consumers any fee to use the Mechanism. This provision is not expressly required by the Act, although Section 110 speaks of Congressional policy to encourage *warrantors to establish* informal dispute settlement procedures, which implies that the funding of these procedures should be on the warrantor. The Conference Report [127] is silent on this point. The sole reference to this subject in the legislative history is found in the House Report,[128] which is relevant to interpretation of Section 110 of the Act, because the conferees adopted the House version of Section 110. The House Report states: "The rules prescribed by the FTC with respect to such informal dispute settlement procedures must also prohibit saddling the consumer with any costs which would discourage use of the procedure." [129] This indicates a legislative intent to prohibit placing burdens on the consumer which would cause the consumer to either drop out of the procedure or not enter the procedure at all.

The Rule does permit placing some costs on consumers. The burden is on the consumer to initially notify the Mechanism of the dispute, and the consumer must, under Section 703.5(c) provide the information needed by the Mechanism to fairly resolve the dispute. Additionally, under Section 703.5(c) the consumer must bear the cost of developing and submitting any rebuttal evidence. This might include the cost of consulting experts, taking photographs, getting statements from witnesses, and copying documents. Also, if the consumer wants copies of any Mechanism records relating to the dispute, under Section 703.8(d)(2), the consumer may be required to bear the cost.

Except for the cost of notifying the Mechanism and the cost of complying with reasonable requests for necessary information, all of the costs which the Rule allows to be placed on the consumer are voluntary costs, in that if the consumer decides not to bear them, the Mechanism will still render a decision. For example, although lack of rebuttal evidence may affect the decision, it will not effect the Mechanism's duty to render a decision. Also, the Mechanism will render a decision whether or not the consumer elects to pay for a copy of the file. This cost may discourage the consumer from pursuing other avenues of redress, but it will not affect the consumer's use of the Mechanism.

The Rule allows some voluntary costs while minimizing involuntary costs, because involuntary costs are ones that would cause consumers to either not utilize the Mechanism or to drop out before completion of the procedure. Involuntary costs are the costs to which the language of the House Report, quoted above, is directed.

As the Staff Report noted, existing informal dispute settlement mechanisms such as MACAP, FICAP, AUTOCAP, and BBB do not charge fees to consumers, and it is the general consensus of these groups that charging fees would discourage consumer use of Mechanisms.[130]

Numerous comments were directed to this clause on fees. They were fairly equally split between those who favored allowing fees and those who opposed it, with warrantors taking the former position and consumers the latter.

Many warrantors felt that the Mechanism should be allowed to charge a fee of $25 or less,[131] which the Mechanism would have discretion to refund.[132] The major purpose of the fee would apparently be to discourage consumers from bringing frivolous complaints to the Mechanism.[133] This idea was supported by only one consumer witness,[134] who also felt that charging a fee might discourage some frivolous complaints.

On the other hand, other consumer witnesses supported the idea of no fee to consumers.[135] Some asserted that a fee would deter consumer use of the Mechanism,[136] and some further felt that a fee would be unfair since the warrantor has the ability to force the consumer to use the Mechanism before pursuing certain other remedies.[137] Finally, the American Arbitration Association which currently charges fees for its arbitration services, stated that in view of the fact that Mechanism decisions would not be binding, it would be unfair to charge consumers a fee.[138]

In summary, warrantors favor a fee to discourage frivolous complaints and partially to defray the cost of the Mechanism. Consumer representatives oppose a fee because it would discourage many complaints, non-frivolous as well as frivolous. The Commission agrees that a fee would reduce the number of frivolous complaints, but also agrees with CBBB which stated: "Well, our view on this whole issue is that while you may end up with a few frivolous complaints by not charging, by and large you would discourage more complainants from coming in with the kind of disputes we handle if you did charge." [139] This, coupled with the facts that the warrantor can compel the consumer to use the Mechanism and that Mechanism decisions are not legally binding, mandates that no fee be charged to the consumer.

INDEPENDENCE OF THE MECHANISM

(b) The warrantor and the sponsor of the Mechanism (if other than the warrantor) shall take all steps necessary to ensure that the Mechanism, and its members and staff, are sufficiently insulated from the warrantor and the sponsor, so that the decisions of the members and the performance of the staff are not influenced by either the warrantor or the sponsor. Necessary steps shall include, at a minimum, committing funds in advance, basing personnel decisions solely on merit, and not assigning conflicting warrantor or sponsor duties to Mechanism staff persons.

This paragraph states the general requirement that the Mechanism must be organized so as to avoid the possibility that the decisions of the members or the actions of the staff (*e.g.*, information gathering, mediation) could be controlled or influenced by the warrantor or sponsor.

Two industry groups criticized the general approach taken by the first sentence of this paragraph. Both the National Association of Furniture Manufacturers (NAFM) and NRMA suggested deleting this provision arguing that it was unnecessary.[140] This is the only portion of the Rule dealing with staff performance. Since competence of staff is critical to the fair and expeditious handling of disputes, this provision remains unchanged.

Several comments requested clarification as to whether certain entities such as warrantor subsidiaries,[141] trade associations,[142] and law firms [143] could act as Mechanisms. As the Staff Report indicated, the Rule is not intended to specify the structure of the Mechanism. It states: "[Section 703.3(b)] is stated as a performance requirement so as not to exclude some forms of Mechanisms that might be capable of fairly and expeditiously settling disputes." [144] It further provides: "Two basic types of mechanisms are envisioned by the Act and by this Rule—mechanisms established by individual warrantors and mechanisms established by groups of warrantors." [145] These two sentences make it clear that the form of a Mechanism is unimportant. It can be totally supported by one warrantor (*e.g.*, a subsidiary of the warrantor), it can be supported by a group of warrantors (*e.g.*, a trade association), or it can be an independent organization that contracts with one or more warrantors to handle disputes (*e.g.*, a law firm). The important point is whether the Mechanism satisfies the performance requirement of "sufficiently insulated".

Of course, a Mechanism that is supported by a single warrantor will have to take special precautions to ensure sufficient insulation.

The second sentence of Paragraph (b) lists several steps which must be taken to insulate the Mechanism. The proposed Rule mentioned these steps but did not require them. No criticism was directed at these steps, and one consumer group argued that these three items were essential.[146] The Commission has concluded that these steps at a minimum are necessary elements of insulation. Therefore, the provision now makes them mandatory.

The rest of the comments relating to this paragraph came from consumer representatives who wanted more specificity as to necessary insulation. Several asserted that Mechanism staff should not be drawn from any of the warrantors' operating divisions [147] and should provide no service to warrantors other than dispute settlement.[148] The prohibition against "assigning conflicting warrantor or sponsor duties to Mechanism staff persons" adequately responds to this concern.

Two consumer groups proposed that the length of time which funds must be committed in advance should be specified.[149] Since the necessary time period might vary greatly among different forms of Mechanisms, the Rule does not specify it. Under the Rule adequacy of any time period will be judged by the "sufficient insulation" standard.

Other suggestions for specificity were as follows: Mechanism offices and staff totally separated from warrantor and sponsor offices and staff [150], two year term for members [151], tenured position for head of staff renewable every 3 years [152], and prohibition of Mechanism staff working for warrantors during the 3 years prior and the 3 years subsequent to Mechanism employment.[153] The Commission has declined to make such provisions mandatory for two reasons. First, there is great benefit in allowing innovation among Mechanisms, and not foreclosing any form of Mechanism that can fairly and expeditiously settle disputes. Second, there is insufficient support on the record that these items are essential to ensure fairness.

OTHER MECHANISM REQUIREMENTS

(c) The Mechanism shall impose any other reasonable requirements necessary to ensure that the members and staff act fairly and expeditiously in each dispute.

The Rule sets the general requirements that are needed for fair and expeditious settlement of disputes, but does not attempt to specify details, because the Commission recognizes that these may be different for each Mechanism. This paragraph places on the Mechanism the duty to specify the details necessary to ensure that the Mechanism, whatever its form, complies with the general requirements of this Rule. For example, the Mechanism will have to set rules governing budgeting, selection and assignment of personnel, and the operation of the information gathering (and mediation) and decision making processes. As long as these rules result in a Mechanism operation that complies with the other requirements of this Rule, this paragraph is satisfied.

Little comment was directed at this provision. MACAP gave it strong support.[154] One criticism was that it appeared to give the Mechanism unlimited authority to impose requirements on warrantors and sponsors.[155] To remedy this the word "reasonable" was added to modify "requirements", consistent with the Commission's intent in the proposed provision; and the paragraph was revised to apply only to "members and staff" rather than to "members, staff and warrantors", the language used in the proposed Rule.

SECTION 703.4 QUALIFICATION OF MEMBERS

Section 703.4 specifies the required characteristics of that person or those persons actually deciding a dispute. The Act requires the Commission to provide for participation in Mechanisms by independent or governmental entities. Section 703.4 sets the minimum requirements for this type of participation which are necessary for fair settlement of disputes.

INDEPENDENCE FROM PARTIES

(a) No member deciding a dispute shall be:
(1) A party to the dispute, or an employee or agent of a party other than for purposes of deciding disputes; or
(2) A person who is or may become a party in any legal action, including but not limited to class actions, relating to the product or complaint in dispute, or an employee or agent of such person other than for purposes of deciding disputes.

For purposes of this paragraph (a) a person shall not be considered a "party" solely because he or she acquires or owns an interest in a party solely for investment, and the acquisition or ownership of an interest which is offered to the general public shall be prima facie evidence of its acquisition or ownership solely for investment.

Paragraph (a) excludes those persons who either have or may have a direct interest in the dispute, and anyone directly related to those persons. The second part of Paragraph (a) is designed to exclude those persons who would have a direct interest in a class action or other type of legal action that might arise relating to the product or complaint in dispute. Warranty complaints may involve a generic problem with a product that could result in a class action or a legal action against persons other than the warrantor. For example, a generic problem in a warrantor's product could result in a class action by numerous consumers against the warrantor and all distributors and retailers of the warrantor's product. Section 703.4(a)(2) would exclude not only the warrantor and the initial consumer, but also all other consumers and all distributors and retailers of that particular product.

Only one witness criticized the total exclusion of parties from a role in decision-making. Alcan Building Products felt that the warrantor should have a one-third vote in any decision relating to one of its products.[156] Since relevant input will be received from the warrantor during the investigation and mediation phases of complaint handling, the Commission is not persuaded that the warrantor should be allowed additional input and a vote during the decision phase.

Paragraph (a) is intended only to exclude those persons with a direct interest in the dispute. Therefore, the last sentence indicates that persons holding a stock or other interest in a party which is held solely for investment are not intended to be excluded. The fact that the interest is publicly offered is prima facie evidence of its acquisition solely for investment. In cases where the interest is substantial or is used for control, or influence, the prima facie showing would be rebutted.

Differing viewpoints were presented on this provision. One trade association wanted this exception expanded to allow members to participate in a profit-sharing plan operated by the Mechanism or the warrantor.[157] On the other hand, several consumer representatives objected to any exception for stockholders,[158] and one went so far as to suggest that Paragraph (a) should be broadened to exclude families of stockholders. Finally, two industry representatives argued that stock ownership in a warrantor would not bias a member, so the provision was correct as written.[159] After considering all of the record comment, the Commission has determined that this provision strikes the appropriate balance.

INDEPENDENCE FROM COMMERCIAL INTEREST

(b) When one or two members are deciding a dispute, all shall be persons having no direct involvement in the manufacture, distribution, sale or service of any product. When three or more members are deciding a dispute, at least two-thirds shall be persons having no direct involvement in the manufacture, distribution, sale or service of any product. "Direct involvement" shall

not include acquiring or owning an interest solely for investment, and the acquisition or ownership of an interest which is offered to the general public shall be prima facie evidence of its acquisition or ownership solely for investment. Nothing contained in this section shall prevent the members from consulting with any persons knowledgeable in the technical, commercial or other areas relating to the product which is the subject of the dispute.

(c) Members shall be persons interested in the fair and expeditious settlement of consumer disputes.

Section 110(a)(2) of the Act requires "participation in such procedure by independent or governmental entities". The Conference Report uses the terms "independent" and "consumer" interchangeably, and goes on to define independent entity as "one which is not under the control of any party to the dispute".[160] In addition the House Report states that these independent or governmental entities must be "completely impartial".[161] Paragraph (b) satisfies this legislative intent by requiring that at least two-thirds of the persons deciding a dispute shall be persons having no direct commercial interest.

Two witnesses supported the Rule's definition of independence—"no direct involvement . . .", because members should be "entirely free of industry control or influence" [162], and "industry domination" should not be allowed.[163]

Many of the witnesses were critical of the definition, because it either excluded too many persons or did not exclude enough. Some were of the opinion that the provision would not ensure that at least some members were concerned with the consumer's interests.[164] To remedy this without unduly hampering the process of selecting members, Paragraph (c) was added to the Rule. This provision is similar to requirements of some existing informal dispute settlement groups.[165] It sets a performance requirement which can be used by the Commission to ensure that the Mechanism members are protecting consumers' rights within the Mechanism.

Two consumer groups recommended a provision which would prohibit members from being employed by warrantors for a certain period of time prior to or subsequent to being members.[166] No other comments were received on this proposal, and the Commission finds that such a far-reaching prohibition as this is not necessary to ensure that members are persons who will decide fairly. Paragraph (c) achieves the same result without excluding countless people who might render excellent decisions.

Two comments recommended reducing the scope of the "direct involvement" definition by changing the word "product" to "consumer product" [167] or "products involved in the dispute".[168] Since the purpose of this provision is to minimize the Mechanism's producer bias, and not simply consumer producer bias, and even the appearance of producer bias,[169] these comments were unpersuasive.

One further comment came from the CBBB, which recommended use of a system similar to the one now in use to select arbitrators.[170] They allow the business and the consumer in each case to choose the arbitrator from a list that is sent out prior to the hearing. The list contains the names of a group of arbitrators together with information as to their backgrounds and affiliations. This system may be workable for disputes handled on a local level by a group such as the BBB, but imposing it as the only system on all types of Mechanisms does not appear to be warranted. The Rule does not prohibit a Mechanism from using this method to select members to decide a dispute from among the persons that satisfy the requirements of Section 703.4.

The requirement that two-thirds of the deciders be independent received a few comments ranging from one advocating total independence [171] to several proposing little or no independence.[172] None of the testimony convinced the Commission that it should alter the two-thirds requirement, which comports with the standards set by several existing mechanisms.[173]

In Paragraph (b), as in Paragraph (a), the intent is to exclude only those with a direct interest. Therefore, those holding an interest solely for investment are not deemed to have a direct commercial interest. For the same reasons as those stated in the discussion of Paragraph (a), the Commission has determined that this strikes the appropriate balance.

Some testimony indicated that the final sentence of Paragraph (b), which expressly allows the members to use consultants, is necessary for a fair decision in some disputes. Two industry witnesses complained that Paragraph (b) excludes from being members many persons whose technical expertise would be useful and possibly necessary to decide many disputes.[174] The "consultants" sentence ensures that expertise such as this will not be lost even though these persons will not have a vote in the decision-making process.

Section 703.5 Operation of the Mechanism

Sections 703.3 and 703.4 prescribe the general requirements for the organization of the Mechanism. Section 703.5, on the other hand, sets out the specific requirements which the Mechanism must satisfy each time it is notified of a dispute. This section is specific, but it continues the basic policy of the Rule which is in setting performance goals whenever possible, where such goals can be achieved by using whatever means the Mechanism finds most suited to its particular form of organization and complaint patterns.

WRITTEN PROCEDURES

(a) The Mechanism shall establish written operating procedures which shall include at least those items specified in the paragraphs (b)–(j) of this section. Copies of the written procedures shall be made available to any person upon request.

This paragraph requires that the Mechanism adopt a set of operating procedures which includes at least the items specified in the following paragraphs of Section 703.5. It is expected that these procedures will set out in detail the organization of the Mechanism and the means it will use to achieve the required performance goals. The procedures must also include the Mechanism's policies with respect to openness and confidentiality of records, as required in Section 703.8(b). These procedures must be in writing and copies must be provided to anyone upon request. This is to ensure that persons interested in using the Mechanism or reviewing its operation will be aware of how it is intended to operate.

No criticisms were directed at this provision and one existing mechanism indicated that the requirement was reasonable.[175]

NOTIFICATION OF PARTIES

(b) Upon notification of a dispute, the Mechanism shall immediately inform both the warrantor and the consumer of receipt of the dispute.

The specific step-by-step procedure for handling a dispute begins with this paragraph, which requires that the Mechanism acknowledge receipt of the dispute to both parties. As the Staff Report indicates, the purpose of this requirement is to reduce consumer dropout which may result from frustration over an unanswered complaint.[176]

This paragraph received little comment. MACAP again commented that this requirement was reasonable.[177] One state official felt it was important for the Rule to allow state or local consumer protection agencies to invoke the Mechanism on behalf of the consumer.[178] Paragraph (b) does not limit the persons from whom notification of a dispute may come. It may come from the consumer, the warrantor, or a representative of either party. The Mechanism must begin to exercise its duties when it receives notification from a responsible person acting on behalf of either party.

As proposed, this paragraph contained an additional clause which required the Mechanism to "supply to consumer with

a description of the procedures and time limits adhered to by the Mechanism" along with the acknowledgement. Two industry comments pointed out that the necessary information on the Mechanism will already be contained in the materials accompanying the product as required by Section 703.2(c) (3) and (4) and that the consumer's major interest at the time of dispute is obtaining a resolution rather than learning about procedures.[179] On the basis of the record, the Commission adopts this view and has, therefore, deleted this clause from Section 703.5(b).

INFORMATION GATHERING

(c) The Mechanism shall investigate, gather and organize all information necessary for a fair and expeditious decision in each dispute. When any evidence gathered by or submitted to the Mechanism raises issues relating to the number of repair attempts, the length of repair periods, the possibility of unreasonable use of the product, or any other issues relevant in light of Title I of the Act (or rules thereunder), including issues relating to consequential damages, or any other remedy under the Act (or rules thereunder), the Mechanism shall investigate these issues. When information which will or may be used in the decision, submitted by one party, or a consultant under § 703.4(b), or any other source tends to contradict facts submitted by the other party, the Mechanism shall clearly, accurately, and completely disclose to both parties the contradictory information (and its source) and shall provide both parties an opportunity to explain or rebut the information and to submit additional materials. The Mechanism shall not require any information not reasonably necessary to decide the dispute.

This paragraph places the burden on the Mechanism to gather all of the information necessary for a fair decision in each dispute. It is expected that the Mechanism will place some of this burden on the parties in the form of reasonable requests for information. The burden is, however, initially placed on the Mechanism and unreasonable requests will not be permitted. The provision goes on to list several items of information that might be relevant and, therefore, necessary for a fair decision. The items listed relate to duties of the warrantor and the consumer mentioned in the Act. The list is not intended to be exclusive. When any of these issues or any other issue relevant under the Act or the warranty is raised by the evidence, the Mechanism must investigate it. Finally, this paragraph requires the Mechanism to give the parties an opportunity to rebut any contradictory information which may be used in the decision.

MACAP stated that this provision was reasonable.[180] One witness went beyond this and asserted that proper investigation and development of a record is essential for Mechanism effectiveness.[181] Such a record not only increases the likelihood that any decision will be fair, but also encourages settlement by showing the parties that there are two sides to the dispute.[182]

Most of the critics of this paragraph as it was proposed did not object to the idea of an investigation requirement, but were concerned that the language used could be interpreted to place too great a burden on the Mechanism.[183] Only one witness found fault with the provision as a whole.[184] He felt that the information should be gathered and presented to the Mechanism by the parties as in any other adversary proceeding. As a practical matter, Mechanism decisions will be based on evidence submitted by the parties. However, the Mechanism is in the position of knowing what evidence has been submitted and what evidence is still necessary at any point in time, so the investigatory burden is placed initially on the Mechanism.

One witness complained that the provision was too general and the scope of the investigation was without limitation.[185] Other witnesses protested that the Mechanism should not have to undertake a major investigation of each case, but should have discretion to adjust the scope of the investigation to the significance of the issues.[186] The Rule does allow the Mechanism to vary the scope of the investigation from dispute to dispute. This provision only requires that the basic facts in each dispute be gathered from the parties and key witnesses (*e.g.*, retailer, service center). The Mechanism has discretion to go beyond that in any case and use extraordinary measures such as on-site inspection and expert testimony.

Paragraph (c) in the proposed Rule appeared to require the Mechanism actively to seek out issues such as number of repair attempts or unreasonable use of the product in every case. To reduce this burden the language was modified to make it clear that these issues must only be investigated if it appears from the evidence that they are involved in the dispute.

The sentence in this paragraph of the proposed Rule requiring disclosure of contradictory information was criticized, because it could be read to apply to every item of information whether or not it was to be used in the decision.[187] In response to this the phrase "which will or may be used in the decision" was added. Under this requirement, the Mechanism, when it receives contradictory information which it will not and does not use in the decision, need not disclose the information to the parties.

SETTLEMENT AND DECISION

(d) If the dispute has not been settled, the Mechanism shall, as expeditiously as possible but at least within 40 days of notification of the dispute, except as provided in paragraph (e) below: (1) render a fair decision based on the information gathered as described in paragraph (c) of this section, and on any information submitted at an oral presentation which conforms to the requirements of paragraph (f) of this section (A decision shall include any remedies appropriate under the circumstances, including repair, replacement, refund, reimbursement for expenses, compensation for damages, and any other remedies available under the written warranty or the Act (or rules thereunder); and a decision shall state a specified reasonable time for performance.); (2) disclose to the warrantor its decision and the reasons therefor; (3) if the decision would require action on the part of the warrantor, determine whether, and to what extent, warrantor will abide by its decision; and (4) disclose to the consumer its decision, the reasons therefor, warrantor's intended actions (if the decision would require action on the part of the warrantor), and the information described in paragraph (g) of this section. For purposes of this paragraph (d) a dispute shall be deemed settled when the Mechanism has ascertained from the consumer that: (1) the dispute has been settled to the consumer's satisfaction; and (2) the settlement contains a specified reasonable time for performance.

(e) The Mechanism may delay the performance of its duties under paragraph (d) beyond the 40 day time limit: (1) where the period of delay is due solely to failure of a consumer to provide promptly his or her name and address, brand name and model number of the product involved, and a statement as to the nature of the defect or other complaint; or (2) for a 7 day period in those cases where the consumer has made no attempt to seek redress directly from the warrantor.

a. Settlement. The proposed Rule contained a separate paragraph dealing with settlement, which required the Mechanism to ratify any predecision settlement and disclose to the consumer the same information which must be disclosed when a decision is rendered. The purpose of the proposal was to "relieve the Mechanism from rendering decisions in matters that are no longer in controversy, while insuring that the consumer who settles receives equal treatment to that of the consumer who waits for a Mechanism decision." [188]

The paragraph as written received considerable adverse comment with no favorable comment to balance it. In addition to being characterized as a waste of energy,[189] the provision was objected to by warrantors because it would require them to admit liability by settling (since a ratified settlement would be admissible in court),[190] and by prospective Mechanisms because it would require them to ratify settlements with which they may not agree.[191]

Because of these strong comments, the proposed settlement provision was deleted. However, to ensure that consumers who elect to settle are not treated un-

V 40 251 DEC 31 75 XUM

fairly, the sentence defining settlement was added as the last sentence of Paragraph (d), which deals with decision-making. The clause merely specifies when a dispute will be considered settled for purposes of the Rule so as to relieve the Mechanism of its duty to reach a decision. This occurs when the Mechanism ascertains from the consumer that the dispute has been settled to the consumer's satisfaction and the settlement contains a specified reasonable time for performance. Under the revised provision the Mechanism is not required to disclose to the consumer the information contained in Section 703.5(g), but must still follow-up under Section 703.5(h) to see if performance has occurred. These modifications of the Rule reduce the burden on the Mechanism and meet the objections of both warrantors and Mechanisms, while continuing to fulfill the purpose of the settlement paragraph which was to provide sufficient protection for consumers who elect to settle.

b. Decision. The remainder of Paragraph (d) is virtually identical to Paragraph (e) of the proposed Rule. The first step required by this paragraph is for the members to render a decision. As the Staff Report states:

> A procedure culminating in anything less than a decision . . . would give no assurance of fair and expeditious settlement of disputes. It would provide no incentive to the warrantor to take action favorable to the consumer, because the Mechanism could not exert any pressure on the warrantor at any stage in the procedure. In addition it would be viewed with suspicion by consumers as a tool of the warrantor to delay redress of warranty rights.[102]

The Center for the Study of Responsive Law strongly supported the decision requirement:

> . . . [S]uch authority is important to both consumer and warrantor alike. Our study has found that one of the most frustrating aspects of the consumer complaint process is its inconclusiveness. Unless both parties go to Small Claims Court or agree to binding arbitration, there is no place in the system for a decision. Instead countless referrals, communications and discussions are encouraged, with no end points in sight. To reduce the frustrations inherent in this process, therefore, *decisions* are important.

Finally, to adopt some other procedure would be to risk placing impossible burdens of enforcement on the FTC. What rules could one write to ensure that mediation and conciliation actually took place. Where rules can be kept simple and straightforward, they should be, and such is the case in this instance.[103]

The only objections to the decision requirement came from persons affiliated with the Better Business Bureau organization. Two witnesses asserted that the requirement was too rigid and should be revised to give the Mechanism discretion to refuse to handle certain types of cases (e.g., very complex disputes, disputes in which both warrantor and consumer agree to waive the Mechanism).[104] These arguments were unpersuasive. It would be unfair to allow the Mechanism to refuse to handle a complex case, when a Mechanism decision may be the only remedy which the consumer can feasibly pursue. Additionally, if an exception were created for cases in which the parties agreed to bypass the Mechanism and pursue other remedies such as binding arbitration, a Mechanism would have an avenue for leading consumers into remedies which might not operate fairly and which could take away consumers' right to bring their cases to court. Therefore, no exceptions were added to the Rule.

Paragraph (d) requires that a decision shall include all appropriate remedies. Several strenuous objections were received which questioned the appropriateness of giving the Mechanism broad authority to fashion relief.[105] These comments interpreted this clause as providing far more than was intended. The intent was to make clear that the Mechanism decision must include all relief which is available under the warranty or the Act and appropriate under the circumstances.

A further requirement in this paragraph is that the decision must specify a time within which performance is to occur, and that such time must be reasonable. As the Staff Report indicates: "An important part of any remedy is the time in which performance will occur. In a warranty dispute the length of time estimated by the warrantors for repair or replacement may be a major cause of the disagreement."[106] This provision was not criticized, and stands as proposed.

After reaching a decision, the Mechanism must determine whether, and to what extent, the warrantor will abide by the decision, and then must disclose this to the consumer along with further information specified in Section 703.5 (g). One comment objected that requiring the Mechanism to ascertain the warrantor's intentions "appears to give the mechanism a continuing authority over a warrantor's activities, not contemplated by the Act."[107] This criticism is not well taken, because the provision does not give the Mechanism any additional authority over the warrantor. It merely requires the Mechanism to collect and pass along to the consumer information which the consumer needs to decide whether or not to proceed to court.

c. Time Limit. All of the duties placed on the Mechanism by Paragraph (d) must be completed within 40 days of notification to the Mechanism of the dispute. This requirement received vast and varied comment. Many consumer witnesses felt that 40 days is too long for a consumer to wait for resolution of a dispute, especially a consumer with a malfunctioning product and no funds to repair it.[108] They suggested periods ranging from 10 to 30 days as more appropriate. A few comments stated that the time period is reasonable.[109]

Industry comments were generally opposed to the time limit as too short (90 days was a suggested alternative),[110] or too inflexible (no set time limit was proposed by several witnesses).[111] The Commission recognizes that time limits place burdens on Mechanisms. However, time limits are necessary to ensure that disputes are handled expeditiously. After considering all of the evidence, the Commission is convinced that the 40 day requirement strikes a reasonable balance between consumers' needs for a speedy decision and Mechanisms' needs for sufficient time to effectively resolve disputes.

d. Time Limit Exceptions. Paragraph (e) describes two situations in which the Mechanism may take more than 40 days to reach a decision and notify the consumer. First, the Mechanism can extend the time for decision for the period of time caused by consumer failure to provide necessary information. To close a potential loophole in the clause as proposed, the final Rule specifies those items of information which are considered necessary. Second, the final Rule permits the Mechanism to delay for seven days where the consumer has not sought redress directly from the warrantor. This was added in response to criticisms of the "Nothing contained in . . ." clause which followed Section 703.2(d) in the proposed Rule. Industry witnesses indicated that allowing consumers direct access to the Mechanism would overburden the Mechanism and cause time delay.[112] The additional 7 days allowed by this clause is intended to ease that burden by giving the Mechanism and the warrantor sufficient extra time within which to investigate and mediate complaints. The Commission has decided that it is better to give the Mechanism the extra time here than it is to require the consumer to seek redress directly from the warrantor before going to the Mechanism.

[112] *See*, discussion of the last paragraph of Section 703.2(d), "Redress Available Directly From Warrantor," *supra*.

ORAL PRESENTATIONS

(f) The Mechanism may allow an oral presentation by a party to a dispute (or a party's representative) only if: (1) both warrantor and consumer expressly agree to the presentation; (2) prior to agreement the Mechanism fully discloses to the consumer the following information: (i) that the presentation by either party will take place only if both parties so agree, but that if they agree, and one party fails to appear at the agreed upon time and place, the presentation by the other party may still be allowed; (ii) that the members will decide the dispute whether or not an oral presentation is made; (iii) the proposed date, time and place for the presentation; and (iv) a brief description of what will occur at the presentation including, if applicable, parties' rights to bring witnesses and/or counsel; and (3) each party has the right to be present during the other party's oral presentation. Nothing contained in this paragraph (f) shall preclude the Mechanism from allowing an oral presentation by one party, if the other party fails to appear at the agreed upon time and place, as long as all of the requirements of this paragraph have been satisfied.

This paragraph sets strict limitations on the use of oral presentations by the parties. However, an oral presentation is an option which a Mechanism can offer to the parties if it desires, but this provision does not require that the Mechanism do so. If the Mechanism provides an opportunity for an oral presentation, it must satisfy certain requirements. First, no oral presentation may occur unless both parties agree to it. Second, before agreement the consumer must be informed of those facts that would affect his or her decision to agree. It must be disclosed that an oral presentation is completely optional, that the warrantor cannot appear unless the consumer agrees, and that the Mechanism will render a decision whether or not an oral presentation occurs. The proposed date, time, and place for the presentation and a description of the relevant procedures, rights, and duties must also be disclosed. Third, each party has the right to be present during the other party's oral presentation. The final sentence of this paragraph makes it clear that once the parties have agreed to an oral presentation, one party may be allowed to make a presentation whether or not the other party appears. This disclosure is not intended to override the Section 703.5(c) rebuttal requirement. If the party appearing presents new evidence, the other party must be contacted and given an opportunity to rebut (not necessarily in person) before a final decision can be made.

Several types of comments were received in regard to the discretionary nature of oral presentations. The Staff Report cites the following reason for leaving the decision up to the Mechanism.

> It is recognized that several existing mechanisms operate at a national level and do all of their information gathering by telephone or mail. To require an opportunity for an oral presentation at a reasonable time and place would make it impossible for these mechanisms to achieve the expeditious settlement of disputes which is envisioned by Section 110(a) of the Act.[202]

Support for this proposition was received from one of the existing mechanisms.[203]

Several witnesses suggested that an oral presentation should be allowed when the consumer requests [204], or when either party requests.[205] These comments did not adequately support the view that the right to an oral presentation is essential at this informal level of dispute settlement. Since the need to foster a variety of Mechanisms, including national ones, is greater than the need for oral presentations at the behest of the parties, the Commission has retained this provision.

Two comments argued that the Mechanism should be allowed to require the parties to appear before it and make oral presentations.[206] The Rule does not adopt this approach, because a required appearance and presentation might cause consumers to drop out of the Mechanism. The Staff Report states:

> Preparing for an oral presentation could be costly, as it might involve interviewing witnesses or developing a statement or exhibits. Even if a consumer does not prepare for an oral presentation, there are costs involved in merely appearing at the appointed time and place. If a consumer is required to appear upon penalty of default, these costs are involuntary ones, and, as discussed at page 57 of this Report, saddling the consumer with them would contravene the legislative intent expressed in the House Report.[207]

One final proposal in this area was to allow the Mechanism to consult with the warrantor alone.[208] The need for this type of consultation during the decision-making process was not shown. It appears to be more appropriate during a mediation stage. The room for abuse and the possibility of unfair warrantor influence which this proposal would create, mandates that it not be adopted.

Several consumer representatives asserted that any oral presentation should be at a convenient time and place.[209] A requirement such as this is unnecessary, since the consumer can veto an oral presentation and presumably would do so if it were not at a convenient time and place. Additionally, since the Mechanism can elect not to allow oral presentations (and since the consumer can veto), there is no incentive for it to select an inconvenient time or place.

A few other witnesses commented on the clause relating to witnesses and counsel, which is merely a disclosure requirement. One person felt that the consumer should expressly be given the right to bring witnesses.[210] Another felt that use of counsel by the parties should be at the consumer's option.[211] Since the Commission has decided to make oral presentations optional with the Mechanism, and since the Rule is intended to allow many different forms of Mechanisms, the Commission does not find a basis for setting strict requirements for the conduct of oral presentations.

Finally, two trade associations complained that Paragraph (f)(2) requires the Mechanism to make certain disclosures to the consumer, but does not require it to make the same disclosures to the warrantor.[212] This criticism is not well taken. The Rule is written to contain sufficient protection for the consumer whose dispute is being handled by a Mechanism selected by the warrantor. Since the warrantor selects the Mechanism, the warrantor presumably can have the Mechanism built in similar protections for the warrantor.

DISCLOSURES TO CONSUMERS

(g) The Mechanism shall inform the consumer, at the time of disclosure required in paragraph (d) of this section that: (1) if he or she is dissatisfied with its decision or warrantor's intended actions, or eventual performance, legal remedies, including use of small claims court, may be pursued; (2) the Mechanism's decision is admissible in evidence as provided in section 110(a)(3) of the Act; and (3) the consumer may obtain, at reasonable cost, copies of all Mechanism records relating to the consumer's dispute.

This paragraph lists the disclosures that must be made to the consumer at the time he or she is notified of the Mechanism's decision and the warrantor's intended actions. The first item is the fact that all available legal remedies may now be pursued. Second is the fact that Section 110(a)(3) of the Act provides that the Mechanism's decision is admissible in evidence in a related civil action. The final item relates to the parties' right to access to the dispute file as required by Section 703.8(d).

No negative comments were directed to this notification requirement. One witness stressed the need to inform the consumer of the right to pursue further legal remedies, and the importance of mentioning avenues such as small claims court.[214] One other witness suggested that the Mechanism should also mention the possibility of binding arbitration.[215] If the Mechanism is aware of an arbitration program (or any other dispute settlement mechanism) that operates fairly, nothing in Paragraph (g) would prohibit it from providing this information to the consumer.

FOLLOW-UP

(h) If the warrantor has agreed to perform any obligations, either as part of a settlement agreed to after notification to the Mechanism of the dispute or as a result of a decision under paragraph (d), the Mechan-

ism shall ascertain from the consumer within 10 working days of the date for performance whether performance has occurred.

This paragraph requires the Mechanism to provide followup in every case in which the warrantor has promised some action to the consumer. In this way the Mechanism will be aware of each instance in which a warrantor has violated the Section 703.2(f)(3) requirement that the warrantor perform all agreed to obligations. The Mechanism will need this information to include in its records, indexes, and statistical compilations as required by Section 703.6.

Few comments were directed at this provision. The Center for the Study of Responsive Law felt that this was a very important requirement.

> It may be hard to believe, but regret[t]ably it is a fact that many complaint-handling mechanisms have no effective means for determining whether promised action was ever taken. Our studies have found that such mechanisms rely on the belief that if the promised service is not forthcoming, the consumer will re-contact the agency and inform them of the non-compliance. What actually happens, however, is that the consumer gives up and tries to live with his frustration . . .
>
> This requirement, therefore, is necessary to ensure that such mechanisms effectively handle complaints.[216]

Two industry representatives objected to the paragraph as inappropriate and unnecessary. The National Electrical Manufacturers Association stated that it "places the mechanism in an enforcement role as an advocate for the consumer."[217] The provision does not have this effect. It merely requires the Mechanism to determine whether or not performance has occurred, and to place this information in its records. Both NEMA and the other industry comment argued that the consumer should be expected to re-contact the Mechanism if performance has not occurred.[218] For the reasons stated by CSRL in its comment, quoted above, the Commission has determined that this provision is necessary to ensure that most instances of warrantor noncompliance will appear in the records of the Mechanism.

Paragraph (h) in the proposed Rule required that follow-up occur within 5 working days of the date for performance. In order to minimize any burden placed on the Mechanism by this provision, the time period has been extended to 10 working days. This would allow the Mechanism, for example, to provide the consumer with a postcard along with notification of decision with instructions to return it on the date specified for performance indicating whether or not performance had occurred. If the Mechanism did not receive the postcard back within a few days of the date for performance, then it would have to actively attempt to contact the consumer.

Two other comments suggested that the last word in this paragraph, "occurred", be changed to "commenced" or "begun", because it might be impossible for the warrantor to complete performance within 5 working days.[219] Such change is not necessary. This provision is not intended to imply that performance must be accomplished within a 10 day period. It is intended to require the Mechanism to follow-up within 10 working days of the date on which performance is to have been completed.

CONSUMER'S RIGHT TO PURSUE OTHER REMEDIES

(i) A requirement that a consumer resort to the Mechanism prior to commencement of an action under section 110(d) of the Act shall be satisfied 40 days after notification to the Mechanism of the dispute or when the Mechanism completes all of its duties under paragraph (d) of this section, whichever occurs sooner. Except that, if the Mechanism delays performance of its paragraph (d) duties as allowed by paragraph (e), the requirement that the consumer initially resort to the Mechanism shall not be satisfied until the period of delay allowed by paragraph (e) has ended.

Section 110(a)(3) of the Act provides that under certain circumstances a warrantor may require a consumer to resort to the Mechanism before commencing an action under Section 110(d) of the Act. This paragraph provides that any requirement imposed by a warrantor is satisfied either 40 days after notification to the Mechanism of the dispute or when the Mechanism has completed its duties under Section 703.5(d) whichever is sooner. The last sentence of this provision contains two exceptions to this general rule, which correspond to the two exceptions to the 40 day requirement found in Section 703.5(e).

A few modifications were proposed but the Commission did not find the reasons to support them persuasive. One comment argued that a settlement between the consumer and warrantor should satisfy the requirement of resort to the Mechanism.[220] First, a consumer who has settled should have no need to proceed immediately to court. Second, if this were allowed, a consumer could agree to a settlement in bad faith merely as a device to bypass the Mechanism and go straight to court.

Another comment suggested that a requirement of initial resort to the Mechanism should not be satisfied until the time for performance has occurred.[221] This would be unfair to a consumer who was not satisfied with the decision and would serve no purpose but to unreasonably delay the consumer.

Finally, one comment proposed that a further exception to the 40 day period be included for "excusable failures" on the warrantor's part to provide necessary information.[222] As the discussion of Section 703.5 (d) and (e) indicates, the Commission has determined that 40 days is the maximum length of time a consumer should be delayed from going to court except in those cases where additional delay is caused by the consumer's inaction. If the consumer has provided the information specified in Section 703.5(e)(1), lack of information from the warrantor would not preclude the Mechanism from reaching a decision. If the warrantor does not provide any information, the Mechanism will merely decide in favor of the consumer (if the consumer has provided enough information to justify recovery).

LEGAL EFFECT OF MECHANISM DECISIONS

(j) Decisions of the Mechanism shall not be legally binding on any person. However, the warrantor shall act in good faith, as provided in § 703.2(g). In any civil action arising out of a warranty obligation and relating to a matter considered by the Mechanism, any decision of the Mechanism shall be admissible in evidence, as provided in section 110(a)(3) of the Act.

This paragraph specifies the effect which a Mechanism decision shall have on the parties to the dispute. A decision shall not be legally binding on any person; however, the warrantor is obligated by Section 703.2(g) to act in good faith in deciding whether, and to what extent, it will abide by each decision. The last sentence of this provision is a restatement of a portion of Section 110(a)(3) of the Act which provides: "In any civil action arising out of a warranty obligation and relating to a matter considered in such a procedure, any decision in such procedure shall be admissible in evidence."

Several industry representatives contended that warrantors should be allowed to require consumers to resort to mechanisms whose decisions would be legally binding (e.g., binding arbitration).[223] The Rule does not allow this for two reasons. First, as the Staff Report indicates, Congressional intent was that decisions of Section 110 Mechanisms not be legally binding.[224] Second, even if binding Mechanisms were contemplated by Section 110 of the Act, the Commission is not prepared, at this point in time, to develop guidelines for a system in which consumers would commit themselves, at the time of product purchase, to resolve any difficulties in a binding, but nonjudicial, proceeding. The Commission is not now convinced that any guidelines which it set out could ensure sufficient protection for consumers.

Many consumer representatives stated that Mechanism decisions should be binding on the warrantor alone, because the warrantor is the party who has chosen the Mechanism as the forum for dispute resolution.[225] The Rule presently requires the warrantor to act in good faith in deciding whether, and to what extent, it will abide by Mechanism decisions. Thus an adverse Mechanism decision will have a far greater impact on a warrantor than it will on a consumer. The Commission is not persuaded that making this impact on the warrantor even greater would benefit consumers more than it would discourage warrantors from adopting Mechanisms.

Two witnesses were concerned that the Rule as written would not allow the use of binding arbitration by the parties after the Mechanism had rendered a decision.[226] As the Staff Report makes clear,[227] there is nothing in the Rule which precludes the use of any other remedies by the parties following a Mechanism decision. The warrantor, the Mechanism, or any other group can offer a binding arbitration option to consumers who are dissatisfied with Mechanism decisions or warrantor intentions. However, reference within the written warranty to any binding, non-judicial remedy is prohibited by the Rule and the Act.

Others suggested that in some cases the warrantor and the consumer might want to agree to use a remedy such as binding arbitration instead of proceeding to the Mechanism.[228] Again, nothing in the Rule precludes the parties from agreeing to use some avenue of redress other than the Mechanism if they feel it is more appropriate. However, once the consumer or the warrantor notifies the Mechanism of the dispute, the Mechanism is required by Section 703.5(d) to proceed to a decision within the specified time limits.

SECTION 703.6—RECORDKEEPING

Section 703.6 states the minimum recordkeeping requirements to which a Section 110 Informal Dispute Settlement. Mechanism must conform. The Section covers development and maintenance of individual dispute files, indexing, statistical summaries of Mechanism performance, and record retention requirements.

The Section is intended to facilitate fair, orderly and efficient complaint handling; recognition of industry-wide product or warranty performance problems; independent audit under Section 703.7 of the Rule; and review and monitoring by the Commission, and by interested persons pursuant to Section 110(a)(4) of the Act. Requirements have been set with a view to acceptable cost levels, and to the need to preserve the confidentiality of sensitive records. Wherever reasonable, recordkeeping practices consistent with the practice of existing complaint handling bodies were adopted.

The Commission staff rationale for the recordkeeping requirements initially proposed was set out at pp. 88–98 of the staff Report.[229] Following review of written and oral comment on the proposed Rule, the Commission has modified the recordkeeping requirements in certain respects. The modifications are treated in detail below. Certain of these will merely clarify the extent of recordkeeping obligations intended under the Rule as initially proposed.[230] Others are intended to reduce the recordkeeping obligations where the comment was persuasive that legislative and commission objectives could be achieved under less burdensome requirements.

Under the requirements relating to individual dispute files, reductions were achieved by elimination of certain requirements for preparation of summaries and fact descriptions.[231] Under the modifications, requirements would be met simply by the filing and retention of records otherwise prepared or collected in the normal course of dispute handling. Indexing requirements have been stated with more particularity.[232] Statistical summaries will be required semi-annually,[233] rather than monthly as initially proposed. Other modifications will be noted in the detailed discussion under each section.

There were numerous written and oral comments that either generally opposed[234] or generally supported[235] the recordkeeping requirements as proposed, including several relating to the feasibility of implementing the recordkeeping requirements as proposed.[236] Except as noted in the detailed discussion below, there was not a great deal of criticism (or support) with regard to particular recordkeeping provisions or subsections. There was a dearth of specific counter-proposals. In response to general objections many of the modifications reflect a decision by the Commission to effect a general or over-all reduction in the recordkeeping obligation. The Commission has determined that the requirements as set forth are sufficient to meet the fundamental recordkeeping objectives set out in the discussion *supra* at 138.

INDIVIDUAL DISPUTE RECORDS

(a) The Mechanism shall maintain records on each dispute referred to it which shall include:

(1) Name, address and telephone number of the consumer;

(2) Name, address, telephone number and contact person of the warrantor;

(3) Brand name and model number of the product involved;

(4) The date of receipt of the dispute and the date of disclosure to the consumer of the decision;

(5) All letters or other written documents submitted by either party;

(6) All other evidence collected by the Mechanism relating to the dispute, including summaries of relevant and material portions of telephone calls and meetings between the Mechanism and any other person (including consultants described in § 703.4(b));

(7) A summary of any relevant and material information presented by either party at an oral presentation;

(8) The decision of the members, including information as to date, time and place of meeting, and the identity of members voting; or information on any other resolution;

(9) A copy of the disclosure to the parties of the decision;

(10) A statement of the warrantor's intended action(s);

(11) Copies of follow-up letters (or summaries of relevant and material portions of follow-up telephone calls) to the consumer, and responses thereto; and

(12) Any other documents and communications (or summaries of relevant and material portions of oral communications) relating to the dispute.

Section 703.6(a) establishes maintenance requirements with regard to records that would come into the Mechanism's possession in the normal course of its receipt, investigation and resolution of individual disputes pursuant to other sections of this Rule. The requirements support the general purposes of recordkeeping, discussed *supra*, at 138. In addition, the file, available to the parties to a dispute under Section 703.6(e), would provide a basis for any subsequent arbitration, legal or other proceedings following action by the Mechanism.

[226] TR 17, Virginia Knauer, Office of Consumer Affairs, HEW; TR 260–261, NCL.
[227] R 1–2–3, 993.
[228] TR 91–92, CBBB; TR 1466–1467, AAA.
[229] R 1–2–3, 994–1004.
[230] *E.g.*, "relevant and material" has been added to certain sections to clarify that verbatim summaries or transcripts of telephone conversations would not be required. The comments underscored the possibility of a more onerous reading of these sections than had been intended. *See*, for example, TR 422, Electronic Industries Association, and TR 222, Association of Home Appliance Manufacturers.
[231] Proposed Section 703.6(a)(1), and Section 703.6(a)(1)(iv)–(vi).
[232] The general indexing requirement of proposed Section 703.6(b) has been deleted in favor of new Section 703.6 (b), (c) and (d).
[233] Section 703.6(e), discussed *infra* at 149.
[234] Several representative comments: R 1–4–1, 357–358. National Association of Home Builders commented that the requirements would be costly and cumbersome, and would deter warrantors from establishing mechanisms; R 1–4–1, 394, Major Appliance Consumer Action Panel (complicated and redundant, noting particularly the requirement of a summary form); R 1–3–2, 626, Proctor-Silex, SCM Corporation (unnecessarily onerous and expensive); R 1–3–2, 579, Quarles & Brady (extremely burdensome); TR 831, Warranty Review Corporation (cumbersome . . . costly burden unnecessary to the main purpose of the Act); TR 831, Guren, Merritt, Sogg & Cohen (cost large enough to discourage the use of informal dispute settlement procedures); R 1–4–2, 672, National Automobile Dealers Association (too expansive for the average size dealer).
[235] TR 845 and following, Donald Rothschild; TR 246, Christopher Wheeler; TR 2494, John Pound, San Francisco Consumer Affairs Office (minimum essential even recognizing the cost factors); TR 2371, Max Factor, Office of the Los Angeles City Attorney; TR 1470, American Arbitration Association; TR 105, Council of Better Business Bureaus; TR 2149, Kit Manufacturing Company; TR 2492, Joe Garcia, California Department of Consumer Affairs.
[236] One common theme among those opposed to the recordkeeping requirements as proposed, was that the cost would deter warrantors from establishing informal dispute settlement procedures. *See*, footnote 234. The following comments reflect a contrary view: R 1–3–3, 766, Better Business Bureau, Chicago (stated that present recordkeeping system could be modified to conform to the new requirements with a minimum of difficulty); TR 1470, American Arbitration Association (records currently kept on all AAA cases include most of the basic information required by the proposed requirements); TR 863, Donald Rothschild (economies of scale); TR 863, Warranty Review Corporation (economies of scale).

V 40 N 251 DEC 31 75 XUM

The Section has been modified in certain respects. The proposed dispute summary form under former (a)(1), the fact description under former (a)(1)(iv), the statement under former (a)(1)(v), and the summary of follow-up action under former (a)(1)(vi) have all been deleted with a view to cost savings related to Mechanism staffing. The Commission's view is that the information in each instance would still be available in the file under new paragraph (a) in the form of raw documents collected or prepared by the Mechanism in the normal course of dispute handling. Conversely, requirements for preparation of summaries of phone conversations, oral presentations and the like have been retained, Section 703.6(a)(6), (7), (10), (11), and (12),[237] since there would be no other source of a written record for the file. This is consistent with the reported practices of a number of exising complaint handling mechanisms.[238]

Under the Rule, "relevance" remains the principal—and probably the least burdensome—criterion with regard to filing and retention of documents collected or prepared in the normal course of resolving individual disputes. However, the Commission has modified the record-keeping provisions relating to summaries of phone conversations and meetings, cited above, by inserting, as appropriate, "relevant and material." This, together with retention of "summaries", is intended to clarify that only those portions of oral transactions material to consideration of the dispute need be recorded; and then only in notation or summary form, rather than lengthy or verbatim transcriptions.[239]

The Commission does not expect that all of the types of records delineated in Section 703.6(a) would necessarily be involved in each dispute. The Commission recognizes that many disputes will be decided fairly on the basis of very abbreviated files. This would not obviate the need or requirement for orderly recording, filing, and retention of records as set out in the Rule. The guiding principle intended is that only those records necessary for full and fair determination of disputes be collected, assembled, and retained.

The words "the decision" in new Section 703.6(a)(4) (formerly Section 703.6(a)(1)(vii)) have been substituted for the term "resolution" to conform to usage in other parts of the Rule.[240] As indicated, the paragraphs have been renumbered as required by changes and deletions.

[237] Former Section 703.6(a)(3), (4), (7), (8) and (9), respectively.

[238] R 1-4, 394-395, Major Appliance Consumer Action Panel; R 1-4-1, 308-309, Furniture Industry Consumer Advisory Panel.

[239] A number of comments singled out preparation of summaries of telephone conversations as being particularly onerous: TR 422, Electronic Industries Association; R 1-3-3, 1075, Guren, Merritt, Sogg & Cohen; TR 222, Association of Home Appliance Manufacturers; and others.

[240] Sections 703.1(f), 703.2(f)(2), 703.4 (a) and (b), 703.5(c), 703.5(d) (1) and (2), 703.6(a)(8) and (9), 703.8(c) and others.

INDEXING REQUIREMENTS

(b) The Mechanism shall maintain an index of each warrantor's disputes grouped under brand name and subgrouped under product model.

(c) The Mechanism shall maintain an index for each warrantor as will show: 1) all disputes in which the warrantor has promised some performance (either by settlement or in response to a Mechanism decision) and has failed to comply; and 2) all disputes in which the warrantor has refused to abide by a Mechanism decision.

(d) The Mechanism shall maintain an index as will show all disputes delayed beyond 40 days.

Proposed Section 703.6(b) stated in general terms the requirement that a mechanism must index individual dispute files to facilitate identification and analysis of patterns of Mechanism and warrantor actions, and patterns of warrantor or industry complaints or product defects. Indexes were to be established based on a number of factors, including the anticipated needs of an auditor operating under Section 703.7. The Staff Report accompanying the proposed Rule indicated that records would probably be indexed by warrantor, product, type of complaint, final disposition and other categories.[241] The general requirements of the paragraph have been clarified by substitution of new Section 703.6(b), (c) and (d), which state the indexing requirements with more particularity. The paragraph had been objected to on the grounds of unnecessary burden or lack of clarity.[242]

Paragraph (b) now requires that disputes be indexed by warrantor's brand name and product model. Analysis of patterns of complaints is a current practice among existing dispute settlement mechanisms, and has formed the basis for mechanism recommendations regarding industrywide consumer problems.[243] The practice is widely considered to be a natural and logical extension of complaint handling,[244] since resolution of generic problems leads ultimately to a reduction in the number of individual complaints. The paragraph (b) indexing requirement is intended to recognize and preserve this important practice among dispute settlement mechanisms established under this Rule.

Paragraph (c) states indexing requirements relating to two key indicators of a warrantor's good faith participation in an informal settlement mechanism. Entries under the first category—warrantor failure to perform obligations agreed to—would raise a presumption of a Rule violation. Entries under the (c)(2) category—refusals by a warrantor to abide by Mechanism decision—would not raise such a presumption,[245] but would be relevant to review of warrantor performance by the Federal Trade Commission under Section 110(a)(4) of the Act, and the "good faith" requirement under Section 703.2(g) of the Rule.

Paragraph (d) requires maintenance of an index of disputes delayed beyond the 40 day time limit set out in Section 703.5(d). This requirement is intended to facilitate ease of initial determination by the Commission, and by an auditor under Section 703.7, as to whether a Mechanism is resolving disputes "expeditiously." A significant number of entries in this index category would be an indication that a Mechanism was not complying with the fundamental requirement of the Act to proceed expeditiously. That determination would be based ultimately, as would a determination of "fairness", on a review of the facts and circumstances in each case, or on a representative sample of cases, in which the Mechanism required more than 40 days to fulfill its obligations under Section 703.5(d) of the Rule.

The indexes required under Section 703.6 (b), (c) and (d) could be kept confidential by the Mechanism to the extent permitted under Section 703.8(b). For purposes of clarification indexes may be maintained in any convenient form, provided that the information required is readily ascertainable, and the underlying dispute files are available and clearly referenced.

STATISTICAL REPORTING REQUIREMENTS [246]

(e) The Mechanism shall compile semi-annually and maintain statistics which show the number and percent of disputes in each of the following categories:

(1) Resolved by staff of the Mechanism and warrantor has complied;

(2) Resolved by staff of the Mechanism, time for compliance has occurred, and warrantor has not complied;

(3) Resolved by staff of the Mechanism and time for compliance has not yet occurred;

(4) Decided by members and warrantor has complied;

(5) Decided by members, time for compliance has occurred, and warrantor has not complied;

(6) Decided by members and time for compliance has not yet occurred;

(7) Decided by members adverse to the consumer;

(8) No jurisdiction;

(9) Decision delayed beyond 40 days under § 703.5(e)(1);

(10) Decision delayed beyond 40 days under § 703.5(e)(2);

(11) Decision delayed beyond 40 days for any other reason; and

(12) Pending decision.

Paragraph (e) requires the Mechanism to compile, maintain and report statistics according to various status and final disposition categories. The statistical summary supports the functions

[241] R 1-2-3, 998.

[242] R 1-3-2, 579, Quarles & Brady; R 1-6, 53-54, Christopher Wheeler; R 1-4-1, 616, National Retail Merchants Association (not necessary for operation of Mechanism itself); TR 350, Warranty Review Corporation; and see generally Footnote 234, *supra*.

[243] R 1-2-3, 998, Staff Report.

[244] *Id.*; TR 23-24, Virginia Knauer, Office of Consumer Affairs, HEW; R 1-6, 53-54, Christopher Wheeler; R 1-2-3, 1804, Furniture Industry Consumer Advisory Panel; R 1-2-4, 1989-1991, Major Appliance Consumer Action Panel.

[245] R 1-3-2, 394, Shell Oil Company expressed the concern that the Commission would enforce the Rule based on pre-determined formulas regarding warrantor performance. No such presumptions are intended. *See* generally the discussion under the good faith requirement under Section 703.2(g), *supra*.

[246] Proposed as Section 703.6(d).

and activities described under indexing, and provides a basis for review by interested members of the general public. On the basis of the statistically reported performance, an interested person could determine to file a complaint with the Federal Trade Commission pursuant to Section 110(a)(4) of the Act, and thereby cause the Commission to review the bona fide operation of the dispute settlement mechanism. The accuracy of the compilations are to be verified by an auditor under Section 703.7(b)(3)(ii).

The statistical reporting requirements have been modified in certain respects. The paragraphs as proposed would have required monthly compilations. In response to comment on the record,[247] this requirement has been reduced to semi-annual compilations, in order to reduce the Mechanism's reporting burden.

Former Section 703.6(d)(1)(ix) (insufficient information) has been deleted as superfluous. Former paragraph (d)(1)(xi), "decision delayed beyond 40 days", has been broken down into the following three categories: New 703.6(e)(9) "delayed beyond 40 days under Section 703.5(e)(1)" (failure by consumer to provide information); (e)(10) "delayed beyond 40 days under Section 703.5(e)(2)" (Consumer seeks redress directly from the warrantor); (e)(11) "decision delayed beyond 40 days for any other reason." Former paragraph (d)(2) requiring computation of average time between referral to the Mechanism and final resolution has been deleted on grounds that it is burdensome to compute and of questionable value, particularly in light of new categories (e)(9), (10) and (11).

Section 703.8(a) requires that the statistical compilations under Section 703.6(e) shall be available to any person for inspection and copying. Records forming the basis of the statistics may be kept confidential to the extent permitted under other paragraphs of Section 703.8.

RECORD RETENTION

(f) The Mechanism shall retain all records specified in paragraphs (a)-(e) for at least 4 years after final disposition of the dispute.

The Commission has retained the four year requirement despite a number of recommendations that the retention period be reduced due to costs of storage.[248] The requirement is intended to support the Commission's monitoring obligations under Section 110(a)(4) of the Act, which might involve Commission analysis of Mechanism or warrantor action over an extended period. Records would be available to parties to disputes unresolved following Mechanism action, or in subsequent disputes arising out of an earlier transaction. The retention requirement would help to assure that the history and record of the dispute were preserved for a period equal to the general statute of limitations under the Uniform Commercial Code.[249] The Commission has no objection to storage of records by means of microfilm or any reasonable alternative to retention of raw files.

SECTION 703.7—AUDITS

Section 703.7 establishes requirements relating to independent audit of the Mechanism itself, and of the performance of participating warrantors. The proposed audit requirements elicited considerable comment. Opponents cited the presumed cost of an outside audit,[250] and counterproposals also reflected a concern with cost factors rather than opposition to the notion of an independent audit.[251] The general lack of opposition to an independent audit per se was reinforced by comment favoring the audit requirements as proposed.[252] The Commission has determined that the weight of the record clearly supports retention of the independent audit requirement. However, the requirement has been modified in several respects to reduce costs and clarify the minimum obligations.

ANNUAL AUDIT

(a) The Mechanism shall have an audit conducted at least annually, to determine whether the Mechanism and its implementation are in compliance with this part. All records of the Mechanism required to be kept under § 703.6 shall be available for audit.

Paragraph (a) is unchanged, since the record generally supported the idea of an annual audit. The "annual" requirement is discussed in the introductory portion, and in Footnote 251, *supra*. The Mechanism, under revised paragraph (b)(3), may direct its auditor to rely primarily on findings derived on the basis of direct contact with consumers who had utilized the Mechanism. The auditor would have access to all Mechanism records, without restriction, whatever the methodology. No date for completion of the report of the audit is specified; a Mechanism would be free to conduct the audit to coincide with its own budget or reporting cycle.

NATURE OF THE AUDIT

(b) Each audit provided for in paragraph (a) of this section shall include at a minimum the following:

(1) Evaluation of warrantors' efforts to make consumers aware of the Mechanism's existence as required in § 703.2(d); and

(2) Review of the indexes maintained pursuant to § 703.6 (b), (c), and (d); and

(3) Analysis of a random sample of disputes handled by the Mechanism to determine the following: (i) adequacy of the Mechanism's and other forms, investigation, mediation and follow-up efforts, and other aspects of complaint handling; and (ii) accuracy of the Mechanism's statistical compilations under § 703.6(e). (For purposes of this subparagraph "analysis" shall include oral or written contact with the consumers involved in each of the disputes in the random sample.)

In response to comments on the public record, a number of modifications have been made relative to the extent and methodology of the required audit. Proposed Section 703.7(b) would have required that the audit include a review of all aspects of Mechanism and warrantor performance subject to the Rule, and that the review would include, additionally, verification of a statistically valid sample of disputes decided by the Mechanism. Under the proposed Rule, it was envisioned that the auditor would rely primarily on exhaustive analysis of dispute files and other records, observations of dispute handling by mechanism staff and members, and exercise of a considerable degree of independent judgment as to how fairly and experitiously the Mechanism was operating. Verification of a statistically valid sample would have provided an additional check on the auditor's findings and conclusions.

The Commission has determined that the objectives of an independent audit may be realized at considerably less cost through substitution of requirements that state particular audit tasks and methodology. Section 703.7(b) states these minimum requirements.

Paragraphs (b)(1), (2) and (3)(ii) set forth specific audit tasks. Paragraph (b)(3)(i) repeats much of the general requirement relating to audit of Mechanism operation, as set out in proposed Section 703.7(b). However, as regards methodology, Paragraph (b)(3)(i) permits primary emphasis to be placed on analysis by the auditor of the experiences of a sample of consumers who have utilized a Mechanism. The paragraph states that "analysis" shall include oral or written contact with the consumers involved in each dispute in the sample. Performance of the audit obligations under both (b)(3)(i) and (ii) should probably include preparation of a questionnaire carefully structured to elicit information adequate to permit an in-

V40N251 DEC 31 75 D XUM

formed judgment as to the performance of the Mechanism, and the accuracy of the statistical summaries.

Paragraph (b)(3) requires analysis of a "random" sample, due to the costs and uncertainty that might have resulted under the proposed Section 703.7(b) requirement of a "statistically valid" sample. Nonetheless, the sample must be drawn so as to fairly reflect the operation and results of Mechanism action.

The auditor could base or supplement the analysis required under (b)(1) on the consumer contacts described under (b)(3)(i), though other generally accepted auditing methodology could be utilized. The requirements of paragraph (b)(2) would be met by reference by the auditor to the indexes, and to at least a sample of the files forming the basis of the indexes.

DISTRIBUTION OF AUDIT REPORT

(c) A report of each audit under this section shall be submitted to the Federal Trade Commission, and shall be made available to any person at reasonable cost. The Mechanism may direct its auditor to delete names of parties to disputes, and identity of products involved, from the audit report.

Access to audit information is intended to facilitate the public and FTC review functions set out in Section 110(a)(4) of the Act. To preserve the confidentiality of records as permitted under Section 703.8(b), this paragraph will permit a Mechanism to direct its auditor to omit from the report the identity of individual parties or products.

There were very few comments regarding paragraph (c), although several consumer representatives expressed opposition to the confidentiality provision.[252] A considerable range of opinion was presented on the confidentiality issue under Section 703.8(b). The Commission rationable for retaining the confidentiality provision is set out under that section.

SELECTION OF AUDITORS

(d) Auditors shall be selected by the Mechanism. No auditor may be involved with the Mechanism as a warrantor, sponsor or member, or employee or agent thereof, other than for purposes of the audit.

The independence requirement is in accord with generally accepted auditing standards, and with current practices of certain existing informal dispute mechanisms.[254] Comments raising cost objections to the independence requirement were noted in Footnote 251, *supra*.

SECTION 703.8 OPENNESS OF RECORDS AND PROCEEDINGS

Section 703.8 is intended to strike a balance between the warrantors' and Mechanism's need for confidentiality, and the competing need for public access and scrutiny of Mechanism operations that is implicit in Section 110(a)(4) of the Act. The Commission believes that the public "presence", and the right of interested persons to file complaints with the Commission under Section 110(a)(4) of the Act, will contribute to a heightened awareness by Mechanisms of the need for operation in conformance with the Rule. This should minimize the need for Commission monitoring under Section 110(a)(4) of the Act.

Under Section 703.8 statistical summaries and the annual audit report would be available to any interested person. Parties to disputes could inspect or obtain copies of their own dispute files. Auditors would have access to all Mechanism records. For all other purposes a Mechanism is permitted under the Section to maintain the confidentiality of its record. This Section, particularly the confidentiality provision, elicited considerable comment. For reasons explained below, the final Rule reflects only minor changes.

STATISTICAL SUMMARIES

(a) The statistical summaries specified in § 703.6(e) shall be available to any person for inspection and copying.

Paragraph (a) is unchanged. It is intended to support in a limited way the implicit requirement in Section 110(a)(4) of the Act relating to public review of Mechanism operation. Comment by some consumer representatives questioned whether the statistical summaries could meaningfully serve the public review function.[255] The Commission believes that summaries and the audit reports taken together will provide the opportunity for meaningful public review.

CONFIDENTIALITY

(b) Except as provided under paragraphs (a) and (e) of this section, and paragraph (c) of § 703.7, all records of the Mechanism may be kept confidential, or made available only on such terms and conditions, or in such form, as the Mechanism shall permit.

Paragraph (b) is essentially unchanged. Except for the statistical summaries, files available to parties, auditor access, and the audit report, all records of the Mechanism relating directly to settlement of disputes may be kept confidential.

There was considerable debate on this provision. The Commission believes that the record indicates that the requirements represent a fair balance between the warrantors' need for confidentiality, and the competing need for public access and scrutiny of Mechanism operations. Consumer representatives were generally opposed to any limitation on access to Mechanism records, for a variety of reasons.[256] Industry spokesmen generally voiced strong support for confidentiality of records, though several opposed the provision as written, apparently on the mistaken ground that participating warrantors and Mechanism sponsors would have no voice in Mechanism policy regarding discretionary release of records.[257] The Staff Report[258] stated that the Mechanism, and its sponsors and participating warrantors, could decide the terms and conditions of any disclosures not required by the Rule. The Commission reiterates its position that the Rule does not prohibit sponsor or warrantor involvement in formulation of the Mechanism's general policy regarding release of confidential records.

Based on the pre-publication investigation by the staff, the Commission is aware of the consensus among existing dispute settlement mechanisms that the identity of the parties and products involved in a dispute should not be disclosed to the general public.[259] The concern expressed was that the identities could be used by competitors or others to the detriment of a company engaged in good faith efforts to resolve disputes. Thus a warrantor who participated in an informal dispute settlement mechanism might be subjecting himself to possible disparagement, while non-participating warrantors would not be exposed to this possibility. Representatives of several existing mechanisms expressed the view that lack of confidentiality would operate as a strong disincentive to warrantor participation in informal dispute settlement.[260] The Commission believes that, on balance, the confidentiality provision as proposed should be retained. Disclosure of statistical summaries, audit reports and individual dispute files, should adequately supplement the Commission's monitoring and enforcement obligations under Section 110(a)(4) of the Act, without seriously compromising the confidentiality desired by warrantors.

RELEASE OF CONFIDENTIAL RECORDS

(c) The policy of the Mechanism with respect to records made available at the Mechanism's option shall be set out in the procedures under § 703.5(a); the policy shall be applied uniformly to all requests for access to or copies of such records.

Paragraph (c) received virtually no comment. It is unchanged. Should a Mechanism elect to make records available that could be held confidential under paragraph (b), then paragraph (c) would require the Mechanism to state generally in the written procedures required under Section 703.5(a), any terms or conditions relating to the availability of such records. The Mechanism would be required to apply its policy, or terms and conditions, uniformly to all requests for access to such records. The purpose of these requirements is to insure that warrantors and consumers have equal knowledge and access to any such records.

OBSERVERS AT MEETINGS

(d) Meetings of the members to hear and decide disputes shall be open to observers on reasonable and nondiscriminatory terms. The identity of the parties and products involved in disputes need not be disclosed at meetings.

The meetings policy was objected to in several comments on grounds of impracticality, or that confidentiality permitted under paragraph (b) would be compromised.[261] Because of general support and acceptance among consumer representatives and existing dispute handling organizations,[262] the provision is unchanged. Under paragraph (d), interested persons would be permitted to observe meetings of the members hearing and deciding disputes. Merchanisms could not place any unreasonable or discriminatory limitations on attendance by observers, though the paragraph does not prohibit some limitations on the number of observers or frequency of open meetings. The Commission recognizes that the presence of observers may interfere to some degree with the primary Mechanism function of dispute handling.

The paragraph is intended to further support the public access and scrutiny functions implied in Section 110(a)(4) of the Act. To preserve confidentiality, the Mechanism would be permitted under the paragraph to take steps to avoid disclosure to observers of the identity of parties and products involved in disputes. In the event that parties to a dispute appeared personally, as provided in paragraph (f) of Section 703.5, then a Mechanism might reasonably exclude nonparty observers in the interest of confidentiality, since in any event the public scrutiny function would be served by the presence of the parties to the dispute.

AVAILABILITY OF DISPUTE FILES TO PARTIES

(e) Upon request the Mechanism shall provide to either party to a dispute:

(1) Access to all records relating to the dispute; and

(2) Copies of any records relating to the dispute, at reasonable cost.

Paragraph (e) is unchanged. Access by parties includes the dispute file described in Section 703.6(a). It does not include indexed information under paragraphs (b), (c) and (d), or any other records not available to the general public. There were few objections to this provision.[263] The need expressed by consumer representatives for access to dispute settlement records, and their opposition to confidentiality in any form, is discussed under paragraph (b), *supra*.

Access by a party to the records of his or her dispute is an essential internal check on the fairness of the Mechanism. Since the Mechanism is not required to operate "on the record" as required of the courts, access by parties must provide the same type of discipline. While the rule is far from imposing a constitutional due process standard on Mechanisms, access to the files of one's own case is a minimum fairness requirement. A party is entitled to know the basis on which a decision is made. Requests for access to dispute records will not burden the Mechanism because the cost may be imposed on the requesting party.

The right of a party to copy the dispute records will facilitate further pursuit of the dispute should the Mechanism decision fail to satisfy a party. The availability of the dispute file would avoid needless cost and duplication should the parties choose to pursue the matter further in arbitration, litigation, or some other forum. Section 110(a)(3) of the Act would make the decision of a dispute settlement mechanism admissible in evidence in a civil action arising out of a warranty obligation and relating to a matter considered by the Mechanism. The Act does not address the question of admissibility of Mechanism records relating to the dispute. Thus the admissibility of these records would be determined by a court.

DISCLOSURE OF MEMBER AND STAFF QUALIFICATIONS

(f) The Mechanism shall make available to any person upon request, information relating to the qualifications of Mechanism staff and members.

The Commission has added paragraph (f). The final audit provisions no longer require review by an auditor of staff and member qualifications under Sections 703.3 and 703.4, for reasons discussed supra, at 151–153. Thus there is no basis for review. Several existing dispute settlement mechanisms currently disclose biographical information in routine publications.[264] Mechanisms could satisfy the requirement through publication of the information in the materials required under Section 703.5(a), provided the materials were updated to reflect personnel changes.

Paragraph (g) relating to Federal Trade Commission access to Mechanism records has been deleted from the final Rule. The paragraph simply restated the implied condition of Section 110(a)(4) of the Act, which establishes the Commission's review and enforcement obligations. Proposed paragraph (g) was superfluous, since the Commission would have access to Mechanism records under the general grant of investigative powers in the Federal Trade Commission Act, 15 U.S.C. §§ 41 *et seq.*

PROMULGATION

The Commission has now considered all matters of fact, law, policy and discretion, including the data, views and arguments presented on the Record by interested parties in response to the Notice, as prescribed by law, and has determined that the promulgation of the Trade Regulation Rule and its Statement of Basis and Purpose set forth herein is in the public interest.

Accordingly, the Commission hereby promulgates the foregoing Statement of Basis and Purpose, and hereby amends Title 16 of CFR, Chapter 1, Subchapter G, Rules, Regulations, Statements and Interpretations under the Magnuson-Moss Warranty Act, by adding a new Part 703 as follows:

PART 703—INFORMAL DISPUTE SETTLEMENT PROCEDURES

Sec.
703.1 Definitions.
703.2 Duties of warrantor.

MINIMUM REQUIREMENTS OF THE MECHANISM

703.3 Mechanism organization.
703.4 Qualification of members.
703.5 Operation of the mechanism.
703.6 Recordkeeping.
703.7 Audits.
703.8 Openness of records and proceedings.

AUTHORITY: 15 U.S.C. 2309 and 2310.

§ 703.1 Definitions.

(a) "The Act" means the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act, 15 U.S.C. 2301, *et seq.*

(b) "Consumer product" means any tangible personal property which is distributed in commerce and which is normally used for personal, family, or household purposes (including any such property intended to be attached to or installed in any real property without regard to whether it is so attached or installed).

(c) "Written warranty" means: (1) any written affirmation of fact or written promise made in connection with the sale of a consumer product by a supplier to a buyer which relates to the nature of the material or workmanship and affirms or promises that such material or workmanship is defect free or will meet a specified level of performance over a specified period of time, or

(2) any undertaking in writing in connection with the sale by a supplier of a consumer product to refund, repair, replace, or take other remedial action with respect to such product in the event that such product fails to meet the specifications set forth in the undertaking, which written affirmation, promise or undertaking becomes part of the basis of the bargain between a supplier and a buyer for purposes other than resale of such product.

V 40 N 251 DEC 31 1975 XUM

(d) "Warrantor" means any person who gives or offers to give a written warranty which incorporates an informal dispute settlement mechanism.

(e) "Mechanism" means an informal dispute settlement procedure which is incorporated into the terms of a written warranty to which any provision of Title I of the Act applies, as provided in Section 110 of the Act.

(f) "Members" means the person or persons within a Mechanism actually deciding disputes.

(g) "Consumer" means a buyer (other than for purposes of resale) of any consumer product, any person to whom such product is transferred during the duration of a written warranty applicable to the product, and any other person who is entitled by the terms of such warranty or under applicable state law to enforce against the warrantor the obligations of the warranty.

(h) "On the face of the warranty" means: (1) if the warranty is a single sheet with printing on both sides of the sheet, or if the warranty is comprised of more than one sheet, the page on which the warranty text begins;

(2) if the warranty is included as part of a longer document, such as a use and care manual, the page in such document on which the warranty text begins.

§ 703.2 Duties of warrantor.

(a) The warrantor shall not incorporate into the terms of a written warranty a Mechanism that fails to comply with the requirements contained in §§ 703.3–703.8. This paragraph shall not prohibit a warrantor from incorporating into the terms of a written warranty the step-by-step procedure which the consumer should take in order to obtain performance of any obligation under the warranty as described in section 102(a)(7) of the Act and required by Part 701 of this subchapter.

(b) The warrantor shall disclose clearly and conspicuously at least the following information on the face of the written warranty: (1) a statement of the availability of the informal dispute settlement mechanism;

(2) the name and address of the Mechanism, or the name and a telephone number of the Mechanism which consumers may use without charge;

(3) a statement of any requirement that the consumer resort to the Mechanism before exercising rights or seeking remedies created by Title I of the Act; together with the disclosure that if a consumer chooses to seek redress by pursuing rights and remedies not created by Title I of the Act, resort to the Mechanism would not be required by any provision of the Act; and

(4) a statement, if applicable, indicating where further information on the Mechanism can be found in materials accompanying the product, as provided in § 703.2(c).

(c) The warrantor shall include in the written warranty or in a separate section of materials accompanying the product, the following information: (1) either (i) a form addressed to the Mechanism containing spaces requesting the information which the Mechanism may require for prompt resolution of warranty disputes; or (ii) a telephone number of the Mechanism which consumers may use without charge;

(2) The name and address of the Mechanism;

(3) A brief description of Mechanism procedures;

(4) The time limits adhered to by the Mechanism; and

(5) The types of information which the Mechanism may require for prompt resolution of warranty disputes.

(d) The warrantor shall take steps reasonably calculated to make consumers aware of the Mechanism's existence at the time consumers experience warranty disputes. Nothing contained in paragraphs (b), (c), or (d) of this section shall limit the warrantor's option to encourage consumers to seek redress directly from the warrantor as long as the warrantor does not expressly require consumers to seek redress directly from the warrantor. The warrantor shall proceed fairly and expeditiously to attempt to resolve all disputes submitted directly to the warrantor.

(e) Whenever a dispute is submitted directly to the warrantor, the warrantor shall, within a reasonable time, decide whether, and to what extent, it will satisfy the consumer, and inform the consumer of its decision. In its notification to the consumer of its decision, the warrantor shall include the information required in § 703.2 (b) and (c):

(f) The warrantor shall: (1) respond fully and promptly to reasonable requests by the Mechanism for information relating to disputes;

(2) upon notification of any decision of the Mechanism that would require action on the part of the warrantor, immediately notify the Mechanism whether, and to what extent, warrantor will abide by the decision; and

(3) perform any obligations it has agreed to.

(g) The warrantor shall act in good faith in determining whether, and to what extent, it will abide by a Mechanism decision.

(h) The warrantor shall comply with any reasonable requirements imposed by the Mechanism to fairly and expeditiously resolve warranty disputes.

Minimum Requirements of the Mechanism

§ 703.3 Mechanism organization.

(a) The Mechanism shall be funded and competently staffed at a level sufficient to ensure fair and expeditious resolution of all disputes, and shall not charge consumers any fee for use of the Mechanism.

(b) The warrantor and the sponsor of the Mechanism (if other than the warrantor) shall take all steps necessary to ensure that the Mechanism, and its members and staff, are sufficiently insulated from the warrantor and the sponsor, so that the decisions of the members and the performance of the staff are not influenced by either the warrantor or the sponsor. Necessary steps shall include, at a minimum, committing funds in advance, basing personnel decisions solely on merit, and not assigning conflicting warrantor or sponsor duties to Mechanism staff persons.

(c) The Mechanism shall impose any other reasonable requirements necessary to ensure that the members and staff act fairly and expeditiously in each dispute.

§ 703.4 Qualification of members.

(a) No member deciding a dispute shall be: (1) A party to the dispute, or an employee or agent of a party other than for purposes of deciding disputes; or

(2) A person who is or may become a party in any legal action, including but not limited to class actions, relating to the product or complaint in dispute, or an employee or agent of such person other than for purposes of deciding disputes. For purposes of this paragraph (a) a person shall not be considered a "party" solely because he or she acquires or owns an interest in a party solely for investment, and the acquisition or ownership of an interest which is offered to the general public shall be prima facie evidence of its acquisition or ownership solely for investment.

(b) When one or two members are deciding a dispute, all shall be persons having no direct involvement in the manufacture, distribution, sale or service of any product. When three or more members are deciding a dispute, at least two-thirds shall be persons having no direct involvement in the manufacture, distribution, sale or service of any product. "Direct involvement" shall not include acquiring or owning an interest solely for investment, and the acquisition or ownership of an interest which is offered to the general public shall be prima facie evidence of its acquisition or ownership solely for investment. Nothing contained in this section shall prevent the members from consulting with any persons knowledgeable in the technical, commercial or other areas relating to the product which is the subject of the dispute.

(c) Members shall be persons interested in the fair and expeditious settlement of consumer disputes.

§ 703.5 Operation of the Mechanism.

(a) The Mechanism shall establish written operating procedures which shall include at least those items specified in paragraphs (b)–(j) of this section. Copies of the written procedures shall be made available to any person upon request.

(b) Upon notification of a dispute, the Mechanism shall immediately inform both the warrantor and the consumer of receipt of the dispute.

(c) The Mechanism shall investigate, gather and organize all information necessary for a fair and expeditious decision in each dispute. When any evidence gathered by or submitted to the Mechanism raises issues relating to the number of repair attempts, the length of repair periods, the possibility of unreasonable use of the product, or any other issues relevant in light of Title I of the Act (or rules thereunder), including issues relating to consequential damages, or any other remedy under the Act (or rules thereunder), the Mechanism shall investigate these issues. When information which will or may be used in the decision, submitted by one party, or a consultant under § 703.4(b), or any other source tends to contradict facts submitted by the other party, the Mechanism shall clearly, accurately, and completely disclose to both parties the contradictory information (and its source) and shall provide both parties an opportunity to explain or rebut the information and to submit additional materials. The Mechanism shall not require any information not reasonably necessary to decide the dispute.

(d) If the dispute has not been settled, the Mechanism shall, as expeditiously as possible but at least within 40 days of notification of the dispute, except as provided in paragraph (e) of this section: (1) render a fair decision based on the information gathered as described in paragraph (c) of this section, and on any information submitted at an oral presentation which conforms to the requirements of paragraph (f) of this section (A decision shall include any remedies appropriate under the circumstances, including repair, replacement, refund, reimbursement for expenses, compensation for damages, and any other remedies available under the written warranty or the Act (or rules thereunder); and a decision shall state a specified reasonable time for performance);

(2) Disclose to the warrantor its decision and the reasons therefor;

(3) If the decision would require action on the part of the warrantor, determine whether, and to what extent, warrantor will abide by its decision; and

(4) Disclose to the consumer its decision, the reasons therefor, warrantor's intended actions (if the decision would require action on the part of the warrantor), and the information described in paragraph (g) of this section. For purposes of this paragraph (d) a dispute shall be deemed settled when the Mechanism has ascertained from the consumer that: (i) the dispute has been settled to the consumer's satisfaction; and (ii) the settlement contains a specified reasonable time for performance.

(e) The Mechanism may delay the performance of its duties under paragraph (d) of this section beyond the 40 day time limit: (1) where the period of delay is due solely to failure of a consumer to provide promptly his or her name and address, brand name and model number of the product involved, and a statement as to the nature of the defect or other complaint; or

(2) For a 7 day period in those cases where the consumer has made no attempt to seek redress directly from the warrantor.

(f) The Mechanism may allow an oral presentation by a party to a dispute (or a party's representative) only if: (1) both warrantor and consumer expressly agree to the presentation;

(2) Prior to agreement the Mechanism fully discloses to the consumer the following information: (i) that the presentation by either party will take place only if both parties so agree, but that if they agree, and one party fails to appear at the agreed upon time and place, the presentation by the other party may still be allowed;

(ii) That the members will decide the dispute whether or not an oral presentation is made;

(iii) The proposed date, time and place for the presentation; and

(iv) A brief description of what will occur at the presentation including, if applicable, parties' rights to bring witnesses and/or counsel; and

(3) Each party has the right to be present during the other party's oral presentation. Nothing contained in this paragraph (b) of this section shall preclude the Mechanism from allowing an oral presentation by one party, if the other party fails to appear at the agreed upon time and place, as long as all of the requirements of this paragraph have been satisfied.

(g) The Mechanism shall inform the consumer, at the time of disclosure required in paragraph (d) of this section that: (1) if he or she is dissatisfied with its decision or warrantor's intended actions, or eventual performance, legal remedies, including use of small claims court, may be pursued;

(2) The Mechanism's decision is admissible in evidence as provided in section 110(a)(3) of the Act; and

(3) The consumer may obtain, at reasonable cost, copies of all Mechanism records relating to the consumer's dispute.

(h) If the warrantor has agreed to perform any obligations, either as part of a settlement agreed to after notification to the Mechanism of the dispute or as a result of a decision under paragraph (d) of this section, the Mechanism shall ascertain from the consumer within 10 working days of the date for performance whether performance has occurred.

(i) A requirement that a consumer resort to the Mechanism prior to commencement of an action under section 110(d) of the Act shall be satisfied 40 days after notification to the Mechanism of the dispute or when the Mechanism completes all of its duties under paragraph (d) of this section, whichever occurs sooner. Except that, if the Mechanism delays performance of its paragraph (d) of this section duties as allowed by paragraph (e) of this section, the requirement that the consumer initially resort to the Mechanism shall not be satisfied until the period of delay allowed by paragraph (e) has ended.

(j) Decisions of the Mechanism shall not be legally binding on any person. However, the warrantor shall act in good faith, as provided in § 703.2(g). In any civil action arising out of a warranty obligation and relating to a matter considered by the Mechanism, any decision of the Mechanism shall be admissible in evidence, as provided in section 110(a)(3) of the Act.

§ 703.6 Recordkeeping.

(a) The Mechanism shall maintain records on each dispute referred to it which shall include: (1) Name, address and telephone number of the consumer;

(2) Name, address, telephone number and contact person of the warrantor;

(3) Brand name and model number of the product involved;

(4) The date of receipt of the dispute and the date of disclosure to the consumer of the decision;

(5) All letters or other written documents submitted by either party;

(6) All other evidence collected by the Mechanism relating to the dispute, including summaries of relevant and material portions of telephone calls and meetings between the Mechanism and any other person (including consultants described in § 703.4(b));

(7) A summary of any relevant and material information presented by either party at an oral presentation;

(8) The decision of the members including information as to date, time and place of meeting, and the identity of members voting; or information on any other resolution;

(9) A copy of the disclosure to the parties of the decision;

(10) A statement of the warrantor's intended action(s);

(11) Copies of follow-up letters (or summaries of relevant and material portions of follow-up telephone calls) to the consumer, and responses thereto; and

(12) Any other documents and communications (or summaries of relevant and material portions of oral communications) relating to the dispute.

(b) The Mechanism shall maintain an index of each warrantor's disputes grouped under brand name and subgrouped under product model.

(c) The Mechanism shall maintain an index for each warrantor as will show: (1) All disputes in which the warrantor has promised some performance (either by settlement or in response to a Mechanism decision) and has failed to comply; and

(2) All disputes in which the warrantor has refused to abide by a Mechanism decision.

(d) The Mechanism shall maintain an index as will show all disputes delayed beyond 40 days.

(e) The Mechanism shall compile semi-annually and maintain statistics which show the number and percent of disputes in each of the following categories: (1) Resolved by staff of the Mechanism and warrantor has complied;

(2) Resolved by staff of the Mechanism, time for compliance has occurred, and warrantor has not complied;

(3) Resolved by staff of the Mechanism and time for compliance has not yet occurred;

(4) Decided by members and warrantor has complied;

(5) Decided by members, time for compliance has occurred, and warrantor has not complied;

(6) Decided by members and time for compliance has not yet occurred;

V 40 251 DEC 31 75 XUM V

(7) Decided by members adverse to the consumer;
(8) No jurisdiction;
(9) Decision delayed beyond 40 days under § 703.5(e)(1);
(10) Decision delayed beyond 40 days under § 703.5(e)(2);
(11) Decision delayed beyond 40 days for any other reason; and
(12) Pending decision.

(f) The Mechanism shall retain all records specified in paragraphs (a)–(e) of this section for at least 4 years after final disposition of the dispute.

§ 703.7 Audits.

(a) The Mechanism shall have an audit conducted at least annually, to determine whether the Mechanism and its implementation are in compliance with this part. All records of the Mechanism required to be kept under § 703.6 shall be available for audit.

(b) Each audit provided for in paragraph (a) of this section shall include at a minimum the following: (1) evaluation of warrantors' efforts to make consumers aware of the Mechanism's existence as required in § 703.2(d);

(2) Review of the indexes maintained pursuant to § 703.6(b), (c), and (d); and

(3) Analysis of a random sample of disputes handled by the Mechanism to determine the following:

(i) adequacy of the Mechanism's complaint and other forms, investigation, mediation and follow-up efforts, and other aspects of complaint handling; and

(ii) Accuracy of the Mechanism's statistical compilations under § 703.6(e). (For purposes of this subparagraph "analysis" shall include oral or written contact with the consumers involved in each of the disputes in the random sample.)

(c) A report of each audit under this section shall be submitted to the Federal Trade Commission, and shall be made available to any person at reasonable cost. The Mechanism may direct its auditor to delete names of parties to disputes, and identity of products involved, from the audit report.

(d) Auditors shall be selected by the Mechanism. No auditor may be involved with the Mechanism as a warrantor, sponsor or member, or employee or agent thereof, other than for purposes of the audit.

§ 703.8 Openness of records and proceedings.

(a) The statistical summaries specified in § 703.6(e) shall be available to any person for inspection and copying.

(b) Except as provided under paragraphs (a) and (e) of this section, and paragraph (c) of § 703.7, all records of the Mechanism may be kept confidential, or made available only on such terms and conditions, or in such form, as the Mechanism shall permit.

(c) The policy of the Mechanism with respect to records made available at the Mechanism's option shall be set out in the procedures under § 703.5(a); the policy shall be applied uniformly to all requests for access to or copies of such records.

(d) Meetings of the members to hear and decide disputes shall be open to observers on reasonable and nondiscriminatory terms. The identity of the parties and products involved in disputes need not be disclosed at meetings.

(e) Upon request the Mechanism shall provide to either party to a dispute: (1) access to all records relating to the dispute; and

(2) Copies of any records relating to the dispute, at reasonable cost.

(f) The Mechanism shall make available to any person upon request, information relating to the qualifications of Mechanism staff and members.

Effective: July 4, 1976.

Promulgated by the Federal Trade Commission December 31, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

PART IV:

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

■

CORRELATION OF TEXTILE AND APPAREL CATEGORIES WITH TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED

Revisions

V40251 DEC 31 75 XUM

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CORRELATION OF TEXTILE AND APPAREL CATEGORIES WITH THE TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED

DECEMBER 23, 1975.

There is published below a list of the Tariff Schedules of the United States Annotated numbers specifying changes in the arrangement of the cotton, wool, and man-made fiber categories used by the United States in administering the textile trade agreements program. A full description of the textile and apparel products falling within each of the cotton, wool, and man-made fiber categories may be obtained by using the Tariff Schedules of the United States Annotated which also provides category placement for the item numbers covered by the program. The list of Tariff Schedules of the United States Annotated numbers published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010) is hereby amended effective January 1, 1976.

Revised pages, in loose-leaf form, of the Correlation are available upon request to the Office of Textiles, BRTA/DIBA, Room 2815, U.S. Department of Commerce, Washington, D.C. 20230.

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements and Deputy Assistant Secretary for Policy-DIBA, and Director, Bureau of Resources.

Would you like to know IF ANY CHANGES HAVE BEEN MADE IN CERTAIN TITLES OF THE CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "List of CFR Sections Affected."

?

List of CFR Sections Affected

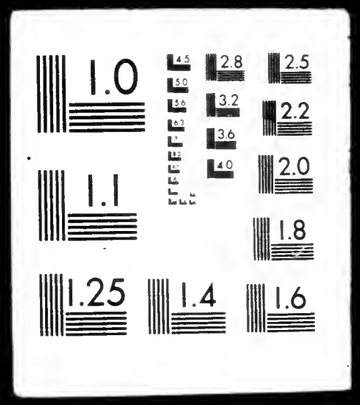
$10.00 per year

The "List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Also available on a subscription basis . . .

The Federal Register Index

$8.00 per year



Indexes covering the contents of the daily Federal Register are issued monthly and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are also carried.

A finding aid is included at the end of each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Order from: Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

Note to FR Subscribers: FR Indexes and the "List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

RESOLUTION CHART

100 MILLIMETERS

INSTRUCTIONS Resolution is expressed in terms of the lines per millimeter recorded by a particular film under specified conditions. Numerals in chart indicate the number of lines per millimeter in adjacent "T-shaped" groupings.

In microfilming, it is necessary to determine the reduction ratio and multiply the number of lines in the chart by this value to find the number of lines recorded by the film. As an aid in determining the reduction ratio, the line above is 100 millimeters in length. Measuring this line in the film image and dividing the length into 100 gives the reduction ratio. Example: the line is 20 mm. long in the film image, and 100/20 = 5.

Examine "T-shaped" line groupings in the film with microscope, and note the number adjacent to finest lines recorded sharply and distinctly. Multiply this number by the reduction factor to obtain resolving power in lines per millimeter. Example: 7.9 group of lines is clearly recorded while lines in the 10.0 group are not distinctly separated. Reduction ratio is 5, and 7.9 x 5 = 39.5 lines per millimeter recorded satisfactorily. 10.0 x 5 = 50 lines per millimeter which are not recorded satisfactorily. Under the particular conditions, maximum resolution is between 39.5 and 50 lines per millimeter.

Resolution, as measured on the film, is a test of the entire photographic system, including lens, exposure, processing, and other factors. These rarely utilize maximum resolution of the film. Vibrations during exposure, lack of critical focus, and exposures yielding very dense negatives are to be avoided.

THE END
